The chief temple at Gokarn is that dedicated to Śiva under the title of Mahābalesvara, 'the very powerful Lord,' built of granite in the Dravidian style. It contains the famous *linga* known as Ātma, or 'self,' which, in his wrath at the creation of the world by Brahmā, Śiva created out of his own essence, and long wore round his neck. There are also numerous shrines named after various gods and saints who visited the place and performed austerities here, including Brahmā, Viṣṇu, Śiva, the ṛṣi Agastya, Rāma, and Ravana. The place is visited by hosts of pilgrims and religious mendicants, as well as by those who bring the bones and ashes of deceased relatives, which they consign to the waters, believing that this ensures for them eternal felicity. Bathing here cleanses from all sin, even that of murdering a Brāhman. The mention of the place by Kālidāsa carries back its sanctity to the beginning of the 7th cent. A.D. (*IGI* ii. [1908] 17). It is also mentioned in the *Mahābhārata* and *Rāmāyaṇa* (J. Muir, *Original Sanskrit Texts**, 1873, iv. 285; R. T. H. Griffith, *The Rāmāyaṇa of Vālmiki*, 1895, p. 54), the sacred books declaring that he who spends three nights here and worships Śiva gains as much merit as if he performed the horse-sacrifice; while he who remains twelve nights becomes pure in heart. Dr. John Fryer, one of the early travellers to India, visited Gokarn in 1675, and has left an interesting account of the place.

GOKUL (Skr. *gokula*, 'a herd of kine,' 'a cow-house').—A sacred town and place of pilgrimage situated on the left bank of the river Jumnā, in the Muttra (Mathura) District of the United Provinces of Agra and Oudh; lat. 27° 28' N., long.

77° 46' E.; sacred as the scene of many legends connected with Kṛṣṇa. It is in reality only the waterside suburb of Mahābān (7.7.); and all the traditional sites of Kṛṣṇa's adventures which the *Purāṇas* fix at Gokul are also shown at Mahābān, which is the place alluded to whenever Gokul is mentioned in Skr. literature. But, as it retains its ancient name, this suburb is considered much more sacred than the original town. It is specially important as the headquarters of the Vallabhāchārya or Gokulastha Gosāins,

'the Epicureans of the East, who are not ashamed to avow their belief that the ideal life consists rather in social enjoyment than in solitude and mortification. Such a creed is naturally destructive of all self-restraint, even in matters where indulgence is by common consent held criminal; and the profligacy to which it has given rise is so notorious that the late Mahārājā of Jaypur was moved to expel from his capital the ancient image of Gokul Chandra, for which the sect entertained a special veneration. He further conceived such a prejudice against Vaiṣṇavas in general, that all his subjects were compelled, before they appeared in his presence, to mark their forehead with the three horizontal lines that indicate a votary of Śiva. The scandalous practices of the Gosāins and the unnatural subserviency of the people in ministering to their gratification received a crushing exposure in a *cause célèbre* for libel tried before the Supreme Court of Bombay in 1861' (Growse, p. 284).

LITERATURE.—F. S. Growse, *Mathura, a District Memoir*, Allahabad, 1883, p. 282 ff.; *JASB* xli. 313 ff.; A. Führer, *Monumental Antiquities and Inscriptions of the North-west Provinces and Oudh*, do. 1891, p. 101. For the practices of the Vallabhacharya Gosāins, see [Karsandas Mōhi] *Hist. of the Sect of the Mahārājas or Vallabhacharyas in W. India*, London, 1865, *Report of the Maharaj Libel Case, and of the Bhaktia Conspiracy Case connected with it*, Bombay, 1862.

GOLDEN AGE.—See AGES OF THE WORLD, FALL (Ethnic).

GOLDEN RULE.—The Golden Rule, as it is often called, is found in two different connexions, and in slightly differing forms, in Mt 7¹² and Lk 6³¹. In Mt. it occurs in the Sermon on the Mount in the form:

'All things therefore whatsoever ye would that men should do unto you, even so do ye also unto them: for this is the law and the prophets.'

In Lk. the saying runs:

'And as ye would that men should do unto you, do ye also to them likewise.'

While in Lk. the maxim is found in immediate connexion with other sayings bearing on conduct towards our neighbours, in Mt. this is not equally the case; it follows on directions relating to instance in prayer and on the promise that God will give good things to those that ask Him. It has, therefore, been argued that, while the saying formed part of the original *Logia* on which, in this portion of his Gospel, the Evangelist is drawing, St. Matthew must have wrongly inserted it in this particular connexion; and that it would more appropriately find a place among the precepts relating to our conduct to our neighbour in 5³⁰⁻⁴⁰, or should follow on vv. 1.² and v. 6 of the 7th chapter. In the latter case it would seem, however, that the intermediate verses and not the saying itself have been wrongly inserted. The argument that the saying has got into a wrong place in Mt. is not very convincing; the connexion between it and the immediately preceding verses is not really very forced or unnatural. The train of thought would seem to be that, as God gives good gifts to those who ask Him, so we as Christians ought to render to others the sort of service, the good things, which we should wish them to render to us. That this is the connexion of thought which the earlier translators recognized in the passage is made probable by the fact that most of the early Latin versions, though not the Vulgate itself, render: 'Whatever good things, therefore, you wish that others should do unto you, even such do unto them; for this is the law and the prophets.'

We may observe that both St. Matthew and St.

Luke, though they differ as to the precise context in which the words occur, equally regard them as a summary of the principles by which the conduct of Christians in respect to their neighbours is to be governed. And this is the position which the maxim holds in the earliest quotations of it which are to be found in Christian literature outside the Gospels. The earliest of them occurs in the well-known passage in the Western (Cod. D) recension of the decree of the Council of Jerusalem, in Ac 15²³. It runs as follows:

'It has seemed good to the Holy Spirit, and to us to lay upon you no greater burden than these necessary things: to abstain from meats offered to idols, and from blood, and from fornication, and whatsoever ye do not wish should be done unto you not to do (or do not do) to others—from which if ye keep yourselves ye shall do well, being borne along in the Holy Spirit—Fare ye well.'

Now, there has arisen a considerable controversy between Blass and Harnack whether the Western or the text of other great uncial MSS represents the earlier form of text in the Acts, and the controversy has especially ranged itself about this particular passage. Blass holds that Cod. D, originally composed probably at Rome, represents the first rough draft of the Acts put forth by St. Luke; while the ordinary text gives us the more polished and elaborated recension which he ultimately dedicated to Theophilus. Harnack, on the other hand, maintains that the text preserved in the non-Western MSS embodies St. Luke's original recension, and that Cod. D represents a later and comparatively ignorant recension, dating probably from early in the 2nd century. This, on the whole, is the view taken also by W. M. Ramsay. The question, however answered, is not, for our present purpose, of first-rate importance; for those who regard the insertion of the Golden Rule in this passage as the work of a later editor still assign to that editor a very early date—not later than the opening years of the 2nd cent.—so that in any case the appearance of the saying in this connexion is a proof of the wide acceptance which the Rule, in this negative form at least, obtained in the early Church. And that, in spite of its absence from the received text, it continued to hold a place in this passage of the Acts down to a comparatively late date, we have interesting evidence from the 'Dooms of King Alfred.' One of them, quoting this passage, runs as follows:

'It seemed good to the Holy Ghost, and to us, that we should set no burden upon you above that which it was needful for you to bear, now, that is, that you forbear from worshipping idols, and from tasting blood, or things strangled, and from fornication, and that which ye will that other men should not do unto you, do ye not that to other men.'

On this last precept the king observes:

'From this one doom a man may remember that he judge every man righteously; he need heed no other doom book. Let him remember that he adjudge to no man that which he would not that he adjudge to him, if he sought judgment against him'

Thus emphatically, but reverently, does the king enforce our Lord's own comment on the principle 'This is the Law and the Prophets' (see *Expt* x. [1899] 395 ff., on Ac 15²³); and, for the reference to King Alfred's 'Dooms,' Estlin Carpenter and G. Harford's *Composition of the Hexateuch*, ed. 1902, p. 10).

We observe, further, that in this earliest quotation the form in which the saying is presented is not the positive form in which it appears in both Mt. and Lk., but the negative form, i.e. as a prohibition, and not as a command: 'Do not do to others that which you would not they should do to you.' We note that the same characteristic is observable also in the two earliest quotations in which the phrase is to be found in post-Biblical Christian writings. The first of them is at the opening of 'The Way of Life' as presented in the *Didache*:

'First of all, thou shalt love the Lord thy God who made thee. Secondly, thou shalt love thy neighbour as thyself. All

things, then, whatsoever thou wouldest not wish to be done to thee, do thou also not do to another.'

The second reference occurs in the recently recovered *Apology of Aristides*. Towards the close (ch. 15), in giving a summary of Christian belief and practice, Aristides uses the following words:

'They [i.e. the Christians] do not commit adultery, do not commit fornication, do not bear false witness, do not covet their neighbour's goods, honour their father and their mother, love their neighbours, judge justly, whatever they do not wish to be done to them they do not do to another; they exhort those who injure them and make them friendly to themselves.'

Harnack considers that both these passages may very likely be taken from an early Christian catechism in wide use in different Churches; but, whether they are so or not, the appearance of the Golden Rule in two distinct summaries of Christian practice testifies to the importance attached to it in the early Church.

But the precept, at least in its negative form, is by no means confined to Christianity; it is to be found in the earlier Judaism, and on the lips of philosophers outside both Judaism and Christianity. For the first we may refer to To 4^{1st}, which runs: 'Take heed to thyself, my child, in all thy works, and be discreet in all thy behaviour; and what thou thyself hatest, do to no man.' Hillel, the famous Jewish Rabbi, when asked for a short summary of the Law in relation to a man's neighbour, is reported to have given it in this form: 'Whatsoever thou wouldest that men should not do to thee, do not do that to them' (cf. Bab. Shabb. 31a). For other parallels, see C. Taylor, *Sayings of the Jewish Fathers*, Cambridge, 1897, p. 142 f., and cf. Hirsch, 'Golden Rule,' in *JE* vi. (1904) 21 f.

Among the Greeks, Isocrates is mentioned as enunciating the maxim, 'Do not do to others that at which you would be angry if you suffered it from others' (*Nicoles*, 61b). Plato, in more than one passage in the *Republic* (e.g. iv. 443), lays down a rule of a similar purport. Aristotle, when questioned how we should behave to our friends, is quoted by Diog. Laert. (v. 21) as saying: 'Exactly as we would they should behave to us' (cf. *Nic. Eth.* ix. 8). See also Epictetus, fr. 42.

In the wider world outside we find two further enunciations of the precept—one in a precise, the other in a less definite, form. Confucius, drawing, as he said, the maxim from the study of man's mental constitution, laid it down in the following terms: 'What you do not like if done to yourself, do not do to others' (cf. J. Legge, *Chinese Classics*, Hongkong, 1861-72, i. 191 f.). This is the Golden Rule in its negative form, but he expressed it also in the positive shape of 'reciprocity' or 'as heart to heart.' This was embodied by him in a characteristic Chinese symbol, and is given in places as the ultimate rule of life (*EBr* 11, art. 'Confucius,' p. 912). Something like the same thought appears in the writings of his older contemporary Buddha; but here no precise words give expression to the apothegm; his principle more nearly approaches to the maxim of St. Paul, 'Rejoice with them that rejoice; weep with them that weep' (Ro 12¹⁵); and a certain self-centredness in his system, which makes the doing of kindnesses to others valuable mainly on account of the merit thus earned for a man's self, makes it clear that such a principle as our Lord enjoins was not altogether cognate to his thought (Copleston, *Buddhism Primitive and Present*, London, 1902; but cf. A. J. Edmunds, *Buddhist and Christian Gospels*, Philad. 1908, § 12).

It would appear, then, that as a negative or limiting principle, a principle of justice, the maxim obtained a wide acceptance among the best and most enlightened intellects of the ancient world; but it was for them a restraining principle, a guide of what they ought not to do rather than of what

they ought. With our Lord, however, it has a wider sweep than this: with Him it is a rule of universal application, a rule of benevolence embracing all our relations to our fellow-men: 'All things therefore whatsoever ye would that men should do unto you, even so do ye also unto them: for this is the law and the prophets.' As such it has been accepted, and acted upon, by Christians ever since. But, as thus interpreted, it is obvious that the principle needs explanation and some limitation. Almost from the outset this seems to have been felt. We have already noticed that in some of the early Latin versions the words 'good things' were inserted after the word 'whatsoever.' This implies clearly that those who made the insertion recognized that it was not everything that we might be said, or thought, or fancy ourselves to wish for ourselves that we are bound to do for others. We might wish for ourselves, for instance, some form of illicit or undesirable pleasure; and we certainly are not bound to provide for others such pleasures or to assist them in obtaining them for themselves. Common sense clearly suggests such a limitation as this. Augustine, in his Commentary on St. Matthew, gets over the difficulty in another way. He draws a distinction between 'desire' and 'wish,' and will not admit that a man, however much he may desire, can really *wish* or *wish* for himself that which is not good. This explanation precludes the possibility of our ever doing anything which is not good to others, since we cannot *wish* anything which is not good for ourselves.

Secondly, the maxim does not imply that we should always do to others exactly that which we should wish under our own present circumstances (which may be quite different from theirs) to be done to us. What the maxim implies is that we are, as far as possible, to put ourselves in the place of others; to consider what we would wish to be done to us, *were we in their circumstances*; to adopt the rôle, as Adam Smith puts it, of impartial spectators; and then, having made up our minds what in the circumstances, as so viewed, we should wish to be done to us, to act accordingly.

LITERATURE.—In addition to the authorities cited in the art., see J. G. Tasker, art. 'Golden Rule,' in *Hastings' DCG.*

W. A. SPOONER.

GONDS.—1. Origin, names, and physical characteristics.—The Gonds are an important forest-tribe found in the central parts of the Indian peninsula, at the census of 1901 numbering 2,286,913, of whom the great majority, 1,926,556, are found in the Central Provinces, and smaller numbers in Bengal, Berar, Haidarâbâd, and Madras.

The origin of the name is disputed. They call themselves *Kôter* or *Kôitûr*, a plural appellation regularly formed from *Kot*; in Ohhatisgarh they call themselves *Kôyd*, and high-class members of the tribe object to being called *Gond*, as this name implies that they are cow-killers and beef-eaters (Brett, *Gazetteer Ohhatisgarh*, 47; Oppert, *Original Inhabitants*, 109, 146; *IA* viii. 84; Caldwell, *Dravid. Gram.*, 38). Hislop, the best authority on the tribe, derives the name *Gond* from Telugu *gonḍa*, 'a mountain,' in the sense that they are a hill-tribe (*Papers*, 2; Oppert, 18), which is more probable than the theory of Cunningham, that the name is a corruption of *Gauda*, the ancient term to designate Central Bengal.

Though the Gonds, probably under Hindu influence, trace a legendary connexion with N. India, which they exhibit by burying their dead with the feet of the corpse towards the Himâlaya, the supposed original home of their race, their physical appearance and speech connect them with the so-called Dravidian races of S. India. They include at the present time a group of tribes with a general physical uniformity, but differing according as they have been more or less exposed to Hindu or to other foreign influences.

Capt. J. Forsyth, who was well acquainted with them, writes: 'Most of the chiefs possess the tall, well-proportioned figure and light complexion of the Hindu, but allied with more or less of the thickness of lip and animal type of countenance of the

pure aborigine. The mass of the tribes, on the other hand, are marked by the black skin, short squat figure, and features of the negro (sic) race of humanity. Between them are found certain sections of the tribes, who would also seem to have been imbued with something of the foreign blood, though in a less degree than the chiefs. Like the latter, they affect much Hindu manners and customs; and it is probable that they, too, are the result of some connexion in long past times between immigrant Aryans and the indigenous tribes' (*Highlands of Central India*, 9, 156). Some of the women are 'more like monkeys than human beings'; others 'finer animals by far than the men, and here Hindu blood may be fairly suspected.' Hislop (p. 1) says: 'They have a roundish head, distended nostrils, wide mouth, thickish lips, straight black hair, and scanty beard and moustache; a few have curly hair, but not of the Negro type.'

The same conclusion is reached from a study of their language.

There are some Gonds who speak their own Dravidian language, others a broken Aryan dialect—both known as *Gondi*. The Dravidian form of speech has a common ancestor with Tamil and Kanarese, but shows little connexion with Telugu, appearing in various dialects, such as *Maṭi* or *Maṭiā*, and *Paṭi*, both spoken in the Bastar State; and *Gaṭṭu* or *Goṭṭe*, the dialect of the Hill Kôia. The true *Gond* speech is known in Chanda and the Nizâm's Dominions as *Nâiki*, and in Berar as *Kôlami* and *Ladhâdhi*, the latter closely connected and differing from other dialects. *Gondi* has no literature, except translations of the Gospels and the Book of Genesis (G. A. Grierson, *Census of India*, 1901, i. 279, 287 f.; cf. Caldwell, 513 ff.).

2. The tribal legends.—The legends of the tribe have been considerably modified by Hindu influence; but some are original.

They believe that the sky once lay close upon the earth; an old woman, while sweeping, knocked her head against the sky and pushed it away; since then it has remained separate from the earth (Russell, *Census Rep. Central Provinces*, 1901, i. 94; cf. Tylor, *PC*, 1903, i. 322 ff.; Lang, *Myth. Rit.*, and *Rel.*, Lond. 1896, i. 291). Eclipses are accounted for by a myth of the earth being turned upside down, and nobody being left alive save one *Dom* (q.v.); the gods, wishing to re-people the earth, borrowed seed-grain from the *Dom*; this was never repaid, and eclipses are caused when he, now king of the *Doms* in the other world, demands it from the sun and moon—a story which seems to be the basis of the myth of *Râhu* in the *Purâṇas* (Russell, i. 94; cf. Crooke, *PR*, 1896, i. 20 f.). A more elaborate story is that of *Lingo*, a name by some connected with the *linga*, or phallic emblem. It tells, in order, of the creation of the world and of the Gonds; of how they were driven into a cave by *Siṃha*, *Mahâdeva*; of the birth, death, and life of *Lingo*, the tribal hero; of his revival and how he delivered the Gonds; and how he instituted marriage rites among them. Forsyth (p. 188 ff.), who versified the version recorded by Hislop (pt. fil. 1 ff.), justly regards it as largely due to Hindu inspiration.

3. History of the tribe.—The early history of the Gonds, except so far as it can be gathered from the tribal legends, is a blank.

They have been identified with the *Kandaloi* of Ptolemy (vii. 1. 66; J. W. McCrindle, *Ancient India as described by Ptolemy*, Calcutta, 1885, p. 159 f.), and the *Phyllites*, with whom they are connected, are supposed to be either *Bhila* (q.v.), or *Pulindas*—a term applied to various aboriginal races (but see Oppert, 82 n.). The Gonds are remarkable as being the only Indian forest-tribe which has established flourishing monarchies. Of these, four dynasties ruled the greater part of the present Central Provinces from about the 14th down to the 18th cent. of the Christian era (A. E. Nelson, *Gazetteer Jubbulpore*, 47 ff.; O. Grant, *Gazetteer Central Provinces*, 1901, p. 281 ff.). These kingdoms gained power on the destruction of Hindu authority in N. India by the Muhammadans, and on the disruption of the independent Muhammadan powers of S. India by the Mughal Empire. They attained a fairly high type of civilization, as is shown by the great irrigation works constructed by them. They finally fell before the *Marâṭhas* (Grant, *op. cit.*, Intro. lxxiii ff.).

4. Social position.—It is remarkable that the Gonds, who are now a subject race, have never fallen into a state of degradation, like the menial castes in other parts of the country.

The explanation is that they were protected by the inaccessibility of their country from conquest such as overtook the other aboriginal races; they long held the place of rulers, and were not ousted from possession of their lands by the new races, which appeared as colonists rather than conquerors (Russell, i. 179 f.; Grant, Intro. cxli, cxvii). At present several of the feudatory States in the Central Provinces are ruled by *Gond* chiefs, who belong to the aristocratic branch of the tribe, and call themselves *Râj*, or 'royal,' Gonds. These are gradually asserting their claims to be regarded as *Râjputs*; and one great *Râjput* sept, the *Chandel*, is believed to be of *Gond* origin (Sleeman, *Rambles and Recollections*, London, 1893, i. 231; Smith, *Early Hist. of India*, Oxford, 1908, pp. 800 f., 879 f.). In the plains the lower class, known as *Nâiki*, *Dhur*, or *Dhurv* Gonds, are in a state of serfage, making their living by labour. Between these two groups come the really wild Gonds, of whom the most primitive are the *Maṭiā*, or 'tree,' Gonds, who serve no master, and who subsist by hunting or by a rude system of burning the

jungle and sowing seed in the ashes—a process known as *dahya*—and collecting various kinds of jungle produce. All the authorities believe that these are a peaceable, truthful, law-abiding people when they have not been corrupted by contact with the Hindus of the plains. Under British rule over-indulgence in intoxicating liquors, one of their chief vices, has been greatly checked (Forsyth, 159 ff.; Grant, 34 ff., 187 f.; Hislop, 7).

5. Domestic rites.—The rites of birth, marriage, and death are of the normal Dravidian type (see artt. CENTRAL PROVINCES, vol. iii. p. 311 ff., DRAVIDIANS [North], vol. v. p. 1 ff.).

6. Religion.—‘In religion,’ says Forsyth (p. 148), ‘the Gōnd tribes have passed through all the earlier stages of belief, and are now entering on that of idolatry pure and simple.’ Every prominent mountain has a spirit, which must be satisfied before its slopes can be cleared. When a field is sown, the field-god, Kodopen, said to represent the god of the *kodo* millet (*Paspalum serobiculatum*), but more probably a hill-god, is propitiated. The tiger-god has a hut built for him in the jungle so that he may not approach their dwellings. Their worship is chiefly devoted to the propitiation of the malignant Mother-goddess, known as Mātā Devī, the goddess of smallpox, or Mari, who presides over cholera. In her more awful form she is known as Dantēsvārī, ‘the goddess with teeth,’ at whose shrine in the Bastar State human sacrifices are said to have been performed in early days (Grant, 181, 327; Brett, 39). Her consort is Budhā or Būrhāpen, sometimes known as Thākūr, ‘lord,’ who is worshipped as a house-deity. In Seoni he lives in a *sāj* tree (*Terminalia tomentosa*), which is held sacred (Russell, *Seoni Gazetteer*, 68). He has now come to be identified with the Hindu Śiva, and his spouse with Kālī. Animism is represented by the cult of objects supposed to be the abode of spirits. Pharsapen is represented by an iron spear-head (Skr. *paraśu*). The trident said to have been received by the ancestors of the Bastar family from the goddess Bhuvaneśvārī at Maṭhūrā, and the sword given by Mānikyā Devī or Dantēsvārī, their family-goddess, are still worshipped—a record of the impression made upon a tribe in the Stone Age by the introduction of iron (Brett, 36 f.). Pharsapen is supported by Ghāghrāpen, the bell-god, the bell being sacred, as among the Todas (Rivers, *The Todas*, London, 1906, p. 424; cf. *PR*² i. 168); and by the chain-god, Sānkarpēn, represented by a few links of a chain supposed to be endowed with powers of motion, but really the *gurdā*, or magical chain of the allied tribes, with which hysterical patients are beaten to drive evil spirits from them (Grant, 275; *PR*² i. 99, 155). A favourite household-god is Dūlhādeo, the spirit of a bridegroom who died in a tragical way at his wedding (Sleeman, i. 123 f.; *PR*² i. 119 ff.). Tree-worship is found in that of the bamboo and *sāj* tree (Hislop, iii. 47). The spirits of the dead are propitiated, at least for a year after death; those of distinguished persons are worshipped for some years or generations at earthen shrines, on which sacrifices are yearly offered—a cult which, among the more advanced branches of the tribe, takes the Hindu form (Hislop, 17, 20; Kitts, *Census Rep. Berar*, 1881, p. 79). In Sambalpur the ancestors are represented by small pebbles kept in the holiest part of the house, the kitchen, and periodically worshipped (L. S. S. O’Malley, *Sambalpur Gazetteer*, 75). Many of the exogamous sects are of totemic origin; but totemism seems to be a purely social institution (Russell, *Census Rep.*, 1901, i. 189 f.). Like all secluded races, the Gōnds are reputed sorcerers, and witchcraft in a cruel form is sometimes found among the jungle groups (Grant, *Introd.* cxxx ff., 110, 156). Serpent-worship appears, but it is done in secret (ib. lxxvi). At the beginning of the sowing season, the Gāiti branch set up a line of stones represent-

ing the gods, daub them with vermilion, and make offerings to them; at harvest Būrhādeo is worshipped in the form of a small copper coin; and sacrifices, which in former days included that of a cow, are made to him (Hislop, 22). Among the allied tribes, like the Majhwārs and Kōyis, the beliefs and usages are of a similar type (Crooke, *PR* iii. 413 ff.; Thurston, *Castes and Tribes*, iv. 37 ff.; Bilgrami-Willmott, *Sketch of the Nizam’s Dominions*, i. 325 f.; Risley, *TC*, 1891, i. 292 f.; Dalton, *Descrip. Ethnol. of Bengal*, 275 ff.). For the *baigā* priests of the tribe, see *ERE* ii. 333.

GONGS AND BELLS.—1. Scope of the present article.—Among instruments of percussion the bell and the gong hold the first place, either one or other being found among most races of mankind. To define the difference between bell and gong is not easy. A bell is a hollow cup-shaped body made of cast metal, giving a sonorous vibration throughout its entire circumference when struck by a metal clapper usually hung inside. A gong, on the other hand, is usually made of hammered malleable metal, flat or approximately flat in form, and is struck by hand with a soft mallet. Many of the Chinese ‘bells’ are made without an internal clapper, and are struck on the outside edge with wood. Presumably they are gongs, although bell-shaped. The essential differences, then, are that a bell is struck by a metal clapper, while a gong has a hammer of material other than metal, and that the sound of a bell is usually obtained by the movement of the bell, while the gong remains stationary. The small crotal bells and bells made of riveted plates, which are used for religious purposes by some peoples, are included in this article.

Onomatopoeia plays a large part in the title of bells. The Lat. *tintinnabulum* suggests the tinkling of the hand-bell. The bellow of the large mass suggests ‘bell,’ from Lat. *bellare*, O.E. *bellan*. ‘Gong’ is suggested by γογγύζω, ‘to murmur.’ *Campana* is used in later writers for a large bell, and *nola* for the small hand-bell.

The object of the present article is to give by typical examples some idea of the significance of the religious use of bells.

2. Origin of bells and gongs.—As to the origin, there is considerable difficulty. Wide search among encyclopædias and books dealing with campanology meets with an almost unvarying intimation that ‘the origin of bells is lost in antiquity; they probably came from the East.’ Such a statement is unsatisfactory enough. Some bolder writers refer to the bells on Aaron’s high-priestly clothing (Ex 28³²) as the earliest mention. But these probably were not really bells but merely jingles—small carved pieces of metal which emitted sound by striking against the metal pomegranate, and not by a clapper. The two formed an ornamental design similar to the lotus and bud border

used in Egypt (*HDB*, art. 'Bell'). Then, too, there is evidence of the art of bell-making being practised in Japan during the 8th cent. B.C., at the time when large bronzes were cast for the temples of Buddha.¹

Such evidence, however, does not help us to find out the origin of these instruments of percussion, and we are reduced to conjecture. Quite probably bells may date from the Iron Age. Fairies and witches were creatures belonging to the more ancient Stone Age which was passing away; and the new metal, iron, was considered hateful and harmful to them.² The metal itself was a powerful prophylactic, but the sound of metal had even greater virtue for restraining their evil influence. It would soon be found that by striking the edge of metal pots a more resonant note could be obtained than from an iron bar; and from this it is but a small advance to turn an iron basin upside down and fasten some sort of a clapper inside. Armed thus, man would feel himself fairly safe from the attacks of his spiritual foes. Such a possible explanation of the origin of bells and gongs has at least the merit of being simple and of complying with the stereotyped phrase, 'the origin of bells is lost in antiquity.'

3. Early uses of bells.—Probably the earliest use of bells was, as has been said, prophylactic. Man, who believed the air to be crowded with demons eager to destroy him, used the most efficacious safeguards that came to hand. Among all peoples we find the bell used for this purpose, and even in the Christian era this superstition has survived.

The gong of Dodona³ mentioned by Aristotle (*Suidas*, s.v. *χαλκίον Δωδωναίων*) seems to have consisted of two pillars supporting respectively a cauldron (*ἀβητρα*) and the figure of a boy (*παῖδα*) grasping a whip, whose bronze lashes, when swayed by the wind, struck the inside of the bronze cauldron and produced a resonant sound which was considered to have oracular intent. Theocritus (ii. 36) refers to bronze as employed in all kinds of purificatory ritual. Moreover, it was considered as itself pure, while the sound of it was an averter of pollution. From many Latin sources we know that bronze was beaten at eclipses to avert the evil. Bells were sometimes placed in tombs. A bas-relief in the Louvre (Fröhner, *Cat.* 545; S. Reinach, *Répertoire de la statuaire grecque et rom.*, Paris, 1897-98, i. 101) represents the sacrifice of a ram to Attis, from an old oak whereon are suspended two bells. On a coin representing Cybele enthroned with Attis at her side two bells are seen in the foreground. P. Gusman (*Pompeii*, Paris, 1899, p. 146) gives illustrations of many little bells found at Pompeii, and speaks of them as used 'comme moyen de protection.' The British Museum possesses a small bronze bell (*Cat.* 318, fig. 11) from the temple of the Kabiri at Thebes. The attendants of Dionysus are frequently represented as carrying tympana edged with a row of small bells. A small bell of gold found on the Esquiline has an inscription referring to the evil eye. Moreover, to avert evil influences, bells were attached to the heads of horses used in a procession of criminals led to execution.

Possibly the gongs or bells attached to the façade of the second temple of Jupiter Capitolinus have this prophylactic object. Triumphant generals hung bells on their horses' heads to avert the evil eye. This is found not only in Greece but also on sculptures in Assyria.⁴

³ A. B. Cook, *JHS* xxii. [1902] pt. 1, p. 5 ff.

⁴ For further illustrations of such usage, see Smith's *Dict. of Gr. and Rom. Ant.*, London, 1890, s.v. 'Tintinnabulum.'

Among the Greeks a bell was used at funerals to keep off the crowd and warn the *flamen Dialis* lest he be polluted by sight or sound of funeral music. But there is evidence of usage other than as a prophylaxis. Bells were used for the opening of market or the baths, and by sentries on night duty. The priests of Proserpine at Athens rang bells when calling the people to worship. Small bells were similarly used in the mysteries of Bacchus. But for the most part the Greeks had wooden rattles, such as are now used by Muslims. The use of bells for summoning to worship arose in the Far East, and was not customary in countries bordering the Mediterranean till late Roman times.¹ In Egypt, Palestine, and Assyria, people were summoned to worship by the sound of the trumpet. The precise purpose of the bells attached to high-priestly robes seems debatable. Arabian princesses have bells on their garments to announce their movements and warn people to keep out of the way. No one was allowed to enter the Persian court without giving audible warning, and perhaps the bells on Aaron's robe were intended to announce his movements to Jahweh. An alternative suggestion is that the stillness of the Holy Place was full of peril to intruders. The air became charged, as it were, with the Divine influence, and this was dangerous to mortals. In order to dissipate this noxious condition, the high priest's robe was decked with bells, which, by stirring the laden air, made it possible for man to enter the Holy Place. More obviously the jingles are explained as useful to let the people know how the high priest was progressing with his ministrations. The horse-bells in Zec 14²⁰ are inscribed 'Holy unto the Lord.' The object is not clear. It may have been intended to add efficiency to any magical powers the bells possessed, or else the bells may have been thought of as sending far and wide the message of holiness.

4. Christian use of bells.—At the dawn of the Christian era bells were used, but the Greek and Roman style of architecture did not readily lend itself to the use of large bells in buildings. During the first three centuries the use of bells for summoning the faithful to worship was impossible, owing to the certainty of persecution; but it is probable that soon after the Edict of Milan (A.D. 313) the Christian Church availed itself of this obvious means of calling to worship. The introduction of large bells is attributed to Paulinus, Bishop of Nola in Italy, about A.D. 400; but, as he omits any reference to bells in his letter giving a very full description of his church, the claim made for him seems to be doubtful. St. Jerome (*In Joel*. 2^{1a}. [*PL* xxv. 964 f.]) speaks of musical instruments used in religious worship under the generic name *tuba*; and, although his description is not clear, it appears that small peals of bells were used in conjunction with trumpets.² Certainly, however, by the 6th cent. bells were used in the Western Church. Gregory, Bishop of Tours (573), speaks of bells as *signa*. This takes us back to Sidonius Apollinaris. Rather later the *Gregorian Sacramentary* (590) contains a formula of benediction which came from Rheims. The campaniles give fairly strong evidence of the use of bells before the end of the 6th century. That of Ravenna dates from the 6th century.

Quite early in the Celtic Church bells were used by the bishops as part of their episcopal insignia. In the *Life* of St. Patrick the office of *campanarius* is mentioned, and in an illustration, given by de Fleury, in *La Messe*, St. Patrick is depicted as

¹ E. Sittl, *Archäologie der Kunst*, Munich, 1895, p. 246. A few small bells have been found at Gézir (*PEFS*, 1904).

² Paul Lacroix, *The Arts in the Middle Ages and at the Renaissance*, Eng. tr., London, 1870.

handing a bell in a box to a bishop consecrated by him. The probable object of the bell was to command silence when the bishop was about to speak. In the museum of the Royal Academy of Ireland a Celtic bell is preserved which on fairly good evidence is attributed to St. Patrick. Small hand-bells were often engraved with the name of a saint, and in later years were venerated as relics.¹ Bede (*HE* iv. 23) mentions a bell rung after the death of Hilda at Whitby (680). Adamnan (*Vita S. Columbae*) has references to a *clocca* which was used to call the brethren to prayer. Egbert, Archbishop of York (740), in his 'Excerptions' ordered his clergy to toll bells at the hours of service. We first hear of a peal of bells at Croyland Abbey in 960; but, as Ingulphus compares the tone of it with others, it seems clear that many other churches had more than a single bell for summoning to worship. Early in the reign of King Edgar (960) the new canons provided for bell-ringing as preliminary to prayer in church, and the clergy of the Church of England are still required to toll a bell daily before service.

Another use for bells is indicated in the Bayeux tapestry.² In the illustration of the funeral of Edward the Confessor the corpse is accompanied by two boys, each ringing a pair of hand-bells. This was a practice taken from paganism, but with altered intentions. The ringing of bells at funerals called the faithful to pray for the departed soul. Still, however, the supposed power of driving away evil spirits was commonly believed in, and the ringing of hand-bells at funerals was carried to such excess during the 14th cent. that the abuse called for the attention of the bishops. Not only were bells carried by the funeral officers, but the people used to open their doors and ring vigorously any bell they had while the cortège passed by. The 'lych' bell is still rung at Oxford before the body of any University official is carried to burial.

Distinct from this is the custom dating from the 7th cent. and enjoined by Canon 67: when 'any is passing out of this life, a bell shall be tolled, and the minister shall not then slack to do his last duty.' This is the 'passing bell.' During the ages of superstition men lost sight of this call to pray for the 'passing' soul, and thought of the bell as a means of scaring away the evil spirits lying in wait for the dying man's soul. After death the 'soul' bell was knelled in order that all might give thanks for the deceased's deliverance from this vale of misery. This custom was carried to such excess that Elizabeth forbade more than one short peal, lest it should be an annoyance to the living and injurious to the fabric and the bells themselves. In later times the varied uses of bells in funerals have been curtailed; the 'passing' bell has become merged in the 'soul' bell, and, being knelled some time after death, serves as an intimation of the age and sex of the departed.

Indisputably, during the Middle Ages bells were chiefly valued for their prophylactic powers in scaring the evil spirits from doing harm ghostly and bodily. Most wide-spread was the idea that bells could dispel storm and lightning. Originally the object was to call the people to church to pray for deliverance from the danger. Then the devil was thought of as hating the sound of bells, because they called the faithful to prayer; and, later, the original idea was lost sight of, and the mere ringing of bells was considered efficacious of itself. Largely owing to their popularity, bells escaped the destruction of things 'Romanish' at the Reformation. In order to increase their supposed

efficacy, bells were 'christened' with elaborate ceremonial. Originally the bells were thought of as heathen, and were baptized to make them converts; but, later, the object was clearly to strengthen their powers over the spirits of the air. Charlemagne in 789 protested against this 'baptism,' but the rite found a place in most pontificals until the Reformation, and is still used on the Continent.

In pre-Reformation times it was rare to find fewer than two or three bells in one tower. Frequently a small bell was hung in a bell-cote over the chancel and rung at the Elevation of the Host. This 'sacring bell' gave intimation to sick folk of the consecration of the elements. Distinct from this was the *sanctus* bell, a small hand-bell tinkled within the church at the 'Ter Sanctus,' and necessary in large churches, where the musicians were at a distance from the high altar. In the Middle Ages bells were often embroidered on bed-curtains and other hangings, as well as on ecclesiastical vestments.³ The fundamental idea was probably superstitious. For the many other religious and quasi-religious uses reference should be made to some of the excellent books mentioned in the Literature. The same underlying ideas seem to inspire the Continental use of bells, the real difference being the method of ringing large bells. Change-ringing is confined to Great Britain; abroad the carillon takes its place. It is a mechanical contrivance by means of which a number of elaborate tunes can be played by one performer on the bells by hammers which strike the edge of the bell. In England bells are chimed in this way and also rung. In ringing, the bell is made to swing round through a complete circle so that the clapper strikes twice in each revolution.

5. Non-Christian uses.—To the Far East we must look for the earliest use of bells, but there is little evidence before the 8th cent. B.C. At that time large bells and gongs are found to have a definite part in ceremonial. One dating 677 B.C. is inscribed: 'We will everlastingly prize this bell and use it in our ritual worship.'⁴ This bell would be hung in the temple, its purpose being to call the shades to the funeral meats prepared for them.

In Buddhistic ceremonial, bells and gongs play a large part. The noise made during certain rites is quite deafening,⁵ the object being to call the attention of the divinity to the prayers and ceremonies of the devotees. The pagoda style of architecture lends itself to the suspension of a number of bells which are made to tinkle by the wind. This is considered by many to be prophylactic, and to scare away the demons. The Buddhistic theogony is practically identical with the Brāhmanical, and a bell is invariably connected with every Buddha as part of the insignia. The opening up of Tibet has given us several books upon the Buddhistic ceremonial. In Lhasa the more saintly of the lamas wear a tinkling bell on the crown of their hats. Before their devotions the chief lamas cross themselves, touching their foreheads with a bell; and they hold a special service for one who is sick, in which tinkling bells are used.⁶ Hand-bells are placed upon the very altar itself. The probable use in these cases is to attract the god's attention.

The supposed influence of the bell on the spirit world is further illustrated by the attempts to expel the death-demon by the aid of bells. In India we find these usages supplemented by others.

⁶ G. S. Tyack's *A Book about Bells* (London, 1898) contains much fairly reliable information about English customs. It is probably the best book on the subject.

According to the Brāhmans, two things are indispensable to the sacrificer—several lighted lamps and a bell to wake the divinity from sleep so that he may consume the offering, while the vagrant ghost is scared away by the same sound.¹ The *patāri* priest in Mirzapur and many classes of ascetics carry bells and rattles of iron which move as they walk, the object being to protect the wearer from evil spirits. The Gonds have elevated the bell into a deity, in the form of Ghāghrāpen, or 'bell-god'; and one special class of their devil-priests, the *marā oḥyāls*, devote themselves to making bells; and they themselves wear them continually. The Todas of Madras worship Hiriya Deva, whose representative is the sacred buffalo-bell which hangs from the neck of the finest buffalo of the herd (Crooke, i. 168). The goddess Pārvati, as Durgā (*q.v.*), has certain insignia which are invoked in this manner: 'Om to the bell (*ghaṇṭā*) striking terror by thy world-wide sound into our enemies. Drive out from us all our iniquities. Defend and bless us, O Lord.' In Burma great bells are found at most of the shrines. The worshipper takes a large deer antler and strikes first the ground and then the bell, to summon as witnesses beings under and above ground, and further to make them join in the act of worship.²

In West Africa some witch-doctors have a custom, when going their rounds, of ringing a bell before the house of the guilty. Bells are often hung over doorways, probably for prophylaxis.³ Very few bells are found in the rest of Africa, except among the Masai and tribes of similar culture. They hang bells around the necks of animals, but there is no evidence to show that these were worshipped, or that the bells were used to scare evil spirits. Probably they are merely utilitarian.

In Egypt there is little evidence. The *sistrum* was invariably used in the worship of Isis. Possibly small erotal jingles were attached. In later times bells were used as charms, but with no real musical purpose, and they are very rarely found in Egyptian religion proper. The same may be said of bells among the Assyrians. They had no religious use and very little in magic. Clappers took the place of bells. Layard (*Monuments of Nineveh*, London, 1849-53) illustrates some horse-bells, possibly importations for magical purposes.

Bells and instruments of percussion are not found in New Zealand. In the Tonga and Fiji Islands a *lali* is used. It is a form of gong made out of a tree-trunk.⁴ It is the favourite instrument at Tonga and is named in the same way that we give names to our bells. It is chiefly used to summon worshippers to their religious exercises. In many parts of the world babies are given rattles to which jingle bells are attached. The underlying object is probably prophylactic.

Although the religious value of bells varies considerably in different parts of the world, in Turkey alone is there found an aversion to their sound. The Muhammadans do not use them, because of their associations with Christianity, and the Pafjābi Muslims have a prejudice against gongs, as they are supposed to disturb the dead, who awake, thinking the Day of Judgment has arrived.

LITERATURE.—In addition to books mentioned in the footnotes, see H. T. Ellacombe's list of books in *NQ*, 6th ser., vol. iii. pp. 42, 82, 163. See also Hieronymus Magius, *de Tintinnabulis*, Hagae, 1724; M. E. C. Walcott, *Parish Churches before the Reformation*, Lincoln, 1879; W. W. Rockhill, *Land of the Lamas*, London, 1891. Most modern encyclopedias contain

information of little value. S. Madge, *Moulton Church and its Bells*, London, 1895, has a bibliography of 304 books. For Scottish bells, see D. Wilson, *Archæology and Prehistoric Annals of Scotland*, Edinburgh, 1881; for Irish bells, M. Stokes, *Early Christian Art in Ireland*, London, 1875; for bells of England, J. J. Raven, *Bells of England*, London, 1906; H. B. Walters, *Church Bells of England*, Oxford, 1913 (with an admirable bibliography; the latest and best book on the subject). For a good account of change-ringing and bell-manufacture, see art. 'Campanology' in *EB*¹⁰. For a manual H. B. Walters, *The Arts of the Church: Church Bells*, London, 1908, is of value.

ADDISON J. WHEELER.

6. American bells.—(1) Bells of metal were in use in certain regions of America long before the Columbian discovery. They were natural developments from, or modifications of, previously existing rattles and like implements of clay, shell, gourds, and other materials. According to W. H. Holmes (*Bull. 3 BE* 22-24), metal bells were in common use in Middle America in pre-Columbian times, but they are rarely found north of the Rio Grande, either in possession of the tribes or on ancient sites; but bells were certainly known to the Pueblos and possibly to the mound-builders before the arrival of the Whites. The copper bells occasionally found in the south-eastern part of the United States may, some of them at least, have been introduced by way of trade (like certain varieties of tobacco-pipe and tomahawk) with the Indian tribes, since specimens of undoubtedly European origin have been discovered in mounds and other burial-places that are distinctly post-Columbian. Others of the metal bells from this region may, however, have been brought to the north by way of Florida, etc., from Central America and Mexico as incidents of inter-tribal commerce or the like. Metal bells are also known in large numbers from the remains of the civilizations of the Pacific coast of South America and from the area of so-called 'Calchaqui culture' in the Catamarcan country of Argentina, etc. Bells of other materials, such as clay, are, of course, more widely distributed among aboriginal peoples of a type less civilized than the Aztecs, Mayas, Peruvians, and others very close to them in matters of art and religion. Many wooden bells have also been found, *e.g.*, in the Atacaman region of Pacific South America (Boman, *Antiq.*).

(2) Some investigators were formerly of the opinion that the bells found in the New World were all imitations of European models, and that no such thing as a genuine pre-Columbian bell of aboriginal manufacture existed. But for the Pueblo region, as well as for Mexico, Central and South America, the existence of bells of Indian make long prior to the coming of the Whites has been demonstrated. The variety in the forms of the bells of primitive America, their presence as ornaments on statues, figures of the gods (Mayan MSS and monuments; Aztec deities, etc.), their utilization as decorative *motifs* (*e.g.* eyes in the golden figures of reptiles from ancient Chiriqui), the situation and circumstances of their discovery in ruins of great age in different parts of the continent—all these facts make the theory of European origins impossible, and it has now been abandoned by the best authorities. The existence of bells of wood, clay, copper, and gold testifies to the evolution of a bell in primitive America from the rattle. According to Holmes, the genealogy of the bell is first a nut-shell or gourd, then a clay model, and, finally, metal forms cast upon models, like those of the ancient Chiriquians. Doubtless some of the less civilized tribes imitated in clay or wood the metal bells of their neighbours of higher culture, which sometimes came to them in the way of trade, or in some other incidental fashion. The more or less civilized peoples, upon whom the Europeans intruded, may have also, at times, imitated bells of

⁴ *Annales de la Propagation de la Foi*, 1860.

Old World origin. There seems no doubt, however, that bells, used for several different purposes, were in existence in pre-historic times in various regions of North, Central, and South America.

(3) Both metal and clay bells seem pre-Columbian in several parts of the ancient Pueblo region of New Mexico and Arizona. The small copper hawk-bells obtained from ruins in southern Arizona are said by Fewkes to be 'identical in form and make with those used by the ancient Nahuatl [Aztec] people' (17 *RBEW*, pt. 2, p. 629). A clay bell found in the oldest part of the old pueblo of Awatobi, and in all probability pre-historic, is regarded by Fewkes as 'made in exact imitation of one of the copper bells that have been reported from several southern ruins' (*op. cit.* p. 629). In this case the Pueblo clay bell would be modelled upon the copper bell, and not *vice versa*. In Awatobi was also discovered a fragment of a copper bell of Spanish origin, such objects coming into the Pueblo country with the Catholic priests and their churches. In the Tusayan ruins immediately about the inhabited towns, Fewkes found no copper bells of such great age that they could be called pre-historic. A fragment of one of the old Spanish or Mexican church-bells 'was used for many years as a paint-grinder by a Walpi Indian priest' (*op. cit.* p. 609). Hough found that bells of clay, like those from Awatobi described by Fewkes, were somewhat numerous in the great ruin of Kawaiokuh. They are undoubtedly pre-historic, and earlier than the bells, similar in form, used in trade. In ancient Mexico bells (*tzilinilli*) of copper were in general use before the Spanish Conquest, and from the Aztecs the knowledge of them passed northward to some of the less cultured peoples of the southern United States. The characteristic Mexican bell has rather marked and peculiar differences of form and structure which indicate its aboriginal origin. The ancient Aztecs had also large numbers of little golden bells, employed chiefly for ornament, and for use in dances and other ceremonial observances, sacrifices, etc. Metal bells were known also to the semi-civilized races of Central America, the copper bells of the ancient Chiriquians of the Panama region being especially noteworthy. Spinden (*Mem. Peab. Mus., Harv. Univ.*, 1913, vi. 146) states that copper bells, 'similar to the common sleigh-bell,' were well-known in the Maya country; a few gold bells have also been found there. Some of them, after having been cast, were 'plated' or 'washed' with gold. One of these Chiriquian bells is very interesting as having upon it the features of a human face. Others are surmounted by rude figures of animals, through the bodies of which, or under them, are apertures for cords, etc. Some have holes for such purposes at the top. Most remarkable, and suggestive of the intimate relationship between the bell and the rattle, is a triple bell or rattle of gold found on the Rio Grande near Panama. This instrument consists of 'three very neatly shaped and gracefully ornamented bells mounted upon a circular plate, to which a short handle is attached' (Holmes, *op. cit.* p. 23 f.). On the handle is the figure of a bird. In the case of the bell with human features, 'double coils of wire take the place of the ears, and the other features are formed by setting on bits of the material used in modelling' (*ib.* p. 23). Many bells more elaborate in character than this are reported from Chiriqui. The Pacific coast area of South America, with its several different 'civilizations,' has furnished many examples of the bell. Capitan has recently described some bronze and copper *tintinnabula* with movable rings and hollow spaces to contain pebbles, bits of metal, etc., from ancient Peru. One is of an entirely new type. Some re-

call certain Buddhistic *tintinnabula*, and likewise those of the lake-dwellings of the Bronze Age.

The bronze and copper bells of the Calchaqui region, especially those from the province of Salta in Argentina, have a very characteristic form, slightly resembling, according to Ambrosetti, certain ancient Chinese bells. The mouth is a sort of compressed ellipse, the sides flat, falling in as they reach the narrow top. No bells of this shape seem to have been discovered in the ancient Peruvian sites. These Calchaquian bells are perforated, for suspension, at the top, and they are ornamented with figures whose nature is much the same as those occurring on certain bronze disks from the same region. One bell from Curtiembre has on each face the outlines of five human countenances; others have three, two, one, in like manner. Other ornamentations are triangles, vertical lines, zigzags, animal figures, etc. Besides these, another sort of bell from the Calchaqui region is described by Ambrosetti, which is also prior to the Spanish Conquest. The form is that which would be produced by making four folds in a very thin lamina of metal, so as to shape it somewhat after the fashion of certain hats or fancy dishes. There are some more modern bells of this type which have been modified through Spanish influence (in the clapper, the tang, etc.). But the general form of the ancient bell has been preserved. These bells, Ambrosetti thinks, were used by the Indians to attach to the domestic llamas, or to suspend from their clothes or belts in dances and festivals, as the Indians of the Gran Chaco still do with fruit-shells, the ancestors of the bell. In the pre-historic necropolis of Calama (Chilian province of Antofagasta), in the area of Atacaman culture, Count G. de Créqui-Montfort discovered in 1904 a wooden bell similar in form to the Calchaquian copper bells of the first sort described above (Boman, *op. cit.*).

(4) The uses to which bells were put in aboriginal America were various. Concerning the Pueblo Indians, Fewkes informs us: 'Copper bells are said to be used in the secret ceremonials of the modern Tusayan villages, and in certain of the ceremonial foot races metal bells of great age and antique pattern are sometimes tied about the waists of the runners' (*op. cit.* p. 628). Many of the small clay bells from the Pueblo region and elsewhere were also used as pendant ornaments of some sort, as were doubtless also some of the smaller metal bells from various parts of the continent. The nature of many of these, which are provided with holes or with perforated tangs, indicates their suspension to a cord or some similar object, and their attachment to articles of dress or ornament. One of the clay bells from Pueblo ruins still contained its pellet of clay, and 'on being shaken, produced an agreeable tinkling sound'; it was evidently used as a bell to produce musical sounds—a purpose likewise served by many other bells of metal and clay in ancient America. Here the bell lies close to the rattle. On ancient sites in New Mexico and Arizona, besides clay bells of this sort, copper bells with stone tinklers have been discovered. In various parts of Mexico and Central America little bells of gold were employed as ornaments, as the devices for suspension and attachment prove. In ancient Mexico such bells were attached to the ankles of important warriors and other prominent participants in ceremonial dances. They were also attached to the feet and wrists of victims of sacrifice, those who represented deities, etc. The gods Tezcatlipoca, Tlaloc, and Huitzilopochtli, in particular, were represented with little golden bells at their ankles (in the case of the first, to the number of twenty). According to Cogolludo, copper bells were to be found in the houses of the

nobles among the Mayas. The Mayas also used bells as ornaments for their gods, etc., represented in the hieroglyphic writings. Brinton mentions the fact that Ah-Puch, the god of death, occasionally has bells attached to his ankles and clothing. One of the Mayan signs usually interpreted as 'eye' may really represent sometimes the small bells used for ornament. Holmes found that 'the eyes of the golden figures of reptiles [ancient Chiriqui] are in many cases minute hawk-bells' (*op. cit.* p. 24). According to Ximenes de la Espada, some of the ancient Peruvian rattles and bells were used in religious ceremonies 'to call the devil' (Capitan). In some parts of Central America little bells are said to have been in use as a sort of currency.

ALEXANDER F. CHAMBERLAIN.

GOOD.—See GOOD AND EVIL, SUMMUM BONUM.

GOOD AND EVIL.—I. GENERAL DEFINITION.—When we collate instances of their usage, we find that the meaning and implications of 'good' and its opposites are most varied. Let us take at random 'good measure,' 'a good beating' (which, curiously, is synonymous with a bad beating), 'a good dinner,' 'good music,' 'a good knife,' 'a good soldier,' 'a good intention,' 'a good man.' In the series scarcely two will be found wherein 'good' means in the one precisely what it means in the other. In all cases, in pronouncing a thing good we are judging its value, and the meaning of 'good' or its opposite in any particular case depends on the point of view from which we judge. It may be almost a purely quantitative judgment, e.g. 'a good ten miles.' It may be a judgment of sensuous value, in which case 'good' = 'pleasant' or 'agreeable,' e.g. 'it tastes good,' 'a vile odour.' It may be an æsthetic judgment, e.g. 'a good view,' 'bad music.' It may be expressive of the suitability or efficiency of tools, instruments, implements, etc., as means to particular ends, e.g. 'a good knife.' It may be a judgment of skill, e.g. 'a good marksman.' Then come the senses of 'good' and 'evil' of most importance, and almost exclusive importance for our present purpose, good as well-being, good as well-doing, evil as the opposite of both.

It is possible to frame a broad general definition of 'good' and 'evil' which shall include all the above varieties of meaning. Such a definition is given by Naville (*Problem of Evil*, ch. i.), who puts it: 'Good is what ought to be, evil is what ought not to be.' To this two objections may be raised. (1) There is no valid application of 'ought' to unthinking non-moral objects. In strictness of language, to say that an instrument such as a pen ought to be of a particular quality is absurd. (2) 'What ought to be' seems to apply better as a description of what is right. And, though the right and the good may largely be identical, the implications of the two are different, and the difference is worth marking and conserving. 'Right' means according to rule. 'Good' means valuable

for some end, therefore desirable. Both in 'right' and in 'good' there is reference to a standard or ideal; but, while 'right' emphasizes the compelling, prescribing power of that ideal, 'good' emphasizes its attractive power. Hence, if we wish such a broad general definition, we should say that the good in all its senses is the desirable, and the evil is the undesirable (cf. Sidgwick, *Methods of Ethics*, London, 1901, p. 110 f.). This seems to be the summary of Royce's statement:

'By good, as we mortals experience it, we mean something that, when it comes or is expected, we actively welcome, try to attain or keep, and regard with content. By evil in general as it is in our experience, we mean whatever we find in any sense repugnant and intolerable. . . . We mean [by evil] precisely whatever we regard as something to be gotten rid of, shrunken from, put out of sight, of hearing, of memory, eschewed, expelled, assailed, or otherwise directly or indirectly resisted. By good we mean whatever we regard as something to be welcomed, pursued, won, grasped, held, persisted in, preserved. And we show all this in our acts in presence of any grade of good or evil, sensuous, æsthetic, ideal, or moral . . . whether you regard us as animals or as moralists, whether it is a sweet taste, a poem, a virtue or God that we look to as good; or whether it is a burn or a temptation, an outward physical foe or a stealthy, inward, ideal enemy that we regard as evil' (*Studies of Good and Evil*, 18).

It may be noted that, in defining the good as the desirable and evil as the undesirable, we are not committing ourselves to a hedonistic view. It is a false psychology which maintains that the only object of desire, therefore the only desirable, is pleasure.

II. GOOD AND EVIL ACTIVE AND PASSIVE.—

While the definition of good and evil as the desirable and the undesirable respectively would probably be universally accepted, it is certain that, as soon as individuals begin to fill in the definite content of the general notion, there will be nothing approaching unanimity; and this fact constitutes one problem with which we must deal. But, before approaching it, it is best to draw a distinction between two kinds of good and evil. There is good which comes to us, and good which starts from us. There is evil which befalls us, which we suffer and endure; on the other hand, there is evil which we do. This is not represented as an absolute distinction; the two kinds are inter-related in a variety of ways; still it is a convenient distinction. It is not easy to find appropriate names for the two kinds. Fairbairn designates them *physical* and *moral* (*Philos. of Christian Religion*, 134), but 'physical' must be used in a somewhat unusual and perhaps scarcely justifiable sense.

'Physical evil means all the sufferings he may have to endure, whether bodily or mental, nervous or sympathetic, alike as a distinct individual and a social unit, alike as a natural being, fleshly and mortal, and as a human being, sharing in the special history of a people and in the collective fortunes and immortality of the race' (*op. cit.* 134 f.).

Now, as regards the good and evil that befall men there will be little lack of unanimity. Health, strength, abundance of food, gifts of fortune or of friends, and a multitude of such like things will be classed as good universally. Sickness, accident, death, penury, destructive forces of Nature, and a host of other ills to which men are exposed will be as universally acknowledged to be ills. With regard to this kind of good and evil, men differ only in the number of goods and ills they know, and in the degree of importance which they attach to this or that particular good or ill. When we turn, however, to consider moral good and evil, the good or evil that men do, we find an altogether different situation. Here we find endless variety in the beliefs of men as to what is good and what evil.

It does not lie within the scope of this article to set forth and discuss the various ways in which at different times and by different individuals the good has been more particularly defined. For that the art. ETHICS and articles dealing with various schools of ethical speculation must be consulted. But here it is necessary to try to gather the signifi-

cance of the fact that there is no universal agreement among men as to what conduct is good and what evil. That is plain from consideration of the variety of view maintained in different systems of ethics. It is still plainer and becomes a problem when we consider the contrariety of opinion and practice among mankind in general. What in one place is esteemed as virtue, in another is held to be vice; for what some men approve most highly others cannot find words to express their abhorrence.

'We hardly know of anything just or unjust which does not change its character with a change of climate. Three degrees of polar elevation overturn the whole system of Jurisprudence. A meridian determines what is truth. . . . There is not a single law which is universal' (Pascal, *Pensées*, ed. P. Faugère, Paris, 1844, ii. 1261.).

This raises the problem, Are good and evil purely relative? Are we to say *homo mensura*? If 'somewhere east of Suez there ain't no ten commandments,' have we simply to acquiesce in the fact, because others may be as right in their notions as we?

III. OBJECTIVITY OF MORAL LAW.—If we answer the foregoing questions in the affirmative, it is obvious that all moral effort has lost its spring and inspiration. Further, morality which should be purely subjective and individualistic would not be morality at all. The ineradicable belief of every moral being is that the law he obeys, the ideal he strives to realize, are something of universal validity: valid for and binding on him not as *ἀνθρώπος τις*, but as *ἀνθρώπος*; binding on him not because of the differences which distinguish him from all others, but in virtue of his *oneness* with all others.

'The Moral Law has a real existence, there is such a thing as an absolute Morality, there is something absolutely true or false in ethical judgments, whether we or any number of human beings at any given time actually think so or not. Such a belief is distinctly implied in what we mean by Morality. The idea of such an unconditional, objectively valid, Moral Law or ideal undoubtedly exists as a psychological fact' (Rashdall, *Theory of Good and Evil*, ii. 211).

It is to be noted that, in most statements made to demonstrate the relativity of morality, we find manifest exaggeration both of facts and of the significance of them, and an ignoring of considerations such as profoundly modify the problem presented by the indubitable facts. Is it really the case, as is alleged in the passage by Pascal part of which has been quoted, that 'truth on this side of the Pyrenees is error on the other'? If so, it can be only a very trivial truth or error that is in view, a difference of etiquette or such like. The theory of relativity of morality is in sore need of support if it requires and uses such support as that. The theory, indeed, makes out its case largely by pointing to the fact that the *customs* and *institutions* of different peoples vary. And it can bring out striking differences only by contrasting savage or semi-savage peoples with the civilized and cultured. That such difference should exist is no wonder, and constitutes no problem, granted that moral knowledge, like knowledge in general, is capable of growth. When customary morality has given place to reflective morality, and when we compare peoples that have reached approximately the same degree of development, we find that differences in moral belief and practice are not so pronounced, not so much of a problem after all. And, so far as such difference actually exists, we have to remember that customs and institutions are, at the best, imperfect revelations and embodiments of ideas and ideals. They are, from the nature of the case, conservative. The public 'conscience' is usually ahead of them. The most 'enlightened' members of the community are usually in open protest against and conflict with them. Hence, in comparing two communities, a difference in custom and institutions is not safely interpreted as the exponent of a like difference of moral ideas

and ideals; between the two differences there may be no relation of strict proportion.

Or, again, customs and institutions may be regarded as means to moral ends, means of realizing ideals. And, plainly, difference of view as to appropriateness of means does not necessarily imply divergence of ends and ideals. Two individuals may identify themselves with the same end; but, because one has more power of insight and foresight, they may differ to any degree in their choice of means. Through lack of insight or foresight, one may adopt means which in reality more or less defeat the end in view—a fact of which all are painfully aware from their own experience. This is shown, too, by the degree to which, and the facility with which, individuals fall in with a more excellent way when it is represented to them. After all, there is so much ground as to what constitutes goodness common to the South Sea Islander and the missionary of a vastly higher morality.

It is not here being argued that moral ideas and ideals as actually held by men do not vary after all. The point is that, in considering the significance of the manifold variety of moral belief and practice on which the theory of relativity of good and evil bases itself, we have to bear in mind such considerations as have been adduced, which go to show that great varieties are possible without anything like the same divergence of idea or ideal.

Coming now to differences as to moral idea and ideal, the existence of which we have no concern to deny, we may hold that a sufficient explanation of them also has been indicated above. The fact that men differ in power of insight and foresight explains not only why they adopt different means as appropriate to the like ends, but also why they identify themselves with quite different ends, and define their desirable in very different ways. This is just what truth there is in the Socratic identification of virtue with knowledge, and vice with ignorance. It does not require the genius of an Aristotle to perceive that the good man is not merely one who knows what is good, or that the problem of moral evil is far from solution when ignorance is abolished. The statement of Socrates is no adequate explanation of the fact that men do evil, but it is an explanation of the fact that they differ in their views as to what goodness is. To know what is really desirable requires insight and foresight, and men differ in their conception of what is desirable because they possess these powers in varying degree.

If thus the relativity of moral conceptions resolves itself into a relativity of moral knowledge, it may seem that the problem of the relativity of morality is on all fours with, is indeed simply part of, the problem of the relativity of knowledge, into which it is not our place to enter. There appears, indeed, to be an important difference between the two questions. A moral ideal, it may be argued, is not a real thing in the way that the world of fact with which physical science deals is real. It seems easy to hold that a certain scientific fact is true, whether any individual or any number of individuals deny it or not. About a moral ideal there is not the same objective constraint. On the other hand, it may be replied that the scientist will be puzzled to give an account of an 'independent' world, of a fact which is anything save a fact for his mind, of a "correspondence" between experience and a Reality whose *esse* is something other than to be experienced' (Rashdall, *op. cit.* 211).

The stages on the path of progress of science are marked by the derelicts of abandoned—because, as advancing knowledge proved, erroneous—hypotheses, views which were held for truth at the time, and served their purpose for a time. There lie,

with all reality now denied them, 'caloric,' 'epicycles,' various 'corpuscles' and 'vortices,' and the like. Yet their presence does not daunt the scientist in his pursuit of truth. But it is as easy for a sceptic, by adding them, to adopt *homo mensura* as the answer to the question, What is truth? as it is for another to argue the pure relativity of moral conceptions from a comparison and contrast of views held in various quarters. To *homo mensura* we reply: Beyond the truth and the good so regarded by any individual there is Truth and Good absolute; otherwise there is no meaning in speaking of progress; what you call progress is but change; and you will have difficulty in adducing any rational ground for any one desiring to change the views in virtue of which he is already the standard of true and good for himself.

We come back to the psychological fact already referred to, viz. that we have an idea that an unconditional objectively valid moral Law or Ideal exists. We must ask, Is this idea capable of justification? What are its implications?

IV. IMPLICATIONS.—1. God as Mind.—We have the idea that an absolute moral ideal exists. Where does it exist? Very plainly, a moral ideal can exist only in some mind. It is as plain also that it is to be found complete in no human mind. We admit, with whatever criticism we pass on a tendency which we think exists to exaggerate the facts or their significance, that men do think differently on moral questions. We may also admit with Rashdall that 'there is no empirical reason for supposing that they will ever do otherwise' (*loc. cit.*). The conclusion to which we are led, then, is that we must postulate a *Mind* in which the absolute Moral Law or ideal exists. God as Mind is implied in the existence of an absolute standard.

'Only if we believe in the existence of a Mind for which the true moral ideal is already in some sense real, a Mind which is the source of whatever is true in our own moral judgments, can we rationally think of the moral ideal as no less real than the world itself. Only so can we believe in an absolute standard of right and wrong, which is as independent of this or that man's actual ideas and actual desires as the facts of material nature. . . . Our moral ideal can only claim objective validity in so far as it can rationally be regarded as the revelation of a moral ideal eternally existing in the mind of God. . . . The existence of God . . . is essential to that belief which vaguely and implicitly underlies all moral beliefs, and which forms the very heart of Morality in its highest forms. . . . Moral obligation means moral objectivity. That at least seems to be implied in any legitimate use of the term. . . . Such a belief we have seen imperatively to demand an explanation of the Universe . . . which shall recognize the existence of a Mind whose thoughts are the standard of truth and falsehood alike in Morality and in respect of all other existence. . . . The belief in God . . . is still a postulate of a Morality which shall be able fully to satisfy the demands of the moral consciousness' (Rashdall, *op. cit.* li. 212f.).

An alternative to this view is, of course, possible. It is to deny the validity of the idea of an absolute moral distinction. This is the only course open to those holding materialistic and naturalistic views of the Universe. The idea in question must be classed as an illusion, or set down as meaningless and inexplicable, the mere freak of a mindless, purposeless Nature, which somehow has superimposed on material phenomena consciousness as an epiphenomenon. This is not the place to offer a criticism of Materialism (*q.v.*) or Naturalism (*q.v.*). We must hold it sufficient to say that, in our view, the Universe and morality require far other theories adequately to account for and explain them. It is a short and easy way with ideas to set them aside as illusions. But, if one thinks the matter out, one will find that, after all, it is not an easy view to take that an idea is an illusion, though it is implicit in every moral judgment. Hence we hold that it is not to be set aside, but accepted with all its implications, all the postulates it can be shown to require. Thus we postulate God as the Mind, in which exists the absolute moral ideal.

2. God as Will.—This is not a postulate in the

same immediate sense as that of God as Thought. It is not at once apparent that, if there be an absolute ideal, there must be also a Will active in realizing it. As we shall soon see, when one contemplates the world, one might be excused for coming to the conclusion that nothing is so certain as that there is no superhuman Will active in realizing an Ideal of absolute Good. Nevertheless we hold that God as Will is an implication of our first postulate, God as Thought—and for this reason, that thought apart from will does not seem to be a thinkable conception. To distinguish between Thought and Will is convenient and necessary enough. To regard them as really separate or separable is a very different matter. As we know them, the one always involves the other. To suppose that anywhere there exists Thought without Will is to hypostatize an abstraction. So, if we are to postulate a Mind in and for which the absolute Law or Ideal exists, it must be a Mind which wills as well as thinks. As nothing can be said to be willed which is not thought of as good, it follows that God must will the absolute Good, the Ideal of which exists in His Mind; and the Universe must have a purpose, an end conceived of as good by the Mind which wills it.

It may be noted in passing that we do not regard the above considerations as a demonstration of a Theistic position or set them forth with that aim. It is possible for one to hold that there is a rational principle in or behind Nature, a fundamental rationality in the Universe, while coming more or less short of Theism. Thus in Buddhism we find a profound belief in *karma* (*q.v.*), an inexorable, intelligible, impersonal principle, combined with an explicit denial of anything like Theism. We are not concerned here to justify Theism. We justify our use of terms which seem to have theistic implications, by saying that they seem the best terms to use, if not, indeed, the only terms that can be used. We are not coming nearer adequate expression of the truth of things in proportion as our thought and language become vague.

Now, if there be a superhuman Mind which thinks and wills absolute Good, the question arises, Is that Good realized? If we admit that such a Good must be realized—and we cannot do otherwise—we are immediately confronted with some of the most perplexing and painful problems that have occupied the mind of man, and we must now consider them.

V. PROBLEM OF EVIL.—It is common to speak of the problem of evil, and there is no objection to that, provided we understand that under the name are grouped a number of separable problems; for evils are of different kinds and raise different questions; and of all kinds two questions may be asked, What is the *terminus a quo*, and what the *terminus ad quem*?

It is to be noted that the problem of evil of any kind exists in most acute perplexing form only for those holding a Theistic view. Just in proportion as God is held to be omnipotent, all-wise, all-loving, the 'blessed and only Potentate,' the Creator, the Disposer of events, and so on, does the existence of evil become an ever deeper mystery. Only if there be a God, and a God in some sense outside of, superior to, and responsible for the world, can any complaint against what is be entertained. It is meaningless to criticize and protest against the scheme of things as we find it, if there is no One responsible for it, who, we conceive rightly or wrongly, might or should have made it other than it is. Of this Job, to whom the problem of evil was acute, has clear perception. 'O that I knew where I might find him! that I might come even to his seat! I would order my

cause before him, and fill my mouth with arguments. I would know the words which he would answer me, and understand what he would say unto me' (Job 23⁵⁻⁶). In this way, indeed, all problems of evil merge into one—the problem of *theodicy*: 'si Deus bonus est, unde malum?'

VI. *REALITY OF EVIL*.—As men survey the facts of experience and the world about them, they come to varied views as to the extent of evil. So little do ills and evil bulk in the view of one that he regards all the talk of evil as a gross exaggeration, and for the evils that he is compelled to admit he finds simple and adequate explanation lying on the very surface; and he is prepared to pronounce all things very good. Another finds everywhere evil in one or other of its manifold forms triumphant: the world is full of misery; Nature is blind, reckless, indiscriminating; human life with all its pains, sorrows, defeated hopes, thwarted aims, and brief span, which indeed is, after all, too long considering what it brings, seems not worth the living.

'Life which ye prize is long-drawn agony.'

To the optimist who says 'no world *could* be better,' the pessimist replies 'no world *would* be better; better that no world should exist than that there should be such a world as we have.'

On the question as to the extent of evil, men will give different answers. Something has to be allowed for temperament and personal experience. But it is clear that, if any one takes anything more than the merest superficial and the most contracted view, it will be impossible for him to take the optimistic view that, as a matter of fact, all things are very good and quite as they should be. Take no more than external Nature as we find it. We have Wordsworth's stanza:

'One impulse from a vernal wood
May teach you more of man,
Of moral evil and of good
Than all the sages can.'

On the other hand, we have J. S. Mill's violent indictment of Nature:

'In sober truth, nearly all the things which men are hanged or imprisoned for doing to one another, are nature's everyday performances. . . . Nature impales men, . . . and has hundreds of other hideous deaths in reserve, such as the cruelty of a . . . Domitian never surpassed. All this, Nature does with the most supercilious disregard both of mercy and of justice' (*Essay on Nature*).

In Mill's statement there is an element of rhetorical exaggeration, but for all that we may feel that it does more justice to the facts as we know them than the verse quoted.

Pessimism is an advance on optimism, and is nearer truth, since it recognizes the facts of the case, that there is disorder in Nature, and that there are seeming irrationalities in the external world, and in human experience ills which, by their number and the extent to which they can blight happiness and maim and stunt life, constitute an almost overwhelming perplexity. Reviewing the facts of life, we may say with Schopenhauer:

'To me optimism, when it is not merely the thoughtless talk of such as harbour nothing but words under their low foreheads, appears not merely as an absurd, but also as a really wicked way of thinking, as a bitter mockery of the unspeakable suffering of humanity' (*The World as Will and Idea*, Eng. tr., I. 420).

Yet it has to be observed that, as there may be a shallow, self-centred optimism, which spreads a rosy light over all because of personal well-being, so there is such a thing as a no less shallow, insincere pessimism, a megalomania not uncommon to youth, a pose deliberately adopted, a morbid sentimentalism—a pessimism which is certainly as absurd as, and probably more wicked than, the optimism referred to. The *Weltschmerz*, so frequent at the stage of adolescence and not unconnected with physiological changes, represents only the difficulty felt by an individuality taking

its first independent steps, and normally soon passes.

Optimism and Pessimism, however, are not merely estimates of the extent to which evils exist; they are theories of the origin, significance, and final issue of evil. One who can adopt the pessimist's estimate of the extent of evil may yet be an optimist as holding that 'Good is the final goal of ill'; that

'Good shall fall
At last, far off, at last to all,
And every winter change to Spring.'

To accept the pessimistic estimate of the magnitude of the problem does not involve the acceptance of a pessimistic solution of the problem.

The problem as noted is, If God is good, whence comes evil? and we must consider—

VII. *THE MAIN TYPES OF SOLUTION THAT HAVE BEEN OFFERED*.—It is easy to see how one might adopt the position: the world and life being what they are, either (1) God is not good; or (2) He is not omnipotent; or else (3) evil is not what it seems to be, it cannot be anything but good, and we must try so to interpret it. Each of those positions has been adopted as explanatory of evil, and we may so group the theories we consider.

1. *The view that God is not good*.—This is a convenient way of grouping some theories which have little enough in common save that all hold that God (using the term in a wider than the Theistic sense, to denote the fundamental Principle of the Universe, the World-ground, or howsoever else He or It may be named) is not good, or, what comes to the same thing, that the goodness of God is something essentially different from what we in every other case understand by goodness.

(i.) First we consider *Pessimism*. Its estimate of the extent of evil we have seen to be not unjustifiable. We must now look at its general account of evil. In brief, Pessimism holds that existence itself is evil, that non-existence is preferable to existence, that the root of all evil is the desire for existence. Pessimism, both as a temperamental attitude of mind towards the world and as a philosophy, is native to the East rather than to the West. In modern times, however, there has appeared in the West a popular and more or less vague pessimism in poetry, and even in the philosophy of the street corner; a political pessimism (Nihilism); and, what we are concerned with, a pessimistic philosophy.

(a) Eastern (or ancient) Pessimism has its best known and fullest expression in philosophic Buddhism. Buddhism grew out of the current Brāhmanism, and so far accepted its teaching. In that system the old simple Theistic Aryan faith had given way to a belief in an impersonal Neuter (Brahma, Ātman, or Paramātmān), the source and goal of all existence, which in some dim way had willed existence in order to realize itself. A vast interval separates source and goal, and through it the wheel of existence turns, involving for souls incalculable changes till at last they escape back into Brahma whence they sprang. The soul passes through one incarnation after another, each state of being with its conditions being determined by merit or demerit acquired in the preceding state. It is easy to see how to Buddha it was only a making explicit of what was already implicit to say that the wheel of existence itself is an evil, *the* evil. The soul craves for rest, and will never find it so long as it is turning with the wheel. Rest means escape from the wheel. And every act is a thong which binds the soul to the wheel. Hence a good deed is only a less evil for the soul than a bad one, for it maintains the soul in being.

Existence, then, seemed to Buddha to be evil. Life means sorrow, and the only escape from

sorrow is to escape from life. There is no God, only an impersonal inexorable Law (*karma*), which attaches fitting consequences to merit and demerit. Escape from evil is possible just in proportion as we retire from the world and suppress the very desire to live, and stifle that will to act which by impelling us to action binds us, be it by merit or demerit, to the wheel of existence. When we have ceased to desire, we shall escape and attain Nirvāna.

In thus holding that escape is possible, Buddhism may be said to be, after all, an optimism. At the best it is a negative optimism. The final Good is one ever to be desired, never to be enjoyed; though it may be attained, never to be consciously attained. We are not concerned with practical Buddhism, which on the whole may be as optimistic a system as Christianity, or at least comparable with it (see the artt. on NIRVĀNA and KARMA).

(b) Western (or modern) Pessimism is represented in the systems of Schopenhauer and von Hartmann.

Schopenhauer (1788-1860) was a student of Oriental philosophy, and his pessimism is largely influenced by, if not borrowed from, Buddhism as we have outlined it. We find in his *Die Welt als Wille und Vorstellung* the same estimate of life and existence as evil, and the same doctrine that the desire to live must be mastered and destroyed by way of asceticism as we find in Buddhism. Instead of *karma*, Schopenhauer finds behind and causative of all existence *Will*. Will is the *Ding an Sich* which Kant regarded as unknowable. Will is the innermost essence of everything and of the totality of things. This Will is blind, stupid, and groping; hence a world of such misery as we find. If creation and life as we know them were the work of a conscious Creator, 'he would be the greatest of all wrong-doers. He must have been an ill-advised god, who could make no better sport than to change himself into so lean and hungry a world.' Hence Schopenhauer rejects Theism, and finds in the transition from Theism to Pantheism a progress from what is indemonstrable to what is absurd. In his view the world is so bad that non-existence would be preferable (*The World as Will and Idea*, Eng. tr., i. 493, et al.).

Von Hartmann is so far a disciple of Schopenhauer, though his originality is conspicuous. He develops more fully the *a posteriori* argument for the universal extent of evil. He comes to an 'indubitable conclusion' that pain is greatly in excess of happiness, even in the case of the most fortunately situated individuals. Nor is there any prospect of anything better in the future. Due to the development of human intelligence and sympathy there will come an ever keener sense of the predominance of pain. The practical conclusion is that we must aim at the extinction of the will to live, must work towards the end of the world-process. But von Hartmann's view is neither so simple nor so intelligible as that. Like Schopenhauer, he posits an unconscious Principle, but he differs from his predecessor in making it a Principle in which a dualism is inherent. There is not merely unconscious Will from which all existence with its miseries has sprung; there is an unconscious Intelligence which is striving to undo the mischief wrought by unconscious Will. The Universe then has an end, and the Absolute is good as seeking to realize it. And this end must be the end for us also. We are told that the only right course for us in the present time is to ratify the will to live, for only by surrender to life with all its pains, not through cowardly renunciation, can we play our part in the world-process (*Philosophie des Unbewussten*, p. 748). That act of universal suicide which seemed the only rational thing must be postponed, indefinitely it would

seem. For, if it took place, the Absolute which has produced the existing number of men would immediately produce other individuals to take their place (*Das sittliche Bewusstsein*, Berlin, 1879, p. 476). Hence von Hartmann's pessimism is the most absolute of all.

(ii.) The view has been expressed that evil largely at least disappears as a problem, if we hold that *the distinction of good and evil is different to God from what it is to us*. In various forms this view has been held by, e.g., H. L. Mansel, F. H. Bradley, A. E. Taylor, and in a sense by von Hartmann. And it has become a kind of fashion to talk of a super-moral sphere. The view in question is worked out in Bradley's *Appearance and Reality* (London, 1897), and Taylor's *Problem of Conduct* (do. 1901). (It has to be noted of the latter that to a great extent it has been disowned by the author.)

Without entering into detail, we may state the position shortly. The view is that the spheres of Religion and Morality are distinct. Morality, the lower, is concerned with human action alone. Moral distinctions applicable enough to men are inapplicable to God. Owing only to the limitations of human nature we present some things to ourselves as bad. Religious faith reveals a perfect world. There is ultimately nothing which ought not to be. Acts and principles of action which seem to us immoral are in God perfectly good. To some extent the human mind can see that it is so already, and, when it cannot see, it is the task of faith to trust that in all cases it is so.

Now there is considerable plausibility in such a view. It may seem to humble piety to be simply a comment on the text 'As the heavens are higher than the earth, so are my ways higher than your ways, and my thoughts than your thoughts' (Is 55). We all realize that God's view of good and evil must differ in great measure from ours. But are we to say that this difference results in a *sharpening* or in an *obliteration* of the distinction of good and evil for God? Either view is possible; the former is the conviction on which all our moral striving is based; the latter is the view we are now considering. That we should be mistaken, as we often are, in our estimate of the degree to which any particular thing is good or bad is absolutely no ground for holding that to the Supreme Mind, with perfect knowledge, there is no real distinction between good and evil at all. To say that God is good and yet that to Him there exists nothing of our distinction between good and bad is contradictory and meaningless. If there is nothing bad to God, He is not good. If He does not feel about evil as we feel, only with far greater intensity, it is not obvious why we should trouble to worship or seek to serve Him, nor is it plain why we ourselves should draw distinctions which are not real in themselves, and have nothing in reality corresponding to them.

'It is of the essence of the moral consciousness, as it actually exists, to claim universal validity; if it possesses no such validity, it is not merely particular moral judgments that are false and delusive but the whole idea that there is such a thing as an end which absolutely ought to be promoted, and that we have a power (more or less adequate) of determining what that something is' (Rashdall, ii. 270). 'The word "good" means the same in him (God) and in us, else it means nothing to us' (W. N. Clarke, *Outline of Christian Theology*, Edin. 1898, p. 69).

(iii.) The conclusion, God is not good, follows logically from views which make the *will of God* a capricious, inexplicable thing, or which represent Him as permitting (if not willing) evil in order primarily to reveal certain of His own attributes. A God who wills the existence of persons as mere means towards an end in which they have no share, and which involves for them inexpressible suffering, can be called good only by affirming contradictories (cf. Kant, *Dialectic of Pure Practical Reason*, v.).

2. The view that God is not omnipotent.—The second group of theories is constituted by all that in various ways deny that God is omnipotent. They hold that God is absolutely good and means good, but cannot carry out His purpose of good immediately at least. There are obstacles which thwart and retard His purpose.

(i.) Here we have first various forms of *Dualism* (*q.v.*). We classify relevant dualistic theories thus:

(a) Those which postulate two equally original and eternal Principles which have been ever in rivalry and conflict. The evil principle can create, and throws his works among the creations of the Good Principle: hence all evil (Iranian dualism).

(b) Those which postulate the eternity of matter. God did not create matter. He made the world out of matter He found, and He made it as perfect as the intractable material would allow (*e.g.* *Timæus* of Plato). What imperfection exists, therefore, is due to the matter, not to the Maker, of the world. In various quarters this belief developed into the view that matter is inherently evil. In some Gnostic systems the world was represented as the outcome of the evil, originally subsisting in chaotic matter, organizing itself into a Kingdom. And man is a microcosm; the enemy of the highest principle within him is the material sensuous element, which is not merely, as we all hold, often the occasion or instrument of sin, but in itself is intrinsically evil. Cf. art. Gnosticism.

(c) Those which postulate an original dualism in God. We have noted this in von Hartmann's system. It appears also in the view of Boehme († 1624). Evil must have its root in God; this root is that in God which is not God, if we understand by God love only. Yet it is a Divine element, broken away from the original harmony to become 'God against God' (*Morgenröte*, xiv. 72). It appears also in certain Gnostic systems in which we have a representation of a fall within the Pleroma. A product of this fall is a Demiurge who is either ignorant of or hostile to the supreme God.

Dualism of type (a) is on the whole optimistic in outlook. The evil principle is destined to be at last vanquished and destroyed. Type (b), on the other hand, tends towards a pessimistic or at any rate a gloomy view. Existence in this world is evil; the body is the prison of the soul which must seek deliverance through asceticism (so notably the Essenes, Plotinus, many Gnostics), or vindicate its liberty by antinomianism (Ophites and other Gnostics).

Dualism is just the assertion that what we find now in the world has been there all along. The world is dualistic for each of us as we find it. Two streams of influence beat upon us. We feel the conflict of two tendencies within us. And Dualism explains the conflict by saying that it has always been so. It is an ultimate fact. Dualism in any of its forms cannot be expressive of the final truth of things, and thought cannot rest satisfied with it.

(ii.) We have next *Pluralism*, a philosophy which has in recent times come into great prominence, expounded by, *e.g.*, W. James, Howison, and F. C. S. Schiller. Pluralism, when thoroughgoing, asserts that God is limited *ab initio* by other beings, among whom He is only *primus inter pares*. Souls are uncreated, eternally pre-existent. In the world-process God is striving to rid those souls of evil. Thus God is in no way, near or remote, responsible for evil. Pluralism (*q.v.*) is a *Weltanschauung*, and cannot be confuted in a sentence. As to pre-existence (*q.v.*), if we say with Rashdall,

of positive disproof, but it is unsupported by the obvious and *prima facie* evidence of experience; and involves, the more it is worked out, a ramifying network of difficulties only to be disguised by some mythological structure which itself is the greatest difficulty of all' (*op. cit.* ii. 346 f.),

the Pluralist may reply in Ward's terms:

'[The theory of pre-existence] involves a "network" of assumptions unquestionably; but if it "is certainly not capable of positive disproof," the objector is bound to show that the result of the whole is worthless. As regards this particular hypothesis of pre-existence, its complexity is no advantage certainly; but even so the disadvantage is reduced in proportion as the separate assumptions are analogous with actual experience and consistent with each other' (*The Realm of Ends*, 'Pluralism and Theism,' p. 404 f.).

It is, however, a strange doctrine that the burden brought with any theory should be primarily a burden of disproof for the objector. The existence of a race of intelligent beings in the interior of the moon is a hypothesis not capable of positive disproof, its assumptions are all analogous with actual experience and quite consistent with each other, and the objector may be unable to show that the result of the whole is worthless. In spite of all that, the hypothesis is still in want of a single justifying consideration.

The theory of pre-existence must certainly be treated with respect. It is the belief of a large proportion of mankind. It has ever appealed to those who grapple with the problem of evil, and many names may be quoted in support—from Pythagoras, Plato, and Origen, to Kant and J. Müller. Admittedly no theory of the origin of souls is free from difficulty. But, obviously, to explain the taint of souls in this life by a 'fall' of created or emanated souls in a former life leaves the problem of evil exactly where it was. To gain anything we must hold that souls and evil are eternally pre-existent; and the gain, it seems to us, is small, balanced against the difficulty of the enormously complex problems that immediately confront us.

The metaphysical difficulty of Pluralism may be put thus: if the monads are absolutely separate, it is not obvious how a *cosmos* can arise; while, if they are inter-related, there is no intelligible sense in which they can be ultimate.

(iii.) That the omnipotence of God is *inherently* limited is implied in all theories which represent *evil as necessary*. In some sense the necessity of evil must be an element in every attempted solution of the problem; and hence in some sense it is true that evil exists because God, though perfectly good, is not omnipotent. What kind of limitation of omnipotence is compatible with an adequate Theism? Only the limitations necessary to make omnipotence a thinkable conception—limitations without which omnipotence is a totally absurd notion, meaning power not only to do all possible things, but to determine what is possible; an omnipotence which absolutely excludes impossibility. This is the foolish notion of omnipotence argued upon by, *e.g.*, Schopenhauer and J. S. Mill.

'The Creator is the author not merely of the world, but of possibility too. He might accordingly have devised this in such a way as to admit of a better world' (Schopenhauer, *Parerga*, ii. 157; cf. Mill, *Theism*).

This meaningless omnipotence is denied as soon as God is conceived of as a definite Being at all, with any stability of intelligence or will. *Omnis determinatio est negatio*. To find that derogatory to God is to abuse language.

Plainly God is limited by His own Being (He cannot deny Himself), by His own purpose, and by His own works. It cannot be otherwise. We should else have a Being to whom no predicates could be attached, of whom nothing could be firmly hoped.

Hence in many quarters evil is represented as necessary; and, as noted, it must in some sense be so. The thought is not free from difficulty. For, if evil be necessary, is it not justifiable? Can we

* For one difficulty which the theory of Pre-existence removes it creates a hundred. . . . The theory is certainly not capable

condemn what must be? If a thing is necessary, is it not in a sense good? Even if we say, 'Evil must be, not in order that it may be for its own sake, but in order to be thwarted, fought with, destroyed, and to make good possible,' the evil-doer may still justify himself. If we say to him, with Royce, 'God's will is your will. Yes, but it is your will thwarted, scorned, overcome, defeated. . . . God wills you not to triumph. . . . And that is the use of you in the world . . . to be willed down in the very life of which you are a part' (*Studies*, p. 28), he may reply, 'Your argument is irrelevant. It remains true that on your own showing I am fulfilling a useful and necessary function in the scheme of things. Without me you can do nothing; your goodness were impossible without me to contend with. In your interest it is necessary for me to exist, and it is goodness in me to choose to constitute myself a round in the ladder of your ascent. Evil if justifiable in the abstract is justifiable in the concrete; in the abstract it does not exist. If there must be evil, there must be evil-doers.'

The possibility of evil is clearly necessary; it is no true limitation of omnipotence to affirm that. And, as Royce himself shows the possibility of evil (*Studies*, iv.), the presentation of moral choice is all we need for knowledge of good and evil. It is a delusion that we have more knowledge by yielding to temptation than we have in resisting it. Hence the difficulty remains, Why did not God prevent the actualization of evil? It is not an adequate answer to say, God cannot prevent moral beings from choosing evil rather than good. For, if God can govern moral beings now, as it must be admitted He can and does, He could have done so all along without damage to their moral freedom. Besides, the other difficulty remains as to why moral beings should will evil. After all, there is much to be said for Lotze's view:

'Of all imaginable assertions the most indemonstrable is that the evil of the world is due to the validity of eternal truth; on the contrary, to any unprejudiced view of Nature it appears to depend upon the definite arrangements of reality, beside which other arrangements are thinkable, also based upon the same eternal truth. If there were retained the separation . . . between necessary laws and the creative activity of God, in our view evil would undoubtedly belong not to that which must be, but to that which is freely created. Let us therefore . . . say that where there appears to be an irreconcilable contradiction between the omnipotence and the goodness of God, there our finite wisdom has come to the end of its tether, and that we do not understand the solution which yet we believe in' (*Microcosmus**, Edin. 1894, II. 717).

3. The view that evil is not really evil.—The view that what is to us evil is not evil to God we have discussed above. Here we deal with various arguments which attempt to show that what at first sight seem evils are not, when better examined, evils to us. The characteristic formula of all such theories is, 'Partial evil is universal good.' And the most familiar expression of it is Pope's *Essay on Man*, which is a summary of Deistic optimism as represented by, e.g., Bolingbroke. The view is, 'Whatever is is right,' i.e. there is really no evil. Suffering is to be borne with content because the evil suffered is serving a great universal end. Nature is not to be rebuked for enforcing her laws at the expense of an individual.

'Respecting man, whatever wrong we call,
May, must be right, as relative to all.'

A similar view was to some extent accepted by the Stoics, who grappled earnestly with the problem of evil—not in Pope's dilettante manner—and in regard to the bearing of evil and the good that comes out of evil said nearly all that can be said. The Stoics, too, regarded the world as perfect. 'The nature of evil exists not in the Universe' (Epictetus, *Enchir.* 27). Evil is conducive to the best of the whole. Chrysippus and M. Aurelius compare evil to the coarse jest in the comedy, which, though offensive by itself, improves the

piece as a whole (Aur. *Med.* vi. 42). 'God has fitted all, evil with good, in one great whole, so that in all things reigns one reason everlastingly' (Cleanthes, *Hymn to Zeus*). In reply to this position that partial evil is universal good, we say that it does not make the evil any less or any less real. The individual afflicted for the good of the whole may well ask, Why select me? As Voltaire in *Candide* asks, Why should Lisbon perish while Paris escaped? Was not Paris sunk in evil too? However true it be that evil leads to good and to greater good, the problem remains as to its distribution. And, whatsoever its effects, near or remote, evil is still evil.

'It may be said that evil appears only in particulars, and that when we take a comprehensive view of the great whole it disappears; but of what use is a consolation the power of which depends upon the arrangement of clauses in a sentence? For what becomes of our consolation if we convert the sentence which contains it thus—The world is indeed harmonious as a whole, but if we look nearer it is full of misery' (Lotze, *Microcosmus**, II. 716).

Another point emphasized by the Stoics, and in many quarters since, is that evil is good as a disciplinary agent. On this point Seneca writes in almost a Christian strain in his *de Providentia*: 'Fragile are the plants that grow in a sunny valley.' And so Epictetus (*Diss.* iii. 24): 'God sends me hither and thither, shows me to men as poor, without authority, and sick . . . not because He hates me . . . but with the view of exercising me and of using me as a witness to others.' This is all fine and true, but the problem of evil remains. For this does not explain the suffering which destroys the very possibility of moral improvement, e.g. by reducing a mind to imbecility, or the fact that the evil inflicted seems utterly disproportionate; the old question is, in fact, raised in acute form, Is God not good to His own, or is He powerless, that this is the only way in which He can educate them?

Still another consideration is urged by the Stoics which has also played a great part in explanations of evil, viz. Evil is the necessary condition, the correlate, without which good is not conceivable. *No evil, no good*. This gives rise to different views. (a) Evil is a merely negative or privative conception, meaning only the absence of good; (b) evil is the condition of knowing or doing good. In answer it is easy to point out that evil is no mere negative. It is something quite positive which attempts to usurp good. Evil is not merely *good-less*, but *anti-good*, if we may use the words. A man may fail to exhibit a virtue without being guilty of the contrary vice, or, as we say, have only negative virtue. As to our knowledge of good:

'Things are known to us only in relation to their opposites. . . . But the law need not be so interpreted as to require that these opposites must be absolute contrasts. In order to consciousness, we must have change. . . . But change does not necessarily mean transition to the entirely opposite state. . . . We should be conscious of good without experience of positive sin or evil, if there were within good itself change from one degree to another, or if there were varieties of good' (Davidson, *Stoic Creed*, p. 227).

The position that evil is necessary if moral beings are to be good and do good has been in our view already.

VIII. CONCLUSIONS.—We have seen that every proposed solution either leaves the old question unanswered or raises new ones. The problem is for the human mind insoluble. However far we may get with an answer, ultimately

'There is a veil past which we cannot see,' and the final and complete answer to 'Si Deus bonus, unde malum?' lies within. There are, however, considerations which so far lighten the problem.

1. Metaphysical evil (the fact that we are finite) is no evil at all. 'To be finite is unsatisfactory,' says Royce, but it is scarcely a thing to complain

about, if, as we actually find, the finitude is capable of indefinite expansion, and if, as we have ground for hoping, this is destined to be immortal. When knowledge cannot be extended, when possibilities of discovery and invention have been exhausted, it may be time to find our finitude an evil. When our world is conquered, we may weep.

2. Physical evil, the evil we suffer.—(a) If one argues, We can conceive the world and the conditions of life as better than they are, why are they not better? the answer is: As a matter of fact they are becoming better, our demand for a better world is God's demand, our purpose to make it better is His purpose, our task in improving it is His task. To demand from God a better world, to complain that it is so imperfect, is to demand for man an easier task, that there shall be less which man has any share in producing. The demand for a perfect world is the demand that man shall have no task, no function in the world at all, and makes the creation of a world needless and unintelligible. As Iverach says, 'the world is not yet made, it is only in the making' (see also Fairbairn, *The Philosophy of the Christian Religion*, p. 59); and man himself is called to play a part in the making of it. He is not at home in the world as he finds it; by his labour he has to make it more of a home. Hence it seems inevitable that there should be suffering in various forms for him. Which is preferable—a world in which man has nothing to do in making it a better world, or a world which calls him to be a worker along with God?

(b) Physical evil has been the goad which has impelled men to most of those achievements which make the history of man so wonderful. Hardship is the stern but fecund parent of invention. Where life is easy, because physical ills are at a minimum, we find man degenerating in body, mind, and character. With a new world we must demand a being different from man as we know him, i.e. not man.

(c) This indicates that the demand that the world should be other than it is in this or that particular leads us whither we know not. It is not one thing which has to be changed when one change is proposed, but ultimately all things; and a world totally different from the world we know cannot be thought out. It is not possible to foresee all the changes necessitated by one change regarded as desirable. Could we foresee them, it is conceivable that we should find the last state worse than the first. Leibniz's formula, 'this is the best of all possible worlds,' does not admit of demonstration, but neither does its denial. We cannot prove that there is no more suffering in the world than is necessary for any good purpose, neither can we prove that there is more. And the burden of proof seems fairly to rest on the critic of Providence.

3. Moral evil.—There are ultimate questions that cannot be answered, e.g. the origin of sin, and its universality (see art. SIN). Here it is in place to state that we may hold that it was God's purpose to have in man not merely an intelligent fellow-worker, but a moral being who should be partly the architect of his own character and worth. Again we ask which is preferable—a being who cannot do evil, or a being who with full power to do evil abstains? a *non posse peccare*, or a *posse non peccare*? We note that Huxley answers that he would prefer the former:

'I protest that if some great Power would agree to make me always think what is true and do what is right, on condition of being turned into a sort of clock . . . I should instantly close with the offer' ('Method and Results,' *Collected Essays*, Lond. 1892-94, i. 192).

But it may be doubted if many will agree with

him. Once again it is a demand for no task, no battle; and what is the worth of such a character? The wine of life would be drawn under such conditions; man would have no share in working out God's plan. Which is preferable—a grim fight, with the possibility of splendid triumph, or no battle at all?

The possibility of evil is necessary for a moral being. And the actuality of evil is the only ground we can see on which there rises any need or any possibility for the manifestation and development of some human virtues, and the revelation of some Divine excellences, which we regard as among the best. Nor, though we might have knowledge of evil, could we have knowledge of the consequences of evil, were evil not actual.

It will appear that we might go on to say that God wills not merely the possibility, but the actuality of evil. If we admit that He has perfect foreknowledge and wills a possibility which He knows will be realized, manifestly it might seem His responsibility is not different from that of willing its realization (cf. Rashdall, ii. 343). We prefer to say that here we are in a difficulty which shows, in Lotze's phrase, that our thought is at the end of its tether.

4. Connexion of physical with moral evil.—The problem of evil would be far less acute if we saw that suffering was proportionate to wrong-doing. The greatest problem of all is the apparent indiscriminate with which good and evil fortune are assigned. Three considerations must be regarded.

(a) We see but in part. Could we see the whole, it is not inconceivable, to say the least, that the apparent disproportion would wear a very different aspect. As Royce puts it, we see things in the temporal series; the problem may be quite other *sub specie aeternitatis* (*World and Individual*, ii. 338 ff.).

(b) For then, in particular, we should see how God's government of the race modifies His government of the individual. God has the race to govern, and the race can be disciplined only in individuals. Hence there is vicarious suffering, and it is difficult to hold that what is reasonable in men, who in various circumstances must and do punish, causing vicarious suffering, is unreasonable in God.

(c) If we believe in immortality, the whole problem of evil, and this one in particular, is profoundly modified. And this problem is one point of view from which it may be shown that immortality is a postulate of morality. If we believe that the conflict with evil shall result in final victory for good, that evil shall at last find its place in Reality only as trampled on and triumphed over, and, further, that we who have striven and suffered and been perplexed shall see the triumph of what we fought for, and the good meaning of our burdens, and the explanation of our problems, then at the worst life is full of interest; it is good to be, worth while to suffer and to fight.

In brief, our view is: God is good and means only good, but His purpose is to realize His ends with our co-operation; and in some sense evil is necessary that they may be revealed to us, and striven after by us.

LITERATURE.—The main Biblical passages are Gn 3, Job, Ps 73, Ecclesiastes, 2 Co 4, Ja 134. On these there is a vast expository and homiletical literature, details of which cannot be given here. See also Plato, *Protagoras*, *Gorgias*, *Republic*, *Timaeus*; Aristotle, *Nicom. Ethics* (Peters' tr., Lond. 1886); for the Stoics, see W. L. Davidson, *The Stoic Creed*, Edinburgh, 1907; Cicero, *de Finibus* (Yonge's tr., Lond. 1883); for Plotinus, see B. A. G. Fuller, *The Problem of Evil in Plotinus*, Camb. 1912; Augustine, *de Civitate Dei*, A.D. 426 (tr. M. Dods, Edin. 1871); Boethius, *de Consolatione Philosophiae*, c. A.D. 526 (tr. King, Lond. 1897); Al-Fārābī, *Fontes Quæstionum*, c. A.D. 950 (see M. Steinschneider, *Alfarabi*, St. Petersburg and Leipzig, 1889).

M. Maimonides, *Dalalat al-Ha'irin* (*Moreh Nebuchim*), A.D. 1190 (Paris, 1620; Fr. tr. 1866); G. Bruno, *Della Causa, Principio ed Uno*, Lond. 1684, *de Monade*, etc., Frankfurt, 1691; J. Boehme, *Aurora*, Amsterdam, 1666; N. Malebranche, *Entretiens sur la métaphysique*, Paris, 1687; P. Bayle, 'Réponse aux questions d'un provincial' (in *Ouvrages*, The Hague, 1727-31), art. 'Manichéens', in *Dict. histor. et critique*, Rotterdam, 1697 (Eng. tr., Lond. 1786-88); B. de Spinoza, *Ethics*, Amsterdam, 1677 (tr. E. Willis, Lond. 1870); G. W. v. Leibniz, *Theodicee*, Amsterdam, 1710; W. King, *An Essay on the Origin of Evil*, Lond. 1781; A. Pope, *Essay on Man*, do. 1732; J. Butler, *The Analogy of Religion*, do. 1786; J. Edwards, *Freedom of the Will*, Boston, 1764, *The Great Christian Doctrine of Original Sin*, do. 1788, *Dissertation concerning the End for which God created the World*, do. 1788.

Of more modern works, the following may be noted: I. Kant, *Kritik der Urtheilskraft*, Appendix, Berlin, 1794 (tr. J. H. Bernard, Lond. 1892), *Religion innerhalb d. Grenzen d. blossen Vernunft*, Königsberg, 1794 (tr. in T. K. Abbott's *Kant's Theory of Ethics*, Lond. 1883); F. W. J. Schelling, *Philosoph. Untersuchungen über d. Wesen d. menschlichen Freiheit*, Landshut, 1809; G. W. F. Hegel (see J. M. E. MacTaggart, *Studies in Hegelian Cosmology*, Camb. 1901); S. T. Coleridge, *Aids to Reflection*, Lond. 1826 (many reprints); F. D. E. Schleiermacher, *Der christliche Glaube*, Berlin, 1830-81; A. Rosmini, *Theodicea*, Turin, 1828; B. H. Blascie, *Das Böse in Einklang mit der Weltordnung*, Leipzig, 1827; G. T. Fechner, *Über d. höchste Gut*, do. 1846; T. Reid, *Works*, Hamilton's ed., Edin. 1854, pp. 632-86; J. Young, *Evil and Good*, Lond. 1856; F. Rohmer, *Gott und seine Schöpfung*, Nördlingen, 1857; A. Schopenhauer, *Die Welt als Wille u. Vorstellung*, Berlin, 1859; W. H. Smith, *Gravenhurst, or Thoughts on Good and Evil*, Edin. 1862; L. Lotze, *Mikrokosmos*, Leipzig, 1856-64 (Eng. tr., Edin. 1899); E. Dühring, *Der Werth des Lebens*, Breslau, 1866; A. Conti, *Dio e il male*, Florence, 1865; J. McCosh, *The Method of Divine Government, Physical and Moral*, Lond. 1867; E. Baltzer, *Gott, Welt, u. Mensch*, Nordhausen, 1869; R. Rothe, *Theolog. Ethik*, Wittenberg, 1869; K. R. E. v. Hartmann, *Philos. des Unbewussten*, Berlin, 1871; H. Martensen, *Die christliche Ethik* (allgemeiner Theil), Gotha, 1871 (Eng. tr., Edin. 1899); E. Naville, *Le Problème du mal*, Lausanne, 1868 (Eng. tr., Edin. 1871); J. S. Mill, *Nature, Utility of Religion, and Theism*, Lond. 1874; A. Ott, *Le Problème du mal*, Paris, 1888; H. Bergson, *Essai sur les données immédiates de la conscience*, do. 1889; J. Sully, *Pessimism*, Lond. 1892; W. L. Davidson, *Theism*, do. 1893, lect. xii.; J. Royce, *The Religious Aspect of Philosophy*, Boston, 1897, *Studies of Good and Evil*, New York, 1898, *The World and the Individual*, do. 1901; F. R. Tennant, *The Origin and Propagation of Sin*, Camb. 1902; A. M. Fairbairn, *The Philosophy of the Christian Religion*, Lond. 1902; H. Rashdall, *The Theory of Good and Evil*, Oxford, 1907; G. T. Ladd, *Knowledge, Life, and Reality*, Lond. 1909; W. E. Orchard, *Modern Theories of Sin*, do. 1909; J. Ward, *The Realm of Ends, or Pluralism and Theism*, Camb. 1911; S. A. McDowall, *Evolution and the Need of Atonement*, do. 1912; J. Y. Simpson, *The Spiritual Interpretation of Nature*, Edin. 1912; J. Watson, *The Interpretation of Religious Experience*, Glasgow, 1912, lect. xi., xii.; B. Bossanquet, *The Value and Destiny of the Individual*, Lond. 1913. Further, the subject is treated in nearly all Philosophies of Religion (Schopenhauer, Lotze, Pfleiderer, etc.), and Systems of Dogmatics (Aquinas, Oosterzee, Martensen, Hodge, etc.).

W. D. NIVEN.

GOOD NATURE.—That quality of temperament which is evinced, outwardly, in easy and agreeable accommodation to the social environment, and, inwardly, in aptness for adaptation without irritation or undue disturbance. Two types of good nature are to be distinguished.

(1) The first and more austere type consists in an attained orderliness of the sensibilities and a consciousness of harmony with nature. In its pagan interpretation it is the virtue of temperament sought in the Stoic ideal of wisdom as pious accord with natural law, to be attained by reasoned self-discipline; psychically it is marked by evenness of mood, avoiding both exuberance and depression, and it is generalized as right feeling (*eûvâtheia*), at finer fortitude than mere patient endurance. In its Christian interpretation good nature is the native innocence and right inclination which are conceived to have been the original endowment of mankind; it is (to quote Jeremy Taylor) 'the relics and remains of that shipwreck which Adam made,' or, more precisely, 'the proper and immediate disposition to holiness.' Hence it is the source of natural morality and innate apprehension of the good.

(2) A second type of good nature, more lively and spontaneous, is a fact of elementary psychology—in no sense a product of discipline. Kindliness and easiness are its salient traits, health and sound

nerves its primary conditions. Over and above these is implied a mental constitution mobile and facile enough to meet change without friction or strain (ill nature is as likely to be a result of lax and sodden as of hypersensitive nerves). It is to be noted that such good nature is susceptible of cultivation, suggestion and auto-suggestion being capable agents for its inducement, and that it usually results in physical benefit. Many of the cures of 'Christian Science,' 'Mental Science,' etc. are primarily cures of temperament; the result is probably attained by inhibition (through suggestion) of irritations arising from local strains, and the process is, in effect, a centrally induced rest cure.

In its moral aspects good nature favours certain perils, such as over-readiness to be persuaded, or a too easy complaisance in abetting or condoning what should be morally repugnant. 'Weak good nature' is a manifestation of deficient will (cf. ABOULIA), shown either in extreme susceptibility to suggestion or in that temperamental laziness which appears in disinclination to fortify moral resolution in irksome directions. It is this aspect of good nature which has chiefly impressed itself upon the modern use of the term, where it is widely given a derogatory turn, as implying want of moral stamina. As a social virtue it should properly be cultivated between the extremes of hyper-conscientious scruple on the one hand and lax compliance with social expediency on the other.

H. B. ALEXANDER.

GOODNESS.—The story of the Fall has a profound truth embedded in it. Science regards it as the legend of the awakening of man from a merely animal state to the consciousness of good and evil, of his transition from thoughtless innocence to purposed virtue or deliberate vice, of the introduction of a new sense into the world, the sense which is named conscience. 'A fall it might seem, just as a vicious man sometimes seems degraded below the beasts, but in promise and potency a rise it really was' (O. Lodge, *Man and Nature*, London, 1905, p. 91). Later, for all peoples that have a history, there has, somehow or other, come a time of reflexion, and with it there has arisen 'a conception of good things of the soul, as having a value distinct from and independent of the good things of the body, if not as the only things truly good, to which other goodness is merely relative' (T. H. Green, *Prolegomena to Ethics*, Oxford, 1884, p. 261).

1. The Greek conception.—The 'good' (*τὸ ἀγαθόν*) was made the subject of reflexion in all the philosophical schools of Greece, and it is to Socrates and his successors that we owe our chief moral categories. The Platonic and Aristotelian conception of virtue is final in so far as it defines the good as goodness.

'It marks the great transition, whenever and however achieved, in the development of the idea of the true good from a state of mind in which it is conceived as a well-being more or less independent of what a man is in himself, to that in which it is conceived as a well-being constituted by character and action' (Green, *op. cit.* p. 300).

As a concrete ideal, however, the Greek conception of virtue, limited as it necessarily was by the moral progress of the nation, is inadequate. For us, as for Aristotle, the good is the realization of the powers of the human soul or the perfecting of man; for us, as for him, the good for the individual is to be good; but the idea of human brotherhood, which had no meaning for the philosophers of Greece, has achieved, and is destined to achieve, results of which they did not dream.

In opposition to the moral scepticism of the Sophists, some at least of whom reduced morality to a matter of private caprice, Socrates held that virtue is one and may be taught. Following out

this thought consistently, Plato was led to 'the Absolute Good,' or 'the Idea of Good' (*ἡ τοῦ ἀγαθοῦ ἰδέα* [*Rep.* bk. vi.]), which is the source of all truth, all goodness, and all beauty. Its apprehension by the soul is knowledge, its indwelling in the soul is virtue, its shining forth to the soul (it may be through the medium of sense) is beauty. It is the eternal and unchanging principle of goodness. Correcting the Pythagorean dictum, Plato asserted that God, not man, is the measure of all things. He believed that the ideal for each lower soul is to become dear to God and to grow like Him.

Socrates further taught that 'Virtue is knowledge.' Himself blessed with a will which obeyed all the behests of reason, he fell into the error of ignoring its operations. Assuming that all motives are rational, he held that practical wisdom (*φρόνησις*) is the sole condition of well-doing. No man, he was wont to say, knowingly chooses the evil and rejects the good—a statement which owed its plausibility to the double meaning of the word 'good,' virtue and interest. He taught that the various forms of goodness are wisdom in different spheres of action: to be pious is to know what is due to the gods; to be just is to know what is due to men; to be courageous is to know what is to be feared and what is not; to be temperate is to know how to use what is good and to avoid what is evil.

The principle that wisdom is the sole good and ignorance the sole evil became the basis of all subsequent discussions of the ethical problem. For Plato, the philosophic man is the good man. Plato was, indeed, too clear-sighted and fair-minded to suppose that virtue is the exclusive possession of a few choice spirits. He admits that there is much to commend in the lives of some men who are not philosophers. Ordinary citizens who are brave, temperate, and just must have certain true notions of good and evil; their right opinion comes partly from nature or 'divine allotment,' and partly from custom and practice. But for the perfecting of character and conduct, for the adequate preparation of men for good citizenship and especially good government, there is needed the discipline of philosophy. True knowledge, and with it true virtue, can be imparted only to the soul that has undergone a long course of training. Practical excellence of character is the finished product of a liberal education.

Aristotle's famous formula that virtue is a mean, or carefully chosen middle course, between two vices which are related to it as excess and defect makes goodness synonymous with prudence. The Epicurean sage, for whom pleasure was the sole good and pain the sole evil, counted all virtuous conduct empty and useless except in so far as it ministered to his happiness. He determined the only real (or reasonable) goodness by a careful mensuration of the pleasant or painful consequences of men's actions. The Stoical wise man was free from passion, unmoved by joy or grief, sufficient unto himself (*αὐτάρκης*), living in harmony with the all-controlling law of nature. The strength of Stoicism lay in the heroic severance of virtue from interest. This stern creed had a natural affinity with the Roman mind, and under the Empire almost every noble character, every effort in the cause of freedom, emanated from the ranks of Stoicism. But all the later Stoics sadly confess how great is the gulf between the ideal sage and the actual philosopher. 'Ah, show me a Stoic!' says Epictetus. 'By the gods, I long to see one. Show me at least one who lies in the crucible in order to be cast. Pray do me this kindness. Pray refuse not to an old man, from ill-will, the sight of a spectacle that I have not seen till now' (*Diatribe*. II. xix. 24 ff.). Experience proved that

this type of goodness could not be realized. It was too violently opposed to nature, and the passionless sage was nowhere to be found. The ethical code whose dominant notes were 'Endure' and 'Refrain' could not be the final law of life.

The philosophical endeavour to attain virtue or goodness by knowledge was prolonged for centuries, and enlisted many of the finest minds of Greece and Rome; but it was a *tour de force*, which was bound to fail for various reasons. Virtue was made too academic: the faint murmurs of the schools scarcely ever reached the dull ear of toiling humanity. It was too intellectual: after all, men 'live by admiration, hope, and love.' It was too secular: there never was any certainty that man's beautiful moral ideal had its source and sanction in the character and will of God. And it was too superficial: man cannot really be moralized and meliorized unless he is first regenerated. 'Genuine goodness is no necessary consequence of the enlightenment of the understanding; it can only dispel follies, but not vices' (Martensen, *Christian Ethics [Individual]*, Edinburgh, 1884, p. 39).

2. In the Old Testament.—The Hebrew prophets and poets do not analyze abstract ideas, but give impassioned utterance to the spiritual truths by which the moral life is generated, fostered, and perfected. For them the energy of goodness lies in the will, behind which is the immutable character, of God. They teach, exhort, and rebuke their nation with an authority which is justified by their inner assurance of being called to speak for a God of absolute righteousness. 'Good and upright is Jahweh' (Ps 25⁸), requiring men to depart from evil and do good (34¹⁴), condemning all who obliterate moral distinctions (Is 5²⁰). He deepens the sense of sin till men cry in anguish, 'There is none that doeth good, no, not one' (Ps 141²). But He is good and ready to forgive (86⁵). He is good to all (145⁹), and the moral ideal which He sets before men is beautifully simple: 'Trust in Jahweh, and do good' (37³); 'He hath showed thee, O man, what is good; and what doth Jahweh require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?' (Mic 6⁸).

The Old Testament conception of goodness is vital and therefore progressive; dynamic, and not till after the Exile merely static. The morality of the Hebrews, like their religion, had a history. The ideal of conduct cherished by the prophets was very different from that of the rude nomads who swarmed from the desert into the land of the Canaanites. Under the discipline of events, interpreted by the genius of spiritual leaders, less and less importance came to be attached to outward righteousness, more and more attention was directed to the hidden springs of action in the soul. But the prophetic sense of the weakness of human nature stirred a longing for the inspiration of a new supernatural power. Jeremiah's hope of the triumph of goodness lay not in the self-amendment of Israel and Judah, but in Jahweh's making a new covenant with them, putting His law in men's inward parts, and writing it in their heart (Jer 31³¹⁻³²).

3. In the New Testament.—Jesus both extends and deepens the prophetic conception of goodness. Absolute faith in the goodness of God is the keynote of all His teaching. He refuses to be lightly called good (Mk 10¹⁸), not because He is conscious of any evil in Himself, but because He has still to be perfected by struggle and temptation. He has a sense of the immeasurable contents of human, as well as of Divine, goodness. For Him no action has value apart from motives and dispositions; He seeks the source of morality in the inner spirit of conduct; He goes back beyond the legalism of His time to the fundamental moral ideas of the Law and the Prophets, disengaging the principle upon

which they rest. To Him the only real good is the good self: make the tree good and the fruit will be good (Mt 7¹⁷). He has an optimistic assurance of the triumph of goodness, rejoicing even in revilings and persecutions as part of the process through which evil is to be vanquished. In His view nothing can permanently withstand the power of love. 'Man can only seek for truth and goodness, and if for a time he turns his energies against the good cause, it is not in the spirit of a being who desires evil—for man is not a devil, but in his real being "a son of God"—but in his confusion of the true with the false' (John Watson, *Christianity and Idealism*, Glasgow, 1897, p. 93). In the life of Jesus the image of goodness rises as a universal example. The moral ideal, which is latent in every man, is active and triumphant in Him. In contemplating Him men for the first time really 'feel how awful goodness is, and see virtue in her shape how lovely.'

'Religion cannot be said to have made a bad choice in pitching on this man as the ideal representative and guide of humanity; nor, even now, would it be easy, even for an unbeliever, to find a better translation of the rule of virtue from the abstract to the concrete than to endeavour so to live that Christ would approve our life' (J. S. Mill, *Three Essays on Religion*, pop. ed., London, 1904, p. 107).

His goodness is so far from being a possession to be enjoyed by Himself alone that it is communicated everywhere to faith; and, inasmuch as His followers are transfigured into His image (μεταμορφώμεθα [2 Co 3¹⁸]), He becomes the Founder of a new humanity, pledged to secure the ultimate victory of His Divine ideal of goodness.

4. In modern speculation.—The problem of the nature and sanction of goodness has, for three centuries, engaged many of the keenest minds of modern Europe. Every thinker has had the task of squaring his ethical conceptions with his general view of man's place in the cosmos. The school of Hume, for which the human mind is merely a bundle of states of consciousness, can recognize no higher motive than the agent's interest or happiness, so that the noblest character is merely a means to an end—the promotion of pleasure. Kant holds that there is nothing good but the good will, which is good in itself, not with reference to any external facts. He teaches that man, as a rational being, is bound to obey a categorical imperative, the content of which is given in the formula: 'Act only on that maxim (or principle) which thou canst at the same time will to become a universal law' (*Metaphysic of Morals*, sect. ii.). Character, which Novalis (*Schriften*, i. 242) defined as 'ein vollkommen gebildeter Wille,' is thus so far from existing for anything else that all other things rather exist for its sake. The pleasures and pains of life are but part of the raw material out of which character is created. Grant that 'the attempt to establish an absolute coincidence between virtue and happiness is in ethics what the attempting to square the circle or to discover perpetual motion is in geometry and mechanics' (L. Stephen, *Science of Ethics*, London, 1882, p. 430), this discrepancy, which so perplexed and troubled the ancient Hebrews, can now be calmly contemplated. The presence of suffering in all noble lives proves that there is a higher end than pleasure: here the Stoics were absolutely right. To inquire after the utility of goodness 'would be like inquiring after the utility of God' (Carlyle, *Miscellanies*, i. 48). What gives the moral life its Divine sanction 'is the discovery that your gleaming ideal is the everlasting real, no transient brush of a fancied angel's wing, but the abiding presence and persuasion of the Soul of souls' (J. Martineau, *Study of Religion*, Oxford, 1888, i. 12).

5. Relation to evolution.—The doctrine of evolution has shed a new and bewildering light upon the problem of the genesis and worth of goodness. It

has raised anew in the acutest form the old question whether the Soul of the world is just—whether goodness in man is, as Plato thought, a manifestation of the Absolute Good. Huxley was impressed by 'the unfathomable injustice of the nature of things'; he affirmed that 'the practice of that which is ethically the best—what we call goodness or virtue—involves a course of conduct which, in all respects, is opposed to that which leads to success in the cosmic struggle for existence'; he in fact denied the possibility of identifying 'the power which makes for righteousness' with 'the power behind natural evolution' (*Evolution and Ethics*, London, 1893, pp. 12, 33). Nietzsche, on the other hand, hailed the ethics of evolution as a kind of new gospel; he glorified brute strength, superior cunning, and all the qualities that secure success in the struggle for life; he demanded, in the name of development, a revaluation of all moral values, a demoralization of all ordinary current morality; and he thought he foresaw, as a new Messiah, the Superman who is *jenseits von Gut und Böse*.

It is probable that there is much more real goodness in Nature than either Huxley or Nietzsche allowed; that she is not so 'red in tooth and claw' as she has been painted; that there has, since the very beginning of life in our planet, been a principle of altruism (*q.v.*), a struggle for the life of others (H. Drummond, *The Ascent of Man*, London, 1894, p. 29 ff.). Science cannot disregard the principle of continuity, and the future evolution of humanity will be as much a part of the cosmic process as the past. But that which is natural is first, and afterward that which is spiritual. We are allied to that which is above us as well as to that which is beneath us. Nature is so imperfect that the Stoical doctrine of life in conformity with her—sentimentally accepted by Rousseau and fiercely by Nietzsche—is not enough for the moral guidance of man. As Matthew Arnold says in his sonnet 'In Harmony with Nature':

'Know, man hath all which Nature hath, but more,
And in that more lie all his hopes of good.'

Seth Pringle-Pattison, *Man's Place in the Cosmos*, Edinburgh and London, 1902; H. Sidgwick, *Outlines of the History of Ethics*, London, 1902; R. A. P. Rogers, *Short History of Ethics*, do. 1911; W. R. Sorley, *Recent Tendencies in Ethics*, do. 1904; R. Bucken, *Geistige Strömungen der Gegenwart*, Leipzig, 1904; E. Westermarck, *Origin and Development of the Moral Ideas*, 2 vols., London, 1906-08.

JAMES STRAHAN.

GOODWILL and its opposite, 'illwill,' denote by their etymology distinctively moral characteristics formed by voluntary effort in contrast to the instinctive disposition or temperament described as *good nature* or *ill nature*. But there is a certain fluidity in the use of the terms, so that, like their Latin equivalents, *benevolence* and *malevolence*, they are readily applied to the instinctive impulses of nature as well as to creations of will. Thus goodwill expresses one side of amiability (*q.v.*). It is the disposition or willingness to love, though it does not, like amiability, suggest that this is calculated to evoke a response of love in others.

J. CLARK MURRAY.

GOOD WORKS.—See MERIT.

GORAKHNATH.—The traditional founder of the Indian sect of Kānpātā, or split-eared, Yogis (see YOGIS). The name is a corruption of the older Skr. form *Gorakṣanātha*, 'Lord of cattle-herders,' or, possibly, 'Lord of Gorakṣa' (see below). His date is unknown, the three most circumstantial legends concerning him being so contradictory that nothing certain can be gathered from them. In Nepal he is associated with King

Narendra Deva, who reigned in the 7th cent. A.D.;¹ in Northern India he is represented as a contemporary and opponent of the reformer Kabir, who flourished in the 15th cent.;² while, in Western India, one Dharmnāth, who is said to have been his fellow-disciple, appears to have introduced the Kānpāṭā doctrines into Kachchh at the end of the 14th century.³ If the traditional relationship between Dharmnāth and Gorakhnāth can be established as a fact, the last-mentioned date is the most probable one.

The Kānpāṭā Yogis trace the origin of their tenets far beyond Gorakhnāth. All authorities agree in making him one of the twelve (or, according to some, twenty-two) disciples of Matsyendranāth, a disciple of Ādināth and a Yogi saint whom the Nepalese identify as none other than the Buddhist deity Arya Avalokiteśvara. Some make Ādināth the founder of the Yogis, while others carry the list much further back.⁴ All traditions state that the disciple Gorakhnāth was greater than his master, and that it was he who introduced the custom of splitting the ears of disciples and founded the sub-sect of the Kānpāṭās. The Kānpāṭās themselves fall into two groups—those of Hindustan proper, who trace their descent directly from Gorakhnāth, and those of Western India, who refer their immediate origin to his fellow-disciple Dharmnāth. Several Sanskrit works are attributed to Gorakhnāth,⁵ which may or may not be genuine; but the most authentic account of the tenets of the sub-sect will be found in the *Gorakhnāth-ki Gosthī*, a modern Hindi work reporting a controversy between him and Kabir, and written by a partisan of the latter.⁶ These do not differ from those of other Śaiva ascetics; for an account of them, see art. YOGIS.

In Indian legend Gorakhnāth is ubiquitous and all-powerful. He was the patron saint of the State of Gorkhā (Skr. Gorakṣa), for many years the rival, and ultimately the conqueror, of the adjoining State of Nepāl, of which the protector was Matsyendranāth. It is from Gorkhā that our 'Gurkha' soldiers take their name. Tibetan tradition⁷ claims Gorakhnāth as a Buddhist magician, and states that his Kānpāṭā disciples were also originally Buddhists, but became followers of Śīvara (i.e. Śaivas) on the fall of the Sena dynasty at the end of the 12th cent., as they did not wish to oppose the Muslim conquerors.⁸

Another Nepāl legend makes Gorakhnāth cause a drought lasting twelve years, by the simple expedient of collecting all the sources of water and sitting on them. Buddhist and Brahmanical traditions differ as to the method by which the water was released, but the episode is one of the most important in the cycle of old stories which forms a preface to the sober historical notices of the country.⁹

Gorakhnāth has long been deified in India proper, and legend gives him omnipotence. He can coerce even Brahmā, the god of Fate, and command him to alter a person's destiny.¹⁰ Sometimes he is shown as greater even than Śiva

⁹ For the Buddhist story, see D. Wright, *History of Nepal*, Cambridge, 1877, p. 140 ff.; and, for both, Lévi, i. 348 ff., 351 ff.

¹⁰ Cf. W. Crooke's note to the story of Gūgā, *IA* xxiv. [1896] 61.

himself.¹ His principal shrine is at Gorakhnāth in the district of Gorakhpur in the United Provinces. The best account of this is that given by Buchanan-Hamilton.² The local tradition is that Gorakhnāth is identical with the Supreme Being. In the Satya Yuga (or Golden Age) he lived in the Panjāb,³ in the Tretā Yuga (or Silver Age) at Gorakhpur, in the Dvāpara Yuga (Copper Age) at Hurmuz (Hormuz), and in the Kali Yuga (or present Age) at Gorakhmādhī in Kāthiāwar.⁴ He also for some time resided in Nepāl.

In a cyclic poem, entitled *The Song of King Mānik Chandra*,⁵ current in the Rangpur District of Bengal, his immediate disciple, the Hāḍī Siddha, a magician of great power, was a kind of domestic chaplain to the terrible queen Mayanā, and induced her son, King Gopichandra, to abandon his kingdom and to become an ascetic for twelve⁶ years. During this time Gopichandra had to sink to the lowest depths and perform menial offices to a common harlot. The Hāḍī Siddha was himself a sweeper by caste—a fact which, in the locality in which the poem is current, implies nameless abomination. Rangpur lies outside the traditional Aryan pale, and the whole group of circumstances points to non-Aryan tradition. The poem, moreover, contains numerous traces of Buddhist influence.⁷

The legend of Gopichandra is also met with in other parts of India. A popular, and widely spread, version makes Gorakhnāth himself convert the famous King Bhartṛhari and induce him to adopt an ascetic career. According to others, the name of the hero is Gopichand, and sometimes Gopichand-Bhartṛhari.⁸ Indeed, the association of Gorakhnāth and Bhartṛhari forms the theme of a drama by Harihara, the *Bhartṛharinirveda* (tr. Gray, *JAS* xxv. [1904] 197-230).

No legend is more popular in Northern India than that of Gūgā, of which several versions have been published.⁹ Here not only is Gorakhnāth the wonder-working saint who is responsible for the birth of the hero; he is also the *Deus ex machina* who ever and anon appears to help him. It is in this story that, as we have seen, with this object he bends even Fate to his will.

So also in other important folk-tales, such as those of Pūran Bhagat, and of Rājā Rasālū, he takes a most prominent part.¹⁰ In fact, in the popular religion of India he is the representative of Śiva, or even a form of that god himself—a character which is consonant with the literary tradition that he was a great teacher of the Śaiva religion, and an opponent of the mediæval Bhakti-mārga reformers of northern India.¹¹

¹ Cf. G. A. Grierson, *JASB* xlvii. pt. i. p. 139 ff.

² Ap. Montgomery Martin's *Eastern India*, London, 1838, ii. 484.

³ According to D. Ibbetson, *Outlines of Panjab Ethnography*, Calcutta, 1883, § 528, the Kānpāṭā Yogis are specially strong in the higher Panjāb Himalāya, where Śiva is worshipped. There they perform semi-sacerdotal functions.

⁴ Cf. *BG* viii. [1884] 155, 446.

⁵ Edited and translated by G. A. Grierson in *JASB* xlvii. pt. i. p. 185 ff.

⁶ So, Gorakhnāth shuts up the rain for twelve years, and was one of the twelve disciples of Matsyendranāth.

⁷ Cf. Dinesh Chandra Sen, *Hist. of Bengali Language and Literature*, Calcutta, 1911, p. 56 ff.

⁸ Cf. G. A. Grierson, 'Two Versions of the Song of Gopi Chand,' *JASB* lvi. pt. i. p. 35 ff.; and W. Crooke, *TC*, Calcutta, 1896, iii. 153 ff.

⁹ E.g. W. Crooke, *PR* 2, London, 1896, ii. 211, and *IA* xxiv. 49 f. (in the latter there are references to other versions); J. M. Doule, *PNQ* i. [1883] 3; R. Temple, *Legends of the Panjāb*, Bombay, 1884-1900, i. 121 f. and iii. 261.

¹⁰ For these, and others, see B. Temple, *op. cit.*, Index, s.v. 'Gorakhnāth.' According to a tradition of the Nepāl Tarāī, during Yudhiṣṭhira's journey through the Himālaya to heaven his brethren fell behind and perished one by one. Only Bhīmasena survived. He was saved by Gorakhnāth, who made him king of Nepāl (Grierson, 138).

¹¹ Cf. G. S. Leonard, 'Notes on the Kānpāṭā Yogis,' *IA* vii. 299. For Bhakti-mārga, see *BR* ii. 539 ff.

It is difficult to sift any grains of truth from this heterogeneous mass of fable. If Gorakhnāth is not a purely mythical personage—a reflexion in the popular mind of the great Śaiva doctor Śaṅkarācārya—it is probable that the literary account of him is correct, and that he did convert Nepāl from Mahāyāna Buddhism to Śaivism. He may himself have been a native of the Himālaya, where, alongside or in spite of Buddhism, the worship of Śiva has always been prevalent. We have seen that in the western Himālaya, north of the Panjāb, his followers, the Kānpātā Yogīs, still perform sacerdotal functions. If, on the other hand, his name merely means the 'Lord of Gorakṣa,' it may simply represent Śiva as the guardian deity of that State; and the conversion of Nepāl may refer to the historical fact of the Gorkhā conquest of the country, which was under the protection of the Buddhist Ārya Avalo-

GORGON (from Gr. γοργός, 'terrible,' 'wild,' 'fierce'; cf. O. Ir. *garg*, 'wild,' 'rough'; M.H.G. *karc*, 'strong,' 'violent'; Russ. *zarkij*, 'angry,' 'quarrelsome'; Slav. *groza*, 'horrid'; Ir. *gráin*, 'ugliness' [see Prellwitz, *Etymol. Wörterbuch*², Göttingen, 1905, and Boisacq, *Dict. étymol.*, Heidelberg, 1907 ff., s.v.]).—The Gorgons are to the modern mind three mythological beings of hideous form and evil character, one of whom, Medusa, was slain by Perseus. Her terrible face, later conceived of as beautiful, had power to turn men into stone. Her head, cut off by Perseus, was put by Athene in the centre of her shield; it was called the Gorgoneion. We now know that the Gorgons took their rise not in mythology but in ritual, and that they are expressions ('projections') of a very primitive religious emotion. It is unnecessary nowadays to spend time and space in examining bygone attempts at interpreting the

FIG. 1. Gorgon on Rhodian Plate.

kiteśvara (Matsyendranāth). Such an explanation, though well-suited to the state of affairs in Nepāl, will not account for the prominent position occupied by Gorakhnāth in the folk-religion of the plains of India.

No connected account of Gorakhnāth has hitherto been written. The subject is well worthy of further investigation, for it is of considerable importance in the religious history of India. But such a study must be undertaken on the spot, by a scholar conversant not only with Indian literature, but also with ethnology and folklore.

G. A. GRIERSON.

GORAKHPANTHĪ.—A name sometimes used in Northern India for the Kānpātā Yogīs, as disciples of Gorakhnāth. See artt. GORAKHNĀTH and Yogīs.

mythological Gorgons, as, e.g., storm-clouds. Such attempts were possible only when it was supposed that the concept as well as the name of Gorgon was confined to the Greeks. We now know it to be world-wide. What the Greeks did here, as so often elsewhere, was by their fertile play of fancy to conceal a simple fact—the use of ritual masks for magical and especially for apotropaic purposes. The Gorgon as monster sprang from the Gorgoneion, the terrible face or head; not the Gorgoneion from the Gorgon.

The primitive Greek had, in his ritual, a grinning mask, with glaring eyes, protruding beast-like tusks, and pendent tongue. He called it *gorgoneion*. He used it, as the savage does to-day, to scare away evil things—his enemies in the flesh and his ghostly enemies. He wore it on his shield; he placed it over his house; he hung it on his oven; doubtless, though here precise evi-

dence fails us, he danted with it as a mask at his ritual dances. Most anthropological museums contain specimens of *gorgoneion*-like dancing-masks; the Museum für Völkerkunde at Berlin has excellent examples, with tusks and protruding tongue. The function of such masks is permanently to make an 'ugly face' for prophylactic purposes.

Ritual masks fell into disuse, but still the pictures of them went on, on pottery, as the blazon of shields; the traditional Athene not only wore the goat-skin *agis* which had once been the ordinary dress of her people, but on her breast she wore the Gorgoneion, the beast's head, humanized by degrees, but always made frightful. The Greek, being always curious as to causes and a born story-teller, asked the question whence came the bodiless dreadful head: it must have been severed from the body of a monster, the monster must have been slain; a slayer was provided—the hero Perseus. The name Gorgoneion presupposes the Gorgon, but the conception of the monster rose out of the bodiless head, the mask.

Our earliest literary notice of the Gorgon bears out this interpretation—that the head is primary and essential, the monster begotten only to account for it. Odysseus in Hades (*Od.* xi. 633 ff.) desired to hold further converse with dead heroes, but,

'Ere that might be, the ghosts thronged round in myriads manifold,
Weird was the magic din they made, a pale-green fear gat hold

Of me, lest, for my daring, Persephone the dread
From Hades should send up an awful monster's grizzly head.'

It would have been more natural and efficacious for Persephone to send up the monster herself, but there was no monster, only a grizzly head (*γοργυλην κεφαλὴν*). In early representations in art the dreadful head is always prominent; and the body like a mere appendage tacked on. This is clearly seen in fig. 1 from an early Rhodian plate in the British Museum (*JHS* vi. [1885], pl. lix.). Here the 'ugly face' has been furnished with a body

—not a human monster. Art has been at work to make it more hideous; the staring eyes are surrounded by a pattern in spots; the upstanding hair, which sometimes develops into snakes, is well shown, and the tongue protruding from the wide grinning mouth; the mouth grins in order the better to show the teeth. The gesture of putting out the tongue to show aversion survives in the street-boy of to-day. The origin of the gesture seems to be not so much to show disgust as to eject some hateful substance from the mouth. The religious content is the same as that of spitting—at first to get rid of evil, then to avert it. We may compare the Greek word for winnowing-fan, *πρίον*, or the spitter, i.e. the rejecter of chaff (see art. *PAN*, vol. v. p. 754). If we were to give such action a specialized name, we should have to call it not *apotropaic* but *apoptuic*.

FIG. 2. Gorgon on Corinthian Vase.

In fig. 3 we have a Maori staff in the present writer's possession decorated with a Gorgoneion. With such staffs held horizontally, the Maori advanced against their enemies to frighten them by showing the 'ugly face.' The protruding tongue forms the front of the staff; the tongue is elongated out of all proportion, and at first sight the Gorgon-head is not easy to recognize. But all the

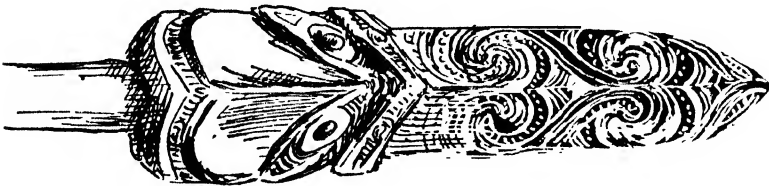

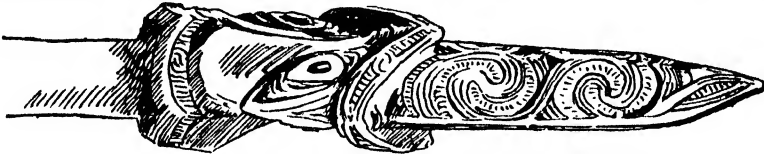

FIG. 3. A Maori Staff with a Gorgon-head.

and four wings; the monster thus compounded holds two birds in heraldic fashion like 'Lady-of-Wild-Creatures' (*πόρνια θηρώων*). She has developed from an 'ugly face' into an evil demon.

In fig. 2 we have a Gorgon from a Corinthian vase at Munich. Here it is evident, from the long drooping ears, that the 'ugly face' is that of a beast

usual features are present: eyes filled in with enamel, overhanging brows, nose, mouth, and, inside the latter (invisible in fig. 3), a row of teeth. The face is, however, so subordinated to the long, highly decorated tongue that its meaning might easily be lost.

Finally, it is of interest to note that the the-

atrical masks of Dionysos retain the wide open mouth (see MASKS). The *gorgoneion* is, in fact, only one particular form of a dance-mask. It stands as a constant memorial of the religion of fear—it is Terror incarnate.

LITERATURE.—For Gorgon mythology, see Roscher and Daremberg-Saglio, s.v. 'Gorgonen'; for ritual origin: J. E. Harrison, *Proleg. to Study of Gr. Rel.*, Camb. 1903, pp. 187, 197; for Gorgons in modern Greece and their relation to Sirens: J. C. Lawson, *Modern Gr. Folk-Lore*, do. 1910, pp. 184-190; for an attempted interpretation of the combat of Perseus and Medusa as a fight between octopus and lobster: F. T. Elworthy, 'A Solution of the Gorgon Myth', in *FL* xiv. [1903] 253, and *ERE* v. 909; for the Gorgoneion on Athens's *agēis* as a beast's head: W. Ridgeway, in *JHS* xx. [1900] p. xiv; for the Gorgon mask: M. Mayer, 'Mykenische Beiträge', in *Jahrbuch d. arch. Inst.*, Berlin, 1892, p. 201. For a rich collection of material, see O. Gruppe, *Gr. Mythol. und Religionsgesch.*, Munich, 1906, Index, s.v. 'Gorgones'.

J. E. HARRISON.

GOSAIN.—1. Name and distribution.—The name in its varied forms (Gusāin, Goswāmi, Gosāmi, Swāmi, Sāmi) comes from Skr. *gosvāmin*, 'master of cows or herds', with the secondary sense of 'one who has brought his passions into control.' It is used to designate an Order of Hindu ascetics or beggars, of whom 182,648 were recorded at the Census of 1901, being most numerous in Bombay, Rajputānā, Bengal, the Central Provinces, and Berar.

2. Classification.—The term is ill defined, and its import varies in different parts of India. The most convenient distinction is between the Śaiva, or worshippers of Śiva, and the Vaiṣṇava, or worshippers of Viṣṇu.

(a) *Śaiva Gosāins*.—The most respectable members of this Order are the spiritual descendants of the great South Indian teacher, Śaṅkarāchārya, the very incarnation of the strictest Brāhmanism, who lived in the beginning of the 8th cent. A.D. He is said to have had four principal disciples, from whom the ten divisions of the Order—hence called the 'ten-named,' or *Daśnāmi Dandis*—originated. These are: Tīrtha, 'shrine'; Āśrama, 'order'; Vana, 'wood'; Aranya, 'forest'; 'desert'; Sarasvatī and Bhārati, the goddesses of learning and speech; Puri, 'city'; Giri and Pārvata, 'a hill'; and Sāgara, 'the ocean.' Each member adds to his own name that of the group to which he belongs—e.g. Ānanda-giri, Vidy-āraṇya, Rāma-āśrama.

'There are but three, and part of a fourth mendicant class, or those called Tīrtha, or Indra, Āśrama, Sarasvatī, and Bhārati, who are still regarded as really Śaṅkara's *Daṇḍis*. These are sufficiently numerous, especially in and about Benares. They comprehend a variety of characters; but amongst the most respectable of them are to be found very able expounders of the *Vedānta* works. Other branches of Sanskrit literature owe important obligations to this religious sect. The most sturdy beggars are also members of this Order. . . . Their contributions are levied particularly upon the Brāhmanical class, as, whenever a feast is given to the Brāhmins, the *Daṇḍis* of this description present themselves as unbidden guests. . . . Many of them practise the *Yoga*, and profess to work miracles. . . . The remaining six and a half members of the *Daśnāmi* class, although considered as having fallen from the purity of practice necessary to the *Daṇḍi*, are still, in general, denominated *Ātīs* [Skr. *ātīta*, 'passed away, liberated from worldly cares and passions']' (H. H. Wilson, *Religious Sects of the Hindus*, l. 203 ff.). The *Daṇḍi* derives his name from the fact that he carries a small wand (*daṇḍa*) with several projections from it, and a piece of cloth dyed with red ochre, a colour which comes down as the garb of religious persons from the Brāhmanic and Epic periods (A. Weber, *Hist. of Indian Literature*, Eng. tr., London, 1889, p. 76). In this cloth his Brāhmanical cord is supposed to be enshrined. He shaves his head and beard, wears only a patch of cloth round his loins, and rubs himself with ashes, probably in the first instance taken from the sacrificial fire, with which he purifies himself, repels evil spirits, and acquires *mana* (cf. J. E. Harrison, *Proleg. to the Study of Gr. Rel.*, Cambridge, 1903, p. 492 ff.; L. B. Farnell, *The Evolution of Religion*, Oxford, 1906, p. 100). He usually wears on his forehead, as a charm or amulet, and as a mark of his Order, a triple transverse line, made with sacred ashes. He subsists on food obtained ready dressed from the houses of Brāhmins once a day only, and this he receives in a small clay pot which he always carries. The main distinction between the *Daṇḍi* and the *Ātī* is that the latter does not carry the

staff, possesses clothes, money, and ornaments, prepares his own food, and admits associates from castes other than the Brāhman.

Śaiva Gosāins fall into two classes—monks, known as Maṭhadhārī (Hind. *maṭha*, 'a monastery', *dhārī*, 'occupying'), as contrasted with the Gharbārī, or laymen (Hind. *gharbār*, 'house and home'). The true Dandī should, in accordance with the precepts of Manu (*Laws*, vi. 41 ff.), live alone, near to, but not within, a city. Many of them, however, at the present time, particularly at holy places, like Benares and Hurdwār (*qq.v.*), specially devoted to the cultus of Śiva, live in monasteries. The lay members of the Order follow trade and other secular occupations, marry, and have families. While the true Dandī Order is recruited only from Brāhmins, the Gosāins receive not only children devoted by vow or those born to lay members of the Order, but all classes of Hindus, except the very lowest and most polluted castes. In the Deccan they are drawn chiefly from the Kunbi (cultivators) or Mālī (gardeners) (*BG* xvi. 490). In Benares, according to M. A. Sherring (*Hindu Tribes and Castes in Benares*, Calcutta, 1872-81, i. 256), the admission of a novice usually takes place at the festival known as the *Śiva-rātri*, or 'night of Śiva.' Water brought from a tank in which a *linga* has been deposited is poured over his head, which is then shaved. The *guru*, or head of the Order, whispers one of the usual Śaiva formulæ (*mantra*) into his ear—*nama Śivāya*, or *om nama Śivāya*, 'in the name of Śiva,' or *om so'ham*, 'I am He,' embodying the Smārta principles that man's spirit is identical with the One Spirit (*ātmā*, *Brahma*), which is the essence and substratum of the universe, and cognizable only through internal meditation and self-communion (M. Monier-Williams, *Brāhmanism and Hindūism*⁴, London, 1891, p. 95). According to J. Grant Duff (*Hist. of the Mahrattas*⁵, Bombay, 1873, p. 7 n.), in the Deccan those castes which wear the loin-string destroy it, and substitute a piece of cloth, if any covering be deemed necessary. Up to this stage the novice may change his mind; the irretrievable step by which he becomes a Gosāin for ever is the performance of the *homa*, or fire-sacrifice, when butter and milk are poured on the holy fire; and, while sacred texts are repeated, the candidate vows poverty, celibacy, and a life spent in constant pilgrimages to the holy places of Hinduism (cf. *BG* xv. pt. i. p. 350 f., xix. 118).

(b) *Vaiṣṇava Gosāins*.—The term Gosāin is also applied to the heads of the Vaiṣṇava communities in Assam and Eastern Bengal (see *ERE* ii. 136 f.; E. A. Gait, *Assam Census Report*, 1891, i. 80 ff.; B. C. Allen, *ib.*, 1901, i. 39). The adoration of the *guru* is the essence of Vaiṣṇavism in Bengal, and it has been extended among the Vallabhāchāryas, 'the Epicureans of the East,' until among the Bombay leaders, known as Mahārājā, 'great king,' it became a cause of shameful scandals (J. Wise, *Notes on the Races, Castes, and Tribes of Eastern Bengal*, 57; [Karsandas Mlīr], *Hist. of the Sect of the Mahārājās or Vallabhāchāryas*, London, 1865; *Report of the Maharaj Libel Case*, Bombay, 1862; F. S. Growse, *Mathura, a District Memoir*⁶, Allahabad, 1883, p. 282 ff.). J. Wise writes:

'The Gosāins are a comparatively pure stock, and fair specimens of the higher Bengali race. As a rule they are of a light brown, or wheaten, colour, tall and large-boned. Muscular they ought to be, but indolence and good living stamp them at an early age with a look of sensuality and listlessness, and they become large fat men, fond of sleep, their chief muscular exertion consisting in holding out the foot to be kissed by admiring followers. Their lives are passed in sensual pleasures, and the boundless influence they wield among thousands of the middle classes is, unhappily, not directed to their moral elevation. Satisfied with a blind and unquestioning adoration, they are quite content, if it lasts during their lifetime, to disregard the possibility of agitation and revolution' (*op. cit.* 159).

On the other hand, B. C. Allen thus writes of the class in Assam:

'The leading Vaishnavite Gosains, who live in their Satras or colleges surrounded by their *bhakats* or monks, are men who exercise great authority over their numerous disciples, and on the whole exercise it wisely and well. . . . Unlike many priests, the powerful Gosains have always been conspicuous for their loyalty to Government, their freedom from bigotry, and the liberality of their views, and Hinduism is seldom presented in a more attractive form than that which is found in the Vaishnavite monasteries of the Majuli, the island which is formed by the confluence of the Brahmaputra and the Lohit' (*Census Report*, 1901, i. 41).

It is admitted on all sides that the wandering Gosains are a profligate class, who consort with prostitutes and women who have deserted their husbands (*BG* xiii. pt. i. p. 196, xx. 183 f.; H. Risley, *TC* ii. 344 ff.). In former times they were notorious in many parts of the country for their violence and rapacity (see numerous references in *BG* xiv. 135 n.). Later they joined the Mahratta armies, garrisoned many hill forts, and were recruited in large numbers in the service of Mahādji Sindia (Grant Duff, 478 f.; *BG* xviii. pt. i. p. 452).

LITERATURE.—Most of the chief authorities have been quoted in the article. The best general authority is still H. H. Wilson, *Religious Sects of the Hindus*, London, 1861-62. For the Panjāb, the *Census Reports*—1881 by D. C. J. Ibbetson, 1891 by E. D. MacLagan, 1901 by H. A. Rose; for the United Provinces, W. Crooke, *TC*, Calcutta, 1896; for Bengal, H. Risley, *TC*, do. 1891; J. Wise, *Notes on the Races, Castes, and Trades of Eastern Bengal*, London, 1883; Jogendra Nath Bhattacharya, *Hindu Castes and Sects*, Calcutta, 1896; for Bombay, *BG*, ed. J. Campbell, Bombay, 1877-1904; Govindbhai H. Desai, *Census Report Baroda*, 1911. W. CROOKE.

GOSĀLA.—See ĀJIVIKA.

GOSPEL.—This word (from *Godspell*, i.e. 'God-story' or 'Divine word') has since Anglo-Sax. times been the translation of *εὐαγγέλιον*.¹ In Homer the Greek term denotes the reward given to a messenger for bringing good tidings: *εὐαγγέλιον δέ μοι ἔστω* (*Od.* xiv. 152; cf. 166). In Attic Greek, *εὐαγγέλια θύειν* means to present a thank-offering to the gods for good tidings. In the LXX the plur. denotes a messenger's reward for good news. David relates with grim irony that, when a man came to him to announce Saul's death, expecting to be welcomed as a bearer of glad tidings, his reward (*εὐαγγέλια*) was death (2 S 4¹⁰). In 2 S 18^{22, 23}, where the idea of a reward for good news is unsuitable, it is probable that *εὐαγγέλια* (noun fem. sing.), signifying 'tidings,' should be read instead of *εὐαγγέλια*.

The first explicit references to the preaching of Divine good tidings—a gospel intended for a whole people—occur in Deutero-Isaiah (40⁹ 41²⁷ 52⁷ 60⁸ 61¹). In 40⁹ δ *εὐαγγελίζόμενος* (ἡγῶν) represents an ideal band of heralds sent to announce to Zion and Jerusalem the glad tidings that, Israel's sin being now forgiven, the exiles are to be delivered from Babylon and restored to their own land. Is 52⁷—'How beautiful upon the mountains are the feet τῶν *εὐαγγελιζομένων*,' κ.τ.λ.—is quoted in an abbreviated form (Ro 10¹⁵) by St. Paul, who adds, with thoughts of Israel's unbelief in his own day, 'but they did not all hearken to the glad tidings' (τῷ *εὐαγγέλιῳ*). In Is 61¹ the speaker, who may be either the prophet himself or Israel idealized as the servant of Jahweh, announces that Jahweh has anointed him (ἐχρίσέ με) to preach good tidings to the meek (*εὐαγγελισσάσαι πτωχοῖς*), and Jesus appropriates the words as the text of His sermon in the synagogue of Nazareth (Lk 4¹⁸).

After the crises of the Baptism and the Temptation, 'Jesus came into Galilee preaching the gospel' (κηρύσσων τὸ *εὐαγγέλιον*, Mk 1¹⁴). He 'went about

¹ In the NT *εὐαγγέλιον* never denotes a Gospel in writing, or one of the Four Gospels, though Mk 11 prepares the way for this later usage, which is apparently, though not certainly, found in the *Didache* (ch. xv.). Justin Martyr (*Apol.* i. 66) is the first to make explicit reference to the Four Gospels as *εὐαγγέλια*.

in all Galilee' (Mt 4²³), 'all the cities and the villages' (9³⁵), publishing it. He sent His disciples to proclaim it (10⁷, Lk 9²). It was called 'the gospel of God' (Mk 1¹⁴), i.e. the good tidings sent from God to men through Jesus, and 'the gospel of the Kingdom' (Mt 4²³ 9³⁵ 24¹⁴), i.e. the gospel which prepared men for the immediate founding of the Heavenly Kingdom on earth. In the Apostolic Church it was known as 'the gospel of God' (Ro 1¹⁵, 1 Th 2^{8, 9}), 'the gospel of the grace of God' (Ac 20²⁴), 'the gospel of Christ' (Ro 1¹⁶ etc.), simply 'the gospel' (Ro 10¹⁶ etc.), 'the gospel of the glory (manifested presence) of Christ' (2 Co 4⁴), 'the gospel of your salvation' (Eph 1¹³), 'the gospel of peace' (6¹⁵), 'an eternal gospel' (Rev 14⁶).

1. The content of the gospel.—Here two points have to be kept distinct. (1) What did the evangel signify for Jesus Himself, and for the disciples whom, in the course of His Galilean ministry, He sent to preach it? (2) What did it mean, after His Passion, in the Church which was founded on the fact of, or at least the belief in, His resurrection?

Pursuing the historico-critical method of investigation, scholars have obtained a definite answer to the second of these questions. They agree in the conclusion that the good tidings preached in the very earliest Apostolic Church was a gospel regarding the incarnate, atoning, judging, redeeming, glorified Christ. It was the Church's first confession of faith that Jesus was declared (or determined, *δυσθελός*) to be the Son of God with power by the resurrection of the dead (Ro 1⁴, cf. Ac 2²⁴⁻³²). There never was a time when the Church merely honoured Him as prophet, hero, or saint; she always worshipped Him as Lord and Redeemer. There is no evidence of any consciousness of a transition from the subjective religion of Jesus to the objective gospel of Christ. The Church was not founded on a new doctrine of God the Father of which Jesus was the teacher; it was based on the faith of the Church in His own unique personality. He was not the discoverer of a fact which was independent of Himself; He *was* the gospel, the mystery hid from the ages and finally revealed. It is, indeed, one of the accepted results of NT criticism that the primitive Church was never anything else than 'evangelical.'

But the other question remains to be answered. What was the gospel according to Jesus? What was the substance of His own teaching? What were the glad tidings which He bade His disciples—'whom also he named apostles' (Lk 6¹³)—carry to the lost sheep of the house of Israel? In other words, What was the spiritual legacy which He personally wished to bequeath to mankind? To this question the most diverse answers are given by living scholars.

(a) Some say, with Harnack, that 'the whole of Jesus' message may be reduced to these two heads—God as the Father, and the human soul so ennobled that it can and does unite with Him' (*What is Christianity?*, p. 65).

'In the combination of these ideas—God the Father, Providence, the position of men as God's children, the infinite value of the human soul—the whole Gospel is expressed' (p. 70). 'The gospel, as Jesus proclaimed it, has to do with the Father only, and not with the Son' (p. 147). 'The sentence, "I am the Son of God," was not inserted in the Gospel by Jesus himself, and to put the sentence there side by side with the others is to make an addition to the Gospel' (p. 149). The gospel according to Jesus, it has to be admitted, is connected with 'an antiquated view of the world and history,' but Harnack contends that the connexion is not indissoluble. 'The man to whom the Gospel addresses itself is "timeless," that is, it addresses itself to man, who, in spite of all progress and development, never changes in his inmost constitution and in his fundamental relations with the eternal world. Since that is so, this Gospel remains in force for us too' (p. 152).

(b) Others follow Johannes Weiss, Loisy, and Schweitzer in identifying Jesus' gospel with the apocalyptic hope of the speedy coming of the

Heavenly Kingdom. The 'Weissian theory' is that the Kingdom of God was not, as has generally been supposed, partly present and partly future, but wholly future and wholly transcendental.

'It is in this hope or nowhere that the historian should set the essence of the gospel, as no other idea holds so prominent and so large a place in the teaching of Jesus' (Loisy, *The Gospel and the Church*, p. 59). 'The thought of Jesus was entirely dominated by apocalyptic conceptions of the end of the world' (ib. p. 54). All His injunctions to His followers bear the stamp of 'that supreme indifference to human interests which is, historically, the form taken by the gospel' (p. 81). 'Nowhere does He identify the kingdom with God, and God's power acting in the heart of the individual' (p. 66). The new order which the gospel announces 'is objective, and consists not only in the holiness of the believer, nor in the love that unites him to God, but implies all the conditions of a happy life, both the physical and the moral conditions, the external and the internal conditions, so that the coming of the kingdom can be spoken of as a fact that completes history, and is in no way confounded with the conversion of those who are called to it' (p. 59).

On this theory the moral teaching of Jesus was not so much the ethics of the Kingdom as teaching which prepares for the Kingdom. It is an *Interimsethik*, designed for an interval which is expected to be brief (Schweitzer, *Von Reimarus zu Wrede*, 362). Jesus 'does not found a Kingdom; He only announces it. He exercises no Messianic activity, but He waits, with the rest of the world, for God to bring in the kingdom supernaturally' (ib. 236).

(c) Others, like Wellhausen (*Einleit. in die drei ersten Evangelien*), prefer to say that what Jesus taught was not 'the gospel.' We must make a broad distinction between Him and the Christian conception of Him which has existed since the foundation of the Apostolic Church. What the actual Jesus was, and what He preached, we can now only surmise. Even in the earliest Christian record which has been preserved—the memoirs of Mark—He stands transfigured before us. The most Christian part of the narrative—Mk 8²⁷ to 10⁴⁶—is the least historical. The Christian Messiah does not represent Jesus' own conception of His Messiahship, but rather the idealized conception which the nascent Church threw back upon His lifetime after His Passion. Divested of the attributes in which dogmatism has clothed Him, Jesus would be a very different figure from the Christ of 'the gospel.' Could we get 'back to Christ,' we should probably find that He was not a Christian but a Jew, who more prophetically taught a new and better way of serving God. But He is the Great Unknown. It may be well that we can never discover the truth of what He was, as we should only be disillusioned. If He did not reveal and proclaim 'the gospel,' the Church dreamed it, and she cannot now abandon her dream. Jesus is irrecoverably lost, but the ideal Christ of Paul and John remains. With their evangel we must be satisfied. Wellhausen ends his investigation with these remarkable words:

'If it had not been for his death, Jesus would never have become a subject for history. The impression of his career depends upon the fact that it did not run to a conclusion, but was broken off short, when it had hardly begun.'

(d) Others maintain that the scientific study of the NT is bringing us more than ever face to face with the Founder of Christianity, and removing all suspicion of an antithesis between the religion of Jesus and the gospel of Christ. In the historical Jesus they see 'a Person, who is not only equal to the place which Christian faith assigns Him, but who assumes that place naturally and spontaneously as His own' (J. Denney, *Jesus and the Gospel*, 1908, p. 374). In many passages which the critical analysis leaves unimpaired, the Son of Man reveals His consciousness of Himself, of His vocation, and of His claims upon men in startling and unparalleled language. So far from being unknown, He is the best-known figure in history. Fragmentary as the records of His life confessedly

are, His portrait is singularly complete, and it is instinct with self-evidencing Divinity. It is from concrete historical facts that the great ideas of the gospel derive their value and force. The original impulse of Christianity, the motive-power which from the first ensured its success, did not emanate from the Church's 'will to believe,' but was communicated to the Church by His transcendent personality. The cause cannot have been less wonderful than the effect; the victorious ideal must have been supremely real. It is contended that the resurrection of Jesus, illuminating all His teaching and justifying all His claims, made the Christian faith inevitable. In that stupendous event God gave His Church a supernatural, super-historical Lord and Saviour, and in every age the inner testimony of the Holy Spirit, transmuting the faith once delivered to the saints into a vital, personal, irrefragable experience, establishes the conviction that the gospel of Christ, like the Christ of the gospel, is a Divine Fact, the same yesterday, to-day, and for ever.

While the gospel may be studied as a whole or in its parts, some conception of its entirety and immensity is needful for a due appreciation of any individual aspect of it. Du Bose (in *The Gospel in the Gospels*) analyzes it into the Gospel of the Earthly Life, or the Common Humanity; the Gospel of the Work, or the Resurrection; and the Gospel of the Person, or the Incarnation.

'The life of Jesus would not be a gospel to us if it were not a revelation and a promise of human blessedness' (ib. p. 86). 'No view of the gospel could dispense with the death of Jesus' (p. 119). And 'there is not one of the Gospels which would have been written, there would be no Gospel at all, if there had not been not only the death but the resurrection' (p. 137). The Easter faith of the Apostolic Church was inseparable from the Easter fact. 'No criticism can assail the essential fact that something happened, shortly after our Lord's death, which sufficed to convince His disciples that He had arisen and was still alive' (E. F. Scott, *The Apologetic of the NT*, p. 47). 'All the theological demonstration of the Divine significance of Jesus is grounded in the historical fact that He rose again from the dead' (ib.).

2. Gospel and Law.—It has always been felt that the charm and power of the Gospel lie in its antithesis to Law. From the beginning of His ministry, Jesus evoked the wonder of His hearers by His 'words of grace' (Lk 4²²). What makes His message to men 'glad tidings' is the forgiving love which differentiates it from the awful majesty of justice. Not that He ever spoke a word in disparagement of Law, whatever He might say of human traditions. His followers never imagined that He intended to relax their moral obligations; rather they felt that He immeasurably raised their ideal of duty to God and man. But Law could never be His last word. While the scribes counted the multitude who knew not the Law accursed, Jesus gave them glad news of forgiveness to make them blessed. In the Apostolic Church it was not the thunders of the Law, but the music of the Gospel which caught the ear of mankind. Paul knew from the hour of his conversion that he must 'testify the gospel of the grace of God' (Ac 20²⁴). 'Grace' and 'Gospel' were his inevitable words, the one occurring some 90 and the other some 60 times in his Epistles. To the 'hard pagan Roman world,' with its 'deep weariness and sated lust,' he published an evangel of grace abounding over sin (Ro 5²⁰). Having himself lived successively under Law and Gospel, and believing both to be Divine, he made it his theological task to harmonize them in thought, and to substitute for the tyranny of Judaism 'the law of the spirit of life in Christ Jesus' (Ro 8²). On the whole, it is probable that he has not misunderstood the yoke which Jesus called easy and the burden He deemed light, but that the Epistles 'are an interpretation only, and not a transforma-

tion or even an essential modification, of the Gospel of our Lord' (Du Bose, *op. cit.* vii.).

JAMES STRAHAN.

GOSPELS.—The justification for including an article on the Gospels in an Encyclopædia of Religion and Ethics must lie in the immense effect which the Four Canonical Gospels have had and still have in the development and maintenance of Christianity. In the past few years much has been done towards solving some of the preliminary problems connected with the Gospels themselves and the traditions which underlie them. Some assured results have emerged and, as a consequence, certain ways of regarding the Gospels and their contents are imposed on the historical and philosophical investigator, and certain other ways are excluded.

The problems connected with the Gospels may be grouped as (1) *literary*, (2) *dogmatic*, (3) *historical*; and at the end we have to consider (4) *the value of the Gospels for present-day questions of ethics and religion*. Or, to take the case of a single Gospel, we have to consider (1) the method of its composition and the sources used; (2) the theological and ecclesiastical standpoint of the writer; we may then estimate (3) the historical worth of the picture drawn in the Gospel, as a whole and in details; finally, we may ask (4) what religious value and authority this picture of a far-off drama has for our own age.

It is important to notice at the outset that (1) and (2) are indispensable for (3) and (4), and to a great extent can be studied independently of them; but no scientific study of the important subjects grouped under (3) and (4) can be prosecuted without some satisfactory solution of the preliminary questions connected with (1) and (2). To take the most obvious example, a discussion of the general historicity of the Evangelical tradition must start from Mark, and not from Matthew or Luke.

Before surveying the Gospels in detail, we should consider some inevitable features of any document of early Christianity. In the modern study of the Gospels one chief aim is to reconstruct an intelligible picture of the life and work of Jesus Christ. We want the strong lights thrown by the ardour of faith, but we should like also shadows to give individuality to the figure. We want to hear the Gospel story as told from various points of view, and not only from that of the convinced and uncritical believer. Whether we should be really in a better position to comprehend the genesis of Christianity if we had documents of this sort is a question which admits of argument; what is certain is that we have no such documents, and that we are not likely to get them. Even when we have isolated our 'original' authorities, we

shall not be able to regard them as so many independent witnesses such as were sought for by 18th cent. apologists—at least, to continue the metaphor, we must expect to find them agreed upon a tale. The scenes of the life of Jesus Christ on earth were indeed enacted in public, and the multitudes heard His words; but our knowledge of them is derived from the disciples. We cannot hope to know more than the collective memory of the first circle of the believers at Jerusalem. Without pressing the narrative of the Acts in all its details, we learn from St. Paul's Epistle to the Galatians (2¹⁴) that less than nine years after the Crucifixion St. Peter was living in Jerusalem, and it is there and not in Galilee that our authorities place the home of the infant Church. Galilee has never been a Christian land. From the very beginning the Christians lived at a distance from the country in which the Master had worked. Moreover, we are told that 'the multitude of them that believed were of one heart and soul: and not one of them said that aught of the things which he possessed was his own; but they had all things common' (Ac 4³²). This may be an ideal picture, and in any case the state of things was not permanent, but, if it be at all true of individuals in any one particular, we cannot doubt that it was specially true with regard to their reminiscences of the Lord. The memory of the words and deeds of Jesus Christ must have been thrown into the common stock: 'When he was raised from the dead, his disciples remembered that he spake this; and they believed the Scripture, and the word which Jesus had said' (Jn 2²²). Out of the bare reminiscences of the disciples those sayings and acts which in the light of later events were seen to be of significance were repeated to the younger generation that gradually took the place of the companions of the Ministry. The object of the Evangelists was not biography, but edification.

The Gospel record passed through a full generation of pious reflexion and meditation, before it began to be written down and so fixed for all time. This explains to some extent the selection of events and the method of treatment. Above all, it helps us to realize what we get when we come to the final results of the purely literary criticism of the Gospels. Our Second Gospel may be the work of John Mark, some time the companion of St. Peter, and it may embody some things which he had heard from St. Peter's mouth. But even so the narrative has lost much of the personal note; it is far too even to be mere personal reminiscence. The tale of St. Peter's denial, for example, may be substantially true, but the narrative in Mark does not read like St. Peter's own first confession of the story. It is not a tale told for the first time. We are not here suggesting that any written document in Greek or Aramaic underlies St. Mark: the narrative may have been written down for the first time by the author, but some of the tales which he is putting on paper had been repeated many times before by word of mouth.

It is not to be denied that all this lets in the opportunity for errors of detail. 'These things his disciples did not know (*οὐκ ᾔσθοντες*) at the first,' says the Fourth Evangelist; 'but when Jesus was glorified, then remembered they that these things were written of him, and that they had done these things unto him' (Jn 12¹⁶). The Gospels took their shape in an atmosphere of growing and unquestioning faith; they were compiled by men writing in the light of subsequent events. Under such circumstances it is hard for memories to be dryly accurate, it is easy to feel that the more obviously edifying form of a story or a saying must be the truer version. The eye-witnesses of the Word, of whom St. Luke speaks (1³), had

known Jesus the Nazarene for a friend, but they had learned to believe that He was the Only Son of God, and that He now was waiting until the fullness of the times at the right hand of His Father. He had lived among them as man with man, as a master with his disciples, and at the time they had not thoroughly realized the experience they were going through. Now they felt that they would be fools and blind if they failed to see the deep significance of occurrences to which they had paid so little attention, and words of which they had only half understood the meaning. The real wonder is that any intelligible picture of the events has been preserved to us.

1. The origins and literary sources of the several Gospels.—The four Gospels are not, even in a literary sense, four independent works. The Fourth Gospel is most conveniently treated apart. But the three Gospels, according to Matthew, Mark, and Luke, obviously have something in common; they must either copy one another or make use of a common source. The first question is whether this source (or sources) was written or oral. The opinion of the present writer, most unhesitatingly, is that it was a written source. In the first place, the common matter is not mere floating tradition, the property of all the Christian community. Had it been this, it is natural to think that the incidents identically related by Matthew, Mark, and Luke would have been to a larger extent the critical points of the Ministry, and not a capricious selection of anecdotes. The story of the Resurrection, the words from the Cross, the narrative of the Last Supper—in these we might have expected all our authorities to agree, even in detail; but they do not agree. On the other hand, the parenthesis explaining that Jesus turned from addressing the Pharisees to say to the sick of the palsy, 'Arise,' is found in all three Synoptic Gospels (Mt 9¹, Mk 2¹, Lk 5²⁴); all three insert at the same point the statement concerning Herod's alarm about Jesus (Mt 14¹², Mk 6¹⁴⁻¹⁵, Lk 9⁷⁻⁸), and Matthew and Mark go on to relate in a footnote, so to speak, the circumstances of John the Baptist's murder; all three inform us that the Pharisees, when they asked about the tribute-money, began by assuring our Lord that He taught the way of God in truth (Mt 22³⁴, Mk 12¹⁴, Lk 20³¹). These points are matters of secondary detail; an oral tradition which contained them must be held to have had singular consistency, and, if our Evangelists had worked upon a fixed oral tradition of this definite sort, we cannot imagine how they dared to take such liberties with it. A definite oral tradition is authoritative; can we conceive of an oral tradition which accurately distinguishes between the *baskets* (κῆφοι, Mt 14³⁰ 16⁹, Mk 6⁴¹ 8¹⁹, Lk 9¹⁷) of fragments taken up after the feeding of the 5000, and the *hampers* (σφύδες, Mt 15³⁷ 16¹⁰, Mk 8⁸⁻⁹) taken up after feeding the 4000, but which left the details of the Crucifixion and the Resurrection vague?

A written source, on the other hand, is perfectly definite, but not necessarily authoritative. Where the Evangelists simply copy their common source they agree, whether the point of agreement be important or not, while at the same time the existence of the written document did not prevent the use of other documents or any oral information which might come to hand. There was nothing to compel any of our Evangelists to reproduce the whole of the documents upon which they worked, or to follow them exactly; if they had had such respect for their predecessors' work as never to alter it, they would not have dared to supersede these documents or traditions by their own new Gospels. They would have been mere scribes, or, at the most, harmonists like Tatian.

But we can go one step further. In the parts common to Mark, Matthew, and Luke, there is a good deal in which all three verbally agree; there is also much common to Mark and Matthew, and much common to Mark and Luke, but hardly anything common to Matthew and Luke which Mark does not share. There is very little of Mark which is not more or less adequately represented either in Matthew or in Luke. Moreover, the common order is Mark's order; Matthew and Luke never agree against Mark in the transposition of a narrative.¹ In other words, Mark contains the whole of a document which Matthew and Luke have independently used, and very little else.

This conclusion is extremely important; it is the one solid contribution made by the scholarship of the 19th cent. towards the solution of the Synoptic problem. The present writer believes that we may go on, and claim the Gospel according to Mark as itself the common source. According to this view, no written document underlies our Second Gospel, and the document which the First and Third Evangelists have independently used to form the framework of their narrative is St. Mark's Gospel itself.

Those who do not accept this conclusion fall back upon the hypothesis of an *Ur-Marcus*, an earlier recension or edition of our Second Gospel. This hypothesis presupposes an interest in the biographical details of the public life of Jesus Christ of which there is little trace elsewhere. In the extant remains of very early Christian literature we find the doctrines of the Crucifixion and the Resurrection; we find the arguments from prophecy; we find the ethical teaching of the Sermon on the Mount; and as early as the middle of the 2nd cent. we find copious references to the stories of the Nativity. But the details of the Galilean Ministry are hardly mentioned. It is the peculiar merit of St. Mark's Gospel, from the point of view of the historical investigator, that it deals mainly with a cycle of events quite foreign to the life and interests of the growing Christian communities.

Nearly all the 'peculiarities' of Mark, i.e. those incidents and expressions which were not adopted into the compilations of Matthew and Luke, are of such a nature as to be unattractive or even offensive to the second and third generation of Christians.² And, in dealing with the irreducible remainder, it must never be forgotten that all our MSS of Mark go back to a single copy which breaks off at 16⁸. The so-called 'last twelve verses' (16⁹⁻²⁰) are a later Appendix, designed to supply the lacking conclusion. In other words, our MS tradition goes back to a single book or roll imperfect at the end, and not improbably torn or defaced elsewhere.³ But this mutilated copy was not the autograph, still less was it identical with the copies used by the First and Third Evangelists; and in a few cases the points where they agree against our Mark may represent the true texts of the Second Gospel. Yet it cannot be too strongly stated that such points are few and unimportant, and that the text, as we have it, appears to be unaltered in essentials. It should be remarked, however, that we do not know how much is lost at the end; it may have been much more than a

¹ First clearly formulated by the great classical scholar Lachmann in 1835, as Wellhausen has reminded a forgetful world in his *Einleitung in die drei ersten Evangelien*, p. 33. Lachmann's words are: 'Narrationum evangelicarum ordinis non tanta est quanta plerique videtur diversitas; maxima sane si aut hoc scriptores eadem complexione omnes aut Lucan cum Matthaeo composueris, exigua si Marcum cum utraque seorsim.' C. G. Wilke had independently come to the same conclusion (Wellhausen, p. 34).

² See Hawkins, *Hours Synoptics*, p. 117 ff.

³ e.g. 'Boanerges' and 'Dalmanutha' (Mk 237 240) are surely primitive misreadings.

single leaf. Possibly a large part of Ac 1-12 (including the story of Rhoda, the servant at St. Mark's mother's house) may have been based upon the part now missing.

An estimate of the historical value of the Gospel according to St. Mark will be given below. All that has at present been alleged is that it is a main literary source for the other two Synoptic Gospels, and that it does not appear itself to be based on earlier written documents. It is important to notice that the establishment of the relative priority of Mark is based on the comparison of extant documents one with another, and is quite unaffected by the view we may take of the historicity of the Gospels or their ethical value.

2. Date and authorship of 'Luke' and 'Acts.'—The Third Gospel is not a book complete in itself. It is only the first portion of a larger historical work, which was apparently designed to be executed in three volumes. The third volume is not extant; in fact, there is very little reason to suppose that it was ever actually written; but the absence of an adequate peroration at the end of the Acts of the Apostles (which forms the second volume of the series) shows us that a further instalment must have been contemplated. The date of 'Luke' and 'Acts' can apparently be determined within narrow limits. On the one hand, both the Gospel and the Acts contain details drawn directly from the *Jewish Antiquities* of Josephus, a work published in A.D. 93 or 94; on the other hand, the literary evidence indicates that the author of the Gospel and of the Acts is none other than that companion of St. Paul whose travelling diaries are largely quoted in the latter portion of the work. The Gospel and the Acts may therefore be assigned to the decade 95-105; we shall not be far wrong if we say in round numbers about A.D. 100.

(a) The evidence which convicts the Third Evangelist of having used the *Antiquities* (not always with complete accuracy) is very well brought together by Schmiedel in *Encyc. Bibl.*, artt. 'Theudas' and 'Lysanias'; see also Burkitt, *Gosp. List.* pp. 106-110. The main points are (1) that the mention of Theudas in Gamaliel's speech (Ac 5^{34ff.}) is not only an anachronism, but further it is explicable if the author of Acts drew his information about Theudas from Josephus (*Ant.* xx. v. 1); (2) the introduction of Lysanias of Abilene in Lk 31 as contemporary with the 15th year of Tiberius (A.D. 29) appears to be due to a similarly inaccurate use of *Ant.* xx. vii. 1.

(b) The evidence which tends to show that the whole of Luke and Acts is the work of one author, including the travelling diaries in which the writer speaks in the first person plural (Ac 16¹⁰⁻¹⁷ 20⁶⁻¹⁸ 21¹⁻¹⁸ 27¹⁻²⁸), is very well marshalled in Sir J. Hawkins' *Horae Synopticae*² (see esp. p. 188; also Harnack's *Luke the Physician*, 1907, pp. 67-81). 'There is an immense balance of internal and linguistic evidence in favour of the view that the original writer of these sections (i.e. the We-sections) was the same person as the main author of the Acts and of the Third Gospel, and, consequently, that the date of those books lies within the lifetime of a companion of St. Paul' (Hawkins², p. 188).

The two conclusions here indicated are not incompatible. The traveller's diaries, of which the 'We-sections' in Acts consist, show that their author accompanied St. Paul from Troas to Philippi about A.D. 50; there is nothing to show that he was more than a young man of twenty. Thus he would have been born about A.D. 30. Consequently he would not be more than 70 years old when he published the two books dedicated to Theophilus which we possess. Is this really improbable? Does it not rather explain the very different degrees of accuracy which we find in the works of the accomplished writer, whom we shall still not hesitate to call St. Luke? Where he uses his own old diaries, made on the spot and at the time, he is full of information which surprises us now by its minute correctness. He gives the right title to the *Prætors* of Philippi and the *Politarchs* of Thessalonica. Yes; but he was actually there or in the immediate neighbourhood, and keeping a diary. When, on the other hand, he comes to describe the political situation in Palestine about

the time he himself was born, we find him falling into error—error none the less real for being excusable. We do not know under what conditions he had access to the works of Josephus; he may have had the opportunity for a rapid perusal only, with but little time to make notes or extracts for his future use. For the ordinary events of secular history a Christian writer at the end of the 1st cent. would be dependent on the ordinary channels of information. For the events connected with the rise of his own sect he might have special sources to draw upon. He may have conversed during the course of his life with those who had themselves seen the Lord. A comparison with Matthew makes it highly probable that St. Luke also used the document called Q (see below) in addition to the Gospel of Mark. At the same time, the fact that he uses Mark as his main source for the Gospel history seems to the present writer to make it unlikely that he had much personal intercourse with those who had been the companions of the Ministry, men who could themselves have supplied the skeleton of a narrative from their own reminiscences.

3. The composition of the Gospel according to Matthew.—The Gospel according to Matthew, unlike the Third Gospel, cannot be dated with precision, nor are we in a position to name the compiler. Something, however, can be gathered about the sources which he had at his disposal and the circle of ideas in which he moved. Like St. Luke, he was a competent writer; he treats the wording of his predecessors with entire freedom, rearranging and combining them into a well-fused whole. This makes the reconstruction of his lost hypothetical sources an extremely hazardous, if not impossible, task. There cannot be a greater error in Synoptic criticism than to treat the Evangelists as if they had worked like the harmonist Tatian, who made up a single narrative by piecing together the words of the several Gospels almost without alteration.

The happy circumstance that Mark, Matthew, and Luke have all survived, enables us to discover that Matthew and Luke are based on Mark; but, if Mark had not been actually extant, we very much doubt whether modern criticism would have been able to reconstruct it from the other Synoptics. This consideration should render us very cautious in making statements about the contents or arrangement of the other sources on which we may imagine Matthew (or Luke) to have been based. It is, indeed, practically certain that, besides Mark, another document was used in common by Matthew and Luke, of which the main contents were a collection of sayings of the Lord. This document is usually supposed to have been what Papias calls the *Logia* composed by St. Matthew; since Wellhausen (1905) it has been very generally called Q, i.e. *Quelle*.¹ But, before we attempt to reconstruct the lost materials out of which the Gospels according to Matthew and Luke may have been built, we ought to examine the demonstrable procedure of the First and Third Evangelists with regard to (a) the OT, and (b) St. Mark's Gospel.

(a) In the case of St. Luke the first part of the answer is simple. St. Luke uses the Septuagint, the ordinary Bible which the Church inherited from the Greek-speaking Jews. This is notably the case in Lk 1 and 2, where the LXX, and not some Hebrew or Aramaic document, has perceptibly coloured the style and language of the whole narrative.²

¹ About the same time Salmon and J. A. Robinson were also using the symbol Q. 'This notation binds us to nothing' (Salmon, *Human Element*, 1907, p. 24); possibly Salmon wished to regard it as short for *Query*.

² Compare the use of ἀσφαλείς in Lk 1³⁷ and Gn 18¹⁴. But this is only one instance out of many.

The quotations peculiar to the First Gospel have wholly different characteristics. They are mostly based on the Hebrew, some of them showing curious inaccuracies, arising from a misconception of the Hebrew text, yet a few are clearly taken direct from the LXX. The Hebrew basis is particularly clear in such passages as 'Out of Egypt have I called my son' (Mt 21⁶), a quotation of Hos 11¹ that differs both from the LXX, which has 'Out of Egypt I have called back his children,' and from the Targum, which has 'Out of Egypt I have called them sons.' The quotation in Mt 27⁹⁻¹⁰, alleged to be made from 'Jeremiah the prophet,' but really based on Zec 11¹³, owes its presence to a confusion between the Hebrew words for 'potter' and for 'treasury.' This confusion exists in the MT, but the LXX has another reading, and the Targum turns the 'potter' into a Temple official. Thus the Evangelist must have derived his curious interpretation from the Hebrew, and not from the Greek Bible or from current Jewish exegesis. At the same time, seeing that in this passage (27⁹⁻¹⁰) he assigns words taken from Zechariah to Jeremiah, and that in 13³⁸ he appears to assign Ps 78³ to Isaiah, it is improbable that he was quoting direct from a Hebrew copy of the Prophets. Equally clear is it that the words, 'In his name shall the nations hope' (Mt 12²¹), are taken from the LXX of Isaiah 42^{4b}, and that *καρπύριον αἶον* (Mt 21^{16b}) is taken from the LXX of Ps 8³. These last passages show that the Evangelist was after all not unfamiliar with the Greek Bible. This is not surprising; the surprising part is the influence of the Hebrew text in a Greek Gospel. This influence does not make the stories peculiar to this Gospel historical or even probable, but it does tend to show that they originated in Palestine.

(b) The way in which our First Evangelist has used the Gospel of Mark has been so carefully investigated that little more is needed here than a statement of results.

Mt. shortens the narrative of Mk., retaining the main features, but cutting down details and (like St. Luke) suppressing the mention of the various emotions of our Lord, e.g. anger, annoyance, amazement.

Mt. freely transposes the earlier parts of the story, which thereby becomes a series of disconnected anecdotes. The confusion is still further increased by the interpolation of long discourses into the framework of Mk.; however interesting and authentic these discourses are in themselves, they completely break up the unity of the narrative framework. But very little of the Markan narrative is altogether omitted.

Besides the long discourses, Mt. introduces into the Markan narrative certain stories not known to us from other sources, such as Peter walking on the water, Judas and the pieces of silver, the earthquake at the Crucifixion, the guard at the Tomb. There are grave difficulties in making out a claim for considering any of these stories as serious history. At the same time, it should be remarked that their tone and language suggest a Palestinian origin, e.g. the story of the earthquake speaks of Jerusalem as 'the Holy City' (Mt 27^{51b-53}).

In view of the Palestinian origin of the elements peculiar to Mt. it is worth while once more to emphasize the remarkable fact that the Passion narrative in the First Gospel, both in the selection of incidents and in their relative order, follows unquestioningly the corresponding narrative in Mark.

In striking contrast to all this is the procedure of St. Luke. He freely omits large portions of Mk., and in the Passion deserts Mk. for another

story of the last scenes. But the sections of Mk. which are found in Lk. are given in the same relative order; and, although (as in Mt.) much is curtailed, yet there is not the same tendency to interpolate fresh incidents into the Markan stories. There are fresh incidents in Lk., but they are kept separate.

Thus in general plan and arrangement the Gospel according to Matthew is a *fresh edition of Mark*, revised, rearranged, and enriched with new material; the Gospel according to Luke is a *new historical work*, made by combining parts of Mark with parts derived from other documents.

4. Attempted reconstructions of Q.—From the way in which Mt. and Lk. have treated Mk. we may reasonably infer the way in which they have severally treated the lost source Q. We shall expect to find many fragments of Q preserved by Mt. alone, but the general plan and sequence of the work we must gather from the position that the various sections occupy in Luke. If we find certain of these sections occupying the same relative order in Mt., there is a strong presumption that this order is really the order of Q.

(a) In Lk 6²⁰⁻²⁸, a non-Markan block, we find (1) Sayings of Jesus beginning with Beatitudes and ending with the House upon the Rock, (2) the Centurion's Lad, (3) the Widow of Nain, (4) Sayings about John the Baptist, (5) the Sinful Woman, (6) the women who ministered to Jesus. Of these (1), (2), and (4) occur in Mt., and in the same relative order (Mt 5¹⁻⁷ 7²⁷ 8⁵⁻¹³ 11²⁻¹⁹). We may, therefore, assume that (1), (2), and (4) formed part of Q, and in that order. Starting from this (it is the one thing about Q with regard to which there is reasonable certainty), we may infer from (2) that Q contained not only Sayings of Jesus but also narratives of wonderful cures, etc., such as are found in Mk., and we may infer from (4) that Lk 3⁷⁻¹⁸ (= Mt 4⁷⁻¹²) also had a place in Q, and very probably an account of the Baptism of Jesus also. This makes it likely that the Temptation narrative (Lk 4¹⁻¹² = Mt 4¹⁻¹¹) also comes from Q, and that it was followed by a mention of 'Nazara' (Lk 4¹⁸ = Mt 4¹³).

(b) But when we have said this we have said almost all that has high probability about Q as a literary whole. Simply to refer to Q every Saying of Jesus found in Mt. or Lk., or both, which we may consider genuine is not to reconstruct the lost work, but to repeat our opinion that the Saying is genuine. Above all, we cannot base any valid argument upon the supposed absence from Q of certain ideas or types of Sayings. At best, as conjecturally reconstructed out of Mt. and Lk., it resembles a composite photograph; and, like most composite photographs, it appears to us beautiful but unindividualized; if Q were really before us, it would probably show individual features, as individual as the Gospel of Mark—features which might surprise and even shock us. What do we know of Q? Simply this, that it was taken to pieces by Matthew and Luke, and the *disiecta membra* have been put together by modern scholars. It is not surprising that some of the individual features have suffered.¹

(c) Did Q contain a Passion narrative? We cannot tell. This is surely a more scientific answer than the confident assertion of Harnack and others, that it did not contain a Passion narrative. The theory of Harnack rests on the absence from Mt., in the story of the Passion, of any fresh material that has a place in Luke. But if we regard Mt. as our enlarged edition of Mk. rather than a new historical work, this is not so surprising. Many and important as are the additions which

¹ As Lk. usually resumes his use of Mk. at the place where he has dropped it, he probably did the same with Q: we venture to suggest that Lk 9¹⁸ may have followed Lk 8:4 directly.

Mt. makes to Mk., very few of them interrupt the actual course of the narrative. The 'Sermon on the Mount' occupies three whole chapters, but in time and place it merely corresponds to Mk 3¹³. Mt 10 corresponds to Mk 6⁷⁻¹¹. Mk 4²³ tells us that 'with such parables' Jesus spoke to them the word; Mt 13 exhibits half a dozen specimens. All through the Gospel the added Sayings and anecdotes are placed in the Markan framework: they have been torn from their original context and fitted into Matthew's revised edition of Mark, to serve as illustrations and enrichments. If Q did contain a Passion story, we need not be surprised to find that the fragments of it used by Mt. are to be found elsewhere than in Mt.'s Passion story, because Matthew is not so much combining Q with Mk. as enriching and illustrating Mk. with Q and other sources. The alternative view, that Q had a story of the Passion and that some of it is preserved in the peculiar sections of Lk 22-24 (notably in Lk 22^{15f.} 24-32, 36-38), still remains open.

(d) A number of important Sayings and Parables are found only in Lk. or only in Mt., e.g. the Prodigal Son (Lk 15¹¹⁻³²) and the Labourers in the Vineyard (Mt 20¹⁻¹⁶). It is certainly difficult to see why the other Evangelist should not have incorporated them, on the supposition that they lay before him in a document which he otherwise valued. It seems better not to assign such pieces to Q and to suppose that the Evangelists derived them from some other source, written or oral, the contents and nature of which we are not in a position further to determine.

One very common misconception may be here conveniently noticed. Some writers speak of 'the Triple Synopsis' and 'the Double Synopsis,' meaning by the former phrase the incidents or sayings found in all three Synoptic Gospels, and by the latter those found in Matthew and Luke. The phrases are somewhat misleading, as they inevitably suggest that the portions comprised under the Triple or the Double Synopsis are better attested than those which are found in one document only. But to those who hold that Mt. and Lk. actually used our Mk. and another document besides, it is evident that the *consensus* of all three Synoptics resolves itself into the single witness of Mark; and the *consensus* of Mt. and Lk. is in many cases only to be regarded as the single witness of the lost document discussed in the preceding paragraphs.

Thus the story of the 'Gadarene' swine rests really on no more evidence than the story of the blind man at Bethsaida, i.e. upon the witness of the Second Gospel. And similarly the parable of the Seed growing secretly, related only by St. Mark, is really no worse attested than the parable of the Vineyard, which is given in all three Gospels. The only real double attestation is to be found in those few passages, mostly short striking Sayings, which appear to have found a place in the lost document as well as in Mk. Mark, e.g. Mk 34 22-23, 29 41-42, 44 11 812-15 1011 1194 1230f. 33f. 1316f. 21 33 35. To these we should probably add the parable of the Sower. But even here the double attestation is merely accidental, and some of the Sayings in the above list may very well have been spoken by Jesus on several occasions.

5. The historical worth of St. Mark's Gospel.

—St. Mark's Gospel being our main source of information for the general course of the Ministry, it is important to determine its value as a historical document. It is obvious that what we have to rely on is internal evidence. If the picture presented in this Gospel be in essentials true, it will give an essentially reasonable account of the Ministry. But in this connexion 'reasonable' does not necessarily mean what is likely to happen at the present day. We must first become acquainted with the hopes and beliefs of the contemporaries of Jesus and His Apostles, before we are in a position to judge whether their reported sayings and doings fit into the history of the time.

It is only lately that the need of giving some demonstration of the general historical character of the picture of Jesus sketched in the Synoptic Gospels has begun to be recognized. Even now many professed theologians do not seem to realize how narrow is the channel by which the Gospel history has filtered down to us, or what the general rules are by which we may to a certain extent

discriminate between what belongs to the historical figure and what must rather be referred to the legendary clothing of it. A methodical discrimination is especially needed by the modern critical student of the Gospels. Such a man no longer receives them as history on the authority of the Church. Neither does he accept the narratives as they stand, for they are full of marvels which he thinks incredible. The Fourth Gospel, for various reasons, to be considered later, is put out of court as a narrative of fact. And literary criticism has shown that Matthew, Mark, and Luke, instead of attesting a general consensus of tradition, only go back, for the general framework of the narrative, to the single witness of Mark. What is there, we must ask, in the Gospel of Mark that compels us to regard the story there told as in any way historical?

P. W. Schmiedel, in his art. 'Gospels' in *EBI* (§§ 131, 139), answered this question by pointing out certain Sayings of Jesus which are at least superficially inconsistent with the beliefs about Him held by the Christians for whom the Gospels were written and by whom they were canonized. Schmiedel's method here is perfectly sound; the only question is whether some of his 'foundation-pillars' (as he calls them) are not rather insecure and whether others cannot be found more satisfactory to the historian.¹ We venture to suggest that sentences like Mk 9³⁰, mentioning the secret passage through Galilee (to be explained as a precaution against premature arrest by Antipas), and 11¹¹, which prosaically disconnects the Entry into Jerusalem from the Cleansing of the Temple, show even more clearly than any of Schmiedel's passages that in the Gospel of Mark we are dealing not only with a historical Personage but also with real reminiscences of His career.

More than this, however, is required. We want something more than a collection of fragments, even if they be genuine; we want to discover how far the Figure sketched in Mark may be taken for a historical portrait. Schmiedel's method shows us that Jesus was (as the Church also affirms) in some respects a man like ourselves. It is obvious, from the general course of history and the little space given by Josephus, that the public career of Jesus was not such as made a great impression upon unsympathetic contemporaries. If, then, the Gospel of Mark as a whole gives a historical view of this career, it will explain both the devotion of the few and the indifference of the many. If also this portrait of Jesus derives all its chief characteristics from the ideas and presuppositions of contemporary Palestinian Jewish life and thought, while the work itself belongs to the Greek-speaking Christianity of Europe, then we can hardly avoid regarding the portrait itself as in the main historical.

The great political event in Palestine during the first century of our era is that the Jewish nation dared to rise against the Roman dominion, and so was utterly crushed in A.D. 70. The Judaism which survived, and survives to this day, was able to do so only by organizing itself as a religious sect without direct political aims. To a philosophic or rationalistic observer the Jewish rebellion must have been from the first a hopeless enterprise. It is, therefore, certain that the ideas which swayed contemporary Palestinian Jewish life and thought were neither 'rational' nor 'philosophic,' as reason and philosophy were generally understood at the

¹ Schmiedel's 'pillars' are Mk 10^{17f.}, Mt 12^{31f.}, Mk 8²¹ 13³⁵ 15³⁴; Mk 8¹², Mk 9³¹ 814-21, Mt 11⁶. Of these the second and fourth introduce technical terms of Jewish and Christian theology, and the last three are not convincing to those who on other grounds regard the Gospel history as mythical. The passages, indeed, seem to have been selected on theological rather than on strictly historical grounds: they would form, in fact, an admirable *catena* wherewith to confute the heresy of Apollinarius.

time. The Jews would never have gone to war, if they had not believed that the Kingdom of God would somehow be established for them; if the Gospel be historical, it should be dominated by the belief in the approaching Kingdom of God.

The special characteristic of the portrait of Jesus in Mark is His *secret* Messiahship. He comes before the world of Galileans and Jews in general as a herald of the approaching Kingdom of God, but He Himself is conscious that He will be the Christ or Messiah, i.e. God's anointed Vicegerent, when the Kingdom comes. This is avowed publicly for the first time when He is being tried before the high priest; the avowal at once seals His fate, and the title in a secularized form is placarded up above His cross. Previously to this, no one beyond the inner circle of disciples had taken Jesus to be, or as claiming to be, the Messiah. The Evangelist believed that the secret was known to the demons, but it was not known to men. If the Gospel of Mark is to be regarded as historical, then the idea of the secret Messiahship ought to be historical also.

To discuss this properly would need a separate article, and only the heads of the argument can be indicated here.¹ (1) The office of Messiah is essentially different from that of prophet or seer. Properly speaking, it cannot be 'claimed'; the Messiah, if he be Messiah, will be in some way evident King of Israel and Judge of the nations. Until Bar Cochba in A.D. 135, who lived in the full tide of Christianity, no Jew is known to have regarded himself as Messiah; when the crowds found out that Jesus, the Prophet of Galilee, had thought Himself to be Messiah, they lost interest and asked for Barabbas. (2) On the other hand, it is difficult to explain how the followers of Jesus ever came to think of Him as the Messiah, if He had not in some way so regarded Himself. The fact that Peter and others believed they had seen their Master alive again after the Crucifixion was no reason why they should draw the conclusion, for the first time, that He must have been the Messiah. It might very well have made them draw the conclusion that their Master was the Messiah *after all*, but that is a very different thing. It means that they, or some of them, had already regarded Him as Messiah, or, more accurately, as the destined Messiah. (3) But this exactly corresponds with Mk.'s presentation of Jesus as one who was to the people the Herald of the Kingdom of God, but to the inner circle of disciples the Christ—a secret they were expressly ordered not to divulge (8³⁰). This notion, though it is the only way in which the historian can really conceive the genesis of the doctrine of Jesus' Messiahship, was foreign to the thought of Gentile Christians, for whom the Lord Jesus was 'Christ' from the moment they first heard of Him. That it forms the leading feature of Mark's portrait is, therefore, a strong claim upon us to regard the portrait as historical, i.e. as derived from real reminiscence, and not from mythic fancy.

But this is all that can be claimed for the Gospel of Mark—that it gives us an impression of Jesus derived from one who had been with Him. As regards external events, the kind of information given varies in different parts. The scene in Gethsemane reads like the account of an eye-witness—possibly in this case the Evangelist himself (14^{31, 32}); hardly any one would say the same of the story of the Gerasene Demoniac (5¹⁻²⁰). Further, the first part (1^{1-8³⁰}) is little more than a string of anecdotes, loosely connected together, not always perhaps in relative chronological order. From 8³⁰–10⁵² the narrative is continuous, the only real break being at 10³³. From 11¹ onwards the narra-

tive is divided into days, and we see very little reason to doubt the substantial accuracy of the reckoning, except that for some reason—possibly liturgical²—the Last Supper is regarded as the Paschal Meal, against internal probability and all other strains of Christian tradition.

A feature of the Ministry which must rest on real reminiscence is the long period spent out of Galilee (6⁴⁸ 7^{24a} 8^{11, 22})—a period spent neither in controversy with Jews nor in evangelizing Gentiles, but in waiting in safe retirement till it was time to go up to Jerusalem for the Passover.³

A picture of Jesus as first having been the Herald of the Kingdom, and then choosing the time to go to Jerusalem in the full expectation of being killed there, and so being somehow an acceptable ransom to God (who will then be reconciled with His Elect and bring in His Kingdom), is more 'orthodox' than a view which regards Jesus as primarily an ethical teacher; but it is also more in accordance with what we know from elsewhere of Jewish contemporary ideas, and it explains better the enthusiasm and the devotion with which the inner circle of Jesus' disciples continued to regard Him. This is the view set forth in the Gospel of Mark; we may reasonably regard it as the historical view, and the Gospel as a document of historical value.

The Gospels of Matthew and Luke, taken by themselves, may also fairly be regarded as documents of historical value. If we derived our knowledge of the Gospel history from either of them alone, we should still possess in essentials a historical view of our Lord. But we find on investigation that this is the case, so far as the general outlines are concerned, only in proportion as Matthew or Luke has preserved the framework given by Mark. To this framework Mt. and Lk. have added many details, many of them no doubt genuine, drawn from Q and the other sources; but all these sources (including Q) are for us mere collections of fragments. Indeed, so far as any construction can still be traced in them, they seem inferior, and not superior, as historical documents, to Mark. Of course, if we really possessed Q, it might prove to be equal or superior to Mark; but we know Q only by the bits which Mt. and Lk. have selected for incorporation—often, it may be (especially in Mt.), out of their context and out of the order in which they were arranged in Q itself.⁴

6. The Fourth Gospel.—It will not be necessary here to investigate in detail the external evidence for the Fourth Gospel. The belief that it was written by the Apostle St. John was fully established as early as the decade A.D. 170–180, and clear indications of its use, especially among some of the Christian 'Gnostics,' can be traced back to a period some fifty years earlier. It is true that these indications are weak just where we might have expected them to be most precise.

¹ See B. W. Bacon, *Beginnings of Gospel Story*, p. 195.

² 'Ce que Marc raconte à ce sujet n'a guère pu être inventé' (Lohy, *Jésus et la tradition évangélique*, p. 45).

³ For instance, Albert Schweitzer lays great stress on Mt 10²³ ('Ye shall not have gone over the cities of Israel, till the Son of Man be come'). It is quite legitimate to argue that this remarkable saying must be genuine, and therefore, as it occurs in a Q-context, that it must have stood in Q. It is further arguable that it shows that Jesus at one time expected the public manifestation of the Messiah (possibly, therefore, not Himself) to take place during the first itinerant journeys of the 'apostles,' i.e. during the period indicated by Mk 6⁷. At the same time, when we remember that Q is for us a series of fragments, and that even in Mt 10 there is a section (vv. 17–22) taken from Mk 13, i.e. from sayings of the very latest period, it must remain equally, if not more, probable that Mt 10²³ belongs to the latest period, and that it refers to Jesus' own expected manifestation in glory after His Passion. What seems not quite legitimate is to assume that Mt 10 was spoken in historical sequence just before Mt 11 and before Mk 6⁷ (Schweitzer, *Quest.*, 253–262)—because they occupy just this relative position in Matthew. Schweitzer (p. 260) actually quotes Mt 10²³ without warning his readers that this verse is Mk 13³¹, torn out of its context.

⁴ See the present writer's *Earliest Sources*, pp. 56–76, and art. in *AJTA* xv. (1911) 180–193, esp. 183.

Polycarp, according to tradition a disciple of St. John at Ephesus, does not quote at all from the Fourth Gospel, either in his Epistle or in the prayer which he is said to have offered at the stake; and the utmost that can be claimed is that certain phrases in a single passage in his Epistle are parallel to some leading phrases in 1 John.¹ This passage in Polycarp is certainly important as showing that Johannine watchwords, like 'antichrist' and 'confessing Jesus Christ to have come in the flesh,' were actually used by orthodox circles in Asia Minor. But it is remarkable that Polycarp should exhibit no further trace of the influence of the Johannine theology.

The external testimony to the traditional authorship of the Fourth Gospel is, in a word, indecisive. It is not absolutely unfavourable to the genuineness of the tradition, but it is quite insufficient to prove it. We may therefore go on to examine the internal evidence. And here the first question which must be asked is whether this Gospel is really a historical work. We have seen that St. Mark's Gospel has a very good claim to be so regarded: how does the Fourth Gospel compare with St. Mark?

The comparison of the Synoptic narrative with that of 'John' is an old and very simple study. The details are all familiar, and the problems do not depend upon the niceties of Hellenistic Greek or the various readings of MSS. It is a matter of historical discrepancy in two perfectly clear and definite accounts. The fact is that the narrative in 'Mark' and the narrative in 'John' cannot be made to agree, except on the supposition that one or the other is, as regards the objective facts, inaccurate and misleading.

To name the most striking single instance, it is impossible to insert the story of the raising of Lazarus into the historical framework preserved by St. Mark. It is not a question of the improbability or impossibility of the miracle, but of the time and place and the effect upon outsiders. And, if the narrative of the Passion in Mk. and of the events immediately leading up to it (Mk 9³⁰-12) be historical in its general outlines, as maintained in the previous section, then it is surely impossible to regard the story of the raising of Lazarus as in any way a narrative of facts.

The Crucifixion and Resurrection narratives in the Fourth Gospel do not differ essentially from the story as told in Mk. or Luke. There are many variations and discrepancies, but all four Gospels agree in the main facts, as may be realized by comparing them with the apocryphal *Acts of John*. But in other parts of the Gospel story the differences are acute. The Evangelist makes John the Baptist testify to the descent of the Spirit upon Jesus, but the central incident, the actual baptism of Jesus by John, he leaves out altogether (1²⁹⁻³⁴). He tells the story of the Last Supper without alluding to the words 'This is my body.' And yet it is not for want of sympathy with high Sacramental doctrine. In Jn 6, after the story of the Feeding of the Five Thousand, we read a long discourse of Jesus on this very subject. Jesus here says, 'I am the bread of life' (v. 48), and, 'Except ye eat the flesh of the Son of man and drink his blood, ye have no life in you' (v. 53). It is true that a peculiar turn is given to these very strong expressions by the explanation made afterwards to the disciples that it is the spirit that gives life, and that (v. 61) is the words of Jesus that are spirit and life (v. 62). But the Sacramental expressions are

not otherwise qualified. And, as regards Baptism the Evangelist tells us that the disciples of Jesus baptized their converts (4¹⁻²), and gives us the conversation with Nicodemus in which Jesus declares that except a man be born again he cannot see the Kingdom of God (3^{3a}). If we are to regard the Fourth Gospel as a narrative of events, we can only say that the Evangelist has given a false impression of what actually occurred.

It would be easy to go on to criticize the history and geography of the Fourth Gospel. As Matthew Arnold said, "'Bethany beyond Jordan'" (1²⁸) is like "Willesden beyond Trent." But the most serious count against the work from the point of view of objective history is the attitude assigned to Jesus in His discussions with the 'Jews.' Taking the narratives as they stand, the sympathy of the non-Christian reader of the Synoptic Gospels naturally goes with Jesus against the Pharisees or the Sadducees. We feel that the adversaries of Jesus are narrow, unkind, unintelligent. To such an extent is this the case that protests have been raised by more than one distinguished and learned Jew, to the effect that the Synoptic Evangelists misrepresent the teachings of the Rabbinic religion. But in the Fourth Gospel it is quite different. Here the present writer cannot but think that the sympathy of the non-Christian reader must go with the Jews. To heal on the Sabbath was considered to be a breaking of the Sabbath. According to Mark (2²⁷), Jesus defends His action by saying that the Sabbath was made for man, not man for the Sabbath; but, according to John, He further exasperates the Jews by a disquisition about the Father and the Son, asserting to His adversaries that whosoever did not honour the Son (i.e. Himself) did not honour the Father (5²³). On a similar occasion, when accused of 'bearing witness of himself,' He is made to say that He has two witnesses in His favour, viz. Himself and the Father (8¹⁷⁻¹⁸). Can we wonder that the Jews replied, 'Where is thy Father?' It is quite inconceivable that the historical Jesus of the Synoptic Gospels could have argued and quibbled with opponents, as He is represented to have done in the Fourth Gospel. The only possible explanation is that the work is not history, but something else cast in a historical form.¹

From this point of view the question of the authorship of the Fourth Gospel is a matter of secondary importance. It is of the highest importance to ascertain the authorship and date of a chronicle, of a narrative of facts, because there the value of the work depends upon the nature of the traditions or sources to which the writer had access. But for a work of philosophy or philosophical history the qualifications required in the writer are mental, rather than local or temporal. We do not need to ask how near he stands to the events, but whether he sees them in their true proportions.²

For we have not done with the Fourth Gospel when we have made up our minds that neither the narrative nor the discourses are to be regarded as objective history, as matters of past fact. The question remains why the Church adopted this Gospel into the NT Canon, when so many rivals were excluded. In the answer to this question lies, we believe, the reason which gives a permanent value to the work. It was not the prestige of an Apostolic name that made it canonical, for the 'Gospel of Peter' was rejected. Great antiquity and respectful quotation by learned Church writers did not avail to include the 'Gospel so-

¹ Polycarp, *ad Phil.* vii.: 'For whosoever doth not confess Jesus Christ to have come in the flesh is antichrist, and whosoever doth not confess the witness of the cross is of the devil, and whosoever perverteth the oracles of the Lord to his own desires and says there is neither resurrection nor judgment, he is the firstborn of Satan'; cf. 1 Jn 4^{2,3}.

² See the admirable remarks of Loisy (*Jésus et la tradition évangélique*, p. 172) upon the difference between Lk 10² and Jn 4²⁶⁻²⁷.

³ See W. R. Inge's Essay on 'The Theology of the Fourth Gospel,' in *Cambridge Biblical Essays*, esp. p. 254.

cording to the Hebrews,' nor did philosophical thought avail the document commonly called the 'Oxyrhynchus Logia.' What was it that the 'Gospel according to St. John' had that these had not?

We believe the answer to be that the doctrine of the Person of Christ set forth in this Gospel expressed the general conviction of the Church adequately, while the Gospels which failed to become canonical failed mainly because the doctrine of the Person of Christ which they contained failed to satisfy the requirements of the Church. The Christ of the Fourth Gospel is not the Christ of history, but the Christ of Christian experience. Like St. Paul, the Fourth Evangelist did not care to know 'Christ after the flesh' (2 Co 5¹⁴), because he saw both his Lord and his Lord's adversaries *sub specie æternitatis*.

It is because the Evangelist views the Gospel history from this subjective standpoint that he allows himself such freedom in remodelling the external events. 'The old disciple needs no documents. . . . The whole is present in his memory, shaped by years of reflection, illuminated by the experience of a lifetime. He knows the Christ far better now than he knew Him in Galilee or Jerusalem half a century before.'¹ The adversaries of Jesus have become his own doubts and unfaithful positions; the questioners of Jesus, such as 'Nicodemus' or 'the Woman of Samaria,' are his own questions, his own ignorances, which receive their solution at the hands of the Lord who has come with His Father to make an abode with him. He knows his Lord to be true, and the knowledge of Him to be Life eternal; and therefore all opposition, however specious, is unjustifiable and blind. The Son of God is a Lamp to him who beholds, a Mirror to him who perceives, a Door to him who knocks, a Way to the wayfarer. The true meaning of life could never have been revealed to man, if Jesus had not been sent as the Word from the Father. Who He was could only be seen after He had gone away; what He had been seen to be was nothing in comparison with the underlying reality. It was no mere man that the Evangelist was preaching, but God unchangeable, God invincible, God higher than all authority and all power, and elder and mightier than all angels and creatures that are spoken of, and than all ages. If those who heard would abide in this, and in this be builded up, they would possess their soul indestructible.² It is all a different order of thought from the Synoptic Gospels or objective history.

The substance of the last few sentences has been picked out of the work which above all other surviving fragments of early Christian literature has the closest similarity to the peculiar elements of the Fourth Gospel. This work is the apocryphal *Acts of John*, or rather, we should say, the doctrinal section of that unequal piece of writing. But near as the 'Gospel of John' and the 'Acts of John' are in many ways, their differences are also fundamental, and it is in great part because of these differences that the 'Acts of John' was condemned and forgotten, while the 'Gospel of John'

survived to be the spiritual food of many generations.

For, although the Fourth Evangelist is no chronicler of events, although his Christ is the *Logos*, the Word of God, whom to know is eternal life, yet he firmly holds all the while that this Christ was manifested in time as a human being, a real man of flesh and blood, who really felt as we feel, and, above all, really suffered and really died, before He rose again from the dead. As we have seen, the Evangelist is careless of events; but to him the Death of Jesus on the Cross was not a mere event, but a something essential, a thing which really came to pass in the eternal order of things. The apocryphal 'Acts of John' sets forth the doctrine that the Crucifixion was a delusion—the Jews gather round the Cross and mock, but Christ is not really there; similarly also, the 'Gospel of Peter' tells us that Christ felt no pain, and apparently His Spirit is somehow caught up at the last. By a true instinct this specious teaching was rejected by the Church of the 2nd century. The Passion of Jesus Christ must be real, not a stage-play; and, if it was to be real, Jesus Christ must have been a real man.

In no early Christian document is the real humanity of Jesus so emphasized as in the Fourth Gospel. That Jesus was a real man is an obvious inference from the Synoptic narrative, but in the Fourth Gospel it is a dogma. It is the Fourth Gospel that tells us that Jesus was tired, and asked for water to drink (Jn 4^{6,7}); and that He wept at the tomb of Lazarus (11³⁵). If we ask what proof there is that Jesus really suffered, the answer is ready, that the Fourth Gospel declares Him to have said, 'I thirst' (19²⁸). Furthermore, we are told, with the most solemn protestations of accuracy to be found in the whole work, that the corpse of Jesus presented a truly human appearance (19^{34,35}).³ It was no phantom.

This is the element which differentiates the Jesus of the Fourth Gospel from the Jesus of Gnostic speculation. It was the Fourth Gospel which pointed out the *via media* along which alone the Church could walk. On the one hand, the Church was not prepared to surrender historical reality to a philosophical speculation. The devotion of the first disciples had been kindled by Jesus of Nazareth. It was the belief that their dead Friend had become alive again, and that He had really appeared to them alive after death, which gave the earliest Christians the will and the power to combine on earth into a society, and afforded them enduring hope for the future. It was essential that the Living Christ whom they continued to serve and to wait for should have been a real man who had lived and died. Otherwise He was no firstfruits of the human race, but another species altogether. On the other hand, Christianity is essentially monotheistic, and it was so all the more consciously and passionately while the whole world outside was given over to the heathen cults and the deified Emperor. Whatever else Jesus Christ might be, the Church refused to make Him a demi-god. Here the various forms of speculation which we generally denominate 'Gnostic' were ready with terms and conceptions that should bridge the gulf. More than one school of thought, both Jewish and Greek, were teaching that the Word which proclaimed the truth to man was in the beginning with God and was Itself Divine, that it would come or had come to those

¹ J. A. Robinson, *The Study of the Gospels*, 1902, p. 148. It may be added that this way of envisaging the Evangelist is the best explanation of the inconsistencies and chasms that have been detected in the Fourth Gospel, notably by Wellhausen. [E.g. Jn 18 was intended originally to follow immediately after 14³¹, so 15-17 is a later addition.] No doubt the Gospel took many years to write, and the Evangelist may have inserted many additions and modifications from time to time. Every author knows how hard it is in such cases to avoid minor contradictions, and to cover up the sutures between new and old. Loisy (*Jésus et la trad. évangélique*, p. 25) pronounces much the same judgment on Wellhausen's always acute criticisms.

² See *Acta Iovannis*, ed. Bonnet, 1881, 172. 207. 202³² (or James, *Apocrypha Anecdota II.*, 1218-21 1467. 102. 346⁷, from whom the English translation here given has been adapted).

³ According to 1 Jn 5⁶⁻⁸, the living personality has in it three elements, viz. spirit, water, blood. From the 'water' we are begotten, by the 'blood' we are sustained, and the 'spirit' or breath is the immaterial element that enters at birth and leaves at death. The spirit quitted Jesus when He died (Jn 19³⁰), leaving behind the water and blood of a human body, the existence of which was demonstrated to the onlookers by the spear-thrust of the soldier.

fitted to receive it. But the Fourth Evangelist alone makes this Word become an actual human being, one who really lived on earth and died under torture as other men would have died in similar circumstances. Whether this conception is really credible to us or not, it is a matter of history that it forms the central idea of the Fourth Evangelist's theology. We believe that it was by virtue of this central idea that the Fourth Gospel won its way to a position of permanent authority in the Christian Church.

Moreover, the doctrine of the Sacraments set forth in this Gospel is the doctrine of the Church. This has been so well expressed by Schweitzer in his *Gesch. der Paulin. Forschung* (1911, p. 159) that we need only quote his words:

'The naive and unhistorical view that Jesus had instituted the Sacraments is not part of the Gnosis of the Johannine theology. According to this theology, He did not institute them, but He created them and prophesied them. . . . Through His Incarnation came the possibility of the combination of human nature and spirit (*πνεῦμα*), the combination upon which the working of the Sacraments rests. By His actions with food and drink at the Feeding of the Five Thousand and by the words He used in connexion with those actions He indicated a Mystery which was to be manifested when the appropriate materials were ready: through Death, Resurrection, and Apoltheosis He exalted His earthly nature, and set the Spirit free for the new method of operation, by virtue of which it was able to prepare men for resurrection. So Jesus came into the world to inaugurate the era of Effectual Sacraments. In virtue of this He is the Saviour. . . . The Johannine theology thus rests on the two dogmas: (1) that the Spirit can only act on men in conjunction with matter; and (2) that, this being the case, it is only available on the ground of the Incarnation, and even then not until the glorification of the Lord had taken place. Whoever has once recognized these presuppositions will never attempt to search the Fourth Gospel for primitive elements which are to be explained from natural religions. But, on the other hand, it is clear that from this point of view Christianity exhibits itself as the most perfect Greek Mystery-religion that it is possible to conceive.'

7. The Gospel Canon.—The actual process by which our Four Gospels arrived at their present rank of pre-eminence is quite obscure. From about A.D. 170 onwards the Gospel Canon enjoys practically unchallenged supremacy, as we see from Tatian, from the Muratorian Canon, and from Irenæus. Somewhat earlier than Tatian must be placed an interpolated edition of the Four Gospels, which seems to have been set forth in Rome, and from which the greater 'Western Interpolations' in Greek and Latin Biblical MSS are ultimately derived. This brings us back to about A.D. 150; but the literary history of our Gospels during the first half of the 2nd cent. is unknown. Justin Martyr doubtless used all the Four in Rome about the middle of the century, and Marcion certainly used Luke about 130-140. Earlier still are the allusions which indicate a use of Matthew by Ignatius. But there is nothing to show that Marcion was acquainted with any other of the Canonical Gospels than Luke, and very little to show that Ignatius used any other Canonical Gospel than Matthew; while the verbal inaccuracy of Justin's quotations suggests that even in his day the 'Memoirs of the Apostles' had hardly yet taken their place beside the Law and the Prophets as part of the written Word of God. At the same time Trypho, Justin's Jewish opponent, is quite aware that the way to become acquainted with Christian doctrine is to read what is written *τῷ λεγόμενῳ εὐαγγελίῳ* (Tryph. § 10). Thus 'The Gospel' has already become the name of a book.

It is fairly certain that the formation of the Gospel Canon was a process rather of exclusion than of inclusion. Of the works of 'many who took in hand' to write of Jesus Christ (Lk 1¹), the Four Gospels alone remained in favour. The rest either failed altogether to attract, or were discovered to teach heresy. Whether the Church made the ideally best choice, from the point of view of the modern historical investigator, is a matter

that cannot be scientifically demonstrated, for the simple reason that the rivals of the canonical Four have not survived in full. But the abiding interest which each and all of the Four have excited during eighteen centuries is enough to show that the Church chose well. And it should not be forgotten that those of the non-canonical Gospels which we know enough of to pass judgment upon show a sensible inferiority. Marcion's Gospel is in every way inferior to Luke, and the Gospel of Peter is inferior to any of the Synoptic accounts of the Passion. It is, in fact, because the Canonical Gospels paint such an eternally fascinating Portrait that we welcome every scrap that may claim to give another view, however inadequate.

In one respect, we venture to think, the modern historical investigator is more fortunate than from general considerations he might have expected. It is fortunate indeed that the Gospel according to Mark should have been included in the official Canon. Many of the special ideas and tendencies of the First and Third Evangelists are in close touch with the ideas and tendencies of 2nd cent. literature. The theology of the Fourth Gospel met the wants of the Church; it pointed out the way along which the conflicting currents of Christian thought and feeling might run together. In any case, the Fourth Gospel is unique. But it is difficult to understand what attraction was offered to Christians of the 2nd cent. by the Gospel of Mark which the Gospels according to Matthew and Luke did not offer, either singly or taken together, in a more eminent degree. Probably its traditional connexion with St. Peter may have had a determining share in recommending it, and the appeal of Irenæus to historical tradition against Gnostic theorizing may help us to understand how such an old-fashioned book as the Gospel of Mark, St. Peter's 'interpreter,' should have survived. It is, we find, very little quoted before it became part of the official fourfold Canon, that is, before the time of Irenæus, and it is certain that it ran a very serious risk of being forgotten altogether. As every one knows, the genuine text ends at Mk 16^a, in the middle of a sentence describing the terrified departure of the women from the empty tomb. There is no reason to doubt that the Gospel went on to describe some of the appearances of Jesus to the disciples after the Resurrection. The narrative is incomplete as it stands, and it is much more likely that the mutilation was accidental than that it was intentional. In the latter case, the break would never have been made where it is, at *ἐφοβοῦντο γὰρ* . . . ; even the sentence seems incomplete. But all our MSS ultimately go back to this mutilated text; it is therefore evident that at one time no more than a single mutilated copy was in existence, or at least available. The work had dropped out of circulation, it had lost its public, and we can only guess at the reasons which led to its resuscitation.

The fact, however, remains. By its inclusion in the Canon we are to-day in possession of a document in warp and woof far more primitive than the Churches which adopted it. The fine instinct which reserved a place for the Gospel of Mark among the books of the NT shows the Catholic Church to have been wiser than her own writers, wiser than the heretics, wiser, finally, than most Biblical critics from St. Augustine to Ferdinand Christian Baur. It is only in the last half-century that scholars have come to recognize the pre-eminent historical value of that Gospel which once survived only in a single tattered copy.

8. Chronological summary.—From what has been said above, it will be evident that no very definite date can be assigned to any of the Gospels, except St. Luke's. The Destruction of Jerusalem

by Titus in A.D. 70 is an event that might have been expected to influence the language used in documents later than that date. Lk 21³⁰ does appear to allude to the siege. Mk 13¹⁴, of which Lk 21³⁰ is an adaptation, does not fit the historical details of the siege, nor indeed does anything in Mk. imply acquaintance with the Jewish War. We may therefore put Mk. before A.D. 70.

Mt. is difficult to date because of its dependence on Mark. Mt 27⁸ merely indicates the existence of a Christian community at Jerusalem, but Mt 17²⁴ might be held to imply the continued collection of the Temple-tax. Yet a Palestinian Gospel earlier than 70 would hardly have been based upon the Greek Gospel of Mark; Mt. was probably compiled when the Church of Jerusalem became a Greek-speaking community, i.e. in the generation that grew up after the war. Q is earlier than Mt.; it may have been compiled about the same time as Mk.

We may distinguish four periods of 30 or 40 years each, reckoning from the Crucifixion.

I. A.D. (30)-65. Oral Period. No written 'Gospel' appears during this period, nor any formal shaping of the Gospel history as a whole. St. Paul's accounts of the Lord's Supper (1 Co 11²³⁻²⁵) and of the Resurrection (15³⁷) do not appear to have any literary connexion with what we read in our Gospels.

II. A.D. 65-110. Period of the writing of the Gospels.

Gospel of Mark, A.D. 65-70.

" " Luke (and Acts), A.D. 100.

" " Matthew, A.D. 80-100, in any case before A.D. 110.

" " John, A.D. 100-110.

III. A.D. 110-150. Period of the catholic reception of the Gospels.

IV. A.D. 150-190. Period of the canonization of the Gospels. By the end of this period the idea of the Fourfold Gospel (Iren. 192) is fully established.

g. The influence of the Gospels on the Church.

—The fact that the Church came to accept the Four Gospels is a proof that each of these works satisfied in a general way the Church's requirements. Had it been otherwise, the Gospel in question would never have attained to canonicity. At the same time, it would be absurd to regard the Church's requirements as being in any way occupied with details; these the Church has learned from what the Evangelists have supplied. The Church's picture of Jesus Christ is not unfairly summarized in the so-called Apostles' and Nicene Creeds; it is the written Gospels that have preserved for us the winning personality of the Son of Man.

The history of Christology was not a simple advance from an original unitarian 'psephanthropy' to the ultimate recognition of the Deity of Christ. Naturally it took many generations of Christian thought to evolve a form of words which should satisfactorily define the exceptional nature of the Founder of the new religion in terms of current philosophical conceptions. But from the first there existed the sentiment of devotion, the temper of mind which was assured that no title was too high to give, no homage too high to pay, to the Son of God, who had been sent from Heaven to overcome death and open the gates of everlasting life to those who believed on Him. For the first thirty years or so all Christians were converts; those who doubted how far the message was true did not become Christians at all. And, unless the extant literature gives a totally false impression of the general state of mind among Christians, the interest of the nascent Church was not in the least directed towards the past. In the words of the earliest written Christian document that we possess, the converts had 'turned unto God from idols to serve a living and true God, and to wait for his Son from heaven, whom he raised from the dead, even Jesus who delivereth us from the wrath to come' (1 Th 1⁹). Those who had entered the Church by baptism were to set their mind on the things that are above, 'where Christ is, seated on the right hand of God' (Col 3¹). It was true

that the Christians, in consequence of their belief, submitted to new rules of conduct; and that these rules consisted in great part of reminiscences of the words of the Lord Jesus who had taught 'sweet reasonableness' and long-suffering (*ἐπιεικεῖας καὶ μακροθυμίας*), rules such as: 'Pity, that ye may be pitied; forgive, that ye may be forgiven.'¹ But the Gospel was not a formal code, still less a biography. No pictures of early Christianity have been conceived more fundamentally false, both to the spirit and to the letter of historical fact, than those which represent St. Matthew or St. Peter as delivering catechetical lectures on the 'Life of Christ.'

The actual course of events was very different from what the first generation of believers had anticipated. The End, so confidently awaited, was not yet. One by one the companions of the Ministry went to their graves, and, when the cataclysm of the Jewish War broke up for ever the one community in which there could have been common first-hand knowledge of how our Lord had lived and moved among men, the great majority of Christians were Greek-speaking inhabitants of the Levantine cities, a population far removed in spirit and in culture from the provincial Judaism of Galilee. What wonder that Christianity began to mix with alien elements and to appear in forms which alarmed the more conservative believers?

To the average Gentile Christian in the 1st cent., Christ was the *ναῖς θεοῦ*, the messenger from God, who had come down to earth with tidings of immortality, and now was waiting till the appointed Day when He should appear in glory in the clouds of heaven. It is not surprising that to many a believer the melancholy story of Jesus the Nazarene was a stumbling-block, and that His sufferings were incredible. All the more was this the case among those who had attempted to find an appropriate place for Jesus Christ in the various philosophical theories of the Cosmos, which thoughtful men had devised and were devising. Christian sentiment and learned speculation alike welcomed what we call Docetic heresy. Docetism (*g.v.*) is not the name of a sect. It is a theory of the Person of Christ which takes many forms, and which has entered into the theology of many schools of thought. Some, like the writer of the *Acts of John*, denied that our Lord had any material existence; others were content to deny that He felt the pains of crucifixion; others, like Marcion, denied His birth; but all were alike in this, that they regarded Jesus as having been in no sense a real human being. It is a theory incredible, almost inconceivable, to us; but we have learned to know Jesus Christ through the written Gospels.

In the earlier sections of this article we have attempted to sketch what we conceive to be the literary origins of the several Gospels. What we wish to emphasize here is the private, individual character of the earlier documents. That St. Luke's Gospel was a private venture is sufficiently indicated by the Preface. That St. Mark's Gospel was so is sufficiently indicated by the narrow escape it ran of being lost altogether. The Gospel we call St. Matthew's has a more formal, official tone; and it bears marks of a Palestinian origin, i.e. it comes from the one region where we have a right to expect independent reminiscence. Yet in structure and much of its wording and material it is based on Mark—a clear proof that even in Palestine no regular effort had been made to hand down a summary of the outward events of the Ministry.²

¹ Clem. Rom. *ad Cor.* § 13.

² The lost 'Gospel according to the Hebrews' seems to have been very similar in general plan to our Matthew; in other words, it also had its ultimate basis in our Second Gospel.

To some pious Christians the biographical accounts of the life and words of the Lord may very likely have seemed unnecessary and unspiritual. But the rise of Docetic theories gave these 'Memoirs of the Apostles' a new and theological value. This is mirrored in the Ignatian Epistles. To Ignatius, writing in the middle of the first quarter of the 2nd cent., the Gospel history was immensely important, because it furnished the proof of the real humanity of Christ. If Christ was not really human, His sufferings were not real, or really akin to human suffering; and, if His sufferings were not real, why should Ignatius be willing to endure martyrdom? (*Trall.* § 10). But, to make the acquaintance of the human side of Jesus Christ, a biography was necessary.

Ignatius was 'fully persuaded as touching our Lord that He is truly of the race of David according to the flesh, but Son of God by the Divine will and power, truly born of a virgin and baptized by John that "all righteousness might be fulfilled" by Him, truly nailed up in the flesh for our sakes under Pontius Pilate and Herod the tetrarch,' and, further, that 'after His resurrection He both ate with them and drank with them [the Apostles] as one in the flesh, though spiritually He was united with the Father' (*Smyrn.* §§ 1, 3). Even this short summary of Christological doctrine goes beyond any known *Credo* in its literary dependence on a biographical Gospel, for the conception that Jesus was baptized by John, that all righteousness might be fulfilled by Him, is thoroughly characteristic of 'Matthew,' and, so far as we know, it is found in 'Matthew' alone of all the Gospels that ever were written. With this agrees the circumstance that Ignatius uses several phrases like *phureia parros*, 'the Father's planting,' which indicate the literary use of the Gospel according to Matthew. It seems likely also that he had read the Fourth Gospel, and it is almost certain that he once quotes from an 'apocryphal' work called the 'Preaching of Peter' (*Κήρυγμα Πέτρου*), a document which appears to have been a very early rival of the Canonical Acts of the Apostles. But we are not now concerned with the reconstruction of Ignatius' library; the important point is that this representative of the Catholic theology of the beginning of the 2nd cent. tends to base his doctrine of Christ on a Gospel which is biographical in form. This point of view was not at first accepted by all. 'If I find it not in the charter (*τὰ ἀρχαῖα*, the 'archives,' i.e. the OT), I believe it not in the Gospel,' said his opponents; and when he said, 'It is written,' they answered, 'That is the question' (*Smyrn.* § 8). But Ignatius had no doubt, and the Church was with him, that the Gospel record was necessary, as the guarantee of the real humanity of Jesus Christ.¹

The Church of Antioch, if we may judge from the Ignatian writings, took its knowledge of the Gospel history from our 'Matthew.' The Church in Pontus, a little later, if we may judge from Marcion, who left it in A.D. 138, used our 'Luke.' When and where our Four Gospels were gathered together into a Corpus, we do not know. Traces of it are first found in Rome, and, indeed, the conservative character of the early Roman Church makes it a little easier to understand how so ancient a document as the Gospel of Mark came to be included in the Canon. The process seems to have been very nearly complete in the time of Justin Martyr (*Apol.* i. 67; *Tryph.* 106), and it is certain that Justin's disciple Tatian constructed his *Harmony* out of the Canonical Four.

¹ One point deserves special notice in passing. Ignatius is the earliest witness to the belief that Jesus was born of a virgin. He is most emphatic in asserting this; but the importance of the doctrine for him is not that the miracle assures us that the man Jesus was Divine, but that the Christians' God was really born of woman (*Eph.* § 18).

Thus the Gospels fell into their place as the charter of the Christian religion, a fixed standard open to the inspection of friend and foe. And the earliest criticism on the Gospels from outside hits the mark from more than one point of view. 'I well know,' says Trypho, the Jewish opponent of Justin Martyr, 'that your Christian precepts out of what is called the *Gospel* are great and admirable, so admirable indeed that I doubt if any one can keep them—and I speak from personal knowledge of these writings. Moreover, we non-Christians specially wonder why you expect to get any favour from God when you set your hope on a man who was crucified' (*Tryph.* 10).

This simple and obvious piece of criticism touches the essential point. The real humanity of Jesus who was crucified in Judæa, and the soaring ethical principles that He taught, as it were by the way,—these are the obvious characteristics of the Gospels, and it is the Gospels which secure these things as an inalienable possession of the Christian Church. Moreover, Trypho's criticism is unanswerable, if the Gospels be regarded as mere law-books, as a code of morals. The Pentateuch is a law-book; it is possible to obey it to the letter, and those who compiled it intended it to be obeyed to the letter. But he who exchanges the Pentateuch for the Gospel does not exchange one code for another, as actually happens in the case of a Jew turning Muslim. He who reads the Gospel finds on the one hand that eternal life is promised for the observance of the Decalogue (Mk 10^{17, 19}), on the other that the renunciation of every earthly tie is demanded (Lk 14^{26, 27}), and that, unless the righteousness of the Christian exceeds the legal requirements, he cannot enter the Kingdom of Heaven (Mt 5²⁰). This discrepancy is not an affair of divergent 'sources' or of rival schools of Christian ethics; it is essentially characteristic. The Gospel is not intended to introduce us to a code by which all men should regulate their conduct; it is intended to introduce us to Jesus Christ, whose commands differ for each age and for each individual because He dealt with principles and not with rules. The love of God and the love of our neighbour were the ethical principles of Jesus; but to turn His sayings into a fixed code of rules would produce a course of life harmful to our neighbour and displeasing to God. We do not get rid of the real difficulties of the Gospel, if we make jettison of all the miracles but leave the Sermon on the Mount.

The Gospel ethics needs criticism more, not less, than the Gospel miracles; and for this reason, that it is more for the ethics than the miracles that the Gospels are permanently valuable. We need to put the Gospel morality into its due relation to time and place; if Christ said, 'Give to every one that asketh thee,' and, 'Unto him that smiteth thee on the one cheek, offer also the other' (Mt 5^{28, 29}, Lk 6³⁰), we need to understand the social conditions of Christ's day, and those of our own also, before we can turn these maxims into a rational command for fellow-believers. It has ever been a mark of true Christianity to seek to apply the words of the Gospel to the changing needs of the time—a task which is none the less incumbent upon the Church because it is always difficult.

But the Gospel morality is not the Gospel, any more than the *Didache* is the Gospel. Christianity stands or falls, lives or dies, with the personality of Jesus Christ; and the Gospel is our introduction to Jesus Christ. From the Gospel according to Mark we may learn who Jesus Christ was and what part He played on earth in human history. From the Gospels according to Luke and Matthew we may learn something of what Jesus Christ taught. From the Gospel according to John we

may learn what His followers declare to be the real significance of His life. It is the great charm of Christianity that its innermost doctrine is incarnate in the person of its Founder, rather than crystallized into a set of propositions or ordinances. The propositions and the ordinances may be necessary deductions; one of them, as we have seen, forms the ground idea of the Fourth Gospel. But they are exhibited in action; like the Laws of Nature themselves, the Doctrines of Christianity are human deductions from the course of events.

LITERATURE.—I. THE LITERARY PRIORITY OF MARK.—C. Lachmann in *SK*, 1835, p. 570 ff.; W. G. Rushbrooke, *Synopticon*, Lond. 1880; J. C. Hawkins, *Horæ Synopticas* 2, Oxf. 1909.

II. ON THE RECONSTRUCTION OF Q.—A. Harnack, *Sprüche und Reden Jesu*, Leipz. 1907 (Eng. tr., *The Sayings of Jesus*, Lond. and N.Y. 1908); V. H. Stanton, *The Gospels as Historical Documents*, pt. II., Camb. 1909; B. H. Streeter, *Essays IV. and VI. in Studies in the Synoptic Problem*, Oxf. 1911; F. C. Burkitt, *The Earliest Sources for the Life of Jesus*, Lond. 1910, pp. 37–46.

III. ON THE FOURTH GOSPEL.—The best defence of a genuine element in the sayings of the Fourth Gospel still appears to the present writer to be that in Matthew Arnold, *God and the Bible*, chs. v. and vi., popular ed., Lond. 1884. For the modern view, see B. W. Bacon, *The Fourth Gospel in Research and Debate*, New York, 1910. For the theology, see W. R. Inge, in *Cambridge Biblical Essays*, Lond. 1909, pp. 251–288. On the literary unity of the Gospel, see J. Wellhausen, *Erweiterungen und Änderungen im vierten Evangelium*, Berl. 1907, and *Das Ev. Johannis*, do. 1908.

IV. GENERAL MEANING AND HISTORICITY OF THE SYNOPTIC GOSPELS.—Albert Schweitzer, *Von Reimarus zu Wrede*, Tüb. 1906 (Eng. tr. [by W. Montgomery], *The Quest of the Historical Jesus*, Lond. 1910), is, apart from Schweitzer's own very interesting views, the most instructive introduction to the general trend of Gospel criticism during the 19th century. See also A. Loisy, *Jésus et la tradition évangélique*, Paris, 1910 (an admirable short survey of the whole question from the 'eschatological point of view'); J. Wellhausen, *Einleit. in die drei ersten Evangelien* 2, Berl. 1911, *Das Evangelium Marci* 2, 1909, *Matthæi*, 1904, *Lucæ*, 1904 (four books forming one short Commentary on the Synoptic Gospels, with Intro. prefixed—'liberal' and stimulating); W. Wrede, *Das Messiasgeheimnis in den Evangelien*, Göttingen 1901 (the book with which Schweitzer's survey closes, but well worth study for its own sake—anti-eschatological and historically sceptical of the outline given in Mk.); A. Drews, *The Christ Myth*, Eng. tr. by C. D. Burns, Lond. 1910 (the most noteworthy expression of historical disbelief in the historicity of Jesus, compelling the future investigator to examine the reasons for treating any part of the Gospels as actual history); B. W. Bacon, *The Beginnings of Gospel Story*, Yale, 1909 (a Commentary on Mk., the most scientific exposition in English of the anti-eschatological point of view); F. C. Burkitt, *Earliest Sources*, etc. (eschatological), also *The Gospel History and its Transmission* 3, Edinb. 1911 (this book, as first published in 1906, was an expansion of the first draft of the present article).

F. C. BURKITT.

GOSPELS (Apocryphal).—I. Importance.—The most important problem to the student of religion is the character and teaching of the Founder of Christianity. Since He wrote nothing, we can discover this only by reading what others, near to the events, wrote about Him. It was natural that many of His followers should 'take in hand to draw up accounts of their Lord'; on the face of it, it is improbable that the four Gospels 'received' by the Church contain the whole authentic tradition on the subject. Moreover, St. Luke in his preface (Luke 1:1–4) expressly declares that his work is based on many earlier writings, and implies the existence of others which he has not scrupled to pass by. Such fragments as remain to us, purporting to give an account of these events, claim to be judged on their own merits, without fear or favour derived from the decisions of Church Fathers in succeeding centuries, and the whole story can be rightly understood only when a searching study of these remains has taken place. See preceding article.

2. Name.—The name 'Apocryphal,' originally a title of honour given to writings for a select circle, 'hidden' from the multitude, is used in analogy with the OT Apocryphal books to describe these remains. It was only by degrees that it became a term of reproach, as implying exclusion from that public reading in churches which was reserved for the canonical books ('quidquid est extra hos, inter *Ἀποκρύφα* esse ponendum' [Jerome, *Prolog.*

Galeatus, end of 4th cent., after giving a list of the canon]). Down to the end of the 2nd cent. the process was not complete, for Serapion (A.D. 190) found the 'Gospel of Peter' (see below) used in public reading in the church at Rhossus near Antioch (Euseb. *HE* vi. xii. 2); and in 412–450, Bishop Rabbula of Edessa discovered more than two hundred copies of Tatian's *Diatessaron* taking the place of the Four Gospels in the churches of his diocese. But, once the exclusion was confirmed, it began to act more and more disastrously upon these books, and the name 'Apocryphal' came to possess a more and more ominous significance.

3. Difficulty.—The study of these pieces is still in its infancy, for fresh discoveries are continually being made which alter the whole horizon; e.g. the *Logia*, discovered in 1897 and 1903, and fragments of the 'Gospel of Peter,' unearthed in 1886, have overturned some old theories, while the translation of the Italian 'Gospel of Barnabas' (1907) has illuminated a forgotten corner of Church History. It is thus as hard to lay down conclusions as to write a history of the politics of the current year, for the scenery is always changing. Moreover, the evidence at present, both external and internal, is very fragmentary and must be used with caution. Though we know by name nearly fifty of these 'Apocryphal' Gospels, not one-tenth of their contents is extant.

4. The evidence.—The external evidence consists of statements of Church Fathers, and cannot rightly be regarded as impartial. To know its worth we must examine it in the light of the knowledge we possess concerning the special characteristics of the witnesses who give it. For instance, no one can read the works of Clement of Alexandria without perceiving at once his credulity and curiosity, his versatility and liberality. Unlike his contemporaries, he showed an almost modern striving after tolerance. In his search for truth he found it in most unlikely places. Nothing came amiss to his craving for knowledge and sunny optimistic outlook. Where Christ was not before, Clement's tender imagination translated Him. Papias' credulity was of a more naive and crude sort. It is strange to find those who would base their whole case for the existence of a Hebrew original of the First Gospel on one of his tales, rejecting, with hardly an apology, others like the prophecy which he ascribed to Christ (Iren. *adv. Hær.* v. xxxiii.), or the account of the martyrdom of 'James and John' (quoted by Georgios Hamartolos [see Moffatt, *Introd. to Lit. of NT*, 1911, p. 603 f.]). Jerome, inquisitive and inquiring as he was by nature, was ready to go to any length to avoid the suspicion of heresy, and to this he sacrificed his own reputation by his attack on Origen's memory. Origen's daring criticism and profound love of truth for its own sake are tempered, as a rule, with a scrupulous caution and desire to avoid offending 'weaker brethren,' or marring the splendid unity of the Church he lived to serve. Eusebius is the safest guide; but even he was writing from a later standpoint, and for a public to whom the canon of the Gospels was soon to be a sacred and established fact. If men object to the bias of 20th cent. critics, it is surely needful to remember that prejudice is not only of to-day, but played a large part in the estimates of the early Fathers and Councils of the Church, and nowhere more than in the subject under discussion. Some of the chief witnesses cited were plainly speaking from hearsay, and had no personal acquaintance with the facts related; e.g., there is no evidence that Irenæus of Lyons knew anything at first hand of Syrian Christianity; and all scholars admit that Epiphanius' zeal and curiosity were surpassed by his credulity and bigotry. (Epiph. *Hær.* xlv. 1

actually confuses Tatian's Syriac *Diatessaron* with the Hebrew Matthew; yet many would rely on his authority to discuss the nature of the latter Gospel.) To find the origin, date, and value of the Apocryphal Gospels, we are thrown back upon the internal evidence afforded by the extant fragments; and our estimate of this must depend largely on our view of the history in question, though we are able to correct our results by a critical view of the external evidence.

5. Value.—Even if it were proved that the Apocryphal Gospels have little claim to originality or antiquity, they would possess great negative value, as reflecting the excellence of the selection of which the NT is the result. They must also throw much light on the earliest notions of Christians, on the earliest history of the Church and Canon, and, most of all, on the intricate problems connected with the date and origin of the 'received' Gospels. Their contents are too fragmentary and their value too disputed to solve such problems; often they rather 'complicate them further' (Harnack, in *TU* ix. 2) by suggesting new possibilities and upsetting old conclusions.

6. Origin.—The Apocryphal Gospels embrace all writings claiming to describe the words and acts of Christ outside the canonical Four; they are a very mixed collection, and owe their existence to very various motives. Some writings, e.g. 'The Preaching of Peter' (see below), though containing words put into Christ's mouth, are hardly to be ranked as 'Gospels'; others, e.g. Tatian's *Diatessaron*, or Marcion's revised and abbreviated version of St. Luke, are hardly to be called 'Apocryphal.'

7. Classification.—The rest are divided for convenience into four classes: (A) Parallel Gospels, (B) Transition Gospels, (C) Supplementary Gospels, and (D) Lost and Hostile Gospels. But, in any classification, a cross division is inevitable; and, strictly speaking, no exact lines can be drawn between the four classes. The class D (see below) has always been the most numerous; and the tendency, ever since the canon was fixed and the living fount of tradition dried up, has been to assign all unauthorized writings to this class. Origen's 'Quattuor Evangelia habet ecclesia, haereses plurima' (in *Luc.* i. 1) has been the rough and ready verdict of many since his time; but, while tradition was fluid and Scripture meant 'the Law and the Prophets' (as in Clem. Alex. *Strom.* vi. xii. 58, from 'Preaching of Peter'), and while codices were still unknown (before A.D. 250)—since only separate rolls were used—many pieces were not reckoned 'Apocryphal' which subsequently were condemned. This came about the more readily at a time when 'heresy' had become a moral and spiritual menace to the existence of the Church, and walls had to be built to keep out the wolves in sheep's clothing who devoured the flock. Even when it became a definite practice to manufacture 'Gospels' in defence of particular tenets, the first essays were rather partial harmonies of earlier sources, written and oral, and quite unlike the barefaced forgeries of later days. Such are those belonging to class B. Class A, the earliest and most important, is parallel in time and object with our canonical Gospels, and akin to these we reckon the fragmentary sayings probably belonging to an authentic tradition, whether oral or written, and possibly the first stones on which some later Gospels, e.g. 'of the Egyptians' or 'of Thomas,' were built. Class C illustrates the difficulty of any division, for the Gospels belonging to it contain pieces of hostile Gnostic productions as extravagant as any in class D. This group is by far the best known, and, for a study of early Christianity, the least important. Between classes D and A the gap is far wider than between B and the earliest canonical sayings.

8. Contents.—(A) **PARALLEL GOSPELS.**—(a) *Gospel according to the Hebrews* = καθ' Ἑβραίων = Ἑβραϊκὸν = Ἰουδαϊκὸν (Cod. Tisch.) (Euseb. iii. xxv. 3, 5, xxvii. 4, xxxix. 6, iv. xxii. 8, *Theoph.* in *Matt.* xxv. 14, and *Syriac Theophania* [iv. xiii. 234, ed. Lee, London, 1842]; Origen, in *Joh.* ii. 6, in *Matt.* xv. 14, in *Jer.* xv. 4; Clem. *Strom.* ii. ix. 86 [*PG* viii. 982] = Jerome's 'Gospel of the Nazareans,' called by many the 'Authentic Matthew' [*authenticum Matthaei*, Jerome, ad *Matt.* xii. 17]; cited by Jerome, *de Vir. Illustr.* ii., iii. [A.D. 392], in *Isai.* xi. 1, xviii. 1, xl. 9, in *Ezech.* xviii. 7, in *Matt.* xii. 13, xxvii. 16, also *adv. Pelag.* iii. 2 [A.D. 413], and some ten other citations; perhaps also Ignatius, *Smyrn.* iii. 2).—It is ascribed by Jerome to orthodox Jewish Christians (Ναζαραιῶν = Nazaraei). It is said to have been written in Aramaic words and Hebrew letters (Hegesippus [A.D. 100], in Euseb. *HE* iv. xxii. 8; Euseb. *Theoph.* in *Matt.* xxv. 14; Jerome, *adv. Pelag.* iii. 1) and to have quoted the OT from the Hebrew text (Jerome, *de Vir. Illustr.* iii.). Probably a Greek translation was known to Origen and Eusebius, whence came its present name. Perhaps the original was anonymous, like so many of the Hebrew sacred writings (e.g. the Epistle to the 'Hebrews' in NT). Such a translation was probably confined to a few, and had disappeared in Jerome's time. He translated it himself from a copy at Beroea, and he knew of another at Caesarea, which 'Pamphilus had studied'—perhaps the same that was seen by Origen. Eusebius (iii. xxv. 5) places it among the 'disputed' books. Like Origen, he implies that many reckon it 'canonical,' while Jewish Christians make use of this Gospel and 'take small account of the others.' The first saying in the Oxyrhynchus Papyrus, published by Grenfell and Hunt in 1903, contains a longer version of a saying (ὁ θανάσιμος βασίλευσε, καὶ ὁ βασίλευσας ἀναπαύσεται) derived by Clement (*Strom.* ii. ix. [xlv. 4, ed. Stählin, Leipzig, 1906]) from this Gospel. Of some thirty fragments extant, Nicholson regards ten as independent of the canonical Gospels. Handmann thinks that twelve are nearest to St. Luke, eleven to St. Matthew, and six to St. Mark. This is against the view advocated by many since Lessing (1784)—the first to realize the importance of the Gospel of the Hebrews—who find here the original 'Hebrew Matthew' mentioned by Papias in A.D. 110 (Euseb. *HE* iii. xxxix. 16) and the primal source of all the other Synoptic Gospels. The Gospel of the Hebrews has been described as a 'phantom ship' or a 'haunting shadow' ever dogging the footsteps of this primal Gospel, but it is not unlikely that the reverse is really the case, and that the 'Hebrew Matthew,' which is never quoted save as a name, is merely the orthodox reflexion of a confused report of the Gospel of the Hebrews, which was all that reached the ears of Western Christendom, through the agency of Papias in Phrygia, and his disciple Irenaeus, Bishop of Lyons (cf. Iren. *adv. Her.* i. 26 and Euseb. *HE* iii. xxxix.). Hegesippus, Eusebius, Origen, and Jerome had all been in Palestine and had seen the Gospel according to the Hebrews, but none of them, even in their commentaries on St. Matthew, give any indication of knowing more than the name of the original 'Hebrew Matthew.' Jerome, who at first (A.D. 392) tried to identify the two, grew more sceptical as he proceeded, though the attacks of his enemies, who accused him of trying to bring in a fifth Gospel by translating the Gospel of the Hebrews, made him so cautious and ambiguous in his language that it is easy to mistake his meaning. Epiphanius (*Har.* xxix. 9, xxx. 3), who regards the Ebionite Gospel as a forged and 'very full' (ἡλικύτατον) version of 'Hebrew Matthew,' had never seen either, and confused both with the Greek

'Gospel of the XII. Apostles.' Gospel criticism to-day leans steadily to a disbelief in a Hebrew Gospel underlying our St. Matthew, though admitting that one of the sources employed may have been a Greek collection of discourses (from the Aramaic) with narrative links. It is probable, then, that neither Hilgenfeld, who calls it the 'punctum Archimedis' of the whole Synoptic problem, taking the place usurped by St. Mark, nor Resch, who regards it as a 'tertiary' production several times removed from its original (the *Logia* of St. Matthew in Hebrew), is right.

Internal and external evidence alike point strongly to the view that the Gospel of the Hebrews is an independent parallel version of the events described in the Synoptics (esp. in St. Matthew), and possibly formed one of the sources in the hands of St. Luke. The style is lifelike, Jewish, and primitive. Sometimes the *naïveté* borders on the grotesque and draws near to the methods of current Jewish Apocalyptic, as in the famous saying ascribed to Christ, 'My Mother the Holy Spirit took me by one of my hairs to the great Mount Tabor' (Jerome, *de Vir. Illustr.* ii.; Origen, *in Joh.* ii. 6; cf. Bel and the Dragon³⁹), which is perhaps the foundation for the later unlikely story that Mt. Tabor was the scene of the Transfiguration. The words ascribed to Christ at His baptism, 'What have I sinned unless this be ignorance?' (Jerome, *adv. Pelag.* iii. 2; cf. Jn 8⁴⁶), are certainly very ancient. The context of the tale of the rich young man and the reference to Peter as 'Simon his disciple sitting near him' (Origen, *in Matt.* xv. 14) have all the marks of genuineness, and many of the sayings peculiar to this Gospel bear the proof of their origin on their face—e.g., 'Never be happy save when ye behold your brother in love' (Jerome, *in Eph.* v. 4). Even where the author seems to correct the tradition preserved in the canonical Gospels, it is often a moot point whether his version is not to be preferred; e.g., in the Lord's Prayer, instead of Matthew's and Luke's obscure reading *ἐπιούσιον*, the Gospel of the Hebrews has *ἄρτος* = 'to-morrow's bread'; instead of the Parable of the Pounds, it has another parable in which the third servant does not bury his pound, but squanders it in riotous living, and is the only one punished by more than the loss of the share entrusted to him (Euseb. *Theoph. in Matt.* xxv. 14). Of the two Resurrection 'appearances,' that to Peter and his friends (Origen, *de Princ.*, Præf. viii.; quoted also in Ignatius, *Smyrn.* iii. 2, and 'Preaching of Peter' [see below]) is probably an older version (see Resch, *Agrapha*, 412–418) of that recorded in Lk 24^{36a}. The other (Jerome, *de Vir. Illustr.* ii.), to 'James the Just,' treated as the *first*, contains a number of legendary details (e.g. giving the shroud to the priest's servant), and is probably secondary; but, in Harnack's view, its date must be before A.D. 100. This is the more probable since the title 'Son of Man' (used by Christ of Himself) appears here alone outside the NT. When Eusebius (*HE* iii. xxxix. 17) says that the story of a woman taken in sin mentioned by Papias comes from the Gospel of the Hebrews, this does not prove that Papias knew that Gospel or took it from there.

The Gospel of the Hebrews contained, according to the Catalogue of Nicephorus (A.D. 599), 2200 *stichoi*, and was thus longer than Mk., but shorter than Mt.; but Zahn thinks it may have been written in a smaller hand. It dates undoubtedly from the 1st cent. and was known in Egypt, probably in a Greek translation, very early in the 2nd cent. (it is possible that Pantænus saw it in India [= Ethiopia] in A.D. 180 [Euseb. *HE* v. x. 3]). It is thus a late contemporary of Mk., and earlier than our Mt., although its author was neither so

critical nor so orderly in his use of the traditional material.

(b) *Gospel of Peter* (Origen, *in Matt.* x. 17; Euseb. *HE* iii. xxv. 6, vi. xii. 2; Jerome, *de Vir. Illustr.* ii.; Theodoret, *Hæc. Fab.* ii. 2; *Decret. Gelasii*).—For the story of Serapion's discovery of this Gospel, see § 2. Previous to 1893 our only knowledge of this work was derived from this story, and from a statement of Origen, who remarked that the Gospel of Peter, like the 'Book of James' (see 'Protevangelium' below), contained the information that the 'brethren of Jesus' were sons of Joseph by a former wife. Eusebius further informs us that it was generally condemned as the Apocryphal work of heretics, along with the Gospels of Thomas and Matthias. In 1886, Bouriant discovered a number of precious fragments (8th cent. MSS) in a monk's tomb at Akhmim (the ancient Panopolis), Upper Egypt; among these was a large torn piece of the Gospel of Peter, giving a continuous account of the Passion, Crucifixion, and Resurrection, but beginning and ending abruptly in the middle of a sentence. On the publication of this piece in 1893, a wholly new light was thrown on this mysterious Gospel and on the history of the literature of which it formed a part. The most remarkable feature is the strong anti-Jewish bias (which induces the author to make Herod 'judge' in place of Pilate). The strong Johannine flavour, and the absolutely unique version of the Resurrection appearances, present a startling contrast to all other accounts.

In these respects, as in many others, it closely resembles the narrative in the Gospel used by the author of the Syriac *Didascalia* (A.D. 215–280), with which Harnack identifies and Resch compares it. Though entirely parallel with the Synoptic accounts of the Passion, it contains no fewer than 29 additions to the Markan narrative (some of these are early attested in MSS of Mk.), and both in its verbal and in its historical variations it is largely (Harnack gives eight examples) influenced by the corrections found in the Fourth Gospel; e.g. the date of the Crucifixion is Nisan 14, as in Jn 19^{14, 31}. After Mk 16^a the author forsakes the Synoptic account altogether, and presents a version of the Resurrection which cannot be paralleled from any of our Gospels, though it has more in common with the scenery of the Fourth Gospel than with Mt. or Luke. The fragment ends with a story of an appearance to 'Peter, Andrew, and Levi, son of Alphæus,' who have gone fishing on the Sea of Tiberias; but this and all other appearances of the risen Christ are supposed to take place on one day, and that a week after Easter (Nisan 21), when all the disciples have gone to their own homes, disbelieving the news of an empty tomb, brought by Mary Magdalene and the other women. Save in the description of the first opening of the tomb in the 'garden of Joseph' and the preaching of Christ to the 'spirits in prison' (cf. 1 P 3^{19a}), which is implied in a question addressed to 'the Cross,' which follows the risen Lord from the tomb, there is little fantastic or legendary matter in this work. The heretical, Docetic element, too, is in the background, though it appears in the remark concerning Christ's being 'silent, as having no pain,' and in the significant change in the only sentence ascribed to the crucified: 'Power, my Power, why hast thou forsaken me?' (but cf. 'at the right hand of power,' Mk 14²⁶). It contains the germ, but not the fruit, of the later Docetic heresy, as seen at the full in the Qur'ân and the 'Gospel of Barnabas.' This is just what we should expect from Serapion's account of it.

Harnack seeks to prove, not only that the *Didascalia* uses this Gospel as the principal au-

thority and derives all its citations from its contents, but also that the story of the sinful woman in *Apost. Const.* ii. 14 (a work based on the *Didascalica*), now included in Jn 7³³⁻⁸¹¹, but found only in late MSS, and entirely unlike the style of the Fourth Gospel, is really taken from the Gospel of Peter—whence Papias, who had not seen the Gospel according to the Hebrews, where Eusebius found it, also borrowed it. The undoubted mixture of Johannine and Synoptic elements, which forms so marked a feature in the Gospel of Peter, the peculiar style of this fragment, and the Syrian origin both of the Gospel of Peter and of the *Didascalica*, undoubtedly lend a very strong testimony to the truth of this brilliant conjecture, especially if we accept Harnack's dictum that D gives us by far the best text of the Johannine passage, and that the glosses in D—e.g. to Lk 6⁴ (the story of a man working on the Sabbath)—are taken direct from our Gospel of Peter, hence their anti-Jewish tone. Certainly the style of Jn 7³³⁻⁸¹¹ is far more closely akin to that of the Gospel of Peter than to any other extant writing.

Whether this be so or not, the most interesting fact about the Gospel of Peter, as about the 'Logia of Jesus,' is undoubtedly the proof it gives that the so-called peculiar language and attitude of the Fourth Gospel were not so peculiar as is commonly believed. The author of the Gospel of Peter, writing in Syria during the first decade of the 2nd cent. (ἡ κυριακή = 'the Lord's day' twice in the Gospel of Peter [cf. Rev 1¹⁰] forbids a 1st cent. date), did not scruple to correct all four Gospels, and, while making no use of the Gospel according to the Hebrews, is constantly found employing terms far more akin to the Fourth Gospel than to any of the others, though he treats Mark always as his principal authority. He wrote, therefore, when the Gospel tradition was still fluid and the Canon by no means fixed, but already the special attitude and tone associated with our Fourth Gospel were well known and popular among his hearers. When Harnack supposes that Justin used the Gospel of Peter under the name 'Memoirs of Peter,' he is stating a view which cannot, in the present state of our knowledge, be disproved.

Two other writings ascribed to Peter must be carefully distinguished from this 'Gospel.' Neither is strictly a Gospel at all, though the first did place words in the mouth of the Master Himself. This is the 'Preaching of Peter,' quoted by Clement (*Strom.* i. xxix., ii. xv., vi. v. vi. viii.) and Origen (*de Princ.* Præf. viii., and in *Joh.* xiii. 17, as cited by the Gnostic Heracleon), and condemned by Eusebius (iii. iii. 2 and xxv. 6) and Nicephorus (*HE* ii. 46). Other quotations, as in Greg. Naz., *Orat.* i., are uncertain. This was the work of a cultured Gentile Christian of Alexandria, who wrote before Justin or Aristides composed their Apologies (A.D. 140-150). The attitude towards miracles is Alexandrian; that towards the Jews and the Scriptures, which include no NT, is akin to the *Ep. of Barnabas*; that towards 'faith' is Johannine, not Pauline. The book is thus a near contemporary of the Gospel of Peter, but it has no direct connexion with it. Here, as in the Gospel of Peter, the Apostle is made to speak in his own person. Von Dobschütz thinks it was written for mission preaching, as a supplement to Mark's Gospel, by one who did not know Mk 16⁸⁻²⁴, and saw the need of completing it by carrying on the Memoirs of Peter, which Mark had been privileged to transcribe.

The *Judicium Petri* or *Duo Viæ* (described by Rufinus, *Symbol. Apost.* i. 36-38, and identified by Hilgenfeld with the ecclesiastical 'Canons of the Apostles' [3rd cent.] and by Harnack with the *Didache* [2nd cent.]) cannot be described from the

existing evidence, but it has no claim to be called a 'Gospel.'

(c) *The Sayings and Words of Jesus* (Ἀβύνα 'Ἰησοῦ of Oxyrhynchus [1897]; Ἀβύνοι 'Ἰησοῦ of Oxyrhynchus [1903]); *The New Fragment of a Gospel* (1903); and *The Fayum Gospel Fragment* (1885).—The first three were discovered and published by Grenfell and Hunt, from torn fragments of papyrus in the rubbish-heaps outside the city of Oxyrhynchus; the last from a MS in Archduke Rainer's collection at Vienna, first discovered and translated by Bickell (*ZKTh*, 1885).

The first has eight sayings, called by the discoverers 'Logia.' They have, on the whole, a mystic, ascetic tone, especially the famous 5th saying: 'Lift the stone, and there thou shalt find me—cleave the wood, and there am I.' Logion 3 has a very Johannine sound: 'I stood in the midst of the world, and in the flesh was seen of men. . . . ' Harnack ascribed these sayings to the Gospel of the Egyptians. Taylor, perhaps more plausibly, suggests a connexion with the Gospel of Thomas in its original Gnostic form; which is the more probable, since the new Fragment of 42 broken lines, found in 1903, has an introduction, describing its contents as 'The (Marvellous) Words (Ἀβύνοι) which the Living Lord spake to . . . and to Thomas.'

The problem is further complicated by the fact that the first of these 'Words' (1903) appears to come direct from the Gospel according to the Hebrews; and a fragment of a Gospel found near by contains a passage, 'When wilt thou manifest thyself to us?' (cf. Jn 14¹⁹), followed by the answer, 'When ye shall be stripped and not be ashamed'—an idea dependent on Gn 22¹⁻²⁴, and akin to, if not taken from, that in the Gospel of the Egyptians (see below), with which also the dialogue form here and in no. 5 of the Logoi of 1903 and in a new fragment of a conversation on purity between Jesus and a Pharisee (found in December 1905) corresponds. These and other indications, which give a Johannine colouring to several of the sayings, even in the verbal sense, seem to point strongly to the conclusion that the Logoi of 1903, and probably also the Logia of 1897, in spite of the 'Hebraic rhythm and sound,' which many have noted, belong to an anti-Jewish and ultra-spiritual Gospel or Gospels, related both to the original form of the Gospel of Thomas and to the Gospel of the Egyptians, the latter of which borrowed some of its material from the earlier 'Gospel according to the Hebrews.' This was already the view of Jewish critics (e.g. Joseph Jacobs) in 1897, and the evidence is greatly strengthened by the new finds. All are agreed in placing these collections in the 2nd cent., and it is quite probable that some of the remarkable 'Words of Jesus' therein contained may be genuine sayings of the Master.

The Fayum fragment contains a much mutilated version of Mt 26³¹, Mk 14²⁷, Lk 22³⁰⁻³⁴, Jn 13³⁷⁻⁴⁰, 18³². The whole is well restored by Zahn, who thinks it a scrap of a homily on Lk 22³⁴. New words are introduced for 'cock' and 'crow.' Others ascribe it, with less reason, to the Gospel of the Egyptians. It may be dated with confidence before A.D. 230.

(B) *TRANSITION GOSPELS*.—(a) *The Gospel of the Egyptians* (Clem. *Strom.* iii. vi. 45, ix. 63, xiii. 91, 93, xv. 97; Origen, in *Luc.* i. 1; Hippol. *Philos.* v. 7; Epiph. *Her.* lxii. 2; *Or. Sib.* ii. 1, 63; II Clement [Soter, A.D. 140], xii. 2, 6, perhaps also iii. 2, iv. 2, 5, v. 2, 4, vi. 1, 2, viii. 5, ix. 11, xi. 7: cf. Oxyrhynchus Log. 5 [1897]; New Gospel Fragment [1903]).—Despite confident assertions to the contrary, the state of our knowledge at present hardly justifies a decided conclusion concerning this mysterious writing. The history of its criticism is a study of the employment of the dangerous 'argu-

ment from silence.' It is regarded by Origen as the first of the heretical Gospels, and is treated by Clement apart from other Apocryphal Gospels, though it is true that he adds 'I suppose' (οἶμαι). This does not imply serious doubt. Hippolytus says that it was used by the Naanenes to support their speculations on the transmigration of souls. Epiphanius had only heard that it supported Sabellian erroneous notions concerning the essential unity of the Trinity. Clement found that Cassian's Encratite and ascetic followers misinterpreted it to support their extreme views on the sinfulness of marriage. Lightfoot (*Apostolic Fathers*, London, 1890, i. ii. 238) and most other modern critics have concluded that Soter of Rome (A.D. 140) had this Gospel before him in writing our II Clement, and quoted largely from it. We have seen that the discoveries of 1902 and 1903 point strongly to a relationship between this Gospel and the Logoi of Oxyrhynchus. Clement's quotations imply that the Gospel was largely composed of dialogues, in which Salome took a large part; and Celsus (before A.D. 180), in jeering at Christian divisions, remarked on the existence of a sect which gave high honour to this otherwise secondary figure. Harnack seeks to prove it the earliest of all the Gospels. His chief argument lies in the name *κατὰ τοὺς Αἰγυπτίους*, which he regards as synonymous originally with 'the Gospel of Egypt,' only later superseded by the importation of the foreign Gospels of Mark, Matthew, and Luke. The other proof he finds in its use at Rome in A.D. 140. But it is not probable that the Alexandrian Fathers, who alone quote it, reckoned themselves as Egyptians at all; and this Greek Gospel was as foreign to the 'people of the land' as any of the others. Moreover, it is not certain that Lightfoot and others are right. It is quite possible that we may have to accept Resch's view that Soter quotes, as a rule, only the sources on which the Gospel of the Egyptians was based, which existed in the form either of oral tradition or of a written collection like the Egyptian 'Logia' to which we have referred. The stumbling-block to Harnack's view lies in the internal evidence of the fragments themselves. They bear no resemblance to the naive tales and clear-cut sayings of the Gospel of the Hebrews, but, on the contrary, have all the appearance of being the product of long reflexion upon the inner meaning of the Saviour's teaching, as read in the light of current Alexandrian speculation, revealing the unsubstantial nature of present differences and distinctions, which are to vanish in the larger world to come. It is incipient Gnosticism; and, if contemporary with any of the four Gospels, it is only with the Fourth. But, by the common consent of critics, it must have been written before A.D. 120.

(b) *Gospel according to the Apostles* ('*juzta Apostolos*'), or '*of the XII.*' (Origen, in *Luc.* i. 1; Theophylact, Proem. in *Luc.*; Jerome, *adv. Pelag.* iii. 2; Epiph. *Hær.* xxix. f.; cf. Zahn, *Gesch. NT Kan.* ii. 725).—It is only recently that portions of this Ebionite work, condemned by Origen and Jerome, have been recognized in the fragments of a Greek Gospel, confused by Epiphanius with the Aramaic Gospel of the Hebrews. The Venerable Bede (on Lk 1¹) and Fabricius (1719), 1000 years after, had differentiated the two; but modern criticism seemed at first inclined to injure itself by identifying and confusing them as Jerome once did. Nicholson, Harnack, and Zahn have all aided in averting this disaster. The Gospel known to Epiphanius was a Greek 'tendency writing,' put in the mouth of Matthew and the Apostles, and intended as a Gospel for the Judaizing Christians, who aimed at winning converts among the Gentiles. This party was nearly related to the ancient Essenes (q.v.), and the Gospel before us gives us an

idea of the Christ as Essenes would have pictured Him. He denounces sacrifice and the eating of flesh; even John the Baptist is made to eat 'honey cakes' in place of 'locusts' (ἐγκυβίδες for ἀγκυβίδες proves a Greek original). Christ is invested with the Spirit at His baptism, and tales of His early life and miraculous birth are passed over in silence. The Gospel uses all the Synoptics, especially Lk., and possibly also borrows words (e.g. 'Tiberias') from St. John, who appears at the head of the Twelve. It dates, probably, before A.D. 180, and uses some old traditions; it is the 'worst kind of Gospel harmony,' and has no relation with the Gospel of the Hebrews, which is unknown to the author.

(C) *SUPPLEMENTARY OR HAGGADIC GOSPELS* (condemned as a whole by Euseb. III. xxv., and *Decret. Gelasii*; also by Pope Leo XIII. in 1884).—These fall into two cycles: (1) those dealing with the Infancy; and (2) those dealing with the Trial, Death, and Resurrection of Christ.

None of these Gospels exists in its original form, but only in orthodox recensions of late date. Though most are of heretical origin or contain heretical tendencies and sources, they are not written to compete with orthodox Gospels, but to satisfy curiosity, where these are silent. They are not intended, therefore, primarily to mislead opinion, and are not rightly to be classed with the heretical Gospels, whose aim was to modify history in the interests of a theory. These Gospels, in various versions, are so much the best known that they have often been taken as the type of Apocryphal Gospels in general, and what applies to them only, or mostly, has been indiscriminately applied to the whole class. Eusebius (III. xxv. 7) spoke of them as 'altogether absurd and impious' (ὡς ἀνομα πᾶν καὶ δυσσεβῆς); and his verdict has been re-echoed through the centuries down to our own times, and reappears in a violent attack by Bishop Ellicott (*Cambridge Essays*, 1856, p. 153) and many other orthodox divines, whose words apply well to such as the Gospel of Thomas, but are apt to be very misleading when used of the whole series of Apocryphal Gospels.

(1) *INFANCY CYCLE*.—The numerous versions of Infancy Gospels fall into two groups, which spring from two distinct sources—the first orthodox, the second Gnostic—while the two have been combined to produce a third.

(a) *The Protevangelium of James*, now extant in Greek and Syriac, has passed through many changes. The name is of the 16th cent. (M. R. James), but the original form of the work (chs. 1-17 = 'Book of James' [Origen, in *Matt.* x. 17]) was probably known to Clement of Alexandria and almost certainly to Justin (Tischendorf, Zahn, Harnack)—i.e. it was written before A.D. 140 by a Jew not of Palestine. To this was added the Gnostic *Apocryphum Josephi* (chs. 18-21), in which Joseph is the speaker. It was probably composed in A.D. 250 (Lipsius). A further addition was the *Apocryphum Zachariae* (chs. 22-25) in A.D. 290-310. In A.D. 376 the whole book was probably known to Epiphanius (*Hær.* lxxix. 5, lxxviii. 7), and perhaps also to Gregory of Nyssa. The so-called Latin *Gospel of pseudo-Matthew* (1-17) is merely an orthodox edition of the 'Book of James,' which took its place in the West, probably about A.D. 450. The *de Nativitate Mariae* is descended from this Latin Gospel; on this, too, the 'Golden Legend' of the 13th cent. is based, and a later recension of it, with many additions and Gnostic touches, appears in the Arabic *History of Joseph the Carpenter*, a translation of a 4th cent. Coptic original; while another version of this legend, transformed by the new doctrine of the efficacy of prayers to Mary and the teaching of the Assumption and Exaltation,

appears in the *Transitus Mariæ*, a Syriac Gnostic work of 290-350, recast by a Catholic Christian in 410, extant also in Greek, Latin, Arabic, Ethiopic, and Sahidic — 'the firm foundation,' as Ewald calls it, 'of all the unhappy adoration of Mary.'

(b) *The Gospel of Thomas* (Origen, in *Luc.* i. 1; Euseb. iii. 25).—Cyril (*Catech.* iv. 36 [A.D. 380-386]) condemned this Gospel as heretical; he reckoned it Manichean. Hippolytus gives quotations from it, not in our version. The catalogue of Nicephorus (A.D. 599) shows that it was a long piece of 1300 stichoi, which proves that our text is but 'a meagre abstract of the original' (Lipsius, art. 'Gospels Apocryphal,' in *DCB* ii. [1880] 704), from which Hippolytus quoted and which Cyril denounced. This Gospel was probably composed in 160-180, though it used some old traditions, one of which appears in Justin (*Dial.* 88), while another is referred to in Iren. (*adv. Hær.* i. xx. 1, xvi. 3 [A.D. 190]). The original was cut down and altered by Catholics in order to 'enlist the miraculous stories of the Childhood on the Catholic side' (Lipsius, p. 705); but very much remains to testify to its original character. The story deals with the Life of Christ only until He reaches the age of 12, and thus never runs parallel with the canonical narratives. The object is to show that Jesus was and knew Himself to be the Logos from His birth (in the dependent Arabic *Gospel of the Infancy* we find the Babe declaring this in His cradle; probably this comes from the original Gnostic *Gospel of Thomas*). Hence the need for miracles to show His power, hence the invention of such wonderful displays of sheer wilfulness as characterize the Child here and make His story so repellent to all reverent minds. Our *Gospel of Thomas*, a 4th cent. version, is extant in two Greek editions, and also in Latin and Syriac. The *Gospel of pseudo-Matthew* (chs. 18-end) is based upon it, and of this the Arabic *Gospel of the Infancy*, full of bizarre extravagances, is merely an expanded version of the 6th century.

(2) PASSION AND RESURRECTION CYCLE.—The second cycle of these Supplementary Gospels circles round the crisis of Christ's departure from the world. Like the first, they have no historical value, and exist in many versions, in a much altered and very late form. The *Evangelium Nicodemii* (the 13th cent. title of a Latin version of the Greek 'Προφήματα τοῦ κυρίου ἡμῶν Ἰησοῦ Χριστοῦ ἐπὶ Πιλάτου Πλάτου πρᾶξεντα), like the Infancy Gospels, became very popular. Like the 'Book of James,' it is a composite work. All known texts go back to A.D. 425. The original was possibly a Christian reply to the forged *Gesta Pilati*, invented to slander the Christians by the Emperor Maximin Daza (A.D. 311-317). The idea was based on the Roman custom of drawing up official reports, and the first hint of the existence of such a record of Christ's trial appears in Justin (*Apol.* i. xxxv., xxxviii.; cf. Tertull. *Apol.* v., xxi.). It was natural that an account purporting to fill this place should be drawn up, and the book in question appears first in Epiph. *Hær.* l. 1. The author was a Jewish Christian who knew some Hebrew; to his work was attached a Gnostic account of the *Descensus ad inferos*, added by the editor of A.D. 425 from an older collection ascribed to Leucius Charinus († = Lucian of Antioch); also a forged letter of Pilate to the Emperor Claudius—probably of early date. The Coptic version dates from 361-363, and uses Eusebius. It exists also in Latin, Greek, and Armenian; and many other additions to this collection appeared in the Middle Ages—for instance, the *Mors Pilati* and *Ep. Herodis* (see R. Hofmann, in *PRE³* i. 658-660).

(D) LOST AND HOSTILE GOSPELS.—These are 'tendency writings' of little historical value.

(a) *Gospel of Philip* (Epiph. *Hær.* xxvi. 13), referred to incidentally in *Pistis Sophia* (A.D. 150-200), and used later by the Manicheans (mentioned in Leontius of Byzantium [500-540]; cf. also F. W. K. Müller, *ABA W.*, 1904, Anhang, p. 108).—It was the work of Egyptian Gnostics during the latter half of the 2nd century.

(b) *Gospel of Matthias* (Euseb. *HE* iii. xxv. 6).—Hippolytus (*Refut.* vii. 8) says that Basilides (A.D. 140) appealed to *Δόγους Ἀποκρυφίους Μαθθίου*. Zahn identifies these with the *παράδοσεις* quoted by Clem. Alex. (*Strom.* vii.; cf. ii. ix., iii. iv.), and containing an identification of Matthias with Zacchæus (*Strom.* iv. vi. 35), who as *head-publican* is set up to counteract the authority of Matthew, his subordinate! Harnack doubts this ingenious theory.

(c) *Gospel of Basilides* (Origen, in *Luc.* i.; Jerome, *Proem. in Matt.*) was perhaps a Gospel-harmony in Docetic spirit (composed in Egypt 120-140).

(d) *Gospel of Valentinus* (Tertull. *de Præscript.* xlix.), possibly identical with *Evangelium Veritatis* (Iren. *adv. Hær.* iii. xi.), was probably a treatise on the Gospels written in A.D. 140.

(e) *Gospel of Apelles* (Epiph. *Hær.* xlv. 2) contained Resch's Logion 43 (cf. 1 Th 5²¹). Apelles was a friend of Marcion (140-160).

(f) *Gospel of Eve*, or 'of Perfection' (*τελειώσεως*) (Epiph. *Hær.* xxvi. 2; Philaster, *Hær.* xxxiii.), an Ophite, Gnostic, and pantleistic Gospel. The scene here, as elsewhere in class D, is laid 'after the Resurrection.' Eve is described as seduced by Satan, the father of Cain.

(g) *Gospel of Judas Iscariot* (Iren. *adv. Hær.* i. xxxi.).—The betrayal is treated as a meritorious action, delivering man from the power of the Demiurge (Epiph. *Hær.* xxviii. 1). Judas is thus the 'perfect Gnostic'!

(h) *Gospel of Cerinthus* (Epiph. *Hær.* li. 7).

(i) *Gospel of Thaddæus* (condemned with others in *Decret. Gelasii*).—Thaddæus is perhaps regarded as one of the 70 disciples, who went to Edessa.

(j) *Gospel of Bartholomew* (Jerome, *Proem. in Matt.*; *Decret. Gelasii*).

(k) *Gospel of Andrew* (*Decret. Gelasii*), perhaps identical with the Gnostic *Περίοδοι Ἀνδρέου*, attacked by Augustine (*de Adv. Leg. et Proph.* xx.).

(l) Augustine (*de Adv. Leg. et Proph.* ii. 14) quotes an unknown Marcionite Gospel as making Christ say to the Jews: 'Ye have sent away the living who is before you, and ye prate (*fabulamini*) about the dead!'

(m) Besides these we possess a Muhammadan *Gospel of Barnabas*, based on a Gnostic Docetic Gospel (condemned in *Decret. Gelasii*), now extant in an Italian MS at Vienna. A Spanish version once existed, but is now lost. This book is mentioned by Toland (*Nazarenus*, London, 1719); it was found by Cramer, and purchased by Prince Eugene of Savoy. The stories of an Arabic original are probably mythical. A wide spirit of tolerance and charity pervades this astonishing production of a Christian mystic who became a Muslim. It probably dates from 1300-1350. The death of Judas Iscariot, substituted for Christ on the cross, is described here in detail, and is probably a feature of the original Gnostic *Gospel of Barnabas*.

LITERATURE.—Only a selection of the most important works is given.—I. GENERAL.—J. A. Fabricius, *Cod. NT Apoc.*, Hamburg, 1703, 1719; J. C. Thilo, *Cod. NT Apoc.*, Leipzig, 1832; C. Tischendorf, *Evang. Apoc.*, do. 1876; A. Hilgenfeld, *NT extra Canonem Receptum*, do. 1876, 1884; E. Preuschen, *Antilegomena*, Giessen, 1901; T. Zahn, *Gesch. des NT Kanons*, i., ii., Leipzig, 1888-92; A. Harnack, *Gesch. d. altchristl. Litt.*, do. 1893-97; W. Wright, *Contrib. to Apoc. Lit. of NT*, Cambridge, 1886; Forbes Robinson, 'Coptic Apoc. Gospels,' in *TS* iv. ii. (Cambridge, 1896); J. Orr, *Apoc. NT* (Temple

Library, 1900)—brief and popular; G. Salmon, *Hist. Introdt. to Study of NTs*, Dublin, 1890, Lect. xi.; B. F. Westcott, *Introdt. to Study of the Gospels*, London, 1831, Appendices; E. Pick, *Life of Jesus according to Extra-canonical Sources*, New York, 1887; Ante-Nicene Library, esp. suppl. vol., Edinburgh, 1896; art. on 'Apocryphal Gospels,' in *HDB*, vol. v. (J. G. Tasker), *DCG* (A. Fyfe Findlay), *EBrii* (R. H. Charles), *EBi* (M. R. James), *PREs* (K. Hofmann), and *DCB* (R. A. Lipsius); *TU*, Leipzig, 1894-1906; A. Resch, *Agapha*, do. 1889; J. H. Ropes, *Sprüche Jesu* (= *TU* xiv. 2), do. 1896; A. Harnack, *Bruchstücke des Evang. u. d. Apokal. d. Petrus* (= *TU* ix. 2), do. 1893; E. von Dobschütz, *Kerygma Petri* (= *TU* xi. 1), do. 1894; R. Handmann, *Das Hebräerevangelium* (= *TU* v. 3), do. 1888. (Handmann reviews all previous writings on the subject.)

II. *SPECIAL*.—On Gospel according to the Hebrews: J. Nicholson, London, 1879; W. Adeney, in *HJ* iii. [1904] 189; A. Menzies, art. in *II DB v.* [1904] 838; see also Harnack, *Zahn*, Handmann, as above.—On Gospel of Peter: J. A. Robinson, 1897; H. B. Swete, 1892; author of *Supernatural Religion*, ed. London, 1893—brilliant but biased.—On Logia Iesou: B. P. Grenfell and A. S. Hunt (1897, 1902); W. Lock and W. T. Zahn, *Gesch. des NT Kanons*, ii. 132, and A. Harnack, in *TU* v. 4).—On Lost and Hostile Gospels: S. Baring Gould, *The Lost and Hostile Gospels*, London, 1874—suggestive and interesting, though out of date.—On Gospel of Barnabas: J. White, *BL* (1784); W. H. Axon, in *JThSt* iii. [1902] 441, tr. by L. Ragg, Oxford, 1907.

L. ST. ALBAN WELLS.

GOSSIP.—The word in its original use indicated a person who had become related (*sib*) to another through a common relation in the service of God, as a sponsor, who answers for a child in baptism. It then broadened out to embrace those who were related to one another through common interests of some sort. It was next applied to the talk of those who were thus related, and finally to the speech of friends, neighbours, and acquaintances about persons and matters which were of common interest to them. Gossip is essentially a social function, and is as old and universal as society. It has existed *semper, ubique, et in omnibus*. It finds its material everywhere. Nothing is too high or too low for it. If we seek to gather the general sense of its moral character, there can be little doubt that it is condemnatory. Burns, in his *Address to the Unco Guid*, says:

'Ye've nought to do but mark and tell
Your neighbours' faults and folly.'

Tennyson numbers gossip among the 'sins of emptiness' (in *The Princess*, pt. ii. line 92). Coleridge may have had it in mind when (in *Christabel*, pt. ii. line 78) he wrote:

'But whispering tongues can poison truth.'

Most of the definitions or descriptions of gossip are in agreement with this judgment of it. It is a 'retailing of small talk,' 'the telling of idle tales,' 'women's tattle over tea.' It is 'generally concerned with evil things, and is rarely beneficent.' It is usually regarded as being inspired by an impertinent curiosity, and as having no interest but a selfish one. It tends to create ill-feeling, disturbs peaceful friendships, tempts to exaggeration, fosters a morbid love of prying, and is a fruitful source of evil imputations. It has little regard for the truth of what it repeats, inclines to add fiction to fact, exercises little or no discrimination or censorship, and aims chiefly at effect. It is characterized by a general pettiness of interest, and requires slight powers of thought. The mind that finds delight in gossip is prisoned in the lower interests of life. Though it is more genial and kindly than scandal, it is closely and dangerously allied to it, and often passes into it. The habitual gossipier is almost always a scandal-monger.

However much it may be condemned, it must be admitted that gossip is exceedingly attractive. There is a certain pleasure in hearing and retailing it. The word suggests the frank and interested talk of neighbours and intimates about the sayings and doings of people whom they know. In the small world of private life there are incidents and

dramas as exciting and absorbing as those that take place on the larger and wider stage of the world's life. Social life has been called 'the drama of mankind'; and men and women find pleasure, relaxation, and perpetual interest in it. The girls of Newnham College, Cambridge, in their debating society once discussed the question 'Is Life worth living without gossip?' and unanimously decided that it was not. Miss Gladstone, Principal of North Hall, defended the vote. It is to be noted that gossip is most active in small communities. In the village or parish the interests are fewer and more personal, and the sense of kinship is more acute than in larger communities. Where every one knows his neighbour, gossip is rife. It is regarded as a practice to which women are specially prone. It is possible that the more restricted life which most women live, as compared with men, has led them to indulge in this social activity. In the same circumstances, as may be seen in individual instances, men would indulge in it as largely as women. In proportion as women enter into the larger life and interests of the world, their tendency to gossip declines. The massing of men and women in cities under the influences which have produced our modern civilization has weakened the sense of kinship, increased the feeling of individualism, and multiplied the larger interests of life. Gossip has, therefore, in some measure declined, but the instinct continues to exist, and satisfies itself with the personalities of the cheap or 'gutter' press, journals which report the sayings and doings of famous or infamous people, the details of divorce cases, and the articles which the 'lounger at the Clubs' can supply. Finer minds find satisfaction for the gossiping instinct in histories, biographies, autobiographies, memoirs, and reminiscences. Among the French this type of literature has been brought to a high state of perfection. In their *Mémoires*, gossip has almost attained the dignity of an art.

It is far from just to indulge in indiscriminate condemnation of the practice of gossip. It is a social product, and could be destroyed or brought to silence only by a universal and absolute individualism, in which no one cared for what concerned another. It is irrelevant to say that gossip should be confined to things and should not deal with persons. There is little interest in things, except what comes to them in relation to persons. Besides, persons are more interesting than things, and it is they who make up the social community out of whose relationships gossip arises. So long as men and women live in society, and have the power of speech, they will talk of the sayings and doings of others. It is surprising how much can be said in defence of gossip. Not only is it a necessary outcome of social life and social instincts, but, in spite of its occasional disruptive effects, it helps to vitalize social life, strengthens the links that keep society together, and lessens the arctic chill of a growing individualism. It is the school of social criticism, through which men and women form and express their judgments, and determine many of their social actions. It is the vehicle of the social conscience. It may err, and does err repeatedly, but its errors do not destroy its social helpfulness. It assists in forming and preserving the moral tone of a community. The practice of gossip also provides for the exercise of charity, magnanimity, and gentleness. The charity that 'taketh not account of evil; rejoiceth not in unrighteousness, but rejoiceth with the truth' (1 Co 13³⁴) would have few opportunities of showing itself, and of perfecting itself in a social world in which gossip was unknown. It may even be said that, in so far as Christianity has affected the alienations and separations of society, bridged the

gulfs that yawn between classes and nations, and increased the sense of kinship and brotherhood in the world, it has enlarged the sphere and powers of gossip. 'Not looking each of you to his own things, but each of you also to the things of others' (Ph 2*) is a precept which encourages the spirit out of which the tendency to gossip comes. We must not forget the debt which literature owes to this social interest. In the essays of the *Spectator*, *Tatler*, and the like, the social criticism of the time is thrown into such vivid forms that the age lives before the reader in a more realistic and truthful way than any didactic history could produce.

Gossip resembles all the universal activities of humanity. It is like the power of thought or imagination. It is one manifestation of the power of speech. It may be used for good or for evil, for genial and kindly ends or for those that poison and embitter and degrade. To eradicate it is impossible so long as man remains a social animal. To use it rightly should be the aim of every one. 'If any stumbleth not in word, the same is a perfect man' (Ja 3*).

JOHN REID.

GOTRA.—There exists as yet no competent history of the Indian *gotras*.¹ If, however, we take as our starting-point the Brāhmanical legend and theory regarding them, and compare therewith the references made to them, incidentally and apart from the influence of theory, in Indian literature, we may perhaps find ourselves able to form some approximate idea of the singular nature of these family communities, which, together with caste (*g.v.*), are of the utmost significance for the structure of Indian society. Nor can we in this investigation rely solely upon the Sanskrit literature; we must also take into account the Pali Canon of the Buddhists, and the books of the Jains. If we then compare with the results thus obtained the data furnished by the ethnological materials found in modern Anglo-Indian literature, we may venture to draw from these various sources some conclusions regarding the origin and character of the *gotras* in ancient times.

1. Brāhmanical legend and theory.—The Brāhman all pride themselves on their Divine origin.² Legend³ relates that once, when Brahmā was performing a sacrifice, there came forth from it the seven *ṛṣis*—Bhṛigu, Angiras, Marichi, Atri, Pulaha, Pulastya, and Vasiṣṭha. The Brāhmanical septs were likewise supposed to derive their origin from seven *ṛṣis*, though not exactly the seven just named, of whom the fifth, Pulaha, brought forth demons (*rākṣasas*), and the sixth, Pulastya, devils (*piśāchas*), while the seventh, Vasiṣṭha, died, and appeared again as a descendant of Marichi. Then, as Bhṛigu and Angiras, owing to their mythical character, could not properly be represented as

founders of families,⁴ their place is taken in the Brāhmanical theory by other three ancestors, Bhṛigu being superseded by Jamadagni, and Angiras by Gautama and Bharadvāja. In the *Satapatha Brāhmaṇa*,⁵ accordingly, the seven *ṛṣis* enumerated as ancestors are: Gautama, Bharadvāja, Viśvāmitra, Jamadagni, Vasiṣṭha, Kaśyapa, and Atri. To these tradition adds an eighth, Agastya; and thus the Brāhmanical clans (*gotras*) are in reality traced to eight ancestors. These rank as *gotrakārins*—the founders of the numerous Brāhmanical families, and their descendants are the various *gotras*.⁶

The number of families descended from the eight *gotrakārins* is far from constant in the Brāhmanical tradition. According to *Āśvalāyana*,⁷ the total is forty-nine. Seven of these (Vatsa, Arjīṣeṭha, Bida, Yaśaka, and others, *Syātis* Mitravya, Sunaka) trace their origin to Jamadagni; ten (Gotama, Uchathya, Rāhūgana, Somarājaka, Vāmadeva, Bṛhaduktha, Pṛgadāśva, Rikṣa, Kalki, Dīrghatama) to Gautama; nine (Bharadvāja and Āgniveśya, Mudgala, Viṣṇuviddha, Gargya, Harita, and others, *Saṅkriti*, and others, Kaśyapa, Kapila, Sauriga-Saṅgiri) to Bharadvāja; two (Atri, Gavīthira) to Atri, twelve (Chikita, and others, Śrauta-Kāmākāyana, Dhananjaya, Aja, Rohita, Aṣṭaka, Pūṣpa-Vāridhāpanta, Kāta, Aghamarṣa, Renu, Vepu, Śālūkāyana, and others) to Viśvāmitra; four (Kaśyapa, Nidhrva, Rebha, Saṅdila) to Kaśyapa; four (Vasiṣṭha, Upamanyu, Parāśara, Kuṇḍina) to Vasiṣṭha; and, finally, a forty-ninth, the Agastya, to Agastya.

In a passage quoted by Rādhakānta⁸ the number is given as twenty-four, viz. the Śāṅḍilya, Kaśyapa, Vāta, Sāvarka, Bharadvāja, Gautama, Saukālina, Kalki, Āgniveśya, Kṛpātreya, Vasiṣṭha, Viśvāmitra, Kuśika, Kauśika, Ghṛitakaṣika, Maudgalya, Alamyāna, Parāśara, Saupāyana, Atri, Vāsuki, Rohita, Vālyāghrapadya, and Jamadagnya *gotras*.

In a passage of the *Kuladīpikā*, also quoted by Rādhakānta, we find the names of two *gotrakārins*, corresponding in part with the above, but it states that the complete number of *gotras* is forty.

To fix the number of *gotras* at eighteen, as is done by a modern Hindu writer,⁹ cannot be considered as other than a hypothesis based upon Brāhmanical legends. Chentsal Rao, the writer in question, holds that the original eight families of *gotrakārins* were supplemented by ten more, and that the latter consisted of Brāhmanas who had for a time followed the vocation of Kṣatriyas, and had become Brāhmanas again, regarding themselves as descended either from Bhṛigu or from Angiras. They rank as Kevala-Bhāṛgava or Kevala-Aṅgīrasa (*kevala* = 'separate', 'isolated'), and may intermarry with any other family. Their names are: Viśahavya, Mitravya, Sunaka, Vepa, Rathitara, Mudgala, Viṣṇuviddha, Harita, Kaśyapa, and Saṅkriti.⁷

Closely connected with the *gotra* is the *pravara*, i.e. the invocation of Agni by the name of the *ṛṣi*-ancestors of a Brāhman who consecrates the sacrificial fire. The officiating priest whose duty it was to call upon Agni Havyāvāhana, the deity who carries the libations to heaven, pronounced the names of the *ṛṣi*-ancestors (*ṛṣeya*) peculiar to his *gotra*, in order to show that he, as the offspring of worthy forbears, could fitly and worthily perform the sacred action. It was a law that the number of the *ṛṣeyas* or *pravara-ṛṣis*, whose names were thus pronounced, might be one, two, three, or five, but no other.¹⁰ Thus, e.g., of the *gotras* specified as descendants of Jamadagni in the above list from

¹ Cf. Ludwig, *Die Mantrallitteratur*, p. 178.

² xiv. 5. 2. 6. For the *saptarṣayas*, cf. also the passages quoted in Böhtlingk-Roth, *Sansk. Wörterb.*, St. Petersburg, 1855-75, s.v. 'Ṛṣi'.

³ *Āśvalāyana Śrauta Sūtra*, parīṣiṣṭabhāga 8.

⁴ *Āśv. Śr. S.* xii. 10. 6 ff. Cf. Max Müller, *Hist. of Ancient Skr. Lit.*, London, 1860, p. 380 ff.

⁵ *Śābdakalpadrūma*, s.v. 'Gotra'.

⁶ Chentsal Rao, *The Principles of Pravara and Gotra*, p. III.

⁷ According to the *Gotrapravaranirṇaya* (in Anantadeva, *Saṃskṛakavastuḥa*, Bombay, 1861), the Kevala-Bhṛigus comprise the following six families: Vatsas, Arjīṣeṭhas, Yaśakas, Mitravyas, Valpyas, and Sunakas, while the Kevala-Aṅgīrasas are also six in number, viz. Haritas, Kutasas, Kaśyapas, Rathitaras, Viṣṇuviddhas, and Mudgalas.

⁸ Cf. Gārgya Nārāyaṇa to *Āśv. Śr. S.* xii. 10. 5. The *dvigotra*, i.e. a person who belongs to two *gotras*, must, according to *Sākh. Śr. S.* i. 4. 16, in performing the *pravara*, utter the names not of three, but of six ancestors; this is the case of the so-called *kṣetrāja*, the son lawfully begotten of the wife of a childless man, and therefore belonging to the *gotra* of his bodily as well as to that of his adoptive father. Cf. the section 'dātavyam' in the *Pravaraḍṛṣṭya* of Kamalākara (Chentsal Rao, *op. cit.*, pp. 180-186); see, further, the *Kaṣṭhīya*, ed. Shama Sastry, Mysore, 1909, p. 164.

¹ The Indian lexicographers explain *gotra* as synonymous with: *santati* ('lineage'), *janana* ('race'), *kula* ('family'), *abhijāna* ('descent'), *anvaya* ('progeny'), *vanśa* ('race'), *anvāyā* ('lineage'), *santāna* ('family, offspring') (Amarakośa, 2. 7. 1). The meaning *ākhyā* ('name') has apparently been developed from that of 'family', 'family name'. In the *Rigveda*, *gotra* means simply 'cow-stall', 'stall'. Pāṇini (iv. 1. 162 f.) uses the word in a grammatical sense, with which the present article has nothing to do, its aim being to deal with *gotra* in its purely sociological aspect, i.e. as 'family' or 'race'. On the probable connexion of this meaning with the Vedic sense of 'cow-stall', cf. G. Sankar, *Hindu Law*, Calcutta, 1903, p. 49 f.

² *Taittirīya Brāhmaṇa*, i. 2. 3, 9.

³ *Matyopapurāṇa*, excv. 8 ff. For other versions of the legend regarding the origin of the Brāhman caste, cf. J. Muir, *Original Sanskrit Texts*, i. 3 (London, 1868) 7 ff., and the art. Bhṛigu, in vol. II. p. 558.

the *Āvalāyana Śrauta Sūtra*,¹ the Vatsas invoked Agni as Bhārgava, Chyāvāna, Āpnāvāna, Aurva, and Jāmadagnya; the Arṣiṣeṇas, as Bhārgava, Chyāvāna, Āpnāvāna, Arṣiṣeṇa, and Ānūpa,² and so forth.

The Kṣatriyas and the Vaiśyas, according to the Brāhmanical theory, were required to pronounce the *pravara* of their *purohita* (domestic chaplain). Similarly, if sacrifice was offered by a king, the officiant named not the king's ancestors, but those of his *purohita*; though the king's *rājārṣi* forbears might also be named.³ According to other sources, however, the *pravara* was firmly established among both the Kṣatriyas and the Vaiśyas—Mānava, Aila, and Pauruṣava being named as the *arṣeṇas* of the former, while Agni was invoked by the latter as Bhālandana, Vātsapri, and Mānkila.⁴

To the above-mentioned *pravara* lists are annexed specific discussions regarding the *gotras* between which intermarriage was permitted or forbidden. In general, persons belonging to the same *gotra*, or having the same *pravara*, are not allowed to marry one another. The recognized rule is that individuals are regarded as *sagotra*, i.e. belonging to the same *gotra*, if they have in common even one of the *ṛṣis* invoked in the *pravara*.⁵

A Kāśyapa, for instance, must not marry the daughter of another Kāśyapa; but he is likewise prohibited from marrying the daughter of a Saṅḍila, as the *pravara* group of the Kāśyapas (Kāśyapa, Avatsara, and Asita) and that of the Saṅḍilas (Saṅḍila, Asita, and Daivala) contain a common ancestor, Asita. The *gotras* of the Bhṛigus and the Aṅgiras are in part exempt from this rule. Thus, of the seven *gotras* tracing their descent to Bhṛigu, the Śyaltas, Mitrayas, and Sunakas may intermarry; and, similarly, the Pṛisadaśvas, Mudgalas, Viśuvriddhas, Kaṇvas, Agastyas, Haritas, Saṅkritā, Kapils, and Yaskas may all marry with one another, as also with the Jāmadagnyas, etc.⁶

2. The data regarding the *gotras* in ancient India.—It is hardly possible to decide how far the legendary and theorizing traditions of the Brāhmanas, and more especially the *pravara* lists, contain historical elements corresponding with the actual facts of genealogy. The proto-ancestors of the *gotras* must be regarded, not indeed as real personalities, but certainly as eponyms whose existence was taken for granted, and to whom the entire spiritual heritage of the priestly tribe was ascribed. We must assume that the hereditary character of the priesthood was already recognized in the Vedic period; such songs, religious traditions, and sacrificial customs as had come to be linked with the name of a particular *ṛṣi* were in the post-Vedic age vested in the *gotra*.⁷ The determining condition of joint-membership in any given *gotra* was spiritual connexion and inheritance, mere physical descent being of less importance; for, though the *gotra* was transmitted from father to son, yet not all members of a *gotra* were blood-relations.

Many a Brāhman, when asked by his *guru* to what *gotra* he belonged, could only answer, like Satyakāma, the son of Jabāla: 'I know not, teacher, of what *gotra* I am.' In such cases the teacher gave his pupil a name taken either from a deity or from a constellation, and also, as some writers say, the name of a *gotra*,⁸ and we must suppose that the pupil thenceforward regarded himself as belonging to the *gotra* thus imposed.

The dubiety as to physical descent made it necessary to formulate the rule that, if the *pravara*

¹ *Āṭv. Śr. S.* xii. 10. 6 f.

² A collection of the traditional *pravara* lists, differing considerably from one another, is given by Puruṣottama in his *Pravaramahatī* (reproduced in Ohtsental Rao, *op. cit.* pp. 1-125); cf., further, the section *Gotrapravaranirṇaya*, in Anantadeva, *Saṃskṛtakautubha*, p. 179 ff.

³ As required, e.g., by *Āitareya-Brāhmaṇa*, vii. 25, and *Saṅkh. Śr. S.* i. 4. 17; cf. Weber, *Ind. Stud.* x. 78.

⁴ Baudhāyana, quoted by Puruṣottama, *Pravaramahatī* (art. Ohtsental Rao, *op. cit.* p. 126). See *Āṭv. Śr. S.* xii. 15. 4, 5; but cf. the variations in *Āpastamba Śr. S.* xxiv. 10. 11-18.

⁵ *Āṭv. Śr. S. Parīṣiṣṭabhāṣya*.

⁶ *Ib.*; cf. Max Müller, *op. cit.* p. 887 f.

⁷ Ludwig, *Mantralliteratur*, p. 178.

⁸ Chāṇakya, *Arthśāstra*, iv. 4. 4.

⁹ *Gobhiliya Gṛhya Sūtra*, ii. 10. 23-25; cf. Weber, *op. cit.* p. 72.

was not certain, then—even in the case of a Brāhman—the only ancestor to be named was Manu, the common progenitor of all.¹

But, although the purely spiritual relationship took precedence in the *gotras*, the system of relations based upon community of ancestors, whether assumed or real, was not without influence on practical life. The above-mentioned regulations of the Brāhmanical ritual literature, enjoining that the Brāhmanas, after completing their period of study, should, on kindling the sacred fire, perform the *pravara*—i.e. the rite of calling upon Agni under the name of three or five ancestors—doubtless correspond with actual practice. And, while many a mythical ancestor might be foisted into the *pravara*, yet those elements of the ritual in connexion with which father, grandfather, and great-grandfather had to be mentioned by name forced the members to keep alive the knowledge of their ancestors from generation to generation,² and thus tended to give a certain fixity to the genealogical relations of the various families. There were several other circumstances which intensified the exclusiveness of the families already fused into a unity by belonging to the same *gotra*, and thus separated the different *gotras* more or less rigorously from one another.

An external indication of membership in a particular *gotra* has been found in the mode of wearing the hair. The Bhārgavas had the head shaven; the Aṅgiras were five braids, the Atris three curls, and the Vasiṣṭhas, according to the *Rigveda*, wore a plait on the right side of the head.³ An injunction referring to the ceremony of hair-cutting, found in the *Āvalāyana Gṛhya Sūtra*,⁴ viz. 'Let him have his hair dressed according to the custom of the family,' points to a family custom that was, no doubt, connected with the practice of distinguishing the *gotras* by the mode of dressing the hair. In other *Gṛhya Sūtras* it is stated that the style of wearing the hair is determined by (family) custom, or *yatharṣi*.⁵ The commentators explain the expression *yatharṣi* as signifying that the number of curls worn corresponds to the number of *ṛṣis* named in the *pravara*; thus, one for those who had one *ṛṣi* in their list of ancestors, two for those who had two, and so on.⁶

The deep-seated antagonism between the Vasiṣṭha and the Viśvāmitra septs, which, according to tradition, arose out of the famous conflicts between their respective ancestors, but which was in reality an expression of the struggle for supremacy between the nobility and the priesthood,⁷ is frequently referred to in the literature.

According to Kātyāyana, a Viśvāmitra and a true Vasiṣṭha cannot both take part in the same *sattra*, i.e. in a soma-sacrifice which has more than twelve days of soma-pressing.⁸ Similar differences with respect to the ritual are to be met with elsewhere; thus the Vasiṣṭhas and the Sunakas recognized Nāradaśas as their second *prajāda*-deity, while most of the septs invoked Tanūnapāt. The *apṛiṣṭikānti* ('propitiatory hymns') were different for each *gotra*; thus, e.g., that of the Sunakas was 'Agni is kindled,' that of the Vasiṣṭhas 'Enjoy our fuel,' etc.⁹ There was also diversity among the *gotras* as to the manner of cutting the sacrificial object (*havis*), the rice-cake. Among the Jāmadagnis the rule was to cut the cake in five pieces, among the other *gotras* in four. The practice of the Jāmadagnis was followed by the Vatsas, the Vidas, and the Arṣiṣeṇas, who are likewise referred to as *pañcānattinas*, 'making five cuts.'¹⁰

As to the question how far these differences among the *gotras* affected their participation in the sacrifice, the Brāhmanical tradition varies. According to one view¹¹—the more rigid—only those Brāhmanas who observed the same ritual, i.e. were *ekakalpa*, could take part together in a *sattra*.

¹¹ *Āṭv. Śr. S.* xii. 10. 1.

Since, as was noted above, each *gotra* had its own *āpṛisikṭa*, and since in the *prayāja*-formulae some *gotras* recognized *Tandūnapāt*, others *Narāśarma*, as the second *prayāja*-deity, then, if the partakers in the sacrifice should belong to different *gotras*, the appointed formulae would not be in harmony with one another.¹ To this more stringent attitude, however, was opposed the view that the divergence of the *gotras* in such matters formed no obstacle to their joint performance of the sacrificial ceremony, inasmuch as the more important factor was community of rite,² and the minority must accommodate themselves to the majority; or else the participants simply follow the *kalpa* ('rule') of the *grihapati* ('householder').³

The gradual increase in the number of families laying claim to a common ancestor, and the uncertainty as to membership in a *gotra*, led with increasing frequency, as the present writer thinks, to a disregard of the condition that all participants in an *iṣṭi* ('sacrifice') should belong to the same *gotra*.⁴

The hypothesis that in an earlier age each *gotra* performed the religious rites by itself finds support in a passage of the *Maitrāyaṇi Sakhitā*⁵ which refers to the preparations for a sacrificial assembly, and says explicitly that those taking part in the ceremony proceed by *gotras*: "Thou art a cover for every one"—with these words he sets up the roof; for they proceed *gotra* by *gotra*.⁶ Clear indications of the existence of a *sacrum gentilicium* may be discerned also in the fact that, in the *agnistoma*,⁷ the *samapimraṣa*, *amāyasa* or *jāṭis* ('relatives') of the person offering are invited to take part—his wife, sons, grandsons, and brothers: the *Adhvaryu* is grasped by the sacrificer, the latter by his wife, she by his sons, they by his grandsons, and these, finally, by the *jāṭis*.⁸

As regards the *brādhā*, the funeral rite performed in honour of the dead, likewise, it seems natural to suppose that joint-membership in a *gotra*—that of the dead—was a necessary condition of participation. The *Baudhāyana Grihya Sūtra*,⁹ in opposition to the *Dharmasūtras*, grants the possibility that the *Brāhmins* to be invited to the *brādhā* might be connected by blood, *gotra*, learning, and virtuous conduct, and we may perhaps recognize here the older phase of the ritual.

In course of time there seems to have been evolved the regulation—given both in the *Grihyasūtras*¹⁰ and in the *Dharmasūtras*—that the *Brāhmins* to be invited should not be connected either by blood, or by *gotra*, or by *mantras*. It is nevertheless quite certain that the *gotra* was a far from unimportant factor in the *brādhā*.

In the *śkoddistābrādhā*, the funeral rite performed on behalf of a single individual, according to the *Śrādhābandhī*¹¹ a food-ball (*pīṇḍa*) was offered to the departed, and his personal and *gotra* names were uttered along with the words, 'This food for thee!' According to the *Vīṇḍu-śrādhā*, the food offered by the proper persons to forefathers, with utterance of their names and *gotra*, became a meal for the *manes*.¹² Similarly, in the *udākakarma* ('libation of water') for the deceased, a handful of water was poured out, and his personal and *gotra* names were pronounced: e.g. 'Devadatta, of the Kāśyapa *gotra*, this is thy water.'¹³

But the diversity of *gotra* in relation to ritual had not so profound an influence upon practical life as had the rules prohibiting marriage between members of the same *gotra*, or intermarriage between certain groups of *gotras*. These singular and rigorous ordinances likewise seem to have been a growth of later times. In the *Rigveda* we find no prohibition of marriage between relatives. On the contrary, it would seem rather, as, e.g., from *Satapatha Brāhmaṇa*, i. 8. 3, 6, that marriages between members of the same family were of common occurrence in the ancient period. The union of men and women descended from the same ancestor, and

of blood-relations in the third and fourth degrees, is represented as being a general practice.¹ But even by the time of the *Grihyasūtras* we find that marriage outside one's own *gotra* had come to prevail: Gobhila² expressly says that a pupil who has completed his study of the Veda should, with his teacher's consent, take as a wife one who does not belong to his own *gotra*. Hiranyakeśin³ likewise recommends marriage with one of another *gotra*; and with this agrees the *Mānavagrihya-sūtra*,⁴ which, however, expresses the regulation in different terms, requiring that the series of ancestors invoked in the sacrifices shall not be the same for both husband and wife.

The prohibition of marriage within one's own *gotra* had manifestly become the rule by the time of the *Dharmasūtras*: thus, in the code of Manu we find that a maiden who is not related by blood on her mother's side, and does not belong to the same *gotra* on her father's, is recommended to the twice-born as eligible for marriage and the community of the household ceremonies;⁵ *Āpastamba*⁶ forbids a father to give his daughter to a man of the same *gotra* as himself, while Gautama and Vasiṣṭha permit marriage only between those who have not the same *pravara*.⁷

Presumptive evidence to the effect that marriages within the *gotra* were prohibited in the 3rd cent. B.C. is found in the *Kautiliya*, the author of which, as we may assume on the ground of Jacobi's convincing elucidation, was the minister of Chandragupta, the founder of the Maurya dynasty.⁸ In that work the head of a house is charged to live by his calling, and to marry girls of his own caste, but of a different *gotra*.⁹

These requirements could not, of course, fail to affect the customs connected with marriage, and, more particularly, with courtship. According to *Sāṅkhāyana Grihya Sūtra*, i. 6. 4, the deputy-suitors when proposing marriage to a girl announced the *gotra* names of bridegroom and bride—obviously in order to show that there was no legal obstacle to the proposed union.

Nevertheless, it seems doubtful whether the regulations were strictly obeyed. It was at all events found necessary, even in theory, to grant exemptions: thus, certain *gotras* had the right to intermarry with all other families. These *gotras*, as we have seen, were above all the so-called Kevala (or separate) *Bhārgavas* and *Āngirasas*, belonging to the *gentes* said to be descended from *Bhṛigu* and *Āngirasa*.

It was clearly no fortuitous or arbitrary circumstance that the right of exogamy should be conceded to the descendants of *Bhṛigu* and *Āngirasa* in particular. The *Bhārgavas* and *Āngirasas*, in virtue of their relation to the *Ātharvaveda*, were more closely allied to the warrior than to the *Brāhmaṇa* caste; even according to the *Brāhmaṇical* tradition they belong, together with the *Kāśyapas* and the *Vasiṣṭhas*, to the *mūla-gotrāṇi*, the original and truly ancient *gotras*; while the other *gotras*, as the *Mahābhārata* puts it, became great by the merit of their works.¹⁰ In this passage we light once more upon the antagonism that prevailed between certain *gotras*—an antagonism which was in no sense confined to the matters of ritual already referred to, but made itself felt also in political life. That rivalry for political supremacy was the main factor in the conflicts between the *Vasiṣṭhas* and the *Vaiśāmitras* need hardly be doubted. The former were in possession of a secret doctrine, a *brāhmaṇam*—the twenty-nine *śtomahāga*-maxims—and it was on this account that the *Bharatas* always chose their *purohita* from among the *Vasiṣṭhas*.¹¹

The struggle for the influential and lucrative office of *purohita*,¹² the all-powerful adviser of the

monarch and the ruler of the national fortunes, seems to have intensified the mutual antagonism of the *gotras*. While the *Vasiṣṭhas*, by reason of their knowledge of the *stomabhāga*-maxims, seemed to the *Bharatas* the most eligible candidates for the office, other *gotras* also made the same claim on the ground of their distinctive scholarship, as, e.g., the *Ātreyas*¹ on account of their familiarity with the *Rigveda*, the *Kāśyapas* on account of their knowledge of the *Sāmaveda*, and so on. To each *gotra* pertained a particular deity and a particular Veda.² It is obvious that the followers of the *Atharvaveda*, the magic songs of which are in very many cases designed to meet the needs of kings, had the best chances in the competition for the post of *purohita*. As the *Atharvaveda* was associated in the closest way with the warrior caste,³ the *gotras* which adhered to that work stood in the most intimate relations with the king. In the *Parīṣiṣṭas* to the *Atharvaveda* the claim of these *gotras* to the office of *purohita* is vindicated in the most positive terms against the rivalry of the others:

'Let the prince who would conquer the whole world in a just manner choose as his teacher (*guru*=*purohita*) a *Bhārgava* endowed with learning and good qualities.' 'An adherent of the *Rigveda* (*bahvriha*) surely destroys his kingdom; an adherent of the *Yajurveda* (*adhvaryu*) would bring his sons to ruin; an adherent of the *Sāmaveda* (*ekhandoga*) would occasion loss of fortune; and therefore let the teacher (i.e. the king's *purohita*) be an adherent of the *Atharvaveda* (*ātharvaṇa*). Whosoever through ignorance or negligence has an adherent of the *Rigveda* as teacher suffers the loss of country, supremacy, city, and minister—of this there is no doubt; or, if a king appoints an adherent of the *Yajurveda* to be his *purohita*, then, when his money and his property are gone, he will be speedily killed by force of arms. As little as a palsied man [makes] his way, as little as a wingless bird [reaches] the ether, just as little does a king attain to power and honour by having as his teacher an adherent of the *Sāmaveda*. If the teacher be a *Paippalādi*,⁴ who knows the [*ātharva*] *Veda*, the kingdom will increase in money and corn: of this there is no doubt.'⁵

If we may assume from the foregoing that the *gotras* tracing their descent to *Bhrigu* and *Angiras* were closely connected with the warrior caste, whether in virtue of their standing as *purohitas* or in virtue of blood-relationship, we have, on the other side, good reasons for supposing that the *Kṣatriyas* and, more particularly, the princely families of ancient India were regarded as belonging to the *mūlagotrāni*.

In accordance with the Brāhmanical theory, as already noted, the priest, when performing a sacrifice offered by a king, named either the *rājara* ancestors of the king himself or the ancestors of his *purohita*. If sometimes the arrogance of the priests led them to regard their own ancestors as more worthy to be named than the king's, yet the inference that some have drawn from this, viz. that the *gotra* of the *purohita* was transferred to the king whom he served, must be rejected without qualification.⁶ When the Buddha, a scion of the *Sākya* family, called himself *Gautama*, it was not because among the *Sākyas* the office of the *purohita* was vested in the *Gautama* sejit, but because the *Sākyas* traced their origin to *Gautama*, the descendant *Die soziale Gliederung im nordöstl. Indien*, Kiel, 1897, pp. 107-117.

¹ The *gotra* of the *Ātris* was held in special honour; cf. Weber, p. 89.

² This is still the case at the present day. In a modern list (*Gotradāni: A list of Brahman Gotras*, Allahabad, 1894) we find the following categories attached to each *gotra*: *veda*, *upaveda*, *śākhā*, *nitra*, *pravara*, *śikṣā*, *pāda*, *devatā*; thus, the *Bhāradvāja* *gotra* has as its *veda* the *Yajurveda*; as its *upaveda*, the *Dharmurveda*; as its *pravara*, *Āṅgiras*, *Bārhaspatya*, *Bhāradvāja*; as its deity, *Śiva*.

⁶ Cf. Weber, pp. 78, 79; Oldenberg, *Buddha*, Berlin, 1881, p. 421; *Dialogues of the Buddha*, tr. T. W. Rhys Davids (*Sacred Books of the Buddhists*, II.), London, 1899, p. 195 f.

ant of *Angiras*, and because they prided themselves on belonging to that *mūlagotra*, and in the fact that their family acted as custodians of the religious traditions connected with the name of *Gautama*. Not only the Buddha himself, but also his father, and even his cousin *Ananda*, were addressed as *Gotama*; while *Mahāpajāpati* and her sister *Māyā*, both belonging to the *Sākya* family (*kula*), bore the name *Gotamī*.¹ That it was customary, in addressing the individuals in question, to use, not the *kula* name (*Sākya*), but the *gotra* name (*Gautama*),² shows how high a value was set—precisely in the ranks of the *Khattiya* (*Kṣatriya*)—upon membership in one of the ancient *gotras*. This finds expression also in a verse which frequently recurs in Buddhist *Suttas*: 'The *Khattiya* is regarded as best among people who set a value on *gotta*.'³

For an adherent of Buddha's teaching, who chooses to renounce the world, the privilege of belonging to a *gotra* signifies, of course, as little as caste. When the Brāhman *Sundarika* of the *Bhāradvāja* *gotra* asked of the Blessed one a question regarding his *gotra*,⁴ the latter replied:

'I am not a Brāhman, or the son of a king, or a *Vessa* (*Skr. Vaiśya*); having taken as [my] *gotra* [that] of common people, I wander about in the world, without possessions, meditating. Clad in a *sanghātī*, I wander about houseless, with my hair shorn, tranquil, not consorting with men in this world. Inopportunist, O Brāhman, dost thou make inquiry of me regarding my *gotra*.'

Still, the disparagement thus cast upon the *gotta* does not in the least alter the fact that the followers of Buddha were for the most part of eminent lineage, springing from princely, Brāhmanical, and other distinguished families, and that accordingly such *gotra* names as *Opamañña*, *Kaṇhāyana*, *Mogallāna*, *Kassapa*, *Kandāryana*, *Kondañña*, *Vāseṭṭha*, *Vessāyana*, *Bhāradvāja*, and *Vachchhāyana* occur in the Pali Canon with special frequency.⁵

That the *gotras* were in no sense a purely Brāhmanical institution is borne out, further, by the sacred writings of the Jains. *Mahāvīra*, the founder of this sect, and, like Buddha, a member of the *Kṣatriya* caste—the feudal aristocracy⁶—belonged to the *Kāśyapa* *gotra*; and, of course, *Siddhārtha* his father, *Supārśva* his paternal uncle, *Nandivardhana* his eldest brother, and *Sudarśanā* his eldest sister were all likewise *Kāśyapas*. On the other hand, *Trīśālā*, the mother of *Mahāvīra*, was of the *Vasiṣṭha* *gotra*, *Yaśodā* his wife a *Kaundinyā*, while his daughter, who, while still unmarried, was, of course, a *Kāśyapa*, passed by marriage into her husband's *gotra*, and her daughter, the grandchild of *Mahāvīra*, was of the *Kausika* *gotra*.⁷ Thus the traditions of the Jains likewise lead us to infer that the *Kṣatriya* families set as high a value upon *gotra* as did the Brāhmins, and that they observed the injunction against marriage within the *gotra*;

¹ In the *Suttantapitakha*, *Pācittiya* II. 2 (*Vinaya Pitaka*, ed. Oldenberg, I. 81.) the *Gotama* *gotia* (Pali; *Skr. gotra*) is ranked among the higher, and others, as, e.g., the *Bhāradvāja* *gotia*, among the lower (cf. Oldenberg, 'Zur Gesch. des ind. Kastenwesens,' in *ZDMG* li. (1897) 281 f.). The fact that the *Sutta-Nipāta*, III. 1, line 428, gives *Adichchā* (= *Skr. Ādiṭya*, the sun-god) as the *gotra* name of Buddha probably implies no more than the claim of a Divine origin for the *Sākya* family.

² On the use of the *gotta* (*gotra*) name instead of the personal name, cf. the examples quoted by Rhys Davids, *op. cit.* p. 195 f. Examples of the practice are found also in the *Jātakas*; thus, in the *Sarabhaṅgajātaka* (*Jāt.*, ed. Fausbøll, v. 125 ff.), *Sarabhaṅga* the ascetic is addressed by his *gotra* name *Kondañña* (= *Skr. Kaundanya*); and in the *Alambusajātaka* (*Jāt.*, ed. Fausbøll, v. 162 ff.), *Isisīṅga* (= *Skr. Risyasiṅga*) by his *gotra* name *Kassapa* (*Skr. Kāśyapa*). In Sanskrit poetry it is a favourite rhetorical device to let the husband or lover make the mistake of addressing his wife or sweetheart by the name of some other mistress; cf. *Kumārāśambhava*, IV. 8. Similarly, *Raghuvamśa*, xix. 24; *Vāsavadattā*, tr. Gray, New York, 1915, p. 65. These passages likewise seem to the present writer to imply that it was the custom to address a person by his *gotra* name.

³ Oldenberg, *Buddha*, p. 421; cf. E. Flok, *op. cit.* p. 58.

⁴ *Sutta-Nipāta*, III. 4, ed. Fausbøll, pt. I. p. 80.

⁵ Rhys Davids, *op. cit.* p. 193.

⁷ *Ib.* 198 f.

for the family of Mahāvira was connected neither by *gotra* nor by *pravara* with the two families with which, as just indicated, they intermarried.

In the list of the Sthāviras,¹ the earliest adherents of Mahāvira, we find, of *gotras* known to us from the Brāhmanical literature, the following: Agniveśyāna, Kāśyapa, Kāśyāyana, Vatsa, Tungikāyana, Māthara, Prāchīna, Gautama, Allāpatya, Vasistha, Vyāghrāpatya, Kaudika, Utkrīṣṭa, Bharadvāja, Kuṇḍala, Hārta, Kautsa, and Suvrata. Now it is certainly worthy of note that a large number of the *gotras* enumerated in this list, and in the list from the Pali Canon given above, belong by origin to the Āngirases, or else, *e.g.*, the Vatsas, trace their descent to Bhrigu; while others, such as the Vasesthas (Vasisthas) and Kondaññas (Kaṇḍīnyas), claim to be descendants of Vasistha, or—as the Kassapas (Kāśyapas), Opamaññas (Aupamanyas), Mogallānas (Maudgalyānas)—of Kāśyapa, so that the great majority of the *gotras* in question fall within the group of *mūlagotrānt*. The Kaudikas alone trace their descent to Viśvāmītra, while descendants of Atri or Agastya, so far as the present writer has observed, are never mentioned among the followers of Buddha or Mahāvira, either in the Pali Canon or in the Jain literature.

In the inscriptions of the *stūpa* of Bhārhut, the donors of the various gateways and pillars are mentioned by name, and in their names we find the same linguistic elements as appear in the names given by the Pali Canon,² *i.e.* names of places, persons, and *gotras*, as also metronymies—the latter, again, being compounds of a *gotra* name with the word *putra* ('son').³ They are mainly names of kings, and the annexed metronymic serves, by means of the mother's *gotra* name, to distinguish a particular king from other sons of his father.⁴ The *gotra* names occurring in such metonymies are names like Gārgya, Kautsa, and Vatsa, and thus the *gotras* here concerned are those found, as we saw above, if not exclusively, yet with unusual frequency, in the ranks of the Kṣatriyas.

In addition to the Kṣatriyas, however, isolated members of the third caste—wealthy Buddhist laymen—are also mentioned in the inscriptions, as donors. But in these cases the *gotra* name is not added. Nevertheless, the present writer is inclined to think that even here the theory according to which, as we have seen, both *gotra* and *pravara* had a recognized place in the Vāśya as in the higher castes corresponds with the actual facts. We must certainly not attach too much importance to the case of the potter with the *gotra* name Bhagava mentioned in the *Kumbhākīra-Jātaka*;⁵ but it is to be noted that the Kumbhars, the modern potter caste of Bengal, Behār, and Orissa, have *gotras* with such Brāhmanical names as Kaṇḍīnya, Kāśyapa, *etc.*;⁶ and, further, when we read in the *Sutta-Nipāta* (ii. 7. 32) not only of the *Khattiya* and the *Brahmabandhu*, but also of others, as being protected by their *gotra*, we seem to be forced to the conclusion that these *gotra-rakkhita* were eminent middle-class families.⁷

3. *Gotra* in India at the present day.—Just as the system of caste, in its main features (endogamy and hereditary calling), survives unchanged to the present day, so the state of things in relation to *gotra* is, among the Brāhmins at least, the same to-day as it was in ancient times. The Brāhmanical *gotras* are still eponymous sections named after the Vedic *ṛiṣis*, and each section is exogamous. Among the Brāhmins, as in the inferior castes, blood-relationship is traced in the male line, and carefully constructed tables of the degrees of relationship have been prepared for the purpose of guarding against prohibited unions,⁸ while evidence is adduced at marriage to show that bride and bridegroom are not related within the forbidden degrees. It is obvious that the observance of the religious ceremonies in which the Brāhman was required to pronounce the names of his ancestors must have tended to keep the *gotra* system essentially unchanged; as every Brāhman repeats his *pravara* three times a day—at morning, noon, and evening prayer—the fact of his belonging to a certain *gotra* is constantly kept before him. How far the prohibitions of marriage which are based upon *gotra* and *pravara* are still observed among the Brāhmins would seem, how-

ever, to be largely a matter of local distinctions.¹ P. Chentsal Rao, in the work already cited,² writes on this point as follows:

'No case has as yet come before the courts in which the question of the validity of a marriage between Brāhmins belonging to the same *Pravara* or *Gotra* is involved; but when a case of the kind does come before them, as no doubt it will sooner or later, they will have to consider whether by a too rigid enforcement of an ancient rule which has lost, by change of circumstances, much of its meaning, they will not be throwing obstacles in the way of the progress of the community.'

So far as the India of to-day is under the influence of Hinduism and dominated by Brāhman culture, so far likewise has the *gotra* system gained a footing, even in the non-Brāhman castes. The Rajputs, who claim to be the legitimate successors of the Aryan Kṣatriyas, are divided into a great many clans or tribes, each tracing its origin to some ancestor of renown; many of them even boast of a Divine origin, *as, e.g.*, the Suryavahśi, who trace their descent to the sun, and the Somvahśi, who similarly claim to be the offspring of the moon.³ The Rajputs, taken as a whole, *i.e.* a caste, marry only within their own ranks; no Rajput may marry a woman who is not of the Rajput class. In the several clans, however, the system of exogamy is so constituted that the males must find their wives in clans other than their own. Thus a man of the Rathore clan must not marry a woman of even the most distantly related families bearing the Rathore name; and, should he defy this ordinance, the children of the marriage are not accounted pure Rathores.⁴

The Jāts, who likewise consider themselves to be descendants of the Kṣatriyas, and in many respects stand on an equality with the Rajputs, are as a tribe strictly endogamous, but they resemble the Rajputs also in being divided into *gentes* or *gots*, and these, again, are exogamous. The Deswal, Man, Dalal, and Siwal *gentes* of the Jāts are of common descent, and must not intermarry; and the like holds good of the Mual, Sual, and Rekal *gentes* of the Rajputs.⁵

The question whether the totemism that is so characteristic of the lower Indian *gots* prevails also among the superior races of the Panjāb, *i.e.* whether the latter also observe certain tabus regarding plants, animals, or other objects revered by them, is difficult to answer with absolute certainty. In reference to this point H. A. Rose writes as follows:

'A few instances have apparently survived among the Aroras, and there are possibly stray cases among the Jāts of the south-eastern plains, the Gujars, Rajputs, and other castes, even the Khatris, but the evidence is not conclusive, for little but the names remain, the instances of respect paid to the totem itself being few and uncertain.'⁶

Much more distinct traces of totemism are met with among the highly organized Vāśya castes, *as, e.g.*, the Komatis, the great trading caste of Mysore. If an individual of this caste wishes to eat a fruit which is tabu for him, he may do so only on condition that he performs every year in Gayā (*q.v.*) the funeral ceremonies for his totemistic ancestor.⁷ The more highly developed—the more completely Hinduized—a caste is,⁸ the more do its *gotras* resemble the eponym *gotras* of the Brāhmins, and we may venture to believe that the resemblance is due not so much to an actual community of descent

¹ A Sakaldipi Brahman, *e.g.*, of South Behar, may marry within his Gotra. 'A marriage may take place among the Barwars of the Panjab within the Gotra.' Jogendra Nath Bhattacharya, *Hindu Castes and Sects*, Calcutta, 1896, pp. 48, 56).

as to the desire of complying with the rules formulated by the theory.

Among the lower Hindu castes and the indigenous hill-tribes, and especially among the Dravidian peoples of S. India, we find almost universally a system of subdivision into small exogamous groups—in part also known as *gots* (= *gotras*)—akin to that of the Brāhmanical *gotras*.¹ They resemble the Brāhmanical clans in recognizing descent in the male line, so that children belong to the father's *gotra*, not the mother's, while a woman passes by marriage into the *gens* of her husband, and persons of the same *gotra* cannot marry one another. These groups are distinguished from the *gotras* of the higher castes, however, by their undisguised adherence to totemism. Each of the exogamous clans bears the name of an animal, tree, plant, or some other natural or artificial object, and the members of the clan are not allowed to eat, to cultivate, to burn, to carry, or in any other way to make use of that particular object. Thus—to give a few specially characteristic examples—all the Bhils venerate totems, and avoid injuring or using them, and, when they pass their totem, they make a ceremonious bow, while the women veil their faces. Of the Bhils, the Ava clan takes its name from its totem, the moth, and its members do not injure moths. Among the Gollas, a large shepherd caste of the Telugu people, the members of the *gotra* called Raghindala (*Ficus religiosa*) are prohibited from using the leaves of the sacred fig-tree as plates for their food. Of the exogamous *gotras* of the Kurabas—a caste of peasants, shepherds, weavers, and masons—who are said to be of totemistic origin, and retain their totemistic character to the present day, the Arisāna *gotra* is of peculiar interest. The name 'Arisāna' means 'saffron' (turmeric), which was originally tabu to them; but, as this led to much inconvenience, they substituted the *korra* grain for saffron, though still retaining the original name of their *gotra*.²

4. Origin of the *gotras*.—The sociological sense of the term *gotra* has been derived from the Vedic usage ('cow-stall') as follows. In ancient times the Indian family, even when—in consequence of its numerical increase—its property had been greatly subdivided, would still continue to use and occupy jointly the land reserved for grazing cattle; and we may therefore conclude, it is said, that the Brāhmanical *gotra* was in its origin simply a community of this kind, i.e. a family whose members enjoyed joint-rights in a particular pasturage.³ But this hypothesis does not in any degree account for the most characteristic features of the *gotra*, which, in fact, can be explained only by comparison with the *gots* of the aboriginal tribes of India.

In view of the remarkable correspondence which, notwithstanding fundamental differences, exists between the eponymous Brāhmanical *gotras* and the totemistic *gots* of the inferior castes, the question naturally arises whether, as is the case with caste,⁴ the structure of the *gotra* system, too, is in some degree the result of an inner connexion, a process of reciprocal influence, between the higher and the lower races. It is certain, for one thing, that the Brāhmanical theory—the desire on the part of the lower races to observe its regulations, and in this way to invest a particular caste with a higher dignity—has tended to assimilate the *gots* of the lower castes and the native tribes to the Brāhmanical *gotras*. But, conversely, the latter seem to have acquired their peculiar character only by contact with the Dravidian tribes; for, as the practice of exogamy is the common

feature of all *gotras*, whether of the higher or of the lower castes, and as it finds no mention in the Veda,⁵ it must have come to prevail only after centuries of development, and possibly as a result of the fusion of Aryan and Dravidian tribes. Now, exogamy is intimately related to totemism, and might gain ground even among the Brāhmanical *gotras* all the more easily because totemistic ideas, whether inherited from remote ages or adopted from the aboriginal peoples, were not unknown among the Brāhmins themselves. Among the names of peoples found in the Veda, a number are taken from animals and plants, as, e.g., the Matsya (fishes), the Aja (goats), Sigrū (horse-radish), etc. Of the Brāhmanical *gotras*, the Kāśyapas, whose name signifies 'tortoise,' trace their origin to a being closely connected, or even identified, with Prajāpati; their tribal ancestor was Kūrma—another word for 'tortoise'—in whose person Prajāpati formed all created things. The legendary progenitor of the Sagarid *gens*, King Ikṣvāku, whose name means 'gourd,'⁶ and seems to point to a tabu relating to this fruit, is a descendant of Kāśyapa. The *gotra* of the Kaundīnyas, which traces its descent from Vasiṣṭha, and to which belonged, as we saw above, the wife of Mahāvira, the founder of the Jain sect, takes its name, as does the *gotra* of the Kapis, from the ape; and in the passage of the *Kacchapaṇḍitaka*⁷ where it is said to the tortoise which had fastened upon the genital parts of an ape, 'Tortoises are Kāśyapas, apes are Kaundīnyas; Kāśyapa, let go the Kaundīnya, thou hast effected copulation,' we have an allusion—in terms of the beast-fable—to the matrimonial relations subsisting between the two human families.⁸ If, then, as seems probable from the foregoing, totemistic ideas were not unknown among the ancient Indian *gotras*, it becomes quite intelligible that ancestor-worship and exogamy, as found among the less civilized aborigines, should have come to prevail in these *gotras* as well. For, while the dissemination and pervasive influence of Brāhmanical culture in the conquered country is a fact beyond dispute, we must nevertheless not forget that, on the other hand, the primitive usages and ideas of the native races did not fail to operate profoundly upon the culture and development of the conquerors themselves.

GOVERNMENT.—In the treatment of this subject, attention has usually been directed to three main problems: (1) What is the origin of government? (2) In whose hands may the authority be vested, and in what way may its machinery be best exercised? Or, more shortly, What are the forms of government, and which is the best? (3) What is the sphere of government, or when is State interference justifiable? The last of these is a question comparatively new in the history of political discussion.

1. The origin of government.—Since, in the light of modern historical criticism, men like Lycurgus, Solon, and Numa Pompilius appear, not as the inventors of new laws, but rather as the

¹ The passage of the *Satapatha Brāhmana* already cited, in fact, directly implies the practice of marriage between blood-relations.

⁴ R. Fick, *op. cit.* p. 215.

reformers and codifiers of laws and customs already existing, we may set aside as legendary the accounts which the celebrated States of antiquity have given of their constitutions (wherein they ascribe these to the work of a single individual); and we find that three main theories, not very rigidly separated from one another, have been suggested of the foundation of sovereignty and the origin of government, or, in more general terms, the establishment of civil society. Of these, the first (a) traces government to the Deity. Of a State created by God and under His direct supervision this theory obviously affords a complete explanation, but it also applies to States which were only in an indirect sense thought of as founded by the gods and governed by them. Another form of this theory bases temporal sovereignty on a Divine right. The second main theory (b) founds government and sovereignty on the consent of the people expressed in an unwritten contract between them and their chosen sovereign, wherein they have reserved to themselves the right of resistance should he abuse the authority they have entrusted to him. According to the third and more modern view, (c) government is based upon expediency, and may be traced through different stages of development.

(a) The typically theocratic State (the word 'theocracy' first appears in *Jos. c. Apton*, ii. 17) is that of the Jews, which in the narrowest sense was the work of God's hand, and, by the conditions of its existence, was wholly sacred and inviolate. Founded by Jahweh and directly governed by Him, its kings were no more than His servants, who, being guided by His prophets, enjoyed no personal right of initiative. In this attitude, however, to their Creator, and in respect of the covenant which they had made with Him, the Hebrew people stand practically alone in history,¹ so that theirs may be looked upon as a State of a unique kind. With the Greeks and Romans it was different. There seems to have been a tendency to ascribe a supernatural descent to kings in Hellas, while in Rome they were usually chosen by popular election; but the people of both races, while believing in a Divine guidance, and seeking habitually by various rites and sacrifices to know the will of the gods and to propitiate their favour, yet looked upon this government as indirect and the State as a human institution, which men had great power to make or to mar. It cannot be said to have been otherwise regarded in the Middle Ages, although the tendency of mediæval opinion was to trace all power to God. For this was done in a spirit of piety, with no suggestion of a political theory: Church and State were held to be separate as Christ had separated them. After the Reformation it became common to read into certain lines of the NT a glorification of temporal sovereignty (1 P 2¹³). St. Paul required that every soul should be subject to the higher powers, for these are ordained, he said, of God (Ro 13¹). Forgetting that the Apostle referred to Nero, an Emperor of Rome who owed his election to a section of the people, forgetting, too, the words of Christ Himself (Mt 22²¹), the theologians of the time based upon this and similar passages, which exhorted the converted to good citizenship, a doctrine that kings and rulers were the anointed representatives of God, divinely appointed and responsible to none. See art. DIVINE RIGHT.

(b) Political absolutism, in the form in which it brought sorrow and misfortune to the Stuart kings, was defended as a philosophical theory by Hobbes,

who incorporates with these principles the celebrated doctrine that civil society owes its existence to a contract. The social compact theory was supported later by Locke and Rousseau, their version of the theory differing in some minor points from that expounded by Hobbes. The latter held that the covenant to form a society was between man and man, and not between the people and the sovereign they chose to govern them. This left the way open for the assertion of a Divine right in the king, which necessarily implies passive obedience in the people. But absolutism like this, said Locke, is no form of civil government at all (*On Government*, ii. § 90). 'No man in civil society can be exempted from the laws of it' (§ 94). The original contract was between sovereign and people, the latter giving up their natural liberty and submitting themselves to a chosen ruler, who, on his side, agreed to rule justly, and in accordance with fixed laws publicly established; only so long as he did his part were the subjects bound to give obedience and loyalty (§ 131). Finally, in the people there lay a supreme ultimate power to alter the legislature.¹ The principle of the contract is sometimes put in another way, as by Locke (§ 97), and in the general tenor of the *Contrat social*: every man on joining a society tacitly promises to submit to the determination of the majority—the only condition on which the original contract can have any meaning. Hooker puts it thus:

'Men knew that . . . strifes and troubles would be endless, except they gave their common consent all to be ordered by some whom they should agree upon: without which consent there were no reason that one man should take upon him to be lord or judge over another' (*Ecclies. Pol.* i. x. 8).

The contract theory, in the form in which it asserts the sovereignty of the people, dominated political thought during the 18th cent., and has in its time furnished argument and backbone for several successful revolutions. No one would now attempt to claim for this contract any historical justification whatsoever. The compact is not a fact, but an idea of reason—one of those ideas which we read into things to explain them (Kant, *Werke*, ed. Rosenkranz, Leipzig, 1838-42, ix. 160). No State of whose history we have record is known to have been founded in any such manner; and the further back we go the less the consent of the people would seem to have been sought and their wishes regarded in questions of a political nature. Consent has, of course, rightly been called one of the most sacred foundations of government. Physical superiority being usually on the side of the numerical majority, the many are controlled by the few, only because public opinion supports the rulers. Without the consent of the people no government can stand; by force alone no society can be held together. The stronger is never strong enough to be always master, if he does not transform his force into right and obedience into duty' (Rousseau, *Contrat social*, i. iii.). In this sense society really does depend upon a contract of a kind.

(c) While neither the theory of Divine right nor the theory of contract affords in itself any satisfactory explanation of the origin of government, the second is built upon what seem to be facts concerning the beginning of society. On these facts is based also the third theory, which founds government on expediency. Whether we follow Aristotle in thinking that man is by nature a social being, or hold with Hobbes that his disposition is anti-social, whether we suppose that the state of nature was one of peace (as Rousseau asserts) or a war of all against all, in the fact of the establishment of society there seems to be sufficient proof that this state of nature was one

¹ This statement is not substantially affected by the analogies between the religious conceptions of the Hebrews and their Semitic neighbours which are pointed out by W. R. Smith (*Prophecy of Israel*, London, 1882, p. 49 ff.).

¹ On the question of a so-called right or a moral duty of resistance, see REVOLUTION.

not satisfying to primitive man. Where there is perfect freedom, all are equal and subject to nobody; one man is king as much as another (Locke, ii. § 123). But the individual stands alone against the world; his property and person can be ill defended. Thus, as Locke says, 'government is hardly to be avoided amongst men that live together' (§ 105); it arises, since no human being is self-sufficing, 'out of the needs of mankind' (Plato, *Rep.* ii. 369).

We find man, then, being drawn into union with his fellows either through love of his kind or through love of himself. Outside of society certain instincts of man's nature, good and bad, remain unsatisfied, and only within it can his various powers be developed and his love of approbation, his desire to excel, be gratified. Historical inquiry has made it clear that no proof can be brought forward of any contract having been drawn up at this time; on the other hand, its results throw some light on the beginning of government. The statement is found in Aristotle that primitive society shows us nothing but kings and monarchies, and that for this reason all nations represent the polity of their gods as monarchical (*Pol.* i. ii.). He tells us, too, that at an earlier period still, before the State was established, patriarchal government was universal, and that this institution was generally the result of military necessity. The first of the needs of primitive man is the means to defend himself against attack. Thus, we may conclude that the father of a family or head of a tribe was at first chosen by his kinsmen as a leader in battle against other tribes. In times of peace he was its judge, and at all times he acted as priest to discharge the religious duties of his tribe. People grew accustomed to this exercise of authority, and the office was made perpetual. The leader was now called king.

The course of this development has been observed in many savage tribes. Aristotle saw it even among his own race:

'Kings at Lacedaemon are merely military commanders in expeditions beyond the frontiers, and enjoy also as their prerogative the superintendence of religious observances. This form of kingship may be described as nothing more than an absolute and perpetual generalship' (*Pol.* iii. xiv.). It was not kingship at all according to mediæval ideas, for it conveyed the power of life and death only in the field. But, in this incomplete sovereignty of the Lacedæmonian State, and in the organization of other polities lower in the scale of civilization, we have historical proof that government, in the case of these States or tribes, was indeed a question of pure expediency, arising out of man's first necessity—that of defending himself against attack. It needs the exercise of no great credulity to conclude that, in the case of States of whose early existence we have no record, government has been evolved in a similar manner.

2. The form of government, or the manner in which the sovereign powers of the nation are vested and exercised.—On the question of the various forms of polity there has been comparatively little difference of opinion since the time of Plato and Aristotle. The latter (*Pol.* iii. vii.) makes the following classification, based upon the discussions of his predecessor. There are, he says, three pure or normal forms of government—*kingship*, *aristocracy*, and *polity* (or, to adopt Sidgwick's tr. of the term *politeia*, constitutional government)—all of which have regard to the good of the community, and use the sovereign power for that end. To these correspond three perverted forms, or corruptions of normal polities, viz. *tyranny*, *oligarchy*, and *democracy*, in which the power of the State is used in the private interest of the rulers. Thus, in oligarchy, the rich, usually a wealthy minority, rule in their own

interest; in democracy this is done by the poor (viii.). In like manner, a tyrant uses his power only for his own ends. The government of a State is called a monarchy, an oligarchy, or a democracy, according as the supreme authority is vested in one person, in a few persons, or in many (vii.).

A government, however, is not always consistently in spirit what it is in name. Frederick the Great regarded himself as a servant of the State; in democratic Athens, Pericles ruled as a king. Where the government of a republican country slips, as it often does, into the hands of some one leading man, or, perhaps, of a few leading men, we have no longer pure democracy, but rather an aristocracy or monarchy. Hobbes seems to deny the possibility of a pure democracy when he says (*de Corpore Politico*, ii. 5): 'A democracy in effect is no more than an aristocracy of orators interrupted sometimes with the temporary monarchy of one orator.' Indeed, in every polity it is in effect the strongest who rule. But the Aristotelian classification still holds good, although the further objection has been made to it that it takes for granted a distinction between governor and governed which has not always been very clearly marked. In a democratic State the power is constantly changing hands; in an aristocracy, too, the same men may now rule, now fall back into the ranks of those who obey. Considerations like these have caused several writers—Rousseau among them—to give to the word 'republic' a very wide meaning indeed. For Rousseau it signifies not 'an aristocracy or democracy only, but in general all governments directed by the public will which is the law,' the necessary condition being that government should be regarded, not as identical with the sovereign power, but as the administrator of that power, in which case monarchy itself becomes a republic (*Contrat social*, ii. 6, footnote). Distinctions are thus sometimes lost sight of, both in theory and in practice; still, the form of the supreme power does give a distinctive stamp to the political life of a State, because, if for no other reason, it determines to a great extent the limitations of a State's activity.

The familiar terms which are employed by Aristotle in classifying the various forms of government refer to conditions which have long ceased to exist—to the small city-States of Greece, and a society based upon the slavery of a large part of the population. But in other respects too they no longer bear precisely the same meaning which they had for early Greek writers on political philosophy. By monarchy, for example, we understand limited or constitutional monarchy—a conception, by the way, not wholly unfamiliar to Plato, who, in the *Statesman* (302), selects for special praise 'monarchy, when bound by good prescriptions or laws,' and also, in the *Laws* (693), says that it is wise to combine the monarchical and democratical. A monarchy not so limited by fixed laws we should call despotism; but despotism, again, we do not identify with tyranny. Then our modern representative democracy is something altogether different from the government of the whole people by the whole which Plato and Aristotle held in the strongest detestation, while seeing it to be the form of government towards which all systems at that time tended.

Plato thought that political knowledge must always be confined to a few (*Statesman*, 297). His favourite polity was monarchy, and the government of the philosopher-king is the ideal of the *Republic*. Tyranny he thought the worst government of all, and the tyrant the worst of human beings. Aristotle's discussion of this question differs little from what we find in Plato, as regards either the subject-matter or the opinions expressed. Kingship he too

considered 'the primary or most Divine form' of government (*Pol.* VI. ii.); aristocracy the next best. To an individual of pre-eminent virtue 'all should render willing obedience . . . he and his like should be perpetual kings within their States' (III. xiii. and xvii.). But a person, and, still more, persons, of such virtue are rarely to be found; hence kingship and aristocracy, in its true sense of a government of the best people or for the best ends, are unrealizable ideals. Aristotle was alive to another difficulty in the greatly increasing size of States, in view of which he confessed that in his own time it was perhaps no longer easy to establish any form of polity but democracy (III. xv.). As a practical substitute for the ideal State, he recommends constitutional government as the polity 'most generally attainable and most desirable' (VI. ii.). The true end of equality, he says, is that neither rich nor poor should have the supremacy (VII. ii.). Hence the best practical, political constitution is one in the hands of the middle class (VI. xi.). They are the arbitrators between rich and poor (VI. xii.), and they are more conformable to reason, more capable of constitutional action, than any other section of the population (VI. xi.). In this democracy, political privileges were to be given to men of moderate means, the poorest class in the community being excluded. But Aristotle did not see a polity of this kind fully put into practice. His was an age in which enormous power had got into the hands of demagogues, and all citizens were admitted to an absolute equality—a system resulting in the practical supremacy of the masses. In this state of affairs the commons were, he complains, 'superior even to the laws' (VI. xiv.); and he expresses himself by no means confidently with regard to the popular opinion that individual liberty is exclusively, or even necessarily, a fruit of these democratic institutions (VII. ii.).

We come now to the question, Which is the best form of government? Many persons hold with Samuel Johnson that forms of polity have little power to influence happiness, and that it does not matter a straw that we should live under one kind of constitution rather than another. On more philosophic grounds, Kant thought that the form of the State did not matter, if the spirit of right and freedom were there (*Perpetual Peace*). Pope's well-known solution of the difficulty—'Whatever is best administered is best'—is only verbally satisfactory, and leaves us still face to face with the problem, Which constitution is likely to be best administered? Which will be most helpful to progress? And to this question no cut and dried answer can be given, because the stages of political progress and degrees of intellectual and moral capacity depend upon varying conditions, and require institutions so different that in a primitive state of society even despotism can be, and has been, justified. There is, accordingly, no ideally best polity; but most writers on the subject think with Aristotle that the question is one which every statesman and student of practical politics ought to consider. It is his business not only to know the best constitution under actual conditions, but to ask what form of government most nearly approaches the ideal (*Pol.* VI. i.).

Monarchy came first in the history of politics, and has been the most widely recognized of all governments. Nor is it difficult to understand how this should be. The rule of one is obviously the most suitable form of polity in a rude state of society, where the political consciousness is undeveloped. Even under more advanced conditions, there is something to be said in favour of absolutism. The autocratic monarch is unhampered by the necessity of securing the assent of minister or people; under no other constitution can the execu-

tive act with such force, consistency, and rapidity. Unfortunately, however, as Aristotle pointed out, hereditary kingship is exposed to great peril, owing to the frequent incapacity of kings (VIII. x.). Whatever powers the exigencies of ruder times may have called forth, it is certain that nowadays exceptional administrative skill or general capacity rarely shows itself in royal families. There are few States, however, at the present day in which this constitutes a danger. Modern monarchy is limited to such an extent as to tend, in the opinion of many observers, more and more in the direction of democracy. In those cases where the sovereign power remains autocratic, it is generally limited by a bureaucracy.

In *aristocracy*, if it be a true form of that polity, the government is in the hands of a class who are morally and intellectually superior to the rest of the community, and have the wealth and leisure to enable them to acquire special knowledge. They have been properly called governors by profession. Hence some of the most remarkable administrations in history have been aristocracies, at least in name. Looked at from our modern point of view, they are rather to be called bureaucracies, with the virtues and defects of bureaucracy—experience and a more or less mechanical energy on the part of the governors; on the side of the governed a certain passivity of the kind which is produced in a people by despotism.

John Stuart Mill criticizes aristocracy and monarchy from one point of view. A great minister, he remarks with some truth, is almost as rare a phenomenon in modern Europe as a great king (*Representative Government*, p. 46). This is, of course, the difficulty which confronted Aristotle, and was declared insuperable by him—the problem of finding persons pre-eminent in both talent and virtue. It is a difficulty which time has removed in its own way. The aristocratic classes have lost their former sovereign position in the State. In every country they are now subordinate either to monarch or to ruling people. No example of this polity has survived to the present day; still less do we see a modern government of the best people, in the old sense of a pure aristocracy.

As to the merits of *democracy* there is considerable difference of opinion. It suffered a good deal in reputation during the excesses of the French Revolution. So great a statesman as Burke stigmatized it as the most shameful thing in the world (*Reflections on the Revolution in France*, 1790). But, in the judgment of unbiased persons, there is no necessary connexion between democracy and violence, and popular government in its higher aspects is now generally admitted to exert a stimulating influence upon education, and to foster in a striking manner the growth of patriotic spirit. These results, indeed, were seen in ancient Greece, in the high intellectual standard attained by the average Athenian citizen, and the sacrifices he was willing to make for the State from a sense of duty. None the less, Plato decided against democracy, on the ground that such a polity was 'unable to do any great good or any great evil' (*Statesman*, 303). His criticism draws attention to a serious defect under which this form of government labours. Its executive is often weak, its conduct of foreign affairs timid, and, if there be frequent changes of administration, ever open to the charge of inconsistency. Indeed, on all questions the difficulty of pursuing a continuous policy results in a lack of vigour in republican authority, which has been ascribed partly to the absence of the pomp and splendour which surround royal thrones, and partly to the fact that presidents and ministers are regarded rather as servants than as heads of the republican State.

John Stuart Mill was so convinced that large assemblies are unfitted, not only for administration, but also for the direct work of legislation, that he advocated the formation of a legislative committee to which the business of drawing up bills might be entrusted. But a democratic government is not troubled by doubts of this kind; it goes to the task of making laws with zeal and self-confidence. Here its strength is supposed to lie. The chief defect of government by a majority of the people is not a paucity of laws but the danger of class legislation, or what is called the tyranny of the multitude. It is, of course, true that ill-considered legislation is not an evil peculiar to government by a majority, and that the numerous interests represented tend to counteract this danger in a democratic State. At the same time, in all large assemblies ignorance and incapacity are likely to be more common than knowledge and administrative skill, and self-interest will be found a more powerful motive force than the love of justice. For this and other reasons, Rousseau held that pure democracy was a government which might do for gods, but was too perfect a government for men.

It is agreed nowadays that enlightenment, education, and progress are not necessarily the fruit of popular government more than of other forms of polity. Aristotle too, many centuries ago, decided against the vulgar belief that liberty is to be enjoyed only under a democracy. Indeed, there is nothing to prevent freedom from existing in any State not despotic, although, in the nature of things, it is to be sought rather under a representative government than any other—a system, that is, in which the supreme authority lies with the representatives of the people. What is to be found here, and not under other forms of polity, is 'an open field for natural talent.' This, as has been well pointed out by D. G. Ritchie, is the true defence of democracy. Men being equal neither in capacities nor in character, and their respective merits being ascertainable only by actual trial, democratic institutions are defensible in so far as they offer the best means of obtaining a genuine aristocracy or government of the best (*Philosophical Studies*, p. 338).

To what extent may the form of government be said to be a matter of choice? According to the old dictum that constitutions are not made but grow, there is no choice at all. But the truth behind this dictum and its converse seems rather to be that constitutions *are* made, that they are the work of human reflexion and contrivance, and that at the same time they also grow, and in directions which men cannot always either influence or foresee. Institutions are, in fact, a matter of choice within the limits left by the circumstances and aptitudes of a people. Their permanence depends on the manner in which they are adapted to the requirements of the people, and continue with the lapse of time and the growth of the nation so to adapt themselves. Even within these limitations, however, the choice of the form of polity is not one wholly dependent upon human foresight; nor is the task of adapting it to peculiar needs entirely achieved by the skill of statesman or legislator. Not a little must be attributed to chance. Plato hits upon this truth in the *Laws* (709): 'Destinies and accidents happening in all sorts of ways legislate in all sorts of ways.'

The importance of the kind of polity has been differently estimated by various writers. Rousseau believed that institutions are all-important, and that, as men are naturally virtuous, they will show themselves to be so under just and suitable government. Montesquieu, while laying great stress on the necessity of institutions being in conformity

with the spirit of a nation, held, on the other hand, that these institutions are moulded by the character of the people and by such conditions as climate, employment, and general environment—influences upon which government, whether of one kind or another, can have little effect. On these views, which obviously represent opposite standpoints, little need be said by way of criticism. Rousseau's position will be generally characterized as extreme, while at the same time it must be admitted that there are few modern writers who would seek to minimize or ignore the influences which the *form* of government undoubtedly has on a people.

Every polity, says Aristotle, comprises three departments (*μέρη*)—the *deliberative*, the *executive*, the *judicial* body (vi. xiv.). These three functions of the State were not kept distinct, save in name, until comparatively recent times. In Greece and Rome they were frequently exercised by the same persons, as, for instance, by the Athenian *ecclesia*; and the mediæval State was not more differentiated. Only in the 18th cent. did people begin to feel that at least the judicial function should be exercised independently, and that kings ought not to administer justice in person. This judiciary faculty does so stand apart in every carefully organized modern State. The name which it bears and the names given to the other two functions of the State are practically the same as those used by Aristotle. They are: (1) the legislative, which Locke calls 'the soul which gives form, life, and unity to the commonwealth' (ii. §212), and which stands above the other two functions, as laying down laws which they must obey; (2) the executive or administrative power; and (3) the judiciary faculty.

In early monarchical government the sovereign was entrusted with unlimited power, and it was in the interests of individual liberty that attempts were made from time to time to impose limitations on this authority. In modern times it is by the method of separation of functions that nations seek to put checks upon the supreme authority and establish a balance of power within the State—a device of which perhaps the best illustration may be seen in the constitution of the United States of America, where the legislature and executive are in a sense pitted against each other. Kant and other philosophers have held that, where there is not a complete separation of the legislative and executive functions, there must be despotism (*Perpetual Peace*). Executive functionaries are not usually appointed by popular vote, nor in the opinion of many authorities should they be so appointed. In the case of the Presidency of the United States of America, the effect of this manner of election is to make all questions party questions.

3. The sphere of government.—Within what limits is the exercise of governmental machinery legitimate? The Hellenic State is generally considered to have possessed too much power. Looked at from our modern standpoint, a State is not an end in itself; it can never be more than a means—the only means, it is true—by which the liberty and welfare of men can be secured. As an end in itself, however, the Hellenic spirit idealized the State. Its citizens endured, without murmur, interference of the most minute kind with their private life and liberty, the sacrifice often of their interest as individuals, the non-recognition of their rights as men. They accepted this condition of things willingly, without question or criticism, because they regarded themselves as a part of the corporate whole, as one with the State in spirit and in will. The Spencerian antithesis of man and State, or man and government, would have conveyed no meaning to the Athenian citizen. Moreover, the distinction had not yet been formulated between the sphere of law and that of morality or

private life, the region in which we can legislate, and that in which legislation is useless or pernicious. The standpoint with which the Greek was familiar was that of Plato's *Laws*, which is permeated by the principle that law can make people virtuous—the direct contrary of our modern maxim that one cannot make a man moral by Act of Parliament.

In Great Britain, political theory, owing to various causes, is strongly individualistic in character. It ignores our obvious debt to society. In the extreme form of individualism, found in Bentham, Mill, and Spencer, the State is regarded as nothing, the individual as everything. For these writers, for Spencer especially, all restraint is an evil, while the sole function by which government may justify its existence is that of protecting individuals from aggression and punishing criminals—of acting, as Huxley says, the part of chief policeman (*Administrative Nihilism*). This theory, which Ritchie traces to Lycophron, the sophist, we have in a somewhat similar form in Hobbes and Locke. The office of the sovereign power, says the former, is the procuring of the safety of the people and their enjoyment of the contents of life (*Leviathan*, p. 322, Molesworth's ed.)—‘contentments’ being a very comprehensive word. At the beginning of the first *Letter on Toleration*, Locke defines the term ‘commonwealth’ in very similar language.

Nothing is suggested, in individualistic theory, of any action and reaction between the individual citizens and the State, or of any relation between sovereign and subject other than that of force and obedience—an external contractual relation in the opinion of Hobbes and Locke. According to Bentham, the principle of utility ought to govern society, whose business it should be to secure the greatest possible amount of happiness to men; law for him is a necessary evil, government a choice of evils (*Principles of Morals and Legislation*, p. 48). For Bentham, as for Mill and Spencer, society is no more than an aggregate of individuals, and the last of these writers says frankly that the liberty a citizen enjoys is to be measured, not by the nature of the governmental machinery, but by the relative paucity of the restraints it imposes (*Man versus State*, p. 15). From this point of view the presumption must always be that the government is in the wrong, and can be called upon to justify itself on every occasion where it actively interferes with the liberty of individuals. The cry of Emerson is not less unambiguous: ‘The less government we have the better,’ he says, ‘the fewer laws, and the less confided power’ (*Essay on Politics*). This is a fair conclusion from the premiss that all coercion is immoral and destructive to freedom; but the logical outcome of principles like this is a return to the struggle for existence—in other words, anarchy.

The reasoning of Mill and Spencer is based upon the hypothesis that every increase in the power of the State necessarily implies a corresponding decrease in the liberty of the individual citizen: State action, according to this view, being always opposed to the action of the individual. It is clear that any such statement of an inverse ratio as existing between governmental power and individual freedom depends upon an erroneous conception of liberty. Freedom from restraint and from the meddling of governments is not liberty. It may be more safely defined as the privilege of living under fixed standing laws, formed in the interest of the people, adapted to their needs, and capable of affording them the fullest opportunity of self-development and progress. The more just the constitution, as Kant saw, the greater the amount of freedom which can be left to the citizen. Formed to make life possible, the State exists, as

Aristotle said so long ago, to make life good. It is not characteristic of liberty that every citizen should act as he chooses. Rather ‘the citizens should live, and live gladly, in the spirit of the polity’; such a life is not to be regarded as a bondage but as a means of preservation (*Pol.* VIII. x.).

This is sound doctrine. Aristotle saw that security and personal liberty were blessings which no man can conquer for himself; he saw that they were to be found only in the State, and that liberty is something different from licence. The distinction is one of which Locke, too, was fully aware; even the state of nature, he says, is not without law, having the law of nature to govern it (ii. § 6). Political power he defines as the right of legislating for the public good (*ib.* § 3): ‘Where there is no law there is no freedom’ (*ib.* § 57).

The theory was advanced by Mill that the liberty of an individual should be limited only by the equal liberty of every one else. This principle has been proved by Huxley and later writers to be absurd and incapable of application. By almost universal consent it is held that all desires harmful to society should be as much as possible stamped out; while, on the other hand, it should be the object of constant endeavour to encourage those favourable to progress. The question arises, however, how far this can be done, and here there is some difference of opinion. To-day, in the energy of legislatures, we are face to face with a new phenomenon in the history of politics. Looking back on the last fifty years, we find the sphere of governmental activity enormously extended. The State has interfered with matters concerning the preservation of health and the prevention of disease; it has made education and insurance compulsory, and striven to encourage the pursuit of the higher kinds of knowledge and the cultivation of art; through its picture galleries and public buildings it offers not only an intellectual but an æsthetic training to its citizens. In these endeavours, which have had the support of the people, its object has frankly been the public good. But there are no limits to the extent to which this well-intentioned interference could conceivably be carried. How far, then, given the most exalted motives, is State interference justifiable? Bentham gives an answer recommending caution, and so does T. H. Green. They are agreed that not every act beneficial to the individual is to be enforced by legislation (Bentham, *Principles of Morals and Legislation*, ch. XIX. viii.); or, as Green more definitely put it, only such acts should be made compulsory as had better take place from any motive than not take place at all (*Philosophical Works*, ii. 344). Well-meaning patriotic legislation is confronted by a real danger—that of deadening the sense of personal responsibility, and of causing that to be done through fear of legal consequences which ought to be done from a feeling of duty.

It is interesting to note that Locke, whose *Essays* contain the first systematic attempt to investigate the limits of State action, applied in a very broad-minded spirit his maxim that the end of government is the good of mankind. In the first *Letter on Toleration*, speaking of the washing of children, he uses these words: ‘If the magistrate understand such washing to be profitable to the curing or preventing of any disease that children are subject to, and esteem the matter weighty enough to be taken care of by a law, in that case he may order it to be done.’ The view expressed in this passage would justify modern laws of sanitation and other laws not justifiable on old-fashioned individualistic principles of liberty.

The functions of a government vary with differ-

ent stages of political development, its power being necessarily far-reaching in a backward State, which can often be best served by so-called paternal legislation. Hence, generally speaking, the sphere of government cannot be determined from theoretical considerations; nor can this administration or that be judged except by the results of its activity. In a well-ordered society it is not likely that State interference will be carried too far. As Samuel Johnson said of tyranny, 'mankind will not bear it.'

See also art. STATE.

LITERATURE.—Frequent reference has been made in this art. to the dialogues of Plato (especially the *Republic*, the *Statesman*, and the *Laws*) and to the *Politics* of Aristotle. The origin of government, the theory of contract, and such questions are discussed in the works of Hobbes; in Hooker's *Ecclesiastical Polity*; Locke's *Essay on Government*; Rousseau's *Contrat social*; Hume's *Essays*; and the political writings of Kant. Among theological works, Butler's *Analogy* must not be forgotten. On the Divine right of kings, see the *Mémoires historiques* of Louis XIV. (*Œuvres*, Paris, 1806, vol. I.); and Bossuet's *Politique tirée des propres paroles de l'Écriture sainte* (*Œuvres de Bossuet*, do. 1864, vols. xxiii. xxiv.); also B. L. Henri Martin's *Histoire de France* (various edd.). Among classical works mention must also be made of Montesquieu's *Spirit of Laws* (Eng. tr., London, 1806-97). A book which is of great value to the student of politics is J. C. Bluntschli's *Theory of the State* (Eng. tr., Oxford, 1886). Another, bearing a similar title but treating the subject from a purely philosophic standpoint, is B. Bosanquet's *Philosophic Theory of the State*² (London, 1910). Reference may be made, on general grounds, to H. Sidgwick's *Elements of Politics*², do. 1897. An admirable statement of the advantages and disadvantages of democracy is found in J. Bryce's *American Commonwealth*, do. 1888 (new ed. 1911). For a doctrine of sovereignty which has greatly influenced the standpoint of English jurists, see J. Austin's *Lectures on Jurisprudence* (do. 1863). This theory is examined in the *Early History of Institutions* (do. 1876) of H. S. Maine, whose treatise on *Popular Government* (do. 1885) may be also mentioned. A mass of literature has grown up round the question of the limits of State authority. Among the contributions of older writers to this subject are Wilhelm von Humboldt's *Sphere and Duties of Government* (Eng. tr., do. 1854); J. Bentham's *Principles of Morals and Legislation* (various edd.); J. S. Mill's *Liberty, and Representative Government* (various edd.); H. Spencer's *Man versus State* (do. 1884). In the first volume of his *Collected Essays* (do. 1893-94) are T. H. Huxley's *Administrative Nihilism, and Government: Anarchy or Regimentation*. T. H. Green's *Lectures on the Principles of Political Obligation* may be found in his *Works* (ed. Nettleship, do. 1885-88). See also the political writings of D. G. Ritchie, especially his *Principles of State Interference* (do. 1891) and some of the essays in the volume entitled *Darwin and Hegel, with other Philos. Studies* (do. 1893); F. C. Montague's *Limits of Individual Liberty* (do. 1886); an essay on 'Liberty and Legislation,' in B. Bosanquet's *Civilization of Christendom* (do. 1893). J. S. Mackenzie's *Introduct. to Social Philosophy* (Glasgow, 1890) treats of the subject briefly.

M. CAMPBELL SMITH.

GRACE.¹—I. HISTORY.—I. Ethnic.—The Christian thought of grace is heralded in ethnic religions by the wide-spread feeling that the gods are kindred and friendly beings, guardians of morality, and, up to a certain point, able to help men. From the earliest times a corresponding confidence and trust—a few anthropologists even say love—differentiate religion from magic or sorcery. In Scandinavian, Egyptian, and Greek sources there are faint suggestions of a Divine representative sacrificed for human good, and this marked a positive advance beyond the mere culture-hero who averts peril and brings in civilization.

2. Jewish.—In the OT the relevant terms are mainly two—*חֵן*, 'favour' (more general), and *רַחֲמִים*, 'lovingkindness' (mostly used of the Divine attitude to Israel). Such grace is the free outflow of Divine love, irrespective of the worth of its object. Grace at first relates to Jahweh's anger, often represented as a capricious and uncalculating passion, the effects of which grace removes. But, chiefly, grace is the fount of every blessing. The bond which unites Jahweh and Israel is one of grace *ab initio*, for He chose Israel freely, being influenced neither by its size nor by its righteousness.

¹ This art. being written from the Protestant point of view, a full statement of the Roman Catholic doctrine of grace will be found in the following article.

ness (Dt 7⁹⁻¹⁰); and to this spontaneously selective love OT writers trace the promise to Abraham (Gn 12¹), the covenant of Sinai (Ex 33¹⁹), and the oath to David (Is 55⁵). The moralization of the idea—which to the end savoured of national privilege—owed much to Amos and Hosea; grace is *moral* love, and includes righteousness; yet for Hosea righteousness does not put God far away. He is the nation's tender Father, and 'His love is sovereign, pure, unselfish, free from all impatience and all variableness as the love of an earthly father can never be' (W. Robertson Smith, *Prophets*, Edin. 1882, p. 162). In their arraignment of the people, the prophets adduce Jahweh's acts of guidance and protection in the past. Prominent even in Deut. (7⁸ 23³), grace is supreme in Deutero-Isaiah and the Psalms, the Exile having quickened a poignant sense of need. Then once for all the idea took an eschatological colour (Is 54⁵, Ps 89⁴, Jer 29¹¹). Jahweh's grace is sovereign and wonderful, His invincible power to pardon the guilty is mentioned in exulting tones, and it is anticipated that by a special gracious act He will gather His people from among the heathen. Towards the close of the OT literature, the relation of grace to the individual comes into view. But no trace exists of a material or quasi-material view of the Divine favour or its operation. Always it is an attitude or active disposition of Jahweh to persons. To those who keep His commandments and show loving consideration to their fellows, His grace is a possession for ever.

3. Christian.—(1) *In the NT*.—In the NT the two Heb. terms already mentioned are embraced in *χάρις*. Classical writers mean by *χάρις* that which gives pleasure or delight, and so loveliness or charm. Beauty in motion is very much the sense. The profounder meaning of the word in primitive Christianity—viz. the unmerited Divine love which stoops to pardon and bless the guilty—is, in part, a heritage from the OT, but it draws its characteristic intensity from the felt presence of redeeming love in Jesus Christ. The word is not found on Jesus' own lips, but His message and personality are laden with the thing. Thus in the Sermon on the Mount the Father makes His sun to rise on the evil and the good (Mt 5⁴⁵), the Kingdom is promised to the poor in spirit (v.³), comfort to the mourning (v.⁴), perfect satisfaction to those who long for righteousness (v.⁵). In the Lord's Prayer, the grace of the Father in heaven is assumed. Apart from very explicit utterances like the parables in Lk 15, the attitude of Jesus to the needy—to the paralytic (Mk 2), to the woman that was a sinner (Lk 7), to the dying malefactor (Lk 23)—conveyed to them and to bystanders the blessed sense of a Divine love mightier than sin. The Kingdom, into which He calls men, is not something they are to earn or make; it is a gift pure and simple, and with the conditions of entrance human wisdom or riches or righteousness have nothing to do. Even the conception of reward, though employed frankly, is placed in a light which reveals its inadequacy to set forth the principles of Divine action, for the reward is pictured as an hundredfold what men have sacrificed (Mk 10²⁹). Jesus is conscious of being the medium of grace, and in Mt 11²⁸. He puts Himself forward explicitly in this character. He must eventually die to ransom many (Mk 10⁴⁵). Thus to His mind the central fact of the world is the dying of the Christ of God in order to establish in a sinful world the great expected Kingdom—the new world-order which shall fully express Almighty Love.

Throughout the NT, grace is the first thought and the last—the atmosphere in which Christians live and move. Their message to the world is one of grace, and missionaries setting out to preach are

recommended to the grace of God (Ac 14²⁶). When believers pray, it is at the throne of grace (He 4¹⁶). As they survey the past or anticipate the glorious end, everywhere they see grace preparing, executing, and pervading all (1 P 1^{10, 13}).

It is especially by St. Paul that the conception of grace is elaborated. By grace he means the free love of God, visiting men even when unsought, more particularly as opposed to all demands of law or claims of merit. It was grace, as he is vividly aware, which called him personally, made him an apostle, and vouchsafed to him abundant missionary success (Gal 1⁶, Ro 12⁸, 1 Co 15¹⁰). But it is also the supreme causal agency by which Christian life everywhere is evoked, sustained, and augmented. The Apostle contemplates it for the most part from two points of view.—(a) Grace is the active disposition in God to which everything that can be called salvation is traceable (Ro 11⁵, Eph 1⁷, Gal 5⁴). The sending of God's Son and the acceptance of His obedience as availing for the guilty are both due to grace alone. Because of Christ's death, in which the Divine righteousness was manifested once for all—for grace contains wrath at evil as a subordinate element—God in His mercy is able to forgive freely. In St. Paul's view there is no antagonism between grace and righteousness. So far from making righteousness superfluous, grace actually bestows it by way of gift; for, if righteousness could be attained by the works of the Law, God were debtor to man, and grace were made of none effect. The gift of grace can be received only by faith (Ro 4¹⁶), i.e. by the willing and humble appropriation of the proffered boon, which places sinners in a right relation to God, and evokes an obedient love by which fear is banished. It is not that God has ceased to demand works and henceforth demands the believing temper as the price of salvation; faith is receptive, not meritorious, and grace is equally its received content and its producing cause. Since Jesus, indeed, grace and faith constitute an indissoluble unity. There is the closest bond between past historical events and the mercy of God thus apprehended by the believer. Grace is bound up with the person of Christ; apart from this reference to the historic Figure, and His experiences of life and death and resurrection, it would have no tangible or permanent significance for the Apostle's mind. The grace of which he speaks or writes is that of Christ as well as God; Christ is its eternal subject (2 Co 8⁹), its medium and pledge, and its present all-sufficient source (12⁹). There is no ground in St. Paul for describing grace as acting on the lines of a natural force in the production of the religious life; it is simply another name for the operation of the Spirit, and to him the Spirit, as it has been put, 'meant the gracious power of God which evoked faith in Jesus as the crucified and risen Christ and then mediated to the receptive, obedient life all that the Lord was and did for his own people' (J. Moffatt, *Paul and Paulinism*, London, 1910, p. 37 f.). The relationship of free access to the Father, into which men are thus introduced, is one which *ipso facto* can have no end; as grace is the basis of election (Ro 11⁴), so, too, it reigns through righteousness unto eternal life (Ro 5²¹).—(b) In a derived fashion, the word is also employed to designate the *fruit* of grace in redeemed lives, whether this be the spiritual status into which Divine love lifts men (Ro 5²), or particular gifts of an ethical or pneumatic character (cf. 2 Co 8⁷). Generally speaking, grace is felt to be the death of legal religion, for in trust responsive to God's bestowal of Christ men now serve Him not for wages, but in faith and love and hope. It is thus clear that in Jesus and Paul alike the thought of grace implies the complete fusion of the moral and the religious ideal. The writer

of the Fourth Gospel, while he prefers to speak of the Divine love (3¹⁶ 13¹; and Ep. *passim*), declares grace to be the new specific feature of the Christian religion as contrasted with Mosaism (1⁷). It is further noticeable that the NT does not fail to warn Christians of the unspeakably grave consequences of neglecting the Divine grace or receiving it in vain (2 Co 6¹, He 6⁴⁻⁶).

(2) *In the Early Church.*—The early centuries exhibit a marked process of tension between Eastern and Western thought. For the Greek Fathers, who took free will for granted, morality and religion lay parallel with each other—sin not abrogating freedom but expressing it, grace not displacing freedom but encouraging its independent activity; 'it consists not in an inner transformation, but in the objective facts, external to man, of providence, revelation, incarnation, and redemption' (O. Kirn, *PRE³* vi. 719). Grace saves by illuminating the intellect and reinforcing the resident and autonomous powers of human nature. The Western mind resumed the Hebrew thought of man's complete dependence on God; but, as early as Tertullian, we find predominant a view of grace which regards its action as the inspiration of a higher Divine quasi-physical energy or force, 'by which the *liberum arbitrium* is aided in a meritorious working for the rewards of eternal life' (F. Loofs, *Dogmengesch.*, Halle, 1906, p. 164). The antagonism came to a head in the Pelagian controversy. It was argued optimistically by Pelagius and his group that free will is the inalienable prerogative of man; sinners are in no sort of bondage, but can choose either way. Sin is only a momentary self-determination, which leaves the nature intact and can always be successfully resisted. In religion it is useful to have our will guided, though renewal is not essential, and such guidance comes from the Law or from Christ's personal example or instruction. 'Grace, in short, is the external help which makes easier the realization of the natural possibility, together with the natural possibility itself' (Robinson, *Christian Doctrine of Man*, Edinburgh, 1911, p. 182). If Pelagius thus lowered grace to the plane of nature, Augustine (*q.v.*) held passionately that it liberates from a nature which is sinful through and through. Though no psychological determinist (man is free within the range of his ability), he taught that men have utterly lost the *liberum arbitrium* to good. Salvation, therefore, comes exclusively through grace—that replenishment with the Divine life which anew creates in us the good will—for Christ the God-man has brought down to earth the powers which give us back liberty to express freely the new nature. To grace, then, with the action of which in restoring moral power we cannot co-operate, or, in Augustine's significant phrase, to *gratia gratis data*, is due everything that can be called salvation—faith and love, freedom from concupiscence, the good will, and, very specially, the gift of perseverance (granted only to the elect). Grace is the effecting in time, and within the Church, of God's eternal predestinating will, whereby He resolved to save a certain (but to us unknown) number out of the 'mass of perdition.' It works *preventively*, apprehending men and lifting them out of sin; *co-operantly*, producing in them good volitions and good action (this is justification, for the primary effect of grace is to make righteous); and *irresistibly*, for the Divine will is omnipotent. *Ut velimus, operatur incipiens, volentibus cooperatur perficiens*. Saving grace is distinguished from the *adjutorium gratiae*, lost through the sin of Adam, by this quality of irresistible efficacy. This might seem to leave no room for merit, but Augustine teaches unequivocally that the final destiny of individuals is solely

dependent on their acquired merits, though it is added that these are gifts of God. He is undoubtedly true to experience in his conviction that man needs Divine salvation and cannot save himself. But a fundamental strain of Neo-Platonic mysticism renders him in the last resort unable to link salvation to the historic Christ by more than a loose connexion, so that the religious dynamic (grace as infused love) consists rather in a 'secret, wonderful, and ineffable' Divine energy than in the impression of Christ, living, dying, and risen for His people. The *gratia inspirationis* is really a communication of the Divine essence, and its ethical and personal character is still further overclouded by its being referred exclusively to the Divine omnipotence. See, further, the following article.

Augustine's doctrine of merit left a door open to Semi-Pelagian conceptions. Before his death, predestination and the bondage of the corrupt will had been rejected by those who feared their moral effect. The Semi-Pelagians (Loofs has pointed out that they might with nearly equal justice be called Semi-Augustinians, since they held that man requires Divine grace for good action) taught that God aids the will, sin having impaired freedom but not destroyed it. In 529 the Synod of Orange defined a position which is Augustinian on the whole; but it was silent as to the irresistibility of grace, and anathematized the defenders of predestination to evil. Unconditional predestination seemed to make the Church's means of grace superfluous, and this could not be borne. In the 9th cent., Gottschalk's advocacy of a logical Augustinianism was firmly put aside. Nor can we ignore the growing tendency to fix on sacraments as the proper vehicle of grace. Cf., further, artt. PELAGIANISM and SEMI-PELAGIANISM.

(3) *In the Middle Ages*.—In mediæval Scholasticism, no writer is so Augustinian in tone as St. Thomas Aquinas, who, however, combines the older thought of predestination with an Aristotelian and deterministic idea of God. God alone, he holds, can convert the sinner, as being the Prime Mover of all things. *Gratia increata* and *gratia creata* are distinguished, the first being the freely-imparted movement of God, the second a supernatural 'habit' infused into the soul's essence and constituting the new nature. Conversion comes through free will, which yet cannot turn to God except as, by the *auxilium gratia*, He turns it to Himself. *Gratia operans* is grace from the standpoint of Divine causation, *gratia co-operans* the same grace from the standpoint of human consent or volition (*Summa*, ii. 1, qu. 109-111). Acts are meritorious only as they issue from co-operating grace, in accordance with the secondary causation of the human will. What infused grace (*gratia gratum faciens*) does is to heal the soul, give power to will the good, grant perseverance, and finally conduct to eternal glory. The remission of sins follows on moral renovation. There is a sense in which man can prepare himself for grace, though not by merit; but, after the will has regained through grace the capacity of self-movement, it can acquire merit (*meritum de congruo* or *de condigno* according as it is considered as proceeding from free will or from the grace of the Holy Spirit). In this scheme the Augustinian conception of *sola gratia (infusa)* and the old Western idea of merit limit and supplement each other. Aquinas fails to bring out clearly any connexion between grace and Christ save that He exclusively merits for us the *gratia prima*, or original impartation; thus its action on the soul is in no sense psychologically mediated, and it appears most characteristically in the sacraments, as a Divine force impinging on or imparted to the soul.

Duns Scotus criticizes sharply the notion of a 'habit' produced in the soul by grace, and tends to evaporate grace as such into a co-operant principle which renders free moral action well-pleasing to God. The absolute freedom of God and man are placed in unconditional opposition. Grace heightens the privately achieved goodness of man; hence the scope of merit broadens out indefinitely. The Nominalists followed Duns in teaching that sin has left the natural freedom of man intact, and that merit is requisite even for the initial gift of grace. Bradwardine and Wyclif raised an Augustinian protest. The anthropology of the Council of Trent, on the other hand, may be described as 'the combination of a Thomist scheme of sin and grace with such modification of its statement as would allow a Scotist interpretation' (Robinson, p. 210). Contrary to the Augustinian and Thomist tradition, it is declared that the *gratia prima* does not justify, but only disposes to justification, so that justification is the fruit of a Divine and human co-operation. See, further, the following article.

(4) *From the Reformation*.—Luther (*q.v.*) broke definitely with the conception of grace as a quality of the soul, a Divinely caused inward 'habit,' and identified it for good and all with the mercy of God presented in Jesus Christ, which sinners experience primarily and essentially as forgiveness. To have faith is to have grace: *wer glaubt, der hat*. The Divine favour in Christ is brought home to us by the gift of the Holy Spirit, working in and through the Word or Gospel, in which God Himself deals with us and gives Himself in Christ to be our own. Grace is this loving will of God. The sacraments are efficacious signs of it. It is true that Luther's sacramental doctrine partially deserts this great conception, in so far as he teaches that sacraments present a peculiar additional grace over and above that which is made ours in Christ as the embodied love of God. At bottom, however, 'the certainty of forgiveness in Christ was for him the sum of religion' (Harnack, *Grundriss der Dogmengeschichte*, Freiburg, 1891, p. 386). For Calvin also (see CALVINISM) grace and faith are vitally correlative, although his underlying deterministic philosophy of unconditional predestination led him at times to equate grace with 'the good pleasure of God.' In both Reformers, an end is made of human merit as contributory to salvation. We cannot here discuss the later Calvinistic and Arminian controversy as to whether grace is or is not particular, irresistible, and inalienable (see, further, art. ARMINIANISM).

II. The NT message and its echo in Reformation preaching both imply a conception of Divine grace wholly drawn from and determined by the felt redeeming influence of Jesus Christ. Disregard of the fact of moral personality, as though religion could be passed into the soul like a stream of electricity, is invariably caused by or causes the thought of grace as a secret Divine energy, due solely to omnipotence, and acting on the human will with irresistible pressure—a quasi-physical force, stored within the Church, and applied to the soul-substance in its subconscious depths. But a coercive force, for which the will is only a medium of transmission, cannot ever be one with human experience, or fulfil itself in volition as our act and possession. We must seek, then, to regard grace as that which produces faith in accordance with the laws of an ethical and rational nature, and at the same time resolves the native tension and conflict of the moral life. 'Only by relating grace to personality and personality to grace is it possible to have a spiritual conception of either. Grace is grace and not a force precisely because it is the succour of our moral personality' (J. Oman, *Expositor*, 1912, p.

236). If our relation to God is to be moral, it must be also free.

Probably the best analogy to the unity found in life's actual movement between the dependence on grace asserted by faith and the moral dependence on which conscience insists is the experience of 'falling in love.' In both cases there is an impelling personal constraint to which it is liberty to yield. The whole fact is neither dependence by itself nor independence by itself, as alternating or rival phases, but each supported and constituted by the other. Similarly, religion begins when we encounter a Power or Reality which subdues us purely by its spiritual content, not destroying freedom but raising it to the highest point. In this experience, moral life is in principle made perfect, for a man is good not in so far as he shuts out all influences, but as he opens his nature to the highest. Submission to grace—i.e. to God's loving will, which is His essence—is thus the limiting case of an experience, of receptiveness and liberty fused in one, which is fundamental to all moral life. Only through grace do we become personalities in the highest and fullest sense. The taint of egoism and self-righteousness must cling to all life of which the finite self is centre.

This means that Catholic and Protestant conceptions of grace are eventually incapable of being merged in a higher unity. To the Catholic, grace is ethical in aim, yet at the same time hyper-physical in character and operation, dispensed through an infallible and hierarchical institution, and charged with a mysteriously sanctifying power which is manifest supremely in the Sacraments. To the evangelical Protestant, grace is the free active love of God to sinners, so personally present in Christ as to elicit faith by its intrinsically persuasive content. It is no mere supernatural force emitted by Deity—which might have no relation to Jesus, or only the barest—but the Father's will of saving mercy exhibited in the person of His Son. Grace, as seen in Christ, does not cause faith by any *vis a tergo*; it evokes faith by means of the felt significance of the Redeemer, working upon us through ethically qualified motives. All ideas of law or reward drop away. Nor are there two acts or forms of grace, one imparting remission of sins, the other by way of supplement changing the inward nature and inspiring power for goodness; on the contrary, the needed moral dynamic, rich in all true and triumphant morality, flows from the transforming apprehension of the fatherly grace held forth to us in Christ. Grace, therefore, is both a gift and a challenge. We cannot face and feel the saving power that is in Jesus, and know that in Him we are meeting God, without the uplifting consciousness that the righteous Father is summoning us to be one with Him in His righteousness and in the purposes of His kingdom. 'By the grace of God I am what I am' forms the heartfelt confession of all believers, of whatever school; and the words, read in the light of concrete experience, are an expression both of utter indebtedness to God, who by taking us to be His children has wrought whatever in us is good, and of complete ethical liberty. See also art. HOLY SPIRIT.

LITERATURE.—The NT Theologies; O. Kirm, 'Gnade,' in *PRE3*; D. A. Bertholet, A. Meyer, and E. Troeltsch, 'Gnade Gottes,' in *Schöle's Religion*, II, 1464 ff.; the *Histories of Dogma* by A. Harnack (Eng. tr., London, 1894-99); F. Loofs (4th ed., Halle, 1906), and R. Seeberg (Leipzig, 1907-08); Th. Häring, *Der christliche Glaube (Dogmatik)*, Calw, 1906; J. Oman, art. 'Personality and Grace,' in *Expositor* for 1911 and 1912; H. Wheeler Robinson, *Christian Doctrine of Man*, Edinb. 1911. H. R. MACKINTOSH.

GRACE, DOCTRINE OF (Roman Catholic).

—The doctrine of grace, as understood and taught at present in the Roman Catholic Church, is the rational development of the principles contained in

the Scriptures, as interpreted by the traditions of the primitive Church, and worked out to its present form through a long series of theological controversies. For chief authorities it claims, among inspired writers, St. Paul; among the Fathers of the Church, St. Augustine; and foremost among the theologians, St. Thomas Aquinas. As it is based entirely on the traditional Catholic notion of the supernatural order, it is essential that we should, first of all, form a clear and accurate notion of that basal concept.

1. The supernatural order: sanctifying (or habitual) grace.—In agreement with tenets kindred to those of the Greek, mostly Platonic and Aristotelian, philosophy, the Christian revelation implicitly assumes that, whereas the human body is apparently doomed to decay and death, the human soul is naturally simple, incorruptible, and intellectual, and consequently made for all truth. Therefore, no other end may be considered as commensurate and proportionate to its natural aptitudes than a possession of the plenitude of truth, which is God Himself. Some kind of vision and possession of God after this life is, accordingly, the only destiny that may give plenary satisfaction to the aspirations and aptitudes of the human soul. But, while a purely natural vision and possession of the God of Nature (such as we may assume to be that of the souls consigned to Limbo) should suffice to satisfy the natural exigencies of the human soul, and whereas God could owe nothing more to the individual soul than the said natural possession of the Supreme truth (provided the soul should have proved itself worthy of it by its conduct in this earthly life), nevertheless the whole of the Christian revelation is based on the assumption that it was, from all eternity, the munificent and gratuitous decision of the Lord to call man to an even higher destiny, not only to a natural but to a supernatural and Divine reward. He was called upon to know, to possess, to enjoy his God in the contemplation face to face of His essence, of the revealed mysteries of His intimate selfhood, of His Deity—not only as Prime Maker and Prime Mover of the natural universe, but as God Trine and One of the Christian revelation. Man was, therefore, to be admitted into the sanctuary of the Divine Self, to become a partner and an associate of God Himself in His possession of Himself, to partake of the Divine and infinite beatitude, on the same footing and in exactly the same way as God Himself, viz. by enjoying, conjointly with Him, the very same infinitely beautifying object, the very same infinite perfections. The only difference should be that, whereas the enjoyment which God has of Himself is infinite, the enjoyment which man would have of God, on account of the inherent natural limitations of the human soul, would be necessarily finite in degree, although not less Divine in its kind, because not less Divine in its object.

As a consequence, according to the decision of the Creator of the universe, which we have just recounted, two orders, essentially different in kind, but mutually co-ordinated, should mingle their essences and unite their activities in this our world, for the working out of the salvation of the individual soul—the natural order to which man belongs as a natural being by his body and his soul, and the supernatural order to which he was called by God and into which he is introduced by the Divine efficacy of grace. For, since man was called to a Divine destiny, he must be made proportionate to it, he must be raised to the Divine plane, he must be somehow divinized; and that is why a 'permanent' and lasting Divine gift or quality must be infused in his soul, durably to abide there, until wilfully destroyed by mortal

sin—a supernatural and godlike perfection, the effect of which was to confer on the soul of man a kind of 'deiformity,' mysteriously aroused in it by the all-powerful agency of God. That permanent supernatural quality Divinely infused in the soul of man, to make him durably proportionate to his Divine destiny, by raising him permanently to the Divine plane, is called 'habitual' or 'sanctifying' grace.

Of course, it might have been in itself sufficient to grant to man a supernatural help, an 'actual grace,' whenever it was necessary for him to perform supernatural actions—to raise him 'each time' above his natural capacity, in order to make him produce Divine acts meritorious of the Divine reward; but it was more harmonious, more consistent, permanently to divinize man, to raise him, once for all, to the supernatural plane. The Scripture texts, as the Catholic Church always understood them, indicated that such had been the course selected by God, and so she always expressly held by the primitive traditions, from which the Church could not possibly recede. When, therefore, the early Protestant Reformers, making light of all traditions, and boldly sweeping aside all the theological development of the past ages, came forward, denying the existence of any internal supernatural quality infused by God, which should be called 'habitual' or 'sanctifying' grace, and maintaining that the state of grace was characterized by nothing but an 'external' imputation of justice, made by the Eternal Father, of the merits of the Redemption of Jesus Christ, the Church could not refrain from defining as a dogma of faith (Trid., sess. 6, can. 11) that habitual grace must be understood as an 'inherent' Divinely infused perfection.

2. The state of innocence (*status innocentie*).—Accordingly, when the first human couple were created, they were endowed, over and above their natural organism, with a second, a 'supernatural organism' made up of the following elements:

(1) *Sanctifying grace*, the Divinely infused supernatural quality which permanently divinizes the human nature to make it proportionate to its Divine end.

(2) But sanctifying grace does not come alone. Somewhat as the boughs of a tree will branch from its stem, from that fundamental and basal perfection, habitual grace, a number of complementary and dependent supernatural perfections concomitantly branch out, in the various faculties of the soul. They are the *virtues*: three 'theological,' viz. Faith, Hope, and Charity; four 'cardinal' or moral, viz. Prudence, Justice, Force, Temperance, together with their dependent subsidiary virtues, and the 'seven gifts' of the Holy Ghost.

(3) Besides those fundamental perfections, they had been endowed also with several gratuitous *privileges*, essentially distinct and separable from the foregoing, as a kind of supplementary dowry, destined to emphasize the munificence of the Lord. Those privileges were briefly: an infused and perfect knowledge of all things that pertained to the human sphere, freedom from any revolt of concupiscence, impassibility, and immortality of the body. It was commonly understood that the primitive plan of God was to let man live on earth a natural term of years, and, after having allowed him to perform some meritorious acts, without inflicting death on him to take him up to his infinite and Divine reward. Original sin destroyed the work of God; the effect of Redemption, on the other hand, was to restore it in a new form, by creating the state of reparation.

3. The state of reparation (*status naturæ reparatæ*).—In this new state of reparation, the

gratuitous privileges of omniscience, immortality, etc., remain irrevocably forfeited, but the whole of the supernatural 'organism' which we have described above is restored, through baptism, to infidels, and, through penance after mortal sin, to baptized Christians. This would be, therefore, the place to treat of the relation of sanctifying grace to the Sacraments, but we must refer the reader to the various articles on the Sacraments; it will be enough to say here that sanctifying grace is first generated in the soul by God through baptism, that it is mortified in it by mortal sin, restored through penance, and increased each time by each reception of the various Sacraments, especially the Holy Eucharist.

To sum up, therefore, in a few axioms the Catholic doctrine of sanctifying grace, we may say: sanctifying grace is an 'inherent' perfection (dogma of faith); it is understood to be 'subjected' (to inhere) in the essence of the soul; it is more commonly regarded as a 'physical' entity, not a moral participation in the Divine nature, in the sense expounded above; more probably, it must be regarded as distinct from charity (although Duns Scotus and several others hold the contrary view); from it the various complementary perfections which we call 'virtues' and 'gifts of the Holy Ghost' branch out in the various faculties of the soul, either, according to some, 'physically'—viz. as a kind of connatural excrescences or offshoots of it—or, according to others, 'morally' only, i.e. as purely necessary concomitants. Being of 'supernatural,' viz. 'Divine,' order, it can be produced primarily by God alone; it is generated in the soul through the instrumentality, either 'physical' (Aquinas) or 'moral' (Suarez and the Jesuit theologians), of the Sacraments, in and through which the Divine power acts as the primary cause.

4. *Actual grace*.—(1) *Its existence and nature*.—Besides the supernatural superadded 'organism' (habitual grace, virtues, and gifts) which we have described above, the human soul, in order to produce supernatural actions meritorious of life everlasting, requires, each time, the help of *actual grace*, viz. some internal, transient, supernatural impulse from God, which enables it to perform now a supernatural action. The existence and necessity of this actual grace are emphatically asserted both by Scripture and by the universal Christian tradition; it is, moreover, a logical necessity of the philosophical system in which primitive Christian thought was immersed, and under the influence of which it made its theological evolution. Active grace is rendered necessary by the existence of the supernatural organism of habitual grace and the virtues. 'Quantumcumque aliqua natura corporalis vel spiritualis ponatur perfecta, non potest in suum actum procedere, nisi moveatur a Deo' (Aquinas, *Sum. Theol. Prima Secundæ*, qu. 109, art. 1). At the same time, we understand also that, if the influx of actual grace is indispensable to the act of the free will, that influx must, if it is really meant to supplement, not to pervert, the nature of the will, be of such a nature as to leave the freedom of will unimpaired. In this way we are brought to formulate the two cardinal principles on which the whole problem of *Auxilium* hinges: (a) the decree of God Almighty (in the present case, the decree of predestination) must ineluctably be fulfilled: anything decreed by God must come to pass; (b) even under the present influence of actual grace, the human will remains always essentially free in its action.

(2) *Sufficient and efficacious grace*.—The maintaining of those two exigencies—the unfailing efficacy of the decree of God and the perfect freedom of the human will from any necessitating

impulse—has ever been and remained the dominant preoccupation of the Church throughout all subsequent controversies. The Pelagian quarrel, the first important one on record on the present subject, gave occasion for the emphasizing of the distinction between 'sufficient' and 'efficacious' grace. That there are sufficient graces, offered by God to every human soul, may be termed, in fact, a Catholic dogma, and that some graces do prove efficacious may be said to be a fact of experience; nevertheless, that plain and obvious distinction was to acquire, through the discussion of the Pelagian tenets, a particular significance.

The real question at issue with the Pelagians was whether any internal grace of any description whatever ought to be considered as strictly or really necessary. God, who had called man to eternal happiness, had already, in the Pelagian view, given him, in his natural resources, as aided by the external graces of revelation and instruction, all that was essentially needed for that purpose. As original sin left in the soul no inherent blemish or unfitness, man, by making good use of his natural faculties, could work out for himself his own salvation. Internal graces (the habitual one perhaps, and the actual ones especially) might exist, did exist; but to assume more than their utility, viz. to assert their necessity, was to declare the will unfit for what it was given for, and consequently destroy its freedom. Those graces ought rather to be considered as favours occasionally conferred by God as rewards for the good deeds performed with the sole natural resources of the free will, but none of them was, at bottom, indispensably necessary.

The disputations aroused by those new doctrines brought forward the towering intellectual personality of St. Augustine, who was to remain henceforth the supreme authority, among the Fathers, on all questions *de Auxiliis*. As the mouthpiece of the Catholic tradition, and the interpreter of the doctrines of St. Paul, he definitively established, against both the Pelagians and that body of otherwise orthodox doctors called Semi-Pelagians, among several others, the following principles:

(1) Those only will be saved whom God has gratuitously predestined from all eternity. (2) Original sin is a hereditary blemish inherent in the human soul. (3) As a consequence of these facts, and owing to the infinite disproportion between the Divine and the natural order, no human being is capable, by his natural resources alone, of producing any supernatural action; or (4) in any way meriting the first grace (so that the said first grace might in any manner be legitimately understood as being due to him). (5) Actual grace is absolutely necessary for every supernatural action. (6) The actual graces granted to man are the means by which God accomplishes the effect of His eternal predestination, some of them being sufficient only, while others are intrinsically efficacious. (7) Neither sufficient grace, which never carries the assent of the will, nor efficacious grace, which is never resisted, causes any prejudice to the freedom of the will.

Thus, in the idea of Augustine, as ever afterwards universally understood and interpreted in the Church, practically without controversy, until the days of the Reformation, God provided both for the fulfilment of His decree of predestination and for the preservation of the freedom of the will, by granting to the unpredestined only sufficient grace, which they were sure always freely to disobey by their own fault, and by providing for the predestined efficacious grace, which they were sure always freely to follow; for those efficacious graces worked, not by overpowering, but by mysteriously inclining, the will, and causing it to give spontaneously its free assent.

How could it be that, on the one hand, a grace, truly and really sufficient, should never in fact carry the assent of the will, and, on the other hand, that a grace, infallibly efficacious, should always determine the said assent, without, how-

ever, in any way infringing upon the freedom of the will? It was a mystery, which Augustine asserted in the name of tradition and on the basis of the doctrine of St. Paul (in particular, Ro 9), but which remained otherwise unexplained. The attempt to solve that mystery was, at a much later period, to give rise to the various conflicting opinions, and to the endless theological quarrels, many of which have remained undecided even to the present day.

(3) *The systems.*—(a) *Pre-Tridentine development.*—It was long, however, before the controversy *de Auxiliis* was to be resumed again, when it had been once brought to a temporary conclusion, by the definitive condemnation of the Pelagians, at the Council of Ephesus (431). It was the task of the schoolmen of the Middle Ages to endow the Church with a full and organized theological system, the most perfect monument of which—in fact, the standard systematic exposition of the Catholic doctrine—is to be found in the works of St. Thomas Aquinas (1225–1274), the prince and 'sun' of Catholic theologians, and especially in his *Summa Theologica*. For those doctors, the problem of understanding how the unavoidable inefficacy of sufficient grace and, more especially, the unfailing efficacy of efficacious grace could be reconciled with a genuinely free will appears to have been no puzzle or no particular worry; accepting the mystery as it was, they would all have said quietly with Aquinas: 'As it behoves Divine Providence to preserve, not to pervert, the natures of things, God will move everything according to the requirements of its nature . . . so God moves the human will in such a manner that its motion remains contingent and not necessary' (*Sum.*, prima secundæ, qu. x. art. 4). God 'knew' how efficaciously to incline the will, without infringing on its liberty; that was enough. All He had decreed about man did find its realization; nevertheless, man was and remained, at all times, perfectly free. This, however, is just what the early Reformers, Luther and Calvin, three centuries afterwards, began by denying, maintaining that the human will had been so hopelessly perverted and weakened by original sin, that, having lost its freedom, it had not the power to resist any more, in any case, either the inclination of corrupt nature or the inspiration of grace, both being irresistible in their action. Hence the obedience of the will to concupiscence or to grace—passive, according to Luther; free from coercion only, according to Calvin—was necessary and irresistible in either alternative. As this doctrine involved the denial of the freedom of the will, it was condemned by the Council of Trent in its sess. 6, where it was declared (can. 4, 5, 6) that original sin had not destroyed the freedom of the will.

(b) *Post-Tridentine controversies.*—It had been the work of the Council of Trent to reassert the dogma of the freedom of the human will; it was, however, reserved to one of the most distinguished theologians of the same Council, Michel le Bay, or Bañus (1513–1589), of the celebrated University of Louvain, to be the first to offer a solution of the mystery of the reconciliation of the freedom of the will with the infallible efficacy of the Divine decree, which, being in many of its propositions a kind of forerunner of the later Jansenistic tenets, was, after several reproofs, finally condemned in 1580. The effect of that condemnation, pronounced by Gregory XIII., was to stamp out the Bañan doctrines in their original form; but they were soon after revived, by the middle of the 17th cent., in the celebrated heresy which, from its posthumous originator, Bishop Jansen of Yperen (1585–1638), whose *Augustinus* was published in 1640, was to retain in history the name of 'Jansenism' (*q.v.*). The substance of the system, as it can be defini-

tively gathered from the writings of its parent and adherents, is as follows:

Sufficient grace, which would have been sufficient indeed in the state of innocence, before original sin, is now, owing to the fallen state of human nature, really insufficient; for, as it is the ineluctable law of the will, in its present fallen condition, necessarily to follow the more powerful delectation, if grace, in some cases, proves less attractive and delectable to the human soul, the will will necessarily follow the greater delectation of sin, and grace will here have been insufficient 'in fact'; although it may be called sufficient 'in name'; hence, in reality, there are only insufficient and efficacious irresistible graces.

This is not the place to dwell on the various phases of the quarrel, the substance of the system being what we are mostly concerned with; it is enough to say that, crushed, in spite of all evasions, by several successive condemnations, it was finally extinguished in its ultimate form by the bull *Unigenitus*, directed in 1713 against Paschasius Quesnel.

The two fundamental notions, among others, in the Jansenist doctrine of grace, those which distinguish it from the orthodox systems tolerated in the Catholic Church, are therefore: the denial of the real and actual sufficiency—practically of the existence—of sufficient grace, and the assertion of the impossibility of resisting efficacious grace, thereby acknowledging in man no other freedom but freedom from coercion, or forcible compulsion. As against those two cardinal assumptions, viz. insufficient and irresistible graces, the orthodox systems maintain, each in its own peculiar way, that sufficient grace is truly and really sufficient, so that it is intrinsically possible to obey it, although, in fact, man never follows its inspiration, and also that it is intrinsically possible not to obey the impulse of efficacious grace; although such a disobedience will never occur *de facto*.

In the interval of time which divides the condemnation of the Baïan propositions from the rise of the Jansenist controversy, a Jesuit theologian, Luis Molina (1535-1600), published, in the year 1588, a book entitled *Liberi arbitrii cum gratiae donis, divina praescientia, providentia, praedestinatione et reprobatione concordia*, in which he proposes the following solution of the problem of sufficient and efficacious grace (qu. 14, art. 13, disp. 40):

Sufficient grace gives to man all that is necessary for a supernatural action; by assenting to or dissenting from its impulse, man makes it efficacious himself, God contributing to the determination of the free will nothing beyond a simultaneous concurrence, without which no action of any kind would be possible. Hence, in the Molinist system, the 'determining' cause of the election of the free will was, in each case, that will itself, God being merely a co-operator, working together with the will, 'like two workmen carrying the same stone, or pulling the same boat'—an example, by the way, long before rejected by St. Thomas Aquinas, in the very words afterwards used by Molina.

This doctrine was, from the start, received with marked disfavour by the older Jesuit theologians, and with an outburst of indignation by the Thomistic school—up to that time considered the foremost authority in theological matters.

The Thomists argued that in such a system, the principle of the acquiescence of the free will in the inspiration of grace being the spontaneous choice of the will itself, the efficacy of the decree of God was thereby rendered uncertain, as depending on the arbitrary choice of man; that, moreover, the First Mover was excluded from at least the initial determination, by which the will decided to accept grace and to co-operate with it, which was a metaphysical impossibility, since not even the slightest element of motion or determination could possibly come to existence but from the agency and impulse of God, the efficacy of which must extend to everything, even to the initial determination of the free will; so that otherwise God would not be the universal Prime Mover, and therefore no God. Existing, as a consequence, that the motion of God, in the case of the free election of the will, must be not only concurrent (viz. subordinate) but predetermining, they clamoured for an examination and condemnation of those revived 'Semi-Pelagian errors,' as the Thomists called them.

At the instance of the Thomists was summoned the celebrated Congregation *de Auxiliis*, which sat from 1592 to 1607 without coming to any definite decision, the only result being a decree

of Pope Paul IV. in 1611, forbidding any further disputation on the subject. The Jesuits, however, who had come gradually to identify themselves, as a body, with the Molinist side in the quarrel, had been made to feel that the doctrine, in its primitive form, was neither safe nor sound enough to hold. Accordingly, in the year 1613 a decree of the General of the Company of Jesus, Claudius Acquaviva, ratified twice afterwards, in two congregations of the Company held in 1616 and 1651, forbade the teaching of sufficient grace as explained by Molina, the Jesuit theologians henceforth unanimously and officially adopting the modified form of Molinism expounded mostly by Suarez (1548-1617) and commonly known by the name of 'Congruism.'

According to this new presentation, what makes the difference between sufficient and efficacious grace is the fact that the former is incongruous, or inappropriate, the latter congruous, or appropriate. In any given case, owing to the dispositions and circumstances in which an individual soul will find itself, some form of grace is sure to be incongruous or sufficient only, some other is congruous or sure to be efficacious; if the Divine eternal decree requires that assent be given to grace, the congruous one will be provided, if not, the incongruous one only will be offered; which, being incongruous, although certainly sufficient, will, owing to the bad dispositions of the subject, remain inefficacious. Thus, the infallible efficacy of the Divine decree is preserved, and the freedom of the will remains safe, nothing happening but what God has decreed—and that through the spontaneous choice of the free will.

But, even in its new garb, the Molinist doctrine fared no better at the hands of the Thomists. They maintained the same objections to it as to the pure Molinist form.

(4) *The other divisions of actual grace that are commonly proposed*, viz. 'operative' and 'co-operative' (*operans* and *co-operans*), 'prevenient' and 'subsequent' (*præveniens* and *subsequens*), 'excitative' and 'adjuvant' (*excitans* and *adjuvans*), are easily understood. They are merely designations based on the effect which the help of God is understood to exercise on the human soul, in the various different cases.

(5) *The cause of grace*, as being a quality of a Divine order, has always been understood in the Church to be the Deity alone, as first and principal Cause; although it has been the pleasure of God instrumentally to act through the human nature of Jesus Christ, or through the Sacraments, which, for that matter, are merely a prolongation of and a substitute for the said human nature. It is, however, understood also that 'virtus Dei non alligatur sacramentis,' that is to say, although God pledged Himself *always* to grant His grace through the Sacraments properly conferred and received in the right dispositions, nevertheless, He reserves to Himself the right to act and confer grace, even without them, for the benefit of those who are inculpably prevented from receiving the Sacraments. Ministerial causes of grace are the angels through good inspirations, or men through instruction, prayer, and the Sacraments.

(6) *The condition of the reception of habitual grace* (through which alone justification is effected) in the individual soul is, according to the definition of the Council of Trent (sess. 6, can. 6), a conversion or motion of the free will towards God, which, of course, is the effect of efficacious grace; and anathema is pronounced (can. 9) against any one asserting that faith alone, without such a movement of conversion of the free will toward God, is sufficient for justification.

As for the question whether any one may have the certainty of being in a state of justification, the Council of Trent (sess. 6, can. 13 and 14) anathematized the Calvinistic and Lutheran contentions that any one ought to persuade himself that he is in a state of justification, and that that sole and very persuasion is the only cause of the said justification. Hence it may be legitimately

inferred that from a Catholic point of view only a moral and human certainty can, ordinarily, be entertained of that fact.

(7) *Another class of graces*, the very improperly so-called *gratiae gratis datae* (gratuitous ones), embraces those supernatural privileges or 'charisms,' sometimes granted to a chosen few, to work miracles, to prophesy, to speak foreign languages, and exercise other miraculous powers of the same kind. With those graces we have nothing to do here, but merely remark that they are not more gratuitous than the ordinary graces (habitual and actual) with which we have been dealing thus far; any one of the latter, by the very fact that it is of a Divine order, is necessarily gratuitous and not due, at least as first grace; nevertheless it is always possible, by making good use of one grace to merit another, for, if Nature cannot, grace can merit grace. See art. CHARISMATA.

(8) *To what kind of acts* must the action of efficacious grace be understood to extend, or what kind of effects can be obtained only through grace? This is the last question that we must now answer, briefly mentioning the definition of the Church or the decisions of the Catholic theologians on the various points.

Grace is not necessary—as is commonly admitted—for acquiring even a vast and extensive knowledge of natural truths, as such a knowledge is within the natural capacity of the human mind; but a complete and exhaustive knowledge of all the truths pertaining to the natural order of things could obviously not be understood to exist in any human mind otherwise than through a special favour of God. As for supernatural truth, although it is intrinsically possible for any one to recognize the truth of any doctrine or dogma of faith which is properly expounded and proved to him, an acceptance of it, through a supernatural motive, can be the effect only of a double actual grace both in the mind and in the will (2nd Council of Orange, can. 5 and 6; and Trid., sess. 6, can. 3). It is a dogma of faith that man, even in a state of sin, can do some good works, and therefore that the actions of sinners are not necessarily all sins. This dogma has been repeatedly asserted, against Wyclif and John Hus, by the Council of Constance (sess. 15); against Luther and Calvin, by the Council of Trent (sess. 6, can. 7 and 8); against Baius, by Pius v., Gregory XIII., and Urban VIII. (prop. 35, 38, and 40 of Baius); and against Quesnel, the last of the exponents of Jansenism, who was condemned by Clement XI. (prop. 44, 45 ff.). The same authorities condemned also the assertions of Jansenius and Baius (prop. 25) that all the actions of infidels are sins.

By the condemnation of the 35th proposition of Baius, it became a doctrine of faith that it is intrinsically possible to love God above everything, as Author of the natural order of things by a natural love; such a supreme natural love of God, however, could not be so efficacious, in the present fallen condition of man, as to entail a perfect fulfilment of all the precepts of the natural law; for, although in the state of innocence such a thing would have been within the natural, unimpaired resources of human nature, after original sin only a special assistance of God can enable the fallen man to realize the supreme perfection of non-corrupted nature. If, at the same time, we remember that for any precept imposed on him man always receives a sufficient grace, we see that it cannot be inferred, from the above doctrine, that some of the precepts imposed by God are impossible to man—a doctrine condemned by the Council of Trent (sess. 6, can. 18), and by Innocent x., in the first of the celebrated 'five propositions' of Jansenius. Man, in a state of mortal sin, cannot for

ever resist all other temptations and avoid all other mortal sins without a special assistance of God, for the very same reason that he cannot fulfil all the precepts of the natural law, as we have just stated above.

In a state of justification, man is capable, through ordinary graces, of avoiding each venial sin individually; but only through a special and distinct privilege will he be capable of avoiding them all for all his life (Trid. sess. 6, can. 23); that special privilege, however, is universally understood, *propter honorem Domini*, to have been granted to the Blessed Virgin.

The Pelagian doctrine that man may merit the first grace by his good works, performed without the help of grace, and the Semi-Pelagian contention that he can prepare himself for it, so as to create, on the part of God, some kind of obligation to confer it on him, were both condemned by the 2nd Council of Orange (can. 3, 4, 6, 7, etc.)—a condemnation reiterated by the Council of Trent (sess. 6, can. 5 and 6)—because no one, except through the use of grace, can make himself in any way worthy of a gift of the Divine order, since by its very nature it infinitely exceeds every human capability. As a consequence, the only orthodox sense that can be attached to the axiom, '*Facienti quod in se est Deus non denegat gratiam*,' is the following: to him that through the help of prevenient, supernatural grace does all he can God will not refuse the grace of justification. Impeccable, human, and natural honesty alone does not make any man, in any way, entitled to the gift of grace and of justification. That it should be impossible for man to rise without grace from a state of mortal sin is a doctrine that was denied by no one, not even by Pelagius; it was defined as a dogma of faith in the 2nd Council of Orange (can. 14 and 19).

Each supernatural action requires a corresponding natural motion of God on the free will, since no kind of motion can take place without the action of the Prime Mover; but, since the presence of grace, either habitual or actual, does not remove the inherent defectibility of the human will, a 'long' perseverance appears to be the effect of a special help from God (Orange, can. 10 and Trid. sess. 6, can. 2). Final perseverance, involving the conjunction of a state of justification with the last instant of life, is also certainly the effect of a very special favour of God, as the canons just quoted imply; in fact, it coincides with predestination itself, of which it is the necessary and inseparable effect; it does not, however, consist properly in a peculiar motion, or distinct impulse, but ought rather to be described as the result of an ensemble of circumstances brought about by the merciful Providence of God, as an effect of His Divine predestination—circumstances which, of course, will vary with each individual soul.

LITERATURE.—The literature on the subject of Grace is well-nigh inexhaustible, and we shall therefore limit ourselves to the mention of the most prominent names and works only (*cf. Cath. Encyclopedia*).

St. Paul, *Epistle to the Romans*, chs. iii.-xi.; Augustine, *de Peccatorum meritis et remissione*, de Spiritu et littera, de Perfectione iusticie hominis, de Gestis Pelagii, de Gratia Christi et de peccato originali, de Correctione et gratia, de Predestinatione sanctorum, de Domo perseverantiae, de Natura et gratia, de Gratia et libero arbitrio, adversus Julianum, etc.; Thomas Aquinas, *Sum. Theol.*, prima secundae, qu. cix.-cxiv.

GENERAL LITERATURE.—The Commentators of Aquinas, in particular among Thomists: C. R. Billuart, *Summa Sanctorum Thomae*, ed. Lequette, Arras, 1867-72, i., 'de Dec.' diss. vi.-viii., and ii., 'de Gratia'; 'de Gratia Dei,' in *Collegii Salmant. Cursum theol.* ix. and x., Paris, 1870; de Lemos, *Panoplia Divinae gratiae*, Liège, 1676; P. de Soto, *de Natura et gratia*, Venice, 1560; A. M. Lépiciere, *de Gratia*, Paris, 1907; among Molinists: Bellarmine, Suarez, Vasquez, Ripalda, *de Ente supernaturali*, Cologne, 1648; among later authors: F. Satolli, *de Gratia Christi*, Rome, 1886; C. Mazzella, *de Gratia Christi*, do. 1882; L. Billot, *de Gratia Christi et libero arbitrio*, do. 1908; Heinrich-Gutberlet, *Dogmat. Theologie*, viii., 'Von der

Gnade, Mainz, 1897; J. Pöhl, *Lehrbuch der Dogmatik* 4, II. (Paderborn, 1909) 822-578, and in the *Catholic Encyclopedia*, New York, 1908, vol. vi, art. 'Grace,' and 'Controversies on Grace.' See also the various recent manuals on Dogmatic Theology, most of which are Molinistic. On the doctrine of the Fathers: J. Habert, *Theol. Graecorum Patrum vindicta circa universam materiam gratiae*, Paris, 1646; E. Scholl, *Die Lehre des heil. Basilides von der Gnade*, Freiburg, 1881; F. K. Hümmer, *Des heil. Gregor von Naz. Lehre von der Gnade*, Kempten, 1890; E. Weigl, *Die Heilehre des heil. Cyrill von Alex.*, Mainz, 1906.

ON SANCTIFYING GRACE.—R. Bellarmine, *de Justificatione impii*, ed. Fèvre, vi. (Paris, 1873) 149 ff.; J. Katschthaler, *de Gratia sanctificante*, Salzburg, 1886; L. Hubert, *de Gratia sanctificante*, Paris, 1902; W. Liese, *Der heilmotwendige Glaube*, Freiburg, 1902; H. S. Denifle, *Die abendländischen Schriftausleger über iustitia Dei und justificatione*, Mainz, 1905; J. B. Terrien, *La Grâce et la gloire*, 2 vols., Paris, 1897; G. Laboussie, *de Virtutibus Theologicis*, Louvain, 1890, *de Gratia divina*, do. 1902; C. Mazzella, *de Virtutibus infusis*, Rome, 1894; F. Satolli, *de Habitibus*, do. 1897; T. J. Bouquillon, *de Virtutibus Theologicis*, Bruges, 1890; B. Froget, *De l'Inhabitation du Saint-Esprit dans les âmes justes*, new ed., Paris, 1901, etc.

ON ACTUAL GRACE.—For the literature pertaining to Pelagianism, Augustinianism, and Jansenism, see the particular articles on each subject; also on actual grace proper: G. Byonius, 'de Gratia auxilii,' in Becanus, *Theologia Scholastica*, Rome, 1668; Boucat, *Theologia Patrum*, Paris, 1718; F. A. Zaccaria, 'Diss. de auxilio sine quo non,' in *Theaurus theol.*, vol. v., Venice, 1762; J. Ernst, *Werke und Tugenden der Engeligen*, Freiburg, 1871; M. J. Scheeben, *Natur und Gnade*, Mainz, 1881; M. Glosner, *Lehre des heil. Thomas von Witten der göttl. Gnade*, do. 1871; A. Palmieri, *de Gratia divina actus*, Gießen, 1885; F. Wörter, *Die Geistesentwicklung des heil. Augustinus*, Paderborn, 1892; O. Rottmann, *Der Augustinismus*, Munich, 1892; C. Wolsgruber, *Augustinus*, Paderborn, 1898.

Besides the authors already mentioned under 'General Literature,' we shall mention: (a) *Thomists*.—D. Bañez, *Comment. in S. Thomam*, Salamanca, 1584; F. D. Alvarez (one of the theologians of the Congregation 'de Auxiliis'), *de Auxiliis Divinae gratiae*, Rome, 1612, and *Responsionum libri ix.*, Louvain, 1622; de Lemos, besides the *Panoplia* above mentioned, *Acta omnium Congregationum*, etc., do. 1702 (the history of the Congregation 'de Auxiliis' in which he was a prominent champion of the Thomistic doctrines); P. Ledesma, *de Divinae gratiae auxilio*, Salamanca, 1611; J. P. Gonet, *Clypeus theologiae Thomisticae*, 16 vols., Bordeaux, 1659-69; V. Contenson, *Theologia mentis et cordis*, Lyons, 1673; A. Goudin, *de Scientia et voluntate Dei*, new ed., Louvain, 1874; V. L. Gotti, *Theologia scholastica-dogmatica*, Venice, 1750; P. M. Gazzaniga, *Theologia dogmatica*, 2 vols., Vienna, 1776; C. R. Billuart, *Le Thomisme triomphant*, Paris, 1725; P. F. A. M. Dummermuth, *S. Thomas et doctrina praemissionis physicae*, do. 1886, and *Defensio doctrinae S. Thomae*, do. 1896; J. A. Manser, *Possibilitas praemissionis physicae*, Freiburg, 1895; G. Feldner, *Die Lehre des heil. Thomas v. Aquin über die Willensfreiheit*, Graz, 1890; M. Papagni, *La Mente di S. Tommaso*, Benevento, 1901; I. Ude, *Doctrina Cajetani de influxu Dei*, Graz, 1904; Del Prado, *de Gratia Dei et libero arbitrio*, Freiburg, 1907.

(b) *Molinists*.—L. Molina, *Concordia*, new ed., Paris, 1876; F. Suarez, *de Concursu, motione et auxilio Dei*, new ed., do. 1856, 'de Auxilio efficaci,' *Opera*, do. 1856, xi., 'de Vera intelligentia auxilii efficaciis,' *Opera posthum.* x., Append.; L. Lessius, 'de Gratia efficaci,' in *Opus*, II., do. 1878; B. Jungmann, *de Gratia*, Regensburg, 1896; de San, *de Deo Uno*; *de Mente S. Thomae circa praedeterminationes physicas*, Louvain, 1894; V. Frins, *S. Thomas Aquinatus Doctrina de co-operatione Dei*, Paris, 1893; T. de Régnon, *Bañez et Molina*, do. 1883; J. Pöhl, *Lehrbuch der Dogmatik* 4, II. (Paderborn, 1909) 452-483.

Belonging strictly to neither of the above schools may be mentioned: Bellarmine, 'de Gratia et libero arbitrio,' in *Opera*, ed. Fèvre, Paris, 1873, v. and vi.; F. Wörter, *Die christliche Lehre über Verhältnisse von Gnade und Freiheit bis auf Augustinus*, Freiburg, 1856; A. M. de Liguori, *Op. dogmat.*, ed. Walker, New York, 1903, I. 517-18, II. 707-18; H. Tournely, *de Gratia*, Venice, 1755; W. Herrmann, *de Divina gratia*, Rome, 1904; J. Pecci, *Sententia di S. Tommaso*, do. 1885; A. Adeodatus, *J. Pecci Schrift*, Mainz, 1898.

E. L. VAN BECELAERE.

GRACE AT MEALS.—The Christian practice of grace at meals has its roots in the religious instincts of the human race. It consecrates even the simple meal. It is a witness to the religious solemnity which is attached to every meal as an act of maintaining human life, and as a means of devoting the fruits of the earth to their highest use. Grace at meals consecrates at once the meal itself, the gifts which are consumed, and those who consume them, to God's service. An invitation to dinner in the 2nd cent. A.D. runs:

'Chaeomon requests your company at dinner at the table of the Lord Sarapis (sic) in the Serapeum to-morrow, the 15th, at 9 o'clock.' ('The Oxyrhynchus Papyri,' pt. I. p. 177, *Egypt. Explor. Fund.*, Graeco-Roman Branch, 1896).

Such a meal in the Serapeum witnesses to the religious character even of the social meal. And the custom of libations in pre-Christian times stamps the same religious character on every meal. The Homeric feast was not complete without the *σπονδή* or *λοιβή*, the drink-offering poured out either on the hearth, the floor, or the altar, to the gods: *αὐτὰρ ἐπεὶ σπονδῆς τε καὶ εἴεται, ᾗ θεῖος ἐστὶν* (Hom. *Od.* iii. 45). It was a drink-offering and a prayer, in this case to Poseidon. The Romans practised similar rites. The *secunda mensa*, or dessert, was separated from the earlier part of the meal by the offering of the *mola salsa*, the meal-offering of spelt and salt, and the *libatio* either to the Lares or to some one of the gods. Pliny witnesses to the early origin of the rite: 'Numa instituit deos fruge colere, et mola salsa supplicare' (*HN* xviii. 2). Vergil refers to the libations at the feast before the tomb of Anchises:

'Hic duo rite mero libans carchesia Baccho

Fundit humi, duo lacte novo, duo sanguine sacro'

(*Æn.* v. 771).

The Jews, like the Greeks and the Romans, consecrated their meals with the *brakkah*, or blessing (*EBi*, col. 2996). The sacrificial feast at the high place of the city in 1 S 9¹³ was delayed until the coming of Samuel to 'bless the sacrifice.' This is the earliest example of grace before meat. On the occasion of the reception of the Jewish scholars in Egypt by Ptolemy Philadelphus (285-247 B.C.), it is recorded in a letter of pseudo-Aristeas (c. 200 B.C.) that Elisha the priest, one of the delegates, was asked to say grace (*ποιήσασθαι κατενύχην*), and that he said it standing. Josephus says of the Essenes:

'A priest says grace before meat, and it is unlawful for any one to taste of the food before grace be said (*πρὶν τὴν εὐχὴν*). The same priest, when he hath dined, says grace again after meat; and when they begin, and when they end, they praise God, as him that bestows their food upon them' (*BJ* ii. viii. 6).

The treatise *Berākhot* proves that this custom was established by the end of the 2nd cent. A.D. Women, slaves, and children were to say grace, though they were free from other religious duties. The blessing of the bread reads:

'Blessed art Thou, O Lord our God, King of the Universe, who bringest forth bread from the earth.'

The blessing of the wine is:

'Blessed art Thou, O Lord our God, King of the Universe, who createst the fruit of the vine.'

Among the forms of grace after meat is:

'Blessed be the Lord our God, the God of Israel, the God of hosts, enthroned upon the Cherubim, for the food which we have eaten.'

The NT witnesses to the grace before meat. Our Lord in the miracle of the Feeding of the Five Thousand blessed the loaves and fishes: *εὐλογῶντες καὶ κλάσας ἔδωκεν* (Mt 14¹⁹; cf. Mk 6⁴, Lk 9¹⁶). In the miracle of the Four Thousand, He gave thanks: *εὐχαριστήσας ἔκλασεν καὶ ἔδιδον* (Mt 15³⁶, Mk 8⁶). St. John (6¹¹) uses the latter term, *εὐχαριστήσας*. St. Paul refers to the practice of grace, and states clearly its spiritual meaning:

'Meats, which God created to be received with thanksgiving (*μετὰ εὐχαριστίας*) by them that believe and know the truth. For every creature of God is good, and nothing to be rejected, if it be received with thanksgiving: for it is sanctified (*ἁγιασθεὶς χάρι*) through the word of God and prayer' (1 Ti 4⁴⁻⁵).

The earliest witnesses to the practice in the 2nd cent. are Clement of Alexandria and Tertullian. Clement, in his *Paedagogus* (c. A.D. 180), referring to the matter of feasts, says:

'It is meet before we partake of food to bless (*εὐλογεῖν*) the maker of all things, and to sing (*ψάλλειν*) when drinking' (II. 4).

In the *Sermones* (c. 200-202) he speaks of prayers and praises (*εὐχαὶ τε καὶ αἶνοι*), and readings (*ἐκτελεῖς τῶν γραφῶν*) before eating; and psalms and hymns (*ψαλλοὶ τε καὶ θῆνοι*) afterwards (vii. 7). Tertullian, in his *Apologeticum*, ch. 39 (A.D. 197), refers to prayer before and after meals:

'Non prius discumbitur quam oratio ad deum praegustetur . . . Aequae oratio convivium dirimit.'

St. Basil, writing c. 360, refers to the *εὐχαὶ πρὸ*

της τροφῆς and those μετὰ τροφῆν (*Ep. ii. ad Greg.*). And both Tertullian and St. Chrysostom witness to the use of the sign of the cross on such occasions. Tertullian, in his treatise *de Corona* (c. 211), writes: 'ad mensas . . . frontem signaculo terimus,' the sign being used on the forehead (ch. 3). St. Chrysostom says that even swine's flesh is not unclean when received with thanksgiving and marked with the sign of the cross (*in 1 Tim. 4, hom. xii.*).

Dom Paul Cagin (*L'Eucharistie primitive*, Rome, Paris, Tournai, 1912, pp. 252-288) has shown that the prayers for the blessing of the cup and the blessing of the bread in the *Didache* (ch. ix.) are not Eucharistic. They may, therefore, be noted as among the earliest forms of grace at meals.

The *Apostolic Constitutions* (c. 400) gives the first example of the form of words:

'Oratio in prandio: Benedictus es, Domine, qui nutris me a pueritia mea, qui das escas omni carni, imple gaudio et laetitia corda nostra ut . . . abundemus in omne opus bonum in Christo Jesu Domino nostro, per quem . . . ' (vii. 49).

The Western practice appears in two monastic rules. The Rule of St. Benedict says:

'Ad mensam autem, qui ante versum non occurrerit, ut simul omnes dicant versum et orent . . . corripitur . . . Similiter autem patitur, qui ad illum versum non fuerit praesens, qui post cibum dicitur' (c. 43 [*PL* lvi. 670]).

And St. Columban says:

'Si quis non venerit ad orationem supra mensam et post cibum, duodecim psalmos cantet' (*in Poenit.* [*PL* lvi. 682]).

The earliest Western formularies are in the *Gelasian Sacramentary* (7th cent.). There are six 'orationes ante cibum,' and two 'orationes post cibum.' The first reads:

'Reces nos, Domine, donis tuis, et opulentiae tuae largitate sustenta. Per,' etc.

The fourth reads:

'Benedic, Domine, dona tua, quae de tua largitate sumus sumpturi. Per,' etc.

The sixth reads:

'Tua nos, Domine, dona reficiant, et tua gratia consoletur. Per Dominum nostrum.'

These appear also in the *Leofric Missal* A of the first half of the 10th century. The second form 'post cibos' reads:

'Satiati sumus, Domine, de tuis donis ac datis: reple nos de tua misericordia, qui es benedictus, qui cum Patre et Spiritu sancto visis . . . ' (*Gelas. Sacr.*, ed. Wilson, Oxford, 1894, p. 293 f.).

The *Leofric Missal* has forms also 'ad cibum benedicendum' and 'ad potum benedicendum.' Among the former is:

'Quod nobis est appositum dei filius benedicat';

among the latter:

'Nos deus et nostra benedicat pocula christus' (*Leofric Missal*, ed. Warren, Oxf. 1883, p. 8).

Two prayers for use at meals occur in the Bobbio MS of the *Sacramentum Gallicanum*. The 'Benedictio ad mensam' is similar to the fourth in the *Gelasian Sacramentary*:

'Benedicantur nobis, Domine, dona tua, quae de tua largitate sumpturi sumus, qui vivis et regnas.'

The 'Benedictio post mensam levatam' is the first example of the memento of the benefactors in the grace:

'Gratias tibi agimus, omnipotens, aeternae Deus, qui nos de tuis donis satiare dignatus es, per famulos illos. Redde illis Domine pro parvis magna, pro temporalibus praemia sempiterna, qui vivis et regnas' (*Muratori, Lit. Rom. Vetus*, Venice, 1748, ii. 959).

The order of grace at meals is fully given in the Customaries of St. Augustine's, Canterbury, and St. Peter's, Westminster. The shorter form occurs in reference to the meal of the Lector and the four Servitors:

'Dicet unusquisque secrecius sub silencio "Benedicite"; et . . . istud saltem ad minus devote subjungat: "Cibum et potum servorum suorum Filius Dei benedicat," crucis signum faciendo' (*Henry Bradshaw Society*, vol. xxiii. p. 164; cf. vol. xxviii. p. 104). At the close: "Versus: "adjutorium nostrum in nomine Domini." Versus: "Sit nomen benedictum." Oratio: "Retribuere" et cetera. "Benedicamus Domino." "Fidelium animas."

The fuller form of grace was used at the common meal in the refectory:

'Et unusquisque . . . in ordine suae conversionis stare debet, priusquam a cantore incipiatur "Benedicite." . . . Atque cantor vel succentor in eodem loco stabit post refectionem, inchoando "Confiteantur," sive "Memoriam." . . . Incepto autem "Benedicite" ante refectionem, stabit presidens, sicut et ceteri fratres, ad orientem intentus, atque ad "Gloria Patri," et dum Dominica dicitur oratio et (a) sacerdote profertur benedictio, stabit, sicut et alii, suppliciter inclinus . . . Sed, prolata benedictione, quicumque eam (scilicet) sonaverit, cum pronuntiaverit sacerdos "Spiritus sancti, Deus," eriget se, et ad mensam superius intrabit. Ceteri vero stabunt inclini, quousque dixerit sacerdos "Per omnia secula seculorum"; atque tunc se erigent omnes in respondendo "Amen" (ib. vol. xxiii. p. 164 f.; cf. vol. xxviii. p. 105 f.).

Grace after meals is referred to in the Customary of St. Peter's, Westminster:

'Incipient omnes pariter sub silencio "Confiteantur tibi, Domine," vel "Memoriam fecit," et, postquam ad "Gloria Patri" et "Sicut erat" se inclinaverint, eriget se sacerdos qui prior est in ordine et dicet: "Agimus tibi gratias," vel "Benedictus Deus in donis suis," ceteris interim inclinantibus' (vol. xxviii. p. 122).

The Canterbury text (*Brit. Mus. Coll. MS Faustina C. xii.*) is dated 1330-1340. The Westminster text (*Brit. Mus. Coll. MS Otho C. xi.*) is of the latter part of the 14th century. They represent the Benedictine use at that period. The full grace occurs among the 'Gratiarum actiones' of another Westminster MS, c. 1500, Bodl. MS Rawlinson Liturg., g. 10 [*N.C.* 15832]. It is printed in vol. iii. of the *Westminster Missal* (H. Bradshaw Soc., vol. xii. pp. 1377-1379).

'Ante prandium gratiam:—Benedicite. Oculi omnium in te sperant . . . et imple omnes animal benedictione. Gloria patri. Kyrieleyson. . . Et ne nos. Oremus. Benedic, domine, dona tua quae de tua largitate sumus sumpturi. Per dominum. . . Jube, domine (sic), benedicere. Mense celestis particeps faciat nos rex eterne glorie. Amen.'

'Post prandium:—Deus pacis et dilectionis maneat semper nobiscum. Tu autem domine. Confiteantur tibi domine omnia opera tua: Et sancti tibi benedicant tibi. Gloria patri. . . Laudate dominum. . . Gloria patri. Agimus tibi gratias, omnipotens deus, pro universis beneficiis tuis qui vivis et regnas. Per omnia secula seculorum. Amen. Laudate dominum. . . Gloria patri. Sicut erat. Kyrieleyson. . . Pater noster. Et ne nos. . . Sit nomen domini benedictum. Retribuere dignare, domine deus, omnibus nobis bona facientibus propter nomen tuum vitam eternam. Amen. Benedicamus domino. Mater ora filium. . . Aue sancte rex edwards inter celi illa. . . 'Pro defunctis:—De profundis. . . Requiem eternam. . . 'Oratio:—Absolve, quesumus, domine, animas. . . Amen.'

This grace after meals explains the order in the Customary of St. Peter's, Westminster, and the reference to founders and benefactors in the later College graces (H. Bradshaw Soc., vol. xii. p. 1378 f.).

Hearne, under date 17th Oct. 1712, refers to a grace written in an old Roman breviary of 1520, and belonging to Norwich, used probably in one of the religious houses of Norwich:

'Benedic, domine, creaturam istius (sic), sicut benedixisti quinquae panes in deserto; ut omnes gstantes ex eo (sic) tam corpori quam animae recipiant sanitatem' (Hearne's *Collections*, vol. iii., Oxf. Hist. Soc., vol. xiii. [1888], p. 478; cf. 'Benedictio panis,' in *Rom. Miss.* of 1515 [H. Bradshaw Soc., vol. xxxiii. p. 314]).

The College use may be illustrated by the Brasenose College Graces:

'Ante prandium:—Oculi omnium spectant in Te, Deus! Tu das illis escas tempore opportuno. Aperis manum Tuam et imple omne animal Tu benedictione. Mensae coelestis nos particeps facias, Deus. Rex aeternae gloriae. . . 'Post prandium:—Qui nos creavit, redemit, et pavit, sit benedictus in aeternum. Deus, exaudi orationem nostram. Agimus Tibi gratias, Pater coelestis, pro Guilermo Smyth episcopo, et Ricardo Sutton milite, Fundatoribus nostris; pro Alexandro Novel et Josepha Frankland, aliisque Benefactoribus nostris; humiliter Te precantes ut eorum numerum benignissime adauges. Ecclesiam Catholicam, et populum Christianum custodi. Haereses et errores omnes extirpa. Victorian Regnam nostram et subditos ejus defende. Pacem da et conserva per Christum Dominum nostrum.'

¹ Wickham Legg (*Oxf. Hist. Soc.*, vol. liii. p. 212) compares this grace with those in the *Sarum Manual* of 1601, and with the Latin graces in the early primers and the English in the later primers.

² Wickham Legg writes (*loc. cit.*): 'The idea of the commemoration of benefactors may have arisen from the commemoration of the faithful departed in the *Sarum Manual*; the primers often have at end: "God save the Church, King, and Realm, and God have mercy on all Christian souls. Amen." But the practice is as early as the Bobbio *Sacramentum Gallicanum*, as quoted above.'

'*Ante coenam* :—Omnipotens et sempiterna Deus, sine quo nihil est dulce nihil odoriferum, misericordiam Tuam humiliter imploramus, ut nos coenamque nostram benedicas; ut corda nostra exhilares; ut quae suscepturi sumus alimenta, Tuo honori, Tuaeque beneficentiae accepta referamus: per Christum Dominum nostrum.'

'*Post coenam* :—Quod corpora nostra, Deus optime maxime, cibo potuque abunde refecisti, agimus Tibi gratias, quantas possumus maximas: simulque precamur, ut animas nostras verbo et spiritu deinde pascas; ut omnia mala fugiamus; ut quae sint Tibi placitura perfecte intelligamus, diligenter meditetur, et ad ea praestanda toto impetu feramur: per Christum Dominum nostrum.'

The first of these, but for the *et* between *omnipotens* and *sempiterna*, has the liturgical stamp in its rhythm and its language. The second is probably of later date; the language is academic, and the *Deus optime maxime* is not liturgical. Wickham Legg says that these two graces stand almost alone (Oxf. Hist. Soc., vol. liii. [1909], 'Brasenose Quatercentenary Monograph,' p. 211 f.).

There is reference to the grace in a roll describing the feast at the enthronization of George Nevill, Archbishop of York, in the year 1466.

Before the feast, 'the minister of the Church doth after the old custome, in syngyng of some proper or godly Caroll.' After the feast, and before the ale and wine are brought in, 'all the Chaplyns must say grace, and the Ministers do syng' (Leland's *Collectanea*, ed. Hearne, Lond. 1774, vol. vi. pp. 9, 13).

The French language has preserved the old name *bénédictité* for 'grace.' To say grace is *dire la bénédiction*, or *dire ses grâces*. The English phrase 'ask a blessing' seems a reminiscence of the *Jube, domine, benedicere* of the Church. The Italian has *benedizione della tavola*, the Spanish *benedicir la mesa*.

The English grace at meals in common use is this:

Before meals :—'For what we are about to receive the Lord make us truly thankful, for Christ's sake. Amen.'

After meals :—'For what we have received the Lord make us truly thankful, for Christ's sake. Amen.'

The grace before meals has an echo of the 'sumus sumpturi' of the fourth form in the *Gelasian Sacramentary*.

Another English grace is an echo of the older benediction:

Before meals :—'Bless, O Lord, these gifts to our use, and ourselves to Thy service, for Christ's sake. Amen.'

After meals :—'For these and all His mercies, God's holy name be praised, for Christ's sake. Amen.'

A short Latin grace also used in England is this:

Before meals :—'Benedictus benedicat, per Jesum Christum Dominum nostrum. Amen.'

After meals :—'Benedictio benedicatur, per Jesum Christum Dominum nostrum. Amen.'

French and English Roman Catholics have the following form:

Before meals :—'V. Benedicite. R. Dominus. Nos et ea quae sumus sumpturi benedicat dextera Christi in nomine Patris et Filii et Spiritus sancti. Amen.'

After meals :—'Agimus tibi gratias, omnipotens Deus, pro universis beneficiis tuis, qui vivis et regnas in secula seculorum. Amen. V. Benedicamus Domino. R. Deo gratias. Fidelium animae per misericordiam dei requiescant in pace. Amen' (*Catechisme, ou Abrégé de la Foi*, Rouen, 1878, p. 179).

The old College grace among English Roman Catholics is much the same:

Before meals :—'Benedic, Domine, nos et haec tua dona quae de tua largitate sumus sumpturi per Christum Dominum nostrum. Amen.'

After meals :—'Agimus tibi gratias, omnipotens Deus, pro universis beneficiis tuis, qui vivis et regnas in secula seculorum. Amen.'

These appear in English in the following forms of grace:

Before meals :—'Bless us, O Lord, and these thy gifts, which we are about to receive of thy bounty, through Christ our Lord. Amen.'

After meals :—'We give thee thanks, Almighty God, for all thy benefits, who livest and reignest world without end. Amen' (*The Garden of the Soul*, ed. c. 1862, p. 232).

It used to be regarded as the duty of the head of the house to say grace at his own table, as is illustrated by a statement of Addison in no. 458 of the *Spectator*, Friday, 15th August 1712,

where he censures the false modesty of the English gentleman:

'Our Excess of Modesty makes us shamefaced in all the Exercises of Piety and Devotion. This Humour prevails upon us daily; inso much, that at many well-bred Tables, the Master of the House is so very Modest a Man, that he has not the Confidence to say Grace at his own Table: A Custom which is not only practised by all the Nations about us, but was never omitted by the Heathen themselves. English Gentlemen who travel into Roman Catholick Countries, are not a little surprised to meet with People of the best Quality kneeling in their Churches, and engaged in their private Devotions, tho' it is not at the Hours of Publick Worship. An officer of the Army, or a Man of Wit and Pleasure in those countries, would be afraid of passing not only for an Irreligious, but an ill-bred Man, should he be seen to go to Bed, or sit down at Table, without offering up his Devotions on such occasions.'

At a public dinner, the Chaplain or the Rector or Vicar of the parish, or some other clergyman, is called upon to say grace. This is also an old custom in some private houses. There is also the custom of the younger children saying grace on behalf of the family. Is it in reference to our Lord's words: 'Yea; have ye never read, Out of the mouth of babes and sucklings thou hast perfected praise' (Mt 21¹⁶)?

The metrical graces in general use in schools were written by John Cennick, a friend of the Wesleys. They were first published in 1741 in his *Sacred Hymns for the Children of God, in the Days of their Pilgrimage* (London, 1741, p. 198).

Hymn cxxx. *Before Meat* :—

'Be present at our Table, Lord;
Be Here, and Ev'rywhere adore;
Thy Creatures bless, and grant that we
May feast in PARADISE with Thee.'

Hymn cxxxi. *After Meat* :—

'We bless Thee, Lord, for this our Food;
But more for Jesu's Flesh and Blood;
The Manna to our Spirits giv'n,
The Living Bread sent down from Heav'n.'

There are four more lines in this latter grace, but they have not come into use. The Eucharistic character of Cennick's Grace after Meat is lost in the version published in Bickersteth's *Christian Psalmody* (c. 1833). This more modern form reads:

'We thank Thee, Lord, for this our food,
But bless Thee more for Jesu's blood;
May Manna to our souls be given,
The Bread of life sent down from heaven.'

These metrical graces in their original form breathe in every line the inspiration of the Benedictions of the old Service Books of the Western Church.

GRÆCO-EGYPTIAN RELIGION.—I. Introductory.—The Macedonian conquest of Egypt is, for practical purposes, the starting-point for any account of Græco-Egyptian religion. Before that time there had been little, if any, interchange of religious ideas between the two countries: such knowledge as the Greeks possessed of Egyptian gods and worship was of the most superficial nature, while there is no evidence, and no likelihood, that the Egyptians cared to make any inquiry as to Greek theology. There had been a commercial intercourse across the Levant which, so far as can be judged from archaeological finds, extended back to the period of the earliest Egyptian dynasties; and at least four centuries before the time of Alexander the Great a factory for Greek merchants was definitely established near the mouth of the Nile. But those who sojourned at Naukratis, though they doubtless reported to their friends in Greece such information as they were able to collect about the customs of the strange country

which they had been privileged to enter, would have little chance of learning more of its religion than could be gathered from observation of the native quarter of the town, in such external details as the forms in which the gods were represented or the manner in which the festivals were conducted. A certain number of Greeks penetrated further into the country as mercenaries in the Egyptian army; but it could hardly be expected that these soldiers of fortune would furnish any reliable account of the theology of their employers. Even after the Persian conquest of Egypt, when the valley of the Nile became more open to foreigners, a Greek traveller with some pretensions to training in the collection of facts was unable to add to the existing stock of information on Egyptian religion anything more than what filtered to him through guides and interpreters; and, if a Greek student actually went to live in Egypt, in order to learn something of the wisdom of the Egyptians, his lessons would appear to have been confined to secular science. Neither Herodotus nor Plato displays any kind of acquaintance with the philosophy of Egyptian religion.

While the Greek visitors to Egypt gathered little knowledge of the Egyptian gods, the Egyptians do not appear to have taken any interest in the Greek gods whom they might have studied at Naukratis. There were, in the Greek quarter of that town, a number of temples; if there existed a strong contingent of merchants from some particular Greek State, they erected a building in which they could worship the protecting deity of their home. Thus the Samians had their temple of Hera in Naukratis, the Milesians theirs of Apollo, the Æginetans theirs of Zeus.¹ If the community was too small or too poor to maintain a separate temple, they could find a place in the precinct of the gods of the Greeks, and there make their dedications to their patron. But the very extensive series of objects connected with religious worship which has been found on the site of Naukratis yields no evidence whatever of Egyptian influence on the Greek cults which had been planted there, or of any notice of the Greek gods by the Egyptians.² So far as the Egyptians were concerned, Zeus, Hera, and Apollo remained as much strangers and foreigners in Naukratis as in their homes across the sea.

It is true that a few sporadic instances are recorded in which a member of one nation would appear to have recognized a god of the other. On the Egyptian side, however, the recognition is practically confined to cases in which a king of Egypt sent a gift to a Greek temple;³ and the motives of such actions were probably political rather than religious. The early Greek dedications to Egyptian gods—e.g. to Zeus Thebaïos (Ammon) or to Apis⁴—were probably more genuine acts of worship, but they are extremely rare. The names of Greek visitors which are to be found scratched on the walls of Egyptian temples, so far as they date before the time of Alexander, may safely be disregarded;⁵ there is nothing to show that in any instances they were inscribed as an act of homage to the deity who dwelt in the temple, and they probably testify to the absence, rather than to the presence, of any feeling of reverence in the writers.

The conquest of Egypt by Alexander and its settlement under a Macedonian government which

developed into the dynasty of the Ptolemies placed the Greeks in an entirely new relation to Egyptian religion. They were no longer visitors or sojourners in the country; they became domiciled throughout its length and breadth, not merely as officials or in garrisons, but in every rank and occupation. In a few centres they formed more or less cohesive groups, as in the case of the colonists of the Fayum; and the towns of Ptolemis and Alexandria were actually organized on Greek lines; but there were a very large number of Greeks, or at any rate men bearing Greek names, scattered about the Egyptian towns and country districts, probably in a manner and position generally similar to those of the modern Greek settlers in the Egyptian villages to-day. These Greeks would hardly anywhere be sufficiently numerous to establish a centre for the worship of their own gods; but, if they wished to find facilities for invoking divine help, there were temples ready to hand. It is true that the names and attributes of the deities were strange; but the one practical result of the inquiries by earlier Greek travellers into Egyptian religion had been the formation of a catalogue of identifications of Greek and Egyptian gods, which is preserved in the account of Herodotus. These identifications were based on very superficial evidence; still, such as they were, they supplied a sort of traditional connexion, which was rapidly accepted, as may be seen from the names given by the Greeks to the more important Egyptian towns: in nearly every instance these were known to the Greeks as the cities of the accepted Greek equivalents of the principal Egyptian deities worshipped in the respective towns. And there was nothing foreign to the general religious theories of the Greeks in a syncretism of gods; so that it was without difficulty that the Greek settlers entered the Egyptian temples and made their offerings to the native deities on the strength of an identification which would be more or less real according to the degree of culture of the individual worshipper. The more educated might reason out, to their own satisfaction, the similarity of attributes between two different gods; to the ignorant, names were of little account, and it was safest to secure the protection of the accepted lord of the district.

The Egyptian priests, on their side, were probably nothing loth to adopt these new followers of their gods. It was no more alien to the Egyptian than to the Greek religion to identify one of their own deities with a foreigner. Indeed, the Egyptian theology was already a fusion of many systems, drawn from all the nations which had occupied or influenced Egypt throughout its history. From time to time fresh gods had been introduced, only to be absorbed into the general medley of Egyptian religion; and the various rises and falls of the power of the priests had tended to increase the complexity. When the priests held a commanding position in the country, it was all to their advantage to multiply the number of gods and secure fresh endowments for their new creations; when an unsympathetic ruler crushed them and took away their property, they amalgamated gods so that one worship could be supported by the revenues which were no longer adequate for two. It was a small matter to add a fresh set of identifications to those which had been formulated in the past. And the adhesion of members of the conquering race would be welcome to the Egyptian priests, not only on account of the material value of their support, but also as some guarantee that the native religion would receive recognition from the new rulers.

The general result of these tendencies was to produce throughout Egypt a popular acceptance of native gods as the equivalents of Greek ones,

with a crude and imperfect fusion of religious ideas, which formed one, though not the most essentially important, element in Græco-Egyptian religion.

At one point, however, the circumstances were in every way different—at Alexandria. The old temples of the Egyptian village of Rakotis could not have been by any means adequate for the religious needs of the new capital, and fresh provision for worship was therefore necessary. The Greek population of the city would have been sufficient to maintain a cult of a distinctively Hellenic character; but it was drawn from sources too diverse to furnish a preponderating element in favour of any particular Hellenic deity. At the same time, there was too strong an intellectual element in Alexandria to permit of the crude equations which passed muster in the country being accepted for the capital. Above all, here was the residence of the king, who had to solve the problem of governing his mixed races of subjects without doing violence to the ideas of either Greek or Egyptian—to fit Hellenic improvements into the immemorial polity of the Pharaohs—and not the least difficult item in this problem was the religious question. Practically, it was imperative that a presiding deity for the new city and an official cult for the new dynasty should be found of a character which would be acceptable alike to Greek and to Egyptian. The genius of the first Ptolemy and his advisers was equal to the task: an effective solution was reached in the invention of Sarapis.

2. The triad of Alexandria.—(1) *Sarapis*.—The origin of the worship of Sarapis has been traced by different writers to various lands; and possibly every ascription is, in some degree, correct. As a matter of fact, Sarapis came into theological existence at Alexandria in an altogether unusual manner: he was virtually the result of the investigations of a body of philosophers and priests, who collected from all sources and fused together whatever ideas or attributes would be of service for their new conception; and the success which attended their work is shown not only by the wide acceptance of the deity whom they formed, but by the difficulty which subsequent students have experienced in discovering his origin.

The type under which Sarapis is represented is distinctively Hellenic; and there is no reason to doubt the statement of ancient historians that the great statue in the temple at Alexandria, which determined this type, and is well known from many copies, was imported from Sinope, and was originally a representation of Hades, made by Bryaxis.¹ There is more doubt as to the source from which the name of Sarapis was derived; probably it is not Egyptian, and it has been traced, on fairly strong evidence, to a Babylonian origin.² It is not necessary to suppose that it came, with the statue, from Sinope: the name, at any rate, would be learnt at Babylon by Ptolemy and his companions,³ and the statue certainly did not represent a Babylonian god, and would not have been thought by Ptolemy to do so. Ptolemy's committee may well have selected the Babylonian name and the Sinopian statue as suitable elements for their new eclectic deity, without the existence of any previous connexion between the two. Some of their reasons for the choice may be found. Though the name of Sarapis was not Egyptian, it had a superficial resemblance to Osorapis, the Greek form of the name under which the dead Apis-bull was wor-

shipped at Memphis;⁴ and the recognition of this resemblance influenced the acceptance of Sarapis by the Egyptians, as can be seen in the persistence of Apis-worship in association with temples of Sarapis, described below. This similarity of names may have been the starting-point for the identification of Sarapis with Hades, through the chthonic attributes of the Osirian deity, and have dictated the choice of a statue of Hades to represent the new god: and, again, the statue may have been obtained from Sinope on the suggestion given in the name of the town compared with the Egyptian *sen-apt*, 'the house of Apis.' Trivial as these links may appear, they would be sufficient for their purpose of securing the common homage of Greek and Egyptian. Moreover, while the new god was presented to the Greek in an image fashioned according to a type with which he was familiar, and inherited the attributes of a member of the Homeric cycle, yet the chosen Greek divinity was one whose worship had been so little defined that there was no serious difficulty in the way of re-moulding the popular conception of him and enlarging the sphere of his powers. On the Egyptian side, the Osirian element brought into the Sarapis-worship through the medium of Osorapis rapidly led to the removal of Osiris himself from the commanding position he formerly occupied in Egyptian theology, and to his supersession by Sarapis. The summary of the chief records of Sarapis-worship in Egypt will illustrate the foregoing points.

According to the orator Aristides, there were in the 2nd cent. A.D. forty-two temples of Sarapis in Egypt.⁵ This number, which is approximately that of the nomes known to have existed about the same period, suggests that there may have been such a temple in each nome, probably in the chief city, which was regarded as the official centre of worship. This supposition is, to some extent, borne out by the notices of the Sarapeion at Oxyrhynchus contained in papyri, which show, incidentally, that it was a building of considerable size, almost as large as the temple of the special local deity Thooris, and larger than the theatre or the gymnasium, to judge from the number of guards assigned to each of these places.⁶ It is hardly likely that Aristides would include in his reckoning, or, indeed, be aware of, such out-of-the-way temples of Sarapis as that of which a dedication—later, indeed, than his time—has been preserved at Senskis near the emerald mines of the Eastern desert;⁷ many such local shrines may have existed. But, apart from Oxyrhynchus, the only nome-capital which has yet furnished any considerable body of documentary evidence concerning its temples in Græco-Roman times, there are only three places where Sarapis was worshipped, which are likely to have been included in the forty-two temples of Aristides, as to which any definite information exists. The most important of all was, of course, the temple at Alexandria, the first seat of the worship of Sarapis in Egypt, and the resting-place of the original image. It is unfortunate that excavations on what is unquestionably the site of the Sarapeion—the mound marked by the column of Diocletian, or 'Pompey's Pillar'—have failed to give any plan of the temple or of the surrounding buildings.⁸ If the representations on coins can be

¹ There may also have been a temple of Osorapis at Rakotis; an early Ptolemaic religious handbook (*Cairo Catalogue*, 'Demot. Papyrus,' no. 81169) mentions the House of Osiris at Rakotis. The name of Rakotis itself may have suggested a link in the chain of connexion, as Spiegelberg identifies the Rakotis of a Cairo inscription (*Cairo Catalogue*, 'Demot. Inschriften,' no. 81110) with the Sarapeion of Memphis.

⁵ A description of the work on the site of the temple at Alexandria is given by G. Botti, *L'Aeropolis d'Alexandrie et la Sérapéum*, Alexandria, 1896; additional details in *BSA*, 1899, vi.

¹ Tacitus, *Hist.* iv. 83; Plutarch, *de Is. et Osir.* 23.

² A full statement of the argument on this point is given by H. P. Weiss, in Roscher, s.v. 'Sarapis'; further articles in *RE*, by H. P. Weiss (x. [1910] 190) and by E. Schmidt (xi. [1911] 137).

³ Arrian, *Anab.* vii. 26.

trusted, the temple itself was of Greek architectural style;¹ and with this the scanty remains found on the spot agree. Besides the actual shrine, there must have been a great mass of other edifices round it, which were used for secular purposes, such as the library and the archives, though included under the general name of the Sarapeion.² The records of the worship have vanished with the walls; but one interesting discovery was made on the site, in the form of a statue of an Apis-bull dedicated to Sarapis in the reign of Hadrian,³ which shows that the connexion of ideas which had originally arisen from the similarity of the names of Sarapis and Osorapis still persisted. At Memphis, a second great centre of the cult of Sarapis, the persistence of the Apis-element was even more marked, as was only natural in the home of the worship of Apis: by the side of the funerary temple of the bulls there arose a Greek Sarapeion, which seems to have been the chief in a considerable group of religious or semi-religious buildings, and to which the older shrines, such as those of Apis and Ptaḥ, became subordinate. In this case, also, excavation of the site has provided little evidence of the nature of the temple or of the worship; the architectural remains are of a very obscure character, and the minor objects found have little connexion with Sarapis. Papyri show, however, that the place harboured, besides the priests of the temples, a number of recluses,⁴ and provided an industry in dream-oracles; the sign-board of an interpreter of dreams was discovered.⁵ The cult of the sacred bull, however, lasted on until Roman times, and the name of Osiris Apis, or Osorapis, occurs regularly in demotic, and occasionally in Greek, documents.⁶ At the third great temple, that of Abydos, it was not Apis, but Osiris, that Sarapis had supplanted; and here, in fact, Sarapis almost became a Greek translation of Osiris. Thus the stelæ placed over the graves in the great cemetery of Abydos, which were commonly decorated with a scene of Osiris seated in state to receive the dead man in the lower world, according to Egyptian tradition, when inscribed in hieroglyphs or demotic are addressed to Osiris, when in Greek to Sarapis.⁷ Perhaps the clearest instance of the equation is to be found in a bilingual inscription, where not only is the name of Osiris in the Egyptian version rendered by Sarapis in the Greek, but the name of a man Psenusire is translated as Sarapion.⁸

On the Egyptian side, therefore, it may be taken that the worship of Sarapis to a certain extent absorbed or coalesced with that of Osiris and of Apis; and at the same time from the Greek point of view he was identified with several Hellenic gods. As the supreme deity of Alexandrian theology, he naturally took the place of Zeus; and the compound title of Zeus-Sarapis is a common one. This equation again reacted on Egyptian connexions, and through the old form of Zeus

Ammon brought in the attributes of Amen-Ra from native traditions. Amen-Ra being a sun-god, Zeus Ammon Sarapis was further united with Helios—a union which was probably strengthened by the solar elements present in the worships of Osiris and Apis. The traditional ascription of the type-statue of Sarapis linked him with Hades; and in this again the Osiris idea would be another point of contact, in view of the chthonic powers of Osiris. Finally, to emphasize the universal nature of his domain, over sea as well as over land, sky, and the lower world, Sarapis was joined with Poseidon. Assertions of these identifications are to be found not only in inscriptions bearing such titles as Zeus Helios Sarapis,¹ or, carrying translation further into the Roman cycle of gods, Jupiter Neptunus Sarapis;² or in types such as that found on Alexandrian coins, where Sarapis wears the horn of Ammon and the radiated diadem of Helios and carries the trident of Poseidon, to which attributes are added the staff of Asklepios and the cornucopæ of Nilus;³ but, in the more emphatic statements of a graffito, *ἐς Ζεὺς Σαράπης καὶ Ἥλιος Ἐρμαιοῦσις*,⁴ and of the emperor Julian, *ἐς Ζεὺς, ἐς Ἀΐδης, ἐς Ἥλιος ἐστὶ Σαράπης*.⁵

There are two facts which appear to point to a marked individuality in the worship of Sarapis. Although he is addressed by compound names, it is very rare to find a distinctive epithet attached to these. Practically the only special title which is given to Sarapis is that of Polieus, which occurs in inscriptions at Xoïs⁶ and Koptos,⁷ and may be due to his identification with Zeus. This title recalls Julian's mention of him as *πολιεύχης θεός* of Alexandria. There is hardly any variation in the form under which he is represented; usually he appears in the type which is accepted as that of his statue at Alexandria, seated on a high throne, wearing on his head the modius, resting his left hand on a sceptre, and extending his right over a three-headed Kerberos before his feet; more rarely he is shown standing, with the same attributes. The only remarkable type, in addition to the compound one noted above, is one which is found on Alexandrian coins of the 2nd cent. A.D., and was also used on seal-rings, where a serpent is shown with the head of Sarapis, sometimes associated with a second serpent with the head of Isis.⁸ The popularity of this type may perhaps be ascribed to Gnostic influence; in origin it may be a reminiscence of the sacred serpent of Ra, or of the representations of some of the infernal deities as they appear in the royal tombs of the New Kingdom.

The wide-spread popularity of the worship of Sarapis may be deduced from records of many kinds. The official importance of his temple at Alexandria, as practically the centre of the State-religion, made it the home of the great library and the depository of the archives; and the neocorate of this temple was an honour accepted by Romans of high rank.⁹ A more interesting light on his position in the minds of the people generally is thrown by the papyri from Oxyrhynchus, in which are found invitations to banquets *ἐς κλίνην τοῦ κυρίου Σαράπιδος* in the Sarapeion or elsewhere,¹⁰ with which may be compared the statement of Aristides, that men make Sarapis their companion at feasts and name him as guest and host;¹¹ the idea of banquet-

¹⁸ Aristides, xiv. 87.

ing with the gods has a Homeric flavour, which may be explained by the fact that the Greek-speaking population of Egypt was thoroughly soaked in Homer. Another proof of the importance of Sarapis may be found in the frequency with which his image was used as a device on signet-rings; particulars of the seals of witnesses to documents at Oxyrhynchus show six instances of figures of Sarapis out of a total of thirty-five signets, and in a collection of one hundred and ten types of sealing found at Karanis in the Fayum, twenty-two bear representations of him: in each case, the only god who occurs nearly so frequently is Harpokrates.¹ Perhaps the most noteworthy evidence, however, is given by private letters; if the writer expressed a prayer for the welfare of a friend, it was almost invariably addressed to Sarapis; other gods are found only in sporadic instances.

But, despite these constant invocations of Sarapis, and despite the statements of Aristides, it may be doubted whether this deity was really regarded either by Egyptian or by Greek as one who took an intimate part in human affairs. To the multitude, he was probably the official supreme ruler of the universe, to whom prayers might be addressed and offerings made; but he was not a domestic god, in the sense of one whose image would be placed in a house as its immediate protector. Statuettes of Sarapis in terracotta or bronze—the cheapest materials available in Egypt, and therefore commonly used for the production of representations of gods for the mass of the population—are comparatively rare; in this respect he did not inherit the position of Osiris, bronze figures of whom, in all degrees of workmanship down to the very rudest, are found in profusion among the remains of the period of the New Empire. He might be equated by theologians with Osiris and with Apis; but the former, as a deified man, and the latter, as a deified animal, alike possessed connexions with the visible world from which Sarapis was far removed. And it would appear that the real importance of the worship of Sarapis was due to the express sanction of the State, and that it was mainly followed in the great temples without exercising much practical influence on the daily life of the people.

(2) *Isis*.—In accordance with the religious ideas of Greeks and Egyptians alike, Sarapis had to be supplied with a consort; and for this purpose the choice of the Ptolemaic god-makers fell on Isis. To some extent, no doubt, their selection was guided by the fact that Isis was associated with Osiris as his wife by native Egyptian theology: but there were more important considerations than this. Probably the determining factor was the extent to which the worship of Isis had absorbed or overshadowed that of all other female deities during the New Kingdom period; and a further reason for her selection may be found in her identification by Greek writers with Demeter,² which gave her a connexion with a very popular Greek divinity. But the Alexandrian conception of Isis developed on very different lines from that of Sarapis. There was, of course, in her case no need for a fresh definition of powers; she was sufficiently well known throughout the land of Egypt, and her temples existed everywhere. She accordingly remained far more distinctively Egyptian than Sarapis; her equation with Demeter had practically no influence on her cult, and the Greek attributes and Greek ideas which were attached to the worship of Sarapis find no parallel in that of Isis.

The most famous centre of the worship of Isis was at Philæ, where extensive buildings dedicated to her and the gods honoured with her, and erected

almost entirely in Ptolemaic and early Roman times, are still extant; and this was one of the last strongholds of the pagan religion in its struggle with Christianity. As late as the middle of the 5th cent. A.D. devotees still visited the shrine,³ and the importance of the goddess is more definitely shown by the fact that she became the subject of a special clause in a treaty between the Roman emperor and the barbarian Nobatæ, whereby the latter secured access to Philæ at stated times for purposes of worship of Isis.⁴ These temples must have possessed extensive property and revenue; the whole of the land bordering on the first cataract seems to have been dedicated to them, and it is probable that they also derived an income from the customs levied on goods passing the Egyptian frontier at Syene,⁵ while the priests collected offerings for Isis of Philæ at least as far away as Thebes.⁶ At the other end of Egypt, there seem to have been several temples of Isis at Alexandria and in the vicinity; probably her chief importance there, apart from her association with Sarapis, lay in her position as protecting deity of the Pharos, which brought her the homage of the sailors and others connected with the port. It is noteworthy that one temple of Isis represented on Alexandrian coins⁷ is of Egyptian style, whereas all the other religious buildings which appear in the coin-types are Greek in their architecture. Elsewhere in the Nile valley references to temples or shrines of Isis are numerous; but everywhere these temples, so far as can be judged, might be classed as secondary to those of the chief local divinities or of Sarapis. For instance, the temple of Isis at Tentyra, which was rebuilt under the Ptolemies and Augustus,⁸ is overshadowed by the neighbouring temple of Hathor-Aphrodite; at Oxyrhynchus the Isieion, which is mentioned on papyri, was assigned only one guard, as compared with seven for the temple of Theoris and six for that of Sarapis;⁹ and the frequent allusions to shrines of Isis in the villages of the Fayum suggest wayside chapels rather than important buildings.¹⁰

Isis was rarely identified in actual worship with any Greek goddess. It has already been remarked that her equation with Demeter, stated by Herodotus, had little influence on later belief, though it may perhaps be traced in some Alexandrian representations of her. Very occasionally, also, she was assimilated to Aphrodite: this was due to the fact that Hathor, who was regarded as the Egyptian representative of Aphrodite, had tended in earlier Egyptian theology to become identified with Isis.¹¹ This is one respect in which the development of the worship of Isis presents a marked contrast to that of Sarapis, and another is in the matter of epithets. While Sarapis, as has been seen, scarcely ever received any special title, Isis was constantly localized by distinctive names.

Thus at Alexandria she was known as Isis Pharia,¹² Isis Pionia,¹³ Isis Sothis,¹⁴ and Isis of Menuthis; at Memphis, Isis of Malalis is mentioned;¹⁵ in the Fayum, Isis Nepheres¹⁶ and

Isis Nephremmis¹ were associated with the cult of Soknopaios at Soknopaiou Nesos and Nilopolis, at the former of which a dedication to Isis Sonanaia² has also been found; and in the village of Nabis there was a temple of Isis Nanaia; ³ a dedication, the find-spot of which is not known, is addressed to Isis Esenchbia; ⁴ there is a record of a priest of Isis Ophis at Hermopolis; ⁵ at Akoris she is invoked as Isis Mochias; ⁶ at Pathyris the names of Isis Pathyra,⁷ Isis Nemes,⁸ and Isis Rhesakenis⁹ occur; most fitly of all, at Philæ she was worshipped as Isis Myrionymos,¹⁰ a title also used in the neighbouring desert and in Nubia. The address of a magical papyrus to Isis as *πολύωνυμος* was fully justified.¹¹

The form in which Isis was represented in art, while not so definitely fixed as in the case of Sarapis, shows little material variation, and naturally is more Egyptian in character. The crown of horns and disk and the vulture head-dress of the native goddess were usually reproduced in Græco-Roman figures; and, though the drapery often shows the influence of the Greek *chiton* and *peplos* in its treatment, it is not very different from that of older representations.¹² The ordinary types are a standing figure, fully draped, and Isis seated on a throne nursing the infant Harpokrates. On Alexandrian coins there are other types, which are more Greek than Egyptian in their conception, such as Isis Pharia holding a sail belling in the wind, or Isis Sothis riding on a dog; as the city-goddess of Alexandria also Isis is shown holding the rudder of Tyche.¹³ Terracotta or bronze statuettes of a nude female figure wearing the crown of Isis are not uncommon; these may be referred to the compound form of Isis and Aphrodite.¹⁴

The name of Isis, with or without epithets, singly or in conjunction with other gods, occurs far more commonly than that of any other deity in the written records of Græco-Roman Egypt. But her hold on the minds of the people generally was probably hardly so great as might be inferred. Her temples, apart from the great centre of her worship at Philæ, and possibly at Alexandria, appear, as has been already noted, to have been of small size, though very numerous: thus in the village of Kerkeosiris in the Fayum there were two Isieia, but neither of them owned any land;¹⁵ and their general status may be judged from the terms of a decree of Ptolemy Euergetes II., in which Isieia are classed with animal-shrines as minor temples.¹⁶ So far as there is any mention made of resort to these village temples, it would appear to have been only for purposes of treatment in illness.¹⁷ At Alexandria, Isis Pharia was the protectress of sailors; but there is no evidence of her holding a like place anywhere in the Nile valley, unless the occurrence of a priest of Isis in the temple of the Dioskouroi at Oxyrhynchus is in this connexion.¹⁸ There are not many remains of monuments to testify to the worship of Isis; statues of her, of any size, belonging to this period are practically unknown; and, while Græco-Roman bronze and terracotta statuettes exist, they are by no means common, nor does her figure appear frequently on coins or signets. The most frequent type in these lesser representations is that of Isis suckling Harpokrates, and in this she may owe her popularity to the association with her child. The general impression derived from the references to Isis is that she retained a certain importance amongst the Egyptians as an old-established

deity, whose priests were much in evidence at her many wayside shrines, and who kept themselves before the public for the purpose of raising money, as was rendered necessary by their lack of endowments—in doing which they turned to practical use the traditional knowledge, especially of medicine, of which they were heirs; but that, so far as her personality actually appealed to the multitude, it was in virtue of her position as mother of another god—Harpokrates.

(3) *Harpokrates*.—Harpokrates, who was the deity selected to complete the Alexandrian triad, was, like Isis, distinctly Egyptian in origin; but the lines on which his worship developed were different from those taken in her case, as well as in that of Sarapis. Harpokrates did not, like Sarapis, absorb the powers and functions of other independent deities under one name and type; nor did he, like Isis, become localized by distinctive epithets. Originally he was a special form of Horus; and, starting from this point, he gradually took over not only the cult of Horus itself, but also those of all the other special forms which had been accepted in different districts.

There is no record of any temple in Egypt dedicated primarily to Harpokrates; where he is mentioned in connexion with any temple-worship, it is always in association with other gods, of whom Isis is normally one; for instance, at Philæ the group is Isis, Sarapis, and Harpokrates;¹ at Koptos: Isis, Harpokrates, and Pan (Min);² in the Fayum: Isis, Sarapis, Harpokrates, and some form of Souchos;³ although individual priests of Harpokrates occur, and offerings might be made to him alone.⁴ It would appear that, to the priests, he was pre-eminently, as his name implied, Horus the child, and was not to be separated from his mother Isis.

The equation of Harpokrates with other forms of Horus involved many ramifications, which illustrate the complication of later Egyptian theology. Under the New Empire, Amen-Ra, the predominant deity, had supplanted, by a nominal identification, many local gods; thus at Herakleopolis Magna he was regarded as the equivalent of Har-shefi; at Mendes and Heliopolis, of the sacred ram; at Sais, of Sebek, the son of Neith; at Memphis, of Ptah; at Koptos, of Min; at Thebes, of Month. And, in his turn, Amen-Ra had been ousted by Horus in almost every place; so that, in the Ptolemaic period, while Sarapis took the name of Ammon from Amen-Ra, Harpokrates, as successor of Horus, secured the local attributes of the gods with whom Amen-Ra had been identified.

Thus at Herakleopolis Magna, where Har-shefi had been translated by the earliest Greek visitors into Herakles, there appeared the compound Herakles-Harpokrates,⁵ who is represented on nome-coins with the club of the Greek hero surmounted by the hawk of Horus, and wearing a lion's skin and a uodius.⁶ Another Alexandrian coin-type shows Harpokrates accompanied by a ram,⁷ which may refer to either the Mendesian or the Heliopolitan form; and terracotta figures of Harpokrates seated on a ram are not uncommon.⁸ On coins of the Menelaites nome there is a compound figure consisting of the head and shoulders of Harpokrates placed on the body of a crocodile,⁹ derived from the union of Harpokrates and Sebek. Ithyphallic statuettes of Harpokrates, common in terracotta, point to his equation with Min. The type of Harpokrates with the goose,¹⁰ formerly sacred to Amen-Ra at Thebes, shows that he had taken over the attributes of the older god in the centre of his worship. Other special forms are Harpokrates of Pelusium, whose emblem is a pomegranate,¹¹ and Harpokrates of

Taus and of Buto, squatting on a lotus-flower,¹ or seated on a sphinx,² all of which are found as Alexandrian coin-types, while the two latter also occur on signets and in statuettes.

The rarity of any record of the worship of Harpokrates in temples is more than compensated by the evidence as to his popularity among the inhabitants of Egypt generally, which is given by the minor representations of him. As has already been noted, his image seems to have been almost as common a device for signet-rings as that of Sarapis; and the same may be said in respect of coin-types. Signets and coins, however, are mainly useful as records of the ideas of the trading classes; the religious preferences of the humbler ranks of the population can better be judged from the statuettes which supplied the household images and are found in the ruins of the Egyptian villages of the Græco-Roman period—more especially those of terracotta, the cheapest available material for such representations. Among the terracotta statuettes which occur in profusion on every Græco-Roman site in Egypt, those of Harpokrates, in all manner of attitudes, with varying attributes, and of every kind of execution, far outnumber those of any other god, showing him to have been pre-eminently the household god of the *fellahtin*.³ Harpokrates was, indeed, the nearest to men of the Alexandrian triad; not only the traditional humanity which he inherited from Horus, as one who had once reigned in Egypt, but the necessary anthropomorphism of the idea of a child-god, made him more readily understandable to the common people than an almighty and omnipotent ruler of the universe such as Sarapis; while there was none of the mystery attached to his worship which the priests, to magnify their position, had imported into that of Isis.

Briefly, the respective positions of the three Alexandrian deities may be summed up as follows: Sarapis was the official god of the ruling class and the central object of the State-worship in the chief temples; Isis was the special property of the old priestly class, to whom was attached the traditional religious lore, whose stronghold was the wayside shrine; Harpokrates was the god of the lower classes and of the home.

3. The fusion of Greek and Egyptian gods.—While the influence of the Alexandrian triad was predominant throughout Egypt from the Greek conquest till the general adoption of Christianity, other gods, both of the natives and of the invaders, were not wholly absorbed or forgotten. So far as the cults of these deities remained uninfluenced by foreign ideas—so far, that is, as the Egyptian gods continued to be worshipped under purely Egyptian forms, and the Greek under Greek—it hardly belongs to the history of Græco-Egyptian religion to discuss the records concerning them. But the nominal identification of gods of the two races, which had begun as soon as Egypt was opened to the Greeks, was carried further in some cases and resulted in a fusion, more or less logical and more or less complete, of Greek and Egyptian ideas into what were so far new forms as to deserve separate treatment.

(1) This process of fusion perhaps went furthest in the case of *Hermanubis*. The name was a Greek adaptation of the Egyptian Har-m-anup, a compound of Horus and Anubis, the latter of whom, in later Egyptian theology, had enjoyed considerable importance as the messenger of the gods who guided the souls of the dead into the presence of Osiris. The sound of the first part of the name,

and the functions attaching to the second, would readily suggest to a Greek mind an identification with Hermes Psychopompos; and from this identification a type arose which represented Hermanubis in the form of a youth wearing Greek dress, crowned with a modius, and carrying a palm-branch and a caduceus.⁴ This type was almost entirely Greek or Alexandrian; but it was occasionally varied by the importation of an Egyptian element, the jackal-head of Anubis being placed on the human body of Hermes.⁵ Another variation was produced by the substitution of a radiated diadem for the modius, possibly with some recollection of the solar attributes of Horus derived from the original Egyptian name:⁶ this form is the Helios Hermanubis, whose identity with Zeus Sarapis is recorded in the graffiti already mentioned. But Hermanubis did not absorb the worship of Anubis; the compound name is rarely found, while invocations of, and dedications to, Anubis are fairly frequent; and it was Anubis, not Hermanubis, whose fame spread from Alexandria throughout the Roman world, and who was worshipped with Isis and Osiris by Roman devotees.

The equation of Hermes with Anubis, and their union in Hermanubis, did not prevent the further identification of Hermes with other Egyptian deities. The early Greek travellers had regarded Thoth, the god of learning, as the Egyptian equivalent of Hermes, and it would appear that, at any rate as late as 100 B.C., this equation was preferred to that with Anubis in the Fayum, as in documents from Kerkeosiris *Βιογραφία καὶ Ἐγκαία*—shrines where Hermes was associated with the sacred ibis of Thoth—are mentioned as distinct from *Ἀνουβεία*.⁷ The persistence of the same idea is seen in the later Hermes Trismegistus, the special depository of all magical knowledge;⁸ and in the magical papyri of the Roman period Hermes plays an important part in this connexion. It may, however, be noted that his identification with Anubis was remembered here also; the four shapes of Hermes in the four quarters of heaven are given as ibis, cynocephalus, snake, and wolf;⁹ and, while the first two of these are the sacred animals of Thoth, the wolf almost certainly represents the jackal of Anubis.

A further development resulted from the Hermes-Thoth equation. Thoth had been combined, in the local worship of some districts of Egypt, with Khonsu, in virtue of common lunar attributes; and, as Khonsu had been identified independently with Herakles, the Egyptian Thoth-Khonsu, or Khonthout, as the name appears in use for a personal one, became to the Greeks Hermes-Herakles.¹⁰ Such a combination is obviously foreign to the Greek spirit; although the spheres of influence of Hermes and Herakles might touch at one point, in the gymnasium, the two gods could hardly have been fused by any one who regarded them simply from the Greek standpoint. The same idea is traceable in a dedication to Hermes and Herakles, as well as to other gods whose names are lost, with Ammon, the head of the solar group.¹¹

It may also be noted that, at Elephantine, Hermes was identified with Petensenis,¹² and at Pselkis in Nubia with Pautnuphis;¹³ but, as both of these names are purely local titles, as to the connotation of which nothing further is known, it is useless to conjecture the reasons for the identification. The name of Hermopolis Parva in the Delta

also suggests that there Hermes was regarded as the representative of Horus, the old god of the city.

The case of Hermes is fairly typical of the confusion of names and ideas which arose from the mixture of Greek and Egyptian theology. As has already been seen, the identifications made between the gods of the two nations were based more on grounds of convenience and interest than on any carefully considered principle, and so they might vary locally according to the circumstances of the established cult of each district. It will suffice to summarize more briefly the principal equations which are recorded in the cases of other Greek gods.

(2) *Zeus* had been identified with Ammon by early Greek travellers in Egypt: both in the Libyan Oasis and at Thebes they became familiar with the god, whose priesthood, though declining in importance, still formed one of the most powerful corporations in the country; and, partly no doubt under the impression produced by this political influence, partly from the natural tendency to equate the god who seemed to be chief of the Egyptian deities with the one who held a corresponding position among the Greeks, Ammon was transformed into Zeus Thebaïos, to whom early Greek dedications have been found.¹ The type of Zeus wearing a ram's horn as Zeus Ammon is commonly found in Ptolemaic and Roman times, having been popularized by the local legend of the birth of Alexander. In a Latin inscription from a quarry near Philæ a third title is added, in the name Jupiter Ammon Chnubis,² the last obtained from the cataract-god Khnum, who had previously been identified with Ammon, and was similarly associated with the ram. The solar attributes of Amen-Ra of Thebes further led to the adoption of the form Zeus Helios in the Thebaid;³ and, as has already been seen, both Zeus Helios and Zeus Ammon were united with Sarapis.

(3) *Hera*, on the other hand, rarely appears in Egypt. Herodotus states that she was one of the Greek deities whose names did not come from Egypt;⁴ in other words, there was no Egyptian goddess with whom she was popularly identified. At the first cataract, however, she was equated with the local goddess Sati, whose temple seems to have been known to the Greeks as the Heraion.⁵ Another Heraion is mentioned at Thebes,⁶ which was probably the temple of Mut, the consort of Amen-Ra; the equation of Mut with Hera would naturally follow that of Amen-Ra with Zeus.

(4) *Kronos* was identified with Geb by the early Greek students of Egyptian religion; but there is little later evidence in support of this identification, which was probably derived from a comparison of the theogony of Heliopolis with that of Homer. There is, however, a stele from Koptos, on which the Greek inscription gives a dedication to Kronos, while the scene above shows the emperor Tiberius making offering to Geb and Nut.⁷ At Elephantine, Kronos is called Petersenit⁸—obviously a purely local name; and at Tebtunis in the Fayum he was equated with Soknebtunis, the local form of the crocodile-god Sebek,⁹ who is known to have been identified elsewhere with Geb.

(5) *Apollo*, in the system of Herodotus, was the representative of Horus,¹⁰ the identification being

⁹ Milne, *Hist. of Egypt*, v. 184.

¹⁰ *P. Tebt.* 294, 5; 295, 6.

doubtless based on the fact that both were sun-gods. In pursuance of this idea, the town of Harbehtet became Apollinopolis Magna, and that of Har-uer, Apollinopolis Parva; and to the same cause may be ascribed the great popularity of 'Απολλώνιος as a personal name amongst the Greek-speaking inhabitants of Egypt, just as names derived from various forms of Horus were the commonest amongst those who adhered to the native language. The identification of Apollo with Haroeris occurs at Ombos¹ as well as at Apollinopolis Parva. An early Ptolemaic inscription from Naukratis gives an interesting triad in Sarapis, Isis, and Apollo,² in which Apollo seems to take the place of Harpokrates as an equivalent Horus-form.

(6) *Artemis* was equated with Bast (Bubastis), according to Herodotus;³ and, as Bast was a cat-deity, Artemis seems to have been taken by analogy as identical with another goddess, Pakhet, who was worshipped in cat-form at the spot known to the Greeks as Speos Artemidos. There are, however, no records on monuments to show that this identification had any practical recognition in actual worship.

(7) *Leto* is in much the same case: Herodotus states that she had an oracle at Buto in the Delta,⁴ which presumably means that she was identified with Unzt, the tutelary goddess of that town; but there is no further evidence as to this, nor as to her apparent equation with Hathor as presiding deity of the town known to the Greeks as Letopolis.⁵

(8) *Athene* was perhaps the one of all the Homeric gods as to whose Egyptian origin Greek writers were most certain. The town of Sais in the Delta was declared to be the mother-city of Athens, and Athene to be derived from Neith, the goddess of Sais. But, though Athene was certainly worshipped at Sais by the Greeks, it was, so far as any extant evidence shows, under her Greek name alone, and in purely Greek form.⁶ At Oxyrhynchus she was identified with the local goddess Thooris (Taurt),⁷ probably in view of their common warlike attributes, but the identification does not seem to have been carried very far; in name, at any rate, the Egyptian goddess held her own, as the chief local temple was known as the Thoorion,⁸ and references in papyri are, with only one or two exceptions, to Thooris simply.⁹ In art, however, it is the Greek type of Athene which is found on coins and signets of Oxyrhynchus;¹⁰ this is doubtless due to the fact that Thooris was a hippopotamus goddess, and the representation of such a type would not appeal to the Greeks.

(9) *Ares* was another deity for whom the Greeks found an Egyptian equivalent at an early date in Onouris, a warrior-god;¹¹ but in this case also the identification seems to have been a literary one merely, without any practical effect.

(10) *Aphrodite* was much more important in the popular than in the official religion of Græco-Roman Egypt, so far as extant evidence proves. Statuettes of Aphrodite, sometimes of purely

¹¹ Herod. II. 59.

Hellenic type, but more usually showing traces of Egyptian influence, are commonly found; and inventories of property suggest that these statuettes normally formed part of a lady's outfit.¹ Hathor, the Egyptian goddess of love, was the natural equivalent of Aphrodite, and at least two towns of Hathor—the modern Atfih and Gebelén—were re-named Aphroditopolis by the Greeks. At the latter, where Hathor was the consort of Sebek, Greek papyri mention priests of Aphrodite and Souchos,² and she was worshipped in the same connexion at Ombos.³ At Dendera also, in the chief centre of the Hathor cult, Aphrodite took the place of that goddess, and the Greek dedication of the temple, rebuilt in the early years of Roman rule, is in her name.⁴

(11) *Pan* was identified with the ithyphallic Min at Panopolis and Koptos, as appears from the Greek name of the former town and from dedications at both places.⁵ The functions of Min as guardian of the desert roads were naturally transferred to Pan, and graffiti addressed to him are found at many points in the deserts, scratched on rocks or walls by travellers and huntsmen, as well as more formal dedications.⁶

(12) *Dionysos* furnishes perhaps the best instance of the divergence between literary and popular equations of gods in Egypt. Herodotus states very elaborately the identification of Dionysos with Osiris,⁷ but there is hardly any evidence that Dionysos inherited any part of the worship of Osiris, or took his place in the minds of the Græco-Egyptian population. As a matter of fact, Osiris, from the Alexandrian point of view, was absorbed by Sarapis, as has already been shown, and the only religious records which mention Dionysos in Egypt refer to a purely Greek cult,⁸ except in one locality. At the first cataract, Dionysos is equated in inscriptions with *Petein-pamentis*,⁹ whose name suggests that he was a chthonic form of Osiris.

(13) *Demeter* similarly was identified by Herodotus with Isis;¹⁰ but the literary identification did not affect popular worship.¹¹ The position held by Isis in the Alexandrian triad rendered it both unnecessary and unlikely that she should take the name of any Greek deity.

(14) *Hephaistos* was commonly equated with Ptah, perhaps in view of the record of the latter as constructor of the universe; and the great temple of Ptah at Memphis is referred to in Greek documents as the Hephaisteion.¹² But this temple rapidly declined in importance. Ptah was worshipped there as Ptah-Sokar-Osiris; and, as Sarapis absorbed the attributes of Osiris, the Sarapeion grew at the expense of the Hephaisteion. It is therefore not remarkable that Hephaistos, not an important god in Greece itself, plays no part at all in Græco-Egyptian worship. A record of the mixed type is, however, given by a coin of Hadrian, on which the god is shown with Egyptian head-

dress and Greek robes, carrying the sceptre of Ptah and the tongs of Hephaistos.¹

(15) *Asklepios* was provided with an Egyptian equivalent in the deified sage Imhotep, whom later generations had claimed as a son of Ptah and a god of healing. A chapel dedicated to Imhotep seems to have been attached to his reputed father's temple at Memphis, and this was called the Asklepion by the Greeks.² There was a similar chapel at Philæ;³ and the upper court of the temple of Hatshepsut at Deir el-Bahri, on the west of Thebes, was transformed in Ptolemaic times into a kind of sanatorium, whose walls are scribbled over with invocations of Asklepios in his Græco-Egyptian association.⁴

(16) *Hestia* was, according to Herodotus, not Egyptian.⁵ Like Hera, however, whom he placed in the same class, she was equated with one of the cataract-deities—Anukis—at Elephantine;⁶ but the reason for this identification is not clear.

(17) *Herakles* shows more variation of form, due to his equation with two distinct Egyptian deities. It has been noted above that he was identified with the lunar god Khonsu at Hermopolis Magna and Apollinopolis Magna, and that in this connexion he was united with Hermes.⁷ At Herakleopolis, however, he was taken to represent the local form of Horus, Har-shefi, and gave his name to the town; and then, by another confusion which has already been mentioned, his attribute, the club, was transferred to a second form of Horus—Harpokrates—as shown on the nome-coins; and a compound Herakles-Harpokrates is mentioned in a Greek dedication.⁸

From a survey of the foregoing summary it will be seen that the identification of Greek and Egyptian gods proceeded on the most superficial lines, and was often purely academic. A certain amount of cross influence between the two systems of theology may perhaps be discerned in the cases of Zeus-Ammon, Apollo-Haroeris, Athene-Neith, Aphrodite-Hathor, Hermes-Thoth, Pan-Min, Hephaistos-Ptah, Asklepios-Imhotep, and Herakles-Khonsu; but the equations of Hera, Kronos, Artemis, Leto, Ares, Dionysos, Demeter, and Hestia with Egyptian deities do not appear to have been anything more than nominal so far as the actual worship either by Greeks or by Egyptians was concerned. In fact, the identification was practically a mere matter of convenience; the Greek section of the population, who clearly prided themselves on their race, and were soaked in Homer, preferred to address the gods whom they worshipped by familiar Olympian names rather than use the Egyptian titles even in a Hellenized shape, though the latter class of forms occur; and the priests of the Egyptian temples met the wishes of the Greek worshippers by the simple process of allowing their own gods to be invoked by the Greek names, which seemed at first sight most suitable. As this process was not based on any general agreement as to the identity of various gods, except in so far as accepted traditions, such as those recorded by Herodotus, were remembered, there arose cross-identifications according to local circumstances.

4. *Egyptian gods worshipped by Greeks without equation*.—There were a few Egyptian gods who had no recognized Greek equivalents, but were nevertheless so far accepted by the Greek settlers as to require mention in connexion with Græco-

Egyptian religion. These were such as offered no traits for ready identification with the Homeric gods, but possessed so much popularity among the natives that they attracted the attention and the worship of the Greeks.

(1) The most noteworthy example of this class of deity is to be found in the case of *Bes*, who, though he may have been introduced into the Egyptian pantheon at a fairly early period, did not attain a position of any importance until the time of the New Kingdom. Even then he does not seem to have received any official recognition, such as would be expressed by the dedication of a temple to him; but he was a prominent figure in popular magic. Similarly, in the earlier part of the Græco-Roman period, *Bes* is not mentioned in religious inscriptions or represented on the walls of temples; but he must have been widely worshipped among the lower classes, as terracotta statuettes of him are common, and bronze figures not infrequent.¹ Later, with the recrudescence of magic, he grew in importance, and even seems to have ousted *Sarapis* from the chief place in the temple of *Abydos*, where an oracle of *Bes* was established and flourished till its suppression in the reign of *Constantius II.*² graffiti of homage to him still exist on the walls of the temple beside the earlier inscriptions to *Osiris* and *Sarapis*.³ At *Memphis* also *Bes* seems to have obtained a footing in the *Sarapeion* in Roman times, as a room has been found there decorated with figures of him and his worshippers.⁴ The graffiti of *Abydos* and magical papyri suggest that the oracles of *Bes* were given through dreams,⁵ and this may have smoothed his way into the *Sarapeion* of *Memphis*, where there was an old-established system of incubatory divination.

(2) The crocodile-god *Sebek* was also usually worshipped without equation to any Greek deity, at any rate in his chief seat, the *Fayum*. At *Ombos* he had been previously identified by the Egyptians with *Geb*; and so the equation of *Geb* with *Kronos* by the Greeks involved that of *Sebek* with *Kronos*, which is found at one spot in the *Fayum*—at *Tebtunia*.⁷ In the great majority of the references to *Sebek* which occur in the *Fayum* papyri, however, there is no trace of any Greek connexion; and the representations of him in the Græco-Roman period are always in purely animal form. There was no lack of Greek settlers in the *Fayum*, but they seem to have been perfectly content to offer their homage to this god in his Egyptian form, only softening his name to *Souchos*. How closely associated his worship might be with Hellenic ideas is shown by two late Ptolemaic dedications to him, probably from *Crocodilopolis-Arsinoë*, which were set up to mark the enclosures appropriated to schools of *ephebi* of certain years.⁸ The temple of *Sebek* at *Arsinoë* was the chief one of the nome, and in its precincts was a lake where the sacred crocodiles, his embodiment, were kept, and worshipped, providing one of the regular sights for tourists;⁹ and there were numerous other temples or colleges of priests of *Sebek* in the surrounding villages, such as *Euhemeria*,¹⁰ *Nabla*,¹¹ *Tebtunia*,¹² and *Kerkeosiris*.¹³ Moreover, he was worshipped in many local forms in these villages.

Thus at *Soknopaiou Nesos* there was a great temple of *Soknopaios-Sebek*, lord of the island—in which he was associated

with *Isis-Neferes*: the papyri from this town have furnished many references to his priests and his feast,¹ while inscriptions record grants of corn by Ptolemaic officials² and of privileges by a Roman prefect;³ he is represented as a crocodile with a hawk's head,⁴ which shows him to have been a solar deity connected with *Horus*, as in Upper Egypt *Sebek* had formerly been united with *Ra*. At the same town of *Soknopaiou Nesos* there was a second, apparently subordinate, form of *Sebek* worshipped as *Sokopialis* or *Sokopios*.⁵ *Soknebtunis* was the local type of *Sebek* as lord of *Tebtunia*, in the neighbourhood of which village his temple seems to have owned extensive property.⁶ In the same district another variant occurs in *Sokenbonthis*;⁷ at *Rachias* he appears as *Sokanobkonnes* or *Sokonnokonnis*;⁸ and at *Crocodilopolis-Arsinoë* and *Tebtunia* as *Sokopichonsis*.⁹ At *Karanis*, where the temple has been excavated, and has yielded building dedications under a late Ptolemy, *Nero*, *Vespasian*, and *Commodus*, *Sebek* was known as *Petesouchos*,¹⁰ a name found also at *Kerkeosiris*,¹¹ and possibly applied to the god at his chief temple at *Arsinoë*.¹² The crocodile-god might also be addressed by other titles than that of *Sebek* or compounds of it; for instance, *Phemnoeris* or *Phembroeris* is described as belonging to this group,¹³ and similarly *Pnepheros* of *Karanis* and *Theadelphia*;¹⁴ but the catalogue of his local names does not throw light on his worship.

(3) The position of *Sebek* as regards the Greeks may be paralleled by that of the hippopotamus-goddess *Taurt*. As has been mentioned above, this goddess was nominally identified with the Greek *Athene*; but in actual practice she seems to have been worshipped independently. No Greek would be likely to associate *Athene* with a hippopotamus; and, if it seemed advantageous to him to pay homage to *Taurt*, he addressed her as *Thoeris*.

It is very doubtful, however, whether in such cases as those of *Bes*, *Sebek*, and *Taurt* there was any influence exercised on the Egyptian worship by the Greek worshippers which would produce a result described as Græco-Egyptian. The utmost that can be traced is in the modification of the Egyptian names to suit the ear of the Greeks; and a similar modification, in rarer examples, might be cited in regard to a considerable number of purely Egyptian deities who happen to be mentioned in Greek documents.

5. The decay of the Greek element.—The attempt of the earlier Ptolemies to plant a new State-religion in Egypt, like their attempt to Hellenize the country, was doomed to failure; the imported elements in the gods and in the human population were alike absorbed and disappeared. By the 3rd cent. A.D. the descendants of the Greek colonists, except perhaps in *Alexandria*, had become practically indistinguishable from the mass of the natives of Egyptian race, and in the same way the old Egyptian deities had reasserted their position, and had obliterated the Greek equivalents who formerly shared their worship.

(1) The clearest illustration of the recrudescence of native religious ideas may be found in the case of *Osiris*. He should, under the Ptolemaic system, have been entirely supplanted by *Sarapis*. But, as has already been seen, at *Abydos*, *Osiris* held his ground, at any rate amongst the Egyptian-speaking part of the population, and apparently his worship was so far recognized that *Strabo* records him as the god of *Abydos*:¹⁵ his name appears in demotic inscriptions as the equivalent of that of *Sarapis* in Greek;¹⁶ occasionally even Greek inscriptions of homage on the temple-walls are addressed to him instead of to *Sarapis*.¹⁷ There are other indications that he was sometimes treated by the Greeks as distinct from *Sarapis*; thus a Ptolemaic

altar is dedicated to Osiris with Sarapis, Isis, and Anubis;¹ at Oxyrhynchus in Roman times there was an Osireion as well as a Sarapeion, and a priestly college served Theoris, Isis, Sarapis, and Osiris with other gods;² and a late Ptolemaic inscription from Theadelphia in the Fayum shows that an Osireion existed there also.³ About the end of the 1st cent. A.D., however, Osiris appears to be recovering the honours taken from him by Sarapis; for instance, the old Egyptian formula of entreaty to Osiris to give water to the dead, which had been preserved in demotic texts, begins to occur in a Greek version also, without any translation of Osiris into Sarapis;⁴ and in the magical papyri of the next two or three centuries Osiris is a leading actor,⁵ while Sarapis is scarcely mentioned.

(2) A similar revival can be traced in the cases of *Anubis* and *Horus* as against their Alexandrian equivalents Hermanubis and Harpokrates; and *Isis* had never been thoroughly Hellenized. In all three instances it is the Egyptian deity who recurs in the magical texts and remains a god of power long after the general acceptance of Christianity in the country: Isis and Horus are mentioned side by side with Jewish archangels and Jesus Christ.⁶

The importance of this apparent revival of old Egyptian ideas in the Roman period may perhaps be somewhat exaggerated at present by the comparative paucity of records concerning the worship of the lower classes of the Egyptian population after the Greek conquest. There is a fair amount of documentary evidence as to the State religion and the gods who were preferred by the upper and middle classes. But there must always have been a large substratum of *fellahin* who did not speak Greek or write in any form, amongst whom the old traditional beliefs, as well as the old language, persisted. Demotic texts are few in number and usually unimportant in content, as compared with those in Greek, during the Ptolemaic and Roman periods; but they testify to a survival of the Egyptian tongue with sufficient vigour to enable it to recover its position not only as a national but as an official language when the external sanction of Greek was withdrawn. Similarly, there must have been a steady adherence to the old forms of worship among the peasantry, which is not recorded on monuments, but which caught the attention of Roman writers, and which the early Fathers of the Christian Church had to combat; for instance, the attacks of Clement point to a prevalence of animal-worship which would never be suspected from any Greek inscriptions; and it was this persistent belief which reappeared in the Egyptian magic of modern times.

Summary.—The official Graeco-Egyptian worship was based on the Alexandrian triad of Sarapis, Isis, and Harpokrates. Even in the first of these three deities was the non-Egyptian element of material importance, and all derived the greater part of their local acceptance by inheritance from the native religion. The Greek inhabitants of the country frequently offered homage in the Egyptian shrines, addressing the god by a Greek name chosen on a superficial system of equation; or, if the particular deity could not readily be identified with a Greek equivalent, they were ready to adopt the Egyptian name. Meanwhile the native peasantry adhered to their old gods, and their faith gradually purged the worship of the country of the Hellenic elements which had been introduced, and made it in the days of its decline once more distinctively Egyptian.

No attempt has been made, in the present article, to trace the development of the worship of Egyptian gods outside Egypt. The reason for this is that the cults of Isis, Osiris, Sarapis, and Anubis, when transplanted to Greece or Italy, ceased to be Egyptian. The account of the festival at Corinth given by Apuleius contains hardly anything that would be recognizable as Egyptian, apart from mere names.

Incidentally, however, it may be noted as significant that at Rome, and in the West generally, Osiris rather than Sarapis was the usual object of worship with Isis. In the Greek parts of Asia, and to a certain extent in European Greece, Sarapis had been introduced under Ptolemaic influence; but, when the Romans had reached the stage of borrowing Oriental gods, Osiris was coming to the fore again.

LITERATURE.—An excellent summary account of Egyptian religion in the Graeco-Roman period is given in A. Erman, *Handbook of Egyptian Religion*, tr. A. S. Griffith, London, 1907. The fullest treatment of existing materials in regard to organization of worship is in W. Otto, *Priester und Tempel im hellenistischen Ägypten*, Leipzig, 1905-08; J. Kaerst, *Geschichte des hellenistischen Zeitalters*, Leipzig, 1901, has a very good review of the philosophical atmosphere in which the cult of Sarapis developed, in bk. v. ch. 5; see especially pp. 265-280.

For the worship of Egyptian gods outside Egypt, see G. Lafaye, *Hist. du culte des divinités d'Alexandrie hors de l'Égypte*, Paris, 1884, and A. Rusch, *de Serapide et Isis in Graecia cultis*, Berlin, 1906; also W. Drexler in *Num. Ztschr.* xxi. [1889] 1-234, on 'Isis and Sarapis in Asia Minor,' and the catalogue of localities of Isis-worship abroad, in Roscher, s.v. 'Isis.' The chapter on Egypt in F. Cumont, *The Oriental Religions in Roman Paganism*, Eng. tr., Chicago, 1911, pp. 73-102, gives a valuable account of the influence of Egyptian beliefs at Rome.

J. G. MILNE.

GRAIAI.—The Graiai (Γραιαί, 'old ones'), or Phorkides, first appear in Hesiod (*Theog.* 270-273) as daughters of the sea-deities Phorkys and Keto, and sisters of the three Gorgons. They are beautiful (unless in line 270 καλλιπάρῃος should be read, referring to their mother only), and well-dressed, one being εὐπρεπὸς and the other κροκόπεπλος. They are also white-haired from birth (ἐκ γενετῆς πάλαι); but lines 271-2 are commonly obelized by modern editors. It is, however, unlikely that this phrase is spurious; and it is simpler to consider the two lines genuine, removing all difficulty by reading θύγαρπας for ἰπλάας in line 270). Two sisters only are named by Hesiod—Pephredo (*v.l.* Pemphredo or Tephredo or, in other writers, Memphredo or Pephrido or Pephrodo) and Enuo; but it is probable that a third name—Deino or Dino—should be substituted for the word εὐπρεπὸς in line 273. In the following passage, lines 274-286, Hesiod names the Gorgons, and gives very briefly the elements of the Perseus and Medusa legend; but he does not represent them as hideous (see art. GORGON). In Aeschylus (*Prom. Vinc.* 793-797) both sets of sisters have become monsters (τέρατα), living in the Gorgonian plains of Kisthene, which was in the far West, or possibly in the far East.¹ His Phorkides are three aged maidens (θηραιαὶ κόραι), swan-shaped (κυκρόμορφοι), with one eye and one tooth in common, never shone upon by sun or moon. To this must be added a statement in the lost *Phorkides* of the same dramatist, recorded by the pseudo-Eratosthenes (*Catasterismi*, 22) and the poet Hyginus (*Astr.* ii. 12), that they were προφύλακες of the Gorgons; the same play also alluded to a cave (Aesch., ed. Sidgwick, frag. 261 f.). Aeschylus's epithet κυκρόμορφοι seems inconsistent with his μονόδοντες; and it is suggested that the resemblance to swans should be taken as partial or vague rather than exact, or that some lost word, such as κυκνόφορκοι (swan-white), should be substituted; the paronomasia would be quite in Aeschylus's manner. In Aeschylus the Gorgons too have become τέρατα, not only winged, but δρακοντοβάλλοι and βροτοστρυγεῖς; and the sight of them is fatal to life.

After this, though the Gorgons are frequently mentioned, their sisters disappear from extant Greek literature till the time of the mythologists. Apollodorus (ii. 4. 2), after Pherecydes, makes them in some way guardians of the Gorgons; Perseus

¹ A scholiast in the Cod. Med. of Aeschylus says vaguely: πάλαι Διὸς ἡ Αἰθιοπίας.

snatches away the common eye and tooth while these are being passed round, and then restores them in exchange for instructions how to find the Nymphs, from whom he wishes to obtain the magic cap, shoes, and sword. Palaphatus (*de Incred.* 32) makes the Graiai reveal to Perseus the way to the Gorgons. Hyginus represents Perseus as already possessed of the cap and shoes; he takes the eye and the tooth while the holders are passing them on to relieve guard, and throws them into the Tritonian lake. There are unimportant variations of detail in writers such as Tzetzes, Ovid, Nonnus, etc. (see the references in Roscher).

The Graiai very seldom figure in art. Miss Harrison describes (*Proleg. to Gr. Rel.*, Cambridge, 1903, pp. 194-96) and figures (fig. 35) a cover of a *pyxis* in the Central Museum at Athens, on which they are represented with dolphins, accompanied by Phorkys, Poseidon, Hermes, and Perseus (who is waiting to snatch the eye from two of them while the third holds the tooth); they appear to be young and lovely. Miss Harrison says this is the only known representation in vase-painting. A Rapp (Roscher, i. 1737 f.) is disinclined to accept Panofka's interpretation of an incised stone and an amphora (the latter in the British Museum) as representing 'Perseus and Graia'; but he attaches more importance to an Etruscan mirror as described in the sale catalogue of the Castellani Collection at Rome in 1884.

From the above facts it is clear that the *mythos* of the Graiai was conflated and possibly contaminated at a very early period; it probably varied to some extent with the attempts at interpretation. The details, therefore, may not admit of any single or consistent explanation. Their parentage, complexion, swan-shape or colour, and association with dolphins connect them with the sea; sea-gods are also credited with mysterious knowledge of secrets, and are frequently of venerable appearance. The Gorgons also have marine affinities, and in modern Greek folk-lore have become mermaids (see J. C. Lawson, *Modern Greek Folklore and Ancient Greek Religion*, Cambridge, 1910, p. 186). Hermann (*Opusc.* ii. [1827] 179) goes so far as to make the Graiai of Hesiod tide-goddesses, translating their names as 'Auferona' and 'Inferona,' apparently from *φέρειν* and *ἐν*. Similarly, ancient etymologists derived *Φορκύς* from *φορεῖν*; or *Περφόδω* may be from *φύσσω*, and *Ἐννώ* from *ἐνώσω* (of sound). Their whiteness is easily connected with sea-foam.

Swans, however, also symbolize clouds; and the epithets of Hesiod suggest that the Graiai may represent the bright clouds of fine weather and especially the sunset (*κροκόπεπλος*), while their sisters the Gorgons personify the dark clouds of storm and rain. This view was advocated by Roscher, and is apparently supported by Rapp, who sees in the transferable eye and tooth of the Graiai, and still more in the baleful glance of the Gorgons, the flash of the lightning and its apparent passage from cloud to cloud. The Gorgons also seem to be credited with a single eye, possessed in common, by a scholiast on Aesch. *Prom. Vinc.* 793. Mannhardt (*Germ. Mythen*, Berlin, 1858, p. 217, *ZE*, 1875) interprets the eye as the ray of sunlight; while Tylor (*Prim. Cult.* 4, 1903, i. 352) thinks that the Gorgons, one mortal and two immortal, may stand for the present, past, and future, their eye being the sun itself. With these theories we may also class the suggested derivations of their names from the roots of *πέμφω* and *πυμφός* and *ἐν-ω*. The *v.l.* *ρεφφόω* would mean 'the ashen-coloured,' and might apply either to waves or to clouds. So might the third name *Δνώ*, if from *δίνω*, but it is more probably *Δνώ* from *δενός*.

The suggestions that the Graiai and Gorgons are volcanoes or gorillas seem fantastic, since it is now

generally held that the hideous head or mask of the latter—the *Γοργωνεῖον* or *Γοργυλὴ κεφαλὴ* of Hom. *Od.* xi. 633—is not an original feature of them at all, but an *ἀπορρέπων* of Oriental, and probably Hittite, origin, introduced into Greece about the end of the 8th cent., and perpetuated in many various types. This conflation would not be difficult to account for if the Gorgons were originally storm-cloud goddesses capable of malignant glances of lightning; but it may well be due, in the first place, to some etymological confusion between names of similar sound. On these lines the latest mythologists, such as Miss Harrison (*op. cit.*), regard the Graiai and Gorgons as originally triads of sea- or cloud-goddesses and as by-forms of each other, perhaps distinguished as causing good or bad weather. The eye and tooth symbolize their potency, which can be transmitted from one quarter to another; it is a similar conception to the common one of the 'external soul.' At an early period, probably long before Aeschylus, the Gorgons acquired alien characteristics, and their duplicates, the Graiai, were then worked into the Perseus legend in various ways. But some points in Aeschylus's description would still remain obscure, such as the swan-shape and the avoidance of light by residence in a hole or cave; and these may be inventions of his own to make them monsters (*τεπαρείεσθαι*).

LITERATURE.—The article by A. Rapp in Roscher's *Lexikon*, i. 1729-1738, is full of references to obscure German dissertations on the Phorkides and Gorgons, but does not contain the latest views. G. Glotz (in Daremberg-Saglio, ii. 2) is more concise, but he explains the point about the *Γοργωνεῖον*. Among older books, the most important are G. F. Schömann, *de Phorcyne ejusque familia*, Leipzig, 1853, and W. H. Roscher, *Gorgonen und Verwandtes*, do. 1879. See also art. *GORGONS* above, and in other dictionaries; and E. S. Hartland, *Legend of Perseus*, London, 1896, *passim*.

H. E. D. BLAKISTON.

GRAIL, THE HOLY.—1. Term and idea.—The most familiar use of the word 'Grail,' though probably not the most ancient or accurate, applies it to the cup used by our Lord at the Last Supper. There is more literary support for a different interpretation—the vessel in which Joseph of Arimathea collected the blood from the wound-prints of Jesus; this vessel is sometimes, though not always, identified with a chalice or dish used at the Supper. Sometimes, again, the Grail seems to be a platter; or a reliquary to contain the Host; or a stone, as in Wolfram; or a 'rich Grail,' undefined, but apparently a food-producing talisman. Derivations of the word vary as much as definitions of its meaning. The best authenticated traces it to the Latin *crater* (cup), through the forms *cratalis* and *gradalis*. A derivation suggested by the Grail romancers themselves (e.g. Robert de Borron) is the root *grā*—the vessel being named from the pleasure it gives to those who behold it; cf. the much quoted sentence from Helinandus (Migne, *PL* ccxii. 815):

'Gradalis autem sive Gradale Gallice dicitur scutella lata, et aliquantulum profunda, in qua pretiosae dapes cum suo jure divitibus solent poni gradatim . . . et dicitur vulgari nomine Graalz, quia grata et acceptabilis est.'

Paulin Paris (*Les Romans de la table ronde*, Paris, 1868, i. 102) quotes an eighth-century story, which, if its authenticity could be established, would give a new derivation and definition together—of a *Liber Gradalis*, the adjective being akin to the Gradual of the Roman Church. The whole subject, alike in its ultimate origins and in its inner significance, like the Grail itself in Tennyson's poem, is 'all covered over with a luminous cloud,' and there is room for much variety of theory and interpretation. The Grail itself in its elusiveness and changefulness baffles the writer's quest to-day, as it baffled the knight's quest long ago; it flashes across his vision and is gone before he has time to question it; and he who sets forth to write of it

finds more to describe in the quest than in the goal.

2. **Literary development.**—In the space of fifty years (roughly between 1170 and 1220) the great body of Grail romance apparently came into existence. But it was not until 1881 that complete texts began to appear, most of them merely 13th or 14th cent. transcripts of the 12th cent. MSS. These MSS are found in France, Germany, and Great Britain; and early printed forms are preserved also in Spain, Portugal, and Holland. The MSS are very confused as well as scattered—some fragmentary, and some suggesting interpolations by later hands. Parts of the story connected in one MS are found elsewhere separated and conjoined with other parts, so that the task of research has been one of very great difficulty. The Germans F. Zarncke (in H. Paul and W. Braune's *Beitr. zur Gesch. der deutschen Spr. und Lit.* iii. (Halle, 1876) 304 ff.) and A. Birch-Hirschfeld (*Die Sage vom Gral*, Leipzig, 1877) made praiseworthy attempts to introduce some chronological order into the chaos; and, while other scholars have not been able entirely to agree with Birch-Hirschfeld's analysis, it still supplies a basis for tabulation which is helpful. It must always, however, be remembered that the discovery of some hitherto concealed MS or some biographical fact might throw a flood of light on the whole subject, and re-arrange the knowledge now possessed by investigators. Meantime a very wide margin must be allowed in such dates as may be conjectured from internal evidence of the MSS. Much controversy still circles round the names of Chrétien de Troyes and Robert de Borron. Of the dated work, Chrétien's is the oldest of all, and by most scholars he was regarded as the undisputed head of the cycle. Birch-Hirschfeld, however, gave that place most emphatically to Robert de Borron, and of later years Miss Weston also has been inclined to take the same position. The decision is largely dependent on whether we may regard the *Prose Perceval* as representing de Borron's work, and thus much earlier than scholars have hitherto placed it. (For Nutt's division into 'Early History' and 'Quest' versions, and for the connexion with the Arthurian cycle as a whole, see art. ARTHUR in vol. ii. p. 6^b.)

It is to be noted that the Celtic *Peredur* and the English *Syr Percyvelle* do not deal with the Grail as such. But they cannot be omitted in an account of the Romance literature, because of their value in the matter of tracing origins.

FRANÇOIS.—1. *Le Conte del Graal* of Chrétien de Troyes (1180-90): poem printed for the first time by Potvin from the Mons MS, and contained (along with 'the Elucidation,' Gautier, Manessier, and Gerbert) in vols. II-VI. of *Perceval le Gallois, ou le Conte del Graal*, Mons, 1806-71. Copies of this work are so rare as to render it practically inaccessible.

2. Gautier de Douzens (or Wauchier de Denain, as he is called by Miss Weston, following M. Meyer) continues Chrétien's poem (1196-1216). A different version and interpolation given in another MS is referred to occasionally as *pseudo-Gautier*.

3. *Le petit St. Graal* of Robert de Borron (1180-99): (a) the unique fragmentary MS, a poem of about 8514 lines dealing with *Joseph of Arimathea*, and the remaining fragment with *Merlin*; (b) prose versions of the above: several MSS, of which the chief are the Cangé MS (1250); the Huth MS (c. 1280); and the famous Didot MS which includes as well the *Prose Perceval* (see below). The whole is accessible in an appendix to vol. I. of Furnivall's *Seynt Graal, or Sank Ryol*, London, 1861-63.

4. *Queste del Saint Graal*: prose; authorship unknown; the ascription in the MS to Map considered very dubious (1190, probably after Gautier); accessible in the form of Malory's *Le Morte d'Arthur*.

5. *Grand Saint Graal* (the fullest 'Early History'): prose; authorship unknown (c. 1200); accessible in Hucher's *Le Saint-Graal, ou le Joseph d'Arimathea*, Le Mans, 1875-78, or in Furnivall's *Seynt Graal, or Sank Ryol*.

6. Manessier continues Chrétien's poem, adding 45,379 verses after Gautier, and so finishing *Le Conte* (1214-20).

7. Gerbert de Montreuil interpolates 15,000 verses chiefly between Gautier and Manessier (1220-25). Both 6 and 7 are printed as above in Potvin's *Le Conte del Graal*.

8. *Perlesvaus* or *Perceval le Gallois*: prose; author unknown (c. 1225); first printed by Potvin in vol. I. of *Le Conte del Graal* (see above); now accessible in the form of *The High History of the Holy Grail*, tr. by Sebastian Evans, London, 1898.

9. The *Prose Perceval* (1230-50?; see above), found in the Didot MS (1801), also in a Modena MS which Miss Weston thinks both an earlier and better text; accessible in Hucher's *Le Saint-Graal, ou le Joseph d'Arimathea*. Miss Weston also gives a comparison of the D and M MSS in her *Legend of Sir Perceval*, vol. II., London, 1909.

CELTI.—1. *Mabinogi of Peredur, Son of Evrawc*: prose; probably a re-translation back from French into Welsh of an old Welsh story. It is found in the *Red Book of Hergest*, MS of end of 14th cent., also in MSS of 13th cent.; accessible in *The Mabinogion*, tr. by Lady Guest, London, 1838-49; also selection ed. by A. Nutt, do. 1910.

2. *Y Seint Graal*: selections from Hengwrt MS (15th cent.); a Welsh 'Quest' Story (with Eng. tr. by Robert Williams, London, 1876) slightly differing from other forms, consisting in its first part of a version corresponding to Parts XIII-XVII. of Malory's *Morte d'Arthur*, and in its second part of a version of the *Perlesvaus*.

ENGLISH.—The metrical Romance of *Syr Percyvelle* or *Sir Perceval of Galles* from the Thornton MS (c. 1440) in the Library of Lincoln Cathedral; accessible in the *Thornton Romances* (1884, ed. Halliwell).

GERMAN.—1. *Parzival*, by Wolfram von Eschenbach: a metrical romance (c. 1210); accessible in Eng. tr. *Parzival: a Knightly Epic*, by Jessie L. Weston, 2 vols., London, 1894.

2. *Die Crône*, by Heinrich von dem Türlin, who lived in the first half of the 13th cent.; accessible in vol. XVII. of *Bibliothek des literar. Vereins*, ed. G. H. F. Scholl, Stuttgart, 1852.

3. *Der jüngere Titurel*, by Albrecht von Scharffenberg (1270), written late for purposes of the study of the Grail, but interesting as a compilation and completion of fragments left by Wolfram and some unknown author; accessible as *Der jüngere Titurel*, ed. K. A. Hahn, Quedlinburg and Leipzig, 1842.

The three great names in connexion with this literature are those of Chrétien de Troyes, Robert de Borron, and Wolfram von Eschenbach. Chrétien was the poet of the court. His story is told with a charm of style and a sense of chivalry which give it a very high place in mediæval literature. But he does not explain the Grail, nor does he give any suggestion of realizing its deeper meaning. Whether this was merely the art of the skilful romancer, who intended to explain and deepen his theme, we have no means of knowing. His death broke the poem off abruptly, to be finished by those who may or may not have grasped his ideas. Robert de Borron was a much less skilled and polished workman. But there was a completeness about his work—especially if we may claim the *Perceval* as part of his idea—which puzzled scholars. He evidently had a definite and comprehensive plan. He viewed the Grail as a Christian symbol, and made his story carry out that conception. To him, for this reason, some have ascribed the fusion of the Grail story with the Saga. But the exact point of contact with the Arthurian cycle is very difficult to fix (see art. ARTHUR). To Wolfram v. Eschenbach it was left to give the legend its most spiritualized form. 'Wolfram,' says A. Nutt (*Studies on the Legend of the Holy Grail*, London, 1888, p. 257), 'makes his hero win salvation by steadfast faith.' The Grail is here certainly not the Cup of the Last Supper. But the field of Grail attainment is the field of Christian endeavour, and its banner is charity, the charity which for Wolfram changed the unmeaning question, 'What does it (the Grail) serve?' into 'What aileth thee?'

3. **Subject-matter.**—It is quite evident that hundreds of stories were floating about, and that the Romance writers could pick and choose according to individual temperament and desire. To this is probably due the welding of entirely different stories. These stories were, however, based on myths of the world's early days, and were, therefore, near enough akin to be constantly suggesting each other, while differing enough in detail to

make a strange confusion when brought together. Thus we get a loosely-connected mass of incident and at least three heroes—Perceval, Gawain, and Galahad. We may set Galahad on one side as quite probably a late invention. He appears in the *Queste* and *Grand St. Graal*. To this fact is perhaps due the theory that he was invented by Walter Map—possibly as a tribute to the son of Henry II.; more likely in order to detach the story from its early somewhat pagan associations and make the claim of the Church to the story more plausible because of the saintliness of the knight. Gawain and Perceval are both early heroes. In the *Conte de Chrétien*, Gawain is an understudy to Perceval. But close investigation has led Miss Weston to the conclusion that these are the heroes of two different stories which have fused, and that Gawain is the earlier of the two. It is worthy of note how much closer the connexion between Gawain and the rest of the poem is in Wolfram than in Chrétien de Troyes. Persistent features—in addition, of course, to the Grail itself and the question 'Cui on servit?' associated with it—are: (a) *The Vengeance Quest*: the hero sets out with the desire to avenge the fate of his father or uncle—a quite human and, therefore, primitive note. (b) *The Unspelling Quest*: the hero visits a bespelled castle, where he finds either simply supernatural beings such as the maidens or those—neither gods nor men—who linger under a spell from which only a mortal who has attained a certain heroic level can release them. The hero, therefore, must know or do certain things. If he fails, the castle vanishes or he leaves it unnoticed and unhelped. This is obviously a contribution from the childhood of the world, when mortals were half-aware of supernatural powers, with whom magic alone enabled them to deal. (c) *The Great Fool Tale*: this is a primitive story found among all peoples. It takes various forms, but, apart from incidental details, it is generally the story of a youth (son of a god or hero) who in consequence of certain events grows up away from the world and in ignorance of its ways; he returns to that world and, in spite of his want of knowledge, finds his way back to the hero-band to which his father belonged; and, in time, proves himself to be the greatest of them all. The appropriation of this well-known folk-tale for either simple or complex forms of the story is easy to understand, whether the writer had in mind a merely charming romance or one laden with inner meaning. And so this is either the Perceval of Chrétien's courtly poem or the Parzival of Wolfram's spiritual allegory. (d) *The Fisher-king*: the wounded king of the Grail castle is found fishing while he waits for his deliverer. Apart from the Grail itself, and the 'question,' this has been probably the most perplexing feature of the cycle. Attempts have been made to account for the king's occupation in various ways; but all are acknowledged to be not entirely satisfactory. There is, for instance, a possible link with the fish as the Christian symbol, the fish itself appearing in the 'Early History' as that which, caught and laid on the Table, divided the pure from the impure among those who were fed by the Grail. There is also the Salmon of Wisdom of Irish folklore. And, most remote of all, there is even the Babylonian story of Adapa, the wise one and fisher (cf. W. Staerk, *Über den Ursprung der Grallegende*, Tübingen and Leipzig, 1903, p. 55). (e) *The Lance, the Sword, and the Dish*: of these the lance is supposed to be the weapon which pierced the side of Christ, and ranks next to the Grail in importance. The sword is sometimes the weapon of the Vengeance Quest, but elsewhere it is sacred. The meaning of the dish is very uncertain. Indeed, there is some

reason for suspecting that the romancers had taken over the sword and the dish with little conception as to what they were or might signify.

4. Sources.—As has been indicated, there is no primary form of the literature now known to be extant; and there has been much speculation as to sources and originals. It may be taken as fairly certain that the *Evangelium Nicodemus* or *Gesta Pilati* (A.D. 425) is an early source of the Joseph of Arimathea stories. Surmises based on internal evidence suggest among sources that have disappeared: (a) a possible lost Latin original from which Chrétien, Gautier, and Robert de Borron may have drawn, and which Walter Map (to whom the MSS ascribe the *Queste*) may have compiled; this, it is even thought, might have been the *Book of Philip of Flanders*, which is spoken of in the Prologue to Chrétien; (b) a lost poem by Kyot or Guiot, to whom Wolfram, scorning Chrétien's version, ascribes his version of the story (the rare North French poem, the *Saône de Nausay*, has been used in evidence of the existence of some such poet); (c) a lost Brutus: Robert de Borron in his *Merlin* refers to an 'estoire de Bretagne que on appelle Brutus, que Messire Martin de Rocester translata.' As has been shown above, all these problematic sources would again be dependent for their ultimate origin on a mass of traditional tales preserved and passed on by the bards of the time, of whom Master Blihis or Bleheris, referred to in 'the Elucidation,' may possibly have been one. The contact between East and West, and the especially close touch between England and France, in the century from which these stories come, makes the field of investigation a very far-reaching one and the search for origins extremely perplexing.

(1) *Celtic theory*.—In 1838 the publication of Lady Guest's *The Mabinogion: from the Llyfr Coch of Hergest and other ancient Welsh MSS* called attention to the marked similarity of incident between the three Welsh tales (*The Lady of the Fountain*, *Geraint the Son of Erbin*, *Peredur the Son of Eborac*) and three Romances of the French trouvère Chrétien de Troyes (*Yvain, le chevalier au Lion*, *Erec*, and *Le Conte del Graal*). The bearing of this similarity on research into the history of the Grail story was at once seen by scholars, who divided themselves into partisans of either (a) the Insular or (b) the Continental school; the one holding that the Welsh tales were the earlier, and the other that the birth-place of the tales was not Wales but Armorica, whence they reached Chrétien de Troyes. Among the leading exponents of the Insular school were Gaston Paris and A. Nutt; and of the Continental school, Foerster and Golther. In the main, the Insular Celtic theory has prevailed. The essence of that theory is that the stories—a *proto-Mabinogion*—passed from the Welsh story-tellers to France through the medium of the Breton *lais*, and were seized upon and given literary form by Chrétien de Troyes. Some of the stories, retranslated, returned to Wales, and these we have in the *Mabinogion*. A. Nutt, in his *Studies on the Legend of the Holy Grail* (London, 1888), has given many instances of what he regards as conclusive proofs that the *Mabinogion* were very near to the myth roots in their primitive simplicity, and that many of the most curious incidents in the French cycle have affinities so close with Celtic folklore that they cannot be overlooked.

(2) *Oriental theory*.—The names of Gaster and Wesseloisky are associated with the hypothesis that the sources of the story are to be found in the East. By them it is connected with the famous Alexander-romance literature and other Eastern myths. There are, of course, characteristics which lend themselves to this theory. Rich Eastern colouring appears in most of the stories; there is

also an Oriental conversion legend; and Wolfram's *Parzival* has many features of this kind, including the introduction of Prester John and the Knights Templar. Most scholars, however, have rejected the theory on the ground that the mere existence of kindred myths proves little. The Crusades, too, with their continual movement between East and West, while explaining many Eastern features, make it impossible to base any origin-theory simply on Oriental colouring. W. Staerk, in his treatise (cited above), p. 44 ff., deals with the connexion between the sacramental cup and the wonder-dispensing vessel, and points out, with many interesting examples, the place of Babylonian myth in shaping 'the ground-tone in that Gnostic-Oriental circle of ideas out of which Judaism and Christianity equally have drawn deeply' (p. 47).

(3) *Nature-cult theory*.—One special ingredient among those suggesting an Eastern origin is very clearly marked—an apparent affinity with elements in the cult of Adonis or some similar Nature-cult. This becomes more important when one notices that this resemblance is plainest in forms of the story adjudged by criticism on other grounds to be the oldest. There is the persistent feature of the wasted land, partly or wholly restored to fertility, especially in combination with the wounded king restored to health: there is an obvious suggestion of 'Tammuz yearly wounded,' and of observances of Nature's annual decay and resurrection, which were not only wide-spread but, on the whole, travelled westwards. The parallel becomes still more suggestive when one notes the prominence of weeping in the Grail legends—sometimes a weeping maiden or maidens, sometimes the weeping of all in the Grail castle: in the *Peredur* there is the weeping and lamenting even without the Grail itself.¹ These affinities were first noticed by Simrock and Martin, but have been more completely worked out by Miss Weston in an article on 'The Grail and the Rites of Adonis' (*FL* xviii., Sept. 1907), and in her second vol. on *The Legend of Sir Perceval*.

(4) *Initiation theory*.—Blended with these elements there are others which suggest affinities with religious mysteries and initiation ceremonies. There is almost always in the Grail story a question to be asked by the hero; he fails to ask it, and draws upon himself the curses of the people of the wasted land; or he asks it partially, and the blight is but partially lifted; by and by he comes again to the Grail castle, and asks it fully and successfully. The same mystery-note is suggested by the 'secret words' which in some of the later forms of the story are confided to the successful Grail-winner; and by 'the changes of the Grail,' beheld by king Arthur, 'in five several manners that none ought to tell, for the secret things of the sacrament ought none to tell openly but he to whom God hath given it' (*High History*, ii. 112). The theory has been suggested that here we have the remnants of an initiation legend—the failure to ask the question representing an *initiation manquée*. The theory is difficult to prove: vagueness and mystery are of the essence of the incident; but it is difficult to account otherwise for the fact that the question-element is so central and so persistent.

5. *Christianization*.—The Christian element in the Grail stories now remains to be considered. This includes the whole 'Early History' material—the story of Joseph of Arimathea and his descendants and their connexion with the Grail, also the conversion of Britain through Joseph's kinsman Brons or his son Josephes. It also includes the Christianized details, which vary in quantity in different forms of the story. Sometimes this

element is very scanty: in the *Dieu Créne* it is practically absent; in the Thornton *Syr Percyvelle* there is nothing except that the Knight goes at last to the Holy Land. Sometimes, again, the documents abound in Christian symbolism or allusion: even in the *Mabinogion*, one comes across nuns, paternosters, baptism, Good Friday; in the *Perlesvaus* there is a strong tincture of asceticism; in Wolfram, though the Grail itself takes its least ecclesiastical form, there is the dove, the Host, and the order of virgin knights, and the Grail vision is denied to a heathen. It may now be taken as an accepted result of scholarship that these Christian elements represent transformations or fusions comparatively late in the history of the Grail idea, and do not give an indication of its ultimate origin, which is much more likely to be found among the elements alluded to in the preceding paragraphs. It is conceivable that a talisman in the form of a vessel or otherwise,² and already revered on other grounds, might be changed into the Chalice of the Last Supper by contact with Christian influence, just as the shrines of certain pagan goddesses were absorbed into the cult of the Virgin. But it is inconceivable that the process should work the other way—that a vessel hallowed by immemorial Christian tradition could degenerate into a mere food-producing talisman; it is unthinkable that the Holy Chalice and the lance of Longinus should be turned to the uses of a mere vengeance-quest, as would be the case on the hypothesis of a purely Christian origin for the Grail idea.

The problem remains of the time and place at which the Christian influences definitely touched the non-Christian traditions and accomplished the great fusion. Something of this must have been due to the *Gospel of Nicodemus* (see above; also *HDB* iii. 544 ff.), which had been known in the West for some hundreds of years. Much was also due to the Crusades; in Miss Weston's words (*Legend of Sir Perceval*, ii. 267), 'all eyes were turned to Jerusalem; and the effort to wrest the Holy Places, the site of the Death and Burial of the Redeemer, from the hands of the infidel captured the imagination of all Christendom. Relics of the Passion, fragments of the Cross, the Nails, the Crown of Thorns, were making their way in a continuous procession to Europe; the Holy Lance had been discovered at Antioch; numerous places boasted the possession of the Holy Blood.'

It was very natural that a story of a lance and cup should take on a new colouring from the things which were moving Christendom, and that a hero whose primal quest had been for vengeance on an enemy or for the removal of an evil spell should have his goal transfigured, without always losing all trace of its former character. One of the spots where the Joseph-legend was first localized, and where the 'sang real' was believed to be preserved, was Fécamp.³ It is possible and probable that this was one of the most definite points of contact between the Christian and non-Christian traditions. But if that was so, a re-colouring of the whole matter in the interests of Glastonbury must have taken place when the Christianized story crossed the Channel and touched again the borders of the Wales from which, before its baptism, it had emerged. The reign of Henry II. (1154-89) coincides with three noteworthy things: the climax of the 'sang real' interest at Fécamp; the attempt to utilize the Arthurian tradition in the conciliation of wild Wales; and the ecclesiastical assertion of Britain against Rome, resisted by Thomas à Becket. There was thus a strong inducement to Christianize the cup of Celtic legend and to glorify Glastonbury as the home of the sacred Chalice;

¹ The much discussed stone in Wolfram may have been a vessel cut from stone. The *sacro catino* at Genoa was said to have been cut from an emerald.

² In 1171 the relic was discovered in a pillar, and exhibited above the High Altar of the Abbey. See Le Roux de Lincy, *Essai sur l'abbaye de Fécamp*, Rouen, 1840, p. 79 ff.

³ Cf. *Etz* 814; J. G. Frazer, *Adonis, Attis, Osiris*, London, 1907, p. 6 ff.; *The Dying God*, 1911, p. 268 ff.

and the ambitions and necessities of Henry II. may have helped to give the legend its final form and home. It was a convenient thing that the sanctity of Glastonbury should rival that of any Continental shrine, and that the antiquity of its traditions should be widely known and revered.

The Grail legends, however thoroughly Christianized, always retained a flavour of heterodoxy; they never fully or universally received the sanction of the Church. This has been accounted for in different ways—by the fact that they involved too high a claim for the British Church; or because they were so largely coloured by the adventures, and, therefore, by the reputation, of the Knights Templar; or because they embodied elements derived from pagan faith and worship. Whatever ecclesiastical suspicion may have gathered round the theme was possibly intensified by the controversy regarding the denial of the cup to the laity. The deprivation caused wide-spread resentment, and the Grail may have taken to itself fresh glory as the symbol of an unsatisfied desire. Sebastian Evans' ingenious reading of one form of the story—in which he interprets the Fisher-king as the Pope, Perceval as Dominic, Galahad as Francis, the wasted land as Britain under the interdict, etc.—is, if unconvincing as an interpretation, at least a proof of the ease with which the story can be made to fit a theory. In early days it may have been equally easy to use it to convey an impression, if not definitely to advocate an opinion.

6. Significance and symbolism.—Is there any hypothesis which would unify these different ideas, and which, actually and historically, even if semi-unconsciously, might have served for a basis of fusion? The likeliest of those that have been suggested is the idea of the quest for the secret of life: it is sufficiently ancient, persistent, and close to the abiding instincts of men. The Adonis rites were concerned with the death and the quickening of the natural world. Some of the ancient mysteries were the expression of the human hunger for the supreme secret, and a promise of its satisfaction. May not some forms of this quest, and some dreams of its goal, have hidden themselves among the Celtic races, to emerge again in tales about the quests of heroes, the deliverance of a blighted land, or the achievements of a cauldron of plenty? Meantime there had come down another line of development the story of another Cup, hallowed by its connexion with the most sacred Name, exalted by the sacramental principle now accepted throughout Christendom, revered as the means whereby souls questing for life found life indeed. *Visio Dei vita hominis*; and God and life were together in the cup of sacrifice. So the two life-quests met, being aided in their fusion at once by certain convenient resemblances of external form, by historical causes alluded to above, and not least by underlying unity of essential idea. Through this fusion there was fashioned one of the richest influences which have ever inspired music, poetry, and art; and an abiding symbol for the moral and spiritual idealism of pilgrim humanity. Seen from different standpoints, the Grail became the emblem of moral purity, or of triumphant faith, or of soldierly heroism, or of gracious charity; the radiance of it became the radiance of that ultimate perfection which allures those who struggle and rewards those who attain. It is noteworthy that Robert de Borron, before the tradition had time to be deeply ecclesiasticized, and Richard Wagner, who had no special ecclesiastical interest to serve, should alike be able to see the spiritual significance of the Grail idea. While the symbol has still a special meaning for

'Godly hearts that, grails of gold,
Still the blood of faith do hold.'

it also expresses in the most comprehensive way, by virtue of its ancient origins and devious wanderings, the purest desire and best attainment of the human spirit.

LITERATURE.—In addition to the books and articles mentioned above in text and notes, see Lit. appended to art. ARTHUR, ARTHURIAN CYCLES. Of those mentioned there, the most useful in the present connexion are those of Birch-Hirschfeld, A. Nutt, and Jessie L. Weston. E. Wechssler (*Die Sage v. heil. Grail*, Halle, 1898) gives a very complete bibliography. See also J. L. Weston's second vol. of *Sir Perceval Studies*, London, 1900; A. Nutt's smaller book (popular, but sufficient), *The Legends of the Holy Grail*, do. 1902; Sebastian Evans, *In Quest of the Holy Grail*, do. 1898; A. E. Waite, *The Hidden Church of the Holy Grail*, do. 1909; Paul Hagen, *Der Grail*, Strassburg, 1900; cf. also an art. by A. Nutt, in *FLR* iv. (1881), on the connexion between the Grail stories and J. G. von Hahn's 'Aryan Expulsion and Return-Formula'. Among modern poetical expressions of the Grail idea, the most striking, next to Tennyson's, is that of R. S. Hawker, *The Quest of the Sangraal* (an unfinished fragment, Exeter, 1884; reprinted in *Poetical Works*, London, 1899). A fine practical and homiletical treatment is given by J. H. Skrine, in *Sermons to Pastors and Masters*, London, 1910, p. 211 ff.

J. M. E. ROSS and MARGARET ROSS.

GRANTH (Skr. *granth*(a) 'book,' 'treatise,' 'code,' or 'section' [*Platte, Hindustani Dictionary*, London, n.d., s.v.]).—The term *granth* is applied generally to any book, especially to a religious book. In the Sikh religion the Granth denotes the general body of the Sikh scriptures, which comprise two main parts: (1) the *Ādi* (or 'original') Granth, which was compiled by Guru Arjun, the fifth Sikh guru, from the writings of Bālā Nānak, the founder of Sikhism, and many other religious reformers; and (2) the *Dasam Pādshāhī dā Granth* (abbreviated to *Dasam Granth*), or 'Granth of the tenth Pādshāh,' viz. Guru Govind Singh, the tenth and last guru of the Sikhs. All Sikhs accept the authority of (1); but that of (2) is confined to the extremist sections of the Sikh community. From Granth is derived *granthī*, 'an expounder of the Sikh scriptures,' 'a reader or custodian of the Granth' (see Ernst Trumpp, *The Ādi Granth or Holy Scriptures of the Sikhs*, London, 1877; and Max Arthur Macauliffe, *The Sikh Religion: its Gurus, Sacred Writings, and Authors*, 6 vols., Oxford, 1909).

The *Ādi Granth* in its present form was compiled by Guru Arjun (1581–1606), but after his time some of Teg Bahādūr's verses were added to it, with a single distich of Guru Govind Singh. The compilation included not only the extant writings of the earlier gurus,¹ but also those of many *bhagats*, or devotees, such as Rāmānanda and his disciples, Dhanni the Jatt, Pīpā, Ravidāsa, Kabir, and Sainu, as well as Shaikh Farid, the Muslim *qutbī*, and Nāmadeva. Those of the last-named are of special linguistic interest, as he is considered the first Marāṭhī writer. Further, Guru Arjun appears to have added a number of panegyrics composed for the occasion by various *bhatts* (*bhāts*, or professional bards), but these are of little interest.² The Granth itself comprises a *Japjī*, or introduction, by Nānak himself, the *So-darū*, or extracts from the *Rāg Āsā* and *Rāg Gūjarī*, which are used as an even-song by the Sikhs,³ the *So-purkhā*, or further extracts from the *Rāg Āsā*, by Guru Rām Dās, and the *Sō-hilā*, or extracts from the *Rāgs Gaurī*, *Āsā*, and *Dhānāsārī*,⁴ which

¹ Bālā Nānak, Angad, Amar Dās, and Rām Dās, predecessors of Arjun.

² Macauliffe describes these as panegyrics of bards who attended on the gurus or admired their characters.

³ The *So-dar* or *So-darū* is classed by Macauliffe as one of the *Rahīrās*, a collection of the hymns recited at sunset by the Sikhs. The hymns in this collection were composed by the Gurus Nānak, Amar Dās, Rām Dās, and Arjun, in the two modes stated.

⁴ To these Macauliffe (l. 259) adds *Rāg Gaurī Purbī*. The *Sō-hilā* derives its name from *sowan sōlā*, 'the time for sleep,' and consists of hymns by Gurus Nānak, Rām Dās, and Arjun, in the modes stated.

are used as a prayer before retiring to rest. The morning service of the Sikhs consists in the recitation of the *Jappī*, followed by the *Asā ki Wār*, which was composed almost entirely by Guru Nānak, though it includes some stanzas by Guru Angad. *Wār* meant originally a dirge for the brave slain in battle, but the term came to mean any song of praise. *Wārs* were composed in stanzas called *pauris*, 'ladders,' which were chanted by professional minstrels. The Granth of Guru Govind Singh contains his *Jappī*, the *Akal Ustat* (or praise of the creator), the *Vachitar Natak* (or Wonderful Drama), in which the Guru gives an account of his parentage, his Divine mission, and the battles in which he had been engaged. His militant character is illustrated by the inclusion of three abridged translations of the *Devi Mahātmya*, an episode in the *Markandeya Purān*, in praise of Durgā, the goddess of war. Then follow the *Gyān Parbōdh* (or awakening of knowledge); accounts of 24 incarnations of the Deity, selected because of their warlike character; the *Hazāre de shabd* (quatrains in praise of God and in reprobation of idolatry and hypocrisy); the *Shāstār Nām Mālā* (a list of weapons used in the Guru's time, with special reference to the Creator's attributes); the *Tria Charitar* (or tales illustrating the qualities and deceit of women); the *Zafarnāma* (an epistle of the Guru to Aurangzib); and several metrical tales in Persian. According to Trumpp, the body of the Granth comprises 30 original *Rāgs*, including those from which extracts are inserted in the foregoing parts, and a 31st *Rāg*, called the *Jai-jāvantī*, which was composed by Teg Bahādūr. Among these *Rāgs*, or modes, are distributed the verses of the various *gurus*, and to each *Rāg* sayings of one or more *bhagats* are appended, but without any system or order. The first four *Rāgs* are the most important. Macauliffe's account agrees in essentials. He describes the hymns of the *gurus* and saints as arranged according to the 31 *Rāgs* in which they were composed, and adds (vol. i. p. li) :

'The first nine Gurus adopted the name Nānak as their *nom de plume*,¹ and their compositions are distinguished by Mahallas or *quartiers*. The Granth Sahib is likened to a city, and the hymns of each Guru to a ward or division of it. Thus the compositions of Guru Nānak are styled Mahalla one, that is, the first ward; the compositions of Guru Angad the second ward, and so on. After the hymns of the Gurus are found the hymns of the Bhagats under their several musical measures.'

But, despite its varied origins, the Granth is to the Sikhs the embodiment of their *gurus*.

The Granth is concluded with a *Bhog*, which comprises a number of *Shloks*, and minor pieces by various *gurus* and *bhagats*. Owing to the diversity of its origins, the book is not written in any one language, but in various vernaculars of modern India. Thus Nāmadeva wrote in an old form of Marāṭhī; and the Brāhman Trilochan closely resembled him in style. Jaideo used a curious mixture of Sanskrit and the modern vernacular, while Rāmānanda's idiom is the old Hindī, differing little, if at all, from that of Kabir and his co-disciples. It is curious that, though Nānak and his successors were all natives of the Panjāb, they used an idiom closely resembling the Hindī, doubtless in imitation of Kabir and the other *bhagats*, to whom they owed so much as religious teachers. The result is that parts of the Granth, e.g. that of Govind Singh, which is in pure Hindī, are unintelligible to the modern Sikhs.

The metres of the Granth, which is wholly in verse, are either old Prākṛit metres or of a later type, the verses being measured by quantity only and always rhyming.

¹ The ten *gurus* are regarded by the Sikhs as only one person, the light of the first Guru's soul having been transmitted to each of his successors in turn. Cf. with this the Shi'a teaching of the devolution of the *imām*, or light, of the Prophet upon his descendants.

LITERATURE.—Trumpp's tr., as cited in the art., though it deserves much of Macauliffe's criticism for its obscurity, is prefaced by a valuable introduction. His notes on the Lexicography of the Granth are in the Royal Library at Munich. He published a useful booklet on *Die Religion der Sikhs*, Leipzig, 1881. Macauliffe's work is valuable as reproducing the view of the *gyānis*, or traditional interpreters, of the Granth, but it lacks an *apparatus criticus*.
H. A. ROSE.

GRATIAE.—See CHARITES.

GRATITUDE.—There are many human emotions that can be understood only if taken directly in connexion with the social nature of man. They presuppose the fact that men dwell together in communities—have common interests, share common experiences, run common risks, and find unity to be power. To this class belong the tender emotions—those that are excited by concern or regard of one person for another, and that are essentially of a cementing and beneficent kind. Supreme among these is love, which carries along with it parental, filial, and similar affections—love of kinsfolk, love of country, and the like; next are friendship and the allied feelings of esteem and admiration; then come the benevolent affections or affections of good-will, including sympathy, compassion, pity, and so forth; and last of all may be instanced gratitude, which has distinct relations to all the others just enumerated.

1. *Nature and origin.*—Gratitude has been defined as 'that delightful emotion of love to him who has conferred a kindness on us, the very feeling of which is itself no small part of the benefit conferred' (Thomas Brown, *op. cit. infra*, lxiii). The definition, though correct so far as it goes, is not adequate; it does not reach the real centre of the conception. We wish to know what is the nature of the emotion, whence it originates, and how it manifests itself.

(1) First, then, we observe that what arouses the emotion is not the magnitude of the benefit conferred (although this may react upon it), but the display of friendliness, affection, and good feeling on the part of the benefactor—such manifestation of good-will and kindly consideration for the recipient as cannot be claimed or exacted. There is no claim, properly speaking, in true gratitude: giver and receiver both gain, but neither claims. Hence, gratitude is not, as the cynic has so frequently represented it to be, mere 'bread and butter' affection; nor is it the prudential 'regard for favours to come.' These are purely selfish considerations, marks of an unworthy calculating egotism, which debase the emotion and transform it into what is mean and ignoble. Gratitude is an unselfish joyous response to kindness—a response that is immediate and spontaneous; the ultimate meaning of which is that human nature is so constituted that affection and unity between persons is the foundation of it, ill-will and enmity (all indications to the contrary notwithstanding) being abnormal and depraved. Hence the biting force and odious character of ingratitude. 'Blow, blow, thou winter wind, thou art not so unkind as man's ingratitude' (*As You Like It*, II. vii. 174 ff.). Now, why? Not simply because the ungrateful man does not fully value one's gift (that would be a small matter), but also because he throws back one's good-will with coldness and thereby cuts one off from a place in his affections: in him, as Kant puts it, 'the duties of philanthropy are inverted, and the want of love is transmuted to a title to hate those by whom he has been first beloved' (*Metaphysics of Ethics*, tr. J. W. Semple, Edinburgh, 1838, p. 306).

The nature of gratitude is not obscurely indicated in the fact that 'grace' and 'gratitude' are at root one and the same term, and represent the

reverse and the obverse side of the same fact—more clearly expressed, perhaps, in Greek, where the one word *χάρις* is expressive of both. The Greek term shows that the emotion is essentially a social one, and works in the atmosphere of unity and love, and is, therefore, a species of 'brotherly affection.'

(2) On all hands it is allowed that gratitude is a joyful and pleasant emotion, though there may be in it an element of pain—more especially when it begets solicitude for the object of it. But, though this is granted, the source of the joy is matter of dispute. It has sometimes been maintained that gratitude arises either from our appreciation of the value of the benefit received, or from recognition of the fact that the benefactor has sacrificed something for our sake. This needs examination. There is no doubt that the value of the gift frequently comes in to augment the joy which we experience, especially when the benefit takes the form of freeing us from pain or from an embarrassing situation. It is equally indisputable that a well-balanced nature esteems sacrifices that are made on its behalf. But, although these facts may be necessary to the full explanation of the intensity of the joy that some cases of gratitude exhibit, they do not account for the essence of the emotion itself. For example, a pecuniary gift that brings a man domestic comfort, where penury and pinching held sway before, necessarily affords pleasure; but he will not be grateful for it unless, with greater or less consciousness, he realizes that it was the embodiment of benevolence, and that, in bestowing it, the giver was also bestowing himself. Relief from pain or suffering necessarily exhilarates and satisfies us; but the exhilaration and satisfaction become gratitude only when our heart goes forth to the person who has conferred the boon, and we desire his welfare. Moreover, one is frequently grateful, and that in a very marked degree, for benefits that cost the giver little, or that are in themselves of a trifling nature. Why in that case we are gratefully affected is because we recognize that the heart of the giver is embedded in his gift. Still further, a benefit is a source of gratitude to a man only so long as he believes that the person who confers it means his good. Let us suspect that he has a sinister object in view in helping us, and immediately our gratitude is turned into indignation and resentment: he has not been giving himself to us in his gift, but has been using us as a tool, a means to an end, thereby making us his slaves and his inferiors.

(3) From all this it will be at once apparent that, in gratitude, there is an element of *admiration*—admiration, by the recipient, of his benefactor as a man who finds it in his heart to bestow what cannot legally be claimed of him, and who is moved by non-selfish or altruistic regard. Generosity and disinterestedness are by their very nature impressive, and admiration is conditioned by mutual respect.

(4) From this it will be apparent, also, that gratitude is near neighbour to sympathy: it is not sympathy, but it involves it. Unless the recipient could place himself in imagination in the position of the giver and realize his kindly feeling and good intention towards him, gratitude could not arise; nor could the benevolence that actuates the giver have birth, did he not, in like manner, take home to himself the situation and the responding goodwill and tender affection of the recipient. What sympathy does is to *enable us to realize*; whereas gratitude is the *result of the realization*.

2. *Feeling or sense of inferiority.*—It has often been a question keenly debated, whether gratitude does not place the grateful person in a position of inferiority hurtful to his self-respect. and, conse-

quently, whether it should not be looked upon as a cringing and undesirable emotion. At any rate, in old Greek days, it was very much regarded in this light; and one of the characteristics of 'the high-minded man' (*μεγαλόψυχος*) of Aristotle is that, if he has to receive a favour, he hastens to pay it back with a greater, so as to escape from the disagreeable feeling of indebtedness.

'It is his nature,' so we read (*Eth. Nic. iv. 3, 24 f.*), 'to confer benefits, but he is ashamed to receive them; for the former is the part of a superior, the latter of an inferior. And, when he has received a benefit, he is apt to confer a greater in return; for thus his creditor will become his debtor, and be in the position of a recipient of his favour. It is thought, moreover, that such men remember those on whom they have conferred favours better than those from whom they have received them; for the recipient of a benefit is inferior to the benefactor, but such a man wishes to be in the position of a superior. So he likes to be reminded of the one, but dislikes to be reminded of the other.'

In like manner, Cicero, in the Latin world, discourses rather coldly on the topic of benefits—when they should be received, and how and in what manner they should be conferred. As might be expected, he views the matter from a shrewd, practical, common-sense standpoint, and indulges in sage counsel of the prudential stamp, delivered from the moralist's platform, without much feeling and with little sympathetic interest (see *de Officiis*, i. 14-17). And even Seneca, in his *de Beneficiis*, does not get rid of this feeling of inferiority in the recipient—subtle, stimulating, and suggestive though his treatise be.

Now, that 'giver' and 'receiver' indicate two different relationships cannot be denied; and the situation is a delicate one as between recipient and bestower; it may, further, be allowed that 'it is more blessed to give than to receive.' But, when the gift takes the form of a token of goodwill, in which, therefore, the giver imparts himself, and when the responding gratitude in the recipient is the offer of his self in exchange (which even sincere 'thanks' always implies), there is no galling inferiority involved—certainly not such as would infringe on one's self-respect—but an exchange of love, generous and free, in so far as each self is given and each is accepted or received. Surely, if it is not derogatory to our dignity to learn of a person wiser or better than ourselves, it is not derogatory to our dignity to receive a benefit from one who is friendly to us and who has both the power and the will to confer it. As finite beings, we are naturally limited in our ability to supply our own needs; and, as members of the human race, we are bound to each other in mutual obligation from our birth to our death, nobody being excepted. Thus, favours conferred, where *all* need help, impose no derogatory inferiority on any. On the other hand, if the gift bestowed were accepted simply because of its extrinsic value—simply because, for example, it is a certain desirable sum of money—then disparaging inferiority would, indeed, be implied in gratitude (we have demeaned ourselves); but, inasmuch as the real origin of gratitude is to be found, not there, but in the gift of the giver's own self, it is altogether different. Hence, paying back the benefit or favour at the very earliest moment, so as to rid oneself of a distasteful obligation, becomes an irrelevant consideration here, and the thought of it vitiates, if it does not actually destroy, the noble emotion. The idea of paying back, so far as it really enters into the situation, is simply readiness on the part of the person benefited to befriend the benefactor, should necessity arise and the ability be present—the response, then, of love to love. It is the characteristic of gratitude that it links the recipient to his benefactor in the bonds of love, and the goodwill in the case is mutual. If the recipient believed that the

gift was not a true expression of the giver's self, or if it was bestowed grudgingly or ungraciously, then, while he might accept it (stern necessity being laid upon him), he certainly could not feel himself bound to the giver in true gratitude: heart has not gone forth to greet heart—the commercial idea has intervened to spoil the tender emotion. It is *then* that the recipient longs to pay back the gift at the earliest moment—to free himself of a galling burden: he has never had the gift as more than a loan; and the longer he keeps it, the more, he feels, are the interest and debt accumulating.

The process in gratitude might be expressed in physiological language, after the analogy of reflex action. In order to a reflex action, three things are necessary—a central nervous cell (C); an ingoing impulse from a sense surface (A), along a sensory or afferent nerve, liberating energy at the centre; an outgoing current (E), consequent on the discharge of energy, along an efferent or motor nerve, to a motor end organ, resulting in movement. Precisely so, with a certain difference, is it in the case of gratitude. If the conscious recipient be regarded as the nerve centre (C), then the inflowing current from the benefactor (A) creates an immediate response, which, however (and here is the distinctive difference), in the first instance, traverses the path of the ingoing current in the reverse order, back to the benefactor (A), and then, secondarily, manifests itself in active outflow (E)—in readiness to serve.

3. Religious and theistic bearings.—(1) The true nature of gratitude is strikingly exemplified in the realm of religion. In Scripture, God's 'grace' (χάρις) is represented as poured down on men—it comes as expressive of the Father's love, unsolicited and unmerited; it is the Father's affection taking outward beneficent form in relation to His earthly sons. The result is that, immediately on recognition of this, man's 'gratitude' (χάρις also) springs up towards God—it is the cheerful and spontaneous response to the request, 'My son, give me thine heart': in other words, love has begotten love, and a willing dedication of the creature to the Creator is the consequence—'The law was given by Moses; grace and truth came by Jesus Christ' (Jn 1⁷). Here, in especial, the joy of gratitude is associated with awe, as all deep joy is.

(2) Again, the place of gratitude among the emotions is a very important one, and its worth for human life and in the interests of religion is inestimable. It is but a phase of the solidarity of the race, on the one hand—'none of us liveth to himself, and no man dieth to himself' (Ro 14⁷); and, on the other hand, it is the basis of man's true relationship to God and to Jesus Christ. In the Christian religion, it means not only the welling up of affection towards the Heavenly Father and the Divine Redeemer, but also the dedication of the believer to the service of the Divine: as the writer of the Epistle to the Hebrews puts it, 'Wherefore, receiving a kingdom which cannot be shaken, let us have gratitude (ἐχωμεν χάριν; EV 'grace,' RVm 'thankfulness'), whereby we may offer service well-pleasing to God with reverence and awe' (12²⁰). This service of the Divine is the equivalent in religion of the good-will and readiness to benefit a benefactor in the sphere of the human.

(3) Hence, lastly, gratitude has a distinct religious value in relation to theism and theistic argument. When the evidence or testimony to God's existence, in Natural Theology, is laid (as it so frequently is) in human nature, one part of that evidence is placed in the emotions (the other sources being the intellect and the conscience), and, of the emotions, gratitude is not the least impressive for the purpose. Indeed, man's 'feeling of dependence' has often been represented (as by Schleiermacher) as the supreme source of theistic belief. And, certainly, feeling of dependence has to do with it, whether in an eminent degree or not.

Yet, feeling of dependence is only the other side of gratitude—the Creator giving Himself freely to the creature, and the creature responding to the significance of this by dedicating himself unreservedly to the Creator. Love craves for love, and rests in it when found.

GREECE, GREEK RELIGION.

[L. R. FARNELL.]

The foundation of a serious and scientific study of Greek religion, as distinct from the mere mythology of Hellas, may almost be said to have been an achievement of the last generation of scholars. And at last the Hellenic spirit, so creative and imperial in the domains of literature, art, and science, can be recognized as manifesting itself not unworthily in the sphere of religion.

The history of Greek religion means, partly, the account and the interpretation of the various rites, cults, and cult-ideas of the various Greek families, tribes, and communities; partly, the statement of the religious temperament both of the masses and of the individuals who emerged from among them and of whom some record has been preserved. Now, as the Greek world in the long period of its independence was never organized as a single State, the attempt to give a summary and general account of its religion is confronted with the perplexity arising from the often incalculable diversity of religious forms and ideas in the different centres of its social life, which was in the highest degree centrifugal. Nevertheless, as will be shown, we find in the midst of manifold local variation a certain uniformity of religious psychology, making for uniformity of practice, which enables us to deliver certain general pronouncements about the whole.

ANCIENT SOURCES.—I. Literary.—Our real knowledge of any ancient religion depends obviously on the copiousness and variety of our records. And it is likely to be more luminous if the society in question expressed its religious life not only in surviving literature, but also in surviving art. Of both these kinds the student of Greek religion has an unusually rich material.

For, in spite of its secular freedom, which is its salient achievement, Greek literature in its highest and most popular forms, as well as in its narrower and more special, is deeply infused or preoccupied with religion and religious myth. In fact, it reflects the vivifying penetration of religion into all parts of Greek activity and mental life. This is obviously true of the Epic period, which produced the two types of the chivalrous and the theologic Epic, and which has left us most valuable material

for the religious history of the 10th and 9th centuries B.C. in the Homeric poems, and of the 8th and 7th centuries in the poems of Hesiod and in the 'Homeric' hymns; it is none the less true of the great Lyric movement which followed upon that, when the greatest poets devoted themselves to the composition of songs for festal-religious occasions or of hymns for the service of temple or altar. Besides these, whose great names and fragments of whose great works survive, there was another less distinguished group of special 'hieratic' poets, who composed hymns for the service of certain mystery-cults, and whose compositions were preserved as liturgical documents by the priestly families that administered them. The sententious ethical-political poetry of the 6th cent.—the elegiacs of Theognis and Solon—is instinct with religious emotion and reflexion. And the greatest product of the poetic genius of Hellas—the tragic drama—is of a religious character in respect both of its origin and much of its subject-matter. Finally, the later learned poetry of the Ptolemaic period—the *Cassandra* of Lykophron, the hymns and other works of Callimachus, the Epic poem of Apollonius Rhodius—is full of antiquarian religious lore. At the same time, our knowledge is much indebted to the great prose-writers of Greece, the philosophers, historians, and orators: among the philosophers, especially to Plato, who more copiously than any of the others reveals to us, however much he idealizes, the religious psychology and cult-phenomena of his period; among the historians, especially to Herodotus, who is the intellectual ancestor of the modern anthropologist and student of comparative religion, and whose presentation of the facts of history is coloured with religious conviction. The works of the Attic orators are of special value for our purpose, first because the classical orator was more apt than the modern to dilate on religious themes and appeal to religious sentiments, as religion was far more closely interfused with political and social life; secondly, because we are more sure of the orator than we can be of the poetic or philosophic writer that his words are attuned to the average pitch of popular belief and sentiment.

It is true then that all the great fields of Greek literature make their several contributions to the material of our subject. And besides the works of the great masters, the student has to reckon with the secondary and parasitic work of the later scholiasts, compilers, and commentators, which is even more replete with the special information upon which the history of Greek religion can be built. The study of it is, in fact, almost coextensive with the study of Greek literature.

But amidst this profusion of material we must specially mark the works of those ancients who wrote direct treatises on the various religious phenomena—on the gods, the cult-practices, the theologic and mythologic systems of the Hellenic societies. The earliest of such works that have come down to us are the poems of Hesiod and the Hesiodic School—the *Works and Days* and the *Theogony*—while of parts of the 'Homeric' hymns the special theme is the attributes and functions of the various divinities. But it was not till the period of scientific activity after Aristotle that definite treatises in prose on different departments of the national religion began to be written. A chapter on sacrifice by Theophrastos is mainly preserved for us by Porphyry. The writers of 'Atthides,' or Attic history and antiquities, who belonged mainly to the 3rd cent., were special workers in this field; Philochoros, the chief of them, wrote 'on Festivals,' 'on Sacred Days,' 'on Divination,' 'on the Attic Mysteries'; Istros, the slave and friend of Callimachus, on the 'Manifestations of

Apollo' and on 'the Cretan sacrifices'; while the *ἐξηγητικὸν* of Kleidemnos was, if we may judge from the fragments that remain, occupied with the problems of religion and mythology. Outside this circle we hear of other contributions to the history of Greek religion, such as the treatises of Herakleides, probably the pupil of Aristotle, usually called 'Pontikos,' on 'the Foundations of Temples' and 'on Oracles'; and a work by an unknown Sokratos of Kos on the important subject of 'Invocation-titles of the gods.' Lastly may be mentioned here a treatise of Apollodoros, *περὶ θεῶν*, which, if he is to be identified with the author of the *Bibliotheca*, was probably a learned account of the popular religion rather than a metaphysical inquiry.

Of nearly all this scientific post-Aristotelian literature only isolated fragments survive in quotations by later writers, lexicographers, and scholiasts, who were, no doubt, more deeply indebted to it than they always acknowledged; but it is some compensation for our loss that the work last mentioned, the *Bibliotheca* of Apollodoros, has been preserved—a rich storehouse of myth and folklore with some infusion of actual cult-record. Among the later writers our subject is indebted to the geographer Strabo for many incidental observations of local cults and ritual, still more to the philosophic moralist and *littérateur*, Plutarch, a man of earnest religious interest and some power of original thought, who knew the religion of his country at first hand and at a time when it was yet alive, and who devoted to it much attention and some literary industry; hence we must rank high among our ancient authorities his *Questiones Graecae* and his treatises 'on the Pythian Oracle' and 'on the Cessation of Oracles.' Again, much desultory but varied information is afforded by the compilers Athenæus (in his *Deipnosophistai*) and Stobaeus (in his *Florilegium*). But of higher value than all these, or, in fact, than any work that has been bequeathed to us from antiquity, is the *Descriptio Graeciae* by Pausanias, composed about A.D. 180; for he travelled somewhat as a modern anthropologist, relying partly on earlier literature, yet using his own eyes and ears and his own notes. His ruling passion was the study of the folk-religion and the religious monuments; so that it is due mainly to him that we know something of the village-religion of Hellas as distinct from that of the great cities, and can frame working theories of the evolution, through immemorial ages, of various growths of the polytheism.

The lexicographers Harpokration, Hesychios, and Suidas contribute facts of value, especially in their citation of cult-appellatives, which, owing to the magic value of the special name or title whereby the deity was invoked, throw a revealing light on the significance and power of many a worship, and help to frame our conception of the complex character of many a divinity. Again, the various collections of *scholia* on the classical texts are a rich quarry for our reconstruction of the fabric of Hellenic religion. Of chief value among these are the scholia on Homer, Pindar, Aeschylus, Euripides, Aristophanes, and Theocritus, while Servius' Commentary on Virgil tells us even more about Greek cult and mythology than about Roman; and high in this class of our authorities we must rank a work of late Byzantine learning, the commentary of Tzetzes on Lykophron's poem *Cassandra*, for his scholia are charged with remote antiquarian lore derived from good sources.

Finally, we gather much of our knowledge from the controversial treatises of the early Christian Fathers, written with propagandist zeal in the heat of their struggle against paganism. They reveal to us much of the religion that they strove

to overthrow by the exposure of its viciousness and its absurdities. But their statements must be used with cautious criticism. Their knowledge was by no means always at first hand, unless—which we rarely know to have been the case—they were, like Clement of Alexandria, converted pagans who had been bred up in the Græco-Roman polytheism. Their statements, for instance, about the Greek mysteries are often vague and unconvincing, while in their desire to include them all in one general condemnation they confuse Anatolian rites with Eleusinian. And they are pardonably blind to the often beautiful ritual, the nobler ideas, and the higher moral elements in the older Mediterranean religions. Nevertheless, if we make due allowance for prejudice and exaggeration, works such as the *Protreptica* of Clement, the treatise of Arnobius *adversus Gentes*, of Firmicus Maternus *de Errore Profanarum Gentium*, Eusebius' *Præparatio Evangelica*, Augustine's *de Civitate Dei*, Athenagoras' *Legatio*, must be ranked among the primary sources of our history.

A special but very important chapter in the later history of Greek religion is the account of the growth and diffusion of the religious brotherhoods, especially the Orphic Dionysiac societies. For these we have something of direct liturgical evidence in the collection of Orphic hymns, mainly the products of the later theosophic period, but throwing light on the theology and ritual of these sects. But our knowledge of this mystic religion which was engrafted upon Hellenism has been in recent times enriched by the priceless discovery of an ancient poetical Orphic liturgy engraved upon gold-leaf found in tombs of Crete and South Italy, and probably a product of the 5th cent. B.C.

2. **Monumental.**—The above is a sketch of our more important literary sources. The knowledge to be derived from them would on the whole and in many important details remain vague and uncertain, were it not supplemented and secured by the evidence coming from another source which we may term monumental or at most semi-literary—the evidence from inscriptions. These have been accumulated in vast profusion during the last thirty years; and have been and are still being reduced to order for our special purpose. The public inscriptions, being dry State documents, do not reveal to us the heart of any mystery or the religious soul of the people, but rather the State organization and the exact minutiae of ritual and sacrifice from which we can sometimes reconstruct an image of the inward religious thought. And many a local cult of value for our total impression that was unrecorded by any writer is revealed to us by these monuments. But the needs and aspirations of the private man are better attested by the private inscriptions attached to *ex voto* dedications or commemorating Divine benefits received.

Yet, amidst all this wealth of evidence, there seems one thing lacking. Of actual temple-liturgies, of formal prayers proffered round the altars, of the hymns chanted in the public service, of all that might constitute a text of Greek church-service, there is comparatively little preserved. One or two hymns, and a few fragments of the religious lyric of the 7th cent.—to which we may now add the important recent find of the peans of Pindar; a strophe of an ancient hymn to Dionysos, sung by the Elean women; a 4th cent. pæan to Dionysos, composed for the Delphic service; the newly discovered hymn of the Kouretes in Crete; a few formulæ of prayers quoted or paraphrased by later writers—all this appears meagre material when we compare it with the profusion of documents of the public and private religion that are streaming in from Babylon.

But, in respect of another source of the history

of religion, namely, the monuments of art, our Greek material is unique. For the greatest art of Hellas was mainly religious, the greatest artists working for the religious service of the State. And the surviving works of sculpture, painting, and glyptic, wrought for either public or private purposes, present us often not only with facts of religion and ritual unrecorded in literature, but also with an impression, hard to gain otherwise, of the religious consciousness of the people, and serve also as witnesses to the strength of the religious feeling. Therefore the study of Greek religion is concerned as much with the art and archaeology as with the literature.

A summary sketch of so manifold a theme as that with which this article deals will be of more value if it can present the facts in some kind of chronologic sequence. We may conveniently distinguish four periods: (1) the pre-historic, falling mainly in the second millennium B.C., and closing with the epoch marked by the Homeric poems; (2) the period extending from 900 to 500 B.C., beginning with the colonial expansion of Hellas, and ending before the Persian invasion; (3) the period from 500 to 338 B.C., including the greatest century of Greek history, and closing with the battle of Chæronea and the establishment of Macedonian supremacy; (4) the Hellenistic and Græco-Roman period. The chronologic statement is embarrassed by the absence of any record of date for the institution and diffusion of most of the cults, and for the growth of certain religious ideas; nor can we safely date a religious fact by the date of the author who first mentions it: a detail of ritual, a myth, a religious concept attested only by Pausanias or a late scholiast may descend from an age far anterior to the Homeric. And our earliest inscriptions do not as yet reach back to a period earlier than the beginning of the 7th century.

I. **THE PRE-HISTORIC PERIOD.**—For determining our view of Greek religion in the second millennium B.C., when Hellenism was in the making, the poems of Homer and Hesiod are of priceless value, if they are used with cautious and trained criticism. We depend greatly also on the general inductions of comparative religion and anthropology, which may sometimes guide us rightly in this matter, especially if the anthropological comparison is drawn from the more or less adjacent communities rather than from the Antipodes. We depend also on the evidence of the monuments of the Minoan-Mycenæan religion, revealing glimpses of the practices and faith of a people of high culture, whom no one would dare now to call, at least in the earlier stage of their life, Hellenic, but from whom the earliest Hellenes doubtless adopted much into their own religion.

1. **Sketch of Homeric religion.**—The poems of Homer present us with an advanced polytheism, a system in which the divinities are already correlated in some sort of hierarchy, and organized as a divine family under a supreme god. These divine beings are not mere *daimones* or *numina*, such as were in the main the old deities of Rome, vague and dimly-outlined forces, animate yet scarcely personal; but rather concrete and individual *theos* of robust and sharply-defined personality, not spirits but immortal beings of superhuman substance and soul, conceived in the glorified image of man. The anthropomorphic bias is dominant in the poems, plastically shaping the figures of all the divinities, except occasionally some of the lower grade, such as the river-god Skamandros. Even the vague group of nymphs, female *daimones* of the rill and the mountain, while lacking individual characterization, bear the anthropomorphic name, 'Brides' or 'Young Women,' which is the root-meaning of *Νύμφαι*. Though the gods and goddesses

are shape-shifters, and may manifest or disguise themselves in the form of any animal,—birds by choice,—yet their abiding type is human; nor has Homer any clear remembrance of a 'cow-faced' Hera, still less of an 'owl-faced' Athene, since for him at least Hera *βοῶπις* was Hera 'of the large ox-eyes,' and Athene *γλαυκῶπις* the goddess 'of the flashing eyes.' And his divinities are moralized beings with human passions, and ethical as well as artistic emotions. The highest among them are not imagined as Nature-powers, bound up with or immanent in the forces and departments of the natural world, for such a description applies only to his wind-gods, and nymphs and gods of river and sea; also, though more loosely, to his Helios, the god of the sun; to beings, in fact, that count little in his religious world. It scarcely applies to Poseidon, though his province is the sea; it does not describe at all his mode of imagining and presenting Apollo, Hera, Athene, Hermes, and others. There is no hint that these divinities were conceived by him as Nature-powers, or as evolved from any part of the natural world. The high god Zeus, though specially responsible for the atmospheric and celestial phenomena, is not identified with the thunder or even with the sky, though a few phrases may reveal the influence of an earlier animistic conception of the divine Sky. His religious world, in short, is morphologically neither a system of polydaimonism nor one of pantheism in which a divine force is regarded as universally immanent in the world of things, but is constructed on the lines of personal theism.

Again, in spite of one or two frivolous and licentious passages, the religious tone is serious, and in many important respects accords with an advanced morality. The deity, though jealous and revengeful of wrongs or slights to himself, is, on the whole, on the side of righteousness and mercy; his displeasure is aroused by those who spurn the voice of prayer, who injure the suppliant, the guest, or even the beggar; and besides Zeus and the other 'Olympians,' who are general guardians of the right, there loom the dark powers of the lower world, who are specially concerned with the sanctity of the oath. Much also of the religious reflexion in the poems strikes us as mature and advanced: notably that passage at the beginning of the *Odyssey* where Zeus declares that it is not the gods who bring evil to men, but that it is the wickedness of their own hearts that is the cause of all their evils.

Finally, the Homeric ritual appears as on the higher level of theism. We can detect in it no trace of savagery, and but little contamination of religion with magic. The sacrifice is more than a mere bribe; it is a friendly communion with the divinity; and the service is solemn and beautiful with hymn and dance. The cult is furnished with altar and occasionally with temple and priesthood, but not yet, as a rule, with the idol, though this is beginning to appear.

This slight sketch of the Homeric theology is presented here in the belief that the Homeric poems enable us to catch some glimmer of the religion of the centuries preceding the first millennium. This belief is based on the conviction that the poems represent a Greek society existing near the date 1000 B.C. It is, of course, opposed to the view still maintained by some scholars that they are—in their finished form—a product of a much later period, and that the religion which they enshrine may be such as was in vogue in Attica about the epoch of Peisistratos. But the evidence of Homeric ethnology and sociology is fatal to this theory, and still more so are the arguments that may be drawn from the history of Greek religion; for, at the period of Peisistratos, certain religious forces

were rife, and certain religious phenomena prominent, about which Homer is entirely silent.

Still less reasonable is it to imagine that Homer constructs a religious world out of his own brain. We must suppose that he reflects something real and contemporary. Only we must guard ourselves against the serious error of supposing that he reflects the whole. Much is, doubtless, missing in his account, which we may be able to supply from Hesiod and other sources by means of reasonable hypotheses.

The assumption is, then, that the Homeric poems present us with a partial picture of the religion that prevailed among some of the leading Greek communities before the Dorian invasion of the Peloponnese and the Ionic colonization of Asia Minor.

2. Pre-Homeric period of religion.—Now, when we consider how slow of growth and enduring are the forms and the moral and metaphysical concepts of religion, we have the right to believe that part of what Homer records on these matters is the inherited tradition of an age some centuries earlier than his own. It is probable that those earliest Aryan immigrants from the north—Achæans, Dryopes, Minyans, and others—who, by mingling with peoples of aboriginal Mediterranean stock and of the Minoan-Mycenean culture, constituted the happy blend that we call the Hellenic race, had already arrived at the stage of personal theism, and that Hellenic religion proper does not start with a 'godless period,'¹ when the unseen powers were only dimly outlined in the vaguer and more fleeting characters of what is called 'Animism.' We now know, from the valuable discovery of a cuneiform inscription, that the Iranian people had evolved such personal deities as Mithra and Varuna before 1400 B.C.² And we have the right to suppose that their Western kinsfolk, who were forcing their way through the Balkans, perhaps only a century earlier, were at least at the same level of religious imagination. We can best understand the picture of the religious world of Homer, and also the later cult-records, if we believe that the kindred tribes coming from the north brought in certain personal deities, some of whom were common to more than one stock, and one at least may have been common to them all. This would best explain the supremacy of Zeus, the Sky-god, and the diffusion of his name Olympios, derived from the mountain that dominates the northern frontier, near to which the peoples that were to lead the history of Greece had at one time temporary settlements, and which they regarded as the throne of their high god. The wide geographical area of his cult cannot be naturally explained on the assumption that at any period in Hellenic history he had been merely the special deity of one particular tribe. And, as regards two other high gods at least, Apollo and Poseidon, we may be reasonably sure that, already in the pre-Homeric period, certain tribes other than the Achæans had these cult-figures; in the Hyperborean ritual, which reflects at points the earliest days of Hellenism, we can follow the track of Apollo's invasion from the north; and the evidence is fairly clear that Poseidon was equally a northern immigrant, being the special tribal deity of the Minyai.

We must not then apply to the pre-Homeric period of Greek religion the formula 'one tribe, one god,' but must imagine that religion had already surmounted in some degree the tribal barriers; for, though the spirit of tribal exclusiveness was strong throughout the earlier periods of

¹ As Karsten assumes in his *Outlines of Greek Religion*, p. 6.

² See E. Meyer, 'Das erste Auftreten der Arier in der Geschichte,' in *Sitzungsber. d. könig. preuss. Akad. Wissensch.*, Berlin, 1908, p. 14.

this polytheism, certain families and certain tribes having the special prerogative of certain *leptá* and jealously excluding strangers, yet the fact of the common possession of certain worship by various tribes contained the germ of religious expansiveness. Moreover, at some age indefinitely earlier than the Homeric, the conception of the high god had expanded both cosmically and ethically. Zeus had become more than a 'departmental god': the deity of the sky was also in the first period—so far as we can reconstruct it—Zeus Chthonios, the Lord of the life of earth and of the world under the earth, and it is likely that Hades was only an emanation from him. We may also regard the Homeric appellation of Zeus, *πατὴρ ἀνδρῶν τε θεῶν*, as a conventional and crystallized phrase descending from an older poetic tradition, and we are justified in interpreting it as a phrase belonging to the higher plane of theism.¹

We must also suppose that the anthropomorphic view of the personal deity, of which Homer is so attractive a spokesman, had asserted itself in the period before his. Unlike the early Roman, the early Hellenic divinities could be regarded as married, and ideas derived from the life of the family could be applied to them, although we can often discern that many of the myths concerning divine relationships—the sisterhood of Artemis to Apollo, for instance—do not belong to the earliest Hellenic epoch.

3. Minoan-Mycenaean religion.—But any account of the Hellenic polytheism of the second millennium demands a critical study of the Minoan-Mycenaean religion as well, and, before we can decide what part of the Homeric and later systems belongs to the aboriginal Aryan-Hellenic tradition, we must know what the northerners found indigenous in the lands that they conquered or occupied. We know now that they found in many centres a culture superior to their own and a religion of an advanced theistic type with elaborate, though mainly aniconic, ritual, devoted pre-eminently to a great goddess, by whose side a god was only the subordinate partner. It has then been pointed out that, where we find in historic Greece the goddess-cult predominant² and especially the prevalence of a virgin-goddess, we should recognize the Minoan-Mycenaean tradition in antagonism to the Aryan, the latter invariably maintaining the predominance of the god. We may, therefore, believe the cults of Artemis in Arcadia and Attica, of Athene in Attica, of Hera in Argos³ and Samos, to have been inherited from the former rather than to have been brought in by the latter. And sometimes linguistic science will be able to assign the different personalities of the polytheism to its different ethnic strains by determining the group of languages to which the divine name in question belongs. That philology has not yet brought us nearer to the solution of these problems is due to the lacunae in our knowledge of the pre-Hellenic Mediterranean languages, and especially to our ignorance of the Minoan script, for which we have masses of material but as yet no interpreter. Finally, the evidence of the early geographical area of a certain cult may sometimes be decisive in itself: this is the case in regard to the cults of the 'Mother of the gods' and of Aphrodite, who are aboriginally connected with Crete and Cyprus respectively, i.e. with the centres of the Minoan culture.

But the ethnic decision is at present impossible on a vast number of details in this composite polytheism, in respect both of ritual and of the

divine personalities; and the student of Hellenic religion must often abandon temporarily the quest of origins in his investigation of the composite whole.

4. Proto-Hellenic period.—The very high development of this Mediterranean civilization from which Hellenism drew so much of its own life is in itself sufficient reason for the belief that the advanced picture that Homer presents of his contemporary polytheism affords us a true estimate of the progress that had been achieved in the centuries before him. And this is corroborated by a careful analysis of the later cult-records.

(1) *Family religion*.—Society in the latter half of the second millennium had already reached the higher agricultural stage and had evolved the monogamic family. Demeter—whose Aryan descent is proved by her name—was generally recognized by the various Hellenic tribes as the Earth-goddess of corn, and the festival of the *Thesmophoria* was commonly associated with her. Certain forms of the religion of the family, which was the life-source of much of the private ethics of later Greece, can be traced back to the earliest period—the worship, for instance, of Zeus 'Ἐρεϊός, 'the god of the garth,' around whose altar in the courtyard of the old Aryan house the kinsmen gathered for worship. Another sacred centre of the family life in the pre-Homeric society was doubtless the hearth and the hearthstone in the middle of the hall; there are allusions to its sanctity in the Homeric poems, and the cult-records attest the great antiquity of this religious fact; although the development of the personal goddess Hestia is a later phenomenon (cf. HEARTH [Greek]). The curious Attic rite of the *Amphidromia*, wherein the kinsmen of the new-born child ran with it round the hearth, thereby consecrating it to its holy power, may have descended from a very ancient tradition.¹

Again, the wider kinship-groups of the *φρατρία* and *γένη* are obviously pre-Homeric, and doubtless these had been consecrated by aboriginal religion, though we cannot date precisely the emergence of such cult-forms as Zeus *Φάτριος* and Athene *Φρατρία*.

(2) *Political religion*.—Further, it is fairly clear that already in this first stage the religion had become closely interwoven with the higher political and social life. Although the greater part of the population lived still under the tribal system in scattered villages—*κοιμηδόν*—yet the *πόλις* had already arisen; and in certain cases we may surmise for it a religious origin, where its name—such as *Ἀθήναι*, *Πορναί*, *Ἀλαλκομεναί*, perhaps *Μέγαρα*—is derived from the personal name or the shrine of some divinity. In these cases the temple must have been the nucleus around which grew up the secular habitations; and the deity of the temple would become supreme in the political religion. Athene had won this position at Athens and probably elsewhere in the immemorial pre-Homeric past; and this explains her character in the Homeric poems as the divinity who more than all others inspires political wisdom and counsel. Various indications point, in fact, to the belief that the earliest development of the city-life was closely bound up with the cults of Zeus and Athene; for no other divinity was ever styled *Polieus* or *Polias* by any Greek State; and this agrees mainly with the presentation of them in the Homeric poems. The unanimity of the tradition points back to the second millennium as the period when this political characterization of the two deities was determined. And this view is strikingly confirmed by the records concerning the ritual and the establishment of the cult of Zeus Polieus on the Athenian Akropolis, an institution attributed to Kekrops

³ The name Hera is probably Aryan-Hellenic, but applied in Argolis to the pre-Hellenic goddess.

¹ See OGS v. 356.

and marking probably the Hellenization of Attica. The singular features of the ritual and the association, preserved in its legend, of Attica with Crete indicate a high antiquity, when agriculture was the economic basis of the political as well as the religious life.

We may believe that other cults besides the two just mentioned played their part in the political growth of the pre-Homeric world. The marketplace, the cradle of political oratory, had become sacred ground, as Homer himself attests; and this consecration was probably marked by the presence of some *ἀγαλμα*, a sacred stone of Hermes, for instance. Apollo, also, had early divested himself of the aboriginal character of the god of the wood and of the homeless migratory host, had become a builder of cities, and had established himself in the city's street with a change in the meaning of his title *Ἀγυαίς*, once an appellation of the Way-god who guided the host through the wild, now of the deity who guarded the ways of the city; and already, before Homer, his shrine at Pytho was beginning to acquire wealth and political importance as an oracular centre of consultation.

5. **Earliest ethical religion.**—The theistic system had been turned to good account in other directions than the political, before it appeared on the canvas of Homer. The whole morality of early social life had been nurtured and protected by it; for we may maintain that the ethical religious spirit of Homer—unless we regard him as a man or as a group of men to whom a special revelation had been made—must reflect in some degree a tradition that had grown up in the centuries before him. We see then that current conceptions about the gods had ceased to be inspired merely by fear; a milder sentiment had come to infuse religious thought; the deity was regarded not only as a righteous god of vengeance, but as loving mercy and compassion, and a protector of the weak and destitute. The cult of Zeus *Ζεῦσιος*, the guardian of the stranger and the wanderer, had already arisen; and the sanctity of the oath taken in the name of the deities of the upper and the lower world was the basis of much private and communal morality.

6. **Art an aspect of religion.**—Other parts of the higher activity of man had been consecrated by the polytheism of which Homer inherits and develops the tradition. The earliest imagination of the Hellenes appears to have perceived a daimonic potency—a *numen*, as we may say—in the arts of song and music, and this had sometimes crystallized into the personal forms of divinities, into such interesting embodiments as the Muses or the Charites, who must have belonged to the pre-Homeric popular theism. The latter group had grown up at the Boeotian Orchomenos, an old centre of the Mycenaean culture. It may be that at one time they had no other than the purely physical significance of vegetation-powers; but we understand their value for Homer only if we suppose that before his time they had come to be associated with the arts and the delight of human life. We discern also that the higher deities, Apollo and Athene, though by no means merely 'functional' or 'departmental' powers, had acquired the special patronage of song and art.

7. **Proto-Hellenic ritual.**—It seems, then, that even in the earliest period the polytheism was no longer on the most primitive plane; and we gather the same impression from what is revealed to us of the earliest forms of Greek ritual. The Homeric and Hesiodic poems are full of information concerning the liturgy or cult-service with which the poets were familiar; what they tell us then avails for the period of the 11th to the 8th century. But ritual takes long to develop, and, once fixed, is the most abiding element in religion. It is not too

bold then to take the Homeric account as vouching for a tradition that goes back at least to the later centuries of the second millennium. The sacred place of worship might be a natural cave, or a *τέμενος*, a fenced clearing in a grove containing as the *ἀγαλμα* of the deity a tree-trunk or holy pillar or heap of stones, whence gradually an artificial altar might be evolved. The latter had become, some time before Homer, the usual receptacle of sacrifice, and was a prominent feature in the Minoan-Mycenaean religion, which usually associated it with a sacred tree or pillar, the token of the deity's presence or a magnet for attracting it, but not with any iconic statue or idol. Theistic religion could content itself with such equipment, but, if the anthropomorphic instinct is strong in it, it prompts the construction of the temple or the house of God. And temples must have been found in the land in the pre-Homeric period; the few that have as yet been revealed in the area of Minoan-Mycenaean culture were built, with one exception,¹ within the royal palaces, and must be regarded as domestic chapels of the king, marking his sacred character as head of the religion of the State, the character with which the legends invest king Minos and king Aiakos. The earliest that have been excavated on free sites are the temples of Hera at Argos and Olympia, and these are now dated not earlier than the 9th cent. B.C. But the traditions of the earliest temple at Delphi and of that of Athene on the Athenian Akropolis suggest a greater antiquity than this.

With the multiplication of temples special priesthoods must also have multiplied. But the professional priest had already arisen in pre-Homeric times: Homer knows of the brotherhood called the *Σελλοί*,² who tended the oracular oak of Zeus at Dodona, 'who slept on the ground and never washed their feet'; and he mentions others who were attached to special deities, and two of these at least administered cults without a temple, the priest of Zeus of Mount Ida³ and the priest of the river Skamandros,⁴ of each of whom he says: 'he was honoured like a god among the people.' These words suggest a high and sacrosanct position. Yet these two priests are also warriors fighting in the ranks, which is the mark of a secular priesthood; and there is no legend or any hint of evidence suggesting that a professional priesthood enjoyed a political and social power in the pre-historic, that we know was never achieved by them in the historic, period of Greece. For the evolution of many of the earliest Hellenic institutions evidence is almost wholly lacking. But on general comparative grounds we can surmise that the religious character of the monarchy was most prominent in the earliest times; and that, as its secular power and functions developed, the priest-expert was attached to the *βασιλεύς* to assist in the national cults, over which he retained a general supervision. We have scarcely a hint, either in the earlier or in the later days of Greece, of any conflict between Church and State; we know that at least historic Greece escaped sacerdotalism; and its earliest societies, whatever their danger or their struggles may have been, had escaped it by the days of Homer.⁵ Bearing on this point is the other negative fact that for this earliest age we have little or no evidence of the prevalence of what is called 'shamanism,' divine seizures, ecstatic outbursts of wild prophesying, by which a society can be terrified and captured. The professional *μάντις*, the prophet or soothsayer, existed as distinct from the priest; but his methods generally—so far as

¹ At Gournia (see Hawes, *Crete the Forerunner of Greece*, London, 1909, p. 101 f.).

⁵ He is aware, however, that a *θεοῦ ὀμφή*, an oracular mandate, might be delivered against the royal house (*Od.* iii. 215).

our earliest witness informs us—were cool and quasi-scientific.¹

The ritual at the altar in the early period, with which we are at present dealing, consisted of an oblation to the deity of an animal victim or an offering of fruits and cereals; the sacrifice might be accompanied with wine or might be wineless—a 'sober' sacrifice which was called *νηφάλια*, the latter being perhaps the more ancient tradition. We may interpret the earliest form of Hellenic animal-sacrifice as in some sense a simple tribal or family communion-meal with the deity, whereby the sense of comradeship and clan-feeling between man and god was strengthened and nourished. This is the view that Homer has inherited, and it endures throughout the later history of the ritual; it expresses the general genial temper of Hellenic religion—a trait which Robertson Smith marked as characteristic of other religions of the same social type.² Similarly, the description given us by Theophrastos and Pausanias of the ancient ritual of Zeus Polieus on the Athenian Akropolis reveals to us a typical example of the civic communion feast.³ Such a sacrifice is merely a transference into the divine circle of the practice of the common feast of the tribesmen. But we can also discern a mystic element in the Homeric ritual text, which is evidently based on a tradition indefinitely older than the poems: the sacrificers are specially said 'to taste the entrails' invariably before the real sacred meal begins; as the entrails are the inner seat of the life which has been consecrated by the hallowing contact of the altar, we are justified in supposing that the object of this solemn act was to establish the real and corporeal communion of the worshipper with the divinity.⁴

Chthonian worship.—The important distinction which is well attested of the later ages between the 'chthonian' and the 'Olympian' ritual—to use these two conventional terms for convenience—may already have been in vogue in the earliest period of the polytheism. In the first type of sacrifice, where the offering was made to the nether divinities, the victim's head was held down above a hole in the ground—a *βόθρος*—and the blood from the severed throat was shed into it. In the second, where the upper powers, whose region was the air or the sky, were the recipients, the victim was held up erect off the ground, his face lifted towards the sky, and in this attitude his throat was cut. Homer shows himself aware of this form of sacrifice; and that the other, the chthonian, was also in vogue in his time is to be inferred from his account of the ritual performed by Odysseus in honour of the shades, where he mentions the *βόθρος*, the sacrifice of black sheep, and the triple libation of honey, wine, and water.⁵ For the ritual of the dead in the Greek religious tradition was closely modelled on the service of the nether divinities. The triple libation is known to have been part of Minoan-Cretan cult, as the altar table found in the cave of Mount Dikte attests.⁶ And a shrine with a *βόθρος* in the middle of the cella has been found at Prinia in Crete, consecrated to a chthonian goddess, the foundation of which is ascribed to the 9th century.⁷

From these indications and from the great prevalence attested by later records of chthonian cults in which we can discern features of great antiquity, we can gather that the earliest period of Greek religion was not wholly characterized by

the brightness of ritual and geniality of religious feeling that appear on the surface of Homeric poetry. Homer himself was aware of the dark world of powers who avenged the broken oath and punished sinners even after death. Long before his time, we may suppose, gloomy worship, such as that of the *θεοὶ Μελλύχιοι* described by Pausanias⁸ at Myonia in Lokris, of which the rites were performed by night, was in vogue in parts of Greece. Mother Earth, prophesying through phantom-dreams, had held rule at Delphi before Apollo came, and that was long before Homer's work began.⁹

There are strong reasons also for believing that the cult of hero-ancestors was already a part of the pre-Homeric religion, as it was a prominent part of the post-Homeric. The elaborate tendance of the dead attested of the Mycenaean period by the graves discovered at Tiryns and Mycenae might easily develop into actual worship, when it was maintained through many generations, as it was at Menidi in Attica. Doubtless, the common and promiscuous worship of the dead was a morbid development of the later polytheism. But Homer, who is generally silent about such cults, and, in a well-known passage about the Twin-Brethren,¹⁰ seems to ignore deliberately their divine or semi-divine character, almost reveals his knowledge of the worship of Herakles,¹¹ and certainly was aware of the Attic cult of Erechtheus, unless the passage that refers to it is the work of an interpolator.¹²

It is a difficult question how we are to estimate and how far we can trust the Homeric evidence on this important point of religion. Even if we trust it so far as to say that the Achaeans at least practised no real worship of the dead, it yet remains probable that they found it existing here and there in the lands in which they settled (see *HEROES AND HERO-GODS* [Gr. and Rom.]).

It is important to emphasize this gloomier side of Greek religion; but it is detrimental to exaggerate it, as has been the tendency of some modern writers in a pardonable revolt against the old shallow theories of orthodox criticism. We have reason to suppose that at no period of his history was the ordinary Hellene ghost-ridden, worried and dismayed by demoniac terrors, or by morbid anxiety about the other world or his destiny after death; at least he will not appear so, when we compare his religious and mythologic records with those of Babylon, Egypt, and Christendom.¹³ Nor dare we affirm that the pre-historic Hellene was weaker-minded and more timorous in such matters than the later. He may even have been stronger-minded, and at least as willing to eat a sacramental meal in company with the *θεοὶ Μελλύχιοι* or with the nether-Zeus or the nether-Earth-Mother and with his departed family-spirits as were his descendants at Lokris, Mykonos, and many other places.¹⁴ The earliest myths have little of the goblin-element. Homer, indeed, himself was cognizant of such forms of terror as a black *ἥψ*—Penelope likens Antinoos to one;¹⁵ the ancient folklore of Argolis was aware of a bad spirit, called a *Πούρ*, that once ravaged its homes.¹⁶ The early popular imagination was sure to have inherited or to have evolved such creations of fear; and a black earth-goddess with a horse's head and snake-locks who lived in a dark cave at Phigaleia, almost certainly in the pre-Homeric period, was a sufficiently terrifying personality.¹⁷

But, happily for the Greek imagination, the divinities of the world of death, abiding below the earth, tended to take on the benign functions of the powers of vegetation. The god of the lower world is scarcely called by the ill-omened name of Hades in cult, but Plouton or Trophonios or Zeus Chthonios—names implying beneficence; for the Homeric and Hesiodic world Demeter is a goddess of blessing, not of terror. And, although in the earliest period certain demoniac personages such as Medusa—identical in form and perhaps in character with the snake-headed, horse-headed Demeter—may have loomed large and terrible in popular cult, afterwards fading wholly from actual worship or surviving in the lower strata of ineffectual folklore, yet the more civilizing imagination had also been operative in the religion of the second millennium. The monuments of the Minoan-Mycenaean religion reveal scarcely an element of terror. And at some period before Homer the kindly deity, Hermes, has assumed the function of the leader of souls. As regards the eschatological views of the pre-historic Greek, we can say little, unless we believe that Homer was his spokesman; and such belief would be very hazardous. The earliest communities may have had no special hopes concerning the departed soul; we have no reason for thinking that the Mysteries which later offered some promise of happiness in the world to come had as yet proclaimed such a doctrine; the earliest form of the Eleusinia may have been that of a secret society organized for agrarian purposes. At any rate, there is no proof that the primitive mind of the Hellenes brooded much on the problem of death, or was at all possessed with morbid feeling about it; and in pre-Homeric times he must have been freer from care in this matter than he was in the later centuries, if we accept the view of certain scholars that the elaborate ritual of *κάθαρσις*, or purification, which was mainly dependent on the idea of the impurity of death, ghosts, and bloodshed, was wholly the creation of post-Homeric days.

8. Earliest ritual of purification.—It has even been said that the very idea of the need of purification on special occasions was unknown to Homer. This is demonstrably false. It is enough to mention one passage alone: at the close of the first Book of the *Iliad*, the Achæans, at Agamemnon's bidding, purify themselves from the plague, and throw the infected media of purification into the sea; this is a religious lustration. And, when Hesiod mentions the rule that a man returning from an 'ill-omened' funeral could not without peril attempt to beget a child on that day,¹ he happens to be the first literary witness to the Greek tabu of death; but we may be sure that he is giving us a tradition of indefinite age, and that 'Achæan' society, of which Homer is supposed to be the spokesman, had some of the cathartic rules and superstitions that are found broadcast in later Greece. It may not have elaborated or laid marked stress on them; it may have had no strong sense of the impurity of homicide, nor devised any special code for its expiation. But, if it was entirely without any instinctive feeling for the impurity of birth and death, and for the danger of the *μιασμα* arising from certain acts and states, it was almost unique among the races of man. Only, a progressive people does not overstrain such feelings.

9. Cruder religious conceptions in the earliest period.—So far, the religious phenomena discoverable with some certainty or some probability in the earliest period of Greek history indicate a theistic system of a somewhat advanced type. But doubtless we must reckon with the presence

of much else that was cruder and more savage. When we find in the later records ample evidence of the lower products of the religious imagination—the products of 'animism,' 'fetichism,' theriomorphism, or polydaimonism; more inarticulate and uncouth embodiments of the concept of divinity; or darker and more cruel ritual than that which Homer describes, such as human sacrifice, the driving out of the scapegoat, blood-magic for controlling winds or finding water—no reasonable critic will call all these things post-Homeric because they may not be mentioned in Homer, or suppose that the pure-minded Hellenes were seduced into borrowing them from the Orientals, or that they were spontaneous products of a later degenerate age. The view taken of them by those who have in recent times applied comparative anthropology to the study of Hellenism is the only one that is possible on the whole: these things are a surviving tradition of a mode of religious thought and feeling proper to the aboriginal ancestors of the Hellenic race, or immemorial indigenous products of the soil upon which that race grew up. There is no cataclysm in the religious history of Greece, no violent breach with its past, no destruction of primitive forms at the advent of a higher enlightenment; no fanatic prophet arose, and the protests of philosophy were comparatively gentle and ineffective. Only a few religious forms of an undeveloped society that might shock a more civilized conscience were gradually abandoned; most of them were tolerated, some in a moribund condition, under a more advanced religion, with which they might be seen to clash if any one cared to reason about them. Therefore a chapter or a statement in Pausanias may really be a record of the pre-Homeric age; and in this way we can supplement the partial picture that has been given above.

10. Animal-gods and animal-worship.—The anthropomorphic principle, which is not necessarily the highest upon which a personal theism could be constructed, is the main force of the higher life of Hellenic polytheism. We may believe that it had begun to work before Homer, but not predominantly or with sufficient effect to produce a stable anthropomorphism in religion. Some worship of animals, which is called 'theriolatry,' some beliefs in the animal-incarnations of the divinity, were certainly in vogue. A few of the more ancient cult-titles would be sufficient evidence, apart from the later records. One of the most significant and oldest is *Λύκειος*, an epithet of Apollo marking his association with wolves. We find also that in many legends, and even occasionally in ritual, the wolf appears as his sacred animal. These facts point back to a period when Apollo was still the hunter-god of the wild wood, and was regarded as occasionally incarnate in the beast of the wild. We have also a few indications of direct reverence being paid to the wolf, apart from its connexion with any god.² Another salient example either of theriolatry or of theriomorphic god-cult is snake-worship, proved to have existed in the earliest epoch of the Delphic religion, and in vogue, according to later records, in Epirus and Macedonia. The snake may have been revered in its own right, or as the incarnation of some personal divinity or hero, as we find it later attached to the chthonian deities, to the Earth-Mother, Zeus *Κρήνιος* and *Μελίχιος*,³ Asklepios, and to the buried hero or heroine, such as Erechtheus, Kychreus. We have also reasons for assuming a very early cult of a bear-Artemis in Attica⁴ and Arcadia; and many other examples of similar phenomena will be found

¹ CGS iv. 113–116.

² See Nilsson, in *Athen. Mitt.*, 1906, p. 379.

³ CGS ii. 434–442.

in a treatise on the subject by De Visser.¹ Later Arcadia was full of the products and of the tradition of this early mode of religious imagination; besides the horse-headed Demeter at Phigaleia, we hear of the worship at the same place of a goddess called Eurynome, represented as half-woman, half-fish; and bronze figures belonging to the Roman period have been found at Lykosoura in Arcadia, apparently representations of divinities partly theriomorphic.²

The first anthropologists who dealt with the primitive forms of Hellenic religion interpreted this special set of phenomena in the light of totemism; but progressive students have now abandoned the totemistic hypothesis on the ground that there is little or no trace of totemism in any Greek or any Aryan society, and that theriolatry, or the direct worship of animals, needs no such explanation. Also, as recently pointed out elsewhere,³ the theriomorphic concept of divinity can, and frequently does, coexist at certain periods and in certain peoples with the anthropomorphic; nor can we say with assurance that in the mental history of our race the former is prior to the latter, or that generally the anthropomorphic was evolved from the animal-god.

ix. Functional deities: polydaimonism. — In attempting to penetrate the pre-Homeric past, we have to reckon with another phenomenon, which, though revealed in later records only, has certainly a primitive character, and has been regarded as belonging to an age when the concept of definite complex personalities such as *theoi* had not yet arisen. It was Usener⁴ who first called attention to a large number of local cults of personages unknown to myth or general literature, and designated, not by what are called proper names, such as Hermes, Apollo, Zeus, but by transparent adjectival names, expressing a particular quality or function or activity, to which the essence of the divine power in each case was limited; such, for instance, are *Ἐχελος*, *Ἐχελαιος ἥως*, *Κυαυτης*, *Ἐβνοστος*, being nothing more than 'the hero of the ploughshare' at Marathon, the 'hero who makes the beans grow' on the sacred way to Eleusis, 'the hero who gives the good return of corn' at Tanagra; for these he invented the term *Sondergötter*, meaning deities of a single function only; and to those of them to whom only a momentary function, and therefore only a momentary existence, seemed to appertain, he applied the term *Augenblicksgötter*, 'momentary gods'; an example of this type might be *Μυιαγρος*, 'fly-chaser,' in Arcadia and Elis, who at the sacrifice to Athene or Zeus was called upon to chase away the flies that would worry the sacrificers, and who existed only for the purpose and at the time of that call. We may compare also for vagueness and inchoateness of personality certain aggregates of deities having no definite single existence, but grouped by some adjectival functional name, such as *theoi Anarphoraiotai*, 'the deities that avert evil,' at Sikyon;⁵ *theoi Pervulides*, the goddesses of birth in Attica;⁶ the *theoi Praeidekai*, the goddesses of just requital, at Halimartos.⁷ Such forms seem to hover on the confines of 'polydaimonism,' and to be the products of an embryonic perception of divinity, cruder and dimmer than the robust and bright creations of the Hellenic polytheism, to which so rich a mythology and so manifold a personality attached. Another fact seems to fall into line with these: in some cult-centres the deity, though personally and

anthropomorphically conceived, might only be designated by some vague descriptive title like *ὁ θεός* and *ἡ θεά*, as occasionally at Eleusis; or *Δέσποινα*, 'the Mistress,' the goddess of Arcadia; or *Παρθένος*, 'the Virgin,' on the coast of Caria and in the Chersonese: even as late as the time of Pausanias the men of Boulis in Phokis never called their highest god by any other name than *ὁ Μέγιστος*, 'the Greatest.'⁸ And it has been thought that the well-known statement of Herodotus, that the Pelasgians had no names for their divinities, was based on some such facts as these.

The importance of these phenomena would be all the greater if Usener's theory were true, that they represent the crude material out of which much of Greek polytheism has grown.⁹ But in any case they claim mention here, because they are the products of a mental operation or instinct that must have been active in the earliest period of Hellenic religion.

x. Animism or Animatism. — In another set of facts, also attested by later records, we may discern the surviving tradition of an animistic period. A large part of the Hellenic as of other religions reflects man's relation and feeling towards the world of Nature, his dependence on the fruits of the earth, the winds, the waters, and the phenomena of the sky. The trend of the higher polytheism in the Hellenic mind was to set the personal divinity above and outside these things, which he or she directs as an intellectual will-power. But we have sufficient evidence of another point of view, which is that of more primitive religion, from which the deity is imagined as essentially immanent in the thing, not as a distinct personality emerging from it. The Arcadians who worshipped Zeus *Κεραυνός*,¹⁰ or 'Zeus Thunder,' at Mantinea, or the people at Gythion in Laconia who called a sacred meteoric stone Zeus *Καπνώρας*,¹¹ 'the fallen Zeus,' or the Athenians who worshipped Demeter *Χλόη*, 'Demeter Green Verdure,'¹² reveal in these strange titles an attitude of mind that is midway between 'Animatism,' that religious perception of each striking thing or phenomenon in Nature as in itself mysteriously alive and divine, and 'Theism,' which imagines it controlled by a personal deity. At the stage when Demeter could be named and perceived as *Χλόη*, 'Verdure,' the anthropomorphic conception of divinity, though certainly existing, was not yet stable.

But there are other cult-facts reported to us of a still cruder type that seem to reveal Animatism pure and simple and the infancy of the Hellenic mind. The Arcadians, always the most conservative and backward among the Hellenes, in their colony of Trapezus 'offered sacrifice to the lightning and thunder and storms';¹³ it seems that for them these things were animate and divine directly, just as the Air—*Bedu*—was for the Macedonians. Again, through all the periods of Hellenic religion, the worship of rivers and springs only at certain points approached the borders of Theism; sometimes offerings were flung directly into the water, and prayer might be made 'into the water'—we must not say 'to the river-god,' but to the divine water.¹⁴

¹ Paus. x. 27. 2.

² The present writer has criticized this theory of evolution in *Anthropological Essays presented to E. B. Tylor*, Oxford, 1907, 'The Place of the "Sonder-Götter" in Greek Polytheism,' where he has taken the view that some of them are products of the same religious instinct that produces theism or polytheism, and that some appear to be late offshoots of the polytheistic system.

¹⁴ *Id.* ix. 38. 2.

We discern these two different ways of imagining divinity in the worship and ideas attaching to 'ἥλιος,' 'Sun,' and 'Ἥestia,' 'Hearth.' As regards the former, we have reason to surmise that his religious prestige was higher in the pre-Homeric than in the later age, and that the exalted position as a great political and cultured god which he enjoyed in the later history of Rhodes was a heritage from the Minoan religious tradition.¹ In Homer's poems we find him personal and anthropomorphized; but we may well doubt if he was so for the average Greek, who merely kissed his hand to him every morning, or bowed to him on coming forth from his house, and who, regarding him mainly as animate or 'Living Sun,' found it difficult to develop him into a free and complex individual person.

As regards Hestia the facts are still clearer.² In her worship, which belonged to the aboriginal period of Greek religion, she was at first, and in the main continued to be, nothing more than 'Holy Hearth,' the Hearth felt as animate; nor was the attempt to anthropomorphize her into a free personal goddess ever wholly successful, for reasons that will be considered later (p. 404*).

13. Magic.—Now, that which is here called 'animatism' is a religious feeling which may inspire real worship, but is more liable than pure theism to be associated with magic; and it is reasonable to believe that magic was in vogue in pre-historic Hellas, not necessarily in antagonism to religion, but practised for purposes of the community as well as for private ends. It is true that the records which tell us about these things are all of a period much later than Homer's, and that he is almost silent about such matters.³ But we know now how to appreciate Homer's silences; and general anthropology compels us to believe that some of those records reveal facts of immemorial antiquity in Greece. The *Thesmophoria*, one of the most ancient of the Hellenic services, was partly magical; that is, it included rites that had a direct efficacy, apart from the appeal to any divinity—such as the strewing of the fields with the decaying remains of the pigs that had been consecrated to the earth-goddesses and thrown down into their vault.⁴ So also in the *Thargelia* of Attica and other Greek communities, the ceremonies connected with the scapegoat and the ritualistic whipping and transference of sin belong to the domain of magic rather than to religion.⁵

We have also direct evidence of a magical dealing with the elements in the titles of officials at Athens called the *Εὐδήμεοι*,⁶ and of those at Corinth called *Ἀνεμοκοῖται*,⁷ both words denoting 'wind-lullers,' 'those who charmed the winds to sleep'; and again in the description of the rite performed by the magicians at Kleonai, who, according to Clement,⁸ 'averted the sky's wrath by incantations and sacrifices'; or in Pausanias' account of the operations of the priest of the winds at Titane in Sikyon,⁹ who endeavoured to assuage their fierceness by 'singing over them the spells that Medea used.' Doubtless these officials were only maintaining the practices of an indefinitely remote past, such as are also reflected in legend of the ancient Salmonsus, of Thessalian and possibly Minyan origin, who drove about in a chariot imitating thunder and, while merely practising a well-known type of weather-magic,

was misunderstood by the higher powers and later moralists.

The few records that may avail for an opinion concerning the early period with which we are at present concerned entirely fail to suggest any such prevalence of magic as might obstruct intellectual progress or the growth of a higher religion. They reveal generally a type that is harmless, or even philanthropic.¹ Doubtless some black magic existed in the earliest as in the later Hellas, directed against the life or the property of individuals, and worked by evil means; the more ancient literature is entirely silent about this; but a late record of Pausanias testifies to a barbarous magic practised at Haliartos to discover a water-supply;² a son of one of the chief men was stabbed by his own father; and, as he ran bleeding about the land, springs of water were found where his blood dripped. But at no time, we may judge, was the religion or the intellect of Greece so clouded with magic as was the case elsewhere in the ancient civilizations, notably in Egypt and Mesopotamia.

14. Human sacrifices.—This attempted presentation of the first era of Greek religion must raise the question as to the practice within it of the ritual of human sacrifice. For we are apt to associate this with a primitive society and with a crude or savage religion. But this association is not borne out by the religious history of mankind. The practice has been found in societies highly developed both in morality and in civilization; and the *a priori* argument is dangerous, whether we apply it in one way or the other.

It has been said that the Homeric poems show no consciousness of the existence of the cruel rite in the Greek world of the period; and it has been argued on this ground that the Achaean society of which they are the voice was innocent of it.

A doubt may arise concerning the slaughter of the Trojan captives at the pyre of Patroklos,³ an act of ferocity for which Homer outspokenly blames Achilles. The passage certainly suggests that the poet was aware that such things were occasionally done at contemporary funerals. In Mycenaean tombs at Argos and Mycenae human remains have been found before the entrance-door, that point to an offering of slaves or captives.⁴ But this need not have been an act of worship or strictly of religion. The dead might be imagined as needing slaves; and to kill slaves to accompany the departed, just as to kill horses over the pyre, may only imply 'tendence,' and no worship of the spirit. But Homer's silence concerning human sacrifice as a rite of religion is of no value as evidence for our present question, as has been argued elsewhere.⁵ How are we to account for the fairly numerous records of actual human sacrifice or of the semblance or reminiscence of it in later Greek worship—records that are found sporadically among most of the leading Greek stocks? The old shift of attributing to Oriental influences everything in Hellenic religion that clashed with our ideal of Hellenism was naively unscientific. That the practice should have sprung up spontaneously and suddenly in the later society, when civic life and morality were advancing, is hard to believe. It is more natural to suppose that it was an immemorial and enduring tradition of the race, which was only with difficulty abolished, and which lingered here and there till the end of paganism. It has been found among many other Aryan races, and it was specially in vogue among the Thracian-Phrygian stock of near kin to the Hellenic. These

¹ In the earliest versions of her legend, the magic of Medea is not black, but benevolent.

general grounds for believing that it was a feature of the earliest Greek religion are confirmed by some special evidence derivable from the legends and cult-records. It is generally impossible to date the birth of legends; but some can be discerned to belong to an earlier stratum than others: such are the legends concerning the human sacrifice to Zeus Δικαίος on Mt. Lykaion in Arcadia, to which is attached the story of King Lykaon and the banquet he offers to Zeus on the flesh of his own son;¹ the Achæan or Minyan story of the sacrifice to Zeus Δαφύστιος, 'Zeus the Ravening,' of the king's son of the house of Athamas;² Kyknos' sacrifice of pilgrims and the dedication of their skulls to Apollo on the Hyperborean pilgrims' way at the Achæan Pagasai;³ the sacrifice of a boy and a maiden to Artemis Τρικλάρια by the Ionians on the southern shore of the gulf of Corinth.⁴ A careful study of the legends of these various rites will convince one that they belong to the earliest period of Greek religion. The last example is specially illuminating; the human sacrifice is here practised by the Ionians in their ancient settlements in the land afterwards called Achaia; and its cessation is connected with the arrival of the cult of Dionysos and the return of the heroes from Troy.

The purpose and significance of the rite differed probably in the different cult-centres. In most cases we may interpret it as piacular, the dedication to an offended deity of a valued life, the life of a king's son or daughter, as a substitute for the life of the people, such vicarious sacrifice being a common human institution; in a few cases we may discern an agricultural motive, the blood being shed as a magic charm to secure fertility;⁵ finally, in the ritual of Zeus Lykaïos we may detect a cannibal-sacrament, in which the holy flesh of the victim, whose life was mystically one with the god's and the people's, was sacramentally devoured. This ghastly practice is only doubtfully disclosed by legends and by interpretation of later records; a faint reminiscence of it may also have survived in the Argive story of Harpalyke and Klymenos.⁶ But a close parallel to it will be noted in the Thracian Dionysiac ritual.

Summary account of the first period.—A detailed account of the pre-Homeric religious age must at many points remain doubtful and hypothetical; but certain definite and important facts may be established. Anthropomorphism, in a degree not found in the earliest Roman religion, was already prevalent, even dominant, and nearly all the leading personal divinities of the later polytheism had already emerged; only Dionysos had not yet crossed the border from Thrace; Asklepios, dimly known to Homer, was merely the local deity of a small Thessalian community, Pan merely the *daimon* of flocks in remote Arcadia. Cretan religion, also personal in its imagination and mainly anthropomorphic, had left its deep imprint on the mainland; and its divine personalities, such as Rhea, the mother of the gods, and Aphrodite, were soon adopted by the northern immigrants, but not at first into high positions.⁷ The deity was generally imagined, not as a spirit or a vague cosmic force, but as glorified man, and therefore the religion became adaptable to human progress in arts, civilization, and morality. But much in the animal world still appeared sacred and weird; and the deity might be at times incarnate in animal form. At the same time the religious imagination was

still partly free from the bias of personal theism, and produced vaguer divine forms, of some force and power, but belonging rather to 'animatism' or polydaimonism than to polytheism.

Finally, a study of all the facts and probabilities may convince a careful student that the origin of Greek polytheism as a whole from simpler forms cannot be found in this earliest period. In the second millennium, which is the starting-point for Hellenic history proper, we cannot discern the 'making of a god' (unless we mean the building-up of his more complex character), nor do we start with a godless period. We may well believe that in the history of mankind theism was evolved from animism or polydaimonism; we may believe the much more doubtful theory that anthropomorphism arose from a previous theriomorphism; and there may still be some who are convinced that theriomorphism implies a totemistic society. But, at any rate, these evolutions had already happened indefinitely before the two strains, the Northern and the Mediterranean, had blended into the Hellenic race. The higher and the lower, the more complex and the simpler, forms of religious imagination operate together throughout Hellenic history; and the higher, though dominant, never wholly absorbs the lower, both being an intellectual tradition of an indefinite past. Much work on the origins of Greek religion has been wasted because its chronology is anachronistic; and the attempt to unlock many of its mysteries by the key of totemism has been abandoned by those who recognize that many of the views concerning this social phenomenon and its religious importance, prevalent in a former generation, were erroneous.

We can now pursue the inquiry nearer the border-line of the historic period, as it is conventionally termed.

Introduction of worship of Dionysos.—As early as the 10th cent. B.C., and probably earlier, a new religion with a new and imposing divinity was intruding itself into the Hellenic lands from Thrace and Macedonia.¹ Dionysos and the Thracian ritual-legend of Lykourgos are known to Homer; but the poems suggest that he was not yet definitely received into the Hellenic pantheon. Yet there are reasons for believing that Boeotia had received the alien worship in the 'Minyan' epoch, before the incoming of the 'Boiotoi'; and Attica before the Ionic emigration; while in the Peloponnese the Argive legend associates the advent of the god with the names of Perseus and the Proetid dynasty. In spite of local opposition and its natural antagonism to the nascent spirit of Hellenism, which was now tending to express itself in certain definite and orderly forms of mood, thought, and feeling, the new religion won its way victoriously, taking Thebes for its Hellenic metropolis, and some time afterwards securing its position at Delphi, where the priesthood and the Apolline oracle became its eager champions. It was distinguished from the traditional Hellenic in regard to its idea of divine personality, its ritual, and its psychic influence, that is to say, the mood that is evoked in the votary. In the first place, the figure of Dionysos belonged indeed to personal theism, certainly in Hellenic cult and probably in the Thracian; but he was less sharply defined as a concrete individual than was, for instance, Apollo or Athene; he was vaguer in outline, a changeful power conceived more in accordance with daimonic, later with pantheistic, thought, incarnate in many animal-shapes, and operative in the life-processes of the vegetative world; and an atmosphere of Nature-magic accompanied him.

⁷ Homer's prejudice against Artemis and Aphrodite may reflect the feelings of the northerners towards those Mediterranean deities whose cult they had not yet wholly absorbed.

The central motives of this oldest form of ritual were the birth and death of the god—a conception pregnant of ideas that were to develop in the religious future, but alien to the ordinary Hellenic theology, though probably not unfamiliar to the earlier Cretan-Mycenaean creed. But the death of this god was partly a fact of ritual; he was torn to pieces by his mad worshippers and devoured sacramentally, for the bull or the goat or the boy that they rent and devoured was supposed to be his temporary incarnation, so that by this savage, and at times cannibalistic, communion they were filled with his blood and his spirit, and acquired miraculous powers. By such an act, and—we may suppose—by the occasional use of intoxicants and other nervous stimulants, the psychic condition that this worship evoked was frenzy and ecstasy, which might show itself in a wild outburst of mental and physical force, and which wrought up the enthusiastic feeling of self-abandonment, whereby the worshipper escaped the limits of his own nature and achieved a temporary sense of identity with the god, which might avail him even after death. This privilege of ecstasy might be used for the practical purposes of vegetation-magic, yet was desired and proclaimed for its own sake as a more intense mood of life. This religion preached no morality, and could ill adapt itself to civic life; its ideal was supernormal psychic energy. The process whereby it was half-captured and half-tamed by the young Hellenic spirit forms one of the most interesting chapters in Hellenism.

II. SECOND PERIOD: 900-500 B.C.—It is convenient for the purposes of religious study to mark off the period between the 9th cent. and the 6th as the second period of Greek religion, in which we can observe the working of new forces and the development of older germs into new life. By the beginning of this period the fusion of the Northerners and the Mediterranean population was mainly complete, and the Hellenic spirit had acquired its definite instincts and bias. The 9th and 8th centuries witnessed the diffusion of epic literature, the rise of lyric poetry, the emergence of the *εἰκών*, or idol, in religious art, and, generally, the development of cities and civic life; and it is essential to estimate the religious influence of these forces.

1. Influence of epic and lyric poetry.—That the contribution of Homeric and of the later Hesiodic literature to the shaping and fixing of Hellenic religion was most fruitful and effective cannot be doubted. Only, we must not accept the exaggerating view of Herodotus¹ that these two poets were really the founders of the anthropomorphic religion, creating the orthodox Hellenic theogony, and determining the names and functions and shapes of the special divinities. By such a statement some scholars have been misled into regarding the Homeric poems as a kind of Greek Bible, which in respect of religious matters it might be heresy to disbelieve. We know that local temple-legend and local folklore could always maintain their independence of Homeric or Hesiodic authority, in respect of the titles of the gods, their relationships, and genealogies: Artemis was not everywhere reputed to have the same parentage or Zeus the same spouse. The early epic poets gathered many of the *τεπλὸν λόγια* of shrines, but there was much that they did not gather, and which survived. There was a noticeable particularism in Greek theology, and no orthodoxy and no heterodoxy in the sense that it was moral to believe or immoral to disbelieve any sacred book.

The chief religious achievement of Homer and his fellows was to intensify the anthropomorphic trend in Greek religion, to sharpen and indi-

vidualize the concepts of divinity, and to diffuse throughout the Hellenic world a certain uniformity of religious imagination. To their work partly, as well as to the higher synthetic power of the Greek mind, we may ascribe the fact that, in spite of local varieties of myth and cult-titles, in spite of the various elements that the divine personality may have absorbed from earlier cult-figures and cult-forms in the various cult-centres, the sense of the individual unity of person was not lost so long as the same name was in vogue; hence Apollo Lykeios of Argos could not be a different person from the Apollo Patroös of Athens, nor could hostility arise between them. That is to say, the higher religious literature imprinted a certain precision and definiteness upon the personal names of the leading divinities and endowed them with a certain essential connotation; for example, the dogma of the virginity of Athene and Artemis, always presented in the highest poetry, prevailed so far as to suppress the maternal character that may have attached to them in the pre-historic period, and of which we can still discern a glimmering in certain local cults.² To this task of shaping the divine characters the rising lyric poetry, which was growing up with the decay of the Epic, and which, in obedience to the Hellenic passion for disciplined form, was developing fixed types of song and music appropriate to special festivals and worship, must have contributed much. The 'spondaic' metre was adapted to the invocation or hymn sung at the libation—the *σπονδή*—to Zeus; and the solemn gravity of the spondaic fragment attributed to Terpander fittingly expresses the majesty of the high god, 'the primal cause of all things, the Leader of the world.'³ The pæan and the *nomos* became instinct with the Apolline, the *dithyrambos* with the Dionysiac spirit.⁴ The earlier Greek lyric was, in fact, mainly religious, being composed for public or private occasions of worship; its vogue was therefore wide, and in some communities, as in Arcadia, the singing of these compositions formed part of the national training of the young.⁵

2. Idolatry.—Another phenomenon of importance at the beginning of this second period is the rise of idolatry, the prevalence of the use of the *εἰκών* in actual worship in place of the older aniconic *ἄγαλμα*, which had sufficed for the Minoan and the Homeric world as a token of the divine presence or as a magnet attracting it to the worshipper. This important change in the object of cult may have been beginning in the 10th cent., for we have one indication of it in the Homeric poems, and recently on one of a series of vases of the early geometric style found in a grave of the post-Minoan period near Knossos, the figures of an armed god and goddess are depicted on low bases, evidently idols, and perhaps the earliest of any Hellenic divinity.⁶ Henceforth, although the old fetish-object, the aniconic *agalma*, lingered long in certain shrines and holy places, the impulse towards idolatry became imperious and almost universal, exercising a mighty influence on the religious sentiment of the Hellenes both before and after the triumph of Christianity. The worship before the idol intensified the already powerful anthropomorphic instinct of the polytheism, and was at once a source of strength and a cause of narrowness. It brought to the people a strong conviction of the real presence of the concrete individual divinity; as it gave its mandate to the greatest art of the world, it evolved the ideal of divinity as the ideal of humanity, expressible in

forms of beauty, strength, and majesty. On the other hand, it was a force working against the development of a more mystic, more immaterial religion, or of a consciousness of godhead as an all-pervading spirit, such as might arise out of the vaguer religious perception of those half-personal *daimones* or *numina*, which never wholly faded from the popular creed.

3. Progress of anthropomorphism.—It is interesting to mark within this second period the various effects of the now regnant anthropomorphism. Those functional *daimones* tend to leave the amorphous twilight of religious perception, in which the Roman *indigitamenta* remained, and to be attracted into the stronger life of personal theism. *Kouporrhōpos*, once perhaps only a vague functional power that nurtured children, becomes identified with Artemis or Gē; *Χλόη*, 'Divine Verdure,' when the cult was introduced from the Marathonian Tetrapolis to the Akropolis of Athens—if this, indeed, is a true account of its career—could maintain herself only as *Διμήτηρ Χλόη*. Again, the name *Ἥρως* comes to be applied to even the most shadowy of these functional powers, to *Μυλαργός*, 'the Fly-chaser,' the most limited and momentary of them all; to *Εἰδωστός*, the *daimon* of good harvest, about whom a very human tale is told; and to call them *Ἡρώες* implies that they were imagined as semi-divine men who once lived on the earth. Even the most immaterial forces, some of those which mark mental phases or social conditions, such as *Ἔρως*, Love, *Φιλία*, Friendship, *Ειρήνη*, Peace, became often for the religious imagination personal individuals with human relationships;¹ thus *Ειρήνη* emerges almost as a real goddess with the traits of Demeter, *Φιλία* on a relief in the Jacobson collection is individualized as the mother of Zeus Philios, in defiance of the traditional theogony.² Others such as *Αἰδώς*, 'Reverence' or 'Compassion,' remained in the border-land between animating forces and personal deities.

But we observe in many cases that the name itself was an obstacle to the emergence of a convincingly personal god or goddess; and, where this is the case, the personality never could play a leading part in the advanced religion. Thus *Ἑστία* bore a name that denoted nothing more than 'the Hearth,' considered as animate and holy; Greek anthropomorphism did its utmost for her, but never or rarely succeeded in establishing her as a fully formed personal goddess. The same phenomenon is observable in regard to Gē, Helios, and Selene; it was easy to regard them as animate powers, and as such to worship them; such worship they received throughout all periods of Greek religion, but they exercised no direction of the moral, social, and spiritual progress of the race; for their names so obviously connoted substances unlike and alien to man that they could not with conviction be imagined as glorified men or women.³ It was otherwise with such names as Apollo, Hera, Athene, which could become as real and individual as Miltiades or Themistocles; and it is these humanized personalities that alone dominate the higher religion of Greece. The spiritual career of Demeter began only when men forgot the original meaning of her name and half forgot that she was only Mother Earth. The *Ἄνεμοι*, being mere 'Winds,' were scarcely fitted for civic life; but Boreas, having a personal name, could become a citizen and was actually worshipped as *Πολίτης*, 'the Citizen,' at Thourioi.⁴ A curious and unscientific distinction that Aristophanes makes

between the religions of the Hellenes and the Barbarians⁵ has its justification from this point of view.

4. Influence of the 'Polis' on religion.—The spirit of the *Polis*, the dominant influence in Greek religion throughout this second period, worked in the same direction as the anthropomorphic instinct, giving complexity, varied individuality, and an ever-growing social value to the idea of godhead. The deities of the wild enter the ring-wall of the city, and shed much of their wild character. Apollo Lykeios, the wolf-god, enters Argos and becomes the political leader of the State, in whose temple a perpetual fire was maintained, symbol of the perpetual life of the community.⁶ And the advanced civic imagination tended to transform the primitive theriolatry or theriomorphic ideas that still survived. Proofs of direct animal-worship in the later period are very rare and generally doubtful; for the ancient writers employ the term 'worship' carelessly, applying it to any trivial act of reverential treatment.⁷ In the few cases where we can still discern the animal receiving cult, we find the anomaly explained away by some association established between the animal and the anthropomorphic deity or hero. Thus the wolf became no longer sacred in its own right—if, indeed, it ever was—but might be revered here and there as the occasional incarnation of Apollo, or as his guide or companion. The primitive population of the Troad may once have 'worshipped' the field-mouse, though the authority that attests it is a late and doubtful one. And when Apollo becomes in this region the civic guardian of the Æolians and the protector of their crops, he takes a title from the mouse (*Σμυρθεύς* from *σμήθωρ*), and the mouse is carved at the side of the anthropomorphic image as a propitiatory hint to the rest of the species not to injure the corn, or as a hint to the god that mice needed regulating.⁸ The serpent worshipped in the cavern, or in some hole or corner of the house—vaguely, in 'Aryan' times as the Earth-*daimon* or House-genius⁹—became interpreted as the embodiment of the ancestor Erechtheus of Athens, or Kychreus of Salamis, or Zeus *Κρήσιος*, the guardian of the household possessions, or Zeus *Μελίχτιος*, the nether god. When the very human Asklepios came to Athens towards the end of the 5th cent., he brought with him certain dogs who were ministers of healing; and the Athenians offered sacrificial cakes both to the god and to his dogs, which partook of his sanctity.¹⁰ This may appear a strange imbecility; but at all events we discern in these facts the prevalent anthropomorphism dominating and transforming what it could not abolish of the old theriolatry; just as we see the coin-artist of Phigaleia transforming the uncouth type of the horse-headed Demeter into a beautiful human form of a goddess wearing a necklace with a horse-hoof as its pendant. The sacred animal never wholly died out of Hellas; but it could maintain its worship only by entering the service of the human gods.

The expansion of the civic system in this second period, due to extended colonization and commerce, induced a development of law and an expansion of moral and religious ideas. One of the most vital results of the institution of the *Polis* was the widening of the idea of kinship. For in theory the city was a congregation of kinsmen, a combination of tribes, phratries, and families,

wider or narrower associations, framed on a kin-basis; and it gradually evolved the belief, pregnant of legal and moral developments, that every citizen was of kin to every other.

In consonance with the conception of the State as an extended family, we find certain ancient family-cults taken over by the religion of the *Polis*. As the private family was knit together by the worship of the hearth in the hall and of Zeus 'Epeios, 'the god of the garth,' in the courtyard of the house, so the city had its common Hestia, or Holy Hearth, upon which often a perpetual fire was maintained in its *prytaneum*, or common hall; and the cult of Zeus 'Epeios was established in ancient days on the Akropolis of Athens. The great divinities of the State, Zeus, Hera, Aphrodite, and—perhaps later—Demeter, consecrate and regulate the monogamic rite of marriage, in which the *Polis* was directly interested. The organization of the 'phratry' was also consecrated to the high deities, Zeus, Athens, and, among some Ionic communities, Aphrodite; and the decisions of the *phratreis*, or 'brothers,' on questions of adoption and legitimacy of citizens were delivered from the altar of Zeus *Phatrios*; while the union of the local districts, or 'demes,' was sanctified by the cult of Zeus or Aphrodite *Idæon*, the god or goddess of 'all the demes.' The *Polis* also organized and maintained the kindred festivals of commemoration proper to the family, or gens, or phratry—the All-Souls celebration of the dead which was held at the end of the *Anthesteria*; the *γέρεια*, the funeral feasts of the *γῆν*; the *Ἀραρόρεια*, the joint festival of the phratry; while the great achievement of the consolidation of the scattered groups into the single city was celebrated at Athens by the festival of the *Συνεκρία*, the 'union of all the houses,' and the *Παραθήρεια*, the all-Attic feast of Athens.

The picture that these facts present of a State-religion based on the idea of the family and of kinship is mainly drawn from Athens, of which the religious record is always the richest; but it reflects undoubtedly the system of the other Hellenic States as well. Many of their records attest the belief that some one of the high divinities was the ancestor or ancestress of the whole people, and this ancestry was generally understood in the physical and literal sense. Thus Apollo *Πατρός* was the divine ancestor, being the father of Ion, of the Ionic population of Attica; and even the non-Ionic stock desired for political purposes to affiliate themselves to this god.¹ In the same sense he was called *Πατήρ*, 'the Father,' in Delos.² Zeus was the father of Arkas, the eponymous hero of the Arcadians, and was worshipped as *Πατρός* at Tegea;³ Hermes also was ancestral god of part of the Arcadian land, and identified with the ancestor *Aipyros*.⁴ These religious fictions came to exert an important influence on morality, and also to develop a certain spiritual significance, which will be considered later.

5. Hero-cult.—This aspect of the public religion is further emphasized by the prevailing custom, which appears to have gathered strength in this second period, of worshipping the hero or the mortal ancestor of the State, or the tribe, or the clan. The first clear evidence of this in literature is in the poem of Arktinos of Miletos called the *Aithiops*, which may belong to the end of the 8th cent. B.C., and in which the apotheosis of Achilles is described. But there is, as has been said, strong reason for believing that the practice of 'heroizing' the dead descended from the pre-Homeric age.

Nevertheless, of the multitude of hero- and ancestor-cults recorded in ancient Hellas, the greater number are probably post-Homeric. We find the Delphic oracle giving vigorous encouragement to the institution of them, and in the 6th cent. B.C. cities begin to negotiate and dispute about the possession of the relics of heroes. Some of these in the older cults may have been actual living men dimly remembered; some were fictitious ancestors, like Arkas and Lakedaimon; some may have been faded deities, such as were Eubouleus at Eleusis and Trophonios at Lebadeia. But all were imagined by the worshipper to have been once men or women living upon the earth. This, then, becomes a fact of importance for the religious thought of the world, for it engenders, or at least encourages, the belief that human beings might through exceptional merit be exalted after death to a condition of blessed immortality, not as mere spirits, but as beings with glorified body and soul. Furthermore, certain ancient heroes, long endeared to the people as the primeval parent or the war-leader of their forefathers, become raised to the position of the high god and merged in his being; Erechtheus shares the altar and even the title of Poseidon and Zeus; Aipyros of Arcadia becomes Hermes; Agamemnon in Laconia at last is fused with Zeus.¹

Nor in this second period were such heroic honours reserved for the remote ancestor or the great king or warrior of old, but were sometimes paid to the recently dead, to the men who had served the State well by arms or by counsel. On the assumption that Lykourgos of Sparta was a real man—and any other theory of him is less natural—his case is the earliest recorded instance of the heroizing of a historical personage. A great stimulus about this time was given to this practice by the expansion of Greek colonization, the greatest world-event of the period, which reacted in many ways on religion. As the new colonists could not take with them the tomb or the bones of the aboriginal hero of their stock, they must institute a new hero-cult, so as to bind the new citizens together by the tie of heroic kinship. The most natural person to select for this high honour was the founder or leader of the colony, the *κτίστης* or *ἀρχηγέτης* as he was called, and we may regard it as the usual rule that, when he died, he would be buried within the city, and his tomb would become a *ῥήριον*, and would be visited yearly with annual offerings.

That the ordinary head of the private household in this period received posthumous honours amounting to actual worship cannot be definitely proved. The tendance of the dead had become, indeed, a matter of religion, and at Athens was attached to the ritual of the State by the commemorative feast of All Souls, the *Xόρποι*, or 'Feast of Pots,' the last day of the *Anthesteria*. But nothing that is recorded of this ghost-ceremony convicts it of actual worship; the ghosts are invited to spend the day with the household that holds them in affection, they are offered pots of porridge, and then at sunset are requested to depart. Prayers are proffered in their behalf to the powers of death, but not directly to the ghosts themselves; no cult is offered them as to superior beings endowed with supernatural power over the lives of individuals and States.² Nevertheless, the passionate service of lamentation and the extravagant dedication of gifts which marked the funeral ceremonies of the 8th and 7th centuries, and which certain early legislation was framed to check, reveal a feeling about the dead

¹ The other view, still held by some, that Zeus-Agamemnon is the earlier fact and Agamemnon the hero the later, does not bear criticism.

² See OGS v. 219-221; J. E. Harrison, *Prolegomena*, ch. II.

bordering on veneration, and such as might inspire actual worship.

We may safely assume that the growing interest of the States in hero-cult intensified the family aspect of the State-religion; the hero as the glorious kinsman is invited to the sacrifices of the higher deities, and to the *θεοφάγια* in which the god himself is the host.

It is important for the student of religion to mark the consequences of this close association of the civic religion with the idea of kinship that held together the family and tribe. These have been estimated more at length elsewhere;¹ and only a few general observations are possible here. Where a family-bond exists between the deity and the city, the spirit of genial fellowship is likely to prevail in the ritual and religious emotions, and the family meal might become the type of the public sacrificial meal with the god. Such a religion is adverse to proselytism; for, as it is the sacred prerogative of certain kindred stocks, its principle means the exclusion of the stranger. Its religious and moral feeling is naturally clannish; the whole group must share in the moral guilt of the individual, and the sins of the fathers will be visited on the children. It affords a keen stimulus to local patriotism, and quickens an ardent life within the wall of the city; it has at the same time the natural defects of narrowness of view. Yet, in the course of religious evolution, we must regard the old Hellenic conception of the god, the Father of the tribe or the city, as pregnant of the larger idea of God the Father of mankind—an idea which had already dawned upon Homer at a time when the tribal spirit of religion was still at its height.

A further result of such a system is that the State-divinities become also the patrons and guardians of the family morality, Zeus and Hera, for instance, being the supervisors of human marriage and of the duties of married life; and copious records present the High God as the protector of the father's right, of the tie that binds together the brethren, the sisters, the kinsmen. While such a religion was a living force, it was not likely that the family could assert itself as against the State; to marry healthfully and early, to beget vigorous children as defenders of the State and the family graves, to cherish and honour one's parents, to protect the orphan—these were patriotic religious duties inspired by the developed State-religion, and strenuously preached by the best ethical teachers of Greece. The State being the family writ large, private and public morality could not clash. The brutal action of Kreon in the *Antigone* is equally an attack on the religion of the State and on that of the family; and it was not till the 5th cent. that the question could be asked whether the good man was really the same as the good citizen.

6. Influence of advanced religion on law.—Of still greater interest is an important advance in criminal law, discernible as early as the 8th cent., which may be traced partly to the growth of the city, with its extended idea of kinship, partly to the growing intensity of the belief in the power and significance of the spirits of the dead.

In the most primitive period of Hellas, the shedding of a kinsman's blood was already a heinous sin; but the slaying of one outside the kindred circle was ordinarily neither a sin against God nor a social crime. But, as the public mind of Greece became penetrated with the feeling that all the citizens of the *Polis* were in some sense akin, the slaying of a citizen became a criminal act of which the State, and no longer merely the clan of the slain man, would take cognizance. This expanded concept of law is reflected in the expansion of an

ancient and most significant cult, the cult of Zeus Meilichios.¹ This was the underworld god, who was angered and must be appeased when kindred blood was shed; as the idea of kinship was enlarged, any civic massacre might arouse his wrath, and rites of atonement might be offered to him. This keener sensitiveness concerning the sanctity of human life was accompanied by a feeling that bloodshed might imprint a stain on the slayer that rendered him ritually unclean, that is, temporarily unfit to approach the gods or men; it was also fortified by the growing fear of the ghost-world, which seems to have lain more heavily on the post-Homeric society than on Homer's men. It is hard to give the dates for this section of the mental history of Hellas. The first record of the thought, which is nowhere explicit in Homer, that homicide in certain circumstances demands purification, is derived from the *Aithiopis* of Arktinos, the epic poet of Miletos in the 8th century.² Achilles, having slain the worthless Thersites, must retire from the army for a while to be purified in Lesbos by Apollo and Artemis. We mark here that the slain man was no kinsman of the slayer in any true sense of the word, but was a member of the same Achæan community, and therefore his slaying brought a religious impurity upon the hero; and we may believe that the narrative reveals the early religious law of Miletos. But, in passing, we must recognize the possibility that these apparently new manifestations may be only a revival of immemorial thought and feeling, common in the older non-Hellenic societies, and only for a time suspended.³

7. Influence of Delphi and Crete.—In this post-Homeric development of a system of purification from bloodshed, the legends suggest that Crete and Delphi played a momentous part. In the great island, the cradle of European culture, the cult of Zeus had early attached to itself certain cathartic ideas, probably of Dionysiac origin. And probably in the pre-Homeric period the influence of Crete had reached Delphi; while the legend of the migration of Apollo Delphinios from Crete to Delphi, and the story that the god himself must go to this island to be purified from the blood of Python, belong to the second period with which we are dealing.

We have reason to believe that the Delphic god—through the agency of his politic priesthood—was asserting his claim in the 8th and 7th centuries B.C. to be the dictator in the matter of purification from homicide, and thus to satisfy the cravings of an awakening conscience. This claim may have been suggested partly by the fear of competition with the spreading Dionysiac religion, which also brought with it a 'cathartic' message, and with which the Delphic priesthood were wise enough to agree quickly; partly also by the aboriginal nature of Apollo who was immemorially *Φαῖσος*, or 'pure.' Though the claim was not universally admitted and the Apolline jurisdiction could not obliterate the function of other divinities in this matter, yet it was powerful and effective of much that was vital both to law and to religion. Of the early procedure at Delphi we know nothing. If the god exercised discretion in his grant of purification, if he refused, for instance, to purify the deliberate and cold-blooded murderer, here was the opportunity for the emergence of a civilized law of homicide. It may not have been till the 7th cent. that any Hellenic State could express in a legal establishment its consciousness of the difference between the act of murder and the act of justifiable

¹ See CGS I. 64-69; for the religious evolution of the Greek laws concerning homicide, see Farnell, *Evolution of Religion*, pp. 120-162, CGS IV. 295-306.

or accidental homicide. The earliest that we know of was the law-court *ἐπὶ Δελφῶν* established at Athens under the patronage of the Cretan-Delphic god to try cases where homicide was admitted and justification was pleaded. In this as in other Attic courts that dealt with the same offence, rites of purification were often an essential adjunct of the ceremony. The typical legend that enshrines the early ideas of *κάθαρσις* and turns on the question of justifiable homicide is the story of Orestes, which had spread around the Peloponnese and penetrated Attica as early as the 8th cent. B.C., and later became Pan-Hellenic. Apollo as a divine agent appears in it first, as far as we have any literary record, in the lyric of Stesichoros, and at some indeterminate date in this period undertook the purification of the matricide.

These cathartic functions and the general demand for their exercise must have greatly enhanced the influence of Delphi in the earlier part of the post-Homeric period. It was doubtless strengthened even more by the great secular movement of Greek colonization. With wise foresight the god had undertaken the guidance and encouragement of this already in the earliest days when the Hellenes were pushing across the sea; for it seems as if the first Greek settlements on the Asia Minor coast, the Lycian and the Æolic, were due to his leadership, if not to his inspiration. The legends that associate him with the Dorian migration into the Peloponnese are too powerful to be rejected. And after this event, when light begins to shine on Greek history, and the Hellenic race was rapidly establishing that chain of colonies across and around the Mediterranean which were to diffuse Greek culture through the world, the power of Delphi and the Delphic oracle reached its zenith. For it is clear that it was the prevailing fashion to consult the Pythian Apollo as to the choice of a site. Hence it came about that in so many Greek cities Apollo was worshipped as *Ἀρχηγέτης*, that is, as the divine founder, and that the flourishing communities of the West sent back tithe-offerings to his shrine.¹ Was it by some accident or by something essential in his early cult and character that the god was able to play this momentous political part, such as no other deity has ever played in the secular history of his people? The cause may lie far back in the dim antiquity of the Apolline cult, when he was specially *Ἄγριος*, a god 'of the road,' the leader of the migratory host. And in pre-Homeric times, if not aboriginally, he was already an oracular god; nor was any occasion so urgent for a consultation of the local oracle as when the people were setting forth on their perilous path to find a new home.²

The Delphic oracle.—The spiritual history of the Hellenic race in the early historic period, when we mark a growing consciousness of nationality and of kinship in the various stocks, is very much a record of the career and activity of the Delphic oracle; and this is too complex and lengthy a theme to be more than adumbrated here.³ Due partly to the local position and the immemorial sanctity of the oracle, partly to the devotion and the grateful remembrance of the powerful Dorian States in the Peloponnese, the Pythian worship came to overshadow the Delian, and provided the chief religious centre and the strongest bond of spiritual unity in the Hellenic world. For political unity it could do little, owing to the centrifugal bias of Greek politics; yet the Delphic Amphiktyony, the most powerful of those religious confederations that are recorded here and there in the early history of Greece, contained within it the germs of intertribal morality and concord. Its

members were not indeed pledged to perpetual amity, but at least to a certain mutual forbearance even in their warlike dealings with one another. But the chief regulative functions of the oracle were concerned with questions of the institution and administration of cults, with the domains of legislation, colonization, public and even private morality and conduct. In the sphere of religion, it doubtless emphasized the necessity of purification from bloodshed; otherwise it had no high religious message to deliver; but it was enthusiastic for the propagation of the cult of Dionysos, and it authorized and sometimes encouraged the growing tendency towards the posthumous worship of distinguished men. In the sphere of morality its standard was generally high and its influence beneficent, especially—if we can trust the record—in the later period when it played the part of a State-Confessional and in its utterances reflected generally the progress of Greek ethics and the spirit of an enlightened humanitarianism. But its chief religious achievements were to bring some principle of unity and authority into the complex and shifting aggregate of Greek polytheism and to deepen the impression on the Hellenic mind of the divine ordering of the world; and the fruits of this teaching we gather in the works of Attic tragedy and in the history of Herodotus.

In view of the history of other temple-institutions of like power among other peoples—the Mesopotamian, for instance—we may be surprised that the Delphic priesthood made no attempt to impose Apollo as the supreme god upon the Hellenic States. The author of the Homeric hymn, composed partly under Delphic influences, exalts Apollo as high as he dares; but neither in this nor in any Delphic utterance is Apollo presented as more than the minister of Zeus, the mouthpiece of the supreme Father-god, the tradition of whose supremacy among the Aryan Hellenes had been fixed fast by Homer and the Homeridae.

Nor did the Delphic Apollo succeed in achieving a monopoly of divination; for the spirit of local independence was opposed to any divine monopoly in any department of life. And other oracles, such as some of those on the Asia Minor shore, acquired considerable prestige, especially in the later period when the influence of Delphi had declined. But from the 8th till the beginning of the 5th cent., the Pythian is the only one of the many mantic institutions that is to be regarded as a vital force of Pan-Hellenism.

8. *The games of Greece.*—As another important phenomenon belonging to the earlier part of this second period we note the emergence and development of the great Hellenic games, which were always associated with the worship of deities or heroes. These also must be reckoned as among the strongest Pan-Hellenic influences, evoking and strengthening the consciousness of nationality. For in the 6th cent. B.C. the whole of Hellas, eastern and western, was represented at Olympia, Pytho, the Isthmus, and Nemea; here was maintained the 'truce of God' between the jealous or hostile communities; and at Olympia once in every four years the Pan-Hellenes offered a common homage to their aboriginal Father-god.

We must, then, regard the great games and the Pythian establishment as momentous factors in the religious national life, as tending to evolve a religion of a broader compass than those of the narrow tribal type of the remote past. And they concern the higher mental history of the race because most of them, and notably the Pythian, included competitions in art and literature; and thus they assisted in establishing the specially Hellenic theory of the divine significance of the artistic and intellectual life.

¹ See CGS iv. 200-202.

² *Ib.* iv. 161 f., 200-202.

³ Fuller account in CGS iv. 179-218, and art. ORACLES (Gr.).

There were other festal and public meetings of a more exclusively religious purpose, such as the great Pan-Ionic feast of the Delian Apollo, that also served to deepen in the various States the consciousness of spiritual unity, and often, where the great lyric poets composed hymns for the occasion, to exalt and illuminate the ideal conception of the divinity: the Delian festival, for instance, of which the splendour developed in the early post-Homeric age and with the growing prosperity of the new Ionic colonies, must have contributed much to the building up of the peculiarly Hellenic ideal of Apollo; and the Homeric hymn, inspired by this occasion, is the earliest record of the national consciousness of the Ionic race.

9. Diffusion of Dionysos-worship.—Another religious phenomenon, pregnant of consequences for the spiritual history of Hellenism, is the diffusion of the worship of Dionysos. Faint though indubitable traces of this can be discerned in the pre-historic period, but it begins to be palpable and important only in the early historic. Its significance has already been indicated in general outlines (see above, p. 402^b). Having entered Attica from Boeotia and been adopted into the Attic State-religion some time before the Ionic migration to the Asia Minor coast, in the 8th and 7th centuries it gradually captured most of the States of the Peloponnese and of the islands, and the more distant colonies.

The Hellenic culture of Dionysos forms one of the most interesting chapters in the spiritual career of Hellenism; the taming of the wild Thracian god, the transformation of him into a civic deity, the disciplining and the adaptation of the *Menad-thiasoi* to the uses of an orderly State-religion, were not the least among the achievements of the Hellenic genius. And as the State-religion of those centuries had no eschatologic theory, so it seems to have discarded everywhere whatever eschatologic promise the Dionysiac religion proclaimed on its entrance into Greece. Yet, in spite of the chastening influence of the civic spirit, the worship preserved much of its distinctive tone and religious power, evoking a special mood unknown in the other cults, while even the savage form of sacrament, in which the god was devoured in his human or animal incarnation, survived with some modifications in Tenedos and Chios down to a late period. The history, then, of the Dionysiac religion concerns the account of the development of the sacramental idea in the Mediterranean. It concerns also the history of Hellenic culture; for one of its modes of expression was a peculiar type of emotional music, accompanying the Dionysiac hymn known as the dithyramb, which is usually regarded as the parent of Attic tragedy. Its main contribution to the polytheism of Greece was its stimulation of a warmer and stronger religious faith; and its special later service to popular religious theory was the refining and brightening of men's thoughts and sentiments concerning the life after death and the powers of the lower world, with whom the mild and genial god was generally identified or associated.

10. Orphic 'thiasoi'.—But the highest importance of Dionysos is found rather in the esoteric than in the external or popular domain of Hellenic religion. For, perhaps as early as the 7th cent., the cult of Dionysos was raised to a higher power by the rise and diffusion of the Orphic brotherhoods, or *thiasoi*, who worshipped this deity under various mystic names. The study of Orphism is of the greatest interest and complexity; and here it is possible to indicate only its general features and significance.¹ The preachers of the Orphic doctrines are the first propagandists or mission-

aries that we can discern in the pre-Christian Mediterranean world. For they had a definite message, and, ignoring the gentile and civic barriers of the old political religion, they preached it, if not to all mankind, at least to all the Hellenes. It was a message fraught with some new and momentous ideas, whose real import we have been able to gather in part from the now famous gold-tablets found in the graves of Crete and South Italy, and containing parts of a metric Orphic liturgy and creed that is a product at latest of the 5th, if not of the 6th century B.C. Combining this evidence with some passages in Pindar's *Odes* and Plato's *Dialogues*, we can recover in outline the doctrine of early Orphism. It proclaimed a theory, unfamiliar to native Greek mythology and religion, that the soul of man is divine and of divine origin; that the body is its impure prison-house, where it is in danger of contracting stain; that by elaborate purifications and abstinences the soul might retain its purity, and by sacramental and magic methods the pure soul might enjoy in this life and in the next full communion with God. Preoccupied with the problem of the life after death, the Orphic mystics evolved the concept of purgatory, a mode of posthumous punishment temporary and purificatory; also, if we can trust certain indications in Pindar and Plato, the dogma of reincarnation or more specially of a triple cycle of lives both in this world and in the next. Students of religious philosophy have noted here the striking resemblance to Buddhist thought; and have considered whether Indian speculation could have cast its influence so far westward at so early a time.

It is of more immediate importance for the religious history of the Greek people to determine—if we can—the measure of success that these missions achieved, how far they succeeded in capturing the masses or the élite of the people. They certainly did not succeed in penetrating the inner circle of the Eleusinian mysteries: there is no evidence that they even tried, though it is likely that they did; but we may surmise that their influence was at one time strong at Athens, as Aristophanes proclaims as a generally accepted tradition that Orpheus was the apostolic founder of all mysteries.² They were evidently powerful in Crete; but the chief arena of their activity and the chief scene of their secular and political influence was Western Hellas or Magna Græcia, where Pythagoras was their greatest convert, and the Pythagorean clubs their militant orders. The career of these forms a page of general Greek history. Their downfall relieved Hellas from the danger of the establishment of Orphism as a secular power, which threatened the Hellenic spirit with a bondage to sacerdotalism and to the pharisaic formalism of the purist. Henceforth the Orphic religion was a private influence only, and we have no evidence to determine precisely how great it was at any particular epoch. Pindar was deeply touched by it; Æschylus and Sophocles, so far as we can see, remained unmoved, while Euripides may have been at times attracted and at times repelled, but was in no sense its champion. Plato in a well-known passage³ protests strongly against the Orphic mystery-mongers as spiritual quacks destitute of any real morality, who dealt in magic and traded in promises and threats concerning the other world. Whether this moral estimate of Orphism was just or not, there is no doubt that Plato's theory of the soul as expressed in the *Phædrus* was indebted to the Orphic metaphysic. And the part played by these preachers

¹ *Frogs*, 1052. The mystic formula used in the Attic marriage-service, 'I have fled from evil, I have found a better thing,' may have been derived from Orphic sources (see Farnell, *Higher Aspects of Gr. Rel.*, p. 221.).

² *Rep.* p. 3641.

³ See THACR.

of purity and salvation in the later spiritual history of Greece was certainly of high importance. They mark the beginning of a new era of individualism in religion; for their concern was with the personal soul and its destiny.

11. Eleusinian mysteries.—The *Eleusinia*, or Mysteries of Eleusis, were a more national and Pan-Hellenic institution than the Orphica, but of somewhat similar influence and purpose (see art. MYSTERIES). Originally they may have been merely the tribal mysteries of an agrarian society to which only the adult members of the Eleusinian community were admitted. But, when our earliest record reveals them, namely, the Homeric hymn to Demeter, which cannot be later than the close of the 7th cent., they have already enlarged their borders and their scope. For they appear there as appealing to the whole Hellenic world, and their special promise to the initiated is the happiness of the soul after death. Having once transcended the tribal limits, they seem to have imposed no conditions on the aspirants for admission except the possession of Hellenic speech and purity from actual stain; the initiation was open to women and occasionally to slaves. Nor does their influence and the power of their appeal appear to have waned until the introduction of Christianity. Many scholars have laboured to solve the problems concerning their ritual, their doctrine, and their inner significance. It has been thought that their chief attractiveness may have lain in their preservation of a higher sacramental conception of the sacrifice that had died out in the ordinary public ritual; that the initiate drank of a sacred cup in which were mystically infused the very life and substance of the kindly Earth-Mother with whom their own being was thus transcendently united. But more careful criticism shows that, though a simple form of sacrament was part of the preliminary service, the real pivot of the mystery was not this but a solemn pageant, in which certain sacred things fraught with mystic power were shown to the eyes of the catechumens, who also were allowed to witness mimetic performances showing the action and passion of a divine drama, the abduction of the daughter, the sorrow and long search of the mother, the holy marriage of reconciliation, and possibly the birth of a holy infant. To imagine the thrill and the force of these rites, one must imagine a mediæval Passion-play performed with surpassing stateliness and solemnity. Those who saw these things in the Hall of the Mysteries at Eleusis may have carried away with them an abiding sense of a closer communion with the benign powers of the nether world and a resulting hope of a happier posthumous lot. We must regard them as the highest and most spiritual product of the pure Hellenic religion, investing it with an atmosphere of mystery and awe that was generally lacking in the public cult, and which was unperturbed at Eleusis by any violence of morbid ecstasy such as marked the Phrygian and some of the Orphic rites. We may believe that they exercised a healthful influence on the moral and spiritual temperament of the Hellene; but it is not clear that they definitely proclaimed any higher moral theory, nor do they appear, like the Orphica, to have preached any dogma of metaphysic or theology. But, like the Orphica, they tended to widen the horizon of the religious spirit; for they appealed to a far larger public than the ordinary cults of the city; and, while Pan-Hellenic in this sense, they belong to the domain of personal religion; for they satisfied the personal craving of the individual for closer fellowship with the deity, and soothed the troublous apprehensions that were growing up in this second period concerning the individual destiny of the soul. Yet, as regards

Attica and Athens at least, and probably as regards Hellas, they are not to be ranked, as the Orphica may be, among the disruptive forces of individualistic religion undermining the social fabric of public worship. For the Athenian State administered them by the help of Eleusinian officials in its corporate capacity; and one of the catechumens—the *rais d'éléras*—was initiated, according to the most probable view, on behalf of the whole youth of the city.

In the Great Mysteries the agrarian significance, though discoverable and associated with simple agrarian magic, was overshadowed by higher and more spiritual religion. And elsewhere in the State-festivals we note the same phenomenon of progress in the second period. Old-world utilitarian rites of agriculture and fertility were often taken over by the expanding *Polis* and received an artistic elaboration that disguised their original significance for the primitive peasant and raised them to a higher plane of social religion. This interesting process can be best studied in following the detailed records of the Laconian *Karneia* and *Hyakinthia*, the Delphic *Pythia*, the Attic *Panathenaea*: we can feelingly appreciate in these the potent influence of the lyric poetry, the music, and the art of early Greece, shaping and elevating men's imagination of divinity.

By the close of this second period—500 B.C.—the Hellenic national consciousness has realized itself in respect of intellectual culture, ethics, and religion. Zeus Hellenios, the tribal god, is becoming Panhellenios. The age of the tyrants contributed much to the growth of Pan-Hellenism; Peisistratos probably something to the idea of a national religion, in that he seems to have worked zealously for the organization and expansion of the Eleusinian mysteries. The cult of Dionysos has penetrated the leading communities and most of the by-ways of Greece; and nearly everywhere he has been partially tamed, and the *Maenads* have been either suppressed or disciplined to the more sober purposes of civic worship. But the two most striking phenomena in the spiritual history of the 6th cent. were, first, the rise and expansion of Ionic philosophy and physical speculation; and, secondly, the development of a new form of literature that came to be known as the Attic Drama. Both of these must be reckoned with among the forces affecting the life of the popular religion.

12. 6th century philosophy.—The relation of Greek philosophy to Greek religion is a great and complex subject, the theme of many modern treatises; and in this slight sketch of the whole history of the polytheism there is no room for more than a few very general observations. So far as the new speculation, which gave birth to the free secular science of Europe, was preoccupied with questions of the physical origins of things and with elemental theories of cosmogony, it would not necessarily clash with any orthodox prejudice of the average Hellene. For he had no sacred books which dictated to him any views concerning the origin of the world or the constitution of Nature, and which he would have considered it immoral to disbelieve. In fact, when Herakleitos boldly declared that 'neither God nor man made the kosmos,' there was no authoritative Greek myth or theologic dogma to gainsay him. But the great philosophers of the 6th cent.—Pythagoras, Empedokles, Xenophanes, and Herakleitos—were also directly concerned with the philosophy of religion, with speculations on the nature and the true definition of godhead; and some of the surviving fragments of their works express ideas and sentiments in sharp antagonism to the concepts and ritual of the contemporary polytheism. The main trend of their speculations ran counter

to the anthropomorphic theory of divinity; and they tend to define God not as a person, but rather as the highest spiritual, or metaphysical, or even physical power or function of the universe; and there is a common tendency in this 6th cent. thought away from the theistic to the pantheistic view. Pythagoras is said to have explained the conception of God in terms of mathematics, and to have been willing to accept the personages of the popular polytheism on condition of finding their true mathematical equation.¹ But this philosopher stands apart from the other leaders of this first period of Hellenic free thought. The mathematical mind is often a prey to mysticism. And Pythagoras was the most powerful champion and apostle of Orphism, the founder of those secret societies which threatened the secular and the intellectual freedom of Hellas. Equally on its mystic and on its rationalistic side the Pythagorean teaching was in tendency inimical to the public religion of Greece, though the members of this sect appear always to have compromised with it. But it is in the fragments of Xenophanes that we find the most severe protests against the current religious conceptions of Hellas: his verses quoted by Clement² polemicize strongly against the folly of anthropomorphism, which is the master-passion of Greek polytheism; and, if one or two of his quoted utterances seem to proclaim monotheism, it is clear that for his higher thought godhead was not a person but a cosmic principle or a noetic idea. On the whole, the same account may be given of the religious theory of Herakleitos so far as this is revealed at all in the fragments. It has, indeed, been recently maintained that he tolerated and found a place in his system for the contemporary polytheism;³ but it is probably a truer view that he regarded it with half-disguised contempt and used its terms and figures only on occasion as literary expressions; while three of his fragments are scornful exclamations against the excesses of the Bacchic ritual, the methods of purification from blood, and the folly of idolatry.⁴

In this early speculation of the 6th cent., however, the parting of the ways has not yet been reached for physical science and religion; the cosmic theory is expressed in spiritual and animistic rather than in materialistic terms: for Empedokles, Love and Strife are creative principles; in the view of Thales the magnet has a soul, and all things are full of divine potencies. The great movement of Ionic thought was indeed adaptable to a high pantheistic or animistic creed, but not to the personal polytheism of the Hellenes, though most of the philosophers do not appear to have been vehement protestants. And at first their protests could have influenced only the minds of a few; nor before the 5th cent. was the popular State-religion obliged to take notice of it.

13. Rise of Tragedy.—The other phenomenon referred to above as marking the close of this period was the rise of Tragedy. The question of its influence on the whole popular religion belongs to the history of the 5th century. What concerns us chiefly at this point is its close association with Dionysos-cult. The traditional view, that it actually originated in some mimetic form of Bacchic ritual, is in the opinion of the present writer still the most reasonable, although this is now denied by some scholars.⁵ But, even if its connexion with Dionysos-worship is a secondary or accidental fact,

it is still a fact of importance for the history of Greek polytheism. The records concerning Thespis of the Attic village Ikaria, a place dominated by ancient Dionysiac legend; the statement of Herodotus concerning Kleisthenes, the tyrant of Sikyon, who gave to Dionysos the tragic choruses that hitherto had been devoted to the hero-cult of Adrastos⁶—are sufficient proofs that this greatest of all the literary achievements of post-Homeric Hellas was dedicated to the god already in the 6th cent.; and throughout the glorious career of the Attic stage Dionysos remained its patron-god. His worship, then, must have received a strong stimulus from this new form of literature, which rapidly achieved popularity, and appealed directly to a larger public than any other. His character thus undergoes a singular transformation: the wild god of barbaric origin comes to take rank by the side of Apollo and the Graces as a divinity of culture and education, the inspirer of one of the greatest of Hellenic arts. Here, again, as in the cults of Apollo, Athene, and the Muses, we mark the characteristically Hellenic fusion of art and religion; and the history of the dithyramb, the Dionysiac hymn, which may have been the parent of the drama, and which was wedded to a peculiar mode of music and rhythm, is an important chapter in the history of European music.

III. THIRD PERIOD: 500-338 B.C.—The third period of Greek religion may conveniently include the 5th cent. and that part of the 4th which ends with the downfall of the system of civic autonomy at the battle of Chæronea. For the history of Greek religion, as of Greek culture, it is of the highest interest, being the richest in respect of religious monuments and literature, and the most forceful and momentous in regard to the influences at work. In the sphere of external history, it witnessed such world-crises as the struggle of Hellenism against barbarism, the rise and fall of the Imperial city-State, and the emergence of Macedon as a world-power; in the sphere of culture, it witnessed the culmination of the greatest plastic art of the world, the bloom and maturity of the Attic drama and Pindar's lyric, the diffusion of education and the spirit of inquiry through the activity of the Sophists, and the higher development of philosophy and science. To show how the religious practice and theory of the higher and lower members of Hellenic society were affected by the great events and achievements of this greatest period of human history is a necessary, but a difficult, task.

I. 5th century religion contrasted with the Homeric.—If we take Athens as the typical religious community of the 5th cent., and compare the structure and forms of her State-polytheism with that of the old Homeric world, we find the personalities of the pre-historic pantheon still worshipped and cherished; no cult of that epic world had as yet fallen into desuetude; nor had the most civilized city of Hellas discarded the immemorial rites of the simple peasant religion, the worship of rivers and streams, and some of the most naive practices of Animism. And it is clear that this conservatism was no hieratic convention, but a living faith, expressing a religious intuition of the people, who were as yet untouched by the cooling influences of science and philosophic scepticism. In fact, for the greater part of the 5th cent. the life of the polytheism was probably stronger than it had ever been in the past. It was strengthened by the admission of a few new figures and by the development of some of the old.⁷

⁷ Pan came in from Arcadia at the beginning of this century (see *CGS* v. 481), Asklepios with his circle from Epidaurus at the close.

It is rather in respect of its spirit, tone, and outlook that the religion of the 5th cent. presents some striking contrasts to the Homeric. Its anthropomorphism is even more pronounced, thanks to its great art-power; but it reveals a deeper conviction concerning the part played by moral agencies and powers in the affairs of men. The writings of Herodotus expound a religious view of history, of which only faint indications were found in the earlier epic literature. The historian of the 5th cent. regards the momentous contest of Greece with Persia as a conflict of moral forces, the issue being worked out by unseen powers such as Nemesis, Violence, and Justice, with Zeus as the righteous Judge; and, in weaving into his narrative the stories of Aiakid heroes and the Eleusinian deities speeding to the help of the Hellenes at Salamis, he doubtless represents the faith of the average Greek. A similar view was also impressed on the religious imagination of the people by oracular utterances, such as that which was imputed to the prophet Bakis—*δία Δίκη σφέσσει κρατερὸν Κόρον, Τῆβρις υἱὸς*¹—and is expressed pictorially on the famous vase at Naples representing Hellas and Asia pleading their cause before the High God with Ἀδρῆ, 'Deceit,' as a tempting demon standing by Asia.² In this scene we trace also the influence of the famous tragedy of Æschylus, the *Persæ*, which in more than one passage of deep religious conviction pronounces moral judgment on the great event.³ The same view is expressed and the same tone heard in the striking poem of Pindar's eighth Pythian ode, where he exults over the triumph of 'Hesychia,' the armed Peace of Hellas, who has cast insolence into the sea, even as Zeus quelled the monster Typhoeus.

2. Pan-Hellenism.—The Hellenic confederate effort against Persia was the nearest approach ever made by the Hellenic race to Pan-Hellenic action; and in a striking chapter of Herodotus, eulogizing the loyalty of the Athenians to the cause of Greece, emphasis is laid on the name of Zeus Hellenios.⁴ This is the highest political title of the High God; and its history is interesting. Originally the narrow tribal name of the god of the Hellenes, a small Thessalian group under the leadership of the Aiakidai, it was transported to Aigina by a migration of the same tribe, whose ancestor Aiakos was the high priest of Zeus Hellenios; already in the 6th cent., when the denotation of Hellas was enlarged, the title may have taken on a wider meaning. But it was the danger of the Persian wars and the part played in them—we may believe—by the men and the old heroes of Aigina that brought the cult into prominence, investing the cult-name with a wider significance and a more potent appeal. Here, then, was Hellenic religion giving voice to an ideal that might be realized by the poet, the artist, and the thinker, but never by any statesman or State.

Another cult belonging to the same range as this was that of Zeus Eleutherios, the god of Hellenic freedom. 'Having driven out the Persian, they raised an altar to Zeus the god of the free, a fair monument of freedom for Hellas.'⁵ These lines of Simonides commemorate the dedication of the Greeks after the victory at Plataea, when they had purified the land and its shrine from the polluting presence of the barbarian by means of sacred fire brought from Delphi. The significance of this has been pointed out elsewhere by the present writer;⁶ the fight for liberty was prompted by more than a mere secular passion, by an idea inherent in the

civic religion. The title 'Eleutherios is known before the Persian wars only in the Zeus-worship of Laconia; henceforth it was widely diffused, commemorating not only the deliverance of Greece from the barbarian, but, in Sicily for instance, emancipation from the domestic tyrant.

In contrast with the deterioration of the old Roman religion caused by the Hannibalic wars, the successful struggle of Greece against barbarism in the East and the West undoubtedly quickened for a time the fervour and devotion inspired by the national cults. The sufferings of Hellas were easily repaired; the gods in whom they had trusted had not failed them, and much of the spoils won from the barbarian was gratefully dedicated to the embellishment of the shrines. The vacillating and time-serving policy of Delphi at the hour of the greatest peril was condoned or unnoted by the victors, and Apollo received an ample share of the fruits of victory. The champions of Hellenism in the West, Gelo and Hiero, commemorated their victories over the Carthaginian and Etruscan powers at Himera and Kyme by thank-offerings sent to Apollo at Delphi and Zeus at Olympia. The bronze helmet found at Olympia and now in the British Museum, inscribed with the simple dedication, 'Hieron the son of Deinomenes and the Syracusans send Tuscan spoils to Zeus from Kyme,' is an epoch-marking monument of Pan-Hellenic history and religion. The gratitude of Hellas was paid in the first instance to the high god Zeus: to him was consecrated the 'feast of freedom' at Plataea, which was still commemorated with pathetic fervour even in the last days of Hellenic decay;¹ to him, under the national title of Olympios, was dedicated the mighty temple at Akragas from the spoils won by Gelo at Himera. But the outflow of national thankfulness was directed to other divinities as well—notably and naturally to the war-goddess of the Athenians; and the spoils of Persia at Athens and Plataea were partly devoted to the erection of two striking statues of Athena. Nor were the lesser powers of the elements forgotten—the winds that assisted the Greek fleet at Artemision and the nymphs of the soil on which the battle of Plataea was fought; the grateful Athenians instituted a cult of Boreas, their kinsman, in their restored city, and assisted in the worship of the Nymphs at Kithairon.

The Arcadian goatherd-god, the rustic Pan, was admitted into Athens shortly before the battle of Marathon, and the story to which the Athenians gave currency of the help he rendered them at the great battle contributed something, no doubt, to the subsequent diffusion of his cult. A further religious consequence of these great events was the stimulus given to hero-worship; Gelo, the victor at Himera, and some of the Hellenes who fell at Thermopylae, Marathon, and Plataea, received heroic honours. This 'heroizing' of the recently defunct had its moral value as a strong stimulus to patriotism, when they had died in the service of their country; and, though it was degraded in the 5th cent. to the exaltation of the useless athlete, yet it must be reckoned among the life-forces of later polytheism and as a momentous factor of higher religious history.

Finally, we may with probability ascribe to the triumph of Hellas and to the expanding glory and greatness of Athens a marked increase in the Hellenic popularity of the Eleusinian mysteries. For this the Athenians might thank Herodotus, and his thrilling narrative of the vision of a heavenly host seen moving from Eleusis towards Salamis for the salvation of Hellas; they might also thank their own far-sighted policy of encouraging the whole Hellenic world to take part in the worship

at Eleusis, aspiring thus to make the Hall of the Mysteries, a recent architectural work of the Periclean administration, the centre of a Pan-Hellenic faith.¹ And their attempt in great measure succeeded.

3. Influence of religious art.—The study of the polytheism of this century is essentially also a study of the great religious art which culminated under Pheidias, but which continued forceful and prolific till the age of Alexander. The general effect of the iconic art upon Greek religion has been briefly indicated above; and long before this century the religious bias of the race was committed to idolatry;² the people craved an image that they could love and cherish, though here and there they might retain the uncouth fetish, the block of wood or rudely-hewn stone, because of the immemorial magic which it had acquired through ages of shy, half-savage veneration. The achievement of Pheidias and his contemporaries was only the culmination of a process of ideal anthropomorphism that began with Homer and was helped forward by the lyric poetry and music of the post-Homeric age, and by the art of the 6th century. Strictly estimated and studied in all its fullness, in the marvellous products of vase-painting, glyptic, and sculpture which even the shattered fabric of antiquity presents to us, the art of the 5th and early 4th centuries must be called the most perfect religious art of the world. A more spiritual or more mystic religion could not have produced or could not have borne with such an art. But it was the best and most satisfying expression of the best that the religious spirit of Hellenism admitted; for this polytheism had been built up by the teachers of the people—poets and artists obeying the race-instinct—not on vague conceptions of infinite godhead ineffable for art and inexpressible in clear speech, but on vivid perceptions of concrete divine personages, distinct in form, attributes, and character, robust and very real. The Greek artist, with his miraculous cunning of hand, could deal with these types as he could not have dealt with 'the Word' or with 'the Buddha.' Nor was he merely the exponent of the highest popular imagination, but, unconsciously perhaps and in obedience to a true art-tradition, at times a reformer and in any case a creator. For his works have this value among others that, even more than the poetic literature, they reveal to us how the people at their best imagined their deities. But they also helped the people to imagine them better and more nobly. Perhaps the earliest art of Hellas that takes rank among the works of high religious inspiration is seen in the Attic vase-paintings produced near to 500 B.C. that portray the *thiasos* of Dionysos. The strong spirit of that religion which lifted the votary above the conventional, moral, human life, the wild joy of self-abandonment, the ecstasy of communion with God—all are here more startlingly expressed than even in the lyrics of the *Bacchæ* of Euripides or in the single perfect Bacchic ode of Sophocles' *Antigone*. It was not till the time of Skopas in the 4th cent. that Greek sculpture could so deal with this orgiastic theme. The glyptic work of the 5th cent. dealing with divine forms is mainly tranquil, majestic, ethical, intellectual; the physical perfection of the divinities sculptured on the Parthenon impresses us not so much with the sense of physical beauty and strength as with the sense of a higher and nobler vital power, so instinct is the beauty with that quality which the Greeks called *εὐπρόσπετος*—a quality partly ethical, partly spiritual, but palpable in material forms which hint at a tranquil reserve of strength. The expressive power of such an art can show benignity and mildness

¹ See CGS iii. 156 f.

² See above, p. 403.

of mood without sentimentality, beauty without voluptuousness, intellectual thought without morbidness, majesty without self-display.

The gentle and tranquillizing spirit of the Eleusinian mysteries speaks in the famous Eleusinian relief showing the Mother and the Maid giving his mission to Triptolemos. The Pheidian Athene Parthenos was a more deeply conceived ideal than the Athene of the poets, for it showed her as the Madonna of the Athenian people, with a softer touch of maternal gentleness in the face. The Zeus Olympios of Pheidias transcended the portrait of the High God as given by Homer or even by Æschylus; for the chryselephantine statue impressed the later Greeks as the ideal of the benign and friendly deity, the divine patron of a Hellas united and at peace with itself—an image that appeared 'to add something to the traditional religion,'³ embodying, as Dio Chrysostom says, a conception of the god so convincing and complete that, 'having once seen it, one could not imagine him otherwise.'⁴ Nor had any of the poets presented Hera in forms so winning and gracious as those in which the best art of this age embodied her, as the Argive goddess 'of good works,' 'in whose face and person brightness appeared by the side of majesty.'⁵ The poetic presentation of Apollo is blurred and incomplete compared with such plastic types as the Apollo of the Parthenon frieze and the Pheidian statue in the Museo delle Terme. The older poetic ideal of Aphrodite was shallow and trite compared with the Aphrodite of the Pheidian type, such as we see presented by the Laborde head in the Louvre; here is something of the majesty of the great cosmic goddess imagined by Æschylus in his *Danaides*, but combined with an emotion of human love in the countenance, and a winning appeal that the verses of the great poet do not clearly convey. And we may surmise that the *Οὐρανία* Aphrodite of Pheidias had some influence on the theory of Plato and his distinction between the heavenly and the sensual love. The full imagination of the personality of Kore would combine the radiance and the grace of the young cornfield with the awe and mystery of the lower world: the former is masterfully presented by a coin of Lampeakos, which shows her rising from among the cornstalks with uplifted, yearning face;⁶ and the unknown artist of the great Syracusan medallion struck towards the close of the 5th cent. combines this aspect of her, in a type of surpassing loveliness, with a touch of melancholy that hints at the character of the goddess of Death.⁷

And yet this triumphant anthropomorphic art must have failed, and, judged by the fragments that survive, did fail, when it tried to reveal in clear outline and full light the half-shrouded forms of the nether world, the chthonian goddesses and the Eumenides whose nature appealed to the sense of religious awe, to what the Greeks called *τὸ φοβερόν*, and did not brook to be wholly revealed. We may doubt, therefore, if even the Holy Ones, the Semnai, of Kalamis and Skopas were types so expressive of the real moral-religious imagination which fashioned these figures of cult as were certain awe-struck verses of Sophocles in the *Œdipus Coloneus*. Nevertheless, this ideal Greek art, by expressing in palpable forms of benign beauty the half-palpable personages of the lower world, did one service to religion and the religious imagination: it banished the uncouth and the terrible, and helped to purge and tranquillize the Greek mind by investing the chthonian powers with benevolence and grace. We discern here the influence of the Bacchic and

Demeter mysteries working upon the artist, and through the artist upon the popular faith. That the average Greek of the classic period was saved from the vampire terrors that J. C. Lawson has discovered in Modern Greece¹ was due equally to the religion and to the art that he saw around him.

Apart from this special fact, a phenomenon so momentous in the spiritual world as the flowering of this religious art in the 5th cent. claims prominent notice even in the slightest sketch of the whole history of Greek religion; for it must have worked an effect, which no student of insight would be tempted to belittle, upon the religious mood and thought of the people. Greek records sufficiently attest its religious working; even the alien Roman, Æmilius Paulus, when he approached the Pheidias masterpiece of Zeus Olympios, felt the thrill of the 'real presence.'² When Aristophanes fervently calls on Athene as 'the Maiden who holdeth our city in her hand and alone hath visible power and might, and is called the Warder of the Gate,'³ he is thinking of the bronze statue carved by Pheidias and set 'to guard the entrance to the Akropolis.

It is impossible, then, that this beautiful idolatry, against which the philosophers might occasionally protest,⁴ could have weakened the popular faith in the native deities. Introduced suddenly into Rome, it helped to destroy the old Roman animistic religion. But the religious instinct and history of Greece were wholly different from those of Rome. Greek polytheism would probably have perished or been absorbed by alien systems of cult far sooner than it was, if Greek art had not fortified and ennobled it, rooting it deeply in the æsthetic-religious emotions and perceptions of the people.

4. Influence of literature; Pindar, Æschylus, Sophocles.—More familiar, and apparently more answerable, is the question concerning the influence of the poetic masterpieces of this period, the works of Pindar and the Attic drama, on the general history of Greek religion. The subject is obviously too complex for the scope of this article, and has been handled by many scholars in large treatises. There is room here only for the most general statement of facts, tendencies, and effects. As exponents of the highest contemporary religious thought, the names of Pindar, Æschylus, Sophocles, and Euripides are those of prime authority. It is easy and interesting to collect religious citations from their works, and to compare these one with another, and with the current polytheism. It is far more difficult to decide, generally and in regard to any special point, how far any one of them could have influenced or modified the popular religion. Nor are all these four on the same footing in respect of opportunity. For Pindar writes for dynasts and aristocrats, and, being a hireling, might be thought fettered in the free expression of his sentiments; and in any case his public was more limited than that which the three dramatists addressed. Their message, therefore, was likely to reach further and to penetrate the Greek mind more deeply than anything that Pindar had to say; and that this was actually the case can be proved. Nevertheless, Pindar must be reckoned with as an original thinker who spoke words of power; in spite of his profession, his mind remained imperial and free; and in his attitude to the public religion he is to be grouped with Æschylus and Sophocles; and all three stand together and apart from Euripides. All three show the virility, the mental tranquillity combined with imagination and audacity,

that marked the typical character of the greatest age of Hellas. And all three genially and without querulous protest, though with some freedom of criticism, accept the existing religious order, desiring to ennoble it, not to destroy it. Pindar himself was the establisher of certain new cults, and the first great literary preacher in Greece of Orphic eschatology, and, we may say, the first great poet in Europe who raised the theme of Paradise to the level of the highest poetry. Such a marvel of song on the mysteries of life and death as the second Olympian ode was a new voice in Hellas; how far it echoed, and with what influence on the faith of the people, is impossible to measure with accuracy. For the progress of this new eschatology, which is a weighty subject for the history of later Hellenism, we have some important negative evidence in the fact that neither Æschylus nor Sophocles shows any knowledge of Orphism or interest in it, or any pre-occupying concern with the state of the soul after death; nor in their occasional utterances concerning posthumous judgment do they go beyond the popular traditional view; though the thoughtful refinement of Sophocles suggested to him that there might be forgiveness of sins and reconciliation after death.⁵ Nor do we find anywhere in the works of the two dramatists any hint of that pregnant Orphic doctrine to which Pindar gives voice, that humanity is of Divine origin—*ἐν ἀνδρῶν ἐν θεῶν γένος*,—a doctrine which passed into the higher thought of later Greece.

Leaving aside this special question, we find a certain general resemblance in the religious view of these earlier poets of the 5th century. All three preach the supremacy of Zeus, his omnipotence and perfect justice, while Sophocles lays stress on his mercy. The effect of this poetic message was probably great, and certainly timely; for the growing power and frequency of hero-cult, which Pindar himself and the dramatists indirectly encouraged, was a danger to the higher religion; and the backward and less cultured Hellenes were doubtless liable to the propensity of the savage mind to prefer the worship of the local *daimon* to that of the high god. Against such degeneracy the works of the greatest 5th cent. poets, like the masterpiece of the greatest 5th cent. sculptor, served at least as an enduring protest in Hellas. It would be of interest to consider how far the sculptor, in regard to the general conception of his mighty theme and in the choice of mythic bywork whereby he made it articulate, drew certain suggestions from the poetry of Æschylus.

These poets also deal with the question of Fate and Destiny. The personal *Moira* was an old, though insignificant, figure of the popular religion and mythology; Homer is aware of her and has to reckon with her. She might become more formidable under the philosophic conception of *ἡ ἐλευθερία*, which appeared in the philosophy of Herakleitos; and we know that later philosophy and cultivated thought were much perplexed over the problem of the reconciliation of Fate with the idea of a free divine Providence. These poets, taking their cue from Homer, 'follow a short cut,' interpreting *Moira* as the voice or agent or 'emanation of the power' of Zeus.⁶ The pupil of Pheidias, Theokosmos of Megara, was working out the same idea when he carved the Fates with the Hours as subordinate adjuncts to the great form of Zeus.⁷

¹ *Antiq.* 521.

² The *Prometheus Vinctus* of Æschylus expresses indeed a view of Zeus that conflicts with the higher religious thought of the poet. But Æschylus has here taken up a crude story that he cannot wholly moralise. On the other hand, his handling of the idea of the curse in the house of Pelops is not worked out on the lines of mechanical fatalism. Cf., further, art. *Fate* (Greek and Roman).

⁴ *Modern Greek Folklore and Ancient Greek Religion*, Cambridge, 1910.

⁵ *Ivry*, xiv. 28.

⁶ *Theophrastus*, 1186 ff.

⁷ Xenophanes' protest in the 6th cent. is the most noticeable (Clem. *Strom.* v. pp. 714, 715 P); the Stoic theory of Zeno condemned the erection of temples as well as idols (*ib.* p. 691 P).

We may say, then, that both the poetry and the art of this period worked for the deliverance of the polytheism from the burden of fatalism, which tends to lower the value of all theistic religion.

Again, each of these poets, while accepting and in certain points purifying the traditional polytheism, was capable of religious thought that worked on other lines than anthropomorphism. The high god Zeus is generally for them a definite personal Being; but once at least Æschylus transcends this apprehension of him, and defines Zeus pantheistically as a supreme, cosmic force; a fragment of his *Heliades* speaks of him thus: 'Zeus is air, earth, heaven; Zeus is the whole of things, and whatsoever is higher still than these.' Moreover, the other divine forces that shape our lives are presented by him and his fellow-poets not always as *deoi* but as moral powers that are only half-personal, not as concrete individual deities but as emanations of these. We may call them 'personifications of moral ideas,' and some are no more than what this phrase implies, such as those, for instance, with which Euripides capriciously plays. But some may rather be described as the soul-powers of the High God, like in some ways to the Persian *Fravashis*; such are Pindar's *Σόρεια Διὸς* *Σελίου* *Θέμυς*,¹ the *Δίκη* of Æschylus, 'Justice the maiden daughter of God,'² who 'shines in the poor man's smoke-dimmed cabin,'³ and, in the verse of Sophocles,⁴ Mercy who 'shares the throne of God to deal with all the deeds of men.' While Pindar's genius inclines to the brighter of these emanations, Æschylus broods rather over the gloomy forces of the shadowy world, which he might at times be constrained to present in palpable concrete form for stage purposes, and yet his own deeper thought could grasp as half-outlined spiritual powers, not the less real because impalpable. The ordinary Hellene in his religious perceptions laid too much stress on personal individuality, as if this were the only criterion of ideal reality: from his point of view, if Eros was to be a real force of the spiritual world, then Eros must be imagined as a beautiful youth. But Kypri or Aphrodite in a striking Sophoclean fragment is no longer presented as a personal goddess but as a diffused pantheistic force.⁵ And the Attic drama may have enlarged the mental outlook of the succeeding generations in this matter; for the author of the speech against Aristogeiton in the 4th cent. must have been sure that his audience would understand him when he said: 'All mankind have altars dedicated to Justice, Law-abidingness, Pity, the fairest and holiest (being those) in the very soul and the nature of each individual.'⁶ This is just how Euripides might speak.

The great 5th cent. poets were all moralists, each in his own way. The history of Greek ethics concerns us only at the several points where it touches religion; and to this history, both generally and on its religious side, the works of Pindar and the three dramatists make important contributions. Of special interest is their attitude to Greek mythology, which, in spite of its general brightness and beauty, seriously needed in parts the puritanical reformer, if it was to be harmonized with the higher religious thought. But none of these poets, not even the grave Æschylus, was willing to undertake such a rôle. Pindar of all the three comes nearest to preaching, for his *métier* allowed him more personal freedom of comment. We find him anticipating Plato in his protests against some grotesque and repulsive stories such as the cannibalism of the gods in the myth of

Pelops, or blasphemous stories such as the theomachies and the combats of heroes against divinities: 'Let all war and strife stand far apart from the immortals'¹ is a good sententious maxim for the expurgation of Greek mythology and for the enrichment of Greek ethico-religious thought. But neither Pindar nor the two older dramatists protest against the more licentious myths, and they accept at need various legends about the amours of the gods. In fact, the axiom that sexual purity was an essential attribute of all divinity was not yet accepted by the higher thought of Greece.

Pindar's freedom and sense of irresponsibility in regard to myths has a certain value, in that it shows that the futilities and improprieties of mythology—the 'unhappy stories of bards'—were not necessarily a burden on the stronger religious minds of Hellas, and that they could be gently excised from the polytheism without endangering the popular worship and faith, which in the main were independent of them.

As for the two dramatists, Pindar's contemporaries, mythology was their public business; and they accepted it genially because they were not in the first place moral teachers but dramatists; it did not, therefore, occur to them to protest or violently to reform. But they might select, discard, and re-shape; they could take the great legends of the past—legends of Thebes, the story of the Niobids, of Prometheus, the death of Ajax—all of them irreconcilable in parts with higher morality and religion, and invest them with as much morality as the tradition admitted. This they did with force and subtlety. And generally the moral spirit and imagination of Æschylus and Sophocles must be counted among the spiritual facts of this period with which the history of Greek ethics and religion must deal. Doubtless the older and robust poet was the stronger moral and religious force: his protests against the superstitious doctrine of Nemesis, his profound utterances concerning moral responsibility and the moral continuity that links our lives and actions, his discovery that suffering brings wisdom—these are landmarks in the ethical story of Greece; while with Sophocles the conviction is no less deep of the eternity and divinity of the moral law. They were the last spokesmen of a civic-imperial system with a civic religion and morality that had not yet passed its zenith. Cf., further, artt. *ÆSCHYLUS*, *SOPHOCLES*.

5. Euripides.—The part played by Euripides in this spiritual history of Hellas was wholly different. Younger contemporary of Sophocles as he was, he seems to belong to a different age. In his work and thought is reflected far more vividly than in the older poets of the same century the new mental life which was fostered by the philosophers and the sophists. The influence of the physical speculations of the 6th cent. and of those of Demokritos and Anaxagoras of the 5th, which at some points advanced further in materialism, had had time to penetrate the more gifted minds and to compel the public to a certain attention. The paid 'sophist,' the pioneer of modern education and the first champion of the critical spirit, was travelling around. And after 470 B.C. the imperial greatness of Athens had begun to attract the greatest teachers and thinkers of the age. It was of great moment for Euripides that such men as Anaxagoras and Protagoras were active in Athens for many years, and that he had enjoyed familiar intercourse with them, as he also enjoyed with Socrates. It is clear that the poet imbibed deeply their teaching and their spirit; he was also learned in Orphism, antiquarianism, and remote folklore. Being by nature a great poet, he had also something of the weak-

ness of the 'polymath' or the 'intellectual'; he had not the steadiness of brain or strong conviction enough to evolve a systematic philosophy or clear religious faith; his was, in fact, the stimulating, eager, critical spirit, not the constructive. His mental sympathies and interests shift and range from pole to pole. He is a secularist in his view of a physical universe, and he foreshadows a secular treatment of ethics based on ideas of *phôvus* and heredity—though a chorus of his maidens may praise chastity as 'the fairest gift of the gods.' It was, therefore, possible, though most unjust, that Aristophanes should call him an atheist. On the other hand, he is capable of profound religious sentiment and exalted religious utterance, and strikes out flashes of light that might kindle and illuminate a higher religion. Therefore it was possible for Clement of Alexandria to find in some of his words a foreshadowing of Christ.¹ He remains for us an enigma, and probably no final judgment will ever be pronounced upon him, in which we shall all agree. But the student of Greek religion must confront these two questions about him: (a) What was his real sentiment concerning the popular religion? (b) What were his contributions to religious thought, and what was likely to be his influence on the religious temperament of his audience and readers? To make up one's mind on these questions demands a long and critical study, also a tactful sense of the distinction between Euripides the playwright and Euripides the thinker. It is the confusion of this distinction that leads, for instance, to the strangely erroneous views held concerning the religious significance of his *Bacchæ*. A sympathetic reading of many of the plays must convey the impression that certain cult-figures and legends of the polytheism filled the poet with scorn and loathing; and at times he seems to compose as if he had a personal hatred of Apollo and Aphrodite in particular, for instance in the *Ion* and *Hippolytus*. When he can interpret Aphrodite as a cosmic force, he can dilate on this as beautifully and ardently as Lucretius; if he could have believed that Apollo was merely the sun, as he tells us 'the wise' were well aware, he might have forgiven him. But it is the real personal Aphrodite of Homer and Helen, the personal Apollo, the father of Ion, the seducer of Kreusa but the beloved ancestor of the Athenians, that rankle in his mind. When he handles the story of the madness of Herakles and brings Madness on the stage, he uses her first as his mouthpiece to convey to the Athenians what he thought of Hera;² just as he puts into the mouth of Amphytrion his own mordant criticism of the action of Zeus.³ Yet with other parts of the polytheism he seems at times in the most glowing sympathy: in the *Hippolytus*, for instance, where he expresses for the first time in literature the religious rapture of purity; in the *Bacchæ*, where he discovers the necessary phrase for the expression of the Bacchic communion, for the ecstasy of the Mænad revel on the mountain, in verses that tingle with the nature-magic that was at the root of this wild cult. Yet no one should be deceived into thinking that he is preaching the cause of Dionysiac worship; for the *Bacchæ* closes with that depressing anticlimax, where Dionysos plays the sorriest part, and Euripides' own sour dislike of the personal traditional god gives an unpleasant flavour to the last scene. It is this bitterness of protestantism and criticism in this poet that strikes a new note in Greece; and Euripides may be regarded as the first in European history to be possessed with the theologic temper. It cannot be said that he preached a new religion: he was no votary even of Orphism; for, though, as the *Bacchæ* and the fragment of his *Cretans*

attest, he felt something of its spell, he was not of that cast of mind which could be deceived by its pharisaic ritual and laws of diet, and he certainly cherished no mystic belief concerning the life after death. Nor can he be truly described as a zealous reformer of the people's faith and practice: for the reformer must have some belief in that which he wishes to reform, and that Euripides firmly believed in any part of the polytheism is hard to maintain; his final attitude is generally a doubt. Nevertheless, his protests might have been of value to the more cultured citizen who still clung to his civic worship. They are directed mainly and most forcibly against the stories of divine vindictiveness and divine licentiousness. He is evidently touched with the new idea that vengeance is alien to the perfect nature of God; this was still more insistently proclaimed by the Pythagoreans, by Plato, and later philosophers.⁴ On the second count his protest is suggested by the notion that was dawning in him that purity in every sense was essential to the divine nature; he is then the herald in literature of a thought which Orphism may have prompted, and which was to play a leading part in later religion and religious speculation, but which was unfamiliar to his contemporaries either in Hellas or anywhere in the Mediterranean except in Israel. His leading principle of criticism in all these matters is expressed in the *Iphigenia in Tauris*, namely, that the evil in religious practice and legend arises from men imputing their own evil nature to God.⁵ We owe much to the man who first uttered this warning against a debasing anthropomorphism.

The immoral elements in Greek mythology, which have been constantly reprobated by ancient and modern writers, have often blinded them to the fact that Greek religion in its forms of worship and sacred formulae was mainly pure and refined. The stories about the gods, often of the type natural to savage folklore, did not constitute ancient religion; and they were the less able to choke the growth of a higher ethical-religious spirit in that they were not enshrined in sacred books that could speak with authority to the people. Yet we have not infrequent proofs in Greek literature, notably in Plato's *Euthyphron*, that they might exercise at times an immoral influence on men's conduct. Meantime the educational movement in the 6th and 5th centuries had awakened men's minds to the importance of the moral question in literature. And the protests of Euripides are developed by Plato in his scheme of education in the *Republic*; and the same moral point of view prompts him to his puritanical legislation against poets. Such moral movements in the polytheistic societies of Greece are interesting to mark, though their effect is often difficult to estimate. The new puritanical spirit had probably a wholesome influence on the more cultured minds; it had little influence on the mass of the people, nor does the later poetry of the Hellenistic period show much trace of it.

As regards the actual forms of Greek ritual and worship, Euripides has nothing revolutionary to say. He appears to have a strong dislike for prophets, and in this he was in some accord with Æschylus, Sophocles, and the Athenian people. He shows great distrust for Delphi; and its influence was doubtless impaired at Athens during the Peloponnesian war. He protests against human sacrifice, as a barbaric and non-Hellenic institution;⁶ and on one occasion the speaker argues that the gods need nothing from mortals at all:⁷ the thought was suggested merely by dramatic exigencies; and Euripides nowhere attempts a crusade

against the value of sacrifice in general. He has only one important thing to say about it, namely, that the small sacrifice of the pious often outweighs the hecatomb.¹ This thought implies a more spiritual view of the divine nature, and is not infrequently expressed in the later literature; according to Theophrastos and Theopompas, this higher view of sacrifice was even encouraged by the Delphic oracle.²

There is much, indeed, in the sententious poetry of Euripides that might have elevated and cleared the religious thoughts of his age; but it is doubtful if his ultimate conception of godhead, as it tends towards pantheism, could have been reconciled with the anthropomorphic polytheism of the people, or if those most conversant with his tone and inspired by his spirit could have remained long in sympathy with orthodoxy. And there is an instinct in Euripides which enhances his value for the modern man, but which in the long run was to be subversive of the old civic religion, namely, the humanitarian or cosmopolitan instinct—that which allowed him to sympathize with Trojans, women, children, and slaves, which inspired him with the beautiful thought that 'the whole earth is the good man's fatherland,'³ which prompted him to despise the life of civic duty and activity, and to recommend, as Aristotle does, the secluded and contemplative life. The further development of this cosmopolitan spirit and its effect on the old civic religion will be noted below.

It has been necessary to dwell so long on Euripides, not only for the reasons mentioned above, but also because, owing to the vogue that he won in his lifetime and that was greatly to increase after his death, he more than any other of the great men of letters must be regarded as the popularizer of the new enlightenment. Cf., further, art. EURIPIDES.

6. Influence of the new enlightenment on the popular religion.—Whether Euripides individually exercised any immediate religious influence upon the popular mind, either for good or for harm, is not easy to decide with precision; for there were other exponents than he of the same freer and more advanced thought which began to express itself early in the 6th century. As a result, we are able to discern the religious view of human life and conduct becoming what we should term more spiritual, more inward. The moral judgment begins to look to the soul or the inner principle; the doctrine begins to be proclaimed that God as a spiritual power can read the heart of man, and judges him by that; that sin lies not in the external act alone; that external ritualistic purity is of less avail than purity of soul. Such thoughts as these, which could serve as the foundation-stones of a new religion, and which helped to shape the later religious history of Europe, were mainly a heritage from the speculation of the 6th cent., and were in the air of the 5th. We cannot think that they were confined to the philosophic circles until Euripides gave them publicity; for the notable oracle quoted and commented on by Herodotus had proclaimed to the people the novel view that a sinful purpose was the same in the sight of God as a sinful act;⁴ Epicharmos had preached the higher ideal of purity: 'If thou art pure in mind, thou art pure in thy whole body.'⁵ It was perhaps in the latter part of the 5th cent. that some rhetorician of the school of Gorgias interpolated the poem of Hesiod's *Works and Days*, which reveals an exalted view of the High God.⁶

We may believe, then, that this higher religious ethic had a certain elevating influence on the popular imagination. The question of immediate interest is whether we can trace any effects of this in actual worship. Did the new enlightenment, for instance, lead to the abolition or reform of cruel or impure forms of ritual?

7. Human sacrifice.—This question involves the consideration of the practice of human sacrifice, which had certainly been prevalent in pre-historic and early historic Greece, as in other Mediterranean communities. We have evidence that in the 5th and 4th centuries the practice was of rare occurrence in the Greek societies, and was repugnant to the religious morality of all but the most backward.⁷ The Platonic dialogue of the *Minos* contrasts the Greeks with the barbarians in this matter, yet implies that the Arcadians in the cult of Zeus Lykaeos and the men of Halos in that of Zeus Laphystios⁸ continued the cruel offerings which disgraced their Hellenism. Euripides attests that the human sacrifice once customary in the rites of Artemis near Brauron had been, before his day, transformed to a mere fiction.⁹ The Locrian sacrifice of the maidens to appease the wrath of Athena Ilios fell into desuetude in the 4th cent. B.C.,¹⁰ and at some time earlier than this the Athenians must have ceased to immolate the *phagaxoi* in their *Thargelia*.¹¹ The Rhodians eased their consciences, and at the same time maintained their immemorial rite, by choosing as a human victim to Kronos¹² a malefactor who had been condemned to death. According to Porphyry, the practice survived here and there under the Roman Empire until the time of Hadrian.¹³

But the better sentiment of Greece had probably begun to work as early as the time of Homer;¹⁴ for certain legends concerning the abolition of this ritual and the substitution of the animal for the human life point back to the pre-historic period; and the merciful reform in the ritual was ascribed to the High God himself in a Laconian legend which closely resembles the story of the sacrifice of Isaac.¹⁵ The humanitarian spirit, then, had asserted itself before the 6th cent.; but doubtless the higher teaching and thinking of this and the succeeding age quickened its influence.

8. Phallic ritual.—As regards that element in Greek ritual which by modern taste is pronounced impure, there is little trace of any attempt at reform in any period of the polytheism. The element was indeed but slight. The forms of worship were, on the whole, decorous, often stately and beautiful; ancient legend reveals the anxious care of the early Hellenes to preserve their temples from any sexual defilement; where a *lepos ydmos*, or 'holy marriage,' was enacted in any of the shrines, there is no need to suspect any licentiousness.¹⁶ No such feature is discernible in the Eleusinian or other Hellenic mysteries, although the Christian Fathers are eager in their insinuations. The Hellenic cults of the Oriental Aphrodite were generally innocent¹⁷ of that ritual of temple-prostitution which was found in certain Anatolian cults, and which scandalized the Greek as much as the Christian writers; the few impure titles attaching

¹ The feeling about the sacrifice of Iphigenia manifested in the *Agamemnon* of Æschylus and the story about the Boeotian generals, and the sacrifice of a maiden before the battle of Leuktra (Ptolemy, *Vit. Pelop.* 21 f.), are sufficient proof; cf. Eur. *Iph. Taur.* 391.

² Cf. Herod. vii. 197, who shows that the human sacrifice was rare and conditional.

to this goddess may well have arisen in the later period of the decadent polytheism.¹ In the early ages, it is clear, the wholesome and temperate influence of the Hellenic spirit had worked upon the forms of the polytheism. Nevertheless, in the ritual of a few divinities—Demeter, Hermes, Dionysos, and even Artemis herself²—sexual emblems were occasionally in vogue, and dances of a more or less licentious character are mentioned, though these are very rare; while in the Thesmophoria and other services of Demeter, what was called *αἰσχρολογία*, indecent and scurrilous badinage, was indulged in by the women among themselves, or more rarely with the men also. We note that such ritual is practically confined to vegetation-cults, and in some it is merely vegetation-magic, hardly attaching to the divinity, or affecting his or her moral aspect. The phallic emblem and the procession called the *φαλλογῶγια* or *φαλλοφορία* were specially associated with Dionysos and Hermes; and Plutarch, a man of more than average culture and refinement, and strikingly susceptible to the spiritual influences of the more mystic religions, describes it as a harmless adjunct of the ancestral and cheerful Dionysiac ritual of the Boeotian peasant.³ Now, it is worth noting that against this element in Greek ritual there is scarcely a word of protest in all the ethical and philosophic literature of Greece. The exception is only a fragmentary utterance of Herakleitos, in which he rails against the phallic procession of Dionysos; but the exact sense of his words is not quite clear.⁴ The higher moral thought of Greece on this matter is probably more nearly represented in the utterance of Aristotle in the *Politics*,⁵ where he lays down austere rules for the training of the young:

'No impure emblem or painting or any representation of impropriety is to be allowed by the archons, except in the cults of those divinities to whom the law attaches the ritual of scurrility (*τρωταρῶς*); in their case the law allows those of more advanced age to perform the divine service in behalf of themselves, their children, and their wives.'

Even in the last three centuries before Christ, when greater stress was continually being laid upon purity in cult, no protest is heard against these old-world forms, which have maintained themselves in many parts of Europe down to the present day, in spite of the denunciations of Christianity. The seeming paradox is explained when we reflect that the idea of purity changes its content in the different generations; and, secondly, that the Hellenic, like all the other Mediterranean religions except the Hebraic, regarded the physical procreative power as belonging to the divine character and as part of his cosmic creative force; therefore an emblem that was secularly impure might be made holy by cult and consecration.

9. Survival of other primitive ritual.—There is much besides in old Greek ritual that appears to us harmless, but uncouth and irrational; strange and naive things were done that primitive ideas of magic and animism inspired; and one may be surprised to find that the higher culture of the 5th and succeeding centuries is not known to have suppressed a single one of these. Still in the time of Theophrastos, and indefinitely later, the Athenians were capable of the quaint old-world ritual of the *Bouphonia*, that strange medley of ritual, magic, and dramatic make-believe: 'in the time of Demosthenes⁷ they were capable of bringing up to judgment in the law-courts an axe or any other inanimate thing that had caused the death of a man or of the sacred ox, and solemnly condemning it to be thrown into the sea. The driving out of

sin or famine, incarnate in a human being, was a ceremony in vogue at Massilia,¹ and probably also at Athens long after the beginning of our era. Nor did the higher anthropomorphism, powerful as its working was, entirely obliterate the worship or half-worship of animals in the later centuries.² Even Zeus might still be conceived by the men of the 4th cent. as occasionally incarnate in the snake; we have noticed above a ritual law regulating the cult of Asklepios at Athens, composed shortly after 400 B.C., in which a sacrifice was ordered to certain sacred dogs; the pious votary would comply, however the act might awaken the laughter of a comic poet. Herakleitos protested against the absurdity of praying to idols; but no voice of the new enlightenment is heard against these far more irrational and backward ceremonies. The average public thought of the 5th cent. did not repudiate the use of magic; in fact, it is not till this century that its efficacy is known to have been recognized by legislation.³ And Plato, speaking about it in his *Laws*,⁴ a work of his declining years and intellect, is not sure whether he believes or disbelieves in its power. There is nothing more conservative than ritual; and Greece produced no ardent Protestant reformer. Therefore the average educated Athenian even of the 4th cent. would doubtless agree with the orator Lysias that 'it is prudent to maintain the same sacrifices as had been ordained by our ancestors who made our city great, if for no other reason than for the sake of the city's luck.'⁵

10. Strength of the traditional religion in the 5th century.—The question naturally occurs—Were the mass of the citizens touched at all in their inward theory of things by the spirit of modernism which breathed from Ionia and inspired the sophists? The culture which was the stock-in-trade of the latter was offered only to those who could pay; and upon these the poorer Athenian looked askance. He heard of it at first with a dislike that might become dangerous. Fanaticism, as we are familiar with it in the pages of European and some Semitic history, was happily alien to the Greek temperament. But the banishment of Anaxagoras and Protagoras and the execution of Socrates, by the city that was to become the school-mistress of Greece, might seem to savour somewhat of this temper of mind. These acts were not inspired solely by religious feelings; but they are clear proofs that the polytheism was by no means moribund and could be dangerous in its own defence. Nothing is more erroneous than the view, sometimes expressed, that the popular devotion to the old religion was abating and its divine personalities and forms were losing life and value towards the close of the 5th century. In their dark days the Athenians remained truer to their old faith than did Rome in her time of terror. We do not find Athens turning desperately for aid to alien Oriental cults. We hear, indeed, of the beginnings of Adonis-cult in the latter part of the Peloponnesian war—the first ripple of a wave of Orientalism that was to surge westward later. But this feminine excess was unauthorized, and Aristophanes hates it and mocks at it. The shallow view mentioned above would be sufficiently refuted by his comedy of the *Clouds*, in which he, the greatest genius of his time, poses as the champion of the reaction against modernism. It is refuted also by other incidents in Athenian history that fall within the last decades of this century; the rage of the people at the mutilation of the Hermai,

at the supposed insult to the Eleusinian Mysteries, at the neglect of the dead after the battle of Arginousai, may be evidence of morbid religiosity, and is surely inconsistent with a general prevalence of scepticism: in these episodes the whole people reveal a passionate attachment to their holy mysteries, to their quaint phallic Hermes-images on which the luck and the life of the State depended, to the duties of the loving tendance of the dead. Even their animistic beliefs concerning the common phenomena of the physical world had not yet been extirpated or purged by the physical philosophy of Ionia; for, according to Plato, it was still a dangerous paradox, which his Socrates disclaims before the jury, to maintain with Anaxagoras that the sun and the moon are merely material bodies and not in themselves divine. Intellectually, Nikias appears inferior to Homer's Hektor. It was Athens that produced in the 4th cent. 'the superstitious man' of Theophrastos; but it is right to bear in mind that she also produced the man who could so genially and tolerantly expose that character.

11. *Influence of comedy.*—Those who believe that the faith in the polytheism was falling into rapid decay by 400 B.C. sometimes quote by way of evidence the astonishing licence of Attic comedy in dealing with the divine personalities; the notorious example is the ludicrous figure and part of Dionysos in the *Frogs* of Aristophanes. Yet the people who enjoyed the humour of the play were more devoted to Dionysos than to most of the other persons of their pantheon. If the 'excellent fooling' of Aristophanes is a proof of popular unbelief, what shall we say of that Attic terra-cotta of the 6th cent. which represents the god half-asleep and half-drunk on the back of a mule and supported by an anxious Silenos? The present writer has suggested that 'this is some peasant's dedication, who feared his god little but loved him much, and treated him *en bon camarade*.'¹ Epicharmos in Sicily had been beforehand with Aristophanes in venturing on burlesque of divine actions, Hephaistos and Herakles specially lending themselves to ridiculous situations. Even in the Epic period the same gay irreverence had occasionally appeared, as in the Homeric hymn to Hermes. These things do not necessarily arise from an anti-religious spirit, but they may be taken as indications of a certain vein in the Hellenic character, a lightheartedness and a reckless freedom in dealing on certain occasions with things divine that is markedly in contrast to the Oriental spirit. Nevertheless, it is not improbable that comedy at Athens and elsewhere did gradually exercise a weakening or a debasing influence on the popular faith. For the other poets of Attic comedy took greater liberties than even Aristophanes: Kratinos, Telekleides, and Plato of the 5th cent., Amphipos of the 4th, did not shrink from introducing the High God himself on the stage in ridiculous and licentious situations. There probably was some reserve and no gross indecency in the presentation of these plots. And much is conceded to the spirit of the Carnival, especially when a certain *αἰχρολογία* was sanctified by custom and ritual. Nevertheless, the more earnest-minded of the Athenians may have agreed with Plato's condemnation of such a handling of divine personages;² and, though the popular faith may have been robust enough to endure such shocks, one cannot but suspect that the people's religious imagination suffered a debasement in moral tone. A few south-Italian vases of the 4th cent., on which are scenes that appear to have been inspired by such comedies, are the worst examples of Hellenic vulgarity.

The history of Greek religion, then, must reckon with Attic and other Greek comedy as among the possible causes of religious corruption and decay; but at the worst this is only one side of the picture, for the fragments of the comedies of Menander contain many a striking expression of the higher religious spirit and advanced ethical sentiment (see below, p. 421).

12. *Waning of the political value of Delphi.*—There are certain external events in the history of Greek religion towards the close of the 5th cent. that must be noted in a general sketch of its career. One is the waning of the political influence of the Delphic oracle: its secular mission appeared to have been accomplished when the era of Greek colonial expansion had closed; at the first terror of the Persian invasion, the great States anxiously resorted to Delphi for guidance, but the priesthood failed to rise to the Pan-Hellenic occasion and played a double game. During the Peloponnesian war it was obvious that they were 'Laconizing'; nor were they ever given again an opportunity of leading *la haute politique* of Hellas; and in the middle of the 4th cent. Demosthenes could speak contemptuously of 'the shadow at Delphi,' although the Amphiktyonic League, as the only federal council of Hellas, still retained a nominal value sufficient to induce Philip to scheme for admission. Generally, in the 4th, 3rd, and 2nd centuries the oracle retained influence only in the spheres of religion and morality. It came to serve the purposes of a private confessional, giving advice on questions of conscience; its counsel was generally sane and often enlightened, and shows the priests as possessed with the progressive spirit of Greek ethical philosophy.¹

13. *Spread of Asklepios-worship.*—Another event of importance is the diffusion of the cult of Asklepios and the growing influence on the Hellenic mind of this once obscure hero or earth-daimon of the Thessalian Trikkas. It was thence that, some time probably in the 6th cent., he had migrated to Epidauros, where his power expanded through his union with Apollo. His cult-settlement in Kos was a branch of the Epidaurian; and already in the 5th cent. the Asklepieion of this favoured island had reared the great Hippokrates, and was thus the cradle of the later medical science of Europe. Towards the close of this century, Asklepios and his daughters came over from Epidauros to Athens, and, according to a well-founded tradition, the poet Sophocles was his first apostle: in the next generation we find the Athenian State regulating his worship, which was soon to conquer the whole Hellenic world. In the survey of the Hellenistic age this must be reckoned with as one of the main religious forces of later Hellenism. We may note in passing a striking divergence between the European spirit of Hellenic religion and the Oriental spirit of Mesopotamia; the Babylonian god practises magic, the Hellenic Asklepios practises and fosters science; and his cures at Epidauros were not merely of the Lourdes type, but show the beginnings of sane therapeutics.

14. *Growth of the 'thiasoi.'*—Another interesting phenomenon that begins to arrest our attention in the latter part of the 5th cent. is the growth of private *thiasoi*, or voluntary religious associations independent of the public religion and devoted to a special divinity who might be an alien. The most interesting testimony is the title of a comedy by Eupolis called the *Baptai*, which we may interpret as 'the Baptizers,' satirizing a society devoted to the Thracian goddess Kotytto, whose initiation rites must have included a ceremony of baptism, of which this is the earliest example within the Hellenic area. It will be more convenient to esti-

¹ CGS v. 284.

² Rep. 378 C, where he seems to glance at Epicharmos.

¹ See CGS iv. 211-214.

mate the importance and religious significance of these *thiasoi* in the survey of the next period of our history. Meanwhile it is well to mark certain evidence that the most powerful and appealing of these, the Orphic mystery, having failed in the 6th cent. to capture the States of Magna Græcia, was increasing its private influence in Eastern Greece in the century before the rise of Alexander. Plato's attack is itself a witness to this. And, when Aristophanes¹ and an Attic orator contemporary with Demosthenes² openly acknowledge Orpheus as the apostle to the Hellenes of 'the most holy mysteries' and the teacher of a higher way of life, we must conclude that the spirit of the Orphic brotherhoods had touched the imagination of the general public outside the circle of the initiated.

15. Religion in first half of 4th century B.C.—Yet it is hazardous and probably false to say that the public religion of Greece was decaying visibly throughout the first half of the 4th century. Athens is, as usual, our chief witness. The restored democracy was all the more strenuous in matters of religion as scepticism was considered a mark of the new culture of the oligarchically-minded. The trial of Socrates is an indication of this temper. We have also evidence from this period of the occasional severity of the Athenian people against those who tried to introduce unauthorized and un-Hellenic cults. The Hellenic tradition is still strong against the contagion of the orgiastic spirit of the Anatolian religion, and it was with difficulty that the Athenian public could tolerate the wild ritual of Sabazios and the Phrygian Mother, nor even in the time of Demosthenes were the participants in it secure from danger. The early 4th cent. art still exhales the religious spirit and serious ethos of the Pheidias school; it created the type, and almost succeeded in establishing the cult, of the new goddess of Peace, Eirene, for whose presence among them the wearied Athenians might well yearn; it also perfected the ideal of Demeter, the Madre Dolorosa of Greek myth, whose Eleusinian rites with their benign promise of salvation added power and significance to the later polytheism. The literature of this period still attests the enduring vitality of the popular religion. The Attic oratory of the 4th cent. was more religious in its appeal than any modern has been, as might be expected of a time when there was yet no divorce conceivable between Church and State. It is not a question of the religious faith of the individual orator, but of the religious temper of the audience, which is attested by many striking passages in the speeches. According to Antiphon, the punishment of sinners and the avenging of the wronged are specially the concern of the deities of the nether world;³ Andokides avers that foul misconduct is a more heinous sin in a man who has been in the service of the Mother and the Maid of Eleusis;⁴ the speech against Aristogeiton is almost as much a religious as a juridical utterance. Demosthenes may have been a sceptic at heart, believing in chance—as he once says—as the governing force of our life; but otherwise he is glowingly orthodox in respect of Attic religion and mythology, and the greatest of his speeches closes with a fervent and pious prayer.⁵ Again, it is well to remind ourselves that the political or forensic orator is a truer witness to the average popular belief than the poet or the philosopher.

16. Plato's attitude towards the popular religion.—A consecutive history of Greek religious thought as embodied in the surviving writings

or records of the philosophic schools of Hellas is far too large a subject even to be adumbrated here; and a general survey of the religion can only notice shortly the leading thinkers whose works there is reason to suppose had popular vogue and lasting influence upon the religious world. Among these the primacy belongs to Plato; and the full account of Greek religion, both in the period that precedes the downfall of Greek independence and in the periods that follow, must include a critical estimate of his religious speculation. This is no place for an elaborate consideration of the metaphysic of his ideal theory, or the relation of his ideas to a theistic system; only the most general observations may be allowed for the purpose of this sketch. To understand his main attitude towards the popular cults, and his influence upon the later educated world of Greece, we must recognize at once that, idealist and reformer as he was, he was no revolutionary or iconoclast in matters of religion: he would reform Greek mythology, purging it of stories of divine conflicts, divine vengeance, divine amours; and, as these fortunately were enshrined in no sacred books, he feels that this might be done gently and easily without disturbance to the established forms of worship. He does not desire to abolish sacrifices or idolatry, but he inculcates simplicity in the offerings.¹ In one passage he even maintains that the legislator will not change a single detail of the ritual, if only for the reason that he does not know anything of the inner truth that may lie behind such outward forms.² Even in his most advanced physical and metaphysical speculations, he finds a place for the popular pantheon:³ in the hierarchic scale of things the Olympians are ranged somewhere below the supreme transcendental God of the Universe. The *Timæus* dialogue presents some interesting theologic dogma; here,⁴ in the scale of divine creation, the Olympian pantheon, which seems to be accepted rather for the sake of ancient tradition, is given the third place, after the planets and the sun, which are the second works of the supreme Creator, the first being the cosmic Heaven. These deities of the polytheism, then, are not immortal in their own nature, but are held together for all eternity by the will of the Highest God. And it was to them that He committed the formation of man, and lent for this purpose a portion of His own immortality; the mortality of man is thus accounted for, which would have been inexplicable had man sprung directly from the immortal Supreme Being. It is interesting for our present purpose to note that this esoteric and transcendental system, devised by the great master and parent of Greek theosophy, would leave the established religion more or less unimpaired; it even accepts its data at certain points, namely, the nativity of its gods, and draws the logical conclusion that gods who were born could not be by essence immortal: therefore Zeus could not be accepted as the Absolute and Supreme Being of the Cosmos. It also proclaims the idea of an immortal element in man, which, again, is in accord with the contemporary popular faith in the survival of some part of our being after death.

But the work which reflects most vividly the popular religion and betrays the strongest sympathy with it is the *Laws*, a work of Plato's old age, in which the conservative spirit of the religious reformer is no less striking than the intellectual decay of the philosopher. He accepts the greater part of the civic political religion, merely purifying the mythology and some of the ideas concerning divinity; and it is striking how easily he finds in it materials ready to his hand on which he can

⁴ pp. 84-41.

build an exalted ethical religious system of rights and duties, especially those which concern the life of the family and the groups of kinship.¹ In fact, the background of the thought in this lengthy treatise is almost always the Greek *Polis*, though glimpses may here and there break through of a wider vista. Plato expresses a prejudice against all forms of private and orgiastic cult, which were dangerously enticing to women;² any doubtful question that might arise concerning rite or cult he would leave to the decision of the oracles of Delphi or Dodona or Zeus Ammon.

We feel generally that Plato did not consciously assume the part of an apostle of a new order of religion, but that both in his philosophy and in his religious theory he found a sufficient *point d'appui* in the old, of which he tried to strengthen the moral potentialities. The later sects which attached themselves to his name or to his school were deeply interested in religious speculation, which degenerates at last into the mystic superstition of Neo-Platonism. Therefore, as the work of Aristotle belongs to the history of European science, so the philosophy of Plato concerns the later history both of pre-Christian and of Christian religious thought. To estimate exactly how his influence worked on the better popular mind in the centuries before Christ is impossible. But we may naturally and with probability surmise that he contributed much to the diffusion of the belief in the spiritual nature and perfection of God, to the extirpation of the crude notions of divine vindictiveness and jealousy, to the interpretation of the external world in terms of mind and spirit as against any materialistic expression, to the acceptance of the belief in the divinity of the human soul, and its affinity with God, and in the importance of its posthumous life, which was partly conditioned by the attainment of purity. The latter ideas constitute the faith of the Orphic sects, from whom Plato may have silently borrowed them. But, whether through Plato or through the *thiasoi*, many of them come to appeal strongly to the popular mind of later Hellas.

17. Religious art in the 4th century.—Our general survey is now approaching that period of world-change brought about by the rise of Macedon. But, before leaving the scene of the free city-State, we should remember to estimate the religious work done by the great 4th cent. masters of sculpture before the power of Alexander reached its zenith. The fiery imagination of Skopas found plastic types for the forms of Dionysos and his *thiasos*, and his work rivalled at least, if it did not surpass, in inspiration of tumultuous life the masterpieces of the older Attic vase-painters noticed above. Praxiteles, the master of the gentler moods of the soul, in the religious sphere consummated the types of Aphrodite and Demeter; the almost perfect embodiment of the latter goddess, the Cnidian Demeter of the British Museum, has affinity with the spirit, if not with the formal style, of his school, and combines something of the tearful expression of the Madre Dolorosa with the blitheness of the corn-goddess. We are conscious, indeed, of a change in the representation of divinity. The works of this later generation have lost the majesty and awe, the *σεμνότης*, as the Greeks called it, of the 5th cent. art; nor can the Greek States command any longer the creation of the chryselephantine colossal statues of temple-worship. In these later types, though still divine, there is more infusion of human passion, the personal experience, the struggles and yearning of the individual soul. Anthropomorphism is pur-

suing its path; and, though still fertile in works of high spiritual value, may come to weary and weaken the religious sense.

IV. FOURTH PERIOD.—The establishment of the Macedonian Empire wrought momentous changes in the civic-political religion of Hellas; and some of these were in the direction of loss and decay, while others worked for the possibility of new religious life. The political significance of Apollo of Delphi, of Zeus and Athene, the divine leaders of the *Polis* in its counsels and ambitions, was doomed to pass away. Athene as the warder and counsellor was of less avail for Athens than were the Samothracian sea-deities for the victorious Demetrios. Certainly in the first centuries of the Hellenistic age there were few external signs of decay; we do not yet hear of ruined shrines or the decline of great festivals such as the *Delia*; Athene, though no longer the goddess of a civic Empire, was still and for ages remained for the Athenian the benign Madonna to whose care the boy-athlete and the marriageable girl were dedicated; we have record from the island of Tenos¹ of the abiding hold that even such a deity as Poseidon still exercised on the affections of his people as late as the 2nd and 1st centuries B.C.; the later personal names, as some of the earlier, attest the affectionate faith that linked the family and the individual with the national deity, for the child is often named as if it were the gift of Apollo, Athene, Hermes, or the river-god; and, if we had continuous chronicles of each cult-centre, we should probably find similar evidence showing that the dominant figures of the old polytheism were still able to fulfil in some degree the religious wants of the individual worshipper. And scholars who have been tempted to antedate the decay of Hellenic polytheism have ignored, among other evidence, this important historic fact that in the 4th cent. it was still vital enough to make foreign conquests, to penetrate and take possession of Carthage, for instance, and that in the 3rd cent. it began to secure for itself a new lease of life within the city and the growing Empire of Rome; in fact, the last chapter of Greek religion falls within the Roman Imperial period.

1. Growing force of personal religion.—Yet the Hellenic in the 4th cent. B.C. and in the early days of Macedonian ascendancy began to crave other outlets for his religious emotion than the traditional cults of his phratry or tribe or city. Personal religion was beginning to be a more powerful impulse and to stimulate a craving in the individual for a more intimate union with the divinity, such, for instance, as was offered freely by the Great Mysteries of Eleusis. We have fairly sufficient evidence that the 4th cent. witnessed a great extension of their influence.² The Mysteries of Megalopolis were instituted, and those of Andania were re-organized, by their aid; and Ptolemy I. is said to have invited the aid of an apostle from Eleusis to assist in some religious institutions of his new city of Alexandria.³

2. The religious brotherhoods.—The same craving was also satisfied by the private *thiasoi*, the guilds of brethren devoted to the special cult of one divinity. These unions belong to the type of the secret religious society which is found in all parts of the world at varying levels of culture (see art. GILDS). In Greece we have evidence of them as early as the time of Solon; it was probably not till the 5th cent. that any of them were instituted for the service of foreign divinities; we hear then of the *thiasos* of the Thracian goddess; and, in the earlier half of the 4th cent., of the orgiastic fraternity devoted to Sabazios, with which *Æschines*

¹ For particulars, see Farnell, *Higher Aspects*, pp. 87, 46-48 103, 117.

⁴ Ib. 199.

⁵ See CGS iii. 199-202.

in his youth was associated. But it is not till the Macedonian period that the epigraphic record of these gilds begins; henceforth the inscriptions are numerous and enlightening concerning their organization and their wide prevalence throughout the Hellenic world.¹ Their importance for the history of religion is great on various grounds.

They show the development of the idea of a humanitarian religion in that they transcend in most cases the limits of the old tribal and civic religion and invite the stranger; so that the members, both men and women, associate voluntarily, no longer on the ground of birth or status, but drawn together by their personal devotion to a particular deity, to whom they stand in a far more intimate and individual relation than the ordinary citizen could stand to the divinities of his tribe and city. This sense of divine fellowship might sometimes have been enhanced by a sacrament which the members partook of together; we know that this was the bond of fellowship in the Samothracian mysteries, which were beginning to appeal widely to the early Hellenistic world. A common meal at least, a love-feast or 'Agape,' formed the chief bond of the *thiasotai*, and this was sometimes a funeral-feast commemorative of the departed brother or sister. There was nothing to prevent the *thiasos* choosing as its patron-deity some one of the leading divinities of traditional polytheism, to which they must not be supposed, as Foucart supposed them, to stand in any natural antagonism; for instance, there were local reasons why Greek merchants whose central meeting-point was Rhodes should form *thiasoi* under the protection and in the name of Zeus Xenios, the god who protects the stranger, or of Athene Lindia, the ancient and powerful divinity of Lindos, or of Helios, the pre-historic sun-god whose personality pervaded the whole island. So far, then, the religious importance of these societies consists in their quickening influence on personal religion, in the gratification that they afforded to the individual craving for personal union with the god-head, also in their organization which aroused a keener sense of religious fellowship between the members, and which later served as a model to the nascent Christian community.

But in the history of Hellenic religion their significance is even greater on another ground, namely, that they bear a most striking testimony to that fusion of East and West which it was the object of Alexander and the mission of his successors to effect; for many of these religious brotherhoods, whose members and organization were Hellenic, were consecrated to foreign deities—Sabazios, Adonis, Kousares, and the Syrian goddess—so that they played undesignedly the part of missionaries in the momentous movement sometimes called the *theokrasia*, the blending of Eastern and Western religious and divine personalities, of which the significance will be considered below.

3. Menander.—The student who is tracing the course of the religious life and experience of Hellas through the Hellenistic period should endeavour to gather beforehand a vivid impression of the spirit of the Menandrian comedy. For Menander, the friend of Epicurus and the devoted admirer of Euripides, was the favoured heir of the humanitarian spirit that had gleamed fitfully even in the Homeric period and had gathered strength and articulate expression in the century before Alexander opened the gates of the East. Patronized and courted by Demetrios Phalereus and Ptolemy, admired by the scholars and reading public of Alexandria and the Hellenistic world even more than he had been by his own contemporaries, Menander was eminently in a position to give a

tone to the religious sentiment of this period; and the Anthologies of his works prove that he was actually revered as an ethical-religious teacher.¹ Therefore, for the general exoteric history of Greek religion he counts for more than any of the philosophers, for he addressed a far larger public. Yet the message that he has to deliver has come to him from the philosophers and from the inspiration of the humanized Attic spirit, of which he appears the most delicate and final expression. While writing and thinking pre-eminently as the cultured Athenian of the close of the 4th cent., he is the mouthpiece of cosmopolitanism in ethics and religion—'No good man is alien to me; the nature of all is one and the same' (*οὐδεὶς ἐστὶ μοι ἀλλότριος ἂν ἢ χρηστός· ἡ φύσις μία πάντων*);² the Terentian formula, 'homo sum, humani nil a me alienum puto,' is only an extension of this, losing something of its ethical colouring. Many of the fragments, showing striking approximations to New Testament teaching, are of vital importance for the history of Greek ethics. As regards religion, they may contain protests against superstition, and the extravagance of sacrifice proffered as a bribe;³ but they exhibit no real or veiled attack on the popular polytheism as a whole. On the other hand, they have preserved many memorable reflexions that bear witness to the development of a religion more personal, more inward and spiritual, than had hitherto been current, save perhaps in Platonic circles. God is presented as a spirit and as spiritually discerned by the mind of man; and a high ideal of Platonic speculation is delivered to the public in the beautiful line, *ὥς ἐστὶ τὸ πρὸς θεὸν βλέπειν δέ,* 'the light of the mind is to gaze ever upon God.'⁴ The sense of close and mystic communion between man and the omnipresent divine spirit is strikingly attested in the passage of one of his unknown comedies:

'a guardian spirit (*δαίμων*) stands by every man, straightway from his birth, to guide him into the mysteries of life, a good spirit, for one must not imagine that there is an evil spirit injuring good life, but that God is utterly good.'⁵

In attempting to estimate what is most elusive—the inner religious sentiment of any period—it is important to remember that the author of such expression was dear to at least the cultivated public of the Hellenistic age.

4. The 'theokrasia.'—The tolerant humanitarianism of Menander, of which we catch the echo in certain formulae inscribed on the Delphic and other temples, is reflected in that which is perhaps the most striking religious phenomenon of this period, namely, the *theokrasia*, the fusion of divinities of East and West. As regards religious theory, this is not to be regarded as a new departure. Herodotus shows how natural it was to the Hellenic mind to interpret the deities of foreign nations in terms of its native pantheon: and it was easy for Euripides to commend Kybele as Demeter.⁶ But it was by no means easy, in fact it was exceedingly dangerous, before the time of Alexander to introduce any unauthorized foreign cult into the city-State. We hear vaguely of the death-sentence inflicted or threatened on those who did so. Nevertheless, as we have seen, such foreigners as Sabazios and Attis were intruding themselves into Athens at the time

¹ See a recent paper by Pierre Waltz in *REG*, 1911, 'Sur les Sentences de Ménandre'; the writer aims at discovering or imagining the dramatic setting of each fragment, and at disproving the view that Menander was posing as an original ethical teacher. Accepting his theory, we can still assign high value to the 'Sentences' for the purpose of Greek ethical history, whether we regard them as original and earnest utterances of Menander or as commonplaces which he uses lightly for dramatic purposes; for, if the latter view of them is the more correct, they show at least what was in the air.

of the Peloponnesian war, trailing with them the orgiastic atmosphere of Phrygia; and at some indefinite time before this the impure ritual of certain Oriental goddess-cults had invaded the Corinthian worship of Aphrodite. But after the establishment of the kingdoms of the Diadochi, the gentle barrier in religion gradually loses its force and significance. It was, in fact, a far-sighted measure of policy on the part of some of the kings to establish some common cult that might win the devotion of the Hellenic and Oriental peoples alike. Such was the intention of Ptolemy when he founded at Alexandria the cult of the Babylonian god Sarapis, whom the Egyptians were able, owing to a similarity of name, to identify with their Osiris-Apis, and the Hellenes with their Plouton, owing to the accidental fact that an image of this underworld-god happened to be consecrated to the cult at its first institution. Similarly, when the Syrian city of Bambyke was re-settled as Hierapolis by Selenkos Nikator, the personality of the great goddess Atargatis (*q. v.*) was mingled with that of Artemis, Hera, Aphrodite, and other Hellenic goddesses; and the treatise of Lucian, *de Dea Syria*, gives us the most interesting picture presented by antiquity of the working of the *theokrasia* in the domain of religion and religious art.

The spirit of syncretism grows stronger and more pervading through the later Greek and Græco-Roman periods, and dominates the later Orphic and Gnostic thought; and the inscriptions, usually the best record of the popular religious practice, attest its wide diffusion. We find the deities of diverse lands—Egypt, Syria, and Greece—linked together in the same formula of thanksgiving, and the same offering dedicated to them all. And the name Zeus is applied to so many gods of the East that in the cult-formulae it seems often to have lost all its personal and concrete value and acquired the vaguer meaning of 'God.' The Jewish Jahweh Himself—under the name *Idō*—was occasionally identified with him, and at times, it seems, even with Dionysos.

The importance of this movement for religious thought was of the highest. Varro's view recorded by Augustine,¹ that the name of the deity made no difference, so long as 'the same thing is understood,' and that therefore the God of the Jews was the same as Jupiter, is a great idea bequeathed to the world by Greek tolerance and Greek sanity. Only a nation could attain to this freedom of religious imagination that was not held captive by the magic spell of names² which made it so difficult for the Jew to shake off the tribal spirit of the religious blood-feud. This Hellenic expression of religious enlightenment prepared the way for monotheism, and thus indirectly for Christianity; it also could induce the pantheistic idea of a diffused omnipresent spirit of divinity such as is expressed in the lines of Aratos, the scientific poet of the 3rd cent. B.C.: 'All the ways are full of (the spirit of) God, and all the gathering-places of men, the sea and harbours, and at every turn we are all in need of God, for we are of kin to him.'³

5. Stoicism, Epicureanism, Cynicism. — This pantheistic speculation inspires some of the dogmas of Stoicism; and for most of the Stoic writers and thinkers the concept of divinity was less that of a personal concrete Being than of a spiritual force or soul-power immanent in things; therefore, while some of them tried to find a place in their metaphysical system for the creations of the polytheism and even a justification for augury and divination, the impression left on our minds by the fragments that have come down to us of the religious specula-

tion of the Stoa is that of a system alien and antipathetic to the popular theistic point of view, and especially to the social religion of kin-group and city; Zeno the founder is said to have protested against shrines and idols.⁴ His protest was in vain; nor is there any clear indication that Stoicism had any influence on the religious thought and practice of the average man of the people; unless, indeed, the emergence of the cult of *Ἀρετή*, Virtue, in the 2nd cent. B.C. at Pergamon and Smyrna was suggested by the strong theologic colouring that the Stoa gave to morality.⁵

As for Epicureanism, it cannot be regarded normally as a religious force; if it touched the popular mind at all, its influence must have been generally in the direction of atheism or indifference; the only signs that it did are occasional grave-inscriptions which breathe the Epicurean spirit of unperturbed quiescence in regard to the posthumous fate of the soul.

The philosophic school that was most aggressively protestant against the popular creeds and cults appears to have been the Cynic, mordant and outspoken criticism being characteristic of this sect. We have record of Diogenes' contempt for the Eleusinian mysteries, of Antisthenes' disdain for the great Mother of Phrygia and her mendicant priests; and the fragments in a newly discovered papyrus of a treatise by Kerkidas,⁶ the Cynic philosopher and statesman of Megalopolis in the 3rd cent. B.C., contain a theory which reduces personal deities to impotent instruments of Fate, and would substitute for Zeus and his colleagues certain divinized abstractions such as *Νεμεσις* and *Μετῶδος*; the latter term, if the reading is sound, seems to denote the spirit of unselfishness or sacrifice—an interesting and potentially valuable idea but at this time still-born.

6. Asklepios-cult and later mysteries. — These sectarians of this later age do not appear to have made a serious attempt to capture the mind of the public; and the popular religious movements for the most part ignored them and their teaching. The Hellenistic religions are as convincingly theistic and idolatrous as the older were. The chief change lay in this, that a man now might to some extent choose his own divinity or—what was even of more import—be chosen by him or her; he was no longer limited to the cults into which he was born. This freedom had already for some time been offered by the *thiasoi*; and now in the Hellenistic world, especially by the powerful and wide influence of the cult of Asklepios, the idea was developed of a deity who as Healer and Saviour called all mankind to himself; and it was this significant cult-phenomenon that induced Kerkidas in the above-mentioned passage to include *Ἰατρά*, 'the Healer,' among the true divinities whose worship ought to supplant that of the older gods. In the treatise called *Asklepios* of the pseudo-Apuleius a long address and prayer to this deity are preserved, of which the tone is strikingly Christian.⁷

7. Non-Hellenic mysteries. — The phenomenon here indicated attests again the stronger vitality at this period of personal or individual, as distinct from tribal or political, religion; and this was quickened also by the growth of certain non-Hellenic mysteries in the Mediterranean area in the later centuries of paganism, notably by the Samothracian, those of Attis and the Great Mother, the Egyptian Isis, and, finally, in the last period of all, of Mithra. In most of these the records allow us to discover many interesting ideas that reappear in Catholic Christianity, such, for instance,

as communion with the divinity through sacrament, the mystic death and rebirth of the catechumen, the saving efficacy of baptism and purification. These rites could satisfy the craving of the mortal to attain to the conviction of immortality and to the ecstatic consciousness of complete or temporary self-absorption in God. But in the mysteries of Sabazios and Cybele, and possibly in others, this sense of divinity was conveyed to the *mystes* by the simulation of a holy marriage or sex-communion with the god or goddess; and for this reason the pagan mysteries were generally attacked by the Christian Fathers as obscene; the charge was unjust on the whole, though the psychic effect of the special act of ritual just alluded to was probably detrimental to the moral imagination.

8. *Hermetic literature.*—The strangest and most interesting reflexion that the ancient records have preserved for us of this fusion of Hellenic culture and Oriental religious sentiment is presented by the Hermetic literature. The origins of this most fantastic product of the human mind are traced by Flinders Petrie¹ back to the 6th or 5th cent. B.C. But though much of it is pre-Christian, its philosophic diction proves that it cannot be earlier than 300 B.C., and the bulk of it is probably much later. A frequent Hermetic formula addressed to the Deity—*ἐγώ εἰμι σὺ καὶ σὺ ἐγώ*, 'I am Thou and Thou art I'—may be taken as the master-word of these hieratic writings.² The unnatural alliance between Greek philosophy and the Oriental mystic theosophy that these writings reveal is a momentous phenomenon of later paganism; and the study of the origins of Christian metaphysics is much concerned with it. Such theosophy had a natural affinity with magic; and magic, always a power in an age of intellectual decay, begins to be most powerful in this latest age of Hellenism. It is a just reproach that Augustine brings against Porphyry, the most notable of the Neo-Platonists, that he 'wavered between philosophy and a sacrilegious curiosity,' that is, a vicious interest in the black art.³

In these strange forms of faith and speculation the clearness and sanity of the pure Hellenic intellect appear clouded and troubled, the lineaments of the old types of the Hellenic thought and imagination almost effaced. And the learning and science of the Hellenistic age stood mainly aloof from the religious forces that moved the masses of the people.

9. *Daimonism.*—The mystic and theosophic literature of the Hellenistic and Græco-Roman period was markedly 'daimonistic,' being infected with the polydaimonism of the East and positing the existence of good and evil *daimones* as a metaphysical dogma. We can trace a corresponding change in the popular Hellenic imagination. In the earlier period, as has been shown, the native Hellene was, as compared with other races, fairly strong-minded in respect of the terrors of the demon-world; but the later people of the Greek area were certainly tainted in some degree with this unfortunate superstition of the East, and various forms of exorcism, conjuration, and evocation became more prevalent. The modern Greek temperament appears to be possessed with this disease;⁴ and we may suppose that the germs have been inherited and developed from this last period of the old civilization.

10. *Eschatology.*—But another feature that we mark in this mystic religion and these mystic societies of the Hellenistic world indicates a higher aspect of religion, and suggests possibilities of

momentous development; most of them, if not all, proclaimed the immortality of the soul, a happy resurrection, a divine life after death. The Hellene who had been initiated into the Osirian faith hoped to attain immortal happiness in and through Osiris, availing himself of Egyptian ideas and Egyptian spell-formulae. The priest of the mysteries of Attis comforts the congregation of the faithful, sorrowing over the death of their god, with words that aver the certainty of his resurrection and by implication the hope of their own:

θαρσύνετε μύσται τοῦ θεοῦ σπασσόμενον
ἔσται γὰρ ἡμῖν ἐκ πάντων σωτηρία.¹

The mysteries of Mithra embodied much the same eschatologic ideas and hopes; but these came to the Græco-Roman world only in the latest period before the establishment of Christianity, and had little hold on Hellenic society proper. Doubtless the most attractive mystery for the Hellenes was the Orphic; we have many proofs of its activity and life in the two centuries before and after the beginning of our era; and we can well understand the causes of its popularity. Its deity had become Hellenized long ago: the Orphic formulae are free from barbarous jargon, and admit the familiar divine names; the insistence on purification was congenial to many Hellenic temperaments; there was probably nothing surviving in the ritual that was objectionable to the cultivated Hellene; and, finally, its picture of Paradise seems to have accorded with the trend of the Hellenic imagination. The numerous grave-inscriptions of those centuries rarely express any definite Orphic sentiment or allude to any specially mystic faith; but we have the evidence of Plutarch attesting the prevalence of the Orphic societies and their power of appeal: when he is consoling his wife for the death of their child, he reminds her of the promises of future happiness held out by the Dionysiac mysteries, into which they have both been initiated.²

11. *Hero-worship and apotheosis.*—The idea that was common to many of these mystic brotherhoods, that the mortal might achieve divinity, is illustrated by another religious phenomenon which stands out in this latest period, namely, the worship of individual men and women either in their lifetime or immediately after death (see artt. *DEIFICATION, HEROES* [Greek and Roman]). To appreciate the full significance of this, one must be familiar with the usages of the earlier Hellenes as also of the Oriental peoples who became subjects of the Diadochi. We have observed that the Greek of the 6th and 5th centuries was willing to concede heroic honours to certain distinguished individuals after death; in this there was nothing inconsistent with the principles of higher polytheism; and in the earlier cases the grounds of canonization were usually good and reasonable. It becomes a more serious question about the religious and moral character of a people when divine worship is proffered to a living person. Of this the first example is the cult of Lysander as a god, which, as Plutarch seems to imply, arose even in his lifetime.³ The same writer records the story of the apotheosis offered by the people of Thasos to Agesilaos, and his sarcastic refusal.⁴ The same kind of adulation was lavished by the degenerate Athenians on Alexander and Demetrios Poliorketes. The most salient examples are derived from the records of the Seleukidai and the Ptolemies, the kings of these dynasties usually

enjoying divine honours after death, and sometimes bearing divine titles such as *Zωρῆ*, 'Saviour,' *Θεός*, 'God,' in their lifetime. Is this merely the gross servility of a decadent age that had lost all real sense of religion? This is no doubt the true account of it in some degree: Dio Chrysostom exclaims against the quackery and vanity of it;¹ and the sharp-witted Athenians and the educated Greeks generally would be under no illusion when they prostrated themselves before these human gods. It is natural to suppose that the effect upon the life of the old religion was corrosive, when a queen or a courtesan could be publicly recognized as Aphrodite, and that the general belief in Apollo and Dionysos would tend to collapse when the one was identified with the Seleukidai, the other with Attalos. Yet the faith in Dionysos at least was able to survive the strain. And what looks to us mere hypocrisy and blasphemy would appear to many of the Hellenistic communities in another light. It seems that the uncultured Greek in the time of Herodotus was capable of believing in all seriousness that Xerxes might be a real incarnation of Zeus upon earth;² and such an idea would be familiar, as an old tradition in the popular estimate of kingship, to the natives of Syria, and still more to the Egyptians. When the Rosetta Stone proclaims the Ptolemy as 'the living image of God,' the average Greek might smile in secret, but the native Egyptian would instinctively assent to this assumption of divinity by the heir of the ancient Pharaohs.

This deification of the mortal, so rife in this later period, may be regarded as a moral and religious evil. Yet it must not be taken too hastily as a proof of the unreality of the prevailing polytheism. And, for better or worse, it was a momentous fact belonging to the higher history of European religion; for it familiarized the Græco-Roman world with the idea of the incarnation of the Man-God.

12. Signs of decay and of new life in later paganism.—The Hellenistic period cannot be severed by any sharp dividing line from the Græco-Roman; but it belongs rather to the student of Roman religion and the Roman Empire to pursue the history of Hellenic polytheism through the first centuries of our era down to the establishment of Christianity.

The religious phenomena of the period that has just been sketched present, on the one hand, the signs of decay,—the decay of the old civic and political religion which fostered the growth of the Greek *Polis*,—and, on the other hand, the working of new religious forces which prepare the way for Christianity. The cults of Apollo, Zeus, and Athene were among the first to wither; yet a living and personal religious sense was in all probability more diffused through the Greek world under the Epigoni and the Roman Empire than it had been in the earlier centuries. Contact with the Oriental spirit brought to many a stronger intensity of religious life; religion is no longer preoccupied with the physical and political world; its horizon lies beyond the grave, and its force is 'other-worldliness.' Men flock to the mysteries seeking communion with the divinity by sacrament, and sustaining their faith by mystic dogmas. The religious virtue most emphasized is purity, of which the influence is often anti-social; this was no longer always understood in a pharisaic sense, but its spiritual significance was proclaimed to the people and penetrated the sphere of temple-ritual. An inscription from a temple in Rhodes of the time of Hadrian contains a list of rules 'concerning righteous entrance into the shrine'; 'the first and greatest rule is to be pure and unblemished in hand

and heart and to be free from an evil conscience.'¹ Something similar was inscribed on the temple of Asklepios at Epidauros.² The *objectif* of the earlier Hellenic polytheism was the city, the tribe, the family: that of the later was the individual soul. The earlier religious morality looked rather to works and practice, the later rather to purity and faith. The gradual divorce of religion from the political life was a loss which was not repaired for many centuries; but it was compensated by the rise of a humanitarian spirit, which was to be infused into a new cosmopolitan religion.³

The above is only a panoramic sketch, indicating the various elements of a singularly manifold religious system. It has been impossible to touch on all the special points of interest, such as divination and the minutiae of ritual and of the festivals; for these the student must consult special articles and treatises. The object of this article has been to present the main essential features in a chronologic survey, and to assign to each its significance and relative importance. The history has been adumbrated of a religion that maintained itself for at least two thousand years on the higher plane of polytheism; a religion which, while lacking the sublimity and moral fervour of some of the Oriental creeds, made certain unique contributions to the evolution of society and the higher intellectual life of man. By the side of the higher growths many of the products of lower and savage culture were maintained which were mainly obliterated by Christianity. It is necessary to note and appreciate these lower facts; but there is a risk of overestimating their importance and vitality. Many of them are found in all higher religions, usually in a moribund state. It is its higher achievement that makes any particular religion of importance in the history of civilization; and we are now aware that Greek religion can claim this importance. Nor can the lower elements as a whole be shown to have generated the higher within the Hellenic period proper. We cannot show the evolution of the personal anthropomorphic deities of Greece from magic ritual or totemism or theriomorphism, without transcending the chronologic limits of the period within which it is allowable to speak of a Hellenic people at all. Some modern anthropology applied to classic life is seriously anachronistic. The emergence of personal gods, from whatever region or by whatever influence they emerged, is an event of very primitive history. At least we know that of the two populations whose blending made Hellenism—the indigenous Mediterranean and the Northern or Central-European invader—the former possessed a personal theism of dateless antiquity; while all the evidence points to the conviction that the Aryan tribes entered Greece with certain personal deities already evolved or acquired. We find that anthropomorphism was the strongest bias of the Hellene's religious imagination; and with this we associate his passion for idolatry and hero-worship. It is interesting for the student of Hellenic Christianity to note the influence of these tendencies on the later history of the Greek Church; and generally it has been the result of much modern research to expose the truth that the indebtedness of Christian dogma and ritual to the later Hellenic paganism was far greater than used to be supposed.

LITERATURE.—Older works such as F. Welcker's *Gr. Götter-lehre*, 3 vols., Leipzig, 1857-58, and L. Preller's *Gr. Mythol.*, 2 vols., ed. G. Robert, Berlin, 1887-94, are mainly useful now for their collection of facts.

GREEK ORTHODOX CHURCH.—I. The

name.—The term 'orthodoxy' (ὀρθοδοξία) is used to indicate the immutable conservation of the true Christian doctrine, as taught by Christ and the Apostles, and set forth in Holy Scripture and Holy Tradition, as against the divergence therefrom of heretics, which is heterodoxy (ἑτεροδοξία). In this sense the word is used as early as the 2nd cent. (e.g. in Clement of Alexandria). The appellation 'Orthodox' was applied in ancient times to the whole Church; but after the Western Church separated from the Eastern, it was appropriated by the latter, inasmuch as it was in the name of this faithfulness that it broke off the connexion with the Western Church, which has appropriated to itself the name 'Catholic.' Since the chief part in the Eastern Church was long taken by the Greek nation, very often, even in official documents, especially in the West, the name 'Greek Church' was used as a synonym for 'Orthodox Church'; but at the present time, when out of the 16 Ortho-

dox Churches only 5 are Greek, and out of the 106 million Orthodox people the Greeks number less than 8 millions, the appellation has become an anachronism. A more convenient appellation is 'Eastern Church,' so far as it denotes her geographical position, and brings out the idea that the 'Orthodox' Church does not make up the whole Christian Church; but even this without the addition of 'Orthodox' is inexact, as the term 'Eastern' may as justly be applied to the Nestorian, Monophysite, and other Churches.

2. History.—The history of the Orthodox Church falls into four periods, each division being marked by an event which defined its character for the whole period, viz. in the first three centuries the initial development; in the 4th cent. the recognition of Christianity as the State religion (A.D. 313); in the 9th cent. the completion of the Orthodox system of dogma (843), together with the beginning of the separation of the Western from the Orthodox Church, and the adhesion of the Slavic peoples to the latter; in the 15th cent. the subjugation of the Graeco-Slavic world by the Turks, completed by the capture of Constantinople in 1453.

(1) *The early period.*—The very first days of Christianity were marked by the invitation to the Hellenes to accept it, and the Christian Church of the first two centuries was a Church of the Greeks. Even in Rome the Christian community was Greek, both in composition and in language. The missionary activity of the Church was wider and more successful in the regions in which the influence of Hellenism had spread. The Books of the NT, as well as the first productions of Christian theology, were written in the Greek language. It was the Greek Churches that developed the idea of the Logos, the doctrine of the Person of Christ, of the Holy Trinity, and the like; it was they that introduced order into the life of the Church, and created a Christian terminology which was accepted everywhere; it was they that gave birth to Christian Apologetics. Church discipline in this period was regulated partly by local councils, partly by collections of rules of private origin (*Didascalia*). The external history of the period is characterized by the hostile attitude of the pagan State towards the Church, which found expression in the persecutions. The tendencies of the Roman Church are in this period very slightly noticeable, so that the history of Orthodoxy almost coincides with that of Christianity.

(2) *From A.D. 313 to 843.*—After Christianity had been recognized as the State religion, the Greek Church elaborated the normal relations between Church and State, being guided by the principle of *synphonia* and an adaptation of the Church organization to that of the State, according to which the diocesan bishops were subordinated to the bishops of the chief towns, or *metropoleis*, i.e. to the Metropolitans, and these in their turn to the bishops of the capitals of the 'dioceses' established by Diocletian, these bishops receiving the titles of Archbishops, Exarchs, and Patriarchs. Such at first were the bishops of Antioch, Caesarea in Cappadocia, Ephesus, Heraclea (capital of the Thracian 'diocese'), and Alexandria; in the last case the bishops were all directly under the Patriarch, without the intervention of Metropolitans. Finally, the Patriarchate of Constantinople took a special place among them, the city having become the permanent residence of the Emperor from the time of Theodosius I. Constantinople had originally been subordinate to the Metropolitan of Heraclea, the capital of the 'diocese,' but the second Ecumenical Council (canon 3), at Constantinople in 381, gave the bishop of the latter precedence (πρεσβεία τῆς τιμῆς) next after the bishop of Rome, as being bishop of 'New Rome'; and in

A.D. 451 he had put under him, by the 28th canon of the Council of Chalcedon, the 'dioceses' (provinces) of Heraclea, Ephesus, and Caesarea, and gained a position second to Rome, but superior to Alexandria, Antioch, and Jerusalem. He had authority over all Asia Minor, and in Europe over Thrace, from the beginning, and later, in A.D. 730, after long controversy with Rome, over Illyricum Orientale, i.e. the countries south of the Danube, together with Dalmatia, Epirus, Greece, and Crete. To him also were assigned, by the 28th canon of the Council of Chalcedon, 'all other tribes' as well (ἀλλόφυλοι); and this became a matter of great importance from the time of the conversion of the Slavs to Christianity, when by 'other tribes' they began to mean peoples living outside the limits of the Empire. About A.D. 500 the Patriarch of Constantinople received the title of 'Ecumenical' (ὁ οἰκουμενικός), i.e. the Patriarch standing at the head of the whole (Eastern) Empire.

With the elaboration of Church organization, Church life reached a very high development. The lively intercourse between the Churches allowed the seven Ecumenical Councils to settle definitions of a dogmatic and canonical character in the name of the Universal (Ecumenical) Church; Theology in its various branches—Dogmatics, Church History, Exegesis, Apologetics, polemics, sermons, etc.—supplies admirable examples. There arose the heresies of the Arians, Macedonians, Monophysites, Monothelites, with their ramifications, and then that of the Iconoclasts, which gave rise to debates in which part was taken by the people, by monks, and by the civil power; but the Councils made clear and settled the doctrine of the Church, and excommunicated those who did not receive it. This resulted in the formation of the Eastern non-Orthodox Churches—Nestorian, Monophysite (Coptic, Jacobite, and others), and Monothelite (Maronite). The completion of this dogmatic work of the Councils was reached by the Council which met in Constantinople on 11th March 843, confirmed the definitions of the seven Ecumenical Councils, and secured the triumph of Orthodoxy with the excommunication of the heretics. See COUNCILS AND SYNODS (Chr.).

The Councils also settled the rules of Church discipline; but side by side with these rules there now appeared a new source of ecclesiastical law in the decisions concerning the Church emanating from the civil power as collected at the end of the *Codex Theodosianus* (A.D. 438), and at the beginning of Justinian's Code (A.D. 534), and supplemented by numerous Imperial novels.

There appeared also collections of regulations made by the Councils, and afterwards of civil regulations made by the secular power concerning the Church, and, finally, collections uniting both elements. Of the latter, the greatest importance attached to the *Nomocanon*, in 50 and 14 Titles (best ed. by J. B. Pitra, *Juris eccles. Graecorum historia et monumenta*, Rome, 1868, ii. 433 ff.). The theory of the *symphonia* between Church and State was given a very wide extension, which showed itself, on the one hand, in interference by the Emperor in Church affairs, in particular as concerning its property, in the election of bishops, in the summoning of Councils, and even in the publication of statements concerning the formulæ of the Creeds; and, on the other hand, in the action of the Church upon the civil laws and administration. Bishops had the right of supervision even over the civil administration of their cities, the right to sit in judgment, and to give protection to the poor (*personae miserabiles*); and sometimes they are found as rulers of the people (δῆμαρχοι), and even received royal honours.

Church property increased, and Christian phil-

anthropy, under the protection of the State, assumed great importance. Monasticism, which had already made its appearance at the end of the first period, spread widely in Egypt, Palestine, Syria, Armenia, and Asia Minor. At first each monastery was managed under its own rules; but later in the Church of Constantinople the rule of St. Basil the Great, and in that of Jerusalem the rule of St. Sabbas the Consecrated, became dominant. Church Services also became more complicated. There came into use bells, incense, and candles; there appeared splendid examples of Church poetry; festivals and fasts were established; ecclesiastical art elaborated forms of its own (the Byzantine style), including a surpassing technique (mosaic), the examples of which, e.g., St. Sophia at Constantinople, remain unapproachable to this day. Orthodoxy spread beyond the limits of the Empire to Ethiopia, Iberia (Georgia), Persia, Armenia, among the Goths, Abasgi, Alans, Lazs, and other Caucasus tribes; and in India, China, and Arabia among the Saracens. Only in the second half of the period does the region over which it dominated begin to be narrowed by the spread of the Monophysites and the conquests of the Arab Musalmāns.

Within the Empire the battle with the remains of paganism went on, special zeal being shown by Theodosius I., Theodosius II., and Justinian.

(3) *From 843 to 1453.*—The reasons for the separation of the Western Church are very numerous and very complicated. Already in the 3rd cent. the Roman Church had become latinized, and was acquiring a special character on account of its position in the centre of the whole State and the influence exercised upon its theology by Roman juristic thought. The division of the Empire into two parts, Eastern and Western, prepared the way for the differentiation of their Churches. The weakness of the Western Empire, its fall, the great migrations, and the flood of barbarous peoples gave cause enough for the relation of Church and State in the West to assume a different form, and for the Popes to take upon themselves the part of representatives and defenders of the Roman ideals in civilization and politics. This is the basis of the misunderstandings which began to arise with the Eastern Church, especially with that of Constantinople, and these passed into disputes which finally ended in complete disruption. Rome rejected the 28th canon of the Council of Chalcedon, which conferred upon the Patriarch of Constantinople powers equal to the Pope's. From A.D. 484 to 519 relations between Rome and Constantinople were broken off because of the Monophysite dispute. Under Pope Gregory the Great a dispute about the title 'Ecumenical' began. Certain canons (nos. 1, 2, 3, 6, 12, 13, 36, 55, 67, 82 of the 'Quinisext' Council in *Trullo*) which condemned Western practice were not received in the West. In the Frankish Empire there arose the question of the *Filioque*, and the decisions of the 7th Ecumenical Council as to the honouring of icons were rejected. The question of the Papal territory which began in A.D. 787 was ended in A.D. 800 by the coronation of Charles the Great. Out of the 530 years of the second Period (A.D. 313–843) relations between Rome and Constantinople were interrupted during a total of 228 years. The affair of Photius and Ignatius, in which Pope Nicholas I. interfered (861), ended in the heads of the two Churches reciprocally excommunicating each other. In consequence of the insertion of the *Filioque* into the Creed and the exacerbated personal relations, the Roman peculiarities in ritual—fasting on Saturday, celibacy of the clergy, and the like—are in Photius' Epistle (A.D. 866) quoted as evidences of Rome's defection from Orthodoxy, the only defender of which was now to be found in the

Eastern Church. After the second deposition of Photius in 886, the name of the Pope was again inserted into the Diptych of the Eastern Church. At the beginning of the 10th cent. relations once more became strained over the question of the fourth marriage of the Emperor Leo the Philosopher, which after his death was condemned at the Council of A.D. 920.

In 1017 the *Filioque* was officially recognized at Rome, and in 1053 the Patriarch Michael Cerularius, dissatisfied with a plan of political alliance with the Pope, dispatched, in conjunction with the Bulgarian Archbishop Leo of Ochrida, an epistle to Bishop John of Trani, in which new accusations (unleavened bread) were added to those brought against the Pope by Photius, and the dispute which arose ended on 16th July 1054 in the excommunication of the Patriarch by the Papal Legate and the final erasure of the Pope's name from the Diptychs. Attempts at reunion of the Churches went on until the end of the period: in 1099, at the Council of Bari under Alexis I. Comnenus and Pope Paschal II. (1099-1118), under John Comnenus (1118-43), under Manuel Comnenus (1143-80), in 1232, 1250, 1274 at Lyons, in 1339 at Avignon, in 1369 at Rome, in 1439 at Florence. These were not successful, inasmuch as they were undertaken from motives not directly concerned with reunion—on the part of the Popes for the sake of increasing the area subject to their power, on the part of the Orthodox to obtain the political support of the West.

For the Musalmān conquest of the Patriarchates of Antioch, Alexandria, and Jerusalem in the 6th and 7th centuries, and the defection of the Western Church in the 9th-11th centuries, the Orthodox Church found compensation in the conversion to Orthodoxy of the populous Slavic nations in the 9th and 10th centuries. These nations formed national Churches, at first remaining dependent upon the Church of Constantinople, but afterwards forming temporarily or permanently independent (autocephalous) Orthodox Churches.

So in A.D. 864-65 the Bulgarians and the Serbs at almost the same time submitted to baptism, and in A.D. 988 the Russians. This addition, however, while increasing the number of the members of the Orthodox Church, did not stimulate any great improvement of her internal condition, partly because among the newly converted nationalities education was in a rudimentary condition, but principally because of the pressure of Mongolian nationalities from Asia. The Russian Church from A.D. 1224 to 1480 was under the yoke of the Tatars. The Church of Constantinople from the 11th cent. onwards suffered first from the Seljuk Turks, and at the same time from the Crusaders; in the 13th cent. (A.D. 1204-61) from the Crusaders who had gained possession of Constantinople; and from the 14th cent. from the Ottoman Turks. In 1361 the latter conquered Serbia, in 1393 Bulgaria, in 1453 Constantinople, in 1571 Greece, and finally in 1669 Crete, so that only one Orthodox Church was left in liberty—that of Russia.

The internal life of the Orthodox Church during this period is characterized by the decay of theological thought and of Church education. The questions in dispute were more matters of detail. The Church was chiefly disturbed by the struggle of the partisans of 'accommodation' (*okovopla*), i.e. the permissibility, for the sake of higher ends, of making certain relaxations or exceptions from the ecclesiastical laws against the partisans of *acribia* (*akpibeia*), i.e. the exact observance of the same. These disturbances arose under Patriarch Tarasius (A.D. 787-806), and continued, with interruptions, until the 13th century. On the side of *acribia* stood the monks, the defenders of the Church's independence, while 'accommodation' was de-

fended by the civil power and the secular clergy. The defenders of the former bore at various times the names of Ignatians, Nicolaites, Zealots, and Arsenians; the defenders of the latter were called Photians, Euthymians, and Politici. The struggle ended in the triumph of the former. The heresies of the period either exhibit a mystic character (Paulicians, Euchites, or Enthusiasts), or appear to be the result of Parsi influence (the *Aremurdik*, or 'sons of the sun,' in Armenia) and Judaism (*Athingmi* in Phrygia). Later on, under Alexis Comnenus in the 11th cent. we have the heretical teaching of John Italus as to the manner of the union of the two natures in Christ; at the Council of A.D. 1156-58 at Constantinople the question discussed concerned the signification of the sacrifice of the Cross; at the Council of A.D. 1166 that of the meaning of Jn 14²⁶; and in the middle of the 14th cent. the more serious controversies of the Barlaamites and Palamites or Hesychasts (1320-51) on the relation of the energy of the Deity to His essence, and on the light of Tabor. The organization of the Church suffered hardly any changes during this period. The canons established at the Councils were concerned only with particular questions. Certain new Collections of Ecclesiastical laws appeared, but the chief importance attached to the *Nomocanon* in 14 Titles as revised about A.D. 883 by the Patriarch Photius. In the 11th-12th centuries were written the commentaries on the canons by Zonaras, Aristenus, and Balsamon; and in the 14th cent. a guide to ecclesiastical law in the *Hezabiblos* of Constantine Armenopoulos, and the alphabetic *Synlogia* of Matthæus Blastares. Among the Slavs there appeared their own Collection of Canons adapted from the Greek—the *Kormchaia Kniga* ('The Steersman's Book'), in its four redactions, Bulgarian (9th cent.), Slavo-Russian (10th cent.), Serbian, and Sophian (13th cent.).

Canonically the ecclesiastical organization remained unchanged, but *de facto* the Emperors interfered more often in Church affairs, and appropriated the title of 'Holy,' and the right of deciding questions of dogma; and, on the other hand, the Constantinopolitan Patriarch's primacy of honour passed (in fact, not in theory) into primacy of power.

But the attempt to supply a dogmatic foundation for the extension of the Emperor's power in the Church and the power of one Patriarch over the others did not obtain recognition in the Church. The Patriarch had now about him a new organization, the permanent Synod (*συνόδος ἐνδημοῦσα*), consisting of bishops and patriarchal officials, and having the authority of a final, highest administrative, and judicial court. About the Patriarch there was formed a whole staff of officials ('the nine pentads'). Enormous influence on the life of the ecclesiastical community was exercised by the monasteries, especially those on Mt. Athos, the Stadium at Constantinople, the *Μέγα Σπήλαιον* in the Peloponnese, the Meteora in Thessaly, etc. They stood up for the exact observation of dogmas and canons and for ecclesiastical independence, supported the science of theology, spread education abroad, and sent out missionaries. The education of the clergy, which had declined at the end of the preceding period, in the middle of the 9th cent. recovered and attained a higher level under the Comneni in the 12th century. In the 13th cent., at the time of the Latin domination, Byzantine learning again declined; but in the 14th cent., under the Palæologi, it once more revived, though during the whole third period (as against the second period) it suffered from a want of originality. This movement, moreover, was not disregarded by the newly converted Slavic nationalities.

(4) *From 1453 to the present day.*—After the taking of Constantinople (29th May 1453) the Orthodox Church within the boundaries of Turkey retained its internal organizations without any substantial change, but the Patriarch of Constantinople, in his capacity of 'head of a nation' (*Millet-bashi*), received also civil authority over all Orthodox people. By this increase of authority, however, neither the Patriarch himself nor his flock was in the very least guaranteed against the violence of the conquerors, who regarded the *raya* as without rights and a mere source of income. The Patriarchs were forced to pay taxes beyond their resources, both at their election (*pishkesh*) and year by year (*kharādzh*). Vacancies occurred extremely often, and few Patriarchs ended their days on the throne (30 out of 103). Many were elected several times. Still worse was the position of the rest of the clergy and of the lay people, who suffered from the fanaticism of the Turks, and contributed no small number of martyrs for the faith canonized by the Church. There were martyrs also among the Patriarchs. The internal life of the Church was uneasy too by reason of the struggles of candidates for the Patriarchate and the interference with ecclesiastical affairs of the Phanariots, or rich and distinguished laymen living in Phanar (a quarter of Constantinople), who, on account of their knowledge, enjoyed influence with the Government. Some trouble resulted from the institution under Patriarch Samuel (1764–80) of the *gerusia*, an ecclesiastical oligarchy consisting of the six senior bishops and four lay Phanariots, which was abolished in 1858. It was not until the 19th cent. that the position of the Orthodox Church was improved (Khatt-i-sharif, 2nd [14th] Nov. 1839, and Khatt-i-humayün, 18th Feb. [1st March] 1856). The Turkish Constitution (14th [27th] April 1909) did not bring the anticipated advantage to the Church, and an attempt was even made to deprive the Patriarchate of its ecclesiastical privileges.

Taking advantage of the sad position of the Orthodox Church, the Popes tried to subject it to their power, and with that intent dispatched several epistles and sent a whole army of missionaries to the East. Success crowned these attempts in one region only, S. W. Russia, thanks to political circumstances. There the Jesuits succeeded in establishing the Union of Brest in 1596. The Patriarch Gregory VI. refused to accept an invitation to the Vatican Council. To Leo XIII.'s Bull on the Reunion of the Churches (20th June 1894, *Præclara gratulationis*) the Ecumenical Patriarch Anthimus VII. answered on 29th Sept. by an epistle enumerating the errors of the Roman Church. Negotiations as to union with Protestants were also unsuccessful: in 1559 between Melancthon and the Patriarch Joasaph II., in 1576–81 between the Lutherans of Tübingen and Patriarch Jeremias II., and in 1731 the attempt of Zinzendorf. Great trouble was caused by the attempt made by Cyril Lucar, who was Patriarch seven times (1612–38), to approximate Orthodoxy and Calvinism. More success has attended the attempts which are still going on to make a *rapprochement* with the Anglican Church. They were begun in 1716–25 by the party of the Non-jurors, and renewed in 1862 by the adherents of the Oxford movement. So far they have led only to the establishment in 1899 of *ἐπικοινωνία* between the Constantinopolitan and the Anglican Churches, that is, to permission given to laymen of one Church in special cases of extreme necessity to have recourse to the clergy of the other, and to an end being put to proselytizing. Negotiations, likewise still in progress, for reunion with the Old Catholic Church, which were begun soon after the establishment of the latter (Conference of Bonn, A.D. 1874), have led to no results.

The weakening of Turkey during the 19th cent. led to the process, still at work, by which the Orthodox nationalities are being freed from her yoke, and they have formed the independent States of Montenegro, Greece, Serbia, Rumania, and Bulgaria.

With the diminution of Turkish territory has proceeded the diminution of the territory subject to the Patriarchs of Constantinople, as it appeared unsuitable that the new States should continue in ecclesiastical dependence upon a Patriarch who was a Turkish subject. Autocephalous Churches have also been formed by the Orthodox nationalities of Austria-Hungary. Side by side with this the importance of the Greek nationality is lessening. At the end of the 18th cent. in all Orthodox Churches except the Russian and the Montenegrin the hierarchy was Greek. At the present time the Churches remaining Greek are the Constantinopolitan, Alexandrian, Hellenic, Cyprian, and Sinaitic. In the Church of Jerusalem the struggle of the Arabic population against the power of the Greek Brotherhood of the Holy Sepulchre has already been crowned with decided success. The unwillingness of the Greeks to give up their ecclesiastical privileges, which raised them above the other nationalities, gave rise to the schisms of Antioch and Jerusalem, now satisfactorily settled, and to the more serious Bulgarian schism.

In the Greek Church a new Collection of Canons has appeared, viz. the *Πηδάλιον*, compiled in 1793 by the Athos monks Nicodemus and Agapius, and in the Rumanian Church the Collection *Indreptarea Legii*. Both are modifications of the Slavic *Kormchaia*. In the Russian Church the *Kormchaia* ceased to be the source of law still in force, and was superseded in the 19th cent. by the *Book of Canons*, in which a place is given only to the minimum of canonical rules accepted by the whole Orthodox Church: the 85 Apostolic Canons, the Canons of the Seven Ecumenical and eleven Local Councils, and extracts from the canonical works of the thirteen Holy Fathers. There have also been published editions of canonical documents, among which special importance attaches to the so-called Athenian Syntagma (G. A. Rhallés and M. Potles, *Σύνταγμα τῶν θεῶν καὶ τῶν κατόνων*, Athens, 1852–59; M. I. Gedeon, *Κανονικαὶ Διατάξεις . . . πατριαρχῶν Κωνσταντινουπόλεως*, Constantinople, 1888–89).

3. *Present condition and geographical distribution.*—At the present time the Orthodox Church consists of 16 Orthodox Churches of which 5 are Greek: those of Constantinople, Hellas, Cyprus, Alexandria, and Sinai (in all 7,200,000 souls); 7 Slavic, viz. those of Russia (116 millions in 1911), Bulgaria, Serbia, Carlowitz, Bosnia-Herzegovina, Bukovina with Dalmatia, and Montenegro (9,920,000); 2 Rumanian, that of the Kingdom of Rumania and that of Hermannstadt in Austria (about 6 millions); and 2 Arabic, Antioch and Jerusalem (some 380,000). The ancient Church of Georgia (1,300,000 souls) now officially forms part of the Russian Church (*q.v.*).

Accordingly, the number of all the Orthodox Churches together amounts to 134 millions. All these Churches are autocephalous, i.e. independent of each other as regards internal administration, but make up one Orthodox Church, as they have one Head in Christ, and possess one doctrine and communion in sacraments and services. The communion between them also finds expression in Councils, the decisions of which are obligatory for the Churches that take part in them, or in the interchange of epistles. Both the Councils and the exchange of epistles take place rather seldom, and not regularly, mainly owing to political circumstances.

(a) **GREEK CHURCHES.**—(1) *The Constantinopolitan Patriarchate* is bounded by the frontiers of Turkey, but even within these limits the Orthodox Bulgarians are subject to the authority of the Bulgarian Exarchate. Exact statistics do not exist, but the most likely number for the Orthodox of the Patriarchate is 2½ millions in Europe, and 2 millions in Asia Minor and the Islands. At the head of the Patriarchate stands the Patriarch (since 28th Jan. [10th Feb.] 1913, Germanus v.) with the title of 'His All-holiness (Παναγιώτης), the Archbishop of Constantinople the New Rome, the Ecumenical Patriarch.' He has precedence over all Orthodox hierarchs throughout the world. The Patriarchs in the Turkish Dominions communicate with the Government through him. He has two governing bodies—the Synod and the Mixed Council. According to the Constitution of A.D. 1862, the Holy Synod (Ἱερά Σύνοδος) consists of 12 Metropolitans, half of whom retire in rotation every year. The Permanent National Mixed Council (Διαρκὲς Ἐθνικὸν Μικτὸν Συμβούλιον) consists of 12 members, 4 Metropolitans, and 8 laymen who retire at the same periods as the members of the Synod. The sphere of the Synod's activity is of a spiritual character; that of the Council relates to affairs of a civil and economic character—schools, hospitals, almshouses, looking after the Church finances, questions of legitimizing children, of testamentary dispositions, contracts, etc. Besides the Synod and the Council, the Patriarch has a large number of secondary organs of administration: the central ecclesiastical Epitropia, the pædagogic Epitropia, the Epitropia of episcopal property, the financial Epitropia, the Ecclesiastical Court of Justice, the Notary's office, the Ottoman Chancery, and a whole series of officials both spiritual (for example, the Chief πρωτοσύγκελλος, the Chief Archdeacon, and such like) and secular (as the Chief Logothete, etc.). In the Patriarchate there are numbered 78 Metropolitan sees, of which 4 are in the semi-independent Bosnia and Herzegovina. The dioceses (ἐπαρχίαι) are ruled by Metropolitans. Some Metropolitans have bishops subordinate to them, e.g. the Metropolitan of Crete has 7 suffragans, the Metropolitan of Ephesus 6, the Metropolitan of Thessalonica 5, and so on. The dependence of certain Metropolitan sees in Bosnia and Herzegovina and of the Metropolitan of Crete is purely nominal. The organ of the Patriarchate is the journal Ἐκκλησιαστικὴ Ἀλήθεια. The higher clergy receive their education in a school on the island of Chalki, in the Sea of Marmora not far from the Bosphorus (since 1844), the inferior clergy in the Seminaries at Cæsarea in Cappadocia, on the Isle of Patmos (since 1713), and on Mt. Athos (since 1899). The authority of the Patriarchate also extends to secular schools.

(2) *The Church of Hellas* was proclaimed independent of that of Constantinople at a Council of 36 bishops at Nauplia, 15th [29th] June 1833, but in Constantinople it was recognized as autocephalous only in a decision of the Synod on 11th [23rd] July 1850. Now the Church of Hellas is governed by a Synod modelled on the Russian Synod, and consisting of the President, the Metropolitans of Athens, and 4 diocesan bishops, who change every year. In purely spiritual matters the Synod is independent; in affairs of a mixed character it has to obtain the approval of the civil power. Its decisions gain the force of law on being signed by the king's Commissioner. There are 32 dioceses in all, including 4025 parishes and 1,922,000 souls. Together with the Greeks of the Diaspora, who have since 1908 been reckoned as under the authority of the Athenian Synod, they amount to 2,400,000. In 1908 there were in Greece one Metropolitan (at present Theoclitus), 6 arch-

bishops, 25 bishops, 167 men's monasteries with 1743 monks, and 10 convents with 225 nuns. The yearly income of the monasteries amounted to 2 million drachmæ, the value of their property to 60 million drachmæ. Higher theological training is received by the clergy in the theological faculty of the University of Athens, secondary instruction in seminaries—the Rhizariion at Athens, one at Arta, and one at Tripolis. The chief clerical journal is the Ἱερὰ Σύνοδος, published by the league of that name. On 15th [28th] Jan. 1910 a 'law' was published with regard to Parish Churches and their property, the qualifications of parish priests and their stipends, and on 1st [14th] Feb. 1911 a supplementary 'law' as to a central Church treasury and the administration of the monasteries.

(3) *The Cyprian Church* was recognized as autocephalous as early as the Council of Ephesus in A.D. 431. In recent times it has occasionally been subject to the influence of other Patriarchates, but formerly its autocephaly had always been recognized. At its head stands the Archbishop (at present Cyril), who bears the title of 'the Most Blessed the Archbishop of Justiniana Nova and of all Cyprus, and lives at Nicosia. His suffragans are the bishops (Metropolitans) of Paphos, Citium, and Cyrenia. The Archbishop and the Bishops make up the Synod which administers the Church of Cyprus. In the election of the Archbishop the lower clergy and the people have their part. In April 1911 the Orthodox in the island amounted to 182,737; and there were 607 churches and 79 monasteries. At Larnaca there has been a seminary since 1910, and a journal is published, Ἐκκλησιαστικὸς Κήρυξ.

(4) *The Patriarchate of Alexandria*, founded, according to tradition, by St. Luke, included in the 4th cent. Egypt, the Thebaid, Lilya, and the Pentapolis, and had more than 100 dioceses. In the 5th cent. Monophysitism spread in this region. In A.D. 638 it fell under the power of the Arabs. In the 18th cent. the patriarchs lived in Constantinople. Now it has an extremely small population. The Greeks put the number at 150,000, but, as a matter of fact, it does not reach 100,000. It is governed by the Patriarch (at present Photius), who bears the title of 'the Most Blessed Patriarch of Alexandria and all the land of Egypt, of the Pentapolis and Pelusium, of Libya and Ethiopia,' and lives in Cairo. In the Patriarchate there are (1st Jan. 1913) 7 dioceses, 5 monasteries, 31 parishes, and 55 churches. The Bishops with the Patriarch form the Synod. In Alexandria two clerical journals are published, the weekly Πάνταυρος and the monthly Ἐκκλησιαστικὸς Φάρος. In 1908 a diocese was founded in Abyssinia (Χαγρόνυ).

(5) *The Church of Sinai* consists of no more than the monastery on Mt. Sinai, built in A.D. 527 by Justinian. The monastery received autocephaly by a decision of the Council of Constantinople in 1575, which ended a controversy between Alexandria and Jerusalem as to which had authority over the monastery, by declaring it independent. The monastery is governed by the Hegumenos Archbishop, who bears the title of 'Archbishop of Mount Sinai and Raitha' (a village on the Red Sea) and 'all honourable,' and is consecrated by the Patriarch of Jerusalem (at present Porphyrius II.). The number of brothers is not more than a few dozen (now 50). At Cairo the monastery possesses a branch establishment (metochion) in which the Archbishop mostly resides; in his absence the monastery is governed by the 'Dikaïos.' The monastery is famous for its library, in which among other things was found the renowned 'Codex Sinaiticus.'

(b) *SLAVIC CHURCHES*.—(6) *Russian Church*.—See separate article.

(7) *The Bulgarian Church*, originated under King Boris in A.D. 865, was at first subject to the Patriarch of Constantinople, but very soon pretensions to authority over it were made by Rome. Under Czar Simeon it became independent and the Archbishop was raised to be a Patriarch, and this was recognized even by Constantinople in A.D. 945 under Czar Peter. Under Pope John (A.D. 1197–1207) a union with Rome was agreed upon, but it came to an end in 1232. The throne of the Patriarchs was successively at Dorostolum (Silistria), Sardica (Sophia), Voden, Moglena, Prespa, and finally at Ochrida. In 1234 a second Patriarchate was founded at Tirnova. In the 14th cent. Bulgaria was conquered by the Turks, and soon after the Patriarchy of Tirnova was subordinated to Constantinople and ranked as a Metropolitan see. But the Archbishopric of Ochrida preserved its independence until 16th [27th] January 1767, when it also was united to the Patriarchate of Constantinople. When there was an awakening of the national self-consciousness of the Bulgars in the first half of the 19th cent., there began a struggle to be ecclesiastically independent of the Greeks, and this found its consummation in the declaration of March 10th [22nd] 1870, that the Bulgarian Church was autocephalous. This was recognized by the Sultan, but not by the Patriarch. In September 1872 a Council was held in Constantinople which pronounced the Bulgarians schismatics because they had based their scheme of ecclesiastical organization upon the principle of nationality (ethnophiletism). But the decisions of this Council were not recognized by the Slavic Churches, and therefore to this day the position of the Bulgarian Church remains undefined. It consists of two parts, of which one is in Bulgaria, vassal till 1908 and now independent; the other is in Turkey. Both parts are under the Exarch (at present Joseph), who resides in Constantinople and has a deputy in Bulgaria. At Sophia there is a Synod and since 1910 there has been one at Constantinople, each consisting of 4 Metropolitans. At Constantinople there is also (since 1910) a Mixed Council, consisting of the 4 Metropolitans together with 6 laymen. In Bulgaria there are 11 bishoprics (with 3,334,790 souls), in Turkey 9 with bishops. In 1909 there were in Bulgaria 214 town churches, 2056 village churches, 75 men's and 16 women's monasteries, 9 metropolitans, one bishop, 8 archimandrites, 22 oekonomi, 1917 priests, 11 deacons, 5 archidiaconi, 49 hegumeni, 13 hegumenisse, 52 hieromonachi, 68 monks, and 247 nuns. At Sophia there is a Clerical Seminary (about 150 students), and at Bachkou a school for priests. At Sophia is published the journal *Sovétnik* ('Counsellor'). The Turkish part of the Exarchate consists of 22 sees, but there are bishops only in half of them, the rest being governed merely by Diocesan Councils, consisting of 4 clerics and 5–7 laymen. In all the population amounts to 1,057,052 souls (1906). There are 1232 churches, and 51 monasteries. At Shishli near Constantinople there is a Clerical Seminary and at Usküb (Skoplje), a Priests' School. The authority of the Exarchate extends to the secular Bulgarian schools in Turkey. The organ of the Synod of Sophia is the journal *Tserkovny Vestnik* ('Ecclesiastical Messenger'), of the Exarchate, *Vésti* ('News'). The Bulgarian Church is governed according to the 'Regulation of the Exarchate' elaborated in 1883 and adapted to the kingdom in 1895. By the law of 1908 the clergy in Bulgaria receive their stipends from the State.

(8) *The Servian Church*, founded as far back as A.D. 867, gained its independence of the Patriarch

of Constantinople A.D. 1219, and under King Stephen Dushan (1331–55), a Patriarch was appointed with his throne at Ipek. The Patriarchate of Ipek extended over a wide area, and included Montenegro, Dalmatia, Bosnia, and Herzegovina. In 1375 its autonomy was recognized by Constantinople, but between 1386 and 1459 the whole Patriarchate fell under the Turkish yoke and was united to the Bulgarian Patriarchate of Ochrida. The Patriarchate of Ipek was re-established in 1557. In 1690, under the leadership of the Patriarch Arsenius, some 200,000 souls migrated to Hungary where they formed the Church of Karlowitz. On Sept. 11th [22nd] 1766 the Patriarchate of Ipek was once more abolished and its dioceses were until 1830 ruled by Greeks, bishops nominated from Constantinople. In 1832 the Servian Church, or rather a part of it, gained some independence, and in October 1879 full autocephaly. By the *Tómos synodikós* of 1879 the Church of the kingdom of Servia is governed by a Metropolitan (at present Demetrius) and 4 bishops in the towns of Zič, Timok, Niš, and Šabac, who form the Council of Bishops. At present the organization of the Church is regulated by the law of 27th April [7th May] 1890. In 1905 the Church of Servia numbered 2,735,147 souls, 5 dioceses, 651 churches, 71 chapels, 54 monasteries (men's), 887 parishes, and 1142 clergy. The clergy are educated in the Seminary of St. Sabbas at Belgrade. Several religious journals are published at Belgrade—*Glasnik Pravoslavne Crkvi* ('The Herald of the Orthodox Church'), the organ of the College of Bishops; *Vestnik Srpske Crkve* ('The Messenger of the Servian Church'), and *Pastyrski Reč* ('Pastoral Speech'), the organ of the secular clergy. In accordance with the law of 31st Dec. 1892 [12th Jan. 1893], the clergy are supported by payments made according to a tariff for services rendered.

(9) *The Karlowitz Servian Church* was formed of the 200,000 Serbs who in 1690 migrated from the Patriarchate of Ipek under the leadership of the Patriarch Arsenius III. Crnajević, in the time of the Austrian Emperor Leopold I. The immigrants were granted rights of ecclesiastical and civil autonomy, confirmed in 1791 by the Reichstag. Their dependence upon the Patriarchate of Ipek came to an end with the abolition of the latter in 1766. In 1848 the Metropolitan of the Karlowitz Church received the title of Patriarch from Francis Joseph. In 1864 the Church of Hermannstadt was cut off from it, and in 1873 the Bukovino-Dalmatian Church. Now the Karlowitz archbishopric contains over a million members, 7 dioceses, and about 800 parishes. At the head of the archbishopric stands the Metropolitan-Patriarch with the title of 'Holiness' (at present Lucian Bogdanovich), and at the head of the bishops of the 6 sees: Karlstadt, Pakrácz, Buda, Temesvár, Vercs, and Bács. Questions of dogma are decided by a Synod consisting of all the diocesans under the presidency of the Patriarch. The Patriarch is elected by a congress of Church and people held every three years, and exercising the right to decide all matters concerning the Church's autonomy. By the Regulation of Synod, 27th July 1911, and an edict of Francis Joseph published in June 1912, the rights of the congress have been restricted, while the power of the Hierarchy has been increased. The clergy are educated in the seminary at Karlowitz, established as long ago as 1792. The Archbishopric publishes a monthly journal, *Bogoslovski Glasnik* ('The Herald of Theology'). By the Law of 1869 the clergy were assigned a stipend, glebe, and a tariff of fees for occasional offices.

(10) *The Church of Bosnia and Herzegovina* has been *de facto* autocephalous since 28th March 1880, when an agreement was made between Austria and

the Patriarchate of Constantinople, though nominally it is dependent on the Patriarchate. Down to A.D. 1766 it was under the Patriarch of Ipek, and since then under that of Constantinople. It is divided into four dioceses (Sarajevo, Mostar, Dolnja-Tuzla, Banjaluka), governed by Metropolitans. In 1910 it numbered 825,418 members. At Reliev there is a Theological College at which candidates for the priesthood are educated. Since the beginning of 1912 there has been published at Sarajevo an organ of a league of secular clergy, the *Srpski Sveštenik* ('Serbian Priest'); formerly the Archbishopric published *Istochnik* ('The Source'). The ecclesiastical organization is regulated according to a Code for Churches and Schools, published on 1st Sept. 1905 by the Austrian Government, according to which a stipend is assigned to the clergy.

(11) *The Bukovina-Dalmatian Church* consists of two parts, Zara and Bocca di Cattaro, the link between which is almost nominal—the Metropolitan see of the Bukovina and 2 dioceses in Dalmatia. The Metropolitan see is governed by the Archbishop of Czernowitz, who is Metropolitan of Bukovina and Dalmatia (at present Vladimir Repta), with his throne at the town of Czernowitz; and the dioceses of Dalmatia and Bocca di Cattaro are controlled by the bishops.

Founded in A.D. 1402, the diocese of Bukovina was at first part of the Moldavian Archbishopric; from 1768 to 1783 it was independent; from 1783 to 1873 it was part of the Archbishopric of Karlowitz, and in 1873 it became autocephalous; and at the same time the sees of Dalmatia and Bocca di Cattaro were subordinated to it. The former was founded by Napoleon I. in 1808, the second in 1873. In the Archbishopric of Bukovina there are 535,042 members (1906) and about 330 priests; in the diocese of Dalmatia (in 1910), 89,951 members, 77 priests, 54 parishes, and 3 monasteries; and in that of Bocca di Cattaro, 31,275 souls, 64 priests, 44 parishes, and 8 monasteries. Besides these there are in Lower Austria 6859, in Bohemia and Moravia 7311, in Trieste and Styria 2949 members—altogether an Orthodox diaspora of 17,119. In the Archbishopric of Bukovina the clergy are educated at the Theological faculty of the University of Czernowitz; in Dalmatia, in the Theological College at Zara. At Czernowitz a Rumano-Russian *Candela* is published. At Zara, down to 1912, there was published the *Glasnik Pravoslavne Dalmatinske Crkve* ('The Herald of the Orthodox Dalmatian Church'). In Bukovina the clergy receive their stipend from the 'Fund for the Religious,' founded in 1782; in Dalmatia, from the treasury, according to the law of 4th Feb. 1907.

(12) *The Montenegrin (Crna Gora) Church* became autocephalous in 1766, when the Patriarchate of Ipek, of which it had been a part, was abolished. Down to 1862 it was governed by Metropolitans who were at the same time the Princes of Montenegro. But in 1862 this theocracy came to an end, and Prince Danilo kept for himself the civil power only, and handed over the spiritual to a separate Metropolitan. At the present time the Montenegrin Church numbers some 220,000 members, and consists of two dioceses—Cetinje, governed by the Metropolitans (at present Metrophanes), and Zachlumje-Raša (since 1909), governed by a bishop (at present Cyril). The bishops are usually consecrated in Russia. In 1909 a law was passed defining the stipend which the parochial clergy are to receive from the State. On 30th Dec. 1903 [12th Jan. 1904] there came into force a 'Constitution for the Holy Synod,' consisting of the Metropolitans, the Bishop, 2 Archimandrites, 3 Proto-presbyters, and a Secretary. On 1st [14th]

Jan. 1904 was promulgated a 'Constitution for Spiritual Consistories.'

(c) *RUMANIAN CHURCHES*.—(13) *The Rumanian Church* has enjoyed *de facto* independence since 1864, but this was recognized by the Patriarch of Constantinople only in 1885. In 1899 it numbered 5,451,787 members, 3666 parishes with 8000 clergy, and 41 monasteries. It includes 8 dioceses, 2 Metropolitan sees, viz. the Wallachian (Bucharest) and the Moldavo-Suzavan (Jassy), and 6 bishoprics, viz. Arjish, Buzeo, Lower Danube (Galatz) Romanatz, Rimnik-Valcii, and Hush. Each of the Metropolitans and the bishops with sees has a suffragan bishop. The Church is governed by a Synod consisting of the bishops and a Highest Church Council (since 1909), in which secular clergy and laymen take part. The election of a Metropolitan and certain ecclesiastical affairs are in the competence of Parliament, but in these proceedings only Orthodox members take part. The country clergy are educated in (secondary) Seminaries with an eight year course, the town clergy at the Theological faculty of the University of Bucharest. At Bucharest is published a religious paper, the *Biserica* (i.e. *Basilica* = 'Church') *Orthodoxa Romana*. By the Law of 21st Jan. 1902 the clergy receive their stipends from the Church fund (*cassa bisericeiei*).

(14) *The Hermannstadt (Szeben) Rumanian Church in Hungary* was severed from the Archbishopric of Karlowitz in 1864 to satisfy the nationalist tendencies of the Rumanians. The Organic Statute as to its government was confirmed by the Austrian Emperor in 1889. It numbers some 1,075,000 members, and consists of 3 dioceses—the Archbishopric of Transylvania and the bishoprics of Arad and Kazan-Sebes. At the head of the Province is 'the Archbishop of Transylvania, Metropolitan of all Rumanians to be found in Hungary' (at present Joseph Metsian). As in the Archbishopric of Karlowitz, there is a Congress of the Church and people, consisting of 30 clerics and 60 laymen.

(d) *ARABIC CHURCHES*.—(15) *The Church of Antioch* numbered in the 4th cent. as many as 220 sees. In 431, Cyprus was separated from it, and in 481 the Church of Jerusalem. In 638 it fell under the power of the Arabs; in 732 it was taken back again by the Greeks, in 1098 by the Franks, and in 1268 by the Turks. It now numbers some 316,000 members, mostly Arabic-speaking, living in Syria, Cilicia, Mesopotamia, Isauria, and other provinces of Asia Minor. It is governed by a Patriarch (at present Gregory IV.), who bears the title 'Most Blessed Patriarch of the Great City of God, Antioch, and of all the East,' and resides (since 1268) in Damascus. The Patriarchate is divided into 14 sees, governed by Metropolitans. A great and beneficent work connected with it is carried on by the Russian Imperial Palestine Society, which establishes schools for the Arabs. The Patriarchate publishes in Arabic a journal called *Grace*. There is a seminary at Belesment. The Hierarchy was for a long time Greek, but the last two Patriarchs (1899) have been chosen from among the Arabs, for which reason the other Patriarchs refused for some time to recognize them.

(16) *The Church of Jerusalem* was originally a bishopric subject to the Metropolitan of Caesarea Philippi. The Council of Chalcedon made it a fifth Patriarchate, subordinating to it all the bishops of Palestine to the number of 50. From the 4th to the 8th cent. monasticism was very general in this region. In A.D. 614 it was wasted by the Persians, in 628 recovered by the Greeks, in 636 conquered by the Arabs, in 1076 by the Seljuk Turks, in 1099 by the Crusaders, in 1187 by the

Muhammadans, and finally, in 1517, by the Ottoman Turks. It now numbers no more than some 30,000 members, mostly Arabic-speaking, but is governed by Greek monks, about 80 in number, who have since 1687 formed the 'Brotherhood of the Holy Sepulchre' (Ἀγιοσταφίτικη Ἀδελφότης). The Patriarch and all the higher clergy are elected exclusively from the members of the brotherhood. The former bears the title, 'Most Blessed Patriarch of Jerusalem and all Palestine.' To the Patriarch are subject 4 Metropolitans and 11 Archbishops, of whom only a few live in their sees, the majority residing in Jerusalem. The Patriarchate is governed by a Synod, presided over by the Patriarch; the members (16) are certain members of the Brotherhood. On 20th Dec. 1910 [2nd Jan. 1911], besides the Synod, there was established, on the demand of the Arabs, a Mixed Council (Μικτὸν Συμμετέον) of 6 clergy (members of the Brotherhood) and 6 laymen (Arabs), and this slightly restricts the power of the Brotherhood in matters of marriage, Church property, and schools. In the Patriarchate a journal is published called *Néa Siwón*. In the Monastery of the Cross is a seminary, temporarily closed. Relations with the Patriarchate of Alexandria have been broken off in consequence of personal questions between the Patriarchs.

4. **The dogmatic system of Orthodoxy.**—The fundamental distinction between the dogmatic teaching of the Orthodox Church and that of other confessions consists in the particular view it takes of dogma. Orthodoxy does not allow of the possibility of dogmatic development. The complete fullness of dogmatic doctrine was once for all taught by Christ and the Apostles, and is an object of faith. Modification and development can affect only the formularization of the dogmas. Such formularization is the more authoritative according as it expresses better the faith of the whole Church at all times, i.e. according as it answers to the formula of Vincent of Lerins: *quod semper, quod ubique, quod ab omnibus*. For this reason the highest authority in the Orthodox Church is the Seven Ecumenical Councils, because they had representatives of the Church from all parts (*ubique*), and because they did not establish any new dogmas, but only formularized that which always (*semper*) had been confessed by the Church ('following after the Divine Fathers'). Guided by this principle, the Orthodox Church regards as inventions of men's minds the doctrine of the Roman Catholic Church as to the perpetual procession of the Holy Ghost from the Son as well (*Filioque*) (instead of the momentary sending of the Holy Ghost by the Son), the Immaculate Conception of the Theotokos, the Infallibility of the Pope and his power over the whole Church, and the doctrine of purgatory. The Orthodox Church is distinguished from Protestantism by its recognition of Holy Tradition as a source of teaching as to faith; by its doctrine of Seven Sacraments, not as signs of grace, but as being the grace itself; and in particular by its doctrine of the Transubstantiation of the bread and wine in the Sacrament of the Eucharist into the very body and very blood of Christ; and by its doctrine of salvation not by faith alone, but also by good works. It also rejects the Reformers' doctrine of the working of salvation by grace alone, and of unconditional predestination, and it teaches that grace works together with man's freedom (*synergismos*), and that predestination has its foundation in the Divine foreknowledge. While admitting the common priesthood of believers, the Orthodox Church admits at the same time a special priesthood in a hierarchy of three orders (Bishop, Priest, and Deacon), and that this receives its full powers not from other members of the Church, but from her

Founder Himself, and hands it on in succession by episcopal laying on of hands. Reckoning the Church on earth as only a part of the whole Church, Orthodoxy teaches the indispensability of lively communion between the Church on earth and the other part of the Church—the Church in heaven. This is expressed in prayer to the saints. Finally, Orthodoxy teaches of reverence (*προσκύνησις*) paid to relics and icons; but this reverence is, by the decision of the 7th Ecumenical Council, 'not to the wood and the paints, but to the persons represented in them.' In its moral teaching, Orthodoxy, in contradistinction to Protestantism, considers asceticism to be indispensable, not as an independent end in itself, but as a means for fallen man to reach moral perfection.

Both Holy Scripture and Holy Tradition are admitted as sources of doctrine as to faith. Any question of the comparative authority of one or the other source is impossible in Orthodoxy, inasmuch as each is merely a different mode of expressing one and the same doctrine of the Church. All its fullness is already included in Holy Scripture, and finds its foundation therein. Holy Scripture includes both canonical and uncanonical Books. Among the dogmatic documents of Holy Tradition, the highest authority attaches to the so-called *Nicæno-Constantinopolitan Creed* ('Symbol of Faith'). Its significance is not in the least undermined by attempts to show that it is of other origin, as, in any case, at the Council of Chalcedon (A.D. 451) it was recognized as being the expression of the faith of the whole Church.

A fuller statement of Orthodox teaching is given in the so-called *Symbolic books*. This expression has been borrowed from the Protestants; but, strictly speaking, *Symbolic books* do not exist in the Orthodox Church, as no single one of them has been approved by the highest ecclesiastical authority—an Ecumenical Council—and the name merely attaches to certain more or less authoritative statements of faith, the number of which cannot be exactly defined.¹ Generally the term is applied to the following statements of faith:

(1) *Pravoslávnoe Ispovédanie* ('The Orthodox Confession') of the Metropolitan of Kiev, Peter Mogilas, composed in 1638, and approved by all the Patriarchs and by the Russian Holy Synod.

(2) *The Confession of Dositheus*, Patriarch of Jerusalem, approved in 1672 by the Council of Jerusalem. It is also known by the title of *The Epistle of the Patriarchs of the Eastern Catholic Church touching the Orthodox Faith*, as it was sent in 1723 to Russia and Great Britain.

(3) *Prostránný Pravoslávnyj Catechesis* ('A Longer Orthodox Catechism') of the Orthodox Catholic Eastern Church, by the Metropolitan of Moscow, Philaret; approved in 1839 by the Russian Synod and afterwards also by the Patriarchs.

Among works on Dogma, the best known in the Russian Church are the *Dogmatic Theologies* of the Metropolitan Macarius, Archbishop Philaret, Bishop Sylvester, and the Prothiereus Malinovsky; in the Greek Church, *Ἱερά Κατήχησις, Σύστημα Δογματικῆς τῆς ὀρθοδόξου καθολικῆς ἐκκλησίας* of Z. Rhodes, Athens, 1903, and the work of Androuzou, do. 1907.

Editions (fairly well known) of the Confessions of Mogilas and Dositheus in Gr. and Lat. are: E. J. Kimmel, *Monumenta Fidei Ecclesiae Orientalis*, Jena, 1850, and earlier; I. E. Meeloras, *Συμβολικὴ τῆς ὀρθοδόξου ἀνατολικῆς ἐκκλησίας*, Athens, I. 1893, II. I. 1901, II. II. 1904; in Greek, J. Michalescu, *Θρησκεία τῆς ὀρθοδοξίας*, Leipzig, 1904. There is a German translation of the first in Hofmann, *Historia Catechismi Russorum*, Ratislav, 1761; of the second, in *Revue Internationale de Théologie*, I. [1898] 210-236; an English tr. of the Catechism of Philaret in

¹ Sometimes the title of a 'Symbolic book' is applied to the *Answers of Jeremias II., Patriarch of Constantinople* (to the Theologians of Tübingen), and the *Confession of Metrophanes Critopoulos*, afterwards Patriarch of Alexandria.

P. Schaft, *The Creeds of Christendom*, ii. (New York, 1877) 445 ff. For the newest literature, see Paul Ponomarev, 'Symbolic Books in the Russian Church,' in the *Theological Encyclopedia* [Russ.], xii., St. Petersburg, 1911.

As a basis for a summary of the dogmatic teaching of Orthodoxy we must inevitably take the *Niceno-Constantinopolitan Creed* (Symbol) as it is set forth in the above-mentioned authoritative statement of the faith of the Orthodox Church. The first Article of the Creed speaks of the Creation of all things visible and invisible by God the Father. In connexion with this the Orthodox Theologians develop the doctrine of the Holy Trinity, traces of which they find in the OT, the doctrine of angels and their seven orders, of the guardian angel, of demons, of the double bodily and spiritual composition of man's nature as a microcosm, and of Providence, under which predestination (*προορισμός*) is explained as foreknowledge (*πρόγνωσις*), through which the freedom and the fall of man become intelligible. In opposition to the Pelagians it is recognized that in Adam there sinned also all his descendants, and they are therefore liable to the same punishments, but possess a special potentiality for good as having preserved the *εἰκὼν θεοῦ* though having lost his *ὁμοιωσις*.

The second Article speaks of the Person of Jesus Christ. In developing this and the eighth article on the Holy Ghost there is given a detailed refutation of the innovation of the *Filioque*, by which is introduced teaching irreconcilable with Holy Scripture, the immutability of the Creed is violated, and a doctrine of two *ἀρχαὶ* in the Deity formulated. The teaching of the Creed as to the Godhead and manhood in Jesus Christ is supplemented by the definitions of the 3rd to the 6th Councils as to the unconfounded, immutable, inseparable, indivisible union in Him of two natures in one Person. *πρόσωπον* is by some (e.g. V. V. Bolotov) understood as the unity of self-consciousness but not of consciousness, but the majority leave this question on one side. In connexion with the teaching as to the Incarnation the doctrine of the Perpetual Virginity of the Theotokos before, at the time of, and after the birth of Christ is set forth.

The salvation of mankind through the Incarnation, Passion, Death, Resurrection, and Ascension of Christ (Articles 3-6) is understood as a deliverance from sin, the curse, and death. This salvation is completed by Christ's threefold service as King, High Priest, and Prophet. The Descent into Hell was the manifestation of Christ's kingly power, and its purpose was to liberate those who under the Old Dispensation believed in His coming. The 9th and 10th Articles speak of the Prophetic and High Priestly service of Christ. His Prophetic service consisted in His giving the doctrine of *τῶν αἰώνων* and the means for its attainment. This doctrine, passing from the Apostles to the Bishops, is preserved by means of oral and written *παράδοσις* in the Church. The Church is called 'Apostolic' because she is faithful to this Apostolic tradition; she is called 'One' because she has one Head, Christ, and in her works one Holy Ghost; she is 'Holy' because her members are made holy by true doctrine, and by the Sacraments; she is 'Catholic' because she ought to embrace the whole world. An attempt to give a more exact definition of the Church as 'the Body of Christ' has not been successful. In opposition to the Protestants it is explained that the Church is at one and the same time both visible on earth (or militant) and invisible in heaven (or triumphant). The existence of several autocephalous Churches does not contradict the unity of the Church, inasmuch as they are united by unity of confession of faith and communion in prayers and Sacraments. Her task, the salvation of souls, is exercised by the Church and those that

bear office in her, through preaching the doctrine of Christ and the Apostles, and celebrating the Sacraments established by Christ for the sanctification of men.

The 10th Article of the Creed mentions only one Sacrament—Baptism; but all statements of faith enumerate seven—*βάπτισμα, χρίσμα, εὐχαριστία, μετάνοια, ιερωσύνη, γάμος, εὐχέλαιον*. The doctrine of the seven Sacraments was not established till the 13th cent., apparently under Western influence (Council of Lyons, A.D. 1274). St. John Damascene mentions only the first three Sacraments, Dionysius the Areopagite six, and among them the taking of monastic vows and *τὰ ἐπὶ τοῖς κεκοιμημένοις τελούμενα*. The taking of monastic vows is also reckoned a Sacrament by the monk Job in A.D. 1270, and by some modern Russian theologians (Leontiev—as a form of penance; Archbishop Antonius of Volhynia).

The Sacraments are looked upon as spiritual means by which, under visible signs, there is granted an invisible grace of God, i.e. a saving force of God. The Roman Catholic doctrine of their acting *ex opere operato* is rejected. The unworthiness of the celebrant does not interfere with their efficacy; but on the side of the recipient, faith and preparation, in accordance with the ordinances of the Church, are indispensable. Baptism begins with the rite of the renouncement of Satan and his expulsion (*ἐξορκισμός*), and is administered by threefold immersion; only in the case of the sick (*τῶν κλινικῶν*) is baptism by affusion (*ἐπιχύσις*) allowable. Baptism is a new birth which annihilates original sin and all sins previously committed, and makes the baptized a member of the Church; but the consequences of sin remain in a tendency to sin and disease. At Baptism there must be sponsors. The ordinary practice is the baptism of infants as soon as possible. Re-baptism is not allowed, if only because of the words of the Creed 'one Baptism.' Baptism by heretics is recognized if it has been administered in the name of the Holy Trinity and in accordance with Christ's command. If the Greek Church in contradistinction to the Slavic Churches refuses to recognize the Baptism of the Western confessions administered by affusion, this is a modern practice and is also subject to exceptions. The ministrant of Baptism ought to be a presbyter (or bishop), but in extreme cases it may be a deacon or a layman without even excluding women, but upon return to health the rite is completed by a presbyter.

Unction is considered a substitute for the laying on of hands in Apostolic times (Ac 8⁷). It is generally administered immediately after baptism and by the same person, i.e. the presbyter or bishop, but not by a deacon or layman. It is called the *σφραγὶς δωρεὰς Πνεύματος* (2 Co 1²¹), and is repeated in the case of the reconciliation of apostates. The anointing of kings at their coronation is considered a form of unction. The consecration of chrism, which was formerly performed by every bishop, is now performed only by the very highest Hierarchs and only in certain churches; the others obtain it from them. For instance, the Church of Constantinople supplies those of Greece, Serbia, Alexandria, etc.; the Russian Church those of Bulgaria, Montenegro, and Antioch.

Holy Communion is administered to all baptized persons, infants not excepted. It is called the holiest of all the Sacraments, since in Baptism we have communion with Christ on the side of His power (*κατὰ δύναμιν*), but in the Eucharist with Him in His very essence (*κατ' οὐσίαν*). Under the form of bread (leavened) we are offered the very Body of Christ, and under the form of wine the very Blood of Christ, to the worthy unto remission of sins and unto eternal life, but to the unworthy

unto condemnation. The term 'transubstantiation' (μετουσίωσις) is borrowed from the West, but in the Orthodox Church it does not imply the raising into a dogma of Aristotle's teaching of substance and accidents, but implies only that the bread and wine upon consecration are transmuted (μεταβάλλονται) into the Body and Blood, not τυπικῶς or εἰκονικῶς, but ἀληθῶς καὶ πραγματικῶς, i.e. into the very Body and very Blood of Christ. In contradistinction to the Roman Church, Communion is administered in both kinds and with leavened bread. The consecration of the Holy Gifts takes place not by the repetition of the words of Christ, 'Take, eat . . .', but by the invocation of the Holy Ghost (ἐπικλήσις, ἐπιφθέσις). The Eucharist is not only a sacrifice of praise and thanksgiving, but also an atonement (ἱλαστήριον) on behalf of living and dead, identical in essence with the sacrifice of Golgotha. In contradistinction to the Roman Church, the participation of the faithful in the Eucharist is regarded as indispensable, and 'private masses' are not permitted at a celebration of the Eucharist. At any rate, those engaged in the service must communicate, and non-communicants receive particles of the προσφορά ('oblation') from which were taken pieces for the Sacrament (ἀντίδομα). The Eucharist can be celebrated at the same altar only once in the day, and the celebrant can celebrate only once in the day. The consecrated elements receive the same worship (λατρεία) that is due to the Lord Himself. Once consecrated, the elements remain so for ever; they are kept in pyxes and ciboria, and are used for the celebration of the Liturgy of the Pre-Sanctified and the communion of the sick. The Liturgy (i.e. the Eucharist) can be celebrated only by a priest or a bishop, and only upon an ἀντιμύησιον.

Penitence (μετάνοια) is usually taught from the age of seven years, and precedes communion. In penitence there are distinguished the moments of contrition (συντριβή), confession (ἐξομολόγησις), and remission of sins (ἄφεσις). But the Roman doctrine of satisfaction for sins on the part of the repentant is definitely rejected. Sometimes a penance (ἐπιτίμιον) is laid upon the repentant; this is meant as a spiritual exercise or self-denial necessary for a victory over evil habits, e.g. fasting on other than the appointed days. It is recommended that confession be made to one 'spiritual Father,' who acts not as a judge, as in the Roman Church, but as a spiritual physician. Denial is given to the doctrine that for sin we must suffer not only eternal but also temporary punishment, from which doctrine proceeded the theory of the *thesaurus meritorum* and the practice of indulgences.

Besides the Sacrament of Confession there is the so-called 'confession to elders,' i.e. to elders among the monks (laymen) famous for pious living.

The Sacrament of Ordination is administered by the laying on of hands (χειροτονία) by a bishop. Ordination with the three degrees—bishop, presbyter, deacon—was instituted not by the Church but by her Founder, Christ. A second conferment of ordination to the same degree is not allowed even in the case of converts, as long as the orders of the non-Orthodox Church are recognized as valid. Accordingly, Roman Catholic clerics receive the rank that belongs to them. The practice in regard to Anglicans has not been settled, and the ordination in America of the unfrocked Anglican priest Irvine, on 5th Nov. 1905, by the Russian Bishop Tychon, has no decisive bearing upon the point. Ordination is allowed only in the case of the unmarried or the once married. Marriage after ordination is not allowed. Since the Council in Trullo (A.D. 692), bishops have been exclusively chosen from among the unmarried, and mostly from those who have taken monastic vows. The rite of admission (χειροθεσία or

σφραγίς) to the minor orders or offices of the Church is not considered a Sacrament. Only two lower orders now exist, the Reader (or Singer) and the Subdeacon. Formerly there were others also—exorcist, doorkeeper, and women servants of the Church, widows, and deaconesses. Bishops, according to the sees they hold, or their distinctions in the service of the Church, bear the titles of Patriarchs, Exarchs, Metropolitans, Archbishops; presbyters of archpresbyters, protopresbyters, protohiereis; deacons of archidiaconi and protodiaconi. These are not different orders, but honorary titles. Monks are said to belong to the clergy only when they have received ordination, in which case they bear the title of *hieromonachi* (presbyters) and *hierodiaconi*. Those who have embraced the monastic life are divided into novices (ῥασοφόροι) who have not yet taken vows, monks of the lesser *schema* (μικρόσχημοι, σταυροφόροι) who have taken vows and received the tonsure, and monks of the great *schema* (μεγαλόσχημοι) who have taken specially strict vows. Monasteries are not classed in orders, but all follow the rule of St. Basil the Great, somewhat modified in modern times. Their general vows are those of chastity, obedience, and poverty. The last is variously interpreted: in some monasteries with common life (κοινόβια) monks may not possess any individual property, in others where life is not in common (ιδιόρρυθμα) they may. The heads of monasteries bear the title of *hegumeni*, those of convents *hegumenissæ*. The larger men's monasteries are ruled by Archimandrites.

Marriage is declared to be a Sacrament on the authority of Eph 5². It is preceded by betrothal (μνηστεία, ἀρραβών), formerly entered into long before marriage (even up to 10 years), but now usually, both in the Greek and in the Russian Church, celebrated just before the Sacrament. The chief moment of the Sacrament is held to be the crowning. In contradistinction to the Roman Church, in which the parties themselves are considered to be the celebrants of the Sacrament, and its essence is held to be either the *consensus* or the *copula*, the Orthodox Church considers the cleric to be the celebrant of the Sacrament, and its essence the conferring of a grace. Wedlock is allowed only between Christians, and at least one party must be Orthodox. Marriage between blood relations is forbidden to the seventh degree inclusive, both in the direct and in the collateral line. In the case of relations by marriage, wedlock is not allowed in the first four degrees. In particular, a man is not permitted to marry his brother's wife's or sister's husband's sister. An impediment is also found in spiritual relationship, i.e. relationship arising through standing sponsor at baptism. The Russian Church nowadays forbids marriage only between a godfather and the mother of his godchild, but at one time this impediment extended to the seventh degree (e.g. in the Patriarch Nicholas III. Grammaticus [1092-1107]). From this general norm there are variations both towards condescension and towards greater strictness. A second marriage is allowed, but, if both sides have been married before, it is celebrated with less pomp; a third marriage is allowed only by condescension (συγκατάβασις); a fourth is absolutely forbidden, though sometimes and in some Churches exceptions have been allowed (as nowadays in Bulgaria and Bosnia). Divorce on the authority of Mt 5³² is allowed in case of adultery, with a right to the innocent party to re-marry. In the Russian Church in recent times divorce has been allowed on other grounds, and second marriage is allowed even to the guilty party after the expiration of a period of penance.

The use of holy oil (chrism) is mentioned in Mk

16th Ja 5th; it is a Sacrament in which the body of a sick man is anointed with oil with an invocation of the grace of God which heals the diseases of the body and the weaknesses of the soul. It is usually performed by a council (Russian *sobor*) of 7 priests; hence in the Russian Church it is called 'Soborovanie.' In contradistinction to the Roman Church, which teaches regarding anointing with oil that it is the last anointing of a dying man (*extrema unctio ezeuntium*), the Orthodox Church teaches that it ought to be performed only upon the sick for their recovery and not for the dying, though the Western practice is fairly widespread. Sometimes anointing with oil is performed upon the healthy, e.g. at the Trinity Laura of St. Sergius on Maundy Thursday.

The 7th, 11th, and 12th Artt. set forth eschatology. The Orthodox Church recognizes a double judgment, one particular and not final on the soul of each human being at his death, the other general and final—'the last judgment' (the dreadful judgment) which will follow after the universal resurrection of the dead with their bodies, and will also be for those then living. Until the last Judgment those who have been condemned at the particular judgment may receive pardon through the prayers of the Church. The existence of Purgatory as a place midway between heaven and hell is not recognized.

S. V. TROITSKY.

GREEN, THOMAS HILL.—i. Life.—An adequate account of T. H. Green's life is given in the memoir prefixed to the *Works* (see Lit. below), from which the following details are selected (cf. also *DNB*, s.v.).

Green was born 7th April 1836. His father, Valentine Green, was rector of Birkin in the West Riding of Yorkshire. His relatives on both sides were clerical—a fact of some interest in estimating the influence which formed his earliest environment. His family was distantly connected with Cromwell—a circumstance which also seems to have affected Green's thought by attracting his mind to the political theories of Cromwell's time. At the age of fourteen (1850), Green went to Rugby; in 1856 he

entered Balliol College, and in 1859 gave the first proof of his ability by obtaining first-class honours in the school of Literæ Humaniores. He appears to have developed slowly; he was more inclined to meditation than to accumulation of facts, and therefore never exhibited the qualities of the prize-winning schoolboy. The trend of his thought is well indicated by his interest in Carlyle, Wordsworth, Kingsley, F. D. Maurice, and Fichte. From 1860 to 1863 he lectured in Oxford, at first on History and afterwards on Philosophy, slowly making up his mind to adopt teaching as a profession. The influence of Jowett was the one dominant factor of this period. During 1864-66, Green was engaged in the work of a Royal Commission on Education, and his reports did much to further the development of education for children of the middle classes; his interest in this type of secondary education was a phase of his democratic tendency, and lasted through life.

In 1867 he finally settled to the work of College Tutor, showing capacity for the detail of his post beyond expectation. He seems to have been eminently practical when circumstances compelled him to undertake such duties. This feature of his character became more marked later. In 1871 he married Charlotte Symonds, daughter of Dr. Symonds of Clifton, and sister of John Addington Symonds. In 1872 he began a temperance campaign, engaged in social work, opened a coffee-tavern in Oxford (1875), and was a member of the Town Council in 1876. In these activities he showed the qualities of a reformer, and might have advanced to a wider sphere of activity as member of Parliament if his health had allowed him to stand the strain. From 1881 he was actively interested in the discussions over reform of the Church in England. As early as 1867, Green was writing, largely as a way of forcing himself to work systematically. He wrote articles for the *North British Review* at that time. In 1874-75 his views were formulated in his Introductions to Hume's *Treatise of Human Nature*. This was his main work until 1878, when, having been elected Whyte's Professor of Moral Philosophy, he gave the lectures which form the *Prolegomena to Ethics*. This work never reached its final form. In 1882 he was finding new interest in Lotze as one who stood between Kant and Hegel, but the work of translating Lotze was only in its beginning when after a short illness Green died on 26th March 1882.

2. Philosophical views.—(a) *General position.*—In the history of English speculative thought Green deservedly holds a high position. He forms one part of a well-defined antithesis, in reference to which both his ideals and his achievements must be estimated. The close of the 18th cent. was a period of transition for British philosophy. On the one hand, there remained the method and principles which sprang from Descartes and were established, for Englishmen, by Locke. These had been developed, after Locke, by Berkeley and Hume, and may be called, for convenience, 'Associationism' or 'English Empiricism.' After Hume there was further progress of a somewhat desultory kind, leading to a revival of the spirit of Empiricism in James Mill, John Stuart Mill, and others. In Utilitarianism as begun by Hume, defended by James Mill, and most brilliantly expounded by J. S. Mill, there is a continuation of empirical thought, with increased emphasis on ethical and political doctrines. In the work of Bentham, speculative questions were relegated to the background. Similarly, in the case of James Mill and J. S. Mill, the real importance of their thought is to be looked for in practical as opposed to speculative questions. This must be emphasized, because Green approaches the work of Hume and Mill from this side, and is most concerned with the ethical implications of Empiricism. The roots of Green's own position are to be found in Kant, so that, in J. S. Mill and Green, British and German lines of development came into direct conflict. The position was further complicated by a new development on the British side. While Kant's successors rapidly moved away from his basis, and Hegel finally emerged as the outcome of a revolutionary development, the empirical position was further re-inforced by the work of Herbert Spencer, which ultimately incorporated Darwinism in its expansion of Empiricism. Green, therefore, found himself face to face with a growing opposition, and was compelled to attack at once Mill, G. H. Lewes, and Spencer. This whole movement is conveniently covered by the term 'Naturalism,' and it will now be clear that Green challenges in Naturalism a long line of thought which was by

no means a stagnant perpetuation of doctrine, but a living and aggressive development. In order to understand Green, it is necessary to grasp the character of this Naturalism. J. S. Mill accurately describes the nature of the first reaction against the 18th century. Speaking of the 'German-Coleridgean doctrine' he says:

'It is ontological, because that was experimental: conservative, because that was innovative: religious, because so much of that was infidel: concrete and historical, because that was matter-of-fact and prosaic' (*Dissertations*, 1859-75, I. 403).

This description of the first reaction applies to the later period also. Coleridge began the movement with a sentimental opposition to Locke's school; J. F. Ferrier (Professor of Moral Philosophy at St. Andrews, 1845-64) was vaguely Hegelian; J. H. Stirling began in 1865 to translate and expound the systems of Kant and Hegel; after him William Wallace at Oxford, and Edward Caird at Glasgow (1866-93) and Oxford, continued the work of expounding German philosophy in Britain. Thus before and during Green's time there was an established line of idealism with which he could associate himself in his opposition to Naturalism, and in all this movement there is clear evidence of the original antithesis of temper. Green's general position may be described as spiritualistic, religious, or idealistic in comparison with the Naturalism, Agnosticism, or Utilitarianism of the opposing theories. As stated above, Green associated himself with the idealistic movement. The vagueness of that expression is justified by the facts; for Green took Kant as his basis, but developed his own doctrine cautiously, and expressed considerable doubt as to the value of Hegel's position (*Works*, iii. 143). Consequently it is inaccurate to call Green Hegelian without further qualification; while the influence of Hegel is very patent, there is much in Green which should be regarded as directly developed out of earlier theories. It is partly on this account that the antagonism between J. S. Mill and Green appears now to have been often exaggerated: for Mill included under Utilitarianism a strong element of Kantian morality, and Green tended to limit himself to a combination of Platonism and Kantian rationalism. In both cases the influence of earlier British writers (e.g. Butler, Price) is a factor which tends to diminish the difference in their conclusions. When Utilitarianism took still another form at the hands of Henry Sidgwick, the controversy turned on points that were only of academic interest; for in Sidgwick, Utilitarianism made room for immediate moral judgments as originally found in Butler, thus admitting a rationalistic theory of conscience; while in Green the idea of absolute ends or absolute values, when closely inspected, becomes a formal concept of the end with no material content except just what Utilitarianism was, by then, prepared to supply.

The first consideration has been given to the ethical part of Green's work because that is the focus of his interests: and in dealing with that aspect it has become clear that Green was an opponent of Naturalism and of Utilitarianism in all the various forms which each assumed. The deepest ethical problems for a follower of Kant are naturally those of God, freedom, and immortality; Green is true to the Kantian standpoint in seeking a metaphysical basis for his ethical doctrine. To achieve this it was necessary to go back to the point from which Kant had started, namely Hume. The Introductions to Hume's *Treatise of Human Nature* (*Works*, i. 1-371) constitute a complete statement of Green's objections to English Empiricism. As these are at the same time aspects of his positive teaching, they may be summarily stated here.

(i.) Locke's theory of knowledge is declared to be grounded in a false conception of consciousness: the 'idea' is described by Locke as something given to, rather than produced by, the mind: hence the latter is said to be passive and to receive 'impressions.' The result of this false start was seen in Hume, whose work exhibited relentlessly the outcome of these premisses. To put the matter briefly, the initial error was the assertion of ideas as objects of the mind when it thinks; this Green takes to be a false analysis of experience, involving the absurd conclusion that an experience may be experience of an idea as of something given to the mind from without. On such a basis it is obvious that the self must be ultimately a complex aggregate of ideas, a product of experiences often repeated and (by association) knit together, a precipitate of time rather than a living reality. It must be admitted that Green's elaborate criticism is not always fair or relevant: there is much wearisome disputation about terminology where Locke was clearly making no effort to use technical terms; there is frequent distortion of the significance of passages due to concentration on detail in place of breadth of treatment; there is a striking lack of appreciation for the work which Locke actually achieved and for the historical background of the famous *Essay*. On the other hand, Green has a cause to plead, and his main points are strong. The real objection to Locke lay in the fact that his principles, consistently followed, led or might lead to that view of man which makes him a thinking machine, a merely animal organism, a creature without personality. The origin of these false views was to be found, Green thought, in the associationism of Locke and his followers. In denouncing this, Green was eminently in the right; his persistent challenge to Empiricism to show how a series of sensations could know itself as a series produced no answer: the doctrine, like its original supporters, was dead. With this point gained, the whole position is reversed: as the series does not sum itself, there must be a permanent self which does sum the series; this self must be active, not passive, and therefore the sensations, feelings, desires must all be phases of its activity rather than data which it receives more or less passively. Again, if we look to the objective system, we find there not only things in the cruder empirical sense of substances, but also relations; relations cannot be antecedents of the act of thinking, because they are not things that make 'impressions'; they are essentially the 'work of the mind.' Locke (from Green's point of view) was wrong in attaching so little importance to the work of the mind, for it now becomes obvious that not only relations but all that Locke would have called 'objects' are 'work of the mind'; they are not things, hopelessly external to our neuro-cerebral organism, but complexes of relations, nuclei in a network of experience. Thus, through a criticism of Empiricism, Green expounds a form of critical idealism based on Kant.

(ii.) The complement of this speculative theory is the practical theory: after treating the 'understanding,' it is necessary to discuss the principles of morals. The connexion is obvious: if the analysis of the understanding leaves us with no 'self' capable of originating action, there can be no responsibility and no morality. Green was aware that Hume could not be answered by a dogmatic reassertion of Intuitionism. Hume's position was extremely subtle: if his doctrine involved denial of the self, it none the less provided a working substitute in that product of habit and association which the average man might be satisfied to call his 'self'; if his position seemed to cut man off from all communication with God and

deny all affinity between human nature and the Divine nature, it yet left the average layman a sphere of aspirations and scope for social labours. There could be no doubt that, if the only escape from Hume was by retrogression to Cudworth, the case was hopeless. Was it necessary to escape at all? The answer to that seemed to be written in the history of Deism, in growing infidelity, in the fact that the average man is never content to think of himself as a creature of circumstances (cf. *Works*, iii., xxii.), but either rises above that estimate of himself or sinks below it to moral degradation. Green saw that morality belongs only to persons as self-determining agents; his task was to prove the possibility of morality by removing the objections to the view that men are self-determining agents; and he achieved this in an argument that deserves more attention than it has received. The point is in strict conformity with the previous demonstration that an idea cannot come from without into the mind, but must be itself a product of the mind, an expression of mental or spiritual activity. From this it follows that we must revise the use of such terms as 'pleasant,' 'tempting,' and the like. These can no longer be taken to indicate permanent qualities of objects independent of the mind. An object is 'pleasant' only when a person regards it in that way; an opportunity is 'tempting' only when a self-determining agent pronounces it such (*Prolegomena*, 98). Through thinking of pleasures and pains as things that act on the self, men had come to regard themselves as victims of circumstances or propensities. Hume finally declared reason to be the slave of the passions; no other conclusion was possible while reason and the passions were external one to another; Green's answer is based on his proof that reason is the root of the passions. The new position had far-reaching consequences: if pleasures and pains can in this way be taken up into the life of the self, if the environment is no longer a sum of irresistible attractions and repulsions, Green can triumphantly vindicate the moral life as a life of self-determination and self-realization.

These two phases of the opposition to Hume so far exhibit Green's main position that it is unnecessary to examine with the same care his attacks on G. H. Lewes and Herbert Spencer. Between Green and those writers who laid emphasis on the physical substratum of the mind, the natural history of morals, and the continuity of animal and human natures, there was hardly sufficient sympathy to make the antagonism interesting. With J. S. Mill and Sidgwick the case is different. Green naturally found in Mill's system the most significant exposition of Hedonism. J. S. Mill appeared to him simply as the heir of those doctrines which Bentham originated and James Mill advanced; the allowances which should be made on account of Mill's own condemnation of Benthamism are made by Green in word only; there is no real surrender of the belief that Utilitarianism is wrong, and that Mill's doctrine is the old Utilitarianism in new armour. In this Green was decidedly at fault; if he had ever realized the extent to which Mill was under the influence of Butler and Kant, he would not have been the precursor of a whole generation of shortsighted attacks on Mill. As will be shown later, Green's central position is religious; and on questions of religion Mill and Green were antagonistic by birth, breeding, and nature. Green divided with Mill the allegiance of the public, largely because of the natural affinity between Green's point of view and that of the advanced thinker in religious matters. Mill, on the other hand, appealed more directly to those who set social progress before the philosophy of

religion, including also those who were so far secular as to be anti-clerical, and so far opposed to orthodox beliefs as to welcome the 'irreligion of the future.' Here, again, the exaggeration of differences was unfortunate: Mill's views on religion were not directed against such refined theology as that of Green, and Green on questions of social progress was fervent enough to satisfy any utilitarian. But of all philosophers since Socrates it has been true that by their followers ye shall know them. Green and Mill were not really in the same plane. Mill belonged to the world of affairs, and his ethical writings are the theoretical background of social and political propaganda. Green is primarily academic; his atmosphere is the rarefied air of dialectics, smokeless if not cloudless. It is only necessary to read Green's criticism of Mill's *Logic* (ii. 195) to realize the difference: in the analysis of thought-processes, Green may win an easy victory; but the investigator in the laboratory or the field, handling 'things,' finds in Mill the more instructive guide; and, even where modern scientific method rejects Mill, it does not reject him in order to accept Green. As compared with Mill, Sidgwick was more akin to Green in his academic mode of thought; he could and did meet Green on his own ground; he attacked his metaphysics, criticized his demonstration of freedom, freely and mercilessly analyzed those vague phrases in which Green expressed his aspirations and too often obscured his meaning. But this, again, was not of ultimate significance; the only really valuable criticism made by Sidgwick on Green was the publication of his own version of Utilitarianism.

(b) *Speculative groundwork.*—In the exposition of his thoughts, Green was hampered by his familiarity with German modes of expression. In place of the lucid English of Hume, Green employs a technical language which baffles the untrained reader. His phrases undoubtedly reflect at times a want of clearness in the thoughts; but, as this is not the place to discuss details, an attempt will be made to state his principal ideas in ordinary terms; and those ideas were, we believe, for Green clear and distinct. It must be granted that some ideas are more easily expressed than others; also, the expression of convictions which are akin to religious experiences is notoriously difficult, easily ridiculed, and hardly ever intelligible to those who have no memory of similar experiences. Green's whole philosophy is the outcome of a profound conviction of the deep significance of personality. He saw in contemporary English philosophy an implicit reduction of personality to illusion, an analysis which ultimately explains it away. In Kant he saw the basis of a different philosophy, which could be employed to refute English Empiricism and open the way for a different expression of moral values. Having shown that Locke and his followers were at fault in their psychological method and their idea of the objective world, Green proceeds to argue that experience properly treated (i.e. in Kant's way) proves that there is a 'spiritual principle' in Nature. The world is for common sense a collection of objects in space. On the Kantian basis, space is a form of perception, and 'objects' are discriminated experiences, having differences which reflect the ultimate differences of 'things,' i.e. of those stimuli to which we refer our distinct experiences. The word 'Nature' is thus interpreted to mean a complex of experiences which indicate a ground of experience beyond themselves and constitute a system. This system is objectively real, because it is real for all rational beings, but not objective in the sense of being set over against the thinker as alien to thought. Thus, the old distinction of subjective and objec-

tive, opposed as inner and outer, is removed; the thinker and that which is thought are not divided from one another; they are not divisions of the universe, but distinctions arising out of experience, in which they have first been given as a unity. Since 'Nature' in this sense is always continuous (not an aggregate of empirical 'things'), distinctions are made by thought, and similarly laws of Nature are made by thought. But, as these laws are not arbitrary dictates so much as the revelation of rationality in the universe, it is argued that experience, thus analyzed, leads to the conclusion that there is a spiritual principle in all things—in the thinker as his capacity of thinking, and in the objective reality as its capacity of being thought. From this can be deduced (1) the ultimate unity of subject and object as collateral manifestations of one principle (which is called the higher unity, as taking precedence over the unification of separate experiences in one personality); and (2) the freedom of the individual conscious activity, because that 'Nature' which in Empiricism tends to be presented as controlling conscious activity is now shown to be one of its manifestations. This position bristles with difficulties, but its main point is not without justification. Empiricism certainly inclined to the belief that man is a material organism, that thought is a function of the nerves, and that circumstances control action. Against this Green would assert that the nature of man is spiritual, that the physical body is not the cause of thought but its instrument, and that circumstances are no more than occasions for the exercise of freedom in choice. The metaphysical discussions thus prepare the way for the ethical doctrine.

(c) *Ethical and religious views.*—Green's proof of freedom, the basis of his ethical work, amounts to a demonstration that the physical aspect of man cannot be cited as the true cause of his actions. To make morality possible it is not necessary to prove liberty in the sense of unmotivated choice. That phase of the dispute between advocates of necessity and defenders of freedom was past before Green wrote; both parties had already admitted that choice is determined by motives; they were both, therefore, determinist, but divided upon the question of the factors which determine choice. Those who favoured materialism declared that the factors which determine choice are external to the self, parts of that outer world called the not-self. On their side could be quoted the part which physiological changes play in producing psychological states, hereditary dispositions, and the like. Green, on the other side, maintained that what was external (if anything) cannot affect choice, from the very fact that it is external. To affect choice the so-called external influence must become part of experience; it must, therefore, be a phase of conscious life. In part this means no more than that desire, wish, will, and reason are all aspects of experience, and not to be treated as capable of antagonism. If in popular language we may say that our reason is overcome by desire, the philosopher has to recognize that this is inaccurate: reason and desire, if so related as to be distinguished, must, for that very reason, be also contained in a 'higher unity' which is their real identity. Thus the first phase of Green's ethical doctrine is the demonstration of the unity of the self. The second point dealt with is the continuity of the self in time. Though the self is one, it is not therefore static; it develops in and through a time-process. But moral development is not of the same kind as physical growth; it is not a mere accretion of parts. On the contrary, moral development is possible only for a being that sets before itself the idea of a condition which is not yet realized, and which,

when realized, is not other than a condition or state of itself. The moral development of a rational being is, therefore, to be regarded as the continuous realization of the capacities of the self, a ceaseless recognition of incompleteness accompanying the striving after greater completeness.

The central point of the theory is in harmony with the general position sketched above; evolution is not a sequence of disconnected states resulting from changes in the environment, but an evolution of spirit dependent throughout on the activity of a self-determining agent. The third point is the most difficult. Green essays to prove that this doctrine of spiritual evolution or personal self-realization necessarily implies a similar universal evolution. Taking history as a whole, he describes the development of the moral ideal as a process in which not men as individuals but humanity as a whole continuously realizes its 'self.' This involves at once the notorious difficulty of explaining the nature of such a universal 'self.' Green never succeeded in bridging the gulf between these two concepts of 'self.' In dealing with the individual he gave an interpretation of the idea of 'self-preservation' (the key-word of Hobbes and Spinoza alike) which successfully rebutted the arguments of the anti-rationalists; he converted the physical self-preservation into spiritual self-realization. It was possible to go further, and, under the lead of Plato and Hegel, insist on the spiritual view of society, thus making the co-operation of individuals in society something more than a mere compromise to attain material comfort. But beyond the individual and the aggregate of individuals in society, there is in Green the idea of a totality, a universe of rational beings which also becomes one in a higher unity. The opponents of Green's view were never satisfied that this was not Mysticism. The language of the *Prolegomena* particularly gave offence on this account. It did not seem possible to accept Green's terminology without developing pantheism from his position. If the personal realization of ends is to be regarded as also the realization of ends that are super-personal, is it not only too true that man is the vehicle of a Divine consciousness? Will it not then be true that self-realization is not, in fact, properly personal at all? If, on the other hand, emphasis is laid on personality, what becomes of the will to be evil, which must be a contradiction of Divine will, a refusal to be the vehicle of Divine consciousness?

These difficulties must be faced in judging Green's position, and in estimating the nature of his influence; but it would be an error to magnify their importance. The spiritual view of man and of society upheld by Green is one phase of a great tradition; in supporting it he was in the main striving to give a re-interpretation of Platonic and Hegelian views. The ethical doctrine runs up into religious beliefs which do not admit of the same treatment. Through the ambiguities of Green's language we see the essential meaning: man is never an isolated individual cut off from the rest of the universe; he is always in relation to the world about him. Life is a name for the complex activities in which personalities are like nuclei in the network of relations; take from a being all its relations, and it becomes abstract, not (as the empiricists implied) a concrete self-subsistent individual. Thus the whole comes before the parts in the case of man and of society; the reality in which man finds his own realization is always above and beyond him no less than in him; we build better than we know. From such a position it is at least consistent to declare that the will of God is above all and yet finds its realization only through individual wills; to feel also that the

essence of religion is the experience of co-operation with God, and that, mystery though it be, yet in Him we live and move and have our being.

Green, though never opposed to orthodox Christianity, was often unable to accept the ordinary formulae of ecclesiastical religion. The task of addressing his pupils on the day before the Sunday on which Communion was administered was one of the occasions on which he felt most acutely that his mode of thought was not that of the man who is religious without being philosophical. The truth was that Green desired to get away from outward forms and phrases and concentrate on spiritual significance. His faith was deep but not conventional, and required for its understanding a sympathy not often accorded by the average church-goer or even the average clergyman. In St. Paul's writings, Green found a meeting-point for the Christian tradition and his own idealism. The deepest life of man is the inner self-consciousness; the life of thought is a perpetual revelation of the self which indicates infinite possibilities; man has, therefore, in himself a witness to God, for God is thinkable only as the realization of all that man has in him to become. As God is thus, objectively, the sum of perfection, so in man religion is faith in that perfection. Faith is not a belief in facts resting on historical evidence; it is rather the immediate consciousness of 'potential unity with God,' an experience rather than an acceptance of proofs. The position is stated in essence in the *Prolegomena* (§ 187):

'He is a Being in whom we exist, with whom we are in principle one: with whom the human spirit is identical, in the sense that He is all which the human spirit is capable of becoming.'

At a period when religious men were inclined to rise up in arms against all re-interpretation of dogma, whether due to philosophy or to science, Green's views were of a kind not to be rashly disseminated. This he knew; but he was not in any sense troubled by doubts; he rested securely in the personal conviction of truth, and feared not for religion, but for those who by narrowness of interpretation were imperiling the adequacy of religion for life.

(d) *Political philosophy.*—It is possible to write on Logic, Ethics, or Metaphysics without being truly philosophic, but it is not possible to be truly philosophic without coming to terms with the daily life of common people. The moral philosopher is most severely tested at the point where the individual and the common good come into consideration, for he has then to choose the way in which he will formulate their relation and maintain their agreement or their incompatibility. This fact was realized by Green. He saw the significance of political philosophy for his own outlook, and at the same time he had a natural tendency towards an active participation in schemes which might be thought wholly uncongenial to an academic tutor. In Green's political philosophy can be found the most concrete expression of his thought. His academic work in teaching Aristotle stimulated his appreciation of civic life and ideals; his religious emotions, always mildly anti-clerical, found an outlet in the theoretical and practical fostering of common life; his Anglo-German idealism was a further incentive to study the life of societies, these being so clearly capable of interpretation as the realization of identity in difference, unity in plurality. Looked at from this angle, society or the life of communities appears as that higher universal with which the individual has most immediate contact. Whether the individual recognizes it or not, every act has significance for the whole community; the life of the individual is nothing apart from the community; and, conversely, the

community progresses in and through the life of individuals. Here again there is room for mysticism; but the sphere is not so abstruse or remote as that of religion; it is possible to demonstrate in some degree that history supports this point of view. Green united modern and ancient politics in proof of his position. Among the Greeks the civic spirit was for him the spiritual element in the history of the City-States. In the democratic movement of his own day he saw a wider manifestation of the same spirit. He regarded the political history of the West as the record of a continual expansion of the common good, checked by private greed and dishonesty, yet never wholly prevented from growing wider and deeper. His sympathy with the work of Bright and Cobden was that of a fervid partisan for those who practised what he preached. The result was a complex attitude highly characteristic of Green. He has been rightly described as a political idealist, a philosophical radical, and a religious radical. The apparent contradictions are easily explained. In his political theory Green kept hold of the idea of personality more successfully than in his metaphysics. This led consistently enough to the demand that all persons should (in Kant's language) be treated as persons; the State has for its primary object the removal of all obstructions to free personal development. In this recognition of liberty, equality, and freedom, Green did not accept the extreme views latent in Rousseau's doctrine; he inclined more towards Burke's view, because the latter had more adequately recognized the universal essence, the relations embodied in habitudes and institutions which make man what he is (iii. 117). Thus Green's radicalism, rooted in his valuation of personality, was tempered by reverence for institutions which represent the consciousness of society, and have therefore something of universal significance. Lastly, there was the ever-present conception of a spiritual principle as an abiding factor in all the changes of political development. This element—partly metaphysical, partly religious—welds together for Green all the divisions of life into a unitary manifestation of the permanent Divine agency at work in the historical evolution of society. The firm belief that nothing is wholly bad moderated Green's radicalism; the equally firm belief in progress prevented him from acquiescing in established conditions. In his own political activities, whether in questions of educational reform or of social legislation, he found his theory adequate; it was a reason for extending knowledge among all classes, as it was a reason for supporting the abolition of slavery even at the cost of war. In brief, his own genius converted his idealism into the working faith of a social reformer; in practice he was heart and soul with the progressive tactics of the utilitarians, and in this part of his life's work nothing separated him from the better class of utilitarians except the significant assertion in which he persisted, that the ultimate end of society is not comfort but character.

LITERATURE.—The works of T. H. Green are published in three volumes with a memoir by E. L. Nettleship, London, 1885-88. This edition contains all the important writings except the *Prolegomena to Ethics*, which is published separately (ed. A. C. Bradley, 3rd ed., Oxford, 1900). An exposition of Green's thought is given by W. H. Fairbrother, *The Philosophy of Thomas Hill Green*, London, 1898. But the most instructive views of Green are to be found in more general works of which two deserve special mention: Henry Sidgwick, *Lectures on the Ethics of T. H. Green*, Mr. Herbert Spencer and J. Martineau, London, 1902 (a keen criticism); and the essay on 'Green,' in John McCann, *Six Radical Thinkers*, London, 1907 (a sound appreciation of Green's spirit and aims). Mention should also be made of A. W. Benn's *The History of English Rationalism in the Nineteenth Century*, London, 1906, which deals with English Hegelianism and its relation to the philosophy of religion.

GRIFFIN.—See SYMBOLS.

GROTIUS.—In this article attention will be directed mainly to the contributions made by Grotius to the development of religious and ethical thought. It will be unnecessary, therefore, to do more than indicate in outline the chief events of his life.

1. **Life.**—Hugo Grotius was born on 10th April 1583, and was from early years brought under the influence of those more liberal ideas in theology of which afterwards he himself became a powerful champion. His tutor was Uytendbogaert, subsequently a friend of Arminius and a leader of the party of the Remonstrants. At the University of Leyden, to which he went at the age of twelve, he attended the lectures of Scaliger, and very soon exhibited an extraordinary proficiency in scholarship. So much attention did his precocious talents attract that, when no more than twenty years of age, he was commissioned to write the history of the national struggle against Spain. His work as historiographer, viz. *Annales et Historiæ de Rebus Belgicis*, was, however, not published during his lifetime. It was edited by his sons and issued in 1657. His professional advancement was rapid. He was appointed to the office of Advocate General of the Fisc of the Provinces of Holland and Zealand, and in 1618 became Pensionary of Rotterdam, thus acquiring a seat in the States of Holland. In the same year he proceeded on a mission to England, connected with a Fisheries' dispute. Here he came into touch with Overall, with Andrewes, and, in particular, with Casaubon, who was most favourably impressed with his appearance and intelligence (Casaubon, *Epp.* 881). Between the two men there was a kinship of spirit and a community of aim bringing them together in spite of the disparity of their ages. Both were true Christian scholars, earnestly desirous of seeing the differences of Christendom composed, and hopeful of the results which would follow from an unbiased and well-informed appeal to antiquity.

Grotius on his return to Holland found the flood of religious rancour in full stream. The controversy about Predestination and other points of Calvinistic doctrine, which had begun between the two university professors, Gomarus and Arminius, had so widened its scope as to become a pressing national danger. Although the protagonist, Arminius, had died in 1609, his followers continued to defend the positions which he had maintained, and in 1610 drew up the famous *Remonstrantie*, from which the party derived their name of 'Remonstrants.' The Gomarists replied with the *Contra-Remonstrantie*. Politics mingled with religion. On the side of the Remonstrants was Oldenbarnevelt. Their opponents could reckon on the support and sympathy of Prince Maurice. In 1614 the States of Holland passed an ordinance forbidding the preachers to deal from the pulpit with the points in dispute, the resolution to this effect having been moved by Grotius. This attempt to suppress religious controversy by means of the action of the secular power proved a disastrous failure. However well intentioned, it only aggravated the evil which it was intended to alleviate. The strife continually increased in bitterness, until in 1618 a definite crisis was reached, and the States General ordered the arrest of Oldenbarnevelt and of Grotius. After a trial, which was little better than a travesty of justice, the former was condemned to death and executed as a traitor, the latter consigned to perpetual imprisonment. At the same time the Synod of Dort assembled, and repudiated in unqualified terms the theology of the Remonstrants.

Some two years later Grotius, with the help of his wife, escaped from the castle of Loevestein, where he was incarcerated, and took refuge in France. There he composed, and in 1624 published, his most famous treatise, the *de Jure Belli et Pacis*. The book obtained prompt and wide recognition, immensely increasing the already high reputation of its author. Grotius, however, in spite of the fact that a pension had been granted him, found it no easy matter to maintain himself and his family. After some fruitless efforts to gain permission to return to Holland he accepted, in 1634, the office of Swedish ambassador to the Court of France. The duties of this office he discharged faithfully, but without conspicuous success, for ten years. Finally, determining to retire from the post, he went to Stockholm in order to place his resignation in the hands of the Queen of Sweden. It was on his return thence that he was overtaken by a sudden illness and died at Rostock (1645).

Even this brief record is sufficient to show that Grotius' life was not spent in learned leisure. From early manhood he was a busy professional man, engaged in multifarious duties. It is a matter of astonishment that, in spite of all distractions, he should have achieved so large a literary output of permanent value. So versatile was his genius that, in order to obtain some definite conception of the character of his work, it will be well to comment on his productions, under several headings.

2. **As Christian apologist.**—Of all the writings of Grotius, probably the most widely read has been the unpretentious little book entitled *de Veritate Religionis Christianæ*. A special interest attaches to its origin. The germ of the book was composed

in vernacular verse, in order that it might be committed to memory by Dutch sailors and traders, and by them be employed, as occasion served, for the propagation of the faith. Subsequently he expanded this material into a short Latin treatise in six books (1627). In the first book he lays down the fundamental principles of natural religion—the being and attributes of God, and the immortality of the soul; the second is devoted to an examination of the claims of Jesus Christ to be the teacher of the true religion; the third deals with the authority of the Bible; the remaining three books are concerned with destructive criticism of Paganism, Judaism, and Muhammadanism.

It may fairly be said that this small volume initiated a new kind of Christian Apology. Not that it introduced any new arguments. The author explicitly professes to base his work on that of earlier Apologists, among whom he names, in particular, Raymond of Salunde, Luis Vives, and Philip de Mornay. In fact, the principles which underlie Grotius' treatment of his subject do not differ essentially from those of the classical scholastic Apology, the *Summa contra Gentiles* of Thomas Aquinas. There is the same confident appeal to the natural reason and natural conscience of man, the same unshaken assurance of the impossibility of any radical opposition between reason and faith. But the difference in the method of presentment is obvious. Theology has issued from the study and come down into the market-place. Hence both loss and gain. There is loss in the consequent surrender of completeness of treatment, and in the avoidance of difficult but accurate technicalities. On the other hand, there is a noteworthy gain in compression, in simplicity, and in directness of statement. The arguments put forward are such as make their appeal to the mind of the plain man without expert knowledge. Moral considerations are placed in the forefront; much is made of the obvious superiority of Christian ethics. In fact, the proof of the truth of the Christian religion is made to rest on three supports—the height of the ideal which it sets before men for attainment, the excellence of its rules of duty towards God and man, the pre-eminence of its Founder as testified by the miracles which He was enabled to work.

In writing of the Bible, Grotius naturally defends positions from which modern criticism would dissent; but it is interesting to notice how soberly he insists on the natural value of the testimony of Biblical authors, their opportunities for accurate observation, and their unmistakable good faith. At the time he was criticized for omitting to mention such fundamental doctrines of Christianity as the Trinity and the Atonement. But the criticism is beside the point. It was not his purpose to write a treatise, however elementary, on Christian Doctrine. Rather he set himself the practical task of proving to inquirers the reasonableness of submission to the teaching of Jesus Christ. What that teaching actually was they might learn from recognized sources, especially from Holy Scripture. Thus we have in the *de Veritate* an excellent example of the Christian Apology written by a layman for the use of the laity. It is brief, pointed, practical, effective. That it answered its purpose may be inferred from the number of editions that were called for, and from the fact that it was promptly translated into several European languages.

3. As dogmatic theologian.—During the lifetime of Grotius, Holland was a hotbed of theological controversy. In these discussions he took a share, influenced not by any partisan spirit, but by the desire to make a good use of his wide and intimate acquaintance with Christian writers

of all ages, and to furnish such a statement of the truth as might help to reconcile discordant opinions. His methods may best be illustrated by his treatment of the two burning questions—the theory of the Atonement and that of Predestination.

(a) Grotius' views on the Atonement are to be found in the *Defensio Fidei Catholicae de Satisfactione Christi*, a treatise directed against the opinions of Socinus. He declares himself entirely dissatisfied with the explanation given by Socinus of the connexion between Christ's death and our forgiveness. It is not enough to say that Christ preached forgiveness and gave His life to be a pledge of the truth of His preaching; that by His death He gained the right to distribute pardon; that He gave us a supreme example of patience; and that by the Cross He instils into us that faith which is the necessary condition of forgiveness. Above and beyond this, Christ's sufferings must be recognized as vicarious punishment, notwithstanding His innocence. For Grotius boldly maintains it to be not of the essence of punishment that it should fall upon the shoulders of the guilty party: 'Affirmo non esse simpliciter iniquum aut contra naturam poenae ut quis puniatur ob peccata aliena.' It cannot, therefore, be said *a priori* that Christ's punishment on our behalf involved an injustice. The view that sin can be regarded as merely constituting a debt, and its punishment remitted without other consideration than the willingness of the creditor to forgo payment, is severely criticized. In opposition to this 'debit and credit' conception of the relation between sin and its punishment, he views the matter as a kind of legal transaction, God filling the rôle of Rector or Governor, and man that of culprit. The Governor's function is explained to be the administration of laws, which have been devised for, and are enforced in the interest of, the common good of the governed. Yet this enforcement is not a matter of mechanical rigidity. Room is left for the exercise of discretion, and the law which requires the due punishment of the offender is subject to dispensation. Having made these preliminary explanations, Grotius proceeds to state his theory of the Divine forgiveness in terms of the law-court. A *solutio* involves the removal of an obligation. In some cases the *solutio* immediately cancels the obligation, as when a debt is fully paid or a penalty fully borne. Let it be remembered that the person who provides the *solutio* need not necessarily be the debtor or criminal, but may be some one else acting in his name. In these cases there is no remission because no part of the debt has been left unpaid, no part of the penalty omitted. But in other cases, where the settlement is not thus complete, there can be no discharge of obligation unless the governor officially intervenes and decides that some offered compensation shall be accounted sufficient for the purpose. In relation to the law, this act of the Governor is dispensation; in relation to the offender, remission. The compensation is, properly speaking, a *satisfactio*, not amounting to a *solutio* strictly so called. Thus Grotius dissents from Anselm's theory of the Atonement, according to which the price paid by Christ was the equivalent of the debt due from man, the infinite value of the death corresponding to the infinite amount of sin. Grotius holds that Christ, by submitting Himself to suffering and death, offered a true *satisfactio*, which, by the act of God as Governor, was accepted as a sufficient reason for granting to guilty man a remission from the obligation to pay the penalty for his sins. When a debt is remitted without any *solutio*, the transaction is called *acceptilatio*. If the discharge follows upon the substitution of some new obligation in place of the old, the term used is *novatio*. With the help of these

technical terms Grotius condenses his theory into the following sentence:

'Non est acceptatio; non est solutio rei ipsius debite; non est novatio; sed est remissio antecedente satisfactio.' 'There is no unconditional absolution; there is no payment of the exact debt; there is no substitution of a new obligation; but there is a remission in consequence of a precedent satisfaction.'

Two further points remain for consideration. Why did the Almighty adopt this method of requiring satisfaction before forgiveness; and why was Christ the person to provide it? To the first question Grotius replies that there was, indeed, no absolute necessity for the choice of this particular mode of Atonement, but that God selected it in order that He might thereby manifest at the same time the greatest number of His attributes, viz. His clemency, His severity or hatred of sin, and His concern for upholding the law. To the second question he answers that Christ was pre-eminently suited to provide the requisite satisfaction, because of His incomparable dignity, and because of His close connexion with ourselves as head of the body of which we are the members. His death ensured our forgiveness, while at the same time it was a conspicuous demonstration of the Divine justice.

This theory of the Atonement has not escaped severe criticism. H. N. Oxenham writes of it as follows:

'Of all the strange notions that at various times have darkened the revelation of Calvary it would be hard perhaps to find any more strange than this, which eliminates from the greatest fact of history all real significance, while it dares to interpose between man and God the fiction of misdirected vengeance' (*Catholic Doctrine of the Atonement*³, London, 1881, p. 263).

But in passing judgment upon Grotius it would be unfair to forget that his theory was framed to meet a particular difficulty. Socinus had forcibly urged the incompatibility of free forgiveness with the demand for satisfaction. Let men choose, he had said in effect, between the view that God is ready to forgive sins freely and the view that He requires the satisfaction of the Atonement. Grotius set himself to show that the supposed contradiction does not exist, and that it is possible to combine belief in the freedom of Divine forgiveness with belief in the necessity of the Atonement. To this particular end his argument was well adapted. It disposed once for all of the unsound dilemma which Socinus had set up. At the same time it is impossible to close one's eyes to the very serious defects of this so-called 'Governmental Theory' of the Atonement. The attempt to express the sacred and tender relation between God and the erring soul in terms of human law could not be otherwise than unsuccessful. That the analogy between sin and crime enabled Grotius to bring out some points clearly is true. He showed convincingly the weakness of the conception of sin as mere debt. But the hard and rigid ideas of sovereignty and administration are wholly inadequate for the purpose which they are made to serve. The royalty of God is allowed to obscure His fatherhood. Moreover, the theory of Anselm, with all its shortcomings, had at least suggested a reason why the sufferer should be God Incarnate, viz. in order that there might be an equivalence between injury and compensation. This reason disappears from Grotius' statement of the case, and there is nothing to put in its stead. Grotius throughout appears strangely unconscious that he is speaking of a mysterious truth in merely analogical terms, and that the spiritual fact could at best be roughly indicated by what is, after all, no more than a complicated and highly elaborated metaphor.

(b) With regard to Predestination, Grotius' desire to discover a *via media* between extreme opinions is even more clearly exhibited. The *Conciliatio Dissidentium de Re Predestinaria et Gratia Opinionum* is exactly what it purports to

be—an attempt so to state the problem as to lessen the bitterness of controversy. Its mediating tendency becomes specially apparent if its statements be contrasted with the outspoken declarations of the Five Articles of the *Remonstrantie*. In a certain sense the Arminians held the tenet of Predestination; but it was a predestination to eternal life, conditional upon the Divine foreknowledge of the faith of the individual. Grotius, avoiding this pronounced Arminian tenet, allows a kind of predestination to be antecedent to the foreknowledge of faith. Such an opinion, he says, if rightly explained, need not diverge from the truth of the Scriptures, Catholic tradition, and right reason. But why God should call some in such a way that He foreknows they will follow His voice, and others in such a way that He foreknows they will not follow, is a mystery belonging to the inscrutable judgments of God, who, indeed, loves all men, but loves some more than others. To the question whether grace is irresistible, Grotius likewise gives a hesitating answer. Of grace there are two modes—illumination and regeneration. The one concerns the mind, the other the will. Both considered in themselves are irresistible, and man in relation to them is entirely passive. But to these Divine operations certain human acts are subordinated, such as attention and the use of the regenerate will in faith and penitence. In no case must it be supposed that the will of man is physically determined: 'Libere credit homo, sed libertate non nata sed data.' In certain cases, Grotius is ready to recognize the possibility of an absolute decree, ensuring the means which shall inevitably produce faith and consequently salvation. The faith of the elect will not fail finally and totally, though they may for a time fall away from the justifying grace of God.

From this review it may be inferred that the opinions of Grotius on the subject of Predestination were not so dominated by any single and consistent principle as to issue in an orderly and logical system. Himself drawn this way and that by opposing considerations, he endeavoured to patch together a compromise which should secure the assent, if not the approval, of hostile factions. But, when party passions run high, balanced statements, however carefully constructed, are apt to be cavalierly treated. At any rate this was the fate of Grotius' well-meant efforts. He did not succeed in composing the quarrel between Remonstrants and Counter-Remonstrants. Nor did his work in this direction contain elements destined to live. Whereas his theory of the Atonement undoubtedly influenced the subsequent current of theological thought on that subject, no similar effect appears to have been produced by his attempt to analyze the meaning of Predestination.

4. As Biblical commentator.—Grotius was a voluminous commentator. Of the four folio volumes in which his collected theological works were published in 1679, no fewer than three are filled with his annotations of the OT and NT. From Bossuet—a most hostile witness—we get unimpeachable evidence of the authority acquired by his exegetical writings during the latter half of the 17th cent. (*Œuvres*, ii. 58). It was a success well deserved. Grotius' system of interpretation was based upon sound principles. Rejecting the rigid theory of verbal inspiration which had practically rendered impossible any rational treatment of the Sacred Text, he recognized and allowed for the presence of the human element in the work of the Canonical authors. In an age when it required some courage to make the avowal, he declared himself unable to hold that all the books contained in the Hebrew Canon had been dic-

tated by the Holy Ghost. What need was there that the Histories should have been so produced? It was enough that the writer's memory should be strengthened and his accuracy in consulting authorities ensured (*Vol. Pro Pace; de Canon. Scrip.*). The words of Scripture were to be interpreted according to the recognized rules of grammar and philology, on lines independent of dogmatic considerations. It is clear that Grotius had laid to heart the lessons which he had learned from Scaliger. In applying his principles he displayed a rare soundness of judgment which particularly attracted the admiration of that pioneer of Biblical criticism, Richard Simon. Fully accepting the reality of prediction in Jewish prophecy, he held that the passages in question generally referred to the fortunes of the Jewish people, and only in a secondary and allegorical sense found fulfilment in Jesus Christ. With regard to the use in the NT of quotations from the prophets, he maintained that for the most part they were introduced for the purpose of enforcing a faith already existing, and that, in controversy with the Jews, the Apostles had preferred to base the proof of their Master's Messianic dignity on His miracles and His resurrection (cf. note to Mt 12²).

In the 17th cent. textual criticism was still only feeling its way forward without fixed principles to guide it. In this department of study, as in so many others, Grotius showed to advantage in comparison with his contemporaries. A collection of his suggestions with regard to various readings is printed as one of the Appendixes attached to Walton's *London Polyglot* (vol. vi. App. xv.). The higher criticism was even further removed from the horizon of that age. Yet it is interesting to notice how Grotius had come to the conclusion that Ecclesiastes is a pseudonymous and post-exilic work, and how he attempted to detect Christian interpolations in Sirach and the Book of Wisdom. Examples of his independence in matters of exegesis, and of his freedom from the shackles of mere tradition, will be found in his comments on the following passages: Gn 1²⁸ 3¹⁵, Ps 2. 16, Is 7¹⁴ 9⁶ 11¹ (cf. F. W. Farrar, *Hist. of Interpretation*, London, 1886, p. 383 n.).

5. As moralist.—In referring to the events of Grotius' life, we have already noticed the favour with which the *de Jure Belli et Pacis* was received. From the point of view of the jurist, the publication of this book may be said to mark the initiation of the new science of International Law. For, although Francis a Victoria, Balthazar Ayala, and Albericus Gentilis had already written on the subject, no previous work had commanded any large measure of assent. A general agreement as to first principles was still lacking. The treatise of Grotius provided what was wanted. Within thirty or forty years of its publication it was generally accepted as authoritative by the professors of Continental Universities. The students of ethics, however, will take more interest in the moral principles upon which Grotius builds up his structure of jurisprudence. Writing at a time when no such thing as a concert of Europe was imagined, he was precluded by the nature of his subject from appealing to any positive enactments. He was, therefore, compelled to find a sanction for his proposed rules of war in that which is antecedent to all institutions. With a fine confidence he made his appeal to Nature, teaching that the source of rights is to be found not in any bare calculation of expediency, but in the moral constitution of man. Moreover, it is of the essence of his system to consider man not in isolation but as a member of a community. Human nature, even apart from any specific want, constrains men to form a society which, in order to satisfy their instinct, must be peaceably and ration-

ally constituted. Utility, indeed, affords the occasion for the introduction of civil law, but is not its source (Art. 16). Grotius complains that previous writers had mingled together in confusion law natural and Divine, the law of nations, and the law of particular States. In making his appeal to the law of Nature, he maintains its validity even upon the impossible supposition that there is no God, or that He takes no account of human affairs (Art. 11). He holds that its pronouncements can be deduced from notions that are self-evident and impossible of denial except by those who do violence to their own reason (Art. 39). Thus, although Grotius was not specifically concerned with questions of right and wrong in relation to the conscience of the individual, he clearly insists on the possibility of moral sanctions independent of religion and revelation. In so doing he prepared the way for the modern development of ethics as a separate science.

6. General estimate of Grotius' character and influence.—Grotius possessed untiring industry, a highly trained and penetrating intellect, and a vast erudition, together with absolute sincerity of purpose and unquestionable honesty. These qualities attracted, as they most thoroughly deserved, the profound respect and admiration of his contemporaries. But he was never a great leader. Some elements of force were lacking. In religion he was earnest, thoughtful, and devout. But he hardly gives us the impression of being irresistibly compelled to deliver his testimony by the indwelling power of conviction. His was not the mystic's direct and overwhelming vision of Truth. His faith had its roots in his conscience and his reason, and in a well-considered deference to authority. Though he wrote much on disputed religious topics, it was not his natural bent. In answer to a letter from de Thou strongly dissuading him from taking any part in theological controversy, he replied that he found himself obliged to do so by his love of country, his wish to serve his Church, and the request of those to whom he owed obedience (*Ep.* 58). It is an accurate statement of the considerations by which, against his inclination, he was impelled into controversy. He was emphatically a lover of peace. Above all things he desired to promote the cause of Christian reunion. In pursuit of this great end he was willing to concede much to Roman Catholicism; and, when writing on this subject, he so expressed himself as to lead many to suppose that he would eventually join that communion. That he came to view with increasing disfavour and apprehension the dogmatic instability and fissiparous tendencies of Protestantism is undoubtedly true; but no direct evidence is forthcoming to show that he ever intended to make his submission to Rome. It is, therefore, idle to speculate on what he might have done, had his days been prolonged. When it came, his death was the close of a conscientious and laborious life, the fruits of which have not ceased to be of service to succeeding generations.

GROVE.—See TREES AND PLANTS.

GROWTH (Biological).—A distinctively vital process, characteristic of all living creatures. It is closely associated with development (*y.v.*) and with

reproduction, which is often a more or less discontinuous growth. For practical purposes it is usually enough to say that growth is increase in the size or volume of an organism, and usually implies increase in mass or weight. But this definition is too wide, since there is plainly considerable difference between an increase of size due to a subcutaneous deposit of fat and the slow, continuous growth of a lean fish like a haddock; or between an enlargement due to the accumulation of watery fluid and the fine growth of an embryo's brain. When a dried turnip is surrounded with water, or when a frog leaving its winter-quarters in the mud passes into the pond, we see increase in size, but no one would call this growth. The fact is that more than one word is required to cover the phenomena which may be in a general way referred to as growth. Organic growth is essentially a regulated increase in the amount of the protoplasm and intimately associated substances. It is much more than accretion, it is an active process of self-increase. Unlike a crystal's growth, it comes about at the expense of materials different from the growing substance—often very different, as in the case of plants which feed on air, water, and salts. Unlike mere expansion, it is regulated in relation to the organism, or organ, or cell that is growing.

Conditions of growth.—(a) *Nutrition.*—It is a fundamental condition of growth that income should be greater than expenditure. Growth primarily depends on the assimilation of food—on there being a surplus in the continual process of self-renewal. It is not inconsistent with this to say that an organism may grow larger for a time without taking in any food, for what happens in such a case is a change of condensed stored substances into more dilute and bulkier form. The shoots of a potato sprouting in a dark cellar show true growth, though the organism as a whole is actually losing water in transpiration, and, as its respiration shows, breaking down carbon-compounds. Nor is it inconsistent with our previous statement to recognize the fact that, during the period of most rapid growth in tadpoles, the imbibition of water is more important than the assimilation. But during this period the weight of dry substance in the tadpole does not increase at all.

(b) *External agencies.*—Growth, like development, has its optimum environment, but this differs greatly for different kinds of organisms, and it is difficult to make general statements in regard to the agencies that favour or hinder growing. As light is essential for the assimilatory process (photo-synthesis) of ordinary green plants, we may say that light is a condition of their growth; but as a matter of fact light is directly retardative. The strongly refractive, so-called chemical rays, which have little or no effect on assimilation, have an inhibiting effect on growth. Other things being equal, plants grow more rapidly during the night than during the day. The growth of plants is also dependent on humidity, the amount of oxygen, electrical conditions, temperature, etc. The optimum temperature usually lies between 22° and 37° C., and there is a complete cessation of growth in plants at a temperature less than 0° or higher than 40°–50° C. For animals the general statement may be made that lowering the temperature slows growth; it does so in part by retarding the process of cell-division, and this, in part, by retarding the formation of nucleic compounds in the cells. For a developing chick the temperature above which death occurs is 43° C., the minimum at which growth stops is about 28°, the normal limits are between 35° and 39° C.

(c) *Internal stimuli.*—Growth is a regulated

phenomenon, occurring in a certain sequence and within certain limits. The regulation has reference to the specific constitution of the organism (its structural organization on the one hand, its characteristic metabolism on the other), and that means that it has reference to the past history or evolution of the organism. This regulatedness is one of the criteria of organic growth; it differentiates it from the mere multiplication of chemical substances, or from the continued action of a ferment. But it should be remembered that in the growth of crystals there is also some degree of regulation in relation to the already existing architecture.

One of the ways in which the regulation of growth is brought about within the organism is by means of internal secretions or 'hormones.' The internal secretions of the thyroid gland and the pituitary body have a specific regulatory effect on the growth of the brain, the subcutaneous tissue, and the bones. The internal secretions of the reproductive organs have a definite effect on the growth of parts of the body, both of important organs like mammary glands and of trivial decorative structures, like some of the secondary sexual characters. In the galls formed by plants, say in response to the stimulus of the salivary secretion of the larval gall-insect, we have very striking examples of specific secretions inducing specific kinds of growth. It is said that, in the growth of the roots of some plants, specific chemical substances are formed which inhibit further growth. In short, facts are accumulating which show that particular parts of an organism have their growth regulated by specific internal secretions. It has been proved that some, if not all, human giants are the result of exaggerated pituitary stimulus, and it is possible that some kinds of dwarfs are due to a deficiency of this stimulus.

The correlation of the growth of different parts of the body must be recognized as a fact even though there is no available physiological interpretation, e.g. in terms of the formation of specific secretions. There is great inequality in the rate of growth of different parts. In cases of under-feeding there is great diversity in the way in which the growth of different parts is affected. More familiar and perhaps simpler are cases where an organ, such as the heart, responds by increased growth to increased demands upon it.

In his elaborate discussion of growth, Herbert Spencer sought to show that it varies (other things equal)—(1) directly as nutrition, (2) directly as the surplus of nutrition over expenditure, (3) directly as the rate at which this surplus increases or decreases, (4) directly (in organisms of large expenditure) as the initial bulk, and (5) directly as the degree of organization. This kind of analysis is valuable, but what is most needed at present is an extensive series of measurements of growth under diverse conditions.

Periods and rates of growth.—In a segmenting ovum we see development but no growth. Soon, however, development and growth proceed hand in hand, both very rapidly. Later on, when development is proceeding slowly—all the chief steps having been taken—growth may go on very vigorously. Thus in the pre-natal life of man great strides in development are taken in the first three months, along with very rapid growth. Thereafter, when the developmental steps are less striking, the growth is for a time very rapid. From the third to the fourth month the increase in growth is 600 per cent. After this it drops quickly and is barely 25 per cent. in the last month of pregnancy. In some organisms the growing period is very sharply punctuated: thus in insects with complete metamorphosis all the growing is done in

the larval period. In other cases growth may go on as long as the organism lives and feeds. Thus we may distinguish the definite or determinate growth of birds and mammals from the indefinite or indeterminate growth of reptiles and fishes. In other words, some organisms have a definite limit of growth—the physiological optimum—while others have not.

It is partly, no doubt, because of dependence on nutrition and on external agencies that growth is so often 'punctuated,' in some detail, rather than continuous. Every one is familiar with the rings of growth seen in the cross-section of a tree and with the lines of growth on the outside of shells. Similarly the coming and going of the seasons is for many fishes accurately registered by the concentric zones of growth seen on the scales and even in some of the bones. But besides the periodicities of growth which can be reasonably correlated with external periodicities, such as those of the seasons, there are others of a more recondite nature, such as the phases of quick growth and slow growth that alternate in the development of some animals, as Fischel has shown, for instance, in the embryo of the duck.

Active growth in multicellular organisms implies the growth of the individual cells and ensuing cell-division. The cells may grow by taking in water, and by accumulating products of metabolism, but essentially by having a surplus in the renewal of the living matter. Spencer, Leuckart, and Alexander James have thrown light on the limit of growth in cells and the division which usually occurs when that limit is reached. When a spherical cell has quadrupled its original volume, it has by no means quadrupled its surface, the one increasing as the cube, the other as the square, of the radius. But, as it is through its surface that the cell is fed, aerated, and purified, functional difficulties set in when the growth of surface begins to lag behind the growth of the cell-substance. The maximum safe size is the limit of growth, and it is then that the cell so often divides, halving its volume and gaining new surface. As a general rationale, applicable *mutatis mutandis* to organs and organisms as well as to cells, the suggestion thus briefly outlined is very helpful. Boveri and Richard Hertwig have also pointed out that the limit of growth in cells is in part determined by the ratio of the amount of nuclear material in the cell to the amount of cytoplasmic material.

The rate of growth has been studied carefully in a few cases—e.g. in guinea-pigs by Minot—and the facts are striking. In guinea-pigs there is in both sexes a decline in the growth-rate almost from the moment of birth. The rate falls rapidly between about the 5th day and the 50th, from the 50th day onwards more slowly, until growth stops. Moreover, this post-natal decline in the growth-rate has been shown to be a continuation of an ante-natal decline. As Jenkinson puts it, 'The younger the animal, the faster it grows; the more developed it is, the more slowly it grows. The rate of growth, in fact, varies inversely with the degree of differentiation' (*Experimental Embryology*, p. 62).

In man, according to Robertson's researches, there are three maxima of rate of growth. The first is before birth, but its precise occurrence is uncertain. As we have mentioned, the increment from the 3rd to the 4th month is 600 per cent. It then falls with great rapidity between the 4th and 6th months, and thereafter more slowly till birth. The second maximum is in early infancy or childhood. Minot puts it in the first year, when the increase of weight is about 200 per cent. Robertson puts it in the fifth year. The third maximum is near the time of puberty—about the age of 13 for girls, of 16 for

boys. It has been suggested by Robertson that the first period is predominantly characterized by the synthesis of nuclear compounds, that the third is one of cytoplasmic increase, while the second is intermediate and represents a contemporaneous occurrence of both synthetic processes. It is important to notice that the growth of women is very different from that of men. It is not only 7 per cent less, but it is on a different scheme, with the parts in different proportions.

The law that the rate of growth varies inversely with the degree of differentiation has been verified in a few cases in regard to individual parts. 'Thus human stature exhibits the same loss of growth-power as is shown by the weight of the whole body, with this difference, however, that the rate is not so high in early stages, the descent in later stages less abrupt' (Jenkinson, *op. cit.* p. 68).

When we say that growth is a *regulated* increase in the amount of living matter, we refer to such facts as its periodicity, its varied rate in different species, and its general correlation. Kellicott has emphasized the same idea by calling attention to the diversity in the rate of growth of different parts of the body. In the smooth dogfish (*Mustelus canis*) the organs, or perhaps tissues, seem to grow as more or less separate units. 'Each organ grows in its own characteristic way—each has an individual form of growth curve' (Kellicott, *op. cit. infra*, p. 598). The rates of growth of the brain, the heart, the pancreas, the spleen, and so on, are different from the rate of increase in total weight. In animals of indeterminate growth, like fishes, the brain, heart, digestive glands, and fins do not keep pace with the general increase of trunk musculature and connective tissue; and a loss of physiological equilibrium results. The determinate and more perfectly regulated growth of birds and mammals, for instance, is an obvious improvement on the more primitive unlimited growth.

When we consider growth in its entirety as a regulated self-increase of the whole organism and of its parts, we see how far it lies beyond the present limits of physico-chemical interpretation. The analogous phenomena of chemical polymerization and of the increase of crystals in a solution are interesting, but they do not at present bring us nearer understanding organic growth.

J. ARTHUR THOMSON.

GROWTH (Moral and Religious).—I. DEFINITION AND SCOPE.—This article has for its scope the sum-total of the moral and religious changes through which a child passes in the attainment of moral and religious maturity, these changes being considered as natural processes.¹ Two distinctions are to be made at the outset. (1) 'Growth' as here used is a more specific term than 'increase.' In addition to the effects of mere increase in knowledge and power, we have to consider changes in children's interests, points of view, and feeling-attitudes. (2) There are two factors in the changes from moral infancy to moral maturity—the congenital or constitutional factor, and the individual's own experience. The former may be illustrated by the mental phenomena of puberty. Here a

¹ The artt. ADOLESCENCE and CHILDHOOD contain data and analyses that are presupposed in the present discussion.

change occurs that does not depend for its general character upon the individual's experience. On the other hand, many features of the individual's moral progress are after-effects of his previous experiences. Stout and others propose that the term 'development' should be used for congenitally determined changes, and 'growth' for the others.¹ The present article will adopt this nomenclature.

Development and growth do not, however, denote two independent series, but one series of changes each of which has the two discriminable factors. Thus, a hungry baby is bound to make some kind of demonstration, but what kind depends upon the experiences that have previously been associated with feeding. Just so, the ripening sexual instinct is bound to manifest itself morally, but the conduct of each pubescent boy or girl depends partly upon habits of thought, speech, and conduct already acquired. Development is the manifestation of instincts and impulses, of which the food-instinct and the sex-instinct are in a peculiar sense basal, but which include many other unlearned tendencies, such as curiosity, play, mere gregariousness, emulation, and sympathy.² Such tendencies are always one co-efficient in character, but of themselves they do not define one's moral attainments.

'Man's original equipment dates far back and adapts him, directly, only for such a life as might be led by a family group of wild men among brute forces of land, water, storm and sun, fruit and berries, animals and other family groups of wild men. But man has created a new world, in which his original nature is often at a loss, and against which it often rebels' (Thorndike, 91 f.).

Each item that is ascribed to development (as distinguished from growth) is a generic tendency rather than a specific attainment. What is specific is the particular direction given to the tendency by the individual's own experience in a particular environment, and this is what we mean by growth. While the general direction of both racial and individual progress is in some sense pre-determined by original nature, the character of each individual depends also upon accumulation of the effects of particular reactions to particular stimuli.

Because this cumulative process is itself spontaneous and constitutional, we are justified in calling growth a natural process. Further, we are justified in designating as natural any common method whereby the species as a whole, or a race of men, expresses a fundamental tendency of human nature. Thus, the monogamous family is a natural, though not the exclusive, instrument of the reproductive instinct. In a parallel way, society at large is natural: and, consequently, the cumulative influences of society upon the individual are natural also. An unnatural reaction is one that either defeats an instinct or fundamental tendency, or (though it satisfies an individual) is incapable of social approval and adoption.

II. CHARACTERISTICS OF THE DIFFERENT STAGES OF GROWTH.—Efforts have been made in recent years to construct out of congenital factors alone a picture of the normal progress of the child's personality. The suggestion of such a possibility appears to have come from the fact that the human embryo assumes successively certain forms that correspond in part to an ascending series of embryonic forms of inferior species. Here, to some extent, the individual body recapitulates the physical evolution of the species. May not the mental life of the immature individual similarly recapitulate the mental history of the race? This hypothesis was adopted in such a rigorous fashion as to give an impression that the one great essential for the maturing of character is that a child should run through a series of congenitally fixed periods in each of which

one's social attitudes are pre-determined (see Literature at end of art. ADOLESCENCE). This notion lent support to the culture-epoch theory of education, according to which a child can best assimilate our present culture by first assimilating the products of earlier cultures in the order of their origin.³ The recapitulationists went for a time to remarkable extremes, e.g. accounting for our fondness for water by reference to the aquatic life of our remote ancestors, and for the attractiveness of trees by reference to our arboreal forbears. But not only has evidence for recapitulation in any such extreme sense not been forthcoming; the challenge that it has offered to the educational world has been answered by fundamental dissent from the educational doctrines of both the older culture-epoch theory and the later recapitulation theory. It is not denied that in such respects as simplicity or complexity of organization, immediateness or remoteness of interest, and the growth of inhibitions, there is a certain kind of recapitulation or parallelism. Nor is it denied that the adaptation of the literature of the world to child interests shows a partial parallel. But the notion that the moral interests and attitudes of children are congenitally restricted to what was most prominent in earlier cultures is rejected. A child is interested first of all in what is immediately about him. The social environment to which he has to adjust himself is not a primitive one. It sets its problems upon its own plane, and the child mind goes at them directly, not merely through the intermediation of culture upon some other level. Indeed, a child cannot live through a genuinely savage period without having a savage social environment. The cultural progress of a child, then, is not merely a development, it is also a growth, in which motives and moral attitudes (as well as applications of motives) are largely determined by present social experience.

What, then, are the natural periods or stages of change from the moral and religious condition of an infant to moral and religious maturity? It will conduce to simplicity if 'religious' be here understood as synonymous with 'Christian,' and the Christian religion be assumed to include morality (the second Great Commandment). Re-statement can easily be made by the reader for any other religious or ethical position. It is now clear that to define these periods of growth we shall need to combine three points of view: (1) phenomena consequent upon mere increase of knowledge or of power, physical or mental; (2) the relative prominence of different instincts or unlearned tendencies at different ages; (3) the changing contacts of the child with the present social order.

Comparatively little attention has been given to the growth of the moral personality in its unity and in relation to its moral environment. Periods of the physical life have been extensively studied, and isolated phases of the mental and moral life have been subjected to analysis, but what we now require is to see the individual child in his integrity as a person reacting to the ordinary environment and growing thereby. The chief essay thus far made in this field is E. A. Kirkpatrick's *The Individual in the Making*. His division and general description of the pre-adolescent years is the basis for the analysis of these years that now follows. But various modifications of his terminology and description have been made, considerable discussion of the method of religious growth has been added, and an independent analysis of the adolescent years is offered.

I. First Year.—*The pre-individual stage.*—The infant reacts to things and to persons in much the

¹ See Baldwin, *DPhP*, art. 'Growth (Mental).'

² The most thoroughgoing analysis of these unlearned tendencies is that of E. L. Thorndike, *Education*, New York, 1912, ch. v.

³ For a brief statement, with bibliography, see art. 'Culture-Epoch Theory,' by John Dewey, in P. Monroe's *Cyclopedia of Education*, vol. i. (1911).

same way. There is little realization either of one's individual selfhood or of other persons as objects that have thoughts and feelings. Nevertheless, a basis for genuinely social habits can be laid now by associating pleasure with the infant's experience of persons. Such association with persons is the surest quickener of intelligence, and the surest beginning of a spiritual and moral interpretation of one's world.

2. Ages 1 and 2.—The period of preliminary socialization by imitation.—Even yet the child does not steadily distinguish himself from others. But his ability to walk and to talk, and his increasing control of hands and arms, make possible greatly increased interaction with other persons, and increased participation in the common consciousness of the family.

'He acquires many antipathies and likings that he feels, but cannot explain, in later life. . . . If the persons around him show fear of worms, insects, snakes, darkness, lightning, etc., he shares their feelings, and may in later life be unable to overcome his timidity and repugnance, although he knows that there is absolutely no basis in reason or fact for such feelings' (Kirkpatrick, 87).

In the same way attitudes towards persons, and even towards one's own pleasures and pains, can be educed and formed into habits even at this early age.

3. Ages 3, 4, and 5.—The period of preliminary individualization.—The child now discovers himself as an individual, and he experiments with his own selfhood as contrasted with both things and other persons. A boy in his fourth year requested of his mother something that was entirely beyond her power. When she attempted to explain, he cried out, 'You can, too! You're a bad mamma! I haven't any mamma any more!' Here is no longer the complete absorption in woe that is characteristic of the preceding years, but a self-conscious woe and an effort to find one's place among persons. Towards the end of this period there is likely to appear sheer contrariness, or apparently unmotivated refusal to conform to social expectation. But such refusal is often, no doubt, a genuine experiment which brings the pleasure of self-active exploration in new fields. This individualization offers new opportunities for moral and religious growth. Individualization is a necessary foundation of character. Therefore the process should be encouraged, not hindered. This preliminary self-assertion expresses no moral fault, and it should not be treated as a violation of a moral standard already understood and assimilated. On the other hand, conformity without experimentation should not be prized. This implies that the best moral results are to be expected where a child finds out for himself that certain kinds of conduct bring mutual pleasure, and other kinds mutual pain. That is, his experimentation, while free, should be within a social group, so that success shall mean a shared pleasure, and his earliest self-consciousness be a social self-consciousness. If, now, the family be a religious one, with habitual outward expression of its faith in speech, in family devotions, in church attendance, in religiously motivated conduct, the child, even at this age, can begin the conscious assimilation of religion. Christian family life is naturally and normally the introduction of the child to the duties and privileges of the family of God (see CHILDHOOD, § 4).

4. Ages 6 to 11 inclusive.—A period of socialization by means of regulation and competition.—(1) The child now begins school life, with its new social environment. The rules or ways of securing social co-operation in the school play a large rôle in the child's experience. (2) In the home also rules are now imposed with increased assumption of the child's responsibility to obey. (3) Association with other children in games and plays extends

greatly, and the necessity of playing according to rules increases throughout the six years. This necessity is due partly to the possession of growing strength, initiative, resourcefulness, which would be destructive if organization did not increase. It is due also to the increasing remoteness of the ends sought. Finally, it is a consequence, in part, of the development of instinctive tendencies which Thorndike calls 'mastery and submission,' 'approving and scornful behaviour,' and 'emulation or rivalry.' Games during these years work out these tendencies on a larger and larger scale. But another factor also enters. Competition changes its character as the years go by. At first each individual plays for his own advantage or honour, as in the game of 'tag.' Then come games in which each child plays on a 'side.' But still the individual seeks individual success, with little or no 'team work,' as in the game called 'pull away.' But towards the end of the period there is an approximation to true team games, that is, games in which functions are specialized and the player seeks the success of the team rather than personal glory. But the approximation is ordinarily only a distant one. Individualistic and social impulses still struggle against each other in a most interesting manner, as can be seen in the efforts of boys of twelve to play football. Clearly we are witnessing the approach of the bloom-time of one of the socializing instincts.

(4) Towards the end of this period there is another manifestation of the same thing in the combination of leadership and chumming. Girls form 'sets' and boys form 'gangs,' with a spontaneity and impulsiveness that point towards an instinctive origin (see CHILDHOOD, § 3). (5) In this period children usually experience important contacts with society in a larger sense, as in the Church, in social customs, in the ordinances of a city, or the laws of the State. The grown-up world is likely to appear to children in their impetuosity as chiefly a hindrance to freedom, as negative regulation. Probably this cannot be altogether prevented. Yet it is important that children should discover that the regulations of society are not arbitrary, and that freedom comes through obedience to the conditions of socialized existence. Here the family organization is likely to be the determining factor. Arbitrariness, or what seems like it, on the part of parents may easily intensify the already strong tendencies to individualistic self-assertion on the part of children; and this experience, if it is cumulative through the whole period, may permanently stunt the personality on its social side. In the family, and in the Church, the child should be conscious not so much of regulation as of fellowship. In this way he will have a means of interpreting the values of his own little competitive organizations, and he will have reinforcement for the developing social instinct. (6) Yet the special mark of this period cannot be any profound socialization of motives. The progress of character takes the form, rather, of a heightened sense of laws, of rights, of penalties, of the necessity of co-operation, and of the force of social opinion. That is, the will is being socialized chiefly on the plane of 'the law' as distinguished from 'grace.'

(7) But it is a mischievous exaggeration to say, as is often done, that this period is naturally one of unrelieved egoism. The narrow range of experience, the lack of foresight, the seeking of proximate rather than remote ends, the impulsiveness—these do, indeed, render impossible the broad sociality that adults demand of themselves. But against all this we must set not only the fact that children spontaneously, apart from all instruction, organize themselves socially, but also these two capital evidences: *First*, children very early show

traces of the parental instinct. This should not be confused with the sexual instinct, which ripens later. The parental instinct is manifested towards babies and smaller children, domestic pets, dolls, toys, and parents. Girls display it in certain directions more than boys, but it is actively present in both; and it should be developed as a softening and socializing force. *Second*, children respond to parental affection with real devotion. Admiration amounting in many cases to worship, family loyalty, and pride, a genuine glow of affection—these are the rewards which parents may reap who really share their life with their children.

(8) The religious significance of this period can easily be gathered from what has already been said. If the social environment of a child is a religious one, he naturally conforms to it under the same conditions that favour conformity in other respects. The fundamental condition is that he should realize himself as a part of an actual religious fellowship, as his father's family, a Sunday-school class, or the Church. Religion will then be to him an extension, through imagination, of social experience on the level of his present life. Laws of conduct, with the consequences of right and wrong acts; admiration and condemnation; the inclusion of God in one's family life, and loyalty to Jesus as one's leader—these will sufficiently indicate the nature of the religious experience at this age. Neither intellectual nor moral depth is to be looked for as yet.

5. Ages 12 to 14 inclusive.—*Early adolescence.*
—No single phrase can adequately characterize the method of socialization that now sets in. For, on the one hand, there appears a tendency to take a self-assertive or at least independent attitude towards social authority (as in the family), and, on the other hand, to deepen one's social attachments ('gangs' and 'sets,' personal friendships, loyalty to 'teams,' partisanship). The whole expresses the approach of puberty, or the attainment of it. Here the basal fact is the ripening of an instinct. For the sake of simplicity, the age characteristics of boys are taken as our starting-point. Beginning with this period, deduction should be made, therefore, for the earlier development of girls; and the deduction should increase as the years go on—from about one year at the beginning of adolescence to about three or four years at its close. Both the apparently contradictory marks of the period above named have a positive moral significance. The new attitude towards social authority is not a mere revolt, as the complementary fact of the deepening of social attachments shows. Rather, the profounder socialization that is being prepared for—requiring, as it will, the steady devotion of personal conviction and seasoned loyalty—presupposes the detachment of the individual consciousness from chance groupings and from control by mere rules passively submitted to. Thus, increasing individualization and increasing socialization are merely complementary phases of a single process. Rather, they may be; but the possibility also arrives for a deeper selfishness than any that childhood knows. Self-assertion often becomes revolt, open or clandestine, against the social order. There is a sudden accession of juvenile crime at precisely these years. Yet even in his crimes the youth commonly reveals the socializing process that is going on, in the fact that his criminal acts are usually done in 'gangs,' or at least prompted and supported by gang enterprises and sentiment. The moral opportunity of parents and teachers is clearly indicated. It is to release the youth progressively from childhood's restraints, and to promote his free devotion to worthy socially-organized activities. There is now a rather general recognition that the youth's

interest in heroic men and women furnishes an important clue to some of the best material for moral impressions, and that his *penchant* for organization can be morally utilized by promoting clubs for outdoor sports and other appropriate activities. These things are now widely utilized also in religious instruction and training. The Young Men's Christian Associations in particular have seized upon the organizing impulse, and used it effectively. There is now a large literature of religious and moral work with boys, and most of it makes some sort of boys' organization a central consideration. Further, on the part of Sunday schools, along with a growing use of hero studies, there is wide experimentation in methods of social-religious group life. Confirmation or Church membership now makes a vital appeal to the grouping impulse in many youths.

6. Ages 15 to 17 inclusive.—*Middle adolescence.*
—For the general moral significance of the attainment of reproductive capacity, see ADOLESCENCE. The main differences between this period and the one just described are fittingly indexed by the fact that, whereas in early adolescence the sexes have a sort of repulsion for each other, in middle adolescence sex attraction becomes clear and conscious. Here, again, we find a period of moral growth fundamentally determined by instinctive development. The moral possibilities and the moral dangers radiate from the same centre. The misuse of sexual power is unquestionably the chief moral failing of humanity. But around the largely instinctive preparations for family life gather some of the greatest moral forces. If we put together the two facts of increased capacity for sentiment, and the necessity of reckoning oneself henceforth a man or a woman, not a child, we shall see that we are now near the climax of the moral growth of self-conscious individuality. Middle adolescence is more difficult of treatment than the earlier periods, however, for the reason that the conditions become so much more diverse. For example, we must now deal with the moral growth of persons the large majority of whom are engaged in industries, either within or without the home. Some of the effects of shop and factory labour upon adolescents we can already discern. From the monotony and fatigue of their daily work, for instance, they react towards flashily, exciting, and often perilous pleasures.¹ On the other hand, religious conversion occurs more frequently during these years than at any other period of life. Indeed, the ages of sixteen and seventeen mark the climax in the age curve for conversions in so many different and widely scattered groups that we cannot doubt that we are dealing here with a natural law. But misunderstanding of the significance of such facts is easy. What is proved is that, in populations subjected to certain emotional incitements, the largest response comes from young persons of sixteen and seventeen. This by no means proves that capacity for religion suddenly awakes at this age. It proves only that responsiveness to certain kinds of appeal is at a maximum. A complementary indication of a natural law may be seen in the fact that religious Confirmation almost the world over has tended to seek its centre of gravity in point of age in the earlier period, not far from the age of fourteen. At fourteen the religious response is social in quality, but not chiefly emotional. What we must recognize as the peculiarly important fact about middle adolescence is that the new capacity for sentiment carries with it a certain plasticity that is of exceeding importance for education. This plasticity does not exist before; and, once gone, it is likely never to return. As has been indicated, it carries within itself certain con-

¹ See Jane Addams, *The Spirit of Youth in our City Streets*, New York, 1909.

structive tendencies. The moral interests of the race, therefore, demand that these years should be devoted to education—possibly in connexion with industries, but certainly with opportunity for freedom, play, idealization, experiment.

7. *Ages 18 to 24 inclusive.—Later adolescence.*—This deserves to be counted as a period, not because of any new developmental factor, but because of the changing social relationships and functions of the young. The youth is now fully his own master, the maiden (in her different way) her own mistress, and upon each now comes the full authority and responsibility of a citizen. Marriage is to be contracted; an occupation is to be entered upon; legal majority with all its responsibilities is attained; at last one is a full member of society and of the State. The general effect is to check the emotional ferment of the preceding period, and to give greater place to rational reflexion and deliberate decisions. Bearing in mind that mental and moral growth is checked for multitudes at various stages, especially of adolescence, and that many youths squander their powers by frivolous living, we may say that the normal line of moral and religious growth at this period has as its main characteristics independent reflexion and the solidifying of the will by the bearing of responsibilities. A frequent result of the deepening realization of responsibility for one's own thinking is doubt concerning commonly accepted views, whether in religion or in politics. Indeed, dissent from the socially accepted is a frequent phenomenon of adolescence at all its stages. But the quality of the dissent is likely to change from arbitrary impulse at the beginning to emotional unrest (as doubt of one's status before God), and, finally, to the steadier questioning of a mind that is interested primarily in seeing clearly for itself the foundations of things. During later adolescence the mental and moral life commonly takes a set (as conservative or radical), and fixes upon interests (intellectual, social, moral, recreational) that exercise a fundamental control over one's maturity. One's acquisitions go on increasing, and subdivision and differentiation occur within one's thinking and one's purposes, but the fundamental motivation of the whole is generally determined before the end of adolescence.

III. *GENERAL PRINCIPLES.*—It remains now to indicate certain general principles that apply to this whole series of growth periods.

1. A general description of vital processes as complex as those with which we are here dealing has inevitable limitations. Growth periods and transitions have, for instance, no such sharpness as any numerical division must have. Such divisions, too, can indicate only a central tendency from which there is much variation. Further, the qualitative description can never adequately represent the temperamental and other variant shades that a given mental tendency may take. Nevertheless, the fact that, to use common parlance, 'no two children are alike' is misused and becomes misleading whenever it seems to justify the abandonment of definite methods and expectations.

2. A single central principle of moral and religious growth can be discerned throughout these periods, namely, the reciprocal individuation and socialization of consciousness by participation in the social order. Intercourse with persons is the primary condition of the attainment of reflective self-consciousness. The individual's acquisition of language is, for example, a crucial point for his whole growth. Further, the social inhibitions and the social pleasures to which the individual is gradually introduced both awaken and socialize self-consciousness. Hence the incomparable importance of group life for the child at every period—

VOL. VI.—29

the family group, the play group, the school group, the 'set' or 'gang,' the civic group, the national group, the Church group, world society, the Kingdom of God. The degree and the form of one's participation in these groups depend partly upon the ripening of instincts, partly upon increase in knowledge and in power; but none of the periods of growth is strictly either pre-moral or pre-religious. The social principle, which has its culminating definition in the notion of an ideal society or family inclusive of God and men, applies throughout. The religious family includes the Heavenly Father in the domestic consciousness to which the youngest children adjust themselves; and thus it may go through their enlarging experience, the social consciousness being in varying ways religious at all stages of life. Indeed, nothing short of religious hope, faith, and loyalty gives uncompromising and unhampered expression to the social principle of moral growth. In religion we find at once the broadest and the deepest sense of social connectedness, and the profoundest realization of personal freedom. That is, religion is the supreme principle of both individuation and socialization and of their unity.

3. This principle gives us likewise a clue to arrests and perversions in moral and religious growth. An arrest consists in the persistence of any individual-social consciousness and mode of functioning beyond the chronological period to which it naturally belongs. A perversion consists in the disproportionate growth of any natural factor in any period. Now and then congenial conditions or unfavourable physical environment give a certain instinct undue prominence, and upon this basis a monstrous moral growth supervenes. But in other cases some unfortunate social emphasis or social neglect turns the forces of growth into side channels. The permanently selfish person is generally one whose natural and even useful egoistic impulses have been socially over-indulged in early life until a habit has been fixed. Thus it is, too, that society itself produces not only such relatively mild perversions as egoistical self-consciousness on the one hand, and social callousness on the other, but also much of the criminality and the vice that afflict us. Undoubtedly degeneracy of certain stocks is at the root of much crime and vice; there is often relative incapacity for response in one direction, and disproportionate strength of impulse in another. It would unquestionably contribute enormously to the moral health of society if these stocks should cease to breed. But it remains true, on the one hand, that the outcome of growth, even for one with unfortunate heredity, depends in great measure upon the social pains and pleasures that he meets during his plastic years; and, on the other hand, that a great proportion of vice and crime is simply perverted growth on the part of fairly well endowed individuals. Such perverted growth must be charged to the inadequate provisions that society has made for a normal moral life on the part of the young. Sexual vice, for example, though it is the utterance of an instinct, is enormously promoted by the refusal of adult society to face the facts of sex, and to incorporate into our dealings with the young a socially constructive sex-consciousness.¹ Most of the entrenched wrongs of society, in fact, thrive by virtue of specific social experiences of the young. The natural correlate of our analysis of growth and its laws, therefore, would be a proposal that society should regulate all its intercourse with the young on the principles of education.

LITERATURE.—From the very extensive literature of child-study and of moral and religious education, the following list selects a few recent studies of the order and processes of moral

¹ See the *8th Year-Book of the National Society for the Scientific Study of Education*, Chicago, 1909.

and religious growth, together with a few studies of practical methods for promoting such growth. The reader should consider the literature appended to art. CHILDHOOD as a part of the present list.

I. GENERAL WORKS ON THE GROWTH OF MORAL CHARACTER: E. A. Kirkpatrick, *The Individual in the Making*, Boston, 1911; E. O. Sisson, *The Essentials of Character*, New York, 1910; J. M. Tyler, *Growth and Education*, Boston, 1907; E. R. Mumford, *The Dawn of Character*, London, 1911; J. MacCunn, *The Making of Character*, New York, 1900.

II. WORKS CONCERNED ESPECIALLY WITH RELIGIOUS GROWTH: E. D. Starbuck, *Psychology of Religion*, London, 1899; E. S. Ames, *Psychol. of Rel. Experience*, Boston, 1910, pt. iii.; G. A. Coe, *The Spiritual Life*, New York, 1900; R. M. Jones, *A Boy's Religion from Memory*, Philadelphia, 1900.

III. GENERAL WORKS ON METHODS FOR PROMOTING MORAL AND RELIGIOUS GROWTH: G. A. Coe, *Education in Rel. and Morals*, New York, 1904; W. B. Forbush, *The Coming Generation*, do. 1912; E. H. Griggs, *Moral Education*, do. 1906; E. Richmond, *The Mind of a Child*, London, 1901; E. P. GUIANA.—I. Name, geography, and physical characteristics.—The origin and history of the place-name 'Guiana' or 'Guyana' are obscure, despite the very full and pregnant note by G. E. Church prefixed to the article under this name in *EBr*¹, vol. xii. p. 674. The name is almost certainly compounded of the two local Red men's root-words *wai* or *guai* and *ana*, which respectively indicate 'water' (or rather 'river'), and 'the place of.' There seems little doubt that the name Guiana was unintentionally coined by some of the earlier explorers of the 'Wild Coast' of the north-east of the southern continent of America. In sailing past the long series of river mouths and deltas which occupy the coast between the Amazon and the Orinoco, they very probably inquired of the few natives of the locality with whom they came into contact as to the name of the new land, and, being answered that it was 'a place of many rivers,' misunderstood this to mean that *Guiana* or something that sounded like it was the proper and accepted name of the country which they saw from their ships.

Naturally enough, the extent of this imaginary land of Guiana was undefined in the minds of these earlier explorers. Probably it was to them at first merely an alternative for what they had before spoken of as the 'Wild Coast.' Then it was thought of as extending quite indefinitely back from the coast, even perhaps as far as the then almost unknown ocean which, it was assumed, lay far away to the westward. Next, as a little information was gleaned from the few bold traders who penetrated into the interior, as also from the Red men who came down to the coast from homes somewhere about the heads of the rivers, it was vaguely gathered that the main sources of the many rivers which reached the coast must lie close together, also that behind these sources there was some sort of water communication between the two great

rivers Orinoco and Amazon, and that the whole of the land watered by the rivers of Guiana was thus a great island, the so-called 'Island of Guiana,' a huge delta-island, as it were, of the single great river-system which the Amazon and the Orinoco were then supposed to form.

About the mouths of the rivers of the Guiana coast representatives of various European nations—Dutch, English, and French—at an early period established a few widely scattered settlements, and thus acquired some sort of claim to possession. Meanwhile other European nations—the Portuguese as regards the whole of the southern part of the continent and the Spaniards as to the northern part—professed to have acquired between them, by gift from the Pope, exclusive rights over the whole continent, including that country of Guiana which even then was more or less in *de facto* possession of the Dutch and others. For several centuries Dutch, English, and French struggled, each against the others, for possession of Guiana, and were—often much to their indignation—regarded and dealt with as interlopers by the Spaniards and Portuguese. Only within quite recent years has the last of the Guiana boundary disputes between Dutch, English, and French and the Brazilians and Venezuelans—the two last-named respectively representing the old Portuguese and Spanish claims—been settled.

Nowadays Guiana—the old island area of Guiana between the Orinoco and the Amazon—is divided, from north to south, into Venezuelan Guiana (i.e. that part of Venezuela which lies south of the Orinoco), British, Dutch, and French Guiana, and Brazilian Guiana (i.e. that part of Brazil which lies north of the Amazon).

'The island' of Guiana, of course, never existed, in the strict geographical sense of the term; but, as it has proved, the term did cover something real, in that it applied to an area distinct in physical features, and, perhaps consequently, in the kind and condition of the natives who occupied the land before White men first entered in, and who still linger there. Towards the back of the so-called 'island' there is a group of mountains, mostly flat-topped and hardly anywhere exceeding 8000 ft. in height, from which originate all the main rivers of Guiana, some of these flowing towards the west to join the upper waters of the Orinoco and the Amazon, while others—the longer and more important ones—run eastward into the sea on the Guiana coast. Except for the mountain watershed, to which reference has just been made, and a few minor and isolated elevations, the whole of Guiana is comparatively low and of recent origin; indeed, a very large proportion of it consists of actually recent alluvial deposit from the many rivers. The long slope from the coast to the main watershed is for the most part densely covered with trees; and the slope from the watershed down towards the main affluents of the Orinoco and the Amazon is chiefly open country, locally called *savannah*, with few trees except in the gullies.

2. Ethnography.—At the time when Europeans first entered and penetrated the region in question, it was inhabited by red-skinned natives obviously belonging to a considerable number of tribes, more or less distinct from and hostile to each other, and all at a very primitive stage of (American) culture, though some—and those the more dominant tribes—were further advanced than others. As it happened that the chief and most enduring European influence brought to bear on the Red men of Guiana was that of the Dutch—the English, though a long way behind, perhaps coming second in this respect—and as the Dutch, from motives of policy, sought to make allies rather than subjects of the Red men, there seems to have been comparatively

little change in the condition of the so-called 'Red Indians,' from the first entry of Europeans till comparatively recent times. It is true that the early European settlers introduced into Guiana large numbers of African negroes for manual work on the tropical plantations; and that, though these plantations were very seldom far from the coast, the negro slaves—especially, from the nature of the case, the more brutalized of them—did from time to time, and often in large numbers, escape into the forests of the interior and make their homes not far from those of the Red men. But, as it was also part of the established Dutch policy to use their red-skinned allies against the escaped black slaves, there was hardly any intermingling between these American and African coloured folk; and it was only much later—quite recently, indeed, when the gold which had long been sought there had at last been discovered, and the White colonists themselves had thereby been attracted in large numbers into the interior—that any very considerable change occurred in the habits and condition of the Guiana Red men. What the latter were up to a very few years ago they almost certainly were when the Dutch established their first colony, in 1621, on the Essequibo River.

From time to time many different names have been more or less vaguely applied to the various groups, or so-called tribes, of Guiana Red men; and it is even now difficult to classify them in any definite and scientific way. But in the main they belong to four not very widely separated branches of the American race. In the swampy forests nearest to the sea are the *Warrans*, the least advanced of all the local tribes, and probably representing the earliest of the known inhabitants of the country. In the forest, a little way inland from the Warrau country, were, and still are, the *Arawaks*, who must have come into Guiana, from the north, at a later date than the Warrans, but sufficiently long before the arrival of White men to have established themselves firmly and almost as aborigines. Inland from the Arawak country the greater part of Guiana is, and has been throughout historic times, occupied by several branches of the great *Carib* stock, all the members of which may conveniently be distinguished as 'true Caribs.' Still further from the sea, i.e. entirely in the *savannahs* lying beyond the main watershed, are, or were, the so-called *Wapianaks*, who may or may not have been originally of Carib stock. The true Caribs and the Wapianaks almost certainly reached Guiana after the Arawaks, and not very long before the discovery of the country by White men. Indeed, some of these true Carib tribes entered Guiana from the south, by the waterways connecting the Amazon with the Guiana river-system, at periods long subsequent to the settlement of the Dutch on the coast.

3. Stage of culture.—All these Red men were in a very primitive stage of that culture which was developed—sometimes, as in Mexico, to a very high degree—in America. And though, as might be expected from their history as briefly indicated above, the Warrans are at a somewhat lower stage than the other Red men of Guiana, the difference is not very considerable.

The Red men of Guiana, so far as their habits have not been altered by European influences, are in the stage at which they live by hunting and fishing and, in most cases, by cultivation of a kind almost too simple to merit the name of agriculture. Four-footed game and birds are plentiful everywhere. Fish are extraordinarily abundant in the rivers, large and small, as also in the sea. Fresh-water turtles are so numerous in the rivers that their flesh and eggs provide the Red man with a considerable addition to his animal food; and near

the sea, crabs and shell-fish are at least equally plentiful. Nor is there any lack of wild fruits and other vegetable food. As to cultivation, the cassava plant is the chief object; and the roots of this made into 'bread'—much of which is further manufactured into the slightly fermented and highly nutritive drink called *paiwari*—supply a very large part of the food of all the tribes except perhaps the Warrans, who, having their homes in swamps where cultivation is difficult if not impossible, use the fruit and pith and sap of a palm (*Mauritia flexuosa* [Linn.]) growing wild round their homes in place of cassava.

None of these Red men had occasion—and, in proportion as they are out of contact with Europeans, still have little occasion—for much in the way of clothing. A small apron is quite sufficient except at festivities or in courting; and on such occasions a greater or less amount of ornamental clothing is easily added by working up the feathers, seeds, shells, and barks which Nature has abundantly provided.

As for shelter, on the open *savannah*, where the wind is often cold, fairly large and substantial houses, with thickly thatched roofs and thick mud walls, are built; throughout the greater part of the forest region much less substantial houses of leaves and posts suffice; and in their low-lying, palm-tangled swamps the Warrans construct for themselves yet simpler shelters of leaves and sticks; but, owing to the nature of the ground, they have to place these houses on somewhat substantial platforms of felled palm-trunks. In none of these cases is the house in any way much elaborated; nor is much labour involved in getting the material together.

Fire was always easily made by rubbing two sticks together, in a simple and easily learned way (cf. art. FIRE), and fuel lies everywhere around. Most of the tribes are good potters, after a simple fashion. Bows and arrows, blowpipes—the latter used only on the *savannah*—and fishing-gear they are singularly expert at constructing. The only other prime necessity of their simple and easy lives is the hammock, or hanging bed, the invention of which is the one great triumph of ingenuity which they have achieved. The material of which the hammock is made is either the cotton which grows almost wild about their houses or the strong string-like fibre which they know how to extract from palms and similar plants.

In short, these Red men, when first discovered by Europeans, had attained to nothing more than that stage of culture in which each individual, or at any rate each family group, knows how, from the material ready to hand, to supply easily all the immediate needs of life, but is unable, owing to ignorance of the necessary arts, to produce treasure of wealth for the use and enjoyment of succeeding generations.

4. Mental attitude: quasi-religious conceptions.—It is more difficult to describe what would appear to be the mental attitude of this people, at this stage of culture, towards their fellows and towards the world in general. The individual Red man of Guiana knows only himself, and knows neither of any beginning nor of any end to that self. He sees children born into the world, and—if and when he thinks on that subject—he probably assumes that he himself was once 'born,' but not that he then came into existence as an individual; rather he assumes that at the crisis of birth he—i.e. the 'being' whom he recognizes in himself—merely passed into a new body. Similarly, when he sleeps, he dreams perhaps that he is a jaguar or a tree or some other man or thing than himself; and when he is awake, if he remembers his dream at all, he assumes that he (his being) was really at the

moment that jaguar, tree, or man, and that he has now passed back into the body which he happened to be occupying at the moment when he went to sleep. Once more, he sees men die, and probably assumes that he himself will one day die; but he does not for a moment suppose that this will be the end of him, but rather that it will be merely the passing of himself into another body—much as during his dreams he has already been in other bodies.

Another thing which it is necessary to understand is that a typical Guiana Red man is—and, so far as he retains the innate habit of thought of his race, could not but be—the purest of egoists. He knows himself, and instinctively claims for himself certain rights, for instance the right to get for himself all that he is strong and clever enough to get. At the same time he can hardly fail to recognize the existence of innumerable other beings, which are more or less 'good' or 'bad' to him, but are all more or less elusive as to bodily form. These beings with which he comes in contact may be in what we should call human bodies, which may be those of Red men of tribes other than his own, or, again, not of his own family or not of his own household; they may be in bodies which we should call those of brute beasts; or they may be embodied in trees, or stones, or any other outward shape. Moreover, all these beings may be, as the Red man thinks, sometimes in one kind of body and sometimes in another. His feelings towards this innumerable host of beings outside himself are not what we should describe as those of affection or hatred, but rather those either of appreciation of something useful to himself, or of depreciation of something possibly more or less harmful, or at least useless, to himself. He dreads, or at least suspects, every strange man and strange object; and the degree of his liking even of the beings which are not strange to him is in proportion to the degree in which he is familiar with them, or rather to the degree in which, from experience or otherwise, he judges that these outside beings are or may be useful to him. Even the members of his own family are not loved, but are more or less valued, in proportion as they are, or may be, more or less good, i.e. useful, to him.

Another aspect of this primitive philosophy is that, as every 'being,' however much and however often it may change its form, is without beginning and without end, hence it follows that no one of these 'beings' ever dies (as we should say), but remains actually present in the world, whether in visible form or not. To the Red man every being that ever existed still exists; and every being that at any time did anything, good or bad, to make itself remembered, even though it has long left the body in which it did that deed, is not only actually present, but is as capable as ever it was of doing the kind of thing that it used to do. If the deeds of the 'dead man' were good (subjectively, to our supposed red-skinned philosopher), the dead man is (to him) a still existing hero, and he thinks it well to cultivate his favour, or at least to guard against his disfavour. If, on the other hand, the 'dead man' did things which were bad, he still remains present as a being to be dreaded. It is apparently in some such way as this that the Red man regards the world of beings that are to him what, for want of better words, we should speak of as, on the one hand, 'heroes,' or even gods, and, on the other hand, evil spirits, or even devils.

The old controversy between anthropologists as to whether any particular group of primitive folk did or did not recognize the existence of a supreme god (see GOD [Primitive and Savage])—the Great Spirit, All-Father, and the Creator—as a being of entirely different origin and order from their own,

has been raised as regards the Guiana Red men. The present writer, after long and intimate intercourse with the latter, came to the conclusion, to which he still adheres, that they have never of themselves recognized such a superior being, and that, if they speak, as they have certainly sometimes spoken, of a very powerful being which, for instance, made men or made the world, or submerged an existing world under the waters of a great flood, they are then referring, on the strength of tradition, to a more or less exceptionally powerful being belonging to their own order.

Holding the ideas above described, the Guiana Red man instinctively feels that of all the quite indefinite number of beings—in all sorts of forms—of which he becomes aware during the course of his life, the most important to him are those which are, or may be, actively hostile to him, all of which he calls *kenaima*; and those which may help him to ward off the effects of the *kenaima*'s hostility—these he calls *peai*. Absolutely all evil that happens to him is done by the being which, whether at the moment of action it happens to be in the form of man or beast, or stock or stone, or in any other conceivable form, is *kenaima*; and the Red man's one obligation other than that of getting together the necessities of life is to guard himself against the attacks of the *kenaima*. Against the open attack of the *kenaima* he can to a certain extent guard himself; but against the insidious attacks which the *kenaima* is able to make—in virtue of that being's unlimited power of changing its form—the Red man naturally feels himself insufficiently equipped; and he therefore applies for help against the *kenaima* to the professional wise man of his tribe, the *peai*, or medicine-man.

It may at first sight appear that this conception of the relations of good and evil is not very different from that which among more civilized folk takes the form of a great contest between good and evil, between God and the devil. There is this difference, however, that to the Red man there does not appear to be any God to fight for him; it is a question of fighting only for his own welfare, with the help, at most, of beings of his own kind, though perhaps somewhat more clever.

A question may be asked as to what is the nature of the material with which the *kenaima*, when he does not use an arrow or other material weapon, works harm, and, again, as to the material with which the *peai* counteracts this evil. In both cases the 'medicine,' i.e. the poison or the antidote, is called by the Red man *beena*; it is thought of as an essence extracted from some substance, and it may be used, now by the *kenaima* and now by the *peai*, much as, under the conditions of Western culture, poison might be administered by an enemy, or medicine by a doctor.

The *kenaima* and the *peai* are both more clever, i.e. more artful, than their patient, and both possess one faculty which is of great importance to them; they know how to extract the real being of the red-skinned patient from the body in which it happens to be enveloped. For instance, the *kenaima*, if he gets possession even of a fragment of the body of the patient on whom he intends to inflict ill—say even a few hairs or a nail-cutting—may be able to get possession of the whole being which was within the body from which the fragment was cut; or, again, the *peai*, by certain processes of what we should be inclined to call incantation, can, for convenience of treatment, draw out the spirit (the real being) of his patient, just as one of our own medical men might on occasion have the body of his patient stripped of its ordinary clothes.

5. *Morals*.—The innate ideas of the Guiana Red man most nearly approaching to what, if he had ever for himself attained to any higher stage of

culture, would have been his religion have been briefly indicated above, and it now remains to note what, under the restraints of this very primitive philosophy of his, is his line of conduct towards all outside himself. As a matter of fact, his morality, like his religion, is purely egoistic. Whatever he does he does for himself. His 'wives'—he is naturally a polygamist—are no part of himself; and, so far as he takes trouble for them (and he habitually does much in this way), it is because they are good—i.e. useful—to him. On the other hand, his children—one of the chief uses of his wives is to bear children to him—are (the boys at least) part of himself, and are cherished accordingly. This difference in his personal relation towards his wives and his children is clearly indicated in his practice of the remarkable custom of *couvade*, in accordance with which, as soon as the child is born, the mother, as a matter of course, at once resumes her ordinary daily tasks; but the father not only refrains from hunting and all similar hard tasks, but lies in his hammock, and is even nursed. The explanation of this strange custom seems to be that a part of the father's being is supposed to have been separated from him and embodied in the child. It is the recently separated father and child who require nursing—much as, in the process of plant propagation by cuttings, the first necessity is to provide for the healing of the wounds on stock and on offset.

Moreover, it is the egoism of the Red man which regulates the more or less kindly bearing—in proportion as the co-operation of these is useful—towards his relations other than his descendants, and towards Red men of groups other than that to which he belongs. Again, it is his egoism, carried to a more or less extreme form, which regulates his greater or less hostility towards strangers—whatever the colour of their skin—so long as he suspects them of possible evil intention towards himself.

Finally, the present writer is anxious to make it quite plain that, in attributing to the Guiana Red men an extreme form of egoism as the leading motive of life, he has no intention of disparaging them. It is only that the Guiana Indian is a survivor from a very primitive stage in the development of mankind, from a stage before the first glimmering perception of the habit of altruism had given the impetus which really started a portion of the human race along the road which, after many centuries, led so-called civilized folk to a point whence they see the universe in a light so different from that in which the Guiana Red men—and a good many other equally primitive folk—see it.

The most practical lesson to be derived from all this seems to be that the difficulty of suddenly imposing our very much and differently elaborated system of thought, religion, and morality, on such folk as the Red men of Guiana is enormous, that the task should not be undertaken except after as full an understanding as possible of the conditions, and that it can be accomplished only, if at all, by civilized teachers who have agreed among themselves as to what exactly to teach.

GŪJAR (Skr. *Gurjara*, the country now known as N. Gujarāt and Rājputāna which took its title from a tribe of the same name entering India in the train of the Huns [V. A. Smith, *JRAS*, Jan.-Apr. 1906; D. R. Bhandarkar, *JASB*, 1909, p. 167 ff.]).—A tribe of cultivators, herdsmen, and cattle thieves, which at the census of 1901 numbered 2,103,023, found in the largest numbers in the Panjāb, Rājputāna, United Provinces, and Kashmir. The theory of Cunningham (*Archaeological Reports*, ii. 64), that they are connected with the Yueh-chi tribe of Central Asia, afterwards known as the Tokhari, is rejected by Risley (*ICR*, 1901, i. 513 f.) on the ground that the latter are almost certainly of the brachycephalic type, while the Gūjar is dolichocephalic. He therefore includes them in what he calls the 'Indo-Aryan branch.' It is, however, certain that during the first five centuries A.D. hosts of the Scythian and Hun invaders of N. India became absorbed in the indigenous population, and were adopted into Hinduism (Smith, *Early Hist. of India*, 1908, p. 375 ff.). In their purest form at present they seem to be found in Kashmir, where Drew (*Jummoo and Kashmir Territories*, 1875, p. 199 f.), though he does not regard them as 'high Aryan,' found some with eyes lighter in colour than are common among other tribes of the country. There is much in the physique and customs of the Gūjars which renders it probable that they are connected with Central Asian tribes.

In religion, the Gūjars of the Panjāb have been largely converted to Islam, and not far from half their total number now follow that faith. In the United Provinces and Rājputāna they are still largely Hindu. In the W. districts of the United Provinces they are usually worshippers of Siva and of the Sakti, or Mother-goddesses, and in particular of Sitalā Bhavāni, who controls small-pox. They also worship the local village-gods, such as Chāmar, and two tribal deities, Pyāreji and Bābā Sabhā Rām. The latter are deified heroes of the tribe, Pyāreji, whose shrine is in the Sahāranpur District, flourished early in the 17th cent. A.D. He was one of the marvellous children of the folk-tales, and, when he grew up, the tribe was severely afflicted by the ghosts of certain Brāhmins whom they had slain by treachery. Pyāreji, who had by that time acquired saintly powers, exorcized the evil spirits, and the reputation which he thus acquired earned for him Divine honours. The management of his shrine still remains in the hands of his descendants, who have now joined the Vaiṣṇavite sect. Bābā Sabhā Rām was another worthy of the same class, who is worshipped at a shrine on the banks of the Jumnā in the Ambāla District. The Panjāb Gūjars are specially devoted to the cult of the saint Sarwar, whose shrine is at Sakhi Sarwar (q.v.) (MacLagan, *Panjāb Census Report*, 1891, i. 136).

The Musalmān branch of the tribe, in spite of their conversion, continue to follow many of the animistic practices of their Hindu forefathers, such as the ceremony of waving lights over a bride to scare evil spirits. They consult Brāhman astrologers to fix lucky times for domestic rites; and they worship not so much Allāh as a host of deified heroes and saints, such as Ghāzi Miyān, the saint of Bahraich in Oudh, Madār Shāhib, and other martyrs of the faith. In some parts of the Panjāb, members of the tribe claim the hereditary power of wonder-working and curing disease. The head of one sept in the Jhīlam District pretends to cure

a skin disease which causes baldness, by pulling out a single hair from the head of the patient. He practises only on one Sunday in the month, and must accept no fee, because that condition was imposed by the *faqir* who conferred the power upon his ancestor many generations ago (Rose, i. 162). A branch of the tribe in the Hazara District shows that its conversion to Islām is recent and incomplete, by the retention of Hindu rules of eating, keeping strictly for personal use the vessels employed in cooking, practising purification before prayer, and praying with the hands downwards instead of upwards, as is the usual custom with Muhammadans (PNQ ii. 45). The Gūjars in the Bharatpur State of Rājputāna have a curious custom of making a cow of cow-dung, covering it with cotton, and then going through a rite of symbolical slaughter of the image. This seems to imply some form of totemistic communion, or a commutation of the actual killing of the sacred animal. The latter explanation is accepted by the neighbouring tribes, who consider that the Gūjars are degraded by the rite (*Rājputāna Gazetteer*, i. [1879] 162). In W. India many of the tribe have joined the Jain community, while others follow the Vaiṣṇava Vallabhacharya sect.

GUNA.—This is one of the most characteristic technical terms of the Sāṅkhya (*g.v.*) philosophy. This system explains the evolution of primitive matter (*prakṛti* or *pradhāna*) and the infinite variety of the universe by the hypothesis that primitive matter, in spite of its unity and indivisibility, is composed of three different substances, termed *gunas*. Since the Sanskrit word *guna* signifies 'quality' in addition to its earlier meaning 'constituent,' the later signification was formerly adopted for the technical Sāṅkhya term, and primitive matter was said to be composed of the 'three qualities.' This rendering, however, is incorrect. The three *gunas* in the Sāṅkhya philosophy are nothing but the constituents of primitive matter (or of the material universe, developed from primitive matter), as is proved by the express declarations of the Sāṅkhya texts and by the connexion of the doctrines. The view maintained by H. Jacobi does not practically differ from this, when he contends (*GGA*, 1895, p. 203 f.) that, although the three *gunas* are regarded by the extant Sāṅkhya authorities as constituents of primitive matter, the term originally denoted 'quality,' since the Sāṅkhya system, as he maintains, goes back to a period at which to the Indian consciousness the categories of quality and substance were not clearly distinguished.

The three *gunas* bear the names of *sattva*, *rajas*, and *tamas*. To assign to these, however, their etymological meanings of 'goodness,' 'passion,' and 'darkness' would be misleading; and, indeed, the terms do not admit of exact translation. The founder of the Sāṅkhya philosophy regarded as most important for men these qualities in objects which excite either pleasure or pain or indifference (apathy, insensibility). Pleasure was associated with the ideas of brightness and lightness, pain with those of incitation and movement (activity), apathy with those of heaviness and restraint. The conclusion was then drawn that all matter is composed of three elements, each of which is manifested especially in one of the three above-mentioned dispositions. The author of the Sāṅkhya system further explains the profusion of

material products and the variety of impressions by the unequal and varying combination of the three constituents, which everywhere contend with one another, and give more or less complete expression to their own essential nature, according to the measure of success attained by one or two, in suppressing both the others or the third at some particular place. If the several constituents are allowed to develop freely, *sattva* is manifested in the object as light and buoyancy, in the subject as virtue, benevolence, happiness, cheerfulness, etc.; *rajas* in the realm of objects as force and movement, in the subject as every kind of suffering, anxiety, passion, wickedness, etc., but also as ambition, effort, and activity; *tamas* in the realm of objects as heaviness, rigidity, and darkness, in the subject as cowardice, fear, stupidity, sloth, etc. According to this theory, *sattva* predominates in the world of the gods, *rajas* in that of men, *tamas* in that of animals, plants, and minerals.

The most remarkable feature of this whole theory is clearly that it traces the characteristics of men back to physical causes. The relation of the three *gunas* to human belief and sentiment, modes of life and action, is described in the 17th and 18th chapters of the Bhagavad-Gītā.¹ It is a remarkable doctrine also that pleasure, pain, and apathy not only exist as subjective and individual experiences, but have their objectively real correlatives in the external world.

Every process in the material universe depends, according to the doctrine of the Sāṅkhya, upon the action of one or more of the *gunas*. In spite of the infinite variety of the modifications to which they are subjected, every phenomenon, every development, and every change is explained by the qualities of these three elements. If, however, *sattva* and *rajas* and *tamas* have a place in all products, it is a necessary inference, from the principle that the product is simply the material cause in a definite stage of evolution, that they must have already existed in that first cause, i.e. in primitive matter. As *sattva*, *rajas*, and *tamas* in the form of the product (*kārya-rūpa*) fashion the universe as it exists, so in the form of the cause (*kāraṇa-rūpa*) they fashion the primitive matter before evolution begins. Is it possible, however, for the infinite indivisible primitive matter to be fashioned by three finite elements? Can it consist altogether of parts? The answer given to the second question is in the affirmative, just as a single river may consist of three tributary streams. And in reply to the first the explanation is offered that the three constituents are finite only in the sense that *sattva*, *rajas*, and *tamas* are not present in their entirety everywhere, but that, on the other hand, there is no point in the universe where at least a minimum of these three elements is not to be found. As long as primitive matter remains quiescent, the three *gunas*, according to the doctrine of the Sāṅkhya, continue in a state of equilibrium. While this condition lasts, during which the constituents remain unrelated to one another, all the forces and qualities which display themselves in the developed universe are latent and inactive as germs in primitive matter. It must not, however, be inferred that during this period the three *gunas* are completely at rest; that would be contrary to the nature of these elements, which are in a state of ceaseless change. It is rather that in primitive matter, before evolution begins, an isolated movement takes place within each separate *guna* in such a way that each of the *gunas* is transformed into an equivalent to itself, i.e. *sattva* becomes only *sattva*, etc.

When the state of equilibrium of the three *gunas*

¹ Translated into English by J. Davies, 3rd ed. 1894; K. T. Telang, *SBE* viii., 2nd ed. 1898; L. Barnett, London, 1906.

is disturbed, and they begin to contend with one another, the universe is evolved in the way described in the article SĀṆKHYA. This philosophy ascribes the breaking up of the stable equilibrium of the three *gunas*, i.e. the close of the inert and undeveloped state of primitive matter, to the mechanical influence exerted by the souls on the primitive matter which stands to them in a relation of perpetual dependence. Those actions of living beings which in the previous age of the universe have not yet received their recompense claim reward or punishment in a new age. Forthwith merit and demerit, which had slumbered during the period of the dissolution of the universe, awake to life, and proceed to call into existence a new creation. When the process of evolution of primitive matter has reached its conclusion, a period of stability follows, during which the creative force of Nature brings into being individuals and particular products. To this period of the world's existence the three *gunas* maintain everywhere throughout the universe an unceasing strife for the ascendancy. At the close of the period of stability, and therefore of an age of the universe, reabsorption commences, the products of the gross elements returning successively in reverse order into their material causes, until primitive matter is again found in the same condition as before evolution began, and the state of equilibrium of the three *gunas* is again established. This alternation of the rise and dissolution of the universe is repeated in a perpetual cycle without beginning or end.

It is obvious that this whole theory of the three *gunas* as taught by the Sāṅkhya is a pure hypothesis, which shares the fate of very many other hypotheses of philosophy, and cannot hold its ground from the modern scientific point of view. It is nevertheless an interesting essay in explanation, which to the Indian mind has appeared possessed of such convincing force that the idea has become absolutely the common property of all philosophical Sanskrit literature. Even at the present day the entire circle of philosophical conceptions in India is controlled by the theory of the three *gunas*.

GÜNTHERIANISM.—Güntherianism is the name given to a rather vaguely defined body of teaching, mainly philosophical in scope, but with important bearings upon certain theological dogmas, which originated in the writings of Anthon Günther (born 17th Nov. 1783 at Lindenau in Bohemia; died at Vienna, 24th Feb. 1863).

1. *Life of Günther.*—He was the son of devout Roman Catholic parents; but, giving himself in his youth to the study of Kant, Fichte, Schelling, etc., he seems for a while to have been seriously shaken in his religious convictions. When, however, in 1811 he moved to Vienna with the household of Prince Bretzenheim, in which he acted as tutor, he fell under the influence of Clement Mary Iofbauer, afterwards canonized, with the result that his faith in Christianity revived, and he set himself eventually to study for the priesthood. Two years after his ordination (1820) he entered the Jesuit novitiate, but found that he had no vocation, and then for the remainder of his days (1824-68) he settled down quietly at Vienna as *Privatgelehrter*, giving some part of his time to pastoral work, but occupied mainly with philosophical and theological speculations. For more than twenty years he acted as official censor to a Government which still subjected literature to theological revision. He refused tempting offers of a professorship at Munich, Bonn, Breslau, and Tübingen, probably in the hope of ultimately securing a similar distinction at Vienna itself; but, before the opportunity came, his writings, many of which were much controverted and discussed, had brought his orthodoxy under suspicion. Finally, in 1857, his books were placed on the Index at Rome, though due recognition was given to his personal integrity and good intentions. Günther submitted to the condemnation, but it filled his remaining years with bitterness.

2. *System.*—It was the purpose of Günther to build up a philosophical system in opposition to

the prevalent Hegelian pantheism, which he considered the philosophy of the schoolmen was inadequate to meet. Consequently we find in his writings a certain fundamental dualism (which attains its climax in the antithesis between God and the created universe) dominating all his speculations. Nor can the student of his works, casual and unsystematic though they be, resist the suspicion that the development of his ideas has been guided by an exaggerated desire to discover analogies and symmetrical features in every field of thought, and that the anticipation of being able to provide some sort of natural explanation of the great Christian dogmas of faith has moulded, consciously or unconsciously, the whole of his psychological theory. It was a conspicuous element, if not a fundamental principle, of Günther's teaching that there is no real distinction between the truths demonstrable by human reason and the mysteries of faith. The latter are not to be regarded as beyond the range of human intelligence unaided by revelation. On the contrary, he maintained that pure reason is capable of demonstrating the 'why,' though not the 'how,' of such revealed dogmas as the Trinity and the Incarnation. Revelation he held to be only hypothetically necessary; that is to say, in so far as man's intelligence had been clouded and impaired by original sin. From this position it resulted that reason is the supreme arbiter, and ought not to be regarded as the handmaid of faith—a view, as the Papal condemnation pointed out, which laid itself open to the objection that knowledge and faith are not distinct things, and, further, that the dogmas of faith may change as knowledge is perfected. These theological conceptions rested on a philosophical basis which seems to have been devised expressly to support them.

Like Descartes, Günther made psychological consciousness his starting-point. Man, he said, acquires the consciousness of himself, of his ego, not immediately, but by means of the faculties of the ego, its 'receptivity' and its 'spontaneity' (that is to say, the understanding and the will), the acts of which bring the spirit (*Geist*) face to face with the ego, which is the reason and foundation of both. Starting from the ego, Günther, by an inferential process again analogous to that of Descartes, sets out to demonstrate the existence of God, as well as of 'nature' and of 'spirit,' with their attributes and mutual relations, the whole system being pervaded by a sort of symbolical reflexion of the relations which he discovers between the Persons of the Trinity. In the Trinity he recognizes three egos, which he describes as thesis, antithesis, and synthesis; or, again, as absolute subject, absolute object, and absolute subject-object, trying in this way to give an account of the genetic nexus between Father, Son, and Holy Ghost. Corresponding to this, when God, not, properly speaking, free, but necessitated by the Divine essence, created the universe, a trinity of elements resulted, consisting of spirit (subject or thesis), nature (object or antithesis), and man (subject-object or synthesis). Apart from these three things there can be no universe. Their 'form' is one, but their essence is threefold, this being the very opposite of what we find in God, where there are three egos, three substances, and a single essence. From this point of view it may be said that creation is an inverted God (*verkehrter Gott*) or a 'contraposition' of God.

Similarly, in his psychological analysis of man's constitution and mental processes, Günther finds an aid to the comprehension of the mystery of the Incarnation. In man, he says, there are three elements—body, psychic principle (*Seele*), and spirit (*Geist*). The psychic principle is the product of

'nature,' and is not directly created by God. Nevertheless, it is the seat of imagination, memory, and an understanding which forms concepts (*Begriffe*), and which in so far may be said to 'think.' But the reflex processes by which we form ideas (*Ideen*), and by which we penetrate to the being of things as distinguished from their appearances, belong to the spirit. This spirit in every man is hypostatically united to the psychic principle, and from this results a certain 'communication of idioms' between the faculties belonging to the spirit (i.e. reason and will) and the imagination, memory, and understanding, which are the functions of the psychic principle. This teaching concerning the psychic principle, which runs expressly counter to the scholastic axiom that the soul (*anima rationalis*) is the true and immediate 'form' of the body, was also specially noticed in the Papal condemnation of 1857.

These illustrations may suffice to indicate the general trend of Günther's teaching. The more philosophical aspects of it have been re-constructed and systematized by his disciples, notably by Theodor Weber in his *Metaphysik* (2 vols., Gotha, 1888-91). Weber was an Old Catholic who acted as vicar-general to Bishop J. H. Reinkens of Bonn, himself also a Güntherian; and it may be said that, so far as Güntherianism has any followers at the present day, it is among the Old Catholic body that they are found. With the exception of J. E. Veith, most of the prominent disciples of Günther, like P. Knoodt, his biographer, joined the Old Catholic movement after the Vatican Council.

LITERATURE.—A full account of Günther's life and writings is given by P. Knoodt, *Anton Günther, eine Biographie*, 2 vols., Vienna, 1881. Günther's own works, apart from contributions to periodical literature, were the following: *Vorschule zur spek. u. theol. Theologie*, 2 vols., Vienna, 1828-29 (2 1840-48); *Peregrinus Gassianus*, do. 1830; *Süd- u. Nordlichter am Horizonte spek. u. theol. Theologie*, do. 1832; *Janusköpfe f. Philos. u. Theologie* (in conjunction with J. H. Papst), do. 1833; *Der letzte Symboliker*, do. 1834; *Thomas a Kempis*, do. 1835; *Die Juste-Milieu in der deutschen. Philos. gegenw. Zeit*, do. 1838; *Eurythmus u. Herakles*, do. 1843; *Lydia* (a philosophical annual, published in conjunction with J. E. Veith), do. 1849-54. His collected works were issued at Vienna in 1882 in 9 vols. Among the numerous critics of his system may be mentioned in particular: F. J. Clemens, who, in 1853, published at Oologee several pamphlets attacking Güntherianism from the orthodox Roman standpoint; and J. Kleutgen, who, in his *Theol. der Vorzeit* (6 vols., Münster, 1867-74), has devoted much attention to Günther. More summary accounts may be found in Wetzer-Welte², Freiburg, 1888, v. 1324; in *PRE³*; in Ueberweg, *Gesch. der Philos.* iv.¹⁰ (Berlin, 1900) 189 ff.; and in *The Catholic Encyclopedia*, New York, 1910, vii. 85.

HERBERT THURSTON.

GURKHĀ, GORKHĀ.—The dominant tribe in Nepāl, which takes its name from the District of Gorkhā in the N.E. portion of the valley of the river Gandak, between the rivers Trisūlgangā and Sveti Gandak, the chief town being Gorkhā, 56 miles W. of Kāthmāndū (*q.v.*), the present capital of the country. The name *Gorkhā* is popularly interpreted to mean 'cow-protector' (Skr. *gorakṣa*); by others it is connected with that of the national saint, Gorakhnāth (*q.v.*), a mysterious figure of whom the recorded history is little more than legend (Wright, *Hist. of Nepāl*, Camb. 1877, p. 140 ff.; H. H. Wilson, *Essays*, i. 213); but it is more probably a local name which has acquired its present form and interpretation under Brāhman influence. The present dynasty claims Rājput origin, tracing back its lineage to the son of Rājā Samarāṅgi of Chithor in Rājputāna in the 12th cent. A.D. But the recorded genealogies begin with Mahārājā Dravya Sāh (A.D. 1559, a date confirmed by the MSS collected by Bendall [Wright, p. 289; *JASB* lxxii. 17]). A member of this dynasty, Prthivi Nārāyan, in 1769 expelled the ruling house said to have been founded by Hari Siṁha Deva, Rājā of Mithila, or N. Bihār, in A.D. 1332.

1. The term Gorkhā, as usually employed, is vague. It is not limited to any particular class or

clan, but is applied to all those races whose ancestors occupied the country of Gorkhā, and subsequently, from this centre, extended their conquests far and wide over the E. and W. hills. In practice, among Europeans, it is applied to the classes from which the British Nepalese regiments are recruited, such as the tribes of Khas, Gurung, and Mangar (Vansittart, p. 213; Gait, *Census Report Bengal*, 1901, i. 452). The Khas certainly belong to the Mongoloid family; but from the 12th cent. downwards the tide of Muhammadan conquest and bigoted persecution spread over Hindustān, and numbers of Brāhmins and other high-caste Hindus took refuge in Nepāl. In order to secure the spread of Hinduism in their new home, they raised the earlier and more distinguished converts to the rank of the *ksatriya*, or Hindu warrior, class. Moreover, they cohabited with women of the country, who insisted that their children also should be raised to a position of dignity.

'To this progeny also, then, the Brāhmins, in still greater defiance of their creed, communicated the rank of the second order of Hinduism; and from these two roots, mainly, sprung the now numerous, predominant, and extensively ramified, tribe of the *Khas*—originally the name of a small clan of creedless barbarians, now the proud title of the *Ksatriya* or military order of the Kingdom of Nepāl' (Hodgson, *JASB*, 1838, p. 217; Gait, *op. cit.* i. 456).

2. The Khas, Gurung, and Mangar.—The Khas have, since the Brāhman immigration, received a considerable admixture of Aryan blood; they speak an Aryan language, have largely come under Hindu influence, and are now the predominant race of the country, claiming the right to wear the Brāhmanical thread, and supplying many officers to the national army. The Gurung, on the other hand, one of the best fighting tribes of the country, retain the comparatively pure Mongoloid type. In their own country they are generally Buddhists. But they

'still retain pronounced traces of the primitive animism which they professed before their conversion to Buddhism, and worship the mountains and rivers, offering flowers and grass to the former and food to the latter. This worship seems to be of a propitiatory kind, and is celebrated more particularly for recovery from illness or relief from domestic calamity. Brāhmins serve them as priests, but if no Brāhman is available, a member of the Guaburi *thar* [sept] may take his place and may perform the ceremonies of marriage and disposal of the dead and *nuarmi*, or purification after childbirth' (Bisley, *TC*, Calcutta, 1891, i. 305).

Sometimes, when at home, they employ a *lāma*, or local Buddhist priest; but, when serving with British regiments in India, they resort to Brāhmins for all religious purposes. The beliefs of the Mangar are of the same kind; and 'may best be described as lax Hinduism tempered by survivals of an earlier animistic cult.' Brāhmins assist them in the worship of the orthodox Hindu gods; but the more primitive household deities are worshipped by the headman of the family without the assistance of any priest (*ib.* ii. 75).

In short, Hinduism is a more fashionable and respectable creed than the lax, degraded Buddhism which prevails in the cis-Himalayan region, and has absorbed the animistic beliefs which preceded both Hinduism and Buddhism. Hence all Gurkhās belonging to British regiments are practically Hindus; they are served in religious matters by Brāhman priests, and celebrate all the usual Hindu festivals. Among these the *Dasahrā*, 'the taker-away of ten sins,' the feast celebrated on the 10th of the light half of the month Jeth (May-June), at which the weapons of war are worshipped and animal-sacrifices are offered, is the most popular because it is congenial to the animistic beliefs which form the real basis of their religion. Though nominally Hindu, the bonds of caste sit lightly upon them. The food restrictions apply only to pulse and rice, which must be cooked by each man for himself, and with due regard to the laws of ceremonial purity. Anything else all Gurkhās

will eat in common; and the only prohibited meats are beef, the flesh of the *nīlgāi*, or blue bull (*Boselaphus tragocamelus*), and that of female goats, which none save menials will touch. Game and fish are also allowed, and Gurung use buffalo meat in their own country—a practice which they deny when serving with their more Hinduized brethren (Vansittart, *loc. cit.*). This laxity of caste restrictions makes the Gurkhā specially valuable on field service, and tends towards greater comradeship between him and the British soldier, particularly in Highland regiments, than is possible in the case of Indian sepoys, who are more scrupulous in matters of food and drink.

3. The Gurkhā religion.—The religion of the Gurkhās is thus of a mixed character. The present ruling dynasty, like all new converts, follows the tenets of Hinduism with more anxious care than many of their co-religionists in the Indian plains. They have a great reverence for Brahmins, and the slaughter of the sacred cow is rigorously prohibited. The result is a very decided observance of orthodox Hinduism. Thus, though at present in the Indian plains there is little actual worship of Indra, the Vedic god of the firmament, except in a vague way for the purpose of securing timely falls of rain, in Nepāl there is a regular feast in his honour, the *Indrajātra*. But it is significant that this is combined with a car-festival, the *Rathjātra*, in honour of Devi Kumārī, the maiden goddess—one of the many forms of her cultus which has probably been derived from the indigenous Animism. This local cult of Indra, however, may have been, in a great measure, derived from Buddhism, Indra or Sakra being a favourite object of worship among the later Buddhists (Oldfield, ii. 312 ff.; Wright, p. 38; Waddell, *Buddhism of Tibet*, Lond. 1895, p. 356). Śiva is worshipped under the forms of Sambhunātha, 'the Lord, giver of prosperity,' and Paśupati. 'lord of cattle,' the latter cult probably absorbing some of the primitive theriolatry. The Sivarātri feast, 'the night of Śiva,' is very popular, the principal object of worship being the four-faced *linga* which stands in the temple of Mahādeva at Paśupati. To this prayers and offerings are made; fees are given to the presiding Brahmins, who pour water on the *linga*, wash it, and cover it with flowers. When this rite is over, the officiating priest, after repeating sacred verses, reads out of the holy books the many names and epithets of Śiva, while the worshippers fling leaves of the Bel tree (*Aegle marmelos*) over the top of the *linga* (Oldfield, ii. 321). Equally popular is the worship of his consort in one or other of her many forms. The chronicler, writing of the king Śivadeva-varma of the ancient Śūryavansī dynasty, says that, recognizing that Bacālā Devi was the principal deity of Nepāl, he ordered that after the worship of Śiva as Paśupati, a cloth should be tied by one end to his temple and the other to the palace, the object being to bring him into mystic contact with the goddess (Wright, p. 126). In her form of Devi Bhairavi she is the guardian deity of a considerable district; and in another shape she is honoured at the *Durgā-pūjā* or *Dasahra* festival, with annual sacrifices. Here, however, as is the case in Bengal, a clay image of the goddess is not made; but on the first day of the festival the Brahmins sow barley on the spot where they worship, and sprinkle it daily with sacred water. On the tenth day of the feast they pull it up and present small bunches of it to their followers, in return for presents which they receive from them—a case of the 'gardens of Adonis' of which Frazer has collected many instances (Wright, p. 39; Frazer, *Adonis, Attis, Osiris*, London, 1907, p. 194 ff.). The more savage and purely animistic conception under which the goddess is regarded is shown

by the proceedings of the Gurkhā Rājā, Rāu Bahādūr, in A.D. 1800. His Brāhman paramour, after recovery from an attack of smallpox, finding that she had lost her beauty, and with it her influence over her lover, committed suicide. Thereupon the Rājā vented his rage on the shrines of Devi, to whom he had in vain made supplications for the recovery of his mistress. Some smaller shrines, and the large temple of Devi, known as Taléjū, near the palace at Kāthmāndū, were desecrated and defiled; filth was thrown on the images; worship was forbidden; and the *baidas*, or physicians, were executed (Oldfield, i. 285 f.; Wright, p. 262).

The mixture of creeds is shown by the temple dedications at the chief sacred cities. Śiva as Mahādeva and Sambhunātha has shrines at Kāthmāndū; Viṣṇu as Jagannāth and Nārāyaṇa has temples in the same city, that of the former having been erected by Mahārājā Jang Bahādūr; Devi at Kāthmāndū and Lalitā Patan; Bāgh Bhairon, or Śiva in his tiger form, one of the aboriginal deities, at Kirtipur; and Ganeśa at Kirtipur and Bhatgāmv. Finally, according to Oldfield (ii. 284 f.),

'there is so close a connection between Hinduism and Buddhism, and the one religion seems to pass into the other so insensibly, that it is difficult to draw the exact line of difference between them. Nothing is more common than to see shrines dedicated to Hindu deities (Viṣṇu, Gaṇeśa, and Garuḍa) or reliefs representing them, not only within the precincts of a Buddhist temple, but actually forming part of it.'

But this refers more to the popular than to the orthodox worship. Even under the mild and tolerant Newār sovereigns the strongest influence was exercised to induce the Buddhists to adopt the creed and customs of the Hindus who were then dominant in the country; and their successors, 'the bigoted Gorkhas, regarded the Buddhism which existed in their newly-acquired provinces as a creed which was, at the same time, too contemptible to be feared, and too heretical to be in any way encouraged. . . . It is now in the last stage of its existence; it is rapidly being supplanted by Hinduism; and before the lapse of another century the religion of Buddha, after enduring for upwards of two thousand years, will, in all probability, be as extinct in Nepāl as in the plains of Hindustān.'

LITERATURE.—The earliest and still the best authority on the religion of the Gurkhās is Brian H. Hodgson, the author of numerous papers on the subject, some of which have been collected in *Essays on the Languages, Literature, and Religion of Nepal and Tibet*, London, 1847; see also W. Kirkpatrick, *Account of Nepal*, in 1798, do. 1811; T. Smith, *Five Years' Residence at Nepal*, do. 1802; Laurence Oliphant, *A Journey to Katmandu*, do. 1852; O. Cavenagh, *Rough Notes on Nepal*, do. 1851; and, in particular, F. Buchanan (formerly Hamilton), *An Account of the Kingdom of Nepal, and of the Territories annexed by the House of Gurkha*, do. 1819; H. A. Oldfield, *Sketches from Nepal, Historical and Descriptive, Essay on Nepalese Buddhism*, etc., do. 1880; H. Vansittart, 'Tribes, Clans, and Castes of Nepal,' *JASB*, vol. lxiii, pt. i, p. 213 ff.

GUSAIN.—See GOSAIN.

GWĀLIOR (Hindī *Gwālīar*, said by Cunningham to take its name from the shrine of the hermit Guālīpā, the cow-keeper saint).—The celebrated fortress, capital city of the Gwālīor State in Central India; lat. 26° 13' N., long. 78° 12' E. The religious buildings in the fort consist of two remarkable temples, and a series of caves or rock-cut sculptures. One of the temples is now known as *Sāsabhā*, which is interpreted to mean 'mother-in-law and daughter-in-law'; but the name is really derived from *Saṣasra-bāhu*, 'the thousand-armed,' an epithet of Śiva. An inscription dated A.D. 1093 opens with an invocation to Padmanātha, who has been identified with Padmaprabha, the sixth Jain *tīrthaṅkara*, or hierarch. But there are numerous sculptures of Brahmā, Viṣṇu, and Śiva, that of Viṣṇu being the central figure over the main entrances of the portico and sacrarium; and Cunningham therefore concludes that the

building was originally dedicated to his worship, the name *Padmanātha* being not of Jain origin, but applied to Viṣṇu in the sense of 'lord of the lotus.' This temple is now in ruins, the cruciform porch alone remaining, though in a dilapidated condition. The second great temple is the loftiest building on the hill, and forms the most conspicuous object in the view from every side of the fortress. Its original name is now lost, and it is known as *Teli Māṇḍir*, the 'oilman's temple,' from the person at whose expense it is said to have been built. The design of the temple resembles that of several of the S. Indian shrines. It seems to have been originally dedicated to Viṣṇu; but over a later doorway is a figure of Gaṇeśa, which shows that the followers of Śiva subsequently adapted it to their worship. They also introduced the *linga* and the image of the bull Nandi. The earliest inscriptions referring to the worship of Viṣṇu belong to the 9th and 10th centuries A.D.; and the temple seems to have been adapted to Śaivite worship as early as the middle of the 15th century. There is also a true Jain temple, discovered by Cunningham, and one of the Mother-goddess, *Mātā Devī*, besides other less important shrines. The rock-sculptures are unique in N. India for their number as well as for their gigantic size. They fall into several groups. That known as *Urwāhī* contains twenty-two principal figures, all of which are entirely naked. Inscriptions fix their date at 1440-53, under the Tomara Rājās. One figure is that of Ādinātha or Ṛṣabhadeva, the first Jain pontiff. The largest figure, not only of this group, but of all the Gwālīor rock-sculptures, is a standing colossus, 57 ft. in height, near which is seated a second colossus, 30 ft. in height, of Neminātha, the twenty-second Jain hierarch. In the S.W. group the most remarkable figure is that of a sleeping female, 8 ft. in length, lying on her side, with her head to the south and her face to the west. Both thighs are straight, but the left leg is bent backward beneath the right. Next this is a seated group of a male and female with a child, whom Cunningham identifies with Siddhārtha and his wife Trisālā, the reputed father and mother of Vardhamāna or Mahāvira, the last of the twenty-four Jain pontiffs (Bühler, *Indian Sect of the Jainas*, Eng. tr., Lond. 1903, p. 25). The remarkable fact about these sculptures is that they were executed during a single generation of 33 years (A.D. 1441-1474).

LITERATURE.—The antiquities of Gwālīor are fully described by A. Cunningham, *Archæological Reports*, ii. 330 ff.; see also W. H. Stenham, *Rambles and Recollections*, London, 1893, i. 317 ff.; J. Fergusson, *Mist. of Indian and Eastern Architecture*, do. 1899, pp. 244 ff., 452, 461 ff.; Fergusson-Burgess, *Cave Temples*, do. 1889, p. 509 ff. Some of the temples and statues are illustrated in W. H. Workman, *Through Town and Jungle*, do. 1904, p. 176 ff.

GWĀLIOR STATE.—See CENTRAL INDIA.

GYPSIES.—A race of people inhabiting various countries of Europe, but distinguished from the surrounding populations by their special language, customs, and physical characteristics.

1. **Name.**—The name 'Gypsy,' or 'Gipsy,' is used only by English-speaking people, and is a corruption of 'Egyptian,' by which name the race in question was known in medieval Europe, owing to the belief that these so-called 'Egyptians' were natives of Egypt, or, rather, of a country called 'Little Egypt.' In England the abbreviation 'Gypsion' appears in 1513-23, 'Gipey' in 1526, and 'Gipeyan' in 1536. What seems to be the first Scottish instance of the abbreviated form occurs in 1598, when the Privy Council Records state that Hew Bellenden, younger of Pendreich, was 'accompanied with certane gipseis and divers

utheris' at Lasswade, Midlothian. But the full name 'Egyptian' was concurrently used with its abbreviations throughout Great Britain until the present day. The name 'Egyptian' has also been applied to this race in most of the countries of Europe, occurring in France and Belgium as 'Gyptien,' in the Netherlands as 'Gyptenaer,' and in Spain as 'Gitano' (from 'Egiptiano'). It was used in a Latin form in Hungary in 1490, as may be seen from the will of a Hungarian noble, Ladislas Hermanfy, now preserved in the archives of Prince Battyáni. The passage deserves quotation. In allocating four of his 'smaller horses,' the testator directs as follows, the language employed being Latin:

'The third, which I bought from the Egyptians or Czingany (*ab Egyptiis sive Czinganis*), I leave to my servant Istók. This horse is a grey one, and used to be a carriage horse.'

Here an alternative name, very wide-spread in Europe, is introduced. It takes the following shapes: *Cingani* or *Acingani* (Corfu), *Tchinghiané* (Turkey), *Jinganih* (Syria), *Czigani* (Hungary), *Zigani* (Russia), *Cygani* (Poland), *Ciganos* (Portugal), *Tsiganes* (France), *Zigeuner* (Germany), *Zingari* (Italy), and *Zincali* (Spain).² The etymology of this name has given rise to much discussion, but without definite result. Many other names, more local in character, have been given to the Gypsies. In Spain they have been known as 'Greeks,' as 'Bohemians,' as 'Germans,' as 'Flemings,' and as 'New Castilians.' In France they have been variously designated 'Bohemians,' 'Saracens,' 'Cascarrots,' and 'Biscayans.' In the Netherlands they were not only 'Gyptenaers,' but also 'Greeks' and 'Heidens' (i.e. Heathens). They have been frequently styled 'Tartars,' notably in Scandinavia, where they are also called 'Fante-folk.' There are English instances of 'Bohemian Tartar' and 'High-German' applied to people who were probably Gypsies; while Scotland has references to 'Gypsies or Saracens,' otherwise 'Moors or Saracens,' as present in that country in the 15th century. In Poland they have been called 'Szalassi' and 'Philistines,' as well as 'Cygani.' Early writers have variously designated them 'Nubians,' 'Ethiopians,' 'Assyrians,' 'Uxii,' and 'Cilices.' Many of these names seem to denote the name of the country or province whence the Gypsies had come, bestowed upon them by the people of the country in which they had arrived.

2. **Physical characteristics, distribution, etc.**—The physical characteristics of Gypsies of pure stock, or nearly so, are well marked. Their complexion is generally dark, ranging from olive to deep brown, or even black. A. Weisbach, who examined 52 Gypsy soldiers from a Hungarian regiment, found the colour of their skin to be as follows: brown, 18; inclined to brown, 20; light brown, 8; inclined to yellow, 6.³ That is to say, the great majority were brown-skinned men. The colour of their hair accorded with their complexion. Of the whole number 33 were black-haired, 16 had hair of a dark brown, and 3 were brown-haired. The hue of the eyes was in the following proportions: dark brown, 28; brown, 15; light brown, 5; greyish brown, 2; and grey, 2. It will be seen, therefore, that the prevailing colour of skin, hair, and eyes was dark. Eugène Pittard, of Geneva, records similar results from an examination of 1270 Gypsies, of whom 840 were men and 430 women; 94 per cent of the men, and 88 per cent of the women had black or brown hair.

'The proportion of black-haired men was very remarkable,' observes Pittard. 'In many cases the colour of their hair was

¹ *Ethnographia*, Budapest, vol. i. no. 3, March 1890, p. 164.

² The *Signynæ* described by Herodotus (v. 9) as inhabiting Hungary have also been identified with the *Cygani*.

³ *Die Zigeuner*, *Mitth. d. anthrop. Ges. in Wien*, 1899.

so intensely black that, taken in the mass, it had a bluish gleam like the plumage of a raven or a magpie. The expression "raven-black" commonly given to their hair is perfectly accurate. Light hair is very rare among them.'

In this group, Pittard found that 86.6 per cent of the men, and 87.9 per cent of the women had dark eyes, grey or blue eyes being very rare.¹

But, although the typical Gypsy is of swarthy complexion, black-haired, and dark-eyed, it must be noted that certain members of that caste have not all of these characteristics. For example, a group of Carinthian Gypsies is thus described by Pincherle:

'Strange to say, the women were all blondes, with the exception of one who had the real Indian features and physique. The men were tall and portly; and they too, instead of being olive-coloured, were of a deep-red complexion. But they had the regular Gypsy features: oval face, low brow, ivory teeth, and jet-black hair, which fell in curls at the temples.'²

These were Romani-speaking people, living the Gypsy life, but differing from what is regarded as the typical Gypsy in complexion, although not in other physical characteristics. This is not a singular case, as could be shown from other references, and the fact requires to be kept in view.

Weisbach sums up the result of his examination of the 52 Gypsy soldiers in the following terms:

'These Gypsies are of middling height, bulk, and weight. Their distinctly mesocephalic head is small, and moderately contracted towards its base. The short neck, of average thickness, is placed upon a short, tapering body. They have very short arms, with the upper part short and slender. Their legs are long, much longer than their arms.'

On the question of craniology, however, Pittard is not in agreement with Weisbach, for the former states that the race is markedly dolichocephalic, the series of 1270 Gypsies examined by him having yielded 71.19 per cent of dolichocephalic forms. Iadore Kopernicki, eminent as a craniologist and also a keen student of the Gypsies, made a special investigation of this subject in his monograph 'Ueber den Bau der Zigeunerschädel,' contributed to the *AA* in 1872.³ Pittard adds that the Gypsies of the Balkan Peninsula have straight noses, inclined to aquiline. With regard to the stature of the Gypsies examined by him, he places that of the men at about 1 m. 649 (say 5 ft. 5 in.), and of the women at 1 m. 532, or a little over 5 feet.

Less scientific, but very illuminating, is Hugh Miller's description⁴ of a band of Cromarty 'tinklers,' or semi-Gypsies.

'They were a savage party, with a good deal of the true gipsy blood in them, but not without mixture of a broken-down class of apparently British descent. . . . There were two things that used to strike me as peculiar among these gypsies—a Hindu type of head, small of size, but with a considerable fullness of forehead, especially along the medial line, in the region, as the phrenologist would perhaps say, of *individuality* and *comparison*; and a singular posture assumed by the elderly females of the tribe in squatting before their fires, in which the elbow rested on the knees brought close together, the chin on the palms, and the entire figure (somewhat resembling in attitude a Mexican mummy) assumed an outlandish appearance, that reminded me of some of the more grotesque sculptures of Egypt and Hindustan. The peculiar type of head was derived, I doubt not, from an ancestry originally different from that of the settled races of the country; nor is it impossible that the peculiar position—unlike any I have ever seen Scottish females assume—was also of foreign origin.' Describing a certain visit to the cave in which those people were living, he observes: 'On a couch of dried fern sat evidently the central figure of the group, a young, sparkling-eyed brunette, more than ordinarily marked by the Hindu peculiarities of head and feature, and attended by a savage-looking fellow of about

twenty, dark as a mulatto, and with a profusion of long, flexible hair, black as jet, hanging down to his eyes, and clustering about his cheeks and neck.'

The last reference recalls the *coiffure* of Transylvanian Gypsy men at the present day, or of those seen by Coryat at Nevers, France, in 1608, whom he describes as 'having exceeding long black hair curled.'

The similarity between the Hindu and the Gypsy types, pointed out by Hugh Miller, has been commented upon by many writers, before and after his time. Nor is this similarity confined to physical characteristics; for the language of the Gypsies, essentially the same in all countries, although presenting local variations, is more akin to Hindustani than to any other living form of speech.

The numerals show this affinity very clearly: 1. *yek*; 2. *dui*; 3. *trin*; 4. *shidr*; 5. *pantch*; 6. *shon*; 7. *efia*; 8. *okho*; 9. *enta*; 10. *desh*, etc. Many words are identical in Romani and Hindustani: e.g. *pāni* (water), *kalo* (black), *churi* (knife), *rani* (lady or queen), *nak* (nose), and *bal* (hair). Groome points out that the sentence 'Go, see who knocks at the door,' is in Romani, *Jā, dik kon chahāvā o vudr*, and in Hindustani, *Jā, dekh kon chahāya dōr ko*. The two languages present, of course, many points of difference, but their kinship is undoubted. When and in what locality they began to diverge from the parent stem is unknown. Groome estimates that there are about one hundred Greek words in Romani, and nearly as many Slavic words; while there are also a few words of Persian, Armenian, Rumanian, Magyar, and German origin. The existence of an Arabic element is disputed.

Although there is a common belief that Gypsies are homeless wanderers, they are for the most part a sedentary people, only occasionally showing nomadic tendencies. In the official 'Report on the Gypsy Problem,' drawn up by Arthur Thesleff in 1900, and published at Helsingfors in 1901, the following definite statements are made with regard to the Hungarian division of the race:

'The number of Gypsies in Hungary amounts to some 280,000, of whom about nine-tenths are settled, 74 per cent. belong to the uncertain class who have sojourned for some considerable time in one place, and about 9000 are out-and-out wanderers. The densest Gypsy population is to be found in Transylvania; there are in the country at least 40,000 Gypsy children of the age for compulsory school-attendance who have not attended any school. Of the whole Gypsy population 61.74 per cent. dwell in houses, 33.33 per cent. in earth or straw huts, 3.25 per cent. in tents, and 1.68 per cent. in burrows, the dwelling-houses consisting of one or at the most two rooms, and being of a quite primitive nature. Those who are settled often live a more miserable life than those who wander, for the latter are, as a rule, better off. About 80 per cent. of the Gypsies consider Romani their mother-tongue. Of the total number, 92.30 per cent. can neither read nor write (the corresponding figure for the population is 46.89 per cent.). There are 0.80 per cent. who are independent farmers, 0.92 per cent. servants, and 0.46 per cent. day-labourers; there are 33,980 male and 16,576 female Gypsies carrying on trades, principally smiths and metal-workers (17,020 men), wood-workers (5653), and builders' work-people (15,396 men and women). The musicians, a considerable number, form in every sense the highest and most intelligent class.'⁵

Gypsies are more numerous in S.E. Europe than elsewhere, and they have existed in that region for an unknown period of time. They are specially congregated in the territories bordering upon the western shore of the Black Sea. According to one writer,⁶ there are 500,000 Gypsies in the district of the Lower Danube and the Balkan Peninsula, the Gypsy population of Macedonia being remarkable for its density. For particulars as to the Macedonian group, this writer refers us to Vasil Kunchev's *Makedonia*, a work written in Bulgarian (Sophia, 1900),

'which contains much information about the Gypsies there entirely new to literature. The population and names of all the many Gypsy villages are given, and there is a valuable account of their trades, characteristics, etc. The statistics have evidently been prepared carefully. . . . It is an authoritative work.'

⁴ *My Schools and Schoolmasters*, ch. xvii.

Owing to the fact that a certain proportion of the Gypsy population is migratory, and also because there are many people of mixed blood who may be regarded as Gypsies by one enumerator but not by another, it is impossible to obtain wholly accurate statistics in connexion with the race. Indeed, the figures vary to an astonishing degree. The official census taken in 1873 reported that the number of Gypsies in the countries belonging to the Crown of Hungary amounted to 214,714;¹ whereas the return of 1900, quoted above, raises the figure to 280,000. On the other hand, the *Almanach de Gotha* for 1888 states that there were only 79,393 Gypsies in Hungary on 31st Dec. 1880.² The same authority gives the following figures: Rumania, 200,000 Gypsies in 1876; Serbia, '29,020 se servent de la langue bohémienne,' in 1884; Bulgaria, 37,600 in 1881; and Eastern Rumania, 27,190 on 13th Jan. 1885. These statistics, notably in the case of Rumania, are remarkably at variance with those furnished by the Helsingfors report of 1900, wherein it is stated that the number of Gypsies in Rumania amounts to 'perhaps nearly 300,000,' while Serbia possesses 46,212, and Bulgaria 52,132.³ It will be noticed that, excepting the *Almanach de Gotha* statement with regard to Hungary, the later figures show an increase which might be explained by the assumption that the race has been more prolific during the last generation, possibly owing to an improvement in its surroundings. There is, however, a sufficient discrepancy between the reports to warrant the conclusion that these statistics can be accepted only as approximate.

The Gypsy populations of several other European countries are thus allocated in the Helsingfors report of 1900: Russia, 50,000; Finland, 1551; Poland, 15,000; Lithuania, 10,000; Galicia, 16,000; Spain, 50,000; and the British Isles, 20,000. A 'Statistical Account of the Gypsies in the German Empire,' published by Rudolf von Sowa in 1888,⁴ shows that there were then 241 families, consisting of 1054 individuals, living permanently in Prussia. Although permanent residents, they were not sedentary all the year round, but moved about, attending the principal fairs in their occupation of horse-dealers, musicians, and puppet-show men. In most of the other German States there are no resident Gypsies, according to von Sowa, although Gypsies from other States or countries occasionally pass through. Württemberg, however, possessed about 100 resident Gypsies in 1888; while there were 53 in Alsace-Lorraine, 24 in Baden, and 17 in Brunswick. Von Sowa's statistics appear to minimize the number of Gypsies in Germany, if one may judge from his statement that 'as far as is known, there are no Gypsy colonies in Bavaria.' He adds that 'the police authorities have the strictest orders not to permit Gypsy bands to enter Bavaria, or, if found, to send them away.' This certainly does not accord with Richard Andree's report on 'Die Zigeuner in Bayern,'⁵ based upon the official *Zigeunerbuch*, Munich, 1905, wherein the number of Gypsies in Bavaria is estimated at 3350. It must, therefore, be assumed that von Sowa's figures, as regards the German Empire, cannot be relied upon.

'The Gypsy race is found in every country of Europe, all over Asiatic Turkey, Persia, Turkestan, Afghanistan, Beluchistan, Siberia, Egypt, the north coast of Africa, and in the Soudan. It is scattered throughout North and much of South America. Everywhere it is the same Gypsy race and the language is the same *Romani chib* (Gypsy tongue), in different stages of decay, and modified by various environments.'

The accuracy of these statements cannot be questioned, although the writer¹ omits India and Australasia from his list. It is scarcely necessary to explain that the Gypsies found in America and Australasia are not indigenous, and have merely gone there from the Old World in modern times. But the writer here quoted omits India deliberately. In view of the fact that the Gypsy language is closely akin to Hindustani, this is a remarkable omission. The writer's contention is, however, fully deserving of citation, although it is opposed to the ideas at present prevailing. He contends that the purest Gypsy is spoken in the Balkan Peninsula and the region of the Lower Danube.

'As we leave this district, in all directions their numbers rapidly diminish, and their language becomes corrupt. Eastwards, when we reach the territory adjacent to India and the Hindu Kush, their language has almost disappeared, and they are very few in number. There are no Indian Gypsies. . . . There is no need to go to India to seek the cradle of the *Romani* tongue.'

That there are no Indian Gypsies is too sweeping an assertion; nevertheless, it contains a good deal of truth. There are Gypsy-like castes in India, but these people would not find themselves at home among European Gypsies. Turkish and Welsh Gypsies could easily converse with each other, whereas neither could converse with the Gypsy-like castes of India, unless in a most fragmentary way, through the medium of Hindustani, a language common to the greater part of India. De Goeje of Leyden, who was an eminent Arabic scholar, has shown, however, that a great migration of Jāts or Lūris took place from India to Persia in the 5th cent. A.D., and again in 710 from the same district to the valley of the Tigris. Thereafter, in the 9th cent., they were brought into the Greek Empire by the Byzantines. De Goeje has a very strong case in favour of these people being Gypsies. An argument used against him is that the Jāts still remaining in India do not speak the *Romani* language; but language is not an infallible test of race. Another objection is that there are indications of a Gypsy population in Europe at an earlier date than the 9th century. De Goeje's theory is, none the less, of much importance.²

But the other view has much to say for itself. It is certainly a pregnant fact that Europe is, at the present day, the seat of the Gypsy race and language. It is possible to draw very opposite conclusions from this fact, but in any case it cannot be ignored. Francis Hinde Groome³ has quoted a striking passage, not previously noted by modern scholars, from the *Itineraria* (Cambridge, 1778, p. 57) of Symon Simeon, an Irish Minorite friar, who visited Egypt in 1322. There he saw many 'Danubian' captives, whom he describes in terms which suggest that they belonged to the same stock as the modern Gypsies of the Danube:

'Item sciendum est, quod in saepedictis civitatibus (Alexandria and Cairo) de omni secta alia ab illorum viri mulieres lactantes juvenes et canes prave venditioni exponuntur ad instar bestiarum; et signantur indiani schismatici et danubiani, qui omnes utriusque sexus in colore cum corvis et carbonibus multum participant; quia hii cum arabis et danubianis semper guerram continent, atque cum captiunt redemptione vel venditione evadunt. . . . Praedicti autem Danubiani, quamvis ab indianis non sunt figura et colore distincti, tamen ab eis distinguuntur per cicatrices longas quas habent in facie et cognoscuntur; comburant enim sibi cum ferro ignito facies illas vilissimas terribiliter in longum, credentes se sic flamine (flammis) baptizari ut dicunt, et a peccatorum sordibus igne purgari. Qui postquam ad legem Machometi fuerint conversi christianis deteriores sunt Saracenis, sicut et sunt Radiani negrati, et plures molestias inferunt. . . . Item sciendum, quod in praefatis civitatibus tanta est eorum multitudo, quod nequaquam numerari possunt.'

Groome's comment is as follows: 'There is much in this

passage that remains obscure; but it seems clear from it that in 1822 there were in Egypt large numbers of captives, male and female, old and young, from the Danubian territories. They were black as crows and coal, and in complexion and features differed little from Indians, except that their faces bore long scars produced by burning (1 a kind of tattooing, like that of the Gypsy women in 1427 at Paris). On conversion to Mohammedanism these Danubians were worse to the Christians than the Saracens. Were these Danubians, or some at least of them, Gypsies, prisoners of war, from the Danubian territories? and did some of them buy back their freedom and return to Europe? If so, perhaps one has here an explanation of the hitherto unexplained names "Egyptian," "Gypsy," "Gitano," etc., and of the story told by the Western immigrants of 1417-84 of renegacy from the Christian faith.¹

The presumption that these Danubian captives were Gypsies is very reasonable. It has already been mentioned that modern Rumania possesses between 200,000 and 300,000 Gypsies, and that there is a large Gypsy population in the other Danubian territories. No one can point to a time when these regions were not inhabited by Gypsies, and there is therefore every probability that the captives of 1322 were members of that race. It ought to be added that Polydore Vergil, writing about 1499, asserts that the Gypsies were all tattooed—a practice which, in his opinion, gives them an Assyrian ancestry.¹

Gypsies speak of themselves as *Romi* or *Romant* (*Rom*, *Rdm*, or *Romano*, in the singular masculine), and sometimes as *Romané-tchéne* or *-tchéla*, and *-tchaia*, i.e. 'Romany lads and lasses.' Their language is known to them as *Romanes*, *Romani*, or *Romani-tchib* (*tchib* = 'tongue'). It has been more than once suggested that this name of *Rom*, or *Roum*, is derived from their long residence in the Byzantine Empire, formerly known as *Roum*.

3. Occupations.—At the present day, Gypsies follow various occupations, modified partly by the habits of the country in which they live. They have long been famous as musicians, and in S.E. Europe the hotels, restaurants, and other places of public resort are nightly visited by Gypsy bands. Everywhere their women are associated with the arts of divination, notably by means of palmistry. The men are equally celebrated as clever horse-dealers, and in Southern France and Northern Spain they are professional clippers or shearers of horses and dogs. Such names as *tinker*, *brazier*, *chaudronnier*, and *calderar* preserve the memory of a time when they were more generally than now famous as metal-workers. Indeed, the existing bronze-workers of Polish Galicia are all of Gypsy race.² The skill of Gypsies as craftsmen is further denoted by the Scottish name of *caird* (Gaelic *ceard* = 'artificer'); and by the Montenegrin *majstor* (cf. Germ. *Meister*), given to them because they are even yet the only artificers in Montenegro. Their occupations in Eastern Europe, as detailed by Emil Thewrewk de Ponor,³ are very varied. They are stated to be singers, dancers, tight-rope dancers, puppet-show men, mountebanks, clowns, tale-tellers, improvisatori (in Turkey and Moldavia), bear-leaders, monkey-leaders, smiths, farriers, metal-workers, gold-washers, fishermen, horse-dealers, pig-dealers, boot-makers, agriculturists, hangmen, knackers, fortune-tellers, sorcerers, quack-doctors, cheats, thieves, and beggars. The wives of the musicians are noted for their skill in making beautiful embroideries for Hungarian ladies of rank. Other Gypsies, in various countries, are workers in wood, manufacturing chairs, spoons, children's toys, and such-like articles. Those of Scotland were at one time famous as makers of horn spoons, whence their popular name of 'horners'; and in Scotland they are still known as 'muggers' on

account of their trade in pottery. Many of the occupations already noted are associated with them in the Middle Ages, when they appear prominently as travelling actors, showmen, mountebanks, jongleurs, hypnotists, quacks, false coiners, pilferers, robbers, and mercenary soldiers. As itinerant actors and showmen they were apparently very numerous. P. Lacroix, in referring to such people in the 16th cent., observes: 'Many of them were Bohemians or Zingari [i.e. Gypsies]. They travelled in companies, sometimes on foot, sometimes on horseback and sometimes with some sort of a conveyance containing the accessories of their craft and a travelling theatre.' Richard Augustine Hay, a Scottish priest of the 16th cent., tells how a company of Gypsies used to be the guests of the Earl of Roslin every year, occupying two towers in Roslin Castle (Midlothian, Scotland) during May and June, when they acted several plays. As these towers became known as 'Robin Hood' and 'Little John,' it may be assumed that they were named after the most popular plays.⁴

Perhaps the most important of all the occupations professed or followed by mediæval Gypsies is that which has yet to be named. They figured conspicuously in the character and attire of religious pilgrims, and were everywhere accepted as such—a fact which will receive fuller consideration below.

The performance of histrionic dances, for which Gypsies were noted, can hardly be separated from their displays as actors. In the Accounts of the Lord High Treasurer of Scotland there is an entry of the year 1530, which shows that the sum of forty shillings was then paid 'to the Egyptians that danced before the King [James V.] in Holyrood house.' There is no indication as to the nature of the dance on that occasion. But from Spanish and Provençal sources we learn that, in the mediæval miracle-plays relating to the life of Christ, Gypsy dances are of frequent occurrence. For example, the last act of Lope de Vega's *Nacimiento de Christo* ends 'with the appearance of the Three Kings preceded by dances of Gypsies and Negroes, and with the worship and offerings brought by all to the new-born Saviour.'⁵ One of the carols sung by Spanish children on the Day of the Holy Kings (Epiphany or Twelfth Day) opens with the verse:

'The Gypsy women, who are always
The joy of the town-gate,
Seeing the Kings arrive,
Wish to give them a dance.
Get ready the castanets, Gypsies;
The Three Kings have come in at the gate,
To see the young boy;
Chas, chas, chas.'

In a certain Provençal *noël* the Three Kings themselves are understood to be Gypsies, and they successively foretell the future of the infant Christ by the art of palmistry, in approved Gypsy fashion. They introduce themselves thus:

'We are three Bohemians
Who tell good fortune.
We are three Bohemians
Who rob wherever we may be;
Child, lovely and so sweet,
Place, place here, the cross,⁶
And each (of us) will tell thee
Everything that will happen to thee:
Begin, Janan, however,
Give him the hand to see.

³ *JGLS* (O.S.), vol. ii. p. 149.

Thou art, from what I see,
Equal to God.
And thou art his Son all wonderful:
Thou art, from what I see,
Equal to God.
Born for me in the nothingness:
Love has made thee a child
For all the human race:
A virgin is thy mother,
Thou art born without any father;
This I see in thy hand.
Love has made thee a child,' etc.

After completing their forecast of the Child's destiny, they proceed to examine the hands of the Virgin and Joseph, the latter of whom is thus addressed:

'And thou, good old man,
Who art at the corner of the manger,
And thou, good old man,
Wilt thou not that we see thy hand?
Say, thou fearest perhaps
That we should steal that ass
Which is tied up there?
We would rather steal the child:
Place (something) here upon, fair sir,
We have scarcely drunk (to-day).'

The Gypsy proclivities which emerge in this last stanza are still more unreservedly indicated in an Andalusian carol:

'In the gate of Bethlehem
The little Gypsies have entered,
And the new-born child
Have robbed of his swaddling clothes.
Rascally Gypsies,
Faces of olives,
They have not left the child
One little rag!'

'How the Blessed Virgin with her Child Jesus and Saint Joseph fled into Egypt, and how they found food and lodging,' is the title of an Italian tract of mediæval origin, wherein a Gypsy woman encounters the Holy Family during their flight, and offers them hospitality.

'I have here a little stable,
Good for the young she-ass;
I will now place therein straw and hay:
Behold a shelter for ye all!'

After bidding Saint Joseph to be seated, she goes on to foretell the future of the Virgin and Child,—'for we dear Gypsies can all divine the future.'

These references¹ are not the only ones which associate Gypsies with Jesus of Nazareth. One very persistent tradition is that the nails used at the Crucifixion were made by Gypsies, and that the race became accursed in consequence. On the other hand, the Gypsies of Alsace and Lithuania assert that this was not so, and that a woman of their people endeavoured to steal the nails from the Jews, in order to prevent the Crucifixion. She succeeded in stealing one, with the result that only three nails remained available, two of which were used for the hands, and the remaining nail was driven through the feet, which were crossed one above the other. Groome comments as follows upon this tradition:

'This Gypsy counter-legend offers a possible explanation of the hitherto unexplained transition from four nails to three in crucifixes during the twelfth and thirteenth centuries. Dr. R. Morris discusses the change in his Introduction to *Legends of the Holy Rood* (*Early Eng. Text Soc.*, 1871). There it appears that, while St. Gregory Nazianzen, Nonnus, and the author of the *Ancren Riwle* speak of three nails only, SS. Cyprian, Augustine, and Gregory of Tours, Pope Innocent III., Rufinus, Theodoret, and Ælfric speak of four; and that the earliest known crucifix with three nails only is a copper one, of probably Euxantine workmanship, dating from the end of the twelfth century. Now, if the Byzantine Gypsies possessed at that date a metallurgical monopoly, this crucifix must, of course, have been fashioned by Gypsy hands, when the three nails would be an easily intelligible protest against the calumny that those nails were forged by the founder of the Gypsy race.'²

4. History.—From these various references it will be seen that the Gypsy race has been interlinked, with what justice remains to be ascertained, with the earliest events of Christianity. Moreover, evidence is accumulating which tends to show that

¹ Extracted from the fuller accounts in *JGLS* (O.S.), vol. I. pp. 183-143, and vol. III. pp. 45-47.

² *Gypsy Folk-Tales*, p. xxx.

they were obtaining the benefits accorded to Christian pilgrims as early as the 8th cent., and that they are referred to in this character by Charlemagne, in an edict of the year 789.¹ They undoubtedly appear as pilgrims at a much later period.

We know, for example, that in the year 1417 the noble Transylvanian family of Horvath presented forty sheep 'to the poor pilgrims out of Egypt, in order that they, returning to Jerusalem, may pray for the salvation of our souls'; that in 1418 the Saxon Count of Hermannstadt, in Transylvania, granted 'to the people from the Holy Land food and fodder for their horses, worth eight denars'; that in the same year the municipality of Frankfort-on-the-Main gave bread and meat to 'the wandering people from Little Egypt'; and that in 1419, Andrew, a duke of Little Egypt, with a hundred and twenty followers, received money, wine, and bread from the town of Mâcon, in Burgundy. Further, a certain 'Lord Emaus from Egypt and his two hundred and twenty comrades' were voted a sum of money, corn, and poultry by the municipality of Kronstadt, Transylvania, in the year 1416. Then, again, in 1420, on St. Andrew's Eve, the town of Arnhem, in Guelderland, paid six guildens 'to the count of Little Egypt, with his company, to the honour of God'; and, at the same time, gave 'to the same count and to the Heathen women, to the honour of God, a half maldre [a corn measure] of white bread, a barrel of beer, and a hundred herrings.'

In all these cases, which are only a few selected out of many of the same kind, it is manifest that the pilgrims who received these various gifts belonged to the caste known as 'Egyptians' or Gypsies. That Gypsies actually professed to be pilgrims is seen from the statement made by Peucer in his *Commentarius* (1572), wherein he asserts that they wore the pilgrim dress.² Aven-tinus, who wrote in the early part of the 16th cent., complained indignantly that their pilgrim character gave them a liberty possessed by no other class. 'Robbing and stealing are prohibited to others, under pain of hanging or beheading, but these people have licence for them.' Aven-tinus was not using the language of exaggeration, for robbery and theft were among the many characteristics of the mediæval Gypsies. Nevertheless, they sustained at the same time the rôle of genuine pilgrims; and as such they were supported by the citizens and country-folk among whom they travelled.

In order to understand the situation properly, it must be realized that the Gypsies enjoyed Papal protection. This is seen from a letter granted in 1496 by Charles, Count of Egmond, under his privy seal, to a certain 'Count Martin Gnougy, born of Little Egypt,' in which it is stated that the Pope, Alexander VI., had ordained Count Martin and his family and company 'to go on pilgrimage to Rome, to St. James of Galicia, Compostella, and to other holy places.' To enable this count of Little Egypt and his followers to fulfil the Papal injunctions, Count Charles of Egmond strictly commanded all his representatives throughout his principality to succour and protect the Gypsies. The Count of Egmond and all orthodox people were bound by their religion to obey the wishes of the Pope in this respect. Obedience, moreover, brought them a spiritual reward. The citizens of Amiens were granted Papal indulgences and pardons because they gave alms to an earl of Little Egypt and his company of about forty persons who visited their town in September 1427. The same kind of reward is indicated also in an ordinance of the magistrates of Tournai in Hainault, who appealed to the devout members of the community to give alms to 'the great Earl of Little Egypt or his people,' who were expected to sojourn for four or five days in Tournai in the last week of March 1429.

At this period, if not at earlier dates, the leaders of these Gypsy bands were men of noble birth, who received their appointments from the Crown, or other supreme power, in the various European countries. They have borne many designations—

¹ For an exhaustive and scholarly study of this question, see an art. by Leo Wiener, in *JGLS* (N.S.), vol. III. no. 4, April 1910, pp. 253-276.

² The passage is quoted in *JGLS* (O.S.), vol. III. p. 7.

king, regent, governor, master, judge, duke, earl, count, baron, and captain. It is to be noted that these rulers were not of Gypsy blood, but belonged to the nobility and gentry of the country in which their particular section of the race was settled. The evidence obtained from Poland and Lithuania is clear and distinct.

¹ From the sixteenth century till the close of the eighteenth the Chancellor Royal nominated a *Regent of the Gypsies* from among the Polish gentry. These regents were the supreme judges for the Gypsies of the district; they gave laws to the Gypsies; they had the right of punishing the Gypsies, and of levying taxes on them.¹ 'With us,' says a Hungarian writer,² 'the Gypsy captaincy was vested in the nobility of Transylvania and Hungary. The captaincy of the Gypsies has long been with us an office of state, combined with which were *iura praerogativa fructus et emolumenta*, which the Crown bestowed on distinguished persons as a reward of merit, but not on Gypsies.'

In illustration of this statement are two commissions granted in 1557 by Queen Isabella of Hungary in favour of two of her courtiers, Lord Balatsi de Kiskend and Caspar Nagy, who were appointed *vayvodes*, or rulers, of the Cigáns of Transylvania.³ More than a century before this, in the year 1423, the Emperor Sigismund had issued a passport to 'our faithful Ladislaus,' *vayvode*, or baron, of the Cigáns, in which the Emperor commands all the Imperial officials to favour and protect the said Count Ladislaus and the Cigáns who are subject to him. 'And if any trouble or disturbance should arise among the Cigáns, then none of you whomsoever, but Count Ladislaus alone, shall have the power of judging and acquitting.'⁴ This, it will be seen, gives the Gypsy Count an authority second only to that of the Emperor himself. It would seem that this nobleman represented a family which had held the countship of the Cigáns for several generations. This appears from three documents of 1326, 1373, and 1377, the first of which relates to a Domenick Czigáni, there styled a nobleman or prince (*homo regius*). Those of 1373 and 1377 refer to 'the son of Domenick Czigáni' and to 'Ladislaus Czigáni,' presumably the same individual. The context renders it probable that these were ancestors of Count Ladislaus of 1423.⁵

Another Gypsy baron was Antonios Eparchos, who is described as a versatile genius, at once poet, Hellenist, and soldier, who corresponded with Melanchthon. In 1540, after the great siege of Corfu, the fief of the Gypsies of Corfu was conferred upon Eparchos as compensation for his losses and as the reward of his talents. Marmora, whose *Historia di Corfu* was published in 1672, describes the Gypsy barony as 'an office of not a little gain and of very great honour.' The jurisdiction of the baron extended over the continental dependencies of Corfu, as well as over the Gypsies of the island. Under Venetian rule, the title appears to have been *Giudice e Capitano delli Acingani*, 'Judge and Captain of the Gypsies.' At the close of the 14th cent. the *feudum Acinganorum*, or Gypsy barony, was possessed by Gianuli de Abitabulo, from whose family it afterwards passed to the house of Goth.⁶

From these references it will be seen that the counts and earls 'of Little Egypt,' whose occasional visits to one part of Europe or another are chronicled in various archives, were not men of Gypsy blood. They were members of the upper classes of Europe, who were appointed by their respective governments to these Gypsy baronies,

as a distinction and a reward. Their revenues were mainly derived from the authorized poll-tax that their subjects were bound to pay to them, although they had apparently other sources of profit. One thing clear is that, when they travelled from home, both the rulers and the ruled subsisted upon the gifts which they looked for—and not in vain—from the people among whom they sojourned. This was because they bore the character of pilgrims, to whom it was a pious duty to give alms.

The mediæval Gypsies constituted therefore a system, and not merely a race—an organization which had its ramifications all over Europe, and which held a position that all the secular and religious authorities recognized. To analyze the component parts of that organization, and to endeavour to solve the problem of its origin, is outside the scope of this article. A close investigation of the causes and effects of the Crusades (*q.v.*) forms the first step in such a study. No very great weight can be attached to the single assertion of a French Gypsy soldier in 1628, that his people came into France under the French kings at the time of the Crusades, notably under St. Louis (1252).¹ Indeed, that assertion conflicts with the belief already referred to, that Gypsies figured as Christian pilgrims as early as the reign of Charlemagne. But it is evident that the Gypsies of the 15th cent. availed themselves of the privileges of pilgrims and Crusaders, and particularly of those possessed by the Templars and Hospitalers. A concrete instance of this is seen in the case of 'Lord Emaus from Egypt and his two hundred and twenty comrades,' who were so hospitably received at Kronstadt, Transylvania, in 1416. Emaus, or Emmaus, is in Judæa, not in Egypt; and Emmaus was formerly a Commandery of the Hospitalers. The Lord Emmaus of the year 1186 was a certain Barthélemy, who, with his comrades, enjoyed precisely the same privileges as those accorded to the Lord Emmaus of 1416. That is to say, he and his company were entitled to travel about Europe, living on the countries through which they passed, all on the strength of their being pilgrims, or the defenders of pilgrims. As recently as 1528, the Grand Master appealed successfully to the Pope and the Emperor against the attempt made by the Duke of Savoy to exact money from the Grand Master and his company for their food and lodging when passing through Savoy. Thus, the position occupied by the people popularly called 'Egyptians' was identical with that of the Hospitalers. This identity can be seen in other respects, such as exemption from military duty to the country in which they lived, and freedom from its taxation. Perhaps the most notable link is the use of the sign of the Cross as a mark of union.²

Even if the Gypsies had been quiet and peaceable people, their assumed right to exact food and money from others would have rendered them a burden to the general population of Europe. But, as they travelled in large companies, their men being armed to the teeth, and as their demands were enforced by acts of violence, when necessary, the situation became increasingly intolerable to the middle and lower classes. Consequently, in all the countries of Europe, edicts were passed for the suppression or the expulsion of the 'Egyptians.' On the other hand, the leaders of those 'Egyptians' were men of noble birth, legally appointed by the State to their position of regent, baron, or count, and that position gave them a good income and many privileges. It was therefore to their advantage that the laws against 'Egyp-

tians' should be nullified as far as possible. The result of these opposing interests was that, for several centuries, the European countries oscillated between the enactment of laws framed for the purpose of ending the Gypsy system, and the very perpetuation of that system by the continued filling-up of vacancies in the Gypsy baronies.

France furnishes an excellent illustration of this conflicting state of things. In 1539 an edict was issued in the king's name forbidding any Gypsies to enter the country, and ordering those then within it to leave without delay. Nevertheless, it appears that in 1545 there were no fewer than 4000 Gypsy men in France, all capable of bearing arms. Further, in 1600, and again in 1600, the Gypsies received notice to quit France—with two months' grace in the former instance and one month's in the latter. In spite of all this, it was found necessary in 1682 to issue a royal declaration 'Contre les Bohémiens, leurs femmes et enfans, et ceux qui leur donnent retraite.' This last clause refers to certain of the French nobility and lords-justiciary, who are accused of giving shelter to the Gypsies in their castles and mansions, in defiance of Acts of Parliament expressly forbidding them to do so. They are now ordered once more to desist, under pain of losing their fiefs and offices, with threats of severer punishment if they continue to disobey.¹

Eventually, but only after the lapse of centuries, the Gypsy system was completely suppressed. In the course of the struggle, thousands of Gypsies were executed, banished, or imprisoned; and their surviving representatives are, with few exceptions, inoffensive members of the community in which they live. The problem of the Gypsy system and the Gypsy race still awaits a completely satisfactory solution; but a careful study of the system cannot fail to throw light upon the origin of the race.

It may be added that the country known as 'Little Egypt' was probably the Holy Land, in the first instance, and, in later times, the territories retained by the Crusaders in Greece and the islands of the Levant.

5. Religion.—The question of the religion of the Gypsies is somewhat involved. Their over-lords during the Middle Ages were undoubtedly Christian. The Genoese family of the Abitabuli, their successors of the house of Gothi, and, at a later date, Antonios Eparchos, the correspondent of Melancthon, all of whom were in turn Barons of the Gypsies of Corfu, could not have been anything else than Christian. The same can be said of the noble Hungarian family represented in 1423 by Count Ladislaus, who then held the office of *vayvode*, or baron, of the Cigáns. Similar examples are Lord Balatsi de Kiskend and Caspar Nagy, who belonged to the court of Queen Isabella of Hungary, by whom they were created *vayvodes* of the Cigáns of Transylvania in 1557. All of these were non-Gypsies upon whom the office of *vayvode* was conferred. No room for doubt exists in the case of two Swabian nobles of the Gypsies who died in the 15th century. The monument of one of them was placed in a little monastery beside Schloss Fürstenau, a castle of the Counts of Erbach, in the Odenwald. The epitaph was to this effect: '1445 years after the birth of Christ our Saviour, on St. Sebastian's evening, died the high-born lord, Lord Panuel, duke in Little Egypt, and Lord of Hirschhorn in the same country.' Lord Panuel's arms were emblazoned on his tomb—a golden eagle crowned with a stag-horn for crest, above a crowned helmet. The Swabian chronicle recounts further how, in the year 1498, at Pfortzen, 'there died the well-born Lord John, Free Count out of Little Egypt, to whose soul may God be gracious and merciful.' Both of these references² testify clearly to noble birth and Christian faith. The case of Count Martin Gnougy, 'born of Little Egypt,' who was commanded by Pope Alexander VI. to go on pilgrim-

age, about the year 1496, is perhaps not quite so definite. Nevertheless, it is inconceivable that a Pope would enjoin upon any but a Christian the duty of pilgrimage to various holy places in Europe. The religion of the Gypsy rulers, therefore, may be regarded as certainly Christian. That of the Gypsies themselves, in some instances, falls within the same category. Mention has been made of Symon Simeon, an Irish friar, who visited Candia in Crete in 1322, and who there saw 'a race outside the city, following the Greeks' rite,' whom he describes in terms that clearly indicate Gypsies. Consequently, it is evident that those Cretan Gypsies belonged to the Eastern or Greek Church. The same friar also refers to numerous Danubian captives in Alexandria and Cairo, apparently Gypsies, who had been converted to Muhammadanism by their captors. What was their previous religion? The Danube territories formed then a part of Christendom, and, if there is no evidence that those Danubian captives were previously Christians, there is, on the other hand, no evidence that they were not. The presumption is that they were Christians in name, if not in fact. The whole history of the Gypsies points to this conclusion. It was because they were accepted as Christian pilgrims that they received alms, to the honour of God, and free quarters in all the countries of Europe. They wore the pilgrim dress, and the cross was their chief symbol. When they had to retreat before superior numbers, they sought and obtained refuge in religious houses. No fewer than three hundred Gypsies found shelter in the Augustin Convent at Plainpalais, Geneva, in 1532, when they had to give way before the attacks of the populace and the town officials. Moreover, when twenty of their number were taken prisoner on that occasion, they were speedily pardoned and released, *propter Deum*. Martin del Rio tells of a similar incident in Spain, apparently in the town of Santiago, on Corpus Christi Day, 1584, when the Gypsies took refuge in 'the magnificent mansion and hospital of the knights of St. James, where the ministers of justice attempting to seize them were repulsed by force of arms; nevertheless, all of a sudden, and I know not how, everything was hushed up.' Neither the Augustin friars nor the Knights of St. James would have so championed the Gypsies had they been strange and unknown pagans. Nor would either of these fraternities have exerted themselves to protect a crowd of the ordinary citizens of Geneva or Santiago from the consequences of their turbulent behaviour towards the city officers.

There is no better testimony to the Christianity, nominal or real, of the Gypsies than that afforded at the Church of Les Saintes Maries de la Mer, in the Ile de la Camargue, Bouches-du-Rhône. In this church the festival of the Holy Marys is annually celebrated on 25th May. On that occasion, the crypt of the church is reserved exclusively for the Gypsies, because here is the shrine of Saint Sara of Egypt, whom they regard as their patron saint.

The Gypsies, to the number of several hundreds, begin to arrive as early as the 22nd of May, and throughout the night of 24th-25th May they keep watch over the shrine of Saint Sara. On the 25th they take their departure. This custom, which is in full force at the present day, has continued for at least four or five centuries; for M. Ribon, curé at Les Saintes Maries, states (1907) that the votive offerings of the Gypsies, still preserved in the crypt, date back to about the year 1460. Since that date, therefore, the Gypsies have worshipped in the crypt as Christians.

Many other statements might be adduced which show the Gypsies, past and present, in the light of orthodox Christians, punctilious in observing the rites and ceremonies associated with Christianity.

On the other hand, evidence of another kind is not difficult to obtain. The crypt of Les Saintes

¹ For these references, see *JGLS* (O.S.), vol. iii., 1891-92, p. 228, and *ib.* (N.S.), vol. v., 1911-12, pp. 813-316.

² For which see the *Annales Suevici* of M. Crusius, Frankfurt, 1506, li. 284, 510.

Maries itself suggests an opposite view. It is stated that the shrine of Saint Sara rests upon an ancient altar dedicated to Mithra; that the Gypsies of that neighbourhood, who are known as 'Caragues,' are descended from the Iberians formerly inhabiting the Camargue; and that their cult is really the Mithraic worship of fire and water upon which the veneration of Saint Sara is superimposed.¹ Even this fact, however, if it be a fact, does not wholly differentiate them from the worshippers in the church above, because a critical analysis of modern Christian ritual, in some of its phases, at any rate, reveals affinity with, or derivation from, the ritual of earlier faiths. De l'Hoste Ranking points out² that what Wislocki describes as a Hungarian Gypsy ceremony 'is simply the ordinary ceremony of the Orthodox Greek Church.' This statement, however, leaves the origin of that ceremony still unsettled. The same writer mentions that Christmas, Easter, and Holy Week are high seasons among the Transylvanian Gypsies. This does not necessarily show that the Gypsies are Christians, for these had been sacred seasons long before the Christian era.

In his monograph on the 'Forms and Ceremonies' practised by Gypsies,³ E. O. Winstedt has brought together a mass of curious information on this subject. Here, again, there is the same difficulty of ascertaining what is and what is not a distinctively Gypsy custom. For example, 'The Gypsies of Roussillon hold a feast in honour of the dead on All Saints' eve; but the ceremony—burning tapers—seems to be borrowed from their Christian neighbours.'

With regard to a certain ceremony of the Hungarian Gypsies, Winstedt further observes:

'Exactly how much of this is purely Gypsy ritual, and how much is due to borrowings from the superstitions of the intermixture of Slav, Hungarian, Greek, Latin, Germanic, and Turkish races in that quarter of the world, it would be difficult to say.'

Even the practice of constituting marriage by the simple act of jumping over a broomstick, which appears to have been at one time a usage among Gypsies, is not solely an attribute of these people, for there are survivals of such a custom among the peasantry of Austria, Germany, and the Netherlands.⁴ Ranking indicates another parallel instance when he writes:

'The great festival among the Transylvanian Gypsies is St. George's Day. "Green George," as he is called. The chief figure of the feast is a lad who from head to foot is covered with green leaves, twigs, and flowers, and hence is called "Green George," obviously our "Jack in the Green."'⁵

This is the spring festival observed among the Gypsies of Rumania, Servia, and Bulgaria, as described by Kopernicki.⁶ But the point is that, as Ranking justly remarks, it is also the same as the May Day festival observed, until quite recently, in England and Ireland, in which the leaf-clad 'Jack in the Green' is the principal figure.⁷ The Gypsies, therefore, have no special claim to this custom, which is or was common to the whole of Europe. It is the ancient celebration of the yearly re-birth of vegetation in spring-time, as observed in the Roman *Floralia* and the kindred rites of the Druids. The 'holly-boy' and 'ivy-girl,' which used to figure prominently in the Shrovetide festivities of English villagers, notably in Kent, represent similar ancient rites.⁸ Groome's statement,⁹ that 'there is, or was lately, actual idolatry

—tree-worship—among German Gypsies,' might be held to indicate an absolutely pagan cult. The fir, the birch, and the mulberry-tree are specified as the respective symbols of the Old Prussian, the New Prussian, and the Hanoverian Gypsies.¹ Once more, however, it has to be noted that tree-worship was formerly practised in all the countries of Europe, traces of it being still discernible among the peasantry down to our own times.² Indeed, not only among the peasantry and in past times; as witness the solemnity of decorating churches with holly and mistletoe in the Christmas season, which is the ancient Yule.

Considerations such as these seem almost to point to the conclusion that the chief difference in religious matters between ordinary Europeans and the Gypsies of Europe is that the latter have conserved in a greater measure than the former the pagan practices once common to all Europeans.

In a communication made to the *Orientalische Gesellschaft* (Berlin) in 1888, Solf represents the 19th cent. Gypsies of Germany as combining a religious code of their own with Christian profession and practice.

'A "captain" presides over each tribe. He is elected for seven years. His powers are both regal and sacerdotal. He marries, divorces, excommunicates, and reconciles those who have forfeited honours and privileges. Nearly all the marriages are celebrated on Whit Sunday. Great care is taken at present to avoid marriages between the degrees prohibited by the German law, although they are otherwise allowable by Gypsy custom and tradition. Adultery is exceedingly rare, and is punished with severity. The children are baptized, and handsome presents are always expected from the god-parents. If a child is born while they are lodging near a village, they usually take him to the parish church for baptism. They wear no mourning at a death. Solf describes the Gypsy as "full of piety."'

The term *Heiden*, or 'Heathen,' so often applied to Gypsies in Western Europe during past centuries, would seem to denote that they were not regarded as Christians. When, in 1429, the town of Arnheim, in Guelderland, gave six guildens 'to the count of Little Egypt, with his company, to the honour of God,' and, on the same day, a quantity of food and drink 'to the same count and to the Heathen women, to the honour of God,' a difference in religion between the count and the Heathen women appears to be implied. Nevertheless, the name *Heiden*, or 'Heathen,' was used, on at least two occasions, as a racial or caste designation solely, when the people so designated were Christians by religion. One of these instances occurs in Justinger's *Berner Chronik*. Bataillard, who cites the passage,⁴ points out that Justinger was recorder of the town of Bern, and that his chronicle runs from 1411 to 1421. In 1419 he makes the following entry:

'Regarding the baptized Heathen. In this year there came to Basel, Zurich, Bern, and Solothurn more than two hundred baptized heathen [*Heiden*]; they were from Egypt, pitiful, black, miserable, with women and children; and they camped before the town [Bern] in the fields, until a prohibition was issued, because they had become intolerable to the inhabitants on account of their thefts, for they stole all they could. They had dukes and earls among them, who wore good silver belts [*silbrin Gürteln*], and who rode on horseback; the others were poor and wretched. They wandered from one country to another; and they had a safe-conduct from the King of the Romans.'

Here, it will be seen, the term 'Heathen' is applied to people who were admittedly Christian by religion. The other similar instance is that afforded by the *Staats-Archiv* of Basel, in which it is recorded that on 13th June 1423 a payment of one gulden was made 'to two heathens [*zweim heyden*] who had become Christians.' There is practically no doubt that in all these instances—at Bern in 1419, at Basel in 1423, and at Arnheim

in 1429—the people denominated ‘heathen’ were Gypsies. Those referred to in 1419 and 1423 are distinctly stated to have professed the Christian faith. Notwithstanding this, they continued to be styled ‘Heathens,’ as a racial name. It is extremely probable, therefore, that the term was so understood when used at Arnhem in 1429, and that those ‘Heathen women’ professed Christianity. Indeed, it is very unlikely that the magistrates of Arnhem would have bestowed substantial benefits upon avowed pagans.

There is obviously much room for speculation as to the religion of the rank and file among the ‘Egyptians,’ or ‘Heathens.’ If they were not actually members of the Christian Church, they, at any rate, passed themselves off as Christian pilgrims, sustaining that character not only by their dress, but also by their observance of Chris-

tian rites, as in the Church of Les Saintes Maries. To what extent they also followed heathen practices cannot be ascertained.

LITERATURE.—A *Gypsy Bibliography*, by George F. Black, issued by the Gypsy Lore Society in 1908 (new ed. 1914), mentions almost every work upon this subject published up to date. It is found in the leading libraries of Europe and America. Those to whom that work is not accessible may be referred, for historical information, to the following: H. M. G. Grellmann, *Die Zigeuner*, Dessau and Leipzig, 1783 [Raper's Eng. tr., *Dissertation on the Gipsies*, London, 1787]; C. Hopf, *Die Einwanderung der Zigeuner in Europa*, Gotha, 1870; P. Bataillard, *Sur les Origines des Bohémiens ou Tsiganes*, Paris, 1876. For ethnography, languages, and history, see A. F. Pott, *Die Zigeuner in Europa und Asien*, Halle, 1844–45; F. Miklosich, *Ueber die Mundarten und die Wanderungen der Zigeuner Europa's*, Vienna, 1872–80. F. H. Groome's *Introd.* to his *Gypsy Folk-Tales*, London, 1899, contains a comprehensive survey of the whole question. The *Journal of the Gypsy Lore Society* (New Series), issued at 21A Alfred Street, Liverpool, continues to furnish the most recent results obtained by modern scholars.

DAVID MACRITCHIE.

H

HABIT.—In its most general acceptance, habit denotes a persistent readiness in certain phenomena to recur, which has been acquired by repeated recurrence. Here readiness is to be understood as including not merely ease or facility, but also a tendency or impulse. Habitual readiness is thus distinguished, on the one hand, from a readiness that is transient; on the other hand, from a persistent readiness that is inborn. The former is merely the general tendency of all living things to act under any stimulus. The latter is what is known distinctively as *instinct* (*q.v.*). The distinction between habit and instinct, however, is no longer thought to be so absolute as was in former times generally supposed. Empiricism, indeed, has long endeavoured to break down the distinction. The older empiricists, of whom J. S. Mill may be taken as the last representative, generally held that most, if not all, instincts are habits formed by each individual, but at a period so early in life as to have left in memory no traces of their formation. But this older form of the empirical theory has completely given way before the ideas of evolutionism. At the present day, while many, if not all, instincts are in their ultimate analysis reduced to habits, they are still admitted to be inborn in the individual, and the process of their evolution is extended over an indefinite period in the life of preceding generations. Empiricism includes in its theory not only instinctive impulses to action, but also the insuperable necessities of thought. The necessity of thinking that $2+2=4$, or that two straight lines cannot enclose a space, is regarded merely as a habit which has become so firmly fixed that it can no longer be resisted. A much more questionable use of the term *habit* is one which extends it to facts in the inorganic world. For instance, W. James speaks of ‘the habits of an elementary particle of matter,’ and describes ‘the laws of Nature as immutable habits which the different sorts of elementary matter follow’ (*Principles of Psychology*, vol. i. p. 104; cf. Radestock's *Habit and its Importance in Education*, p. 32). These theories carry us into the general problems of philosophy, and it is the ethical significance of habit with which we have specially to do. For our purposes there is no gain, but rather a loss of scientific perspicuity, in extending the idea of habit as is done by the theories in question. For, even if the unalterable necessities of thought and the unalterable properties of matter can be with

any propriety described as habits, yet, in so far as they are unalterable within the range of all scientific experience, they lack the essential character of habits; they cannot even be identified with instincts, for these are by no means incapable of modification. The very essence of a habit is that it is an effect of alterations going on in living things; it is an aspect of organic growth. Consequently, as Aristotle pointed out long ago, habit cannot be engendered in inorganic things. ‘For instance, the stone, which by nature moves downwards, cannot acquire the habit of moving upwards, not even if one tried to give it the habit by throwing it up ten thousand times; nor could fire form a habit of moving downwards; nor could anything else with a nature of one sort be made to take on another from habit’ (*Eth. Nic.* ii. 1. 2). Analogies, indeed, are sometimes drawn from acquired facilities in the inorganic world. Folded paper returns readily to its folds. A lock or an engine works more easily after being used for a while. The fittest analogy of all is probably to be found in the improvement of a violin that has been played by a master. In all these cases the acquired facility is associated not with elementary particles, but with complex combinations of matter; the material of the violin is even an organic compound. But the analogy of such facilities with habit is superficial at the best. It has no connexion with any process of organic growth.

As an organic process, however, habit is found in the vegetable world. Thus the modifications which may be developed in a plant by artificial culture or by natural adaptation to a new environment are of the nature of a real habit. More nearly akin to the habits of human life are the numerous aptitudes which animals can be trained to form. In man also the most spiritual habits have their basis in his organic life. The nutrition of the organs called into play must be affected by the uniformity of their action during the formation of a habit. Layers of nutritive material will run into peculiar positions determined by the habitual movement of the organs they supply, and thus the growing organs will receive a peculiar structure, adapted to the actions repeatedly performed. The fact is that often after prolonged effort we continue to feel the beat of the blood in the arteries and the throb of nervous and muscular movement which the effort called forth, long after the effort itself has ceased. This effect is experienced not only in the sensations of active effort, but also in

the so-called passive sensations. A din thrills in the ears of many persons after a long railway journey, and after-images are a familiar phenomenon in vision. It thus appears that, though the elementary properties of inorganic, and perhaps also of organic, matter are unalterable, there is in organic beings a natural adaptability to the alterations of organic structure involved in the formation of a habit.

This is the physiological interpretation of the fact that habitual actions are done with a certain unconsciousness; that is to say, though we may remain conscious of the series of habitual actions as a whole, we fail to note consciously the separate actions in the series. When we begin to form a habit, the actions required are in general performed slowly, deliberately, and with an amount of effort that is often even painful. Gradually with repetition the slow and deliberate effort disappears, and the actions are performed with an easy rapidity that carries them beyond the ken of consciousness. For, to attain distinct consciousness, one mental activity must endure for a certain length of time before being supplanted by another. Consequently, if one activity is in experience uniformly followed by another, it comes after a while to suggest that other so instantaneously that it fails to be noticed in consciousness, and the activity suggested alone appears. This process can be traced all through intellectual life, and is specially familiar in the perception of the external world. The fact perceived is always suggested by some sensation, and in general so instantaneously that the sensation escapes attention, and the fact perceived appears like an object of immediate intuition. The same result is of great service in practical life also. For feelings that might, if indulged, obstruct or even paralyze active exertion may come to be habitually associated with some such exertion. They will then serve merely to suggest and stimulate the activity with which they have been habitually associated without obtruding themselves into consciousness at all, or at least in a manner to disturb or distract. Surgeons or nurses, who would be helpless if they indulged their natural sympathy at the sight of a painful wound, may train their sympathetic feelings to prompt at once the measures necessary for relief and cure. On the other hand, the indulgence of mere feeling, however amiable it may be, tends to create that habitual excess of sensibility which is commonly described as *sentimentality* or *sentimentalism*. This almost inevitably entails an enfeeblement of character; and therefore an important phase of moral training consists in checking the tendency to excessive indulgence of idle sentiment, and forcing the sentiment into habitual association with some form of practical effort (James, *Principles of Psychology*, vol. i. p. 125 f.).

Often the activities which come to be thus habitually associated form a long series; and, when by frequent repetition they succeed one another with great rapidity, they become no longer distinguishable, but are fused into an indiscriminating consciousness of them all taken together. Thus vibrations of the atmosphere, on reaching a certain velocity, are no longer heard distinctly, but form a single tone; and many striking optical effects are produced by the fusion of visual sensations rapidly succeeding one another. In the same way actions, originally done with conscious effort, may by habitual training cease to be individually distinguishable, leaving in consciousness merely a trace of their general effect. They then appear as if they were performed by the organs called into play without affecting the highest centres of conscious life.

An interesting illustration of this phenomenon is given by Max Müller in his *Autobiography* (p. 218 f.). The printer in

Oxford who set up the Rigveda in Sanskrit knew nothing even of the alphabet of that language. But, though it contains some 300 characters, he sometimes detected mistakes which Müller himself had overlooked. He explained this by saying that his arm soon formed certain habits of movement in accordance with the common combinations of letters, and felt something unusual in wrong combinations, just as it might feel the combination *As* to be wrong in English.

Even the higher nerve-centres in the brain exhibit the same result at times. Complicated mental operations come to be so habitual that they too fall below the verge of consciousness. From the physiological point of view this sort of activity is described as *unconscious cerebration* (see Carpenter's *Mental Physiology*, ch. xiii.).

In its psychological aspect, habit is connected with the mental process of suggestion or association. A habit is an acquired readiness in the suggestion of phenomena that have been frequently associated. Now, among other facts connected with this process it is a familiar law that phenomena are more readily suggested in proportion to their original intensity and to the frequency with which they have been repeated. These two conditions of ready suggestibility are the influences mainly called into play in the formation of habits. Sometimes a new habit seems to spring into full development all at once, under the impulse of a peculiarly intense impression. A violent shock in conscious experience may suddenly produce such organic changes as in ordinary circumstances are the result of very gradual modifications. This effect may be met with in all spheres of mental life, but it is peculiarly striking in the great moral and religious change commonly known as *conversion*. It may be that, however sudden this change may appear at times, its suddenness is more apparent than real. Possibly it has been prepared by subconscious processes that have been going on for some time before and only burst suddenly over the threshold of consciousness (E. D. Starbuck, *The Psychology of Religion*, London, 1899, pp. 105-113; W. James, *Varieties of Religious Experience*, New York, 1902, p. 236 f.). In any case the fact that changes of similar violence are seen in other regions of mind shows that sudden conversions are not out of harmony with the laws of mental life (Starbuck, *op. cit.* ch. xi.). But, however valuable a sudden and violent shock may be as an initial impulse to the formation of a new habit, its value apart from this is apt to be dangerously overestimated. An intense excitement finds its worth mainly in the fact that its intensity makes it readily suggestible. It haunts us so that we cannot escape from it, and thus it determines the current of our life; that is to say, it gives life a new habit. But without this continued recurrence of an intense impression its original intensity would not prevent it from being gradually, in some cases even rapidly, effaced. It is a familiar rule, therefore, of all life that habitual attainments must be kept in continued practice, else they are apt to be supplanted by a return of the untrained awkwardness with which they began. Even instincts, as will presently appear, die away if they are not kept in life by practice; and any peculiar variety of plants tends to lose the distinctive habits developed by culture, and to revert to its wild type if it is left uncultivated. This fact bears with eminent significance on the training of the moral and religious life. The young convert in the glow of his fresh enthusiasm is apt to imagine that the habits of the new life are already acquired. He does not realize that he has only been *born* anew, and that there is a long process of growth before him still, ere he can reach the stature of spiritual manhood. It is not therefore surprising that statistics seem to point to a startling proportion of relapses after

spiritual changes produced by the violent excitements of revivalism, when compared with the proportion among cases where conversion has been due to the ordinary unexciting religious culture of home and church and Sunday school (Starbuck, *op. cit.* p. 170). For moral and religious habits must be trained by the same organic process by which all life is evolved; and it is an interesting fact that the Great Teacher draws His favourite parables and metaphors for illustrating the development of the kingdom of God from the processes of organic growth in Nature. It is the organized structure developed by a process of growth that distinguishes habitual goodness from a goodness that is due to any transitory impulse. 'One swallow does not make spring,' as Aristotle puts it in illustrating the necessity of trained habit to genuine virtue (*Eth. Nic.* i. 7. 15); and Hosea (6⁴) had long before denounced the futility of a goodness that is transient as a morning cloud or early dew. On the other side also of the moral life:

'The sin that practice burns into the blood,
And not the one dark hour which brings remorse,
Shall brand us after, of whose fold we be'
(Tennyson, *Merlin and Vivien*).

While habit is thus not to be confounded with any fleeting impulse, it is also, as we have seen, distinguished from those impulses that are inborn. But we have seen, further, that this distinction is not so sharp as was at one time supposed. Possibly instinct may itself be but a habit earlier formed, and thus embedded in the primitive structure of living things. But, whatever its origin, we now see that the processes which constitute life can, by a prolonged uniformity of action, produce a new organic structure giving a habitual readiness of the same kind as the instinctive. For this reason habit is commonly spoken of, in a phrase which has long been proverbial, as a second nature. It is, moreover, a familiar experience in common life, confirmed by scientific observation, that the second nature, thus created by a man's own habitual action, may overbear the instincts of his original nature. For instincts are by no means beyond reach of the changes going on in life. On the contrary, not only do they require the stimulus of a proper environment to be called into activity in the first instance, but, even if roused in this way, they may afterwards be completely supplanted by counteractive habits. Numerous illustrations of this will be found in Spalding's celebrated article on 'Instinct' in *Macmillan's Magazine* for February 1873, and in the chapters (xi. to xvi. inclusive) on 'Instinct' in G. J. Romanes' *Mental Evolution in Animals*, London, 1883; see also C. Lloyd Morgan's *Animal Life and Intelligence*, do. 1890-91, ch. xi. on 'Habit and Instinct.' It thus appears as if the value of an instinct, like that of any intense impression, were to be found in the original start which it gives to the process of forming a habit.

But, if the mere animal can thus modify its native instincts in adaptation to the changing exigencies of life, it would be preposterous to deny to man a similar adaptability. The truth is that man's superiority to the mere animal is to be found mainly in his superior adaptability. This is not indeed to be interpreted as meaning, what is too commonly assumed, that Nature guides the lower animals by the instincts with which she endows them, while she leaves man to the direction of his own intelligence. Both statements are wide of the truth. For, on the one hand, many of those modifications of instinct which have been referred to above are intelligent adaptations by an animal to a new situation. On the other hand, it is a mistake to suppose that man is distinguished from the lower animals by the comparative poverty of his instincts. So far from this being the case, his

superiority is to be found in a richer endowment of natural impulses (James, *Principles of Psychology*, vol. ii. pp. 393, 441) as well as in a power of more varied and more intelligent adaptability to unforeseen contingencies. But the instincts of man, like those of the lower animals, become persistent influences only by being kept in habitual practice. In fact, many of the instincts with which man is endowed are opposed to one another, and it is environment and training that determine which of the opposing instincts is to become the habitual influence (James, *op. cit.* vol. ii. p. 392). Science thus points to the conclusion which common observation had long ago reached, that every man is what he is more by trained faculty than by native endowment, that he is 'a creature of habit,' 'a slave of custom,' or, as Paley puts it in a phrase which has become almost proverbial, 'a bundle of habits' (*Moral and Political Philosophy*, bk. i. ch. vii.).

The development of habits may be said to be the aim of all education. The capacity for forming habits constitutes educability. This capacity, as we have seen, has two aspects. Physiologically it means the power of forming new organic structures; psychologically it is the power of associating activities so that they will readily suggest one another in the order in which they have been associated. Both these powers constitute a natural endowment in which men differ greatly from one another. Some men are of weak formative power, hardly able to fix new organic changes, to make new associations cohere by any amount of repetition. They remain characterless beings to the end. In every sphere of life they represent the feeble types. 'Mr. Pliable' never takes on any persistent habit. The original endowment of men, however, varies not only in its general nature, but also in its special directions. Each individual can usually form a certain kind of habit with ease, while he may be practically incapable of forming others. This gives to every one his peculiar bent, his *indoles*.

It thus appears that there is a limit to the plasticity of human nature, a limit to the changes that may be produced in a man's original nature by the second nature of habit. On the theory of evolution, indeed, this limit is not absolutely immovable; even the distinctive organic structure of new species has been evolved by a modifying process similar to that by which habits are formed, through a process so slow that it must have extended over incalculable æons of cosmic history. But there are two facts which must be recognized. On the one hand, all experimentation by man proves that there is a limit to the variations which he can produce in himself or in animal and vegetable organisms. On the other hand, however, instances of appalling moral degradation and instances of amazing moral triumph make us hesitate about any sweeping assertions against variability in the moral life. Here at least the ratio of the old and the new is no fixed quantity. Apparently it varies in different individuals, and probably in the same individual at different periods of growth. Consequently it is difficult to define the relative influence of inherited nature and acquired faculty in human life, and the attempt to define it leads to conflicting theories. Not only do scientific thinkers vary in their views on the subject at the present day, but the variation runs through the great historical controversies between Augustinianism and Pelagianism, Jansenism and Molinism, Calvinism and Arminianism.

But educability implies the power not only of forming, but also of reforming, habits. Often the most formidable task of the educator is, not to counteract the original tendencies of nature, but

rather to break off habits that have become inveterate. The second or habitual nature, as we have seen, sometimes overrides the primitive nature of men; and then it becomes for the educator a more intractable factor than congenital instinct. It seems at times to impose a limit on the plasticity of human nature as rigid as any that are fixed by original constitution. This is the ground of the familiar educational rule, to begin all training on a right method from the first, in order to avoid the formation of habits which must be unlearned before further progress can be made. The obstruction of old habits is also one of the causes which make the acquisition of new habits increasingly difficult with advancing years. For, as the years go on, every man is gradually forming an aggregate of habits which constitutes his distinctive character. That character becomes every day more intricately woven into the innermost tissue of physical and psychical life, and the drift of this process points to the conclusion that the character thus formed may become at last practically unalterable. Whether the moral doom of men does actually in the end become fixed immutably for evil as well as for good is a problem which would carry discussion beyond the limits of our theme. But in the phenomena of habit there is revealed a moral government of life, which is characterized by the most rigorous justice. The growth of habit furnishes an unfailing reward for every virtuous act, and brings to every vicious act an unfailing penalty. In a familiar but singularly appropriate figure, every act we perform is likened to seed sown in a fit soil, destined to produce a fruit of its own kind. Whatsoever, therefore, a man soweth, that precisely, but that certainly, shall he reap in the habits that he creates. Thus virtue is literally its own reward, vice its own punishment.

LITERATURE.—The best studies on habit are those in the great works on Psychology. Most of these treat the special kinds of habit separately, though the separate treatments can usually be found in an index. Fortunately, however, one of the greatest recent works on the science, W. James's *Principles of Psychology* (Lond. 1907), devotes a whole chapter (the fourth) to the general nature of Habit. The chapter on Habit (the eighth) in W. B. Carpenter's *Mental Physiology* 2 (Lond. 1875) also deserves mention as being still of value. On the educational aspects of the subject there is a little monograph by Paul Radestock, *Die Gewöhnung und ihre Wichtigkeit für die Erziehung* (Eng. tr. *Habit and its Importance in Education*, Boston, 1889). For younger children and their teachers there is another monograph by Walter L. Sheldon, *Lessons in the Study of Habits* (Chicago, 1903). The historical development of the subject is admirably traced in the tenth chapter of *A History of the Problems of Philosophy*, by Paul Janet and Gabriel Séailles (Eng. tr., London, 1902).

HAIDA.—1. **Geographical and ethnological.**—The *Haida*, or, as they term themselves, *Xáida* (i.e. 'people'), are an American Indian people whose territory includes the Queen Charlotte Islands and the southern end of Prince of Wales Island, Alaska. Between 150 and 200 years ago the so-called *Kaigani* left the N.W. end of the Queen Charlotte Islands, and, landing on Prince of Wales Island, drove out the Tlingit from the southern end, of which they took possession. The *Haida* are not now a numerous people; of the main body, according to Swanton, in 1907 there remained some 600, and of the Alaskan branch about 300, making less than 1000 in all. In 1836-41 their

numbers were estimated at more than 8000; and in 1888 at 2500, which must have been quite an exaggeration, in the light of the figures reported since then. Linguistically, the *Haida* form an independent family, termed, in Powell's classification (7 *RBEW* [1891], 118 f.), *Skittagetan*, from the town-name *Skidegate*, a corruption by the Whites of a name of a chief of the north shore, *Sgēdagtts*. Authorities like Boas and Swanton, however, consider possible an ultimate relationship of *Haida* with Tlingit (phonetic and lexical coincidences, grammatical peculiarities), and more remotely with Athapaskan; but this is still doubtful, although certain elements of social organization also point in the direction of closer affinity between *Haida* and Tlingit (Koluschan). Physically, the *Haida* belong to that group of Indians of the North Pacific Coast which includes also the Tlingit and the Tsimshian, as has been shown by the anthropometric researches of Boas and other investigators.

2. **Contact with Whites.**—Swanton considers it not impossible that the Queen Charlotte Islands may have been visited by Spaniards during the 17th cent. (*HAI* i. [1907] 521), but 'the first certain account of their discovery is that by Ensign Juan Perez, in the corvette *Santiago*, in 1774.' Bodega and Maurelle came the next year; in 1786, La Perouse, and, in 1787, Capt. Dixon, who 'spent more than a month around them, and the islands are named from his vessel, the *Queen Charlotte*.' From that time onwards, 'scores of vessels from England and New England resorted to the coast, principally to trade for furs, in which business the earlier voyagers reaped golden harvests.' The result of this intercourse is thus indicated by Swanton (p. 521):

'The advent of whites was, as usual, disastrous to the natives. They were soon stripped of their valuable furs, and, through smallpox and general immorality, they have been reduced in the last 60 years to one-tenth of their former strength. A station of the Hudson's Bay Company was long established at Masset, but is now no longer remunerative. At Skidegate there are works for the extraction of dog-fish oil, which furnish employment to the people during much of the year; but in summer all the Indians from this place and Masset go to the mainland to work in salmon canneries.' These canneries also furnish the *Kaigani* with work in summer.

Most of the *Haida* are Christians, at least nominally; mission-stations exist at Skidegate (Methodist), Masset (Anglican), and Howkan (Presbyterian). Of the general attitude of the *Haida*, Swanton says (*loc. cit.*):

'The *Haida*, Tlingit, and Tsimshian seem to show greater adaptability to civilization and to display less religious conservatism than many of the tribes farther south. They are generally regarded as superior to them by the white settlers, and they certainly showed themselves such in war and in the arts.'

In the 'Story of the shaman, Gándox's-father,' recorded by Swanton ('*Haida Texts*,' in *Bull.* 29 *BE*, 1905, pp. 311-315), some items of White influence are referred to, and it seems that the 'new religion' of Bini, the Carrier Indian (Athapaskan), reached the *Haida* of Skedans.

3. **Tribal and social organization.**—The *Haida* belong to those American Indian peoples who had a set social system, with caste divisions. The whole *Haida* people, according to Swanton (*HAI* i. 522), 'is divided into two "sides" or clans—Raven (*Hoya*) and Eagle (*Got*)—each of which is subdivided and resubdivided into numerous smaller local groups.' Each clan is reputed to be 'descended from one woman.' Besides the principal and more important towns of the *Haida*, 'there was formerly an immense number of small towns hardly distinguishable from camps, places that had been occupied as towns at some former time, and mythic or semi-mythic towns' (*ib.* 523). Society consisted of chiefs and nobles, and common people and slaves; and the lines were strictly drawn between the various classes. The slaves (see below) per-

formed menial labour, and the difference between the common people and the nobility was accentuated in divers ways. For example, 'if people of low family passed close in front of chiefs' houses in their canoes, they might be injured or enslaved.' High-born children did not cry like those of slaves or of common people; chiefs' children sat high in their fathers' canoes; to lean backwards in sitting was an evidence of low caste, good form demanding that 'one must sit on the forward part of the seat in an alert attitude'; common people were often referred to as 'mosquitoes'—their bad words 'bit' the rich (Swanton, 'Haida Songs,' 12, 24, 25). There were many 'low-class' words, which the upper classes disdained to use. The use of labrets was a mark of high birth among the Haida. The people of the other clan took charge of a man's funeral; when an Eagle died, the Raven people attended to the ceremonies, and *vice versa*.

4. **Slavery.**—The Haida are among those tribes of the North Pacific Coast with whom the institution of slavery attained considerable proportions; here a slave-class existed, the members of which were either war-captives or individuals purchased or obtained in other ways as slaves from neighbouring tribes. The strong caste-system probably made it difficult for male slaves as a rule to rise to positions of importance, although Swanton states that the greatest Skidegate chief was a slave in his youth (cf. *Bull.* 29 BE, p. 306 f.). With female slaves the case was somewhat different, for these, 'especially if they were known to be of noble descent, sometimes married their captors and became free.' Swanton says further (*HAI* i. 205):

'Four prominent Haida clans and one clan among the Tsimshian are said to have originated from marriages of this kind, while another prominent Haida clan was called "the Slaves," though it is impossible to say whether they were descended from slaves or whether the term is applied ironically.'

Slaves appear to have been often harshly used, and in the songs and myths there are many references to their low estate and menial duties. In a cradle song given by Swanton ('Haida Songs,' p. 11), it is stated of the child that he may not kill dog-salmon or halibut, or chop cedar-bark; for such things are the work of slaves. In another song a mother styles herself, in jest, the 'slave' of her child (p. 41), and in yet another (p. 16) a mother is represented as having to take care of the baby herself, because her family have no slaves. One slave was often set above all the rest. By the supernatural beings of Haida mythology, men and women were regarded as 'human slaves,' 'human servants,' etc. At death, the bodies of slaves were usually thrown into the sea. According to Swanton (*Bull.* 29 BE, p. 433), 'payment of *kada*, remuneration for having enslaved a person, was accompanied by dancing; payment of *wal*, remuneration for having killed or wounded a person, was not.' A special being, 'Supernatural-slave,' appeared to those about to be enslaved.

5. **Secret societies.**—According to Swanton, the Haida have had secret societies 'only during the last 100 or 150 years.' These are of the spirit-initiation type. 'The entire performance consisted in the supposed possession of the novice by some one of a number of spirits, who carried the youth away and made him act the way the spirit himself was supposed to act. Some of these ways of acting were introduced, while others were in accordance with native conceptions. They were largely the property of certain chiefs, who would allow only their own families to use them' (Swanton, *HAI* ii. 497).

6. **Peace and war.**—A considerable proportion of the Haida stories relate to war with their neighbours, the Tlingit, and others. Each war-party was accompanied by its own shaman. Tantalizing songs were sung in the language of the

people attacked. A figure for 'being killed in war' was 'being eaten by the Raven.' Those killed in battle were thought to go to the house of Taxét in the sky. Battle-songs were sung by women in the absence of their husbands at war, and there were songs used by all families in making peace. It was believed that unfaithfulness on the part of a wife while her husband was away hunting or at war would cause him ill-luck or even death. This incident appears frequently in tales and legends. A supernatural being named Tia 'presided over slaughter, and made his presence known at a time when it was about to take place' (Swanton, *Bull.* 29 BE, p. 374). 'When peace was made, one man from each side was generally taken up and borne around upon the shoulders of his opponents. He was called the "deer"' (*ib.* p. 390).

7. **Totemism and heraldry.**—As noted above, the Haida people are divided into two clans, 'Raven' and 'Eagle,' of both of which there are many minor groups and subdivisions. Each clan has presumably a female progenitor (Djilaqons, the reputed ancestress of the Eagle clan, figures in a number of legends, and is connected with a famous scandal). Marriage between members of the same clan was forbidden. The fact that men and women are of different clans seems to have influenced the Haida idea of the next or spiritual world. Most of the supernatural beings, however, seem to be assigned to the Raven people. Children followed the mother, and were bound to her by closer ties than were husbands to wives. The Haida have been described briefly as having 'animal totemism,' with 'exogamic totem-groups' and a 'maternal organization.' The germ of what is known in Europe as heraldry may be said to have developed among the Haida. Mooney (*HAI* i. 544) says:

'Among the Haida and some other tribes of the N.W. coast, according to Swanton and other authorities, is found the germ of a similar system. Here, in many cases, the clan totem, or perhaps the personal manito of the individual, has evolved into a crest which persons of the highest rank, i.e. of greatest wealth, are privileged to figure by carving or painting upon their totem poles, houses, or other belongings, tattooing upon their bodies, or painting upon their bodies in the dance, on payment of a sufficient number of "potlatch" gifts, to secure recognition as chiefs or leading members of the tribe. The privilege is not hereditary, the successor of the owner, usually his sister's son, being obliged to make the same ceremonial payment to secure the continuance of the privilege.'

Swanton, in his article on 'Totem-poles' (*HAI* ii. [1910] 794 f.), states that,

'According to native Haida accounts, carved designs were originally made directly on the front slabs of the house, afterwards on a broad, thick plank, and finally on poles,' remarking, further, that 'this comparatively modern evolution is corroborated by the Tlingit, who have only the grave post, upon which they carve representations of stories as well as crests.'

The totem-poles of the Haida are chiefly of three kinds, 'outside and inside poles, and memorial columns.' Grave-posts consisted of carved posts with carved grave-box on top. The totem-posts were erected during potlatches.

'The carvings on grave posts and grave boxes were almost always crests owned by the family of the deceased, while those on house poles might be crests, or they might illustrate stories, and occasionally a figure of the house-owner himself was added, or the figure of some one whom he wished to ridicule.'

8. **Games.**—Among the plays and games of the Haida Indians, Swanton and Culin enumerate: archery, dice-games, the 'hand-game,' hoop and pole, jackstraws, quoits, ring and pin, shinny, stick games, tops, and some other miscellaneous games. The dice-game of *gutgi qaátugañ* 'was usually played at camp in the smoke-house, and the winner had the privilege of smearing the loser's face with soot' (Swanton, 'Ethnol. of Haida,' p. 59). The game appears to be played indiscriminately by men and women. In the 'hand-game,' G. A. Dorsey (Culin, 'Games,' in 24 *RBEW*, p. 318) reports the use of a false bone

so constructed that it can be made to show up either white or black. Of the hoop and pole game, several varieties exist among the Haida. It is usually played with a disk or ring of hemlock twigs and a long stick. Under this head Culin also classifies the game of *gao skū' dji*, or 'a woman's pubic bones,' described by Swanton ('Ethnol. of Haida,' p. 60) as follows:

'This was a boys' game. Late in the spring, when a tall, slim plant called *Lil*, the pith of which was eaten, was at its best, the boys would collect a great quantity of the stalks. Then two would each drive a couple of sticks into the ground about 5 yards apart. After that each would take about 20 sticks of the salmon-berry bush, and, using them as spears, alternately try to drive one of them between the adversary's posts, or stick it into the ground beyond, so that it would rest on their tops. Each boy would then bid a certain number of *Lil* stalks, and after they had used up all of their spears, he who scored the most hits won all that had been put up by his adversary. If he were one point ahead, he got nothing more; but if he were two points ahead, he won as much again; if he were three points ahead, twice as much, and so on.

Concerning the game of *teltgadaldana*, or 'knocking something over by shooting,' which was played by older people (sometimes a whole town turned out, and the resulting contests extended over a long period of time), Swanton informs us that, 'for some religious reason, they ceased playing with arrows as soon as winter began.' Of the 'stick-game,' Swanton, who describes it in some detail in his account of Haida games, says ('Ethnol. of Haida,' p. 58):

'The great gambling game of the Haida was the same as that used on neighbouring parts of the mainland. It was played with a set of cylindrical sticks, 4 or 5 inches long. The number of the sticks varied in the sets that I have seen, one having as many as 70. Some of the sets were made of bone, but the most of yew or some similar kind of wood. These were finely polished, and in many cases elaborately carved or painted, but usually were simply divided into sets of from two to four by various lines drawn around them in black and red. One of the sticks was left blank, or nearly so, and was called *dji*, bait. The *dji* was the piece hidden and guessed. The gambling-sticks had separate names, most of them bearing those of animals.' 'The more elaborate ones are ornamented with representations of the animal figures whose names they bear.' A set of 48 sticks, collected by C. F. Newcombe and now in the University of Pennsylvania Museum (Culin, *op. cit.* p. 259), consisted of the following: shadow, 3; red fish, 3; black bass, 3; mirror (of slate, wetted), 3; sea anemone, 3; dance head-dress, 3; puffin, 3; black bear, 3; devil fish, 3; guillemot, 3; large housefly, 1; halibut, 3; humpback salmon, 3; dog salmon, 3; centipede, 1; chiefs who kiss (i.e. rub noses), 1; supernatural beings of high rank (*dji*), 4.

A monotonous chanting accompanies the game, here as elsewhere. Of the ethics of gambling among the Haida, Swanton observes, 'it is not so true to say that cheating was fair in Haida gambling as to say that it was part of the game.'

In a 'ring and pin' game, described by Swanton ('Ethnol. of Haida,' p. 60), when the V-shaped piece fell to the ground instead of being caught on the stick, after being thrown into the air, 'the one who threw must yield to the next player; but, before doing so, he was at liberty to pull his opponent's hair violently or punch his knuckles as many times as he had made a catch.' Concerning the game of jackstraws, which, he thinks, 'would seem a natural and logical development from the game of stick-counting,' Culin (p. 729) says: 'The only intimations the writer has had of it in America are among the Eskimo and the Haida.'

9. Songs.—The Haida have many brief songs of various sorts, both in connexion with feasts and other public ceremonies and for other purposes. Magic songs and 'power songs,' used by shamans and others for the purposes of acquiring or increasing ability or influence, and incantations of divers kinds for luck in fishing or success in hunting, war, etc., are common. There are also war-songs, love-songs, songs for calming and for raising storms, 'dancing-hat' songs, satiric and taunting songs, songs belonging to the animals and other creatures in stories, house-songs, canoe-songs, songs of joy and mourning, women's songs, cradle-songs, and peace-songs. A large number of all

sorts are recorded in the various works of Swanton (in 'Haida Songs,' texts and translations of 88 cradle, 11 mourning, and 6 miscellaneous songs from the several Haida dialects are given). Totem-pole raising and 'potlatches' were accompanied by much dancing and singing. The joyful songs, called *Lên*, were commonly sung indoors. The *djiā' djať qagán*, or 'women's songs,' were used 'when totem poles and house timbers were towed in during a potlatch' (*Bull.* 29 B.E., p. 147).

10. Feasts and festivals.—Like other tribes of the North Pacific coast, the Haida had a number of important feasts and festivals, some of which were of foreign origin. The institution of the 'potlatch,' a great feast in which the giver disposed of large amounts of property (commonly blankets) in presents to all invited, being afterwards 'potlatched' in return, was so esteemed that in one of the cradle-songs, cited by Swanton ('Haida Songs,' p. 8), a child is told that he is a boy and not a girl, in order that he may give great potlatches—for that was he born. Swanton says (*HAI* ii. 293):

'During the festival in which the gifts were made, houses and carved poles were raised, chiefs' children were initiated into the secret societies, their ears, noses, and lips were pierced for ornaments, and sales of copper plates, which figured prominently in the social and economic life of the people of this region, took place. Among the Haida, children were then tattooed. All was accompanied with dancing, singing, and feasting.'

People save money for years in order to hold a great potlatch, and, distributing their wealth in this manner, become really 'rich' and attain high rank as chiefs, etc. It is said, as Swanton reports ('Haida Songs,' p. 21): 'Once when there was a great famine in Skidegate Inlet, the chief of Drum Town had enough property to hold a potlatch and save every one from starvation.' In a cradle-song the future potlatches of a child are likened to the deluge in the time of the Raven. In another, families are warned to be ready for invitations to the potlatch when the child is to be tattooed, etc. At potlatches and feasts the chiefs were placed 'in accordance with their wealth, the richer sitting nearer the inside house-pole, in the back part of the house.'

Among the peoples of the North Pacific Coast the salmon-ceremonials were of great importance.

11. Shamans, medicine-men, etc.—The shamans of the Haida deserve special mention from a religious point of view. According to Swanton (*HAI* ii. 522):

'Among the Haida and Tlingit, shamans performed practically all religious functions, including, as usual, that of physician, and occasionally a shaman united the civil with the religious power by being a town or house chief also.'

Shamans obtained their positions hereditarily, or by natural fitness. The former was more common, the shaman getting his position from his uncle, and 'inheriting his spiritual helpers, just as he might his material wealth.' He had a guardian spirit in either case, and 'the first intimation of his new power was given by the man falling senseless and remaining in that condition for a certain period.' This was the sign of the presence of a secret-society spirit or a guardian spirit.

12. Witchcraft.—Among the Haida, as with other peoples of the North Pacific Coast, belief in the power to influence or control the thought and actions of others by supernatural means, occult practices, and the like, prevailed. According to Swanton (*HAI* ii. 966):

'Among the Haida witchcraft was supposed to be due to mice which had got inside of a person's body, and if these could be expelled he might be restored to his right mind. There were said to be as many as ten of these mice sometimes, one of which (the last to leave) was a white one.' A means of detecting witchcraft employed by the Haida shamans was 'to repeat the names of all persons in the village in the presence of a live mouse, and determine the guilty party by watching its motions.'

One of the Haida families of the Eagle clan was called 'witch-people.'

13. Calendar.—Of the Haida month-names two refer to mammals, three to birds, two to fish, three to plants and fruits, and two to the weather. Swanton, in his account of the Haida calendar (*Amer. Anthropol.*, 1903), says that they formerly intercalated between the two portions into which they divided the year what they called a 'between moon,' which may sometimes have been omitted to correct the calendar. The two periods of the year, 'summer' (April–September) and 'winter' (October–March), consisted of six months each.

14. Art.—The art of the Haida is, in some respects, the most interesting and remarkable north of the region of Mexican and Central American influence. Indeed, as W. H. Holmes observes, 'The carvings of the Haida, Tlingit, Kwakiutl, and other tribes, in wood, bone, ivory, and slate are remarkable for their artistic qualities and perfection of execution, displaying more than a mere suggestion of the masterly qualities of the prehistoric work of the tribes of Mexico and Central America.' He says further: 'A carving in black slate by a member of the Haida tribe, representing the "bear mother," is not surpassed in spirit and expression by any known work north of Mexico. However, like the totem-pole models, masks, rattles, dishes, boxes, and tobacco pipes which excite our admiration, it was executed with steel tools and at a time when the influence of the art of the white man had no doubt come to be somewhat decidedly felt' (*HA I* ii. 492).

As materials whereupon to exercise their artistic sense the Haida had particularly the fine-grained black slate of the Queen Charlotte Islands, soft when first quarried, but growing harder with time, and taking a good polish; also the cedar-wood of this region, which enabled the tribes of the North Pacific Coast to attain a perfection not elsewhere reached among the aborigines north of Mexico. Haida carving and sculpture express themselves in special relations with religion, mythology, and history. Of wood-work we have the curiously carved and painted totem-poles (models of these for White consumption are now made in slate as well as in wood), and boxes for containing bones of the dead (grave-boxes), grave-posts, human figures and those of animals; the carved and painted house-fronts, posts, etc.; furniture (boxes and chests for storing household goods, property, etc.); implements, utensils, weapons, ceremonial objects (batons, etc.); masks, etc.

H. Balfour (*Man*, vii. [1907] 1 f.) describes a mask, carved from a solid block of wood some 40 years ago by a Haida Indian intended as a portrait of his wife, and said to be 'a good likeness.'

The Haida houses were substantially built of planks, and on the fronts were 'elaborately carved and painted symbolical figures,' while 'directly in front a totem pole is placed, and near by a memorial pole is erected.' Haida canoes are another example of the carver's art and that of the decorator. Of objects in slate the Haida made pipes, carvings of human beings, animals, and mythological figures. In horn, bone, and ivory, cups, ladles, spoons, and other utensils, implements, and ornaments were made, often in the form of or adorned with representations of human beings, animals, mythological beings, in whole or in part.

Of three Haida carved spoons described by Ridgeway (*Man*, vi. [1906] 145), one has the *motif* of a woman clasping a frog or a toad to her breast and kissing it; another a woman and a bear; a third a woman and a butterfly clasping each other. A fine old pipe has a woman and a raven in such a union.

The Haida were also skilful in metal work: copper was used for ornaments and utensils (knives, rattles, daggers, the 'coppers' used as symbols of wealth); of silver (introduced by the Whites) they made bracelets, etc., with symbolical figures engraved upon them. Other rather artistic developments appear in the chiefs' 'robes' of frayed bark, and in the ceremonial head-dresses. Noteworthy also is the Haida basketry hat. Rock-painting does not occur in the Haida country; according to

Newcombe, of two rock-carvings noted one is probably Tlingit.

15. Painting and tatuing.—Besides the use made of painting on masks, totem-poles, and other wooden objects and ornaments, house-fronts, canoes, etc., the Haida practised painting and tatuing of face and body. A. C. Fletcher says:

'Along the Pacific coast both men and women were tattooed on the face and body, a custom that recently reached its most ornate development among the Haida of Queen Charlotte Islands. The designs were of conventionalized "totemic" figures, and seem to have indicated personal or tribal distinction rather than any religious cult' (*HA I* ii. 700). Red and blue colours were employed.

16. Life and soul lore.—The souls of animals, according to the Haida, 'have the human form, and act very much as men do on earth.' According to Swanton (*Bull. 29 BE*, p. 189), 'every animal and every human being is supposed to be provided with a "thread of life"—an idea not found elsewhere in America, so far as I am aware.' The word applied to this 'thread of life' is *lis*—the term used also for thread made of mountain-sheep wool.

In one of the tales a woman lets out the 'thread of life' of her husband, who goes hunting, knowing by its action when he is coming back; in another tale a man is told to wear a new hat, when he leaves on a fishing expedition, and, when a storm occurs, 'she stretched her arm to the thread of life of him only who wore the new hat, and she saved him, because his wife left something for her.'

Restoration to life is a common thing in Haida tales, but Swanton (*Bull. 29 BE*, p. 349) met with but a single instance of restoration to youth, i.e. where Slaughter-lover 'spit medicine upon the old people they had killed, and they also became young.' Fire was the means of communication between this world and the world of spirits, the messenger being 'Old-woman-under-the-fire.' Water is also occasionally mentioned as serving for such purposes (*ib.* p. 14). Food for the slain in the land of souls was transmitted through fire. Concerning 'Woman-under-the-fire,' Swanton remarks (*ib.* p. 209):

'Woman-under-the-fire repeated to the supernatural beings everything that was said near it. But, if charcoal were instantly rubbed upon the lips of a person who had said anything they did not want the supernatural beings to hear, Woman-under-the-fire knew that it was not intended.'

The souls of those dying in battle or by violence went to Taxét's house in the sky. Concerning the souls of gamblers, we read in the tale of Sounding-gambling-sticks (*ib.* p. 57):

'He was also said to live in a place within sight of the Land of Souls, and, when a gambler died, he came over to gamble with him, staking dog salmon against souls. If he were successful, there would be many deaths; if the gambler won, there would be a great run of dog salmon.'

The re-incarnation of salmon in human beings (particularly twins) is a common belief among several peoples of the North Pacific coast, with whom the Salmon Festivals are of special significance.

17. Re-incarnation.—The belief in re-incarnation of the dead filled a very important rôle among the Haida, with whom the child was thought to be the returning father, mother, or other dead relative. The myths, legends, and songs treat often of this topic. In the cradle-songs the babies are reminded of what they used to do when formerly on earth; old tatu-marks and other evidences of their identity with those passed away are pointed out; their childish actions are rebuked as being unbecoming, since, e.g., they are re-born chiefs, and 'too great to cry,' etc. In a cradle-song given by Swanton ('Haida Songs,' p. 5) a child is sung to as follows:

'You need not think that the smoke of your house in the middle of Skedans will be as great as when you were a woman [in your previous life upon earth].'

You need not think that they will make such a continual noise of singing in Skedans Creek as they used to when you were a woman [in your previous existence].'

In another cradle-song we read (p. 38):

'Why does he cry as a noble cries (i.e. softly)?'

'Why does he move around as he sits?'

He moves around and cries for grandfather's house.'

Many of the favourite stories of the Haida tell of the re-incarnation of the Raven or Shining-Heavens, their highest deity—particularly the myth 'How Shining-Heavens caused himself to be born.'

18. Influence of sea-environment on mythology and religion.—The influence of their island home and its sea-environment upon the mythological and religious ideas of the Haida has been very great, although not a few of the mythical figures, *motifs*, and incidents may have been borrowed rather recently from the Tsimshian, the Tlingit, and others. Water-monsters and supernatural beings of the sea of various sorts figure largely in folk-thought, myth, and legend. The most prominent group of those supernatural beings are the Killer-whales. The killer-whale (*Orca sp.*) appears in many stories of the type of 'The Man who married a Killer-whale Woman,' cited by Swanton (*Bull.* 29 BE, p. 286 f.). The killer-whale is prominent in Haida art, being often represented conventionally by his fin instead of by his whole body. In tales borrowed from Tsimshian and elsewhere, the rôle of the killer-whale is disproportionately emphasized, as, e.g., in the story of Gunanasimgit (*ib.* 336-340).

19. Supernatural beings.—The Haida world teems with supernatural beings of land and sea, mountain and forest, river and lake, cliff and cave, air and sky. Communication between them and human beings is generally by way of fire, personified as 'Old-woman-under-the-fire' (see above), the messenger of the supernaturals. These supernatural beings 'are unable to bear the odour of urine, the blood of a menstruating woman, or anything associated with these' (*ib.* 148). They are believed to land their canoes bow first, and to do the opposite of the human in various other things. Supernatural beings 'hunt during the night, and get home before ravens begin calling; if they are detained in any way so that they hear the raven, they at once fall dead' (*ib.* 188). When a supernatural being was born, he grew up quickly, and soon cried for a bow, but would only be satisfied with one of copper. Supernatural beings made fire by rubbing hard white stones together. Those who have become animals can be recognized, when being skinned and cut open, by the ring of copper about their necks. Simply looking at them is said to be enough often to make supernatural beings laugh (*ib.* 268). Supernatural beings 'do not want anything dirty, like human beings, upon them.' Thus, a man often feels a reef shake under him for this cause (*ib.* 287).

Among the most noted supernatural beings, or figures with names of such, are the following: Killer-whale, Supernatural-woman-in-whom-is-thunder, the Wäsgo, Cave-supernatural-being, Supernatural-fisherman (god of fishing), Master-Carpenter or Master-canoe-builder (a favourite deity of the canoe-building Haida), Mouse-woman, Supernatural-sparrow, Dagu-sgana (being who tries the strength of heroes), Sacred-one-standing-and-moving, Supernatural-being-who-went-naked, The-one-in-the-sea (the greatest supernatural being in the ocean), Master-hopper (a one-legged supernatural being, or a being with one leg shorter than the other), Supernatural-being-at-whose-voice-the-ravens-sit-on-the-sea, Raven, Djláqons, and Shining-Heavens.

The terms 'Master,' 'Greatest of,' 'Mother of,' 'Owner of' are often applied to supernatural or semi-supernatural creatures: e.g. 'Mother-of-halibut,' 'Greatest-of-gulls,' 'Owner-of-dog-salmon.' These supernatural beings seem often to have the power of assuming the form of a thing and yet to be distinct from it. Thus, e.g., 'Cliff-woman,' or 'Reef-woman,' may be a cliff or a reef, and also live under it.

20. Deities, demi-gods, and heroes.—From the mass of characters in Haida mythology and folklore the following may be singled out as especially noteworthy: Shining-Heavens, Raven, Laguna, Djláqons. Of these Laguna is a Tlingit spirit;

Djláqons is the ancestress of the Eagle clan; the other two are the chief deities, or demi-gods, of the Haida. Sñi, or 'Shining-Heavens,' is 'the highest deity anciently recognized by them.' The myth of his incarnation, 'How Shining-Heavens caused himself to be born,' is one of the greatest of stories told by the Haida (Swanton, *Bull.* 29 BE, pp. 28-31).

One of the first incidents in this tale might be compared with the finding of Moses by the Egyptian princess; a Haida woman, digging on the beach, uncovers a cockle-shell, from which comes the cry of a baby. She looks into it and discovers a little child, which she takes home. The wonder-child soon grows up; it is Shining-Heavens, who shows his supernatural character in the approved way. In one myth the Raven finds a cockle-shell full of children thrown about by the waves. By some this birth in a cockle-shell is interpreted to mean birth from a cockle. The birth of the wonder-child, the re-incarnation of some famous personage, or the incarnation of some supernatural being, is the typical hero-story of the Haida.

Besides the tale of Shining-Heavens, we have the story of 'He-who-got-supernatural-power-from-his-little-finger,' 'He-who-was-born-from-his-mother's-side,' and others. Abandoned or put-away children often figure in hero-tale, such, e.g., as 'The-one-abandoned-for-eating-the-flipper-of-a-hair-seal.' That the existence of a Raven clan among the Haida, Tlingit, and Tsimshian has had something to do with the importance of Raven stories in their mythology is pointed out by Swanton (*Bull.* 29 BE, p. 146, and 'Ethnol. of Haida,' p. 104), who gives (*Bull.* 29 BE, pp. 110-149) the tale of 'Raven Traveling,' which is sometimes spoken of as the 'creation legend of the Haida'; but, as Swanton remarks, it rather 'explains how things were altered from one state or condition into that in which we now find them' (p. 146). Raven, indeed, is transformer rather than creator, although he is represented as having originated not a few things, and is the principal figure at the 'creation,' for 'topographic features, natural phenomena, the tastes, passions, habits, and customs of animals and human beings are mainly explained by referring to something that Raven did in ancient times.' His story-name is Nañkilsas, or 'He-whose-voice-is-obeyed.' He has a buffalo-side, like some other American Indian gods and demi-gods, but some Haida also express the opinion that 'Nañkilsas was a great chief who put on the skin of a raven [the usual magic device] only when he wanted to act like a buffalo.' The travelling companion of Raven is Eagle or (among the Masset Haida) Butterfly. Other interesting deities are Taxét (whose name is confused with that of a small bluish salmon), to whose house in the sky go all murdered or killed in battle; and Tia, the Killer, 'the deity who presides over death by violence.' Tia, who is headless with blood streaming from his neck, is seen or is heard by those about to be killed (*ib.* 172). A curious feature of Haida mythology, as Swanton notes, is the fact that all the 'river-spirits' seem to be women, only a single instance to the contrary having been met with. Among these water-creatures, who appear frequently in the tales and legends, are the following: Creek-woman (in various localities); Supernatural-woman-who-plays-up-and-down-with-her-own-property (i.e. with the fish); Flood-tide-woman; and the Tidal-woman. One of the winds, North-east, was named after Fair-weather-woman, who figures in several stories. Other female characters in Haida mythology and folk-lore are: the Half-rock (stone from hips down) -woman, or Woman-rooted-to-the-ground; Old-woman-under-the-fire (messenger from men to the supernatural beings); Porpoise-woman; Ice-woman; Property-woman; Mouse-woman; Panther-woman (this character has a Tsimshian name); Woman-sitting-and-smelling. But the most famous female figure in Haida lore is Djláqons. Djláqons is the ancestress, or at least the special patroness, of all those of the Eagle clan; and she figures in a

scandal with Swimming-russet-backed-thrush, another supernatural being.

21. **Animals in legends.**—In the legends of the Haida a large proportion of the birds, beasts, and fishes of their environment figure more or less prominently: whale, porpoise, seal, sea-lion, salmon, cod, halibut, devil-fish, eulachon, sculpin, herring; gull, duck, water-fowl (scoter, grebe, etc.), eagle, raven, crow, cormorant, wood-pecker, owl, wren, hawk, puffin, loon, dipper (water-ousel), goose, robin, thrush, blue hawk, blue jay, snowbird, creeper, tanager, grouse, black-bird, sparrow; beaver, porcupine, marten (older brother of black bear), land-otter, dog, black bear, grizzly bear (a bugaboo for children), mouse, mink, heron, ground-hog, weasel, frog, etc. Some of the mainland animals, such as the wolf, also appear. The animals in the story have names different from their common everyday ones. Thus marten is commonly *Kuz.u.*; but in stories he is called *Kuz.uginadgits*. The Thunder-bird and the Sleep-bird are peculiar characters. Of the land-animals the land-otter has a rôle *sui generis*. According to Swanton ('Ethnol. of Haida,' p. 26 f., *Bull.* 29 BE, p. 225),

'A man who just saved himself from drowning was supposed to be deprived of his senses by land-otters and become transformed into a creature called *gagiz.it*. This being had land-otter fur all over its body, and upturned nose, and a face covered with fish spines. It travelled all over the Haida country with the utmost ease.'

If a land-otter looked at any one while drinking water, that person 'was seized with fits, soon died, and went to live among the Land-otter people' (*Bull.* 29 BE, p. 270). The idea that loss of the senses or craziness is caused by the land-otter is common to several of the Indian peoples of the North Pacific Coast. Concerning the land-otter we learn also (*ib.*) that 'if a land-otter forgot to take along the mat used to cover the knees of a canoe-man while paddling, he was sure to be killed by human beings.'

LITERATURE.—The most authoritative recent literature concerning the Haida consists of the various monographs of Swanton, the earlier Reports of Boas, etc. The following may be cited here: Franz Boas, 'Decorative Art of the Indians of the North Pacific Coast' (*Bull. Amer. Mus. Nat. Hist.*, N.Y., vol. ix. no. 10 [1897]); 'Facial Paintings of the Indians of Northern British Columbia' (*Mem. Amer. Mus. Nat. Hist.*, i. [1898] 1-24); 'Reports on N.W. Tribes of Canada' (*Rep. Brit. Assoc. Adv. Sci.*, 1899-1898), *Indian. Sagen von der nord-pazifischen Küste Amerikas*, Berlin, 1895; Stewart Culin, 'Games of the North American Indians,' in 24 *RBEW*, 1907; G. M. Dawson, 'Report on the Queen Charlotte Islands' (*Rep. Geol. Survey of Canada for 1878-1879*), Montreal, 1880; James Deans, 'Tales from the Totems of the Hider' (*Arch. Intern. Folk-Lore Assoc.*, ii.), Chicago, 1889; C. F. Newcombe, 'The Haida Indians' (*Congr. Intern. des Amer.*, xviième sess., Quebec, 1906 [1907] i. 135-149); J. G. Swan, 'The Haidah Indians of Queen Charlotte's Islands, British Columbia' (*Smithsonian Contrib. to Knowl.*, vol. xxi., Washington, 1874); John R. Swanton, 'Contributions to the Ethnology of the Haida' (*Mem. Amer. Mus. Nat. Hist.*, N.Y., *Anthrop.* v. [1905] 1-300), 'Haida Texts (Masset Dialect)' (*ib.* x. [1908] 271-312), 'Haida Texts and Myths (Skidegate Dialect)' (*Bull.* 29 BE [1905]), 'Haida Songs' (*Publ. Amer. Ethnol. Soc.*, iii. [1912] 1-63), 'Haida' (*HAI* i. [1907] 520-523); on the language, see John R. Swanton, 'Haida' (*Handb. of Amer. Ind. Lang.*, *Bull.* 40 BE, i. [1911] 205-232), C. Harrison, *Haida Grammar*, ed. A. F. Chamberlain, Ottawa, 1895. Mention may also be made of *OT Stories in the Haida Lang.*, London, 1893, and of the partial tr. of the *Pr. Bk.* by J. H. Keen, ed. 1899, and of the tr. of three *Gospels* and of *Acts*, by C. Harrison and J. H. Keen, 1891-97.

ALEXANDER F. CHAMBERLAIN.

HAIL.—See PRODIGES AND PORTENTS.

HAIR AND NAILS.—In custom, ritual, and superstition, the same ideas underlie the majority of beliefs and ceremonies relating to human hair and nails; and the whole class of observances may be conveniently treated in a single article. Sometimes, indeed, customs may be due to the close connexion of the hair with the head; and analogies in the case of the nails will naturally be wanting. For example, certain practices relating to the

hair of the head appear to have originated from the wide-spread belief that the head (*q.v.*) itself is particularly sacred (see Frazer, *GB*, pt. ii. 'Taboo,' p. 252 f.). Some races think that a spirit lives in the head, and it is important not to disturb this spirit more than is necessary, or, as among the Greeks, the hair is itself regarded as the seat of life (*Gruppe, Gr. Myth. und Religionsgesch.*, Munich, 1906, pp. 187, 728)—a belief which is also found, in a modified form, among the Omaha (Fletcher and La Flesche, 27 *RBEW* [1911], p. 124). Hence the Burmese shrink from frequent washing of the head; and, when the hair of their kings was cut, the operation was attended with much solemnity. Possibly, therefore, some superstitions concerning hair-washing or hair-cutting arise from a special fear of offending or injuring the spirit of the head. Samson's strength was lost as soon as the hair of his head was cut off (*Jg* 16^{17ff.}). But, in the main, these superstitions are the outcome of a primitive belief which affects the nails as much as the hair. The savage thinks that any portion of his body, though severed, still retains some sort of connexion with himself. Thus, injury to the hair or nails is liable to cause danger to the person to whom the clippings belonged. The principle of 'sympathetic magic' is well-known in folklore; and, if a man can work magic on an enemy by obtaining a portion of his clothing, it is even more readily comprehensible that he can do mischief by means of a part of his enemy's actual body. The simplest precaution against this danger is obviously to avoid hair-cutting altogether. This course is sometimes taken to protect those whose lives are specially valuable, as in the case of the Frankish kings (*GI*³, pt. ii. p. 258), but more often the cutting of hair or nails is avoided only on certain occasions or at certain periods, when it would be more dangerous than usual. Young children are frequently thought to be peculiarly exposed to magic; hence we often find that neither nails nor hair may be cut in infancy or during the early years of childhood. This superstition is (or was till recently) common in England; e.g., a baby's nails must not be cut until it is a year old, otherwise it will be 'light-fingered,' or ill-luck will result (see *County Folklore*, i. [1892] 12 [Suffolk], v. [1908] 230 [Lincolnshire], etc.). Usually the danger is avoided by biting the nails (one of the superstitions which indicate a fear of iron). This practice is widespread in Europe (see *Denham Tracts*, ii. [1895] 24; *County Folklore*, iv. [1904] 58; *Melusine*, ii. 486, for examples from various parts). So, among the negroes of Jamaica, to cut the nails of infants with scissors will make them thieves (*FL* xvi. [1905] 68).

In the case of adults, the hair (or sometimes the nails) must not be cut during times of special danger. According to Diodorus (i. 18), Egyptian travellers did not cut their hair until the end of their journey. The inhabitants of Taïf in Arabia shaved their heads at the sanctuary of their town, on returning home. Robertson Smith, who quotes this example (*Rel. Sem.*² 331), suggests that the bond between the worshipper and his god has been loosened by absence during the journey, and the offering of hair has the effect of binding it again. This explanation is very possible in certain cases; but more probably the custom of leaving the hair uncut during a journey arises from the fear that a stranger may work magic by means of the locks. It is also possible that the idea of purification may underlie the practice: a traveller has been exposed to defilement or infection among strangers, and he removes the uncleanness by cutting his hair on returning home. Van Gennep (*Rites de passage*, p. 263) lays stress on the pilgrimage or journey as

intermediate between two stages (*séparation et aggrégation*), each of which has its appropriate ritual.

In Greek myth, Achilles kept his hair uncut because his father Peleus had vowed it to the river Spercheius, if his son should come home from war in a foreign land (*Il.* xxiii. 144 ff.). This, however, does not prove that the early Greeks were among those who abstained from hair-cutting when on a dangerous expedition; Achilles had left home as a boy, and (as will be seen below) it was a practice for Greek youths to offer their hair to the local river on reaching manhood. But the passage is a good example of the common custom whereby the hair is left uncut during the period of a vow. A Nazirite was commanded to let his hair grow while under a vow; afterwards he shaved 'the head of his separation' at the door of the tabernacle, and burned the hair in the sacrificial fire (*Nu* 6st; see also *Ac* 18¹⁸ 21^{2st}). Here, and in many other cases, the hair-cutting seems to be a means of purification for the person who, during the continuance of the vow, has been unclean.

Besides the period of a vow, there are other occasions on which the cutting of hair is avoided. According to a common English superstition,

'It was better you were never born
Than on the Sabbath pare hair or horn.'

(For European parallels, see *Mélusine*, ii. 487 f.) Here Christianity has no doubt adopted a pagan superstition, which is mentioned as early as Hesiod (*Works and Days*, 742 f.: *μηδ' ἀπὸ πεντήσιοι βέων ἐν δαυτὶ θαλεῖν | ἄνὸν ἀπὸ χλωροῦ τάνειν αἰῶνι σιδήρῳ*, i.e. nails must not be cut at a religious festival). The same warning is given in the *Symbols* of Pythagoras, where the prohibition extends to the hair also (*Iambl. Vit. Pyth.* 25, *Protrept.* 364). Plutarch (*de Is. et Osir.* 4) offers the explanation that nails are secretions (*περὶ τὴν ὥμα*), and therefore impure. The remark is sensible enough; but we may perhaps look a little deeper for the origin of the tabu. We have seen reason to suppose that hair-cutting often marks the end of an unclean state, by carrying off the infection. But, within the range of savage thought, the same cause may produce results diametrically opposite; and, amongst some races, the danger of hair-cutting must be counteracted by various observances. The Maoris, in particular, were placed under many restrictions, and were debarred from all social intercourse for some days after the operation (*GB*³, pt. ii. p. 264). The ancestors of the Greeks and other Europeans may well have suffered similar restrictions; and the idea that the cutting of hair or nails prevented access to a festival would naturally pass into a belief that the festival would be defiled by such an act. Besides Sunday, Friday is commonly considered an unlucky day for hair or nails—e.g. in Somerset (*FL* v. [1894] 338), in the Hebrides (*ib.* x. [1899] 268), and elsewhere. Sometimes a distinction is made, as in Northumberland, where it is unlucky to cut hair on a Friday or pare nails on a Sunday (*Denham Tracts*, ii. 343). The prohibition, as far as regards Friday, seems to be influenced by Christianity; at least among the later Romans, Friday was lucky for the hair, as appears from a verse found in Ausonius (*Eclog.* 1: 'ungues Mercurio, barbam Iove, Cypride crines,' i.e. the nails should be cut on Wednesday, the beard on Thursday, the hair on Friday). Among the modern Jews in Jerusalem it is thought that nails should be cut early in the week, that they may not start growing on the Sabbath (*FL* xv. [1904] 187).

When it is necessary to cut hair or nails, there is a further difficulty in disposing of the clippings. For, as has been mentioned above, they may fall into the hands of an enemy who can work magic

upon them. In Europe this idea survives in the belief that a person will suffer from headache, if any of his hair is carried off by birds to build their nests. To avoid risk, the clippings are often burnt or buried. At Rome, the *flamen Dialis*, who was subject to many kinds of tabu, was obliged to bury the cuttings of his hair or nails under a fruit-tree (*Aul. Gell.* x. 15). A large number of parallel instances are collected in *Mélusine*, ii. 360 f.; *GB*³, pt. ii. p. 274; Hartland, *LP* ii. 132 ff. Harm may be done innocently as well as by malice; hence the warning, in a 'symbol' of Pythagoras, not to defile or stand upon the cuttings (*ἀπονεχίσματα καὶ κορυφαῖς μὴ ἐκρούειν μηδὲ ἐφίστασθαι* [*Diog. Laert.* viii., *Vit. Pyth.* § 17]). In another Pythagorean 'symbol' there is an injunction to spit on the cuttings (*Iambl. Protrept.* 21), obviously as a prophylactic (for this virtue of saliva, see Sittl, *Die Geburden d. Griech. u. Röm.*, Leipzig, 1890, p. 117 f., and Hartland, ii. 258 f.). Brand (*Pop. Ant.*³, 1870, iii. 263) mentions a superstition that one should spit three times on hair which has been combed out, before throwing it away. In many cases, when the hair or nails are not burned or buried, they are carefully preserved. Often the motive is a fear of magic; but occasionally the practice is due to a different cause. Those who believe in a resurrection of the body have a natural anxiety that no part of their person may be missing on the day of resurrection. In Leitrim, while some peasants burn their hair and nails for fear of the fairies, others keep their hair-cuttings, which may be required on the Day of Judgment to turn the scale against the weight of sins (*FL* vii. [1896] 182 f.). This explanation has probably superseded an original fear lest the body should be incomplete. Indeed, in Cavan this reason is avowed; it is unlucky to burn hair, which will be required on the Last Day in order that the body may appear as God created it (*FL* xix. [1908] 319). Such an idea is not confined to Christian races; Frazer (*GB*³, pt. ii. p. 279) quotes similar beliefs from the Incas of Peru, the Turks, and others.

In leech-craft, the use of hair and nails is widespread; only a few typical examples can here be given. Pliny (*HN* xxviii. 23) mentions, as a remedy for fever, that the Magi placed the parings from a patient's fingers and toes at the door of another man, before sunrise. Some of the Magi, more innocently (as Pliny adds), order the parings to be thrown on an ants' nest; the first insect that carries off the nails is to be caught and worn as an amulet. These prescriptions are generally explained, with Pliny himself, as cases of the 'transference of evil' to another person, animal, or place; and many cases of folk-medicine seem to be based on this principle. In the Hebrides, epilepsy is cured by burying a black cock with clippings of hair and nails from the patient. In Meville, a child may be cured of the same malady by burying some of his clothing with a lock of his hair. As the linen moulders, the child recovers (*FL* xix. 316). Here, and often, the object is to be rid of the disease by mere transplantation. But, as Hartland notes (ii. 144 f.), many of the cases generally explained by transference are different. In a common type of leech-craft, the hair or nails of a sick person are stuffed into the hole of a tree, or hung up in its branches. Here the object may often be to secure a healing union with a healthy tree; for in a similar rite, in which a sick child is passed through a tree, the good health or preservation of the tree is an important feature. It is quite possible, therefore, that the idea of a healing union is the motive of some other practices in which the parings are transferred to an animal or man; and Hartland thinks that the notion of mere transference has often obscured or supplanted an older

belief in the virtue of union with a healthy object, whether human being, animal, or plant.

Apart from cases of sickness, the hair is very commonly found as a medium of connexion or union. This idea is probably at the root of the well-known custom of dedicating a lock of hair to a god. At a later stage of thought, the hair is no doubt considered as a mere symbol; but in earlier times the worshipper, by offering a part of himself, is put in actual communion with his god. In Greece, as we have already seen in the case of Achilles, youths and maidens offered their hair to deities on reaching maturity. Frequently the deity was the life-giving river of the country; (Orestes presents a lock 'for nurture' (θρεντρίσιον) to the Inachus (*Æsch. Choeph.* 5). (For other examples, see Pausanias, i. 37. 3, viii. 20. 3, and 41. 3, with Frazer's note, giving parallels from other nations.) Both in Arabia and in Syria it seems to have been customary to sacrifice hair as an initiation into the state of adolescence (*Rel. Sem.*² 327 f.; cf. Lucian, *de Dea Syr.* 55). The custom was regular at Rome, the hair being dedicated to some patron deity; e.g., Nero dedicated his first beard to Jupiter (see references in Mayor on *Juvenal.* iii. 186). Offerings of hair were also made on other occasions in Greece—as by girls before marriage (Herod. iv. 34; Paus. i. 43. 4). In these cases, the offering may have been 'propitiatory,' as it was made to virgin-deities, and seems designed to avert their wrath at the marriage of their worshippers. But the general idea is the same: the worshipper is put in communion with the deity. Pausanias (ii. 11. 6) mentions a statue of Hygieia, the goddess of health, which was almost hidden by women's hair and garments, no doubt dedicated before or after childbirth. Similarly, the cutting of hair is the means whereby the living are put in direct communion with the dead. Often the mourner's hair is placed on the tomb, or in the grave, or on the corpse itself. Here the desire to maintain connexion with the dead is, no doubt, the original motive, though frequently forgotten. The custom is classical: in *Æsch.* (*Choeph.* 6), Orestes offers hair at the tomb of his father, as well as a lock to the river-god (see also Soph. *El.* 52, 449, *Aj.* 1174; Eur. *Tro.* 480; Lysias, *Epit.* 60; Bion, i. 81; for parallels from other peoples, see Hartland, *LP* ii. 220 ff.). In many instances the hair is not brought into close contact with the dead, and appears to be cut simply as a token of mourning (as in Homer, *Od.* iv. 198; Eur. *Alc.* 101, *Or.* 458; and often in other races). But here it is probable that the original purpose has been forgotten, and the cutting of hair has degenerated into a mere expression of grief. Hence the Persians cut not only their own hair, but also that of their horses, after the death of a famous general (Herod. ix. 24). By a natural extension, Death himself was said to cut off a lock from the head of a doomed person (Eur. *Alc.* 74 f.; Verg. *Æn.* iv. 698 f.). In many of these cases it has been thought that the offering of hair is a substitution for the whole person, who is thus spared the necessity of being actually sacrificed to the dead (see Tylor, *PC*², 1891, ii. 401). According to a slightly different view, the hair is a pledge of the ultimate union of the mourner with the dead in the nether world. Both these explanations may hold in certain instances; but the general idea (as stated above) seems to be rather a wish to preserve connexion between the living and the dead (see *LP* ii. 325 f.).

The broad idea that union can be effected by means of the hair or nails may be illustrated by other practices. As is well known, savages lay great stress on the influence of diet, believing that to consume part of a man or animal will transmit

their distinctive qualities. Thus, in Japan, the character of another person was acquired by boiling his nails in water and drinking the decoction (*FL* xii. [1901] 71). In Jerusalem a Jewess will sometimes serve her hair or nail-parings in a pudding to her husband, in order that his love may be increased (*ib.* xv. 187). Instances might easily be multiplied. An equally primitive conception—that the processes of Nature can be controlled or influenced by human magic—can also be traced in various superstitions connected with the hair and nails. The Maoris believed that hair-cutting might cause a thunderstorm (*GB*², pt. ii. p. 271); and, as Frazer adds, the same idea is probably the base of a Roman superstition that on shipboard the hair or nails should be cut only in a storm (Petron. 104). Petronius' own explanation is that the omen would be bad, as the sailors' most desperate vow was to offer their hair to the sea-god. Such vows, it is true, were common in classical times (see references in Mayor's note on *Juv.* xii. 82); but the origin of the maxim is, no doubt, the belief that, when the storm had arisen, the harm was already done. The use of hair as a rain-charm is clear from the examples collected in *GB*², pt. i. 'Magic Art,' vol. i. p. 251 f.

LITERATURE.—For European and other folk-lore in this connexion, see *Mithras*, ii. (Paris, 1884–85) 300, 481 f. (Gaidoz and Rolland), iii. [1885–86] 833. The general subject is treated by J. G. Frazer, *GB*², pt. ii. 'Taboo,' London, 1911, p. 258 f., and by E. S. Hartland, *Legend of Perseus*, do. 1895, ii. 64 f., 132 f. See also W. Robertson Smith, *Rel. of Sem.*², Edinb. 1894, pp. 325 f., 481 f.; G. A. Wilken, 'Über das Haaropfer und einige andere Trauergebräuche bei den Völkern Indonesiens,' in *Revue coloniale internat.* iii. [1886] 225 ff., iv. [1887] 345 ff.; F. B. Jevons, *Introd. to Hist. of Religion*, London, 1896, p. 193 f.; A. van Gennep, *Les Rites de passage*, Paris, 1909, p. 238 f.; J. Kirste, 'Indogerm. Gebräuche beim Haarschneiden,' *Analecta Græciensia*, Graz, 1893, pp. 53–59; W. Crooke, *PR* ii. 66 f., 277 f.; I. Benzinger, I. Broydè, and J. Jacobs, 'Hair,' in *JE* vi. [1904] 157–159; M. Schlegel, 'Nail,' *ib.* ix. [1905] 149 f.; I. Benzinger, 'Hair,' in *PR* ix. [1899] 276 f. (cf. R. Zehnpfund, *ib.* xx. [1908] 84, 88); A. C. Fletcher, 'Hair Dressing,' in *HAI* (Bull. 30 *Æ.*), i. [1907] 524–528; O. Schrader, art. 'Haartracht,' in *Reallex. der indogerm. Altertumskunde*, Strassburg, 1901, pp. 315–319.

E. E. SIKES.

[The cutting or tearing of the hair in mourning for the dead has been mentioned in *ERE* iv. 439 f. [primitive], 484^b [non-Aryan Indian], and abundant Hebrew and Jewish material is collected in *PRE*² xx. [1908] 84, 88, and *JE* ix. [1905] 101 f. The same custom is also found on the American continent, as among the Shastan, Dakota, Crow (Yarrow, *Introd. to the Study of Mortuary Customs among the N. Amer. Ind.*, Washington, 1880, pp. 61, 71 f., 91), Iroquois, Virginians, Brazilians, Caribs (Lafitau, *Mœurs des sauvages amér.*, Paris, 1724, iv. 151 f.), Tlingit (Swanton, *26 RBEW* [1908], 429), and Pima (Russell, *ib.* 195). Among the Salish, according to Hill-Tout (cited by A. C. Fletcher, *HAI* i. 952), the conventional sign of mourning

'is the severing of the hair of the surviving relatives, who dispose of it in various ways according to the tribe—by burning it to prevent its falling into the hands of a sorcerer; by burying it where vegetation is dense, thus insuring long life and strength; by putting it away for final burial at their own death; by casting it into running water, and by fastening it to the branches on the eastern side of a red-fir tree.'

Occasionally hair is taken from the corpse instead of being cut off in its honour by the survivors. Thus, among the Iroquois a lock of hair from the corpse was given to the nearest relative of the deceased (Lafitau, iv. 122 f.). Among the Zuni, locks are cut from the corpse and placed in a niche in the wall, the belief being

'that, if a person takes a bit of hair of a deceased friend, burns it, and inhales the smoke, he will have good health and not die, but go to sleep and thus pass on to K'chluwala'wa [the place of the dead]' (M. C. Stevenson, *25 RBEW* [1904], 309).

Among the Tlingit this usage is directly connected with the belief in re-incarnation. According to Swanton (*loc. cit.*),

'If a very dear relative had passed away, people often took the nail from the little finger of his right hand and a lock of hair from the right side of his head and put them into the belt of a young girl of his clan just reaching maturity. Afterwards she had to lead a very quiet life for eight months and fast for as many days, unless she were delicate, when half as many sufficed. . . . After her fast was over, and just before she ate, she prayed that the dead person would be born again from her, and also that she would marry well and live a good life.'

The formal cutting of the hair is sometimes a part of initiation rites. A conspicuous case is found in the Omaha consecration of a boy to Thunder, the symbol of the power controlling the life and death of the warrior (for a full description, see Fletcher and La Flesche, *27 RBEW* [1911], 122-128). Similarly, in India the hair of the child was ceremonially cut into the form appropriate to his family, and before such rites as the new and full moon ceremonies the ritual prescribed the slipping of hair and nails (see, for details, Oldenberg, *Religion des Veda*, Berlin, 1894, pp. 425-429). This reference to the peculiar form of family hair-dressing recalls the similar Omaha usage, where the child's hair is cut in a specific manner for each gens (see Fletcher and La Flesche, 42-46, 145 ff.), this being retained until the time of second dentition, when the hair is allowed to grow (*ib.* 128). As among the Omaha different gentes had their individual ways of cutting the child's hair, so different tribes were distinguished by divergent modes of wearing the hair. Thus the Pawnee

'cut the hair close to the head, except a ridge from the forehead to the crown, where the scalp-lock was parted off in a circle, stiffened with fat and paint, made to stand erect, and curved like a horn, hence the name *Pawnee*, derived from *pariki*, "horn." . . . The Dakota and other western tribes parted the hair in the middle from the forehead to the nape of the neck, the line, usually painted red, being broken by the circle that separated the scalp-lock, which was always finely plaited, the long hair on each side, braided and wrapped in strips of beaver or other skin, hanging down in front over the chest. The Nez Percés of Idaho and neighbouring tribes formerly wore the hair long and unconfined, falling loosely over the back and shoulders. In the S.W. among most of the Pueblo men the hair was cut short across the forehead, like a "bang," and knotted behind' (Fletcher, *HAI* i. 524). For the usages among the Indo-Germanic peoples, see Schrader, *Reallex. der indogerm. Altertumskunde*, Strassburg, 1901, pp. 313-318; Hirt, *Indogermanen*, do. 1905-07, pp. 4621, 723. Concerning the American scalp-lock, Miss Fletcher adds that 'this lock represents the life of the child, now placed wholly in the control of the mysterious and supernatural power that alone could will his death. The braided lock worn thereafter was a sign of this dedication and belief, and represented the man's life. On it he wore the ornaments that marked his achievements and honors, and for anyone to touch lightly this lock was regarded as a grave insult. As a war trophy the scalp-lock had a double meaning. It indicated the act of the supernatural power that had decreed the death of the man, and it served as tangible proof of the warrior's prowess in wresting it from the enemy.'

Marriage frequently involves a change in the mode of wearing the hair. Among the Hopi the unmarried girl wears her hair in a whorl over each ear, symbolizing the squash flower, but after marriage the hair is worn in two braids. Among the Indo-Germanic peoples the hair of the wife is parted and covered, whereas the unmarried wear it loose (cf. Haas, 'Heiratsgebräuche der alten Inder,' in *Ind. Stud.* v. [1861] 405 f.; Von Schröder, *Hochzeitsgebräuche der Esten*, Berlin, 1888, p. 144 ff.), just as the married Jewess covers her own hair with a wig. Again, difference of rank is marked by different modes of wearing the hair, shorn hair being characteristic of the slave, as contrasted with the long locks of the free man (Schrader, 318); among the Franks only the kings wore their hair long (Agathias, *Hist.* i. 3). Cutting off the hair is found, furthermore, as a punishment for adultery in India and among the ancient Teutons (*ERE* i. 129^a; Tacitus, *Germ.* xix.), for false accusation among the Assyro-Babylonians (*ERE* iv. 259), and for other offences (*ib.* 252^a).

The general principle that the hair, as being a part of the individual, gives him who has received or taken it from its original owner some power over and connexion with that owner finds illustra-

tion in folk-tales where one friend gives another some of his hair, which, on being burned, summons the primary possessor to the assistance of his friend (Steel and Temple, *Wide-Awake Stories*, Bombay, 1884, pp. 13 f., 32-34, 414; for further instances, see MacCulloch, *CF*, 211 f.; and for hair as a life-token, etc., *ib.* 126 f.). It is also to be noted that in folk-magic, particularly in love-charms, the use of pubic hair plays a part (Ploss-Bartels, *Das Weib*², Leipzig, 1908, i. 292).

Attention has already been called to the importance of the day on which the nails are pared. The order in which the nails of the individual fingers should be trimmed is also sometimes held to be of moment. Among the Persis the order is 4, 2, 5, 1, 3 (Anquetil du Perron, *Zend-Avesta*, Paris, 1771, ii. 117); and this is adopted by Rabbinical authority for the left hand, though some maintain that for the right the order should be 2, 4, 1, 3, 5, the left hand being first manicured; others, however, hold that the right hand should be cared for first, and that the order should be 1, 3, 5, 2, 4 (Seligsohn, *JE* ix. 149). The impurity of the serpent which caused Adam's fall was under the nails (*ib.*); the Hindus also hold that the nails are dangerous, those of Europeans distilling deadly venom, so that they eat with knives and forks, instead of with their fingers (Crooke, *PK* ii. 9); and in portions of America the scratch of a negro's nails is said to cause blood-poisoning. The burning of hair and nails to drive away demons or to avert the evil eye is not based on the inherent properties of those substances, but is intended merely to create a stench, to which demons are notoriously sensitive (Thurston, *Omens and Superstitions of S. India*, London, 1912, pp. 53, 115). LOUIS H. GRAY.]

HALAKHA.—See JUDAISM.

HALĒBID (Kanarese *halē-bidu*, 'old ruins').—A village in the Hassan District of Mysore; lat. 13° 13' N., long. 76° E.; the site of the great ancient city Dorasamudra, Dvārasamudra, or Dvārāvāri-pura, the capital of the Hoysala Ballala dynasty. It was founded in the early part of the 11th cent. A.D., and largely rebuilt by Rājā Vīra Someśvara in the 13th. He is said to have been attacked by leprosy, and was warned to erect temples in honour of Śiva as a means of curing his disease. This probably accounts for the splendid religious buildings which survive to the present day. The city was captured by the Muhammadan general Kāfir, and plundered in 1310. Sixteen years later it was finally destroyed by another army of Musalmān invaders. One Śaiva temple is said by Fergusson to be dedicated to Śiva in his form Kaitābhēśvara (Kaitābha being the name of an Asura, and Kaitābha a title of Durgā, the spouse of the god); but Rice shows that its proper name is Kedāresvara, 'Lord of Kedār' (see KEDĀRNĀTH), and that it was erected by Vīra Ballala and his queen Abhinavā Ketālā Devī, about 1219. Of this temple Fergusson says:

'If it were possible to illustrate this little temple in anything like completeness, there is probably nothing in India which would convey a better idea of what its architects are capable of accomplishing. It is, however, surpassed in size and magnificence by its neighbour, the great temple at Hūllabid (known as Hoysalesvara, "Śiva, Lord of the Hoysala dynasty"), which, had it been completed, is one of the buildings on which the advocate of Hindu architecture would desire to take his stand' (*Ind. and East. Arch.*, ed. 1910, i. 442 f.).

This, the older of the two ornamental temples, was probably commenced by Vinayāditya (A.D. 1047-1100). It is unfinished; but whether this was always the case, or whether it was completed and afterwards lost its towers, is uncertain (Rice, *Mysore*², i. 514). Fergusson has given an elaborate

and enthusiastic description of this magnificent building. Rice, however, corrects his proposed restoration, assuming that the final ornament of the towers, resembling a lantern, was really a sacrificial vase (*kalasha*), bound round with a cloth knotted towards the four cardinal points, such as is filled with holy water and used at the consecration of a temple. Fergusson remarks:

'The mode in which the eastern face is broken up by the larger masses, so as to give height and play of light and shade, is a better way of accomplishing what the Gothic architects accomplished by their transepts and projections. This, however, is surpassed by the western front, where the variety of outline, and the arrangement and subordination of the various facets in which it is disposed, must be regarded as a masterpiece of design in its class.'

Rice (i. 515 ff.) gives a full account of this splendid temple.

W. CROOKE.

HALEVI.—1. Life.—Jehudah ben Samuel Halevi (Arab. *Abū-l-Ḥasan Yahūdāh ibn Allavī*), Jewish philosopher and poet, was born in Toledo about 1085 (the year in which that city, the meeting-place of East and West, fell before Alphonso VI.), and died in Palestine about 1143.

Halevi was sent at an early age to the Rabbinical seminary of the famous Isaac Alfasi at Lucena. In addition to the usual subjects of Rabbinical study, he devoted himself to mathematics, the natural sciences, philosophy, and, since he was to be a physician, medicine. Arabic he learnt to write as skilfully as he did Hebrew. A young singer, he gave himself to poetry when he was quite a born man. On the completion of his medical studies he began to practise, first in his native city, and later at Cordova. But, though successful, he does not appear to have had much love for his vocation. His chief interest was literature, religious literature more especially; and, as he grew older, his sympathy with his oppressed people and his love for Palestine, the cradle of their lost greatness and the promised scene of their future glory, became his ruling passion. Meanwhile theological study, the instruction of young men in Rabbinics, and literary pursuits relieved the monotony and disappointments of his professional life. He wrote poems, both secular and religious, mainly in Hebrew, and his great philosophical work, *Kitāb al-Khazari*, usually known as the *Kuzari*, in Arabic. His religious poems have enriched the liturgy of the synagogue; his *Kuzari* is a classic. It was soon after the completion of the latter work—he was then about fifty-five—that he found opportunity for realizing the great dream of his life. To see Jerusalem with his own eyes, and to worship at her fallen shrines, was his chief desire.

'O, who will give me wings

That I may fly away,

And there, at rest from all my wanderings,

The ruins of my heart among thy ruins lay?

Thus he apostrophizes Zion in one of his most fervid and popular elegies (since included in the liturgy for the Fast on the Ninth of Ab); and now that yearning was to be satisfied. Travelling through Spain, where his journey was a triumph—so enthusiastically was he hailed by his many admirers—he took ship for Egypt. He was an ailing man, and a tempestuous voyage caused him extreme discomfort; but it also fired his muse. The thought of the desired haven, and the utterances of that thought, in verse, stilled for him the tumult of the waves:

'The sea rages, but my spirit is glad:

It draws nigh to the Temple of its God.'

The hospitality of his many friends kept him in Egypt longer than he wished; but at length he seems to have reached Palestine. He certainly got as far as Tyre and Damascus, and he may perhaps have seen Jerusalem, though only for a short time. It was at Damascus that he penned the elegy already cited. The closing passages of his life are unknown; but legend has filled up the gap. It is said that, while he was reciting his poem on Zion in the Holy City, an Arab horseman rode over him and trampled him to death.

2. Philosophy.—Halevi's great philosophic work is, as has been stated, the *Kuzari*. Written about 1140, it was rendered into Hebrew some thirty years afterwards by that famous translator, Judah ibn Tibbon. A little later (about 1200) a second Hebrew version was undertaken by Isaac Cardinal. Of this only the preface and a short fragment have been preserved. History tells of one Bulan, king of the Khazars, a tribe in the Crimea, who became a convert to Judaism in the 8th century. Halevi, who may have met some of the descendants of the Khazars at Toledo, utilized this incident to give point and vividness to his

book. His aim, as is indicated by its sub-title, 'The Book of Argument and Demonstration in aid of the Despised Faith,' was designed to vindicate Judaism against the assaults of its various detractors—the Karaite within the gates, and the Muslim and the Christian without. His disciples had asked him what shape such a vindication ought to take, and his great book was his reply. The story of Bulan provides the work with its starting-point and framework. The king, dissatisfied with paganism, invites a philosopher to expound his system. The God of philosophy, however, proves to be a distant Being, indifferent and inaccessible to men. The king turns, therefore, first to a Christian, and then to a Muhammadan, but with equally unsatisfactory results. The truth of the religion in each case is devoid of convincing historical guarantees. On the other hand, both have appealed to Judaism as the fount and the witness of their creed. The king accordingly sends for a Rabbi, and the rest of the work gives the imaginary conversation which ensues. The arguments of the Rabbi, which are, of course, those of the author, convince the king, who thereupon declares his adhesion to the Jewish faith.

In order to understand the genesis and significance of the *Kuzari* it is necessary to have a clear idea of the state of religious thought which prevailed among the Jews in Halevi's time. Coloured by Greek philosophy, by the teachings, more particularly, of Plato and Aristotle, Arabic theology in its turn influenced Jewish thinkers living under Muslim rule in Africa and Spain. That influence had a twofold result. It gave rise, on the one hand, to unorthodox views concerning the origin of the universe and the relation of God to the world, and it furnished, on the other hand, the impulse to a synthesis intended to reconcile Jewish theology with Greek speculation. Islām, forced to attempt a like reconciliation on its own behalf, had produced the order of philosophers known as the *mutakallimūn*, and these, in a measure, had their counterparts in certain Jewish thinkers headed by the famous Saadya (9th–10th cent.). Saadya's great work, *Emunoth Vedeoth* ('Creeds and Beliefs'), was designed to defeat the sceptic with his own weapons. A too material philosophy had been his undoing; a philosophy grounded on faith in the Unseen should be his salvation (see SEADIAH). To Saadya succeeded Bahya ben Joseph ibn Bakudah (11th cent.), who, in his *Hoboth Halebaboth* ('Duties of the Heart'), provided a philosophical antidote to the Aristotelian doctrine with which Ibn Sina (Avicenna) had familiarized his Muslim followers and their Jewish admirers. Theological turmoil in Islām was matched by a like ferment in Jewry. In the opinion of many among both communions, however, the attempt to reconcile religion with metaphysics was a failure. It fostered scepticism instead of curing it. Philosophy was the enemy, and war to the knife was the only means of averting its sinister effects. Thus orthodoxy asserted itself once more—in Islām in the person of al-Ghazālī (11th cent.; see ETHICS [Muslim]), in Jewry in the person of Halevi, whom al-Ghazālī influenced, and whose deep distrust of 'Greek wisdom,' 'whose blossom is beautiful, but bears no fruit,' tinctured even his poetry. Both writers aimed at displacing philosophy by unconditional belief, and the Jewish Rabbi was probably moved to write his *Kuzari* by the polemical works of the Muslim theologian. But, while a common purpose animated them, the Rabbi set himself the additional aim of defending his religion from Islām itself, with its attacks upon Jewish Biblical exegesis.

In spite of this, Halevi's repudiation of philosophy is far from thoroughgoing; it may even be

criticized as inconsistent. In regard to the fundamental principles of theology, such as the Divine Existence and the close relations of a personal God with the universe, he will have nothing to do with metaphysical speculation. The veracity of those principles is established for him by one kind of testimony, and one only—that furnished by the historic facts of the Bible. Holy Scripture is the impregnable rock upon which rests the truth of Judaism itself. But, when dealing with less vital matters—the genesis of the world, for example, the Divine attributes, human free will, and the like—he has no scruple in resorting to philosophy, and even to metaphysics. Nor can it be said that he succeeded in his main polemical purpose. If Saadya failed to discourage philosophical scepticism by encouraging philosophical belief, Halevi equally failed to discourage it by banning it altogether. The next great name after his in the chronology of Jewish thought is Maimonides (end of 12th cent.), with his *Moreh Nebukim* ('Guide of the Perplexed'), the most systematic attempt at interpreting Judaism in terms of the Aristotelian teaching which Jewry has produced. The fierce and protracted conflict of opinion to which that epoch-making treatise gave rise is a matter of history (see MAIMONIDES). The truth is that both the philosophical and the anti-philosophical positions are at once useful and dangerous. Theology has its psychic roots, and the evidences to which it makes its appeal necessarily vary with the individual. If the mystic finds his proofs of God in his own spiritual experience—'makes them,' as T. H. Green expresses it—the ordinary believer either looks to Nature and history for corroboration of his creed or declines to corroborate it at all. On the other hand, there are persons desirous of believing, but so constituted as to require conviction as a condition precedent to religious faith. If philosophy may unsettle and alienate the ordinary believer, it may satisfy and win the more exacting mind. Halevi practically recognized this truth when, though setting out with the avowed purpose of excluding rationalism from the sphere of his inquiry, he resorted to it in order to justify certain elements of his Judaism. Apart from its initial postulates, the *Kuzari* is throughout a reasoned and, therefore, a philosophical exposition of the Jewish religion. And it is as such an exposition that it retains its interest for us. It gives us a picture of the religion which appealed to the average Jew of the Middle Ages, of the religion, moreover, which still commands the allegiance of his successor to-day. That the book attained instant popularity, that it influenced so considerable a Jewish philosopher as Ibn Daud, who wrote his *Emunah Ramah* in 1168, and that it has passed through a dozen editions, is not surprising. More remarkable is it that it should have been translated into many European languages, including English.

The following is a summary of the salient teachings of the work:

The aim of religion is the good life. Revealed religion is, therefore, superior to the natural religion of the philosopher which defines the good life in diverse ways. The belief in God, in His eternity, in His providential guidance of Israel's history, and in His revelation constitutes the essence of the Jewish creed. The truth of that creed is attested by historical facts, e.g. the Sinaitic revelation, which took place in the presence of a whole nation. Nothing in Scripture can ever be irreconcilable with reason. Thus the Biblical appellations of God, such as 'merciful,' 'jealous,' 'long-suffering,' and the like, do not imply any mutability of the Divine nature, but express the divergent points of view from which it is approached by the human mind. In like manner the Divine attributes merely correspond to the various relations of God to His creatures.

Like the dogma of the Divine existence, the idea of the election and mission of Israel rests upon an historical basis. The Bible tells of a succession of prophetic or spiritually-gifted natures, beginning with Adam, continued in the Patriarchs, and completed by the Israelitish people, who were chosen as

the depositaries of the Divine truth. That truth reached its full expression in the Bible, with its three great classes of precepts—ethico-social, ritual, and spiritual; and its communication to Israel elevated that people into a kingdom of priests, charged with the performance of the prophetic task. The adaptation of the Biblical precepts to the needs of successive ages is the characteristic function of the Talmud, which defines the boundaries of permitted and forbidden things in accordance with tradition. The theory of an Oral Law supplementing and elucidating the Written Law (Scripture) is essential to a due interpretation and fulfilment of the Biblical ordinances. Hence, unlike Karaite Judaism, which rejects tradition, Rabbinism gives satisfaction of spirit to its adherents by the assurance that, in obeying the laws of their religion, they are performing the clearly ascertained will of God.

Moreover, Judaism, the religion of joy, imposes limits on asceticism: 'Thy self-humiliation on a fast-day is not more acceptable to God than is thy devout rejoicing on a Festival.' The powers of soul and body are to be equally developed. The good man, as Judaism conceives of him, will not shun the world and its activities; nor will he long for death in order the more speedily to enter into eternal life. Man, moreover, is free (this in opposition to the Epicurean and fatalistic doctrine of Necessity). Nor does the idea of Divine providence conflict with this truth. God knows the consequences of human actions, but this is not equivalent to foreordaining them. Between the Divine foreknowledge and human action lie intermediate causes. The human will is one of them; it can direct the law of cause and effect as it desires. Nevertheless, the Divine omnipotence is not limited, inasmuch as these intermediate causes depend upon God, and are to be referred back to Him.

As to the prophetic gift, it is a direct emanation from the Godhead; it is the *summum bonum*. There is no prophecy outside the Holy Land (probably a polemical reference to Muhammadanism). The Prophet must be a man of exemplary life. In virtue of its obedience to the Law and of its ancestry, Israel has a special aptitude for prophecy, which it may foster in exile by obedience to the ceremonial precepts. That exile is no proof of its rejection by God. Israel is the martyr-people; it is 'the heart of the nations,' feeling every pain and disorder of the great body of mankind. But the dry bones will live. The Jew has been dispersed throughout the world in order to disseminate the Divine truth. Christianity and Islam are forerunners, preparing the way of the Messiah, whose away will make them one.

3. Poetical works.—Halevi the poet is at least as great as Halevi the religious thinker. He has been called 'the most inspired writer of Hebrew after the Psalmists.' The allusion is to his poems, which, unlike his great prose work, were written mainly in the sacred language, but in the Arab style, with its fettering artifices and conventions. Though essentially a religious poet, Halevi, in common with his predecessors of the Judæo-Spanish school, did not disdain to sing of secular themes. Indeed, the new Hebrew poetry which that school created was secular before it was religious. Halevi—so facile is his gift—turns to poetry when others would use prose. If he has to write a letter or send a greeting to a friend or a great man—the Ibn Ezra, Samuel Hannagid, Joseph Ibn Migash, and many others—he sends it in verse. He invokes his muse on the smallest provocation. He has left epithalamia, elegies, satires, epigrams, riddles, and love-songs. He sings of youth and of old age, of feasting, and of the splendour of land, sky, and sea. He rallies a lad who has begun to grow a beard; he chronicles the discovery of his own first grey hair:

'I found my first white hair to-day,
And plucked it out, scarce knowing what I'd done.
"An easy task," it cried, "to vanquish one;
But how when all the host are grey?"

With the title, 'To a Friend who finds my Poverty as grievous as I do,' he indites the following lines:

"I'm done with thee," exclaimed my friend,
The day my money fled.
"So worth! Say, what's my sin?" I cried.
"Thy poverty," he said.

But the didactic note prevails. He warns the worldling that mundane things, 'a protecting shadow' to-day, 'may be a snare to-morrow'; 'the eagle's pinion may wing the shaft that slays him.' He has some lines entitled 'The Counsel of the Sage,' which contain the following advice: 'Keep a joyous face for thy friend; be not always sad. Win the hearts of the learned, and capture the wisdom of the wise. So will thy desire be fulfilled, and thy weal multiply.' About to take

medicine, he writes some prayerful verses, in which he affirms his trust not in the potion, but in the healing power of God. Here is a characteristic stanza or two on 'Love to God':

'I haste unto the true life's fount,
Spurning the life that's vain and false;
My one desire to look upon my King;
No other being has my reverence.
Could I but see Him in a dream,
Then would I sleep for aye;
Could I but see His face within my heart
I'd never wish to look abroad.'

Another poem is entitled 'The Shame of the Jew is his Pride.' Its central thought is thus expressed: 'Men revile me—they know not that shame, borne for Thy sake, is truest glory.'

Halevi's chief strength, however, lay in his gift of hymn-writing. He is the poet of the Synagogue *par excellence*. No liturgical writer has found so wide acceptance among the Jews, or lifted their devotional poetry to so high a level. He has left hymns—some 300 in number—for the whole of the Jewish year, and the Synagogue has made abundant use of them. They are a common bond uniting the sects of Jewry—the Karaites among them—with their many differences of thought and ritual. Simple, as a rule, in ideas and expression, they tower above the effusions of the more ancient liturgical poet Kaliri, with his love for dark sayings and difficult phraseology. Halevi's religious poetry moves, moreover, on a far loftier plane. Its leading feature is a keen consciousness of God, the desire for communion with Him, an absolute trust in His rectitude. The joyousness issuing from this temper is modified, however, by the sad thought of Israel's low estate. The enmity of Edom and Ishmael (Christendom and Islām) is a constantly recurrent theme, as though the iron of persecution had entered into the writer's own soul. Occasionally he invokes the Divine judgment upon the oppressor. This sombre tone persists even in some of the poems written for Feast-days. But their final note is one of hope and faith. Purified by tribulation, Israel will be redeemed at last, and the old national life restored. Sometimes the poem is the voice of the soul of collective Israel, 'the King's son,' sometimes of the individual soul. Now the poet mourns his own sins, especially the sins of his youth; now he calls to youth to remember that life is fleeting, and that old age, with its disillusion and regrets, and the day of death, 'when there is neither love nor hate,' will come at last. 'Haste,' he exclaims, 'after thy King, with the souls that flow unto the goodness of the Lord.'

Apart, perhaps, from a quicker feeling for the beauty, as distinct from the solemnity, of the physical world, Halevi's poetry makes no appreciable addition to the content of Jewish thought. The Bible and the Rabbinical literature not only colour, but fashion, his theology and his outlook on life. His chief characteristics are intense spiritual feeling and lofty imagery. Traces of theosophy meet us here and there.

The angels are very real beings to the poet; they hold up the throne of God, but God upholds them. He is the Omnipresent, who fills, but transcends, Nature. 'Thou containest the universe; but the universe does not contain Thee.' But God is immanent as well as transcendent; 'He came down at Sinai, and He dwelt in the bush.' 'Is His throne, in very deed, among the Cherubim? Lo, the highest heavens contain Him not. He lives in men's hearts, even as He dwells among the angels. Yea, His assembled worshippers are very near to Him. Invisible to the eye of flesh, He is manifest to the soul.' His grace, too, is infinite; it triumphs over His strict justice, and ensures forgiveness for truly repentant sinners who 'essay to grasp His robe.' 'Their tears are as drink-offerings in His sight.' The one supreme joy is communion with God, His grace the one supreme boon. 'Away from Thee, my life is death; near to Thee, my death is life. . . . Let me seek Thy grace for awhile, and then let me die . . . for what else hath life in its gift? And if Thou art not my portion, what is my portion?'

In like manner, the poet cries in one of his finest passages:

'My heart is one with my Beloved; my soul lives again;
A poor prisoner, yet am I glorious.
My heart holds my Beloved; what need to seek Him, then,
Either in the heavens or in the deep?
My soul enthrones Him; why, then, brother or friend?
Or what can King or Prince do for me?'

Still more daring is his flight. Influenced by the Midrashic interpretation of Canticles, he thus apostrophizes God:

'Beloved, hast Thou forgotten how Thou didst lie between my breasts?
Why, then, hast Thou sold me into lasting slavery?
Once Thou hadst my love, and Thou gav'st Thy love to me;
How, then, couldst Thou give my honour to another?
Have I Redeemer but Thee? Or hast Thou a prisoner of hope but me?
Give me, I pray, Thy strength, for to Thee I give my love.'

He retains, too, some of the Talmudic superstitions. The note of the *shophar* (cornet), for example, on the New Year Festival will confound Satan, and give unimpeded play to the Divine mercy and men's contrition. His spirit chafes under his people's sufferings. Besides active persecution, they have to endure attempts to wean them from religion. 'They would turn me aside after false prophets'—so Israel is made to complain; 'they revile me when I seek to serve my God.' But 'Lo, Thy fame is in my ears; the Red Sea and Sinai witness to Thy greatness. How, then, shall I think of any god but Thee?' In these lines we may discern a poetic echo of the great thesis of the *Kuzari*—the testimony of history to the eternal truth of Judaism.

Halevi's eminence as a religious poet is attested by the frequency with which he has been translated. Heine, moreover, generally frugal in his praise, gives the ancient singer of his race unstinted homage: he is

'A very wondrous mighty
Fiery pillar of all song,
That preceded Israel's mournful
Caravan as it was marching
Through the desert of sad exile.

When this spirit was created
By its Maker self-contented,
He embraced the lovely spirit,
And that kiss's beauteous echo
Thrills through all the poet's numbers,
Which are hallowed by this grace.'

Of the many attempts to summarize Halevi's significance in the sphere of religious literature, Graetz's appreciation is perhaps the happiest: 'He was the transfigured image of self-conscious Israel seeking to express himself in thought and in Art.'

MORRIS JOSEPH.

HALLAJ.—In the history of Muhammadan pantheism there is no event more celebrated and remarkable in its consequences than the execution at Baghdād, on the 24th of Dhu'l-Qa'da, A.H. 309 (26th March, A.D. 922), of Abu'l-Mughith Husain ibn Mansūr al-Hallāj—often incorrectly called Mansūr Hallāj—on the charge of pretending to be an incarnation of the Deity. His claim was expressed in the most forcible and uncompromising terms that can be imagined: *Anā 'l-haqq*, 'I am the Real.' The significance of this formula will be explained after some account has been given of its author's life and character. Hitherto it has not

been possible even to sketch the outlines of his career with any certainty, but the researches of Louis Massignon, which will shortly be published (see below), have thrown fresh light on the subject.¹

1. *Life.*—Hallāj, whose grandfather is said to have been a Zoroastrian, was born c. A.D. 858 at Baidā, near Persepolis, in southern Persia, and passed his boyhood at Wāsīt, one of the chief cities of Irāq. At the age of sixteen he went to reside at Tustar (Shushtar) in Khūzistān, and entered upon the ascetic and mystical life as a pupil of the eminent Ṣūfī, Sahl ibn 'Abdallāh al-Tustarī; he then migrated to Baṣra, where he became a disciple of 'Amr ibn 'Uthmān al-Makki, and married the daughter of another Ṣūfī, Abū Ya'qūb al-Aḡṭa'. On leaving Baṣra, he proceeded (in 877) to Baghdad and completed his training in Ṣūfism under Junayd, the greatest mystic of the time. Little is known concerning his movements and the events of his life during the next twenty years. About 895 he made the pilgrimage to Mecca, where he remained for a year in seclusion. The fact that soon afterwards his Ṣūfī teachers broke off relations with him was probably due to their dislike of the extreme pantheism to which he had by this time committed himself, although Hujwiri states (*Kashf al-Mahjūb*, 150) that they did not repudiate him because of any attack on religion and doctrine, but solely on account of a breach of discipline. After spending two years in retirement at Tustar, he travelled for a long while (c. 899-902) in Khurāsān and Fārs, preaching and composing his first works on mysticism; at this date he received the title of *Hallāj* ('wool-carder') by which he is generally known.² Having made the pilgrimage to Mecca a second time, he settled for a year at Baghdād, whence he travelled by sea to India and roamed to the farthest boundaries of Turkistān, preaching and writing as before. He then returned as a pilgrim to Mecca, where he stayed two years, and about 908 arrived at Baghdād, where he delivered a public discourse which raised an outcry against him and led to his being arrested; but he managed to escape from prison, and concealed himself at Sūs in Khūzistān (910). Three years later he was again arrested and brought to trial at Baghdād before 'Isā, vizier of the Khalīf Muqtadir. On this occasion he was charged with being a Carmatian (*q.v.*); and, although no evidence was found to justify the allegation, he was detained in custody at Baghdād. His captivity, which lasted for eight years, was not of a rigorous nature: he was moved from one prison to another, and was allowed to receive visitors and continue his preaching—a privilege which he used to such purpose that he gained many influential sympathizers.

Finally, in 922, a second trial took place. It was conducted by the viziers Ibn 'Isā and Ḥāmid, and dealt with three principal charges against Hallāj: (a) his secret correspondence with the Carmatians; (b) the extravagant notions of his disciples, who believed him to be Divine; (c) his own belief on the question of essential union with the Godhead (*'ain al-jam'*). Ḥāmid wished to confine the inquiry to these points, but the *qādis* insisted on his adding a fourth, viz. the doctrine (which was, indeed, held by Hallāj) that the pilgrimage to Mecca is not one of those religious obligations that are absolutely binding, but belongs to the class that admits of abrogation. On this skilfully chosen combination of theological,

legal, and political grounds, the prisoner was condemned to death. During his execution, which was carried out in a barbarous manner, Hallāj displayed the utmost fortitude. His mutilated body was burned and the ashes thrown into the Tigris, while his head was sent to Khurāsān to be shown to his followers in that country. Many, however, both there and elsewhere, would not believe that he was dead, and continued to expect his return. They maintained, quoting the statement in the Qur'ān (iv. 156) concerning Christ, that Hallāj had been transported alive to heaven, and that the actual victim was one of his enemies whom God had changed into his likeness, or, according to other versions, a horse or a mule.

Similar legends are told of 'Alī (*al-Farq bain al-Firaq*, 225) and several Shi'ite heresiarchs. As Massignon has pointed out, they express the popular feeling that a God-man cannot possibly suffer the indignity of being murdered, crucified, or dismembered.

2. *Teaching.*—Although the later Muhammadan tradition attributes the condemnation of Hallāj to his outrageous impiety, it is certain that political motives played a large part in the affair. He is described, in the oldest historical books that mention him, as an agent attached to the Shi'ite or Carmatian propaganda,¹ a reckless and unprincipled agitator who dabbled in alchemy and magic, and imposed on the vulgar by performing miracles which were only the tricks of a clever conjuror. Now, there seems to be no evidence that Hallāj was a Carmatian, but it was easy to pretend that he was. The doctrine of incarnation (*ḥulūl*) was held in common by some heretical Ṣūfī sects and by various branches of the extreme Shi'ites, and Hallāj might plausibly be represented as a Carmatian, since he is said to have called himself 'the Radiant Light,' and to have been addressed by his disciples in terms like these: 'We bear witness that thou art He who puts on a different form in every age, and in the present age hath assumed the form of Ḥusain ibn Maṣṣūr; and we implore thy blessing and hope for thy mercy, O knower of secrets!' (*al-Farq bain al-Firaq*, 248, 12). Moreover, in the first quarter of the 10th cent. the Carmatians almost succeeded in establishing a reign of terror; and Massignon suggests, with reason, that Ḥāmid, who had incurred much odium by his measures for controlling the importation of corn, may have sought to regain popularity and credit by pretending that Hallāj was one of their most dangerous missionaries, and making it appear that his conviction was a political triumph. Otherwise, it is at least doubtful whether the audacious dialectic with which he pursued his theological speculations, or the pantheism which he openly professed, would have cost him his life. Islām has always been tolerant to the excesses of mystical enthusiasm, and the plea of ecstasy has seldom been urged in vain.

According to the theory of Ṣūfī philosophy, *al-haqq*, 'the Real,' i.e. God regarded as pure being, is opposed to the phenomenal world, which exists only as a reflexion of pure being upon the darkness of matter or 'not-being.' Even the more orthodox mystics hold that union with God is attainable. They say that in 'passing away' (*fanā*) from his phenomenal self man necessarily becomes one with God, inasmuch as the Divine element in his nature is then free to rejoin its source. The theory, stated in this way, is not Hallājian, but Hallāj presents the same ideas in a symbolic form peculiar to himself.² While the Ṣūfis are generally careful

¹ The present writer is indebted to M. Massignon for the greater part of the following biographical notice as well as for other important facts, and desires gratefully to acknowledge the courtesy with which they have been communicated.

² According to some authorities, the epithet refers to his power of reading men's secret thoughts, while others say that it was bestowed on him because he once carded a large quantity of cotton in a miraculously short time.

¹ The definite statement that he was one of the missionaries of 'Alī al-Riḍā, the eighth Imām of the Shi'a (Browne, *Literary History of Persia*, i. 429), seems not to be justified by the original text (*Fihris*, 180, last line), which says that he carried on a propaganda in favour (*ridā*) of the 'Alids.

² Apparently, however, Hallāj did not regard the deified man as being devoid of personality and indistinguishable from the

to disavow the heretical notion that the Divine substance or spirit can enter into man, this doctrine of human transubstantiation (*ḥulūl*) was nevertheless adopted by some of them; and, since it was taught by Fāris, one of the chief disciples of Hallāj, we may conclude that it is implied in the famous formula, *Anā 'l-ḥaqq*, 'I am the Real.'

Such, however, is not the opinion that prevailed among the mystic theologians who flourished in the 4th and 5th centuries of the Muhammadan era. The majority of these men saw in Hallāj a genuine theosophist, exalted by mystical rapture or intoxication to a point where he believed himself to be united with the Divine essence; and in their eyes he was not guilty of anything worse than a momentary indiscretion. Others hesitated to condemn him outright and took refuge in an attitude of neutrality. Ghazālī, who at first adopted this course, afterwards declared that *Anā 'l-ḥaqq* is an expression belonging to the highest stage of Unitarianism. Those who deemed Hallāj an infidel usually qualified their condemnation by saying that, although he had violated the religious law, he had not been false to the inner truth of Islām; his offence was that he divulged the mystery of the Godhead, and on this account he deserved to die.

Hallāj is the founder of Muhammadan pantheism in the same sense as Ash'arī (*q.v.*) is the founder of Muslim scholasticism. The pantheistic movement did not commence with him; it had long been gathering force below the surface, and his words only gave the signal for its explosion. They revealed, as in a flash, what many had more or less consciously thought but few had yet dared to speak. Here, at last, was the plain truth uttered so simply and tersely that no one could mistake or forget it, and its effect was intensified by the dramatic spectacle of torture and vengeance inflicted upon the man who had proclaimed himself to be God. The later Sūfi writers, especially the mystical poets of Persia, celebrate Hallāj in glowing language as a hero and martyr whose passion for the Real caused him to lay down his life in order that he might gain the perfect union that results from self-extinction.

Hallāj left behind him a sect designated by his name, who professed the doctrine of *ḥulūl* and are reckoned among the heretics of Sūfism; and also a large number of mystical writings in prose and verse. The titles of forty-seven treatises by him are recorded in the *Fihrist* (p. 192), and this catalogue is not exhaustive. Only one of them has been preserved complete or nearly so—the *Kitāb al-Tawāsīn*, which Massignou has recently discovered in an Arabic MS of the British Museum (Add. 9692), together with a Persian commentary by Rūzbihān Baqlī (A.D. 1209), extant in two Constantinople MSS. The forthcoming edition of these texts will furnish materials for a detailed account of the mystical theories developed by Hallāj, and will open the way to a better understanding of his character and his influence upon the subsequent history of pantheism in Islām. For example, it appears from a passage in the above-mentioned work that the Yezidis—the so-called devil-worshippers—derived their peculiar veneration for Iblis from Hallāj and his school (Massignou, in *RHR*, June 1911). A considerable quantity of fragmentary compositions—sayings, letters, discourses, poems, etc.—some of which are undoubtedly authentic, have come down to us under his name. Two collections of poetry in Arabic and Persian are falsely attributed to him.

deity. The 'I' is not absorbed in, or confused with, 'the Real.' In this respect his doctrine is at variance with that of the Persian Sūfis in general (see Massignou's introduction to the *Kitāb al-Tawāsīn*, p. 20).

The latter, published at Bombay in 1887 and again in 1894, is a particularly gross forgery.

LITERATURE.—L. Massignou is preparing a special work, entitled *Bibliographie chronologique et critique d'al-Hallāj*. Only the most important notices in English and other European languages can be mentioned here: Ibn Khallikān, *tr. de Slahe*, Paris, 1843-71, i. 423; Hujwiri, *Kashf al-Mahjūb*, tr. Nicholson, London, 1910, p. 150; F. A. G. Tholuck, *Blüthen-sammlung aus der morgenländ. Mystik*, Berlin, 1826, pp. 311-326 (the life of Hallāj, tr. from Aḥmad's *Tadhkirat al-Auliya*); E. G. Browne, *A literary History of Persia*, London, 1902-06, i. 428-437; A. von Kremer, *Gesch. der herrschenden Ideen des Islams*, Leipzig, 1898, pp. 70-73; R. F. A. Dozy, *Essai sur l'histoire de l'islamisme*, tr. V. Chauvin, Leyden, 1879, pp. 324-335; L. Massignou, 'al-Hallāj,' in *RHR*, June 1911, also 'Anā 'l-Ḥaqq,' in *Der Islam*, 1912, pp. 248-257, *Kitāb al-Tawāsīn* (in the press) and *La Passion d'al-Hallāj* (in preparation).

REYNOLD A. NICHOLSON.

HALLUCINATION.—1. Definition.—A hallucination is generally defined as a false perception. It is generically that; but it is not the only species of false perception, and a closer characterization is therefore necessary. Psychologists draw a distinction between states of consciousness in which there is contained or involved a reference to an object in the so-called external series here and now existent, and a state of consciousness which, though in content otherwise generally similar to the other, does not carry this objective reference. The first is termed a percept or a presentation; the second is termed an image or representation. These psychical experiences form two series known as the presentational and the representational series respectively. This nomenclature indicates the dominant characteristics of each type of experience, though, of course, there are representational elements in the percept, and representations are based on perceptual experiences. Normally there is no confusion between the two. A hallucination is said to occur when a member of the second series is ascribed to the first—i.e. when an image is taken by the conscious subject for a percept. The one, he it noted, is, *qua* psychical event, as real an experience as the other. The 'fallacy' lies in the function which the conscious state in this case is made to perform or in the significance which is attached to it. It is made to report falsely about external reality. In this it partakes of the character of illusion (*q.v.*), and yet it may be distinguished from that kind of experience. Whether the distinction is merely one of degree is a question on which there has been much debate among psychologists. Esquirol¹ gave currency to the following distinction. In hallucination an experience which is purely subjective, or, speaking in terms of cerebral activity, is centrally initiated, is judged to have an objective correlative or to be peripherally initiated, whereas in illusion the starting-point is found in presentation; there is peripheral initiation—it is not, strictly speaking, a 'fallacy of the senses'—but the presentational factors are wrongly apperceived or interpreted. Hallucination, in short, takes place when we perceive an object which by the accepted tests of external reality must be finally judged to be non-existent; illusion takes place when we perceive the *wrong* object. This may be taken as a working mode of differentiation, though further investigation has led to the conviction that the line of demarcation is not so bold and well-defined as it is thus made to appear. There are a number of borderland cases which present difficulty, and which are sometimes to be found in the literature of the subject under the head of 'hallucination,' and sometimes under the head of 'illusion.' It certainly seems well-established that in numerous (some would say in all) cases classed as hallucination there is a sensory or presentational factor. In these cases, however, the sense element is so vague and unspecific that it would not normally form the

¹ *Des Maladies mentales*.

basis of a percept; it is the occasion rather than the ground of the false perception.

2. *Varieties.*—It is said, not quite accurately, that we may have hallucination of more than one sense. What is meant is that the content of the hallucination may be of one or other or of several of the modes of consciousness normally regarded as modes of sensation. In this sense the statement is correct. Thus we may see before us the figure of an absent friend or acquaintance or some grotesque and monstrous figure; the visual factor is predominant here, and it may be said at this point that 'visual' hallucinations bulk most largely in the records of the subject, whether they relate to the experiences of persons in a normal or abnormal condition. But we may also find hallucinations in which the auditory (the subject hears voices or definite sounds), touch, temperature, olfactory, kinaesthetic, and other modes are respectively predominant. This is well marked in the experiences of persons in the hypnotic state. Tell such a person that he has taken snuff and he sneezes; tell him he is standing on ice and he feels cold at once; 'he trembles, his teeth chatter, he wraps himself in his coat.'¹ If one sense only is involved, the hallucination is said to be *simple*; if several are involved, the hallucination is said to be *complex*.

There is a well-known experience particularly marked in the case of the person in the hypnotic state, or under the influence of post-hypnotic suggestion, known as *negative hallucination*. This is the case where the subject fails to perceive an existent object. He may only fail to see a person in the room, or he may be totally unaware of his presence, according to the character and scope of the given suggestion. The epithet 'negative,' though applicable enough from the point of view of the observer or observers of the case, is misleading as applied to the hallucinatory state itself. The hallucination is as positive as any other. The whole objective situation is apprehended by the subject as other than it is; or, if we limit the reference to that part of space in which the unperceived object or person is at any moment, then that part of space is falsely perceived; the background is continuous; there is not a gap in it; e.g., the back of the chair on which is seated the person whose absence is suggested will be seen, although, of course, it is not really visible.

Dreams (q.v.) are generally regarded as the most familiar type of hallucinatory experience. We seem in dreams to be the spectators of external objects and of series of external events which are sometimes so vivid as to cause a distinct feeling of relief or disappointment when we wake and find that these events do not fit into the normal external series. So careful an observer as McDougall,² however, finds a marked distinction between the features of a dream experience and the features of a hallucinatory experience. This is a direct challenge to more careful introspection. The present writer's observations go to confirm the view that dreams are pure hallucinatory states. The chief distinction seems to be that in the dream state the hallucination is more complete than usual. The impressiveness of the object is as marked and the emotional co-efficient at least as intensive as in experiences which are unquestioningly recognized as hallucinations. It is to be remarked that among these are the hallucinations of the half-awake state or the transition state between sleeping and waking. The line between these hypnagogic hallucinations and dreams is extremely difficult to draw.

Instances of so-called normal hallucination are to be found in what are termed *waking hallucinations*.

This form occurs in the experience of persons who may otherwise be regarded as in a normal waking state. There are many such cases reported by historians;¹ the anthropologist furnishes instances from his observations of primitive peoples;² current report furnishes a sufficiency of contemporary or comparatively recent cases. We are fortunate here, however, in not having to depend merely on such evidence. In 1889 the English Society for Psychical Research issued a questionnaire containing the following query: 'Have you ever, when believing yourself to be completely awake, had a vivid impression of seeing or being touched by a living being or inanimate object, or of hearing a voice; which impression, so far as you could discover, was not due to any external physical cause?' To this 17,000 replies were received, of which over 2000 stated that under the conditions indicated figures had been seen, or, less frequently, voices had been heard. Similar inquiries have been made in America by W. James, in France by L. Marillier, and in Germany by the Munich section of the *Gesellschaft für psychologische Forschung*, with a similar result. An attempt has been made by Parish, in an analysis of the evidence, to show that, while the subjects of these hallucinations no doubt believed, in all good faith, that they were fully awake at the time of the experience, they were really in the transition state between sleeping and waking. The evidence will not, however, bear this construction, though there are enough instances of a kind to make a *prima facie* case for it. The object of these inquiries has not been to establish the existence of waking hallucinations, but to obtain evidence on the vexed question of the possibility of directly intimating distant events by this means to a person who would have been unaware of these events through the ordinary and understood modes of communication. This is known as the question of *coincidental hallucinations*. The hypothesis has been advanced that there is a causal relation between such apparitions and the distant events to which they refer. The problem is one which lies beyond the scope of the present article. It is treated at length in *Phantasms of the Living* (E. Gurney, F. W. H. Myers, and F. Podmore, London, 1886). The available evidence shows a number of cases of coincidental hallucination markedly in excess of the number to be expected on the theory of probabilities; and this, so far, is favourable to the view that these occurrences are not merely fortuitous, but it is not sufficient in extent or quality to warrant a definite conclusion.

In addition to the above so-called 'waking hallucinations,' which are regarded as taking place when the subject is in his normal condition, there are hallucinations which occur either (a) in a state which at the time of the occurrence cannot be called normal, or (b) in a state which is permanently abnormal, as in the case of mental disease. As an instance of the first type may be mentioned the familiar hallucinatory experiences, already referred to, connected with those moments of our mental life when we are passing from the waking to the sleeping state, or from the sleeping to the waking state. At these moments there is a sudden irruption of an apparently irrelevant image or procession of images which have a vividness and impressiveness much superior to those of the image in the normal waking experience, and which are readily mistaken for percepts. Some of the experiences referred to as waking hallucinations, it will be found, really belong to this type. In extreme general fatigue or in fatigue of a particular sense organ, hallucinations readily occur. The exhausted traveller often passes into the hallucinatory state; prolonged

² Cf. Lang, *Making of Religion*, p. 113 ff.

fasting is a preparation for the state of hallucination. After protracted visual strain, 'visual' hallucinations often occur.

Intoxicants influence hallucination. The most familiar example is the hallucination accompanying alcoholic poisoning in the state known as *delirium tremens*. Intoxication by chloroform, nitrous oxide, hashish, opium, atropin, etc., are further instances. Hallucinations thus conditioned are mostly of an unpleasant and even terrifying character, though in certain cases, e.g. hashish intoxication, there is a pleasurable phase.

In other cases, conditions of a psychical character are predominant, as, e.g., in hypnotic trance and ecstasy. The results obtained by 'crystal-gazing' (*q.v.*) may also be included here. The general preliminary condition of these experiences is an intense concentration of the attention upon one point. Indeed, we may note the effect of concentration of attention upon hallucination before it reaches the stage indicated in any of the above-named experiences. A person eagerly listening for a knock or a footstep may have the hallucination of the sound he is awaiting. A 'ghost' may be seen by one who is aware he is in a haunted room, and who is consequently in a state of strained expectation. In the census of the Society for Psychical Research there are thirteen cases of hallucination which took the form of the appearance of a person whose arrival was looked for. *Collective* hallucinations, i.e. hallucinations of a particular kind experienced by more than one person at the same time and place, are, no doubt, explained by this factor. The hallucination first experienced by one member of the group may spread to the others by suggestion operating through the special direction and concentration of attention induced by the reported abnormal occurrence.

In *hypnosis* the process is carried further. The subject is in a highly suggestible state, and hallucination is easily produced either while he is actually in the hypnotic trance or subsequently, when the waking state supervenes, under the influence of suggestion made during the trance, i.e. of 'post-hypnotic' suggestion. The records of hypnotism (*q.v.*) teem with instances of both types.

In the extreme forms of *ecstasy* (*q.v.*) the distinction between the self and the not-self disappears, and with it the articulate content of the not-self, which on the psychical side is represented by percepts and images. There is one total, all-embracing, emotional state. There is, obviously, no room here for hallucination. But in the ecstatic experience, which may find its consummation in such a condition, there are moments in which hallucination, in the strict sense of the term, may be noted. The best-known cases of ecstasy are those of religious ecstasy, where the object of contemplation and desire is a religious one, though this state is not exclusively connected with objects of this type. Examples of hallucinatory religious ecstasy are to be found in the sacred books of many religions, in the records of lives of saints and mystics, and in the accounts of primitive peoples.

Gazing steadily at a shining surface—a metal mirror, oiled finger-nails, a blot of ink, a crystal—induces hallucination. The 'scryer,' or seer, perceives pictures of distant objects and events. This has been known to mankind in various parts of the world for many centuries. The antiquity of the practice as a method of divination is indicated by the fact that *Æschylus* attributes its discovery to Prometheus. Analogous to 'crystal vision' are the practices of inducing auditory hallucinations by holding a shell to the ear or by striking gently the rim of a bell. This is also used as a method of divination. The voices heard are oracular.

Hallucinations accompany *somatic disorder* or bodily disease. The delirium of fever is a familiar instance, and hallucination is associated with the state of collapse preceding death. The hallucinations accompanying acute alcoholic poisoning, already referred to, might also be brought into this category. An interesting type of this class is the 'visceral' hallucination noted by Head.¹ This observer states that patients suffering from visceral disease are liable to hallucinations of a peculiar kind, either visual, auditory, or olfactory. The visual hallucination, which is more characteristic, takes the form of a vague, shrouded, white, black, or grey human figure often incomplete. The auditory hallucinations are of sounds, such as tapping, scratching, and rumbling.

Coming between this type and the type connected with mental disease are the hallucinations of the *nervous diseases* such as hysteria (*q.v.*) and epilepsy. They are markedly present in the state known as 'the great hysteria,' at least in the third and fourth of the four phases indicated by Charcot.² In the aura preceding the epileptic attack and in the post-epileptic condition, hallucinations are frequent. They are very often of a distressing character.

In many forms of *mental disease* or insanity (*q.v.*), hallucination is a notable feature, more particularly in those cases where the mind falls into a state of mistiness or dreaminess; when there is a 'beclouding of the intellect.' Hallucination, according to Mendel,³ is often associated with amentia, but seldom with acute dementia. Paranoia, it is well known, is strongly hallucinatory. Persecuting and insulting voices and figures are seen by the victim of this painful malady. The hallucinations of insanity may be divided into those which are *sporadic* or *independent*, and those which are relatively *permanent*. The first, as the term indicates, are not in any known relation to the general morbid condition; the second are obviously related to, and are symptomatic of, this morbid state. Of the two the latter are regarded by psychiatrists as less serious, since they may be attacked through the disease, and may diminish or disappear with the amelioration of the general state of the patient.

3. *Causes.*—The central question for the theory of hallucination is this: What are the special subjective conditions under which a state of consciousness arises which bears the character of a sense-perception although the normal conditions are absent? The answers to this question take the shape of a general psycho-physiological formula. All such answers are conditioned by assumptions regarding the identity or non-identity of the ideational and sensory centres in the brain; and the theory of hallucination will not be in a wholly satisfactory state until the strife of hypotheses on this point is ended.

A prominent and obvious type of theory is that which is termed *centrifugal*. In the principal form of this view, which has been supported by Taine, Tamburini, Ferrier, Hoffmann, Griesinger, Kraft-Ebing, and many others, the hallucinatory state begins in the ideational centres. In an unusual state of excitability of an ideational centre the excitement overflows into a sensory centre. The excitement of the sensory centre is eccentrically projected, and a hallucination results. On this view the ideational and sensory centres are regarded as distinct and separate. Apart from this, which is called in question, there are various objections to the view as an explanatory hypothesis. It is pointed out that it overlooks the fact that an image,

¹ *Brain*, xlv. (1901) 350 ff.

² *Le Progrès médical*, 1878, no. 2, p. 88.

³ *Art. in Berl. klin. Wochenschr.* xxvi. (1889) and xxvii. (1890).

no matter how intense, remains distinct in quality from the weakest sensation. Again, the relative infrequency of voluntary hallucinations would be difficult to account for on this hypothesis.

Against this we have the view that hallucination is a *phenomenon of dissociation*. This view, which assumes the identity of ideational and sensory centres, assigns the difference between ideation and sense-perception to a difference of degree of excitement of the same cells. A centre not excited by external stimulation may act as though it were, if it is brought otherwise to a high degree of excitement. Under certain conditions, such, *e.g.*, as fatigue, the action of a drug, or of disease, this may be brought about by the isolation or 'splitting off' of particular centres through the obstruction of the association paths between them and other centres. There is an inflow of energy but no outflow; there is, therefore, an accumulation in the centre which cannot in the normal way be drained off to other centres; a high state of tension is produced, and, finally, there is an explosion such as would be produced by a stimulation coming from the periphery. The chief authorities for this view—which, though not without its difficulties, is, on the whole, the best suggestion forthcoming—are W. James, Kandinsky, Parish, and Münsterberg.

4. *Influence.*—The influence of the hallucinatory experience upon the life and beliefs of man in the early forms of civilization is amply attested. The distinction on which the term 'hallucination' is based implies an articulated concept of reality which is beyond the reach of the savage. Lang¹ quotes evidence for the awareness among the Australian tribes of the distinction between kinds of this experience, namely between dreams and 'waking' hallucinations, but that is another matter. The world of the savage will, therefore, contain objects, the source often of fear, which would be judged by a person of a more developed type of mind to be 'unreal,' or at least not objects in the normal or accepted sense. Taylor and others, with some show of probability, assign to the experience in dreams and waking hallucinations the prevalent belief in the savage mind of the actuality of spirits. Their world is peopled by such objects, for which, from their standpoint, they have as good and as direct evidence as for the objects of sense. In the dream state it is assumed that the spectacle of strange or remote objects and events thus furnished can occur only through the detachment of the soul from the body; the soul thus separated and projected during sleep is the witness of these things. An Australian tribe mentioned by Howitt, quoted by Lang,² holds that it is injudicious to fall asleep while out hunting, since the *murup* [wraith] of the sleeping man may be detached by the magic of his enemies. Waking hallucinations will reinforce this belief, since in these instances the wraith of other persons whose bodies are at a distance will appear to the subject.

In those cases where there is the figure of an individual known to be dead or afterwards ascertained to have been dead at the time of the appearance, there will be ground for the belief in the continued existence of the spirit after death. This basal idea of the separability of the soul makes easy such conceptions as that of demoniacal possession. This state is brought to an end by the capture of the strayed soul and its return to its proper dwelling by the medicine-man.

The growth of a special class of medicine-men, wizards, or priests in savage communities is clearly connected with hallucinatory experiences. Among some tribes the individual who is known as the subject of what are now termed 'waking hallucinations' is set apart as a wizard. This separation

and distinction are, of course, further confirmed when the selected individual is able, as Stoll fully shows he is, by the influence of his status, his personality, and his ritual, to induce by suggestion hallucinations in other individuals, or groups of individuals, *i.e.* when they witness portents and strange events through his influence.

Myth or legend, again, is associated with hallucination. It is not possible to establish as a generalization the suggestion that these legends originate in hallucinations; the same legend is found among very diverse and widely scattered peoples. It is, however, a hypothesis which is worth consideration when dealing with the origin of legends. What is clear is that myth is supported and nourished by hallucination.

ALEXANDER MAIR.

HAMADRYADS (Teutonic).¹—The various stages of religious development among the Teutonic peoples are exhibited in their rites and myths connected with trees. The ancient belief in a power residing in trees—a power that might be transferred to other creatures and to the earth itself—may still be traced in a wide variety of popular customs. Thus, in early summer—on May-day or at Pentecost—the May-bough is carried from the forest to the village by the young people, in the hope that it will endow them with fresh vital energy; at the end of harvest, the harvest-tree is erected upon the last waggon-load of corn, in order that the spirit of vegetation may pass into next year's crop; in spring, cattle, fields, young girls, and newly-wedded couples—the latter also on their marriage-day—are stroked with fresh twigs of sprouting trees, or with bushes of the so-called 'rood of life.' From the belief in the power dwelling in trees sprang also the worship of the *irmensul*—a huge tree-trunk standing erect under the open sky—among the Saxons (Mannhardt, *Baumkultus*, p. 303 ff.), the worship of the evergreen trees that stood before the temple of the gods in Old Upsala (Adam of Bremen, *Hist. eccl. Hammab.* iv. 26, schol. 134), the Norse myth of Yggdrasil, the world-ash, and the Eddic myth which tells that *Ask* and *Embla*, the ash and the ivy (*Voluspá*, 17–18), were the first men.

Then at an early period imagination proceeded to associate trees, and to people forests with demonic beings. These assume for the most part a female, but sometimes a male, form. Popular fancy ran riot among them, unwrapping them in myths of the most varied kinds, and even to-day they are met with in their primitive freshness among all the Teutonic peoples. In O.H.G. they appear as *skrato*, in A.S. as *vūdælfr*, in M.H.G. as *holzmuoza*, *holzrāna*, or *waldmīnne*. In the popular belief of the present day they are known as wood- or moss-maidens, forest-nymphs, wild-folk, *Fanggen* (Tyrol), blessed maidens, *Norgen* (Graubünden), *Ellepige*, *Skogsnufova* (Dan. 'fairy-maidens', 'wood-nymphs'), *Skogsrå*, *Skogsfru* (Swed. 'forest-woman'), and by many other names; when they assume a male form, they are known

¹ For the beliefs of other peoples on the same subject, see TREES AND PLANTS.

¹ *Op. cit.* p. 49.

² *Ib.* p. 118.

as 'wild men,' 'wood-mannikins,' or *Skogsman* (Swed. 'forest-men'). They live in the woods—either underground or in trees, especially hollow ones—and are often encountered there by human beings. In outward appearance they usually resemble old women; their bodies are hairy, and covered with moss; they have, in common with field-spirits, the characteristic feature of long, pendulous breasts. Their faces are old and wrinkled; and sometimes their backs are concave, like the hollowed-out trunk of a tree. Here and there, however, and especially in the Tyrol, they are found as graceful figures with beautiful flowing hair. As males, their form approximates rather to that of the giants; they are abnormally large and strong; they have bristly hair, and are armed with tree-trunks. Occasionally they are endowed with the protean nature, and may avail themselves thereof to appear as animals.

Their attitude towards human beings is sometimes friendly, sometimes hostile. Their appearance presages a fruitful year. They put the hunter on the track of his quarry, and accordingly he seeks to win their favour. But they often fascinate the traveller with their trilling songs and their laughter, wiling him from the right way, and leading him astray. They occasionally unite in marriage with human beings, or engage to serve them, and in such cases bring good luck to the house so long as they stay in it. As denizens of the forest they possess a knowledge of medicinal plants, and make use of them to give health and strength to their favourites; thus, in the Balder saga, the food from which Balder drew his great strength was guarded by *virgines silvestres* (Saxo Gram. iii. 77). They make special appeal to human beings for succour when they are pursued by the Wild Hunter. At such times violent whirlwinds arise, shaking the trees and pressing the branches far down. If the hamadryad is not rescued, but falls into the hands of the Wild Hunter, he lays her crosswise upon his steed. If she is delivered from his power by a human being, she rewards the latter with foliage which turns to gold. Dwarf-myths have also been grafted upon the hamadryads. The latter, like the dwarfs, sometimes substitute their own offspring for human children.

It is very doubtful whether these tree- and forest-spirits were also objects of worship, i.e. whether the milk that was poured out, and the berries that were laid down, at the roots of trees were intended for them. It is much more likely that these gifts were offered to the souls of the departed, which were supposed to survive in trees. In point of fact, trees were regarded by all the Teutons as the abodes, not only of demonic spirits, but also of souls, and as such were treated with the utmost veneration—a practice constantly inveighed against in the penitential discourses and ordinances, as well as in the legal codes, of the early Christian period. We find it said in numerous legends that the souls of the departed pass into trees, or continue to live in the trees that grow upon graves. The extent to which a materialistic conception prevailed here is shown by the widely diffused belief that trees bleed when their bark is injured. Such ideas explain the severe penalties inflicted upon those who committed offences against trees. The act of peeling off the bark was specially forbidden, as the souls were supposed to dwell just beneath it. One found guilty of the offence, according to the *Weistümer* (i.e. abstracts of special usages forming precedents in ancient German law), had his body cut open, and his intestines wound about the tree in such a way as to cover the injured part (J. Grimm, *Deutsche Rechtsaltertümer*, Leipzig, 1899, ii. 39). The spirits who lived under the bark could both impart disease and take it

away. Hence sick persons were drawn through a hollow trunk, or else the malady was driven into the tree—i.e., a hole was made in the latter, and some of the invalid's hair or pieces of his clothing inserted into it, the cavity being then closed up again. Departed souls frequently take the form of a bird (owl, pigeon, owl) sitting upon the tree within which they have their abode. It was also believed that the soul of the family-ancestor had passed into the tree growing in or before the homestead, and this tree accordingly became associated with the tutelary spirit of the family, i.e. the domestic spirit. According to Norwegian belief, the *fylgja* (on which see *ERE* iv. 633*), the protective spirit of the individual, had its home in a tree. In Sweden, even at the present day, an elm or lime-tree growing in front of the homestead is often regarded as the *vårdträd* ('ward-tree'), the abode of the domestic spirit, and from this tree not a leaf must be plucked, or the smallest splinter cut. Pregnant women resorted to it, and hoped by embracing it to secure an easy delivery. As the dwelling-place of the guardian spirit it was known also as the *boträd* ('abode-tree'). Sacrifices and prayers were offered beside such trees with a view to propitiating the tutelary spirits, and warding off evil from man and beast.

The origin of the tutelary spirit—the fact that it was at first the soul of an ancestor—was gradually forgotten, and its place taken by another soul-like being, the guardian spirit of the house, the Norwegian *tomtegubbe* (cf. 'Robin Goodfellow'), the German *Hauskobold* (cf. 'brownie'), who lives either in the trunk of the tree or in the root beneath, and who guards the dwelling-house against injury by fire. If a tree which thus harbours a domestic spirit is hewn down, prosperity deserts the house, and the person who did the deed is taken ill. Some of the old tales represent the tutelary or domestic spirit as dying with the tree; according to others, it remains in the fallen trunk, comes into the house along with the latter, and continues to reside in the rafters made from it; and, if the required offerings (food and milk) are given to it, it continues to guard the house as before. To this class of tree-spirits—tutelary demons evolved from soul-like entities—belongs also the *Klabautermann* (see DEMONS AND SPIRITS [Teut.], vol. iv. p. 633*), of the Baltic and North Sea coasts. He is a tree-spirit who has been brought into the ship in the mast. Here he continues to reside, helping the sailors in their work, and protecting the vessel. But, should the ship be destined to go down, he deserts it. He, too, receives gifts of food and milk.

HAMILTON.—See PHILOSOPHY (Scottish).

HAMITES AND EAST AFRICA.—The classification of the eastern Hamitic peoples is a matter of much controversy. There is a large body of tribes concerning whom, except on some trifling points, there is complete agreement between the various sciences and scientists; outside this sphere there is a want of harmony between anthropology and philology, and between the various philological schools. The common stock may be said to consist of two main groups: the Egyptian Bejas (although notable philologists incline to connect Egyptian rather with the Semitic languages), and the southern or Ethiopic group (Agaos, Sidama, Low Cushites [including Galla, Somali, and 'Afar-Saho]). With these anthropology connects other peoples or import-

ant groups of peoples, as the Nuba, the Funji, the Masai, and the Wahuma, of whom some at least speak languages undoubtedly non-Hamitic. One school of philology, of which the most illustrious representative is Reinisch, limits the true eastern Hamites to the peoples of the two great groups just named, but connects with them two other peoples dwelling between the one group and the other, viz. the Baria and the Kunama, who, although they do not speak a purely Hamitic tongue, employ languages—called by this school proto-Cushite—which seem to approach the Hamitic type, and represent, as it were, a link of connexion between the Hamitic and Nilotic tongues. Another school, of which the most recent and active champion is Meinhof, places the Baria and the Kunama among the peoples speaking the so-called Sudanese, and consequently non-Hamitic, languages; on the other hand, this school includes among the Hamites the Bari dwelling on the White Nile, and the Masai of British East Africa and of German East Africa. It is easy to understand why here, as elsewhere, even for historical reasons, anthropology and philology are not in agreement. Further, while we recognize the importance of the doubts raised concerning the character of the Kunama tongue and the importance of the analogies of the Masai language with the Hamitic tongues, this is not the place to discuss the differences between the philological schools. The following notes refer especially to those peoples whose Hamitic character is generally admitted, with brief references to the two proto-Cushite peoples.

1. The Bejas represent one of the greatest ethnical factors along the middle course of the Nile. According to some anthropologists, they were among the principal elements which went to form the ancient Egyptian people. Many of their tribes and parts of tribes are doubtless concealed under the unidentified names of the conquests of the Pharaohs to the south of Egypt. Their primitive seats appear to have been the desert regions of eastern Nubia. Towards the beginning of the common era they seem to have undergone a powerful movement of expansion or of migration, determined, it may be, by the influx of the Nuba and of other populations of the south-west into the regions of the kingdom of Meroë, of whose inhabitants they must have formed a conspicuous part. This movement drove towards the Egyptian frontier some fractions of tribes, such as the Blemmyes, who were the subjects of fantastic stories and of terror on account of their ferocious incursions; on the other hand, other tribes moved towards Abyssinia. The kings of Aksum were often occupied by the incursions of the Bejas or by expeditions against the Bejas, so much so that among their other titles they assumed that of 'kings of the Bejas.' In course of time the Bejas seem to have gained the upper hand, at least for a time, in the regions of northern Abyssinia. It is certain that among the peoples of the Abyssinian highlands we find some speaking the Tigriña tongue and observing the customs of the other Abyssinians, and who boast a Beja origin, as the Fedrer in Akkele-Guzay, and the Dekk Itäes of Seraë. There was much rivalry between the Beja element and the Abyssinian stock in the valley of the Barka, in Eritrean Sahel, and on the mountains traversed by the river Anseba in the last part of its course; sometimes the one, sometimes the other, ethnic factor prevailed. Thus there were formed mixed populations, although fractions of races are to be met with who are purely Beja and speak a Beja dialect, as far as the foot of the mountains of Abyssinia proper, such as the ad-Sala dwelling near the outflow of the river

Barka from the mountains of Liban on the plain below.

Meanwhile in the northern regions the Arabs, who had succeeded the Byzantines in their rule over Egypt, must often have come into contact with the restless nomads of the south and their forays. Numerous military expeditions were the consequence, and also numerous treaties, the most ancient of which does not seem to have been very favourable to the Arabs, whose governor Ubaid Allāh ibn Hiyāl as-Salūl undertook to furnish the Bejas with three hundred young camels, provided they would respect the borders of Egypt and the lives and goods of the Musalmāns. As a matter of fact, it was possible to guarantee the safety of Egypt only when several Arab tribes went and established themselves in Nubia, thus paralyzing the warlike inclinations of the local elements, or when these tribes began to pass over to Islamism. In the 8th and 9th centuries the Bejas formed a sort of independent principality, whose ruler, resident in al-Hajr in the southern part of their territory, acted in the name of all the tribes of his race dwelling between Egypt and Abyssinia. From Arab sources we learn the name of one of these, who already in the year 216 A.H. (A.D. 831) seems purely Islāmītic—Qanūn 'Abd al-'Aziz.

In the days of the historian 'Abd-Allāh ibn Ahmad ben Sulaim al-Uswāni, who in the 10th cent. wrote a history of Nubia, this union of tribes had ceased, and the tribes had autonomous heads. Among these the ruler of the Balaw, whose seat was at Suakin, deserves mention. The Balaw principality lasted until the end of the 17th cent., when a family of Ja'aliyin, favoured by the Funji, seized the command of the country. Nevertheless the Balaw have continued to constitute a kind of aristocracy down to the present day.

A long time before the historian 'Abd-Allāh al-Uswāni, a great internal revolution had taken place among the Bejas. The place of the Sanafej tribe in the hegemony of the race had been taken by the Hedāreb tribe, to whom ancient Arab writers assign as their territory the Beja country from the Egyptian border as far as Alaky, Aidhab, and beyond. It is worthy of note that even to-day the Abyssinians call both the language and the tribe of the Bejas *Hedāreb*.

Even in ancient times the Bejas must have crossed the Nile, settling nuclei of populations on the left of the river. Among the most important of those derived from them are the Beni Kahil or Kawahla, who, however, in their various inter-crossings have ended by adopting the language and customs of the Sudanese Arabs, although they do not consider themselves to be Arabs. Their principal groups are on the Rahad and the Dinder, but some are also found on the Athara, on the Blue Nile, and at el-Atshan on the White Nile. Important portions passed into Kordofan, where for a long time they remained mingled with the Kabābish. In fact, the Atawia sections of the Kabābish, the Waylia sections of the Hamar, and the Tuwaimāt sections of the Aulad Bika Jawāma'a still belong to them; a Kawahla colony has even settled at Werna in the mountains of southern Kordofan.

The principal divisions of the Bejas now are: (1) the Ababdeh, between the Nile and the Red Sea to the south of Wadi Hamamat up to the tropic; (2) the Bishari, to the south of the last towards the territory of Suakin; (3) the Hadendāwa, between Suakin and Kassala; (4) the Halenga, in the territory of Kassala; (5) the Beni Amer, who consist of numbers of the Bejas mixed with others of Abyssinian origin, in the valley of the Barka.

The Bejas have a language of their own, which was formerly studied by Munzinger, and afterwards more perfectly by Almkvist and Reinisch.

The Bejas were always essentially nomads and a pastoral people. A few of them devoted themselves to agriculture; many were camel-drivers. They never had any high degree of civilization, although the *Kitāb al-Fihrist* ascribes a special alphabet to them—perhaps a confusion with that of the Ethiopians or of the distant Berbers. In regard to religion, according to Arab authors, paganism seems to have been dominant for a long time among the tribes furthest removed from Egypt. Mas'ūdī asserts that in his day they still venerated an idol. The tribes nearer to Egypt came under its religious influence. The Blemmyes, who had adopted the ancient Egyptian divinities, were among the most obstinate and latest supporters of them. Later, both from the north and from the kingdom of Aksum, Christianity found its way into their midst. Al-Hamadhānī reports the word employed by the Bejas, or at least by a part of them, to designate 'God,' and this appears to have been a corruption of the *egzi'abeher* of the Abyssinian Christians. But, setting aside the Beja populations which are assimilated with the Abyssinians of the Eritrean highlands, Christianity has disappeared from among them. Islām, whether from the northern frontier of Egypt or from Aīdhāb and Suakin, is now their only religion.

2. The Agaos, whom scientists call 'High Cushite' or simply 'Cushite,' represent the most ancient populations of Abyssinia in the narrowest meaning of the word. Originally they inhabited the highlands which to-day form Tigrē, Beghemder, Dembea, Gojam, Agaumed, Damot, and Amhara. Later on they fell under the influence of the Semites, who came from southern Arabia; and this influence became stronger when the kings of Aksum were compelled to take action, no longer, as in the first centuries of the common era, to the north of the Abyssinian mountains, but in the wild countries to the south of their capital. The modern Abyssinian is the result of crossings between the Semites of southern Arabia and the local Hamitic peoples, among whom the Agaos had the chief place. In these inter-crossings the Semitic language at length prevailed, while from an ethical and anthropological point of view the Hamitic element obtained the victory. In short, there took place in Abyssinia something analogous to what happened in Egypt after the Musalmān conquest, where the Arabic language extinguished the Coptic, though the *fellaḥ* of our days preserves the same type as the inhabitant of Egypt in the days of the Pharaohs.

The Agao race still remains more or less pure in various districts of Abyssinia. In those regions they have preserved the use of their own dialects, which they employ in familiar intercourse, while in conversing with strangers they use the dominant Semitic tongue of the country, viz. the Tigrē, or the Tigrīna, or the Amharic.

The Agao dialects or languages may be divided into four groups: (1) the central group, represented by the Khamir, spoken in Lasta (Socota, Uag, etc.), and the Khamta, spoken in some districts of southern Tigrē (Averghelle, Bora, Seloa); (2) the northern group, spoken by small tribes called Bogos or Bilin, who dwell in the territory of Keren, near the river Anseba (Eritrea); (3) the western group, represented by the Quara, which, spoken in the district of the same name to the west of Lake Tsana, was afterwards, owing to religious reasons, diffused throughout Dembea; by the Khamant, spoken by a special population scattered in the villages of the Chelga, of the Armatschaho, of the Janfaḡara, of the Wagara, and of the Quolla Wagara, as far as Wehni and the north-west frontiers of Abyssinia proper; and, as it seems, by at least another dialect also, spoken in the Falasha villages of Dembea and Wagara; (4) the south-western group, constituted by the Awiya dialect, which is spoken in Agaumed, and by the dialect of Damot, which exists in the province of the same name. From a more general point of view, the Agao languages can be divided into two great categories in regard to both grammar and vocabulary: to the first might be assigned the central, northern, and western groups; to the second there would only remain the south-western group. It is worthy of note that two special denom-

nations of the Agaos seem to agree with this great division: those of the centre call themselves Kham (whence the adjectives *khamir* and *khamta*); and there are traces of this name among those of the north and west; those of the south-west call themselves Awā, Awāwā. The Agao languages are known principally through the publications of Reinisch and Conti Rossini.

The Agaos appear in written documents of the first centuries of the Christian era, whether under the name Agao or under that of Kham; some have even thought of connecting with them the *ḡamaḡā* λέξ, which, according to Agatharchides, was spoken by the Troglodytes of Ethiopia. Thanks to the power of Aksum, they were able to extend their territory to the highlands of Eritrea. Cosmas Indicopleustes, in the 6th cent., speaks of a prince of the Agaos, who appears to have been a vassal of the king of Aksum, and who aided the caravans which went to the gold countries. In the 10th cent., Abyssinia was devastated by the invasion of a queen who came from the south. On that occasion many of the Agaos fled from the centre of Abyssinia and from southern Tigrē, in order to find a way of escape to the north of the river Mareb. The Bilin seem to have been the last representatives of this migration. In the 13th cent. the regal power passed to an Agao family called the Zaguē; this family was originally from the district of Beguenā (Lasta), and had its capital in Roha, whose famous monolithic churches are, as a matter of fact, ascribed by Abyssinian tradition to a king Zaguē. Several of these kings, as Lalibala and Na'akueto La'ab, figure among the saints of the Abyssinian Church. Towards the year 1288 the Zaguē dynasty was overthrown by another dynasty of 'semitized' origin, which had its capital in Amhara. This is the so-called Solomonide dynasty, because it claims as its founder Menilek, the son of the queen of Sheba and king Solomon; and the present kings of Abyssinia affirm that they too belong to this dynasty. This change of dynasty gave rise to a new movement of Agao peoples towards the north. The Adkemē Melḡa of Seraē and the Zaguā of Liban are the chief representatives of this fresh migration, and in course of time they adopted the Tigrīna languages. The Solomonides extended their conquests over the Agaos of the west and south-west, who up till then had remained independent: at the beginning of the 14th cent. Damot was conquered; about a century after, Wagara was firmly occupied; in the 16th cent. Dembea was definitely taken possession of; and in the 17th cent. Agaumed was annexed. Semēn, a formidable mountain region, offered a fierce resistance; but the Agao element ended by being almost entirely destroyed.

Little is known of the ancient Agao religion. Their chief god was the sky (Deban or Jar). Under him were many genii—some malignant, like the *zar*, and some beneficent. The latter dwelt in springs, trees, and mountain-tops, and were there venerated. A special worship was rendered to certain genii of the springs, as, for instance, to that of the source of the Blue Nile. Homage was paid to certain animals, especially the serpent, from which omens were sought. For defence against evil spirits and to obtain the assistance of good spirits, the intervention was permitted of special individuals in whom were recognized exceptional faculties and powers. The priesthood was hereditary from father to son. Life continued after death, and food was offered to the dead.

To-day, Agao paganism is no longer professed, and the Agaos are either Christians, Jews, or Khamants. Of the Agao Christians it is not necessary to speak; but it seems certain that many usages of the Christians of Abyssinia, and even the style of their subterranean churches,

have been inherited from the ancient pre-Christian religion. The Jews of Abyssinia are Agao by race, and are called Falashas. Their origin is very uncertain. At first it was held that they were connected with colonies of Jews of southern Arabia, whom the kings of Aksum were supposed to have forcibly transported into Africa after the conquest of Yemen (6th cent. A.D.), and to have settled in exile on the mountains of Semēn. Now the hypothesis seems to be preferred that Judaism came into Abyssinia by land from Egypt. The Falashas do not know Hebrew, and they have not the Targum; they have adopted the Bible of the Christians of Ethiopia, and also their alphabet, their literary language, and almost all their books. But, although without originality, they have shown an indomitable attachment to their religion. Cf. ABYSSINIA, AGAOS.

3. The peoples conventionally called Sidama represent a great mixture of differing ethnic elements; and this explains the immense variety of classification met with among travellers, according to the prevalence of this or that physical characteristic. It may be, however, that a better knowledge of the anthropological elements and of the languages of these populations will bring about a modification of the classification which is at present accepted by scientists.

The territory of the so-called Sidama seems originally to have embraced the southern part of Abyssinia, properly so called (at least the western province of Shoa), and to have extended southwards to within a short distance of the great equatorial lakes; to the east it extended towards the Welhi; on the west it occupied the high valleys of the rivers Sobat and Didessa and of the other affluents of the White Nile; to the north-west it crossed the Blue Nile (which separated it for a considerable part of its course from Gojam and Damot), and reached as far as the west of Agau-medet. The very position of this country shows that it must have been a battle-ground between the Hamites of the north and east and the Sudanese of the west—battles of which, for the most part, we know nothing. The Abyssinians—Semites or 'semitized'—early established themselves in the regions to the north, and absorbed the local tribes; the Gurāgué, who speak very corrupt Semitic dialects, seem to be descendants of a north Abyssinian military colony, which had been placed to guard the southern confines of the kingdom, and which in the course of centuries had become amalgamated with the peoples of the country. Thence the Abyssinians endeavoured to extend their territory still further south by conquests and raids; but the forming of Sidama States, whose chief sought a defence in Islāmism, kept them back, or at least hindered the populations of the valley of the river Omo from being absorbed. Towards the middle of the 16th cent. the Galla tribes, dwelling to the east of the so-called Sidama, began their migrations and invasions, which were, for Ethiopia, more violent, and had more lasting consequences, than the barbarian invasions of Europe. All the eastern part, all the north and north-west of the Sidama territory, became Galla territory; to the Sidama little more remained than the valley of the Omo.

To-day, as far as is known, the Sidama may be divided, philologically speaking, into four principal groups: (1) Kaffa an Goaga; (2) Hadia and Tambaro; (3) Dawaro and Walamo or Walaita; and (4) Zenjero, Yangaro, or Yamma. The Kaffa has been studied by Reinisch and, without any critical aim, by Chiarini and Bieber; as regards the other idioms, we have only the imperfect, or not as yet scientifically examined, materials of Beke, Chiarini, Cecchi, Borelli, etc.

The Abyssinian conquests of the 16th cent. introduced Christianity among the Kaffa; and thence faith in the Messiah seems to have penetrated even

among the Shūro, negroid tribes to the south-west of the Kaffa. But the long isolation of those regions from Abyssinia caused great alteration in the adopted religion. Some results have been achieved by Catholic missions during the last fifty years. The recent Abyssinian conquest is destined to revive the condition of the Coptic Church there, unless Islāmism gains the upper hand. Islāmism had appeared among the Sidama of the Hadia in the 14th cent., but for centuries it made no progress; it has, however, been making rapid advance during the last fifty years. The old paganism is losing ground. Two types of paganism appear to be recognizable among the Sidama. It is not at present possible to say if the second represents a derivation from the first. The first type is met with among the Kaffa and the Ometi (Conta, Cuisha, Kullu, Sale, Uba, Gofa, Mallo). The supreme deity is Hecco, called also Deoco or Deotshe. Hecco is invisible, but is incarnate in his priests and in the king of the Kaffa; those who are incarnate in Hecco become Hecco themselves. Among the Kaffa, the priests belong to the aristocratic class of the Gongga, whence also is derived the royal family. There are twelve high priests among the Kaffa, and over all one high priest residing formerly in Addio near the village of Gollo, now in Coba. This high priest consecrates the newly elected king, and receives annual tribute also from the Ometi, or inhabitants of the valley of the Omo, who are not politically dependent on the Kaffa. Worship is paid in a temple in a wood. The priest, falling into a kind of trance, announces to the faithful the will of the god. The priest is naturally also the sorcerer who cures sicknesses, delivers from the effects of the evil eye, etc. Under Hecco there are tutelary genii of different places, who live in springs, rivers, cross-roads, and great trees. The priests may not eat the flesh of the ox. All, however, regard as prohibited, because unclean, the flesh of the horse, ass, mule, wild boar, hippopotamus, and monkey; men abstain from eating cabbages, and women from eating fowls. Their beliefs about the other world seem to have been largely influenced by Christianity; but at the same time it is still possible to discern in their various rites and ceremonies the remains of primitive beliefs—e.g. that death is succeeded by a life like the present. Thus, when a king died, his servants brought him his customary food every day for a year; it is also said (but this is not certain) that at the time of his burial a slave was killed, in order that he might continue to serve his sovereign. Among the Zenjero, religion had a specially ferocious and brutal character. The supreme god seems to be the sun; further, the Zenjero alone among all the peoples of Ethiopia have (or had) an idol of iron rudely formed, which, they say, fell from heaven. They venerate numerous genii in the mountains, rivers, and rocks. The king was supposed to be an incarnation of the supreme solar divinity, and was the chief of the priests and sorcerers of his realm. It was his duty to deal the first blow to the human victims who, at the beginning of ten out of the twelve months of the year, were immolated on the summit of Mount Bor-Gudda; these victims were chosen from twenty-two families of the country. Other human sacrifices were offered on other occasions. Out of every ten strangers who crossed the frontiers of the kingdom, one had to be sacrificed to the divinity. Naturally, the Abyssinian conquest, which took place in the year 1887, put an end to these practices.

According to Borelli, the chief divisions of the Sidama, based on their languages and on their political groupings before the Abyssinian conquest, are the following: (1) Kaffa; (2) the ancient kingdom of Garo on the south and east slopes of the mountains of May-Gudda; (3) Zenjero; (4) Kullu, Dauro, or

Dawaro between the river Omo and the Contab; (5) the kingdom of Contab between the river Gojeb, the Kullu, the Kaffa, and the river Omo; (6) the kingdom of Cosh between the Kaffa, the Contab, the river Omo and the Gola; (7) Gola between the Cosh, the plains of Yaya, and the Kaffa—to the east of the Omo; (8) Corbo near the Zenjero; (9) Contab between the Corbo and the stream Gamuna; (10) Maroko, a kind of 'enclave' in the Hadia; (11) Hadia, scattered between the Omo and the Amzulla as far as the borders of the Galla Arussi; (12) Tambaro, bordering on the Walamo; (13) Walamo or Walaita between the Tambaro, the stream Billat, Lake Margherita, the Cusha, and the river Omo; (14) the kingdom of Cutsha to the south of the Walamo; (15) the kingdom of Gofa to the south of the Cutsha and the river Omo; (16) Malo between the Omo, the Gofa, the Doco, and the Arra; (17) Doco (negroid Sidama) between the Omo, the Dimé, the mountains of the Arra, and the Malo; (18) Dimé between the plains of Yaya and the Omo—outside the valley of the Omo; (19) the Cambatta to the west of the river Billat and of the Arussi, between the Alaba, the Hadia, and the Walamo; (20) Arroro or Haruro, on an island of Lake Margherita; (21) the kingdom of Boroda, to the south-west of Lake Margherita; (22) Chochora in an 'enclave' of the Cutsha; (23) Gamo between the Arussi, the Cutsha, and the Zalla; (24) Zalla, to the west of the Gamo; (25) Uba, to the west of the Zalla; (26) Anica, to the south of the Uba; (27) Arra, to the west of the Uba.

4. The group which, from the nature of its situation, in contradistinction to the mountainous regions of the Agaos, is called Low Cushite, is composed of three great branches: Galla, Somali, and Afar-Saho. Their original seat seems to have been between the upper course of the Webi and the African coast of the gulf of Aden. Already in ancient times we find that the country between the strait of Bab el-Mandeb and Cape Hafun was inhabited by a people called Berbers, in whom we have no hesitation in recognizing the progenitors of the Somali people of to-day. How far they advanced into the interior is unknown; but it is very probable that from the most remote times the desert region, extending from the sea to the mountains of Abyssinia, belonged to tribes of this stock. In course of time, Low Cushite tribes spread not only towards the west, but also towards the north. These tribes, developing special characteristics, and vaguely recognizing a blood relationship among themselves, gave place to the 'Afar or Dankali. 'Afar is a national name; Dankali is an Abyssinian name, whence comes the Arabic plural *Danākil*. It is noteworthy that the 'Afar are divided into 'Adoi Mara, 'white people,' and Asoi Mara, 'red people,' the latter forming a hegemony with the former; when and why this distinction arose is unknown.

(a) The 'Afar, establishing themselves in the oasis of Aussa, in the valleys descending from the Ifat and from the other eastern districts of the Shoa (if, indeed, they did not formerly occupy the eastern margin of the latter), must have formed the principal part of that kingdom of Adal which caused so much trouble to Christian Abyssinia in the 13th, 14th, 15th, and 16th centuries. Some portions of their tribes still call themselves Adiel. With these the Somali tribes of the north combined; but in the times of the *imām* Aḥmad ibn Ibrāhīm, called the Ghāzi (Grazn among the Abyssinians), who almost entirely destroyed Ethiopian Christianity, the invading Musalmān armies were still largely composed of the 'Afar. The 'Afar spread as far as the peninsula of Buri and the gulf of Adulis.

They are now divided into a number of small tribes, scattered over a very unfavourable territory, which consists principally of stony or sandy deserts, traversed by great lava streams. When the old Adal kingdom fell, and deep hatred grew up between the Dankali and the Somali, the chief 'Afar authority fell into the hands of the Sultan of the Aussa, who for some time had a certain measure of effective power, and till very recent times a considerable moral prestige among all the tribes of his race. Other sultanates, of only secondary rank, are those of the Biru, of Raheita, and of Tajura. The northern tribes, however, Dahimela, Belesua, etc., with chiefs of their own, came under the hegemony of the Abyssinian chiefs of Tigré or of the Musalmān chiefs who held Arkico and Massawa for Turkey. The 'Afar language is known through the studies of Reinisch and Colliza.

Ancient 'Afar tribes gradually spread further

northwards, where they gave rise to the Saho tribes.

It is possible to-day to recognize five Saho groups: (1) the Miniferi, who dwell between Senafé and Arafali, and seem to be a cross between Saho people and the Abyssinian garrisons who had been placed to guard the country against Saho-Afar invasions; (2) the Haseo, dwelling to the south of these last as far as the river Ragali or Endeli and the torrent Laal-ghehé, and their brethren, the Toroa, who wander with their flocks and herds in the valleys of the Hadia, the Alighedé, the Saaghedé, on the south-eastern declivities of the Hamasén, in Sanhar; (3) the Assorta in the district between the maritime region of the Adulis (Zula) and the Abyssinian highlands, to the south of the Toroa, to the north of the Miniferi; (4) the Debrimela, two very small tribes dwelling in the region of Mount Debra to the east of the Senafé; and (5) the Irob, to the north-east of Agamé. But besides these tribes, who speak the Saho tongue, which is closely allied to the 'Afar language, the Saho gave rise to not a few other populations, who, mixing in course of time with local peoples of other races, adopted their customs and language entirely. The dominant class of the Mensa and Maria tribes, the former dwelling to the north of the river Laba and the latter on the lower course of the river Anseba, are of Saho origin, as also are the Egghelá of Tigré, the Soruxo of Agamé, the Temza of Seraé, several villages of Seraé, etc. It is also said that the Wojerat to the south-west of Tigré are of Saho origin, of the same stock as the Debrimela. The Saho language is known chiefly through the studies of Reinisch.

(b) The *Somali*, or their direct progenitors, as has been said, were in ancient times known as Berbera, Barbara (Berbers [g.v.]), and are so called by Arab geographers of the Middle Ages. The name *Sumālē* appears for the first time in documents of the beginning of the 15th century. The most ancient sources show the Somali maritime region as being defined to the west by the *Sinus Aualiticus* (Gulf of Tajura), and to the east by the mart of Tabe (*ras Binna*), commencing with Opone (Hafun), and the marcs of the Azania and the Zenz of Arabic writers. But the Somali broke forth from these confines towards the south, crushing and absorbing the aboriginal populations of other races. This movement seems to have become more intense when the Somali passed over to Islamism. It is said that towards the 14th cent. the Somali tribe Hawiya, called that of the Ajuran, succeeded in becoming masters of the territory between the lower courses of the Webi and the Juba; in that century the Arab geographer and traveller Ibn Baṭṭūta speaks of Mogadishu (Magdāshu) as a city in Somali territory which was founded by fugitives of the al-Harith tribe in the neighbourhood of Bahrein. To-day the Somali are one of the most widely diffused Hamitic peoples. Broadly speaking, the whole of the great triangle, Jibuti, Cape Guardafui, and the mouth of the Juba, may be considered as their country; but their ramifications seem to go even further towards the south-west.

According to Gabriel Ferrand, the principal Somali tribes are: (1) the Isa, between Jibuti, Khor Oulargarit, and Ghildessa, with the ports of Jibuti and Zeila; (2) the Gadabursi, in a mountainous quadrilateral lying N.N.E.-S.S.W., traversed diagonally by the 41° long., and having its extreme angles at about 10° 40' lat. towards the N.W. and at 9° 30' towards the S.E.; (3) the Habr Awal to the east of the last, with the ports of Dungereita, Bulhar, Berbera, and Siyara; (4) the Habr Toljale, between Adal Oorda on the sea, Burao, the mountains Burclab, Muyo, and the mountains of the Gulai; (5) the Habr Gheraf (Gaa, Gaj) or Galla, who together with the Habr Awal and the Habr Toljale are also called Habr Magdolé; (6) the Warsangheli, between Gudneida on the sea, the mountains Gargar, the Tug Daror, and the port of Bender Ziyadé; (7) the Dulbohante, to the south of the Warsangheli, to the east of the Habr Toljale, to the north of the Ograden, and to the west of the Mijurtin, with the high valley of the Wadi Nogal and with the village of Bohotle; (8) the Merrahin, an important sultanate which extends from Bender Ziyadé on the gulf of Aden to beyond Ras el-Khail on the Indian Ocean; (9) the Gherri, to the S.S.E. of Harar; (10) the Bartirri to the east of the latter; (11) the Barsub, towards the source of the river Fafan; (12) the Bahilli, to the west of the Bartirri and the Barsub and the Galla frontier; (13) the Habescul, to the east of the Gherri and the Barsub; (14) the Mirawawá and the Mecabul in Ograden; (15) the Hawiya, to the south of the Mijurtin, in all the zone towards the Indian Ocean, divided, like the former, into numerous tribes, among which may be named the Harti, the Abgal, the Bimal, the Shidile; and (16) the Bahaunin, who perhaps are not of Somali race, although they speak the Somali language, between the Webi Shebell, the Ograden, the Galla, the river Tana, and the mouth of the Juba. The Somali language has been the subject

of numerous publications. The most important are those of Reinisch; there may also be mentioned those of E. de Larajasse, Cyprien de Sampaont, Schleicher, Jahn, etc.

(c) The Galla seem to have dwelt in ancient times to the S.E. of the river Webi. Unknown reasons caused their formidable invasions of the Sidama countries and of Abyssinia in the middle of the 16th century. They were at that time herdsmen; they were ignorant of the use of metals, so much so, that, according to tradition, they made use of the horns of cattle for swords; they did not possess the horse, although in the course of time they became the best horsemen of Ethiopia. Having scattered or subjugated all the Sidama people of the north-east and north, they succeeded in pushing themselves into the western districts, and even settled between the higher courses of the Baro and the Didessa. They also planted themselves in Abyssinia proper, not only in the southern districts of the Shoa, but also to the north of the river Jimma as far as Lake Ilayk and the frontiers of the province of Angot. Enrolled as pretorian guards by the kings of Abyssinia, they founded military colonies here and there, of which that of Metsha in Gojam is important. Thanks to the beauty and fruitfulness of their women, in the 18th cent. they attained the highest political influence in the kingdom. One of their women practically governed the State towards the middle of that century, and sons of their women ascended the throne. To a less degree the Galla also spread towards the south; their extreme limits are met with at a distance of a few days' journey from Lake Rudolf, and the influence of their speech may be traced in the language of the Pokomo, south of the equator and to the north-west of Lamo. By reason of all these movements from place to place, and through the inevitable crossings with the populations already existing in the lands newly occupied, the Galla ethnical type was profoundly altered. While, on the one hand, some of their tribes do not differ in appearance from the true Abyssinians, others, on the contrary, have all, or almost all, the characteristics of negroid populations.

The changes in their social and family habits are equally profound. Thus, formerly they had no tribal heads, but nominated a kind of leader called *lubā*, who remained at his post seven years. Later on, wars and contact with peoples living under a monarchy brought about the development of the principle of monarchy, or at least placed that of a republic on more solid foundations. About the second half of the 18th and the beginning of the 19th cent. there grew up in the regions to the south-west of the Shoa (Ghera, Jimma, etc.) little Galla monarchies, having characteristics of their own.

The Galla call themselves by the national name Ilmorra, or 'sons of Orma,' whence the name Oromo or Oroma, under which they are also known. Their chief division is into Baraituma and Boran.

The most important Baraituma tribes are the Karaya, Wollo, Obo, Marawā, Warailū, Itu, Akatshu, and Warantisha; the most important of the Boran are the Metsha, Hocco, Obo, Gudru, Liban, Ilu, Soddō, Galan, Tuloma, Sadatela, Limmu, Lega, etc. From a geographical point of view we may mention the Boran, who occupy a vast extent of territory, the southern part of the Galla country, between the region of Lake Stephanie and the river Juba; the Arussi to the north of the preceding border of the Somali of Ogaden and the Sidama; the Ala to the south of Harar; the Iru, Iru-Chercher, Oborra, Metta, and Wara-Bellé, between the Shoa and the Harar; the Abitshu, the Gombitshu, and the Galan to the west of Ankober; the Metsha and the Metta to the west of Entoto; the Betsho, the Keku, the Ilu, the Soddō along the upper course of the Hawash; the Nonno near the extreme northern curve of Ghibibé, to the north of the Enarya; the Jilli between the Hawash and the Lake Zwai; the Limmu in the Enarya; the Jimma Abba Jifar to the south of the Limmu; the Ghera to the west of the last; the Metsha on the western slopes of the Ghesha mountains, the Iru Nonno and the Guma between the high valleys of the Baro and the Didessa; the Jimma Hine, between the

Didessa and the Nonno; other Jimma peoples to the north of the Nonno; the Gudru near the extreme southern curve of the Blue Nile; the Wollo, in the heart of Abyssinia, between the river Jema and the upper course of the river Bashilo; the Yeju, near the Angot. The Galla tongue is known through the investigations of Pratorius and from the materials collected by Tutschek, Massaja, Cecchi, and others.

The Somali, the 'Afar, and the Saho have been converted to Islāmism, although not a few pagan practices corrupt the purity of their Musalmān faith. Part of the Galla have passed over to Christianity; but Islām is making rapid progress among them. Several tribes still remain pagan. Their supreme divinity is Wāq, who dwells in the sky above the clouds. Under him are good spirits (*ajāna*) and evil spirits (*jinni, sar*); the latter are 44 in number. The spirits possess some of the powers of the omnipotent, which they are credited with employing. A number of these genii have special names and functions; e.g., Atôte, a female spirit, presides over the multiplication of men and animals, and is in a certain sense the genius of fecundity. As a rule, the spirits are incorporeal, but at times they assume forms more or less strange; for example—at least among the Galla of Challa, Ghera, etc.—an evil spirit is believed in, having the body of a cock, with four horns on its head, and with a baleful look which causes the death in a few days of him who has been gazed upon. They have no idols. Every tribe, every family, every house, and every man has a tutelary genius. Genii dwell in rivers, great trees, ruins, and certain caverns, and are there venerated. Some species of serpents and of birds are likewise objects of veneration. The Galla do not practise human sacrifice. Divination by means of the peritoneum of immolated victims is very common—a usage which among Ethiopian populations seems to be of purely Galla origin. They have many superstitions, several of which are common to other Ethiopian peoples, as, for example, that of *buda*, a malignant man who transforms himself by night into a hyena, exercises the power of the evil eye, etc. There are numerous classes of priests, diviners, and sorcerers. The Galla believe in life after death; but it is a vague belief, reflecting Christian and Musalmān ideas. Further, their religion, if it has succeeded in causing Shoa Christians to adopt its belief in its *qolo*, or house-protecting genii, has, on the other hand, largely accepted beliefs, rites, and beings who are objects of veneration in other religions. This it has done in regard to Islāmism and Christianity; from the latter it has even adopted some saints, the Virgin Mary, and a few churches—e.g. that of Zequalā. In the same way, it has taken from the Sidama religion the genius *datshe*, etc.

5. The Baria seem to be the last remains of a people at one time widely diffused but now on the road to extinction. If the hypotheses of the present writer are well founded, this people came from the highlands of Eritrea, and perhaps from the maritime region of the Red Sea, as far as the Nile over against Meroë. Their territory was more and more narrowed by the spread of other populations, as the Bejas, Nuba, etc. Reduced to a few thousands, they are to-day collected in the by no means hospitable region to the south-west of the Barka, which is traversed by the torrent Mogareb, dividing them into two groups. That to the west of the torrent is called Mogareb, that to the east Haghir. They, however, call themselves Néré. Their customs have a strongly democratic character. Their language, which has been studied by Reinisch, seems, even in its grammatical forms, to have undergone Semitic influence, while their vocabulary is still tolerably pure. Pagans, like the Kunama, until half a century ago, they are now all Musalmāns.

6. The Kunama appear to be the remains of a people variously named (Bazah, Hamej), which extended from the western outposts of the Eritrean highlands (Dembelas) as far as the river Atbara at Metemma in the territory of Fazogl, almost as far as the Blue Nile. Other isolated portions of this people are found here and there. Somewhat recent events have brought about their almost entire destruction in the countries bordering upon Abyssinia; the more distant tribes are gradually undergoing change by contact with other peoples. Chiefly of Kunama origin are the Algheden, who speak the Tigré language, between the Baria and Kassala territories; and perhaps of the same origin are the Dabaina, a tribe in the Atbara territory which many assert to be Arabian. The Kunama are almost all collected in the middle valley of Gash and in part of the valley of Tak-kazé, which together form the south-west part of Eritrea. They are divided into many small tribes: Tica (Sogodas, Aneli, Ogonna, etc.), Tolé, Anagullé, Cullucé, Fodé, Bitama, Elit, Eimasa, Selest Logodat, Tawda, Goita, Alummu, Ghega, etc. They are at a very rudimentary stage of civilization, although they are tolerably perfect in agriculture. Their customs and laws are very democratic, and are based upon universal equality. They are, for the most part, ruled by the advice of the old men, and they hardly recognize any effective authority of chiefs. They have no idols. Their god is called Anna. Religious offices are handed down from father to son in certain families, as those of the Aula Manna, who have the duty of causing rain at suitable seasons; the Ula Manna, who keep the locusts at a distance from the Kunama country; and the Furda Manna, who indicate the time for beginning the ingathering of the grain, indiarubber, and honey. The first two offices carry with them the pain of death if the charms turn out ineffective. But the religious practices of the Kunama consist in manifestations of a gross superstition rather than in the worship of Anna. The Kunama language, which differs much from the Baria tongue, has been described by Reinisch.

HANBAL.—See IBN HANBAL.

HAND.—1. Introduction.—The hand, as that member of the body which is used more than any other for all actions, whether ordinary, magical, or religious, became naturally a symbol of power. The hand of a certain being means the power exerted by him. Thus, to take a few instances at random, in Semitic usage an attack by a ghost on a human being is called 'the hand of the ghost.'¹ In the Scottish Highlands, invocation of 'the hand of your father and grandfather' means invocation of their power.² In Biblical usage, and perhaps thence passing into general speech, 'the hand' is a common phrase for power, God's or man's (Ex 3²⁰); and it occurs in innumerable connexions. Similarly the phrase 'God's hand' in the Qur'an is taken to mean His power, though the Wahhābis interpret it literally.³ In Christian art down to the 12th cent. a hand issuing from the clouds—frequently in the gesture of benediction, or with rays proceeding from it—is a symbol of God the Father.⁴ But already in ancient Egypt this symbolism is found as early as 1500 B.C., when the sun, the Divine symbol, is depicted with numerous rays, each terminating in an open hand.⁵ It is also found in the Rigveda. The god Savitar is said to extend 'his vast hand . . . and all here obey him.'⁶ No doubt, in the primitive anthropomorphic thought of all ages, the 'hand of God' was regarded with literal significance. Thus the saying, 'the souls of the righteous are in the hand of God' (Wis 3¹), is represented symbolically, yet with clear anthropomorphic reference, as a large hand emerging from the clouds and holding a number of tiny human figures (souls), even in a late Greek fresco.

As a rule, the right hand is considered of more importance than the left, and it is usually mentioned before it in ceremonies affecting both hands, probably because it is used for many more purposes than the left, which is therefore more awkward. Hence many savages reserve the left hand strictly for the lower purposes of life.⁷ In South Africa a man must not touch his wife in bed with his right hand, else he will have no strength in war.⁸ Many Arabs will not allow the left hand to touch food, because it is used for unclean purposes, the right for all honourable purposes.⁹ In many magical rites there is a preference for the use of the right hand, because it is more powerful; but not infrequently the unlucky left hand is used, perhaps with a view to increasing the sinister force of the magical action.¹⁰ In religious actions the right hand is the more important. Thus the Egyptians anointed the statues of the gods with the little finger of the right hand, and it has been commonly used by most peoples in salutations, blessings, lay-

ing on of hands, etc. (cf. Gn 48¹⁴).¹ In divination the Greeks regarded the right as the lucky hand, but the Romans mainly thought the left to be so. But with them the east was the favourable side, and, always facing south in taking omens, they had the east on the left hand.² They did, however, frequently regard left as unlucky, as is obvious from the secondary meanings of *sinister* and *dexter*.³ The preference for the right hand is perhaps connected with the apparent course of the sun from east to west, and the consequent idea that a sun-wise course, keeping the object always on the right hand, is of good omen and the opposite is evil.⁴

It still remains to be discovered why among all races, savage and civilized, the right hand is generally used. Left-handedness occurs sporadically (3.8% in the German army), and some people are ambidextrous. Some scripts run from right to left, or from each side alternately. There is no obvious physiological and psychical reason for the preference, and in fact most young children use the left hand until trained to use the right.⁵

Since the hand signifies power, gods and heroes are frequently represented with several arms. This is most common in Hindu mythology and religious art; it is also found among the ancient Slavs; and, though the Greeks were too artistic to make much use of what is a deformity, traces of it exist on Greek soil. A Lacedaemonian Apollo has four hands, Briareus had a hundred arms,⁶ Geryon six hands. Teutonic gods do not share this deformity, but it is often attributed to giants and heroes.⁷ The deformity of six fingers on each hand is probably also regarded as a symbol of strength (cf. 2 S 21²⁰). Conversely, some gods are one-handed—Tyr in Norse mythology, Nuada in Irish.⁸

The idea of the power of the hand is perhaps also shown in various myths of birth from the hand, etc. Persephone was called *Χειρογόνια*, Prithu sprang from the hand of Vena, and from the arms of the primal man Purusa the Rājagya were formed.⁹ Human hands as well as feet and heads are stuck up in fields in Lhota Naga, N.E. India, to ensure a good crop,¹⁰ and also in Luzon.¹¹ In the Lupericalia, women who wished to become fruitful received blows on the palms of their hands from the Luperici,¹² and in Quiche and Annamese myth or *Märchen* spitting into a woman's hand causes conception.¹³

In the speech of all lands, metaphors sometimes drawn from the gestures accompanying the actions thus described are in common use. 'Open-handedness' signifies generosity (cf. Dt 16¹¹); 'narrow-fistedness', 'miggardliness'; 'high-handedness', arbitrariness. 'To take one's life in one's hand' is suggested by the carrying of something precious through danger; it is of common occurrence in the Bible (Jg 12³, 1 S 19³, Job 13¹⁴; cf. Ps 110¹⁰).

2. The sacredness of the hand in itself or for particular purposes is seen in various ways. The ancient Hindu sacred books point out that each part (*tirtha*) of the hand is sacred; e.g., the root of the thumb is sacred to Brahmā, that of the little finger to Kṛṣṇa (or to Prajapati), the tips of the fingers to the gods, and the part between the thumb and the index to the *Pitri*; and directions are given regarding the ritual sipping of water from the hand.¹⁴ In modern Hinduism the various parts of the hand are sacred to different forms of Viṣṇu, and in the *Kara-nyāsa* ceremony homage is offered to the thumbs, fingers, palms, and backs

of hands. The parts of the body sacred to other gods are touched with the sacred fingers—an act gratifying to the deities.¹

The Teutons had similar ideas, for the space between the thumb and forefinger was called *Woedenspanne*, while the thumb was sacred.² The index finger was used by the Romans and other peoples as that by which the gods and people were saluted with a kiss or otherwise; hence, perhaps, it was called *salutaris digitus*.³ The touching of a fetish with the forefinger by a chief is found among some African tribes.⁴ Jews touch the *m'zūzah* with the forefinger on entering the house or leaving it. In the ritual of the Church various rites are performed with the thumb—e.g. anointing and signing with the Cross in baptism. In later Jewish belief each of the fingers of God's right hand has a special function.⁵ For the universal use of the hand, especially the right hand, in ordeals of water or fire, see ORDEALS.

The custom of wearing jewels on the hand (e.g. in rings), though now mainly decorative, probably arose out of magical reasons. The jewels were amulets by which the hand would be protected. Occasionally, amulets are bound about the hand or wrist.⁶ For similar reasons, or in order to sanctify the hands of certain persons, they are sometimes anointed. This ceremony is found in early Gallican ordinals—bishops, priests, and sometimes deacons having their hands thus consecrated; and this is still continued in the Roman Catholic Church.⁷ Where tattooing is practised, the hands are sometimes tattooed; and this, while it may have some other purpose now, doubtless was once regarded as a magical protective.

Tattooing the hands with special marks is practised by the Eskimos⁸ and by modern Egyptian women, both Muhamadan and Christian, the latter using the cross symbol.⁹ These marks often have a religious significance among the Arabs.¹⁰ This is an old Semitic custom—marking the name or sign of a god on the hand, either as a token of being his or as a protective (cf. Is 44⁵ 49¹⁶, Rev 13¹⁶ 20⁴; cf. also HEAD, § 7 f.). Among the Zuni, part of the ceremony of initiation into the *Kotikili* consists in touching the hands with certain *sacra* and asperging them with flour.¹¹ The Ewe touch the hands five times with pieces of the first-fruits of the yams at the yam custom.¹²

It is perhaps this idea of the sacredness of the hand which has made kissing the hand of a person a token of respect, as, e.g., among the Arabs and other Orientals, Tongans, and in modern European custom.¹³ Kissing the hands of images of the gods was an act of worship, and kissing one's own hand to a person or to a divinity has doubtless the same signification of respect or worship (see § 6 (a), (b)).¹⁴

Hand-like marks on rocks, walls, etc., are often regarded as the impression of the hand of a giant, the devil, or some other mythical being. Thunderbolts are called *Teufelsfinger* in Germany; and many plants, because of the form of their leaves, flowers, roots, etc., are called 'God's hand,' 'Mary's hand,' 'devil's hand,' and the like.¹⁵

3. Laying on of hands.—As the hand is the principal organ of touch, contact with it is often regarded as an important means of transmitting the qualities or powers inherent in the person who

touches another, just as the mere lifting up of the hand over a person in blessing causes a *rapport*, even without actual contact. The well-known emotional or psychic states often produced by touch doubtless suggested the value of this more ritual use.

Conversely, it is through the hand that contact with sacred objects is often effected. The ancient Arabs on entering or leaving the house caressed the domestic god with the hand,¹ just as Jews touch the *mazzah* with the finger. Similarly sacred stones, etc., were stroked with the hand, sometimes previously dipped in blood or oil (cf. the primitive meaning of 'anoint,' *māz*, viz. 'to smear with the hand'). Suppliants touch or stroke the beard or garment of a superior, and at the procession of the *Mahmal* the crowd press forward to touch it with their hands.²

The hand is usually laid upon the head, because it is the noblest part of man, and because, as a possible spirit entry, power of a spiritual or magical kind would pass into it from the hand (see HEAD). Some examples from the lower culture may be given first. In Melanesia, where men are believed to possess more or less *mana*, one who possesses much of it will sometimes lay his hand on a boy's head to transmit some of it to him.³ In Samoa the priest laid his hand on and stroked the painful part of a patient's body, and recovery was supposed to follow.⁴ Touching for the cure of sickness is also used by the Dayaks.⁵ At the election of a king in Uganda the prince who is touched by the hand of the 'Keeper of the Princes' at once becomes king.⁶

Turning now to the higher races: among the Hindus, at the initiation of a Brāhman, his union with his teacher is identified with a marriage, and is symbolized by the teacher's hand being placed on the boy's shoulder.⁷ In Babylonia, healing or exorcizing was effected by laying the hand on the head of the sick man.⁸ In Egypt the blessing of the gods was supposed to be conveyed to a newly crowned king by their laying their hands on him, thus conferring the gift of a long life and a glorious reign. This is often depicted on the monuments.⁹ What was probably a usual practice in healing is also reflected in the myth of Isis, who laid her hands on a dead child and uttered spells, so that he lived.¹⁰ Teutonic legend and myth speak of the gods hallowing and blessing by laying on of hands.¹¹ Among the Arabs a holy person conveys a blessing by the touch of his hand, and healing certain sicknesses is also performed in the same way by the shaiikh.¹² In Tibet the Grand Lama at the ceremony of reception imparts his powers to people of high rank by laying his hands on their heads; inferior laymen have a cloth interposed between his hand and their heads; the lower classes are touched by a tassel which he holds in his hand.¹³

Among the Hebrews the custom of laying on of hands had various purposes. In the case of the scapegoat the hands of the priest were laid on it in order to transfer to it the guilt of sin (Lv 16²¹). The same rite was used with other sacrificial victims, and here the intention probably was to identify the offerer with the victim by physical contact (Ex 29^{10, 19}, Lv 1⁴ 3² 4² 8², Nu 8¹²). A similar custom belonged to the Egyptians.¹⁴ The same idea of identifying is seen in the laying on of

the hands of the congregation upon the Levites (Nu 8¹⁰). It is also the act accompanying words of blessing (Gn 48¹⁴), and it is used to transmit an office or to ordain. Moses thus ordains Joshua and puts some of his honour upon him (Nu 27^{18, 20}), and he is full of the spirit of wisdom because of this rite (Dt 34⁹). This rite of ordination (*smikhah*) was also used at the appointment of members of the Sanhedrin, but was discontinued, perhaps because it had become a Christian usage.¹ Laying on of hands for the purpose of healing was probably also in use, as Mk 5²³ 7³² ('lay thy hands on her,' 'they beseech him to lay his hand upon him') and Ac 9¹⁷ (Ananias lays his hands on the blind Saul) suggest. The waving of the prophet's hands over the affected place was expected by Naaman (2 K 5¹¹). The practice was used by Christ (Mk 8²³, Lk 4⁴⁰) and the Apostles and others (Ac 9^{12, 17} 28⁸, cf. Mk 16¹⁸) in healing.

The expression 'fill their hand' in reference to consecration to the priesthood (Ex 28⁴¹) has received various interpretations, but it probably is metaphorical, signifying installation to office (cf. Jg 17⁸; and a similar Assyrian phrase, *katā muliā*, 'to fill the hand,' 'to install into office').

Used by Christ in benediction (Mk 10¹⁶; cf. Lk 24⁴⁰ 'lifted up his hands, and blessed them'), the laying on of hands for purposes of blessing has always been continued in the Christian Church, though the hands are often merely uplifted, as in benediction of a number of persons (§ 6 (c)). But for two other important rites the laying on of hands is used—Confirmation and Ordination. In Ac 8^{14, 19}, after baptism and prayer for the reception of the Holy Spirit, the Apostles lay their hands upon the baptized, who then receive the Holy Ghost—a spiritual unction—and also speak with tongues and prophesy. This, the rite of Confirmation, is probably the 'laying on of hands' referred to in He 6². It became a necessary part of Christian initiation; but, being connected with anointing, its place tended to be taken by the latter in some Churches (on this see CONFIRMATION). In the Churches of the Anglican Communion the laying on of hands is retained, and there is no anointing. Here also, as in the Roman Catholic Church, the bishop administers Confirmation. In the Eastern Churches it is often delegated to a priest, the oil being consecrated by the bishop. In the early Roman baptismal ritual the exorcism which preceded the ceremony was accompanied by laying on of hands by the exorcist and then by the priest on successive days.³

The special grace (*χάρισμα*) in ordination was also conferred by laying on of hands (Ac 6⁶ [the seven deacons], 1 Ti 4¹⁴ [the *πρεσβύτεροι* assist], 2 Ti 1⁶). Similarly St. Paul and St. Barnabas are 'separated' to their office by laying on of hands (Ac 13³). This practice became, therefore, a necessary part of the rite in all branches of the Church. At the consecration of bishops, bishops alone may lay on their hands, who must be not fewer than three in number—a rule dating from at least the 4th cent.—save where the Pope consecrates, though consecration by one bishop has occasionally been allowed. At the ordination of priests, the bishop lays on his hands, with the priests present. According to the *Syr. Didasc.* iv., a priest lays on hands, but does not ordain (*χειροθερεῖ, ὁ χειροτονεῖ*). The bishop alone performs the rite of ordaining deacons. The imposition constitutes the matter of the sacrament of Ordination, but since the 9th cent. the Roman Church has added the *traditio instrumentorum*.⁴ Laying on of hands is also used in benedictions, visitation of the sick, absolution,

and, in earlier times and in the Eastern Church still, at the unction in baptism.

4. The hand in healing rites.—Some of the instances in the preceding section have shown that the touch or stroke of the hand is an important factor in the healing of disease. Laying on the hand, touching, stroking, rubbing, and massage are all used in savage and barbaric medicine (see DISEASE AND MEDICINE). The power of the hand is wide-spread in European folk-belief, but it is only certain persons who are thus gifted—e.g. a seventh son or the seventh son of a seventh son. But—doubtless as a result of the power ascribed to medicine-men and priests, or to chiefs and kings, who often had powerful magic—monarchs or petty sovereigns, even within recent times, have been thought to possess healing in the touch of their hand (see FAITH-HEALING, KING'S EVIL).

5. The hand in magic.—(a) The hand, as the chief member of the body used in magical rites, is of great importance. It is that with which powerful amulets or wonder-working objects are held. Thus a Bab. spell runs:

'The circle of Ea is in my hand,
The tamarisk, the powerful weapon of Anu,
In my hand I hold,
The date-spathe, mighty in decision,
In my hand I hold.'¹

By the touch of a sorcerer or witch, even by pointing the hand or finger, much harm can be done through contact real or imaginary, as, conversely, the touch or pointing of one who wishes well or who is lucky works good. 'After me may a lucky finger be pointed,' are words occurring in another Bab. spell.² Hence certain gestures of the hand or fingers are all-important in magic, whether for good or evil purposes, and perhaps this is reflected in the story of Moses' uplifted hands at the battle with Amalek (Ex 17¹¹). The wave or the lifting up of the magician's hand can effect wonders. The uttering of spells is accompanied by various twistings of the fingers.³ Clasping the hands may retard or stop some action; unclasping them causes it to be resumed.⁴ Or, again, articles with which magical rites are performed or divination is exercised must be held only by certain fingers. But it is mainly as a protective against the evil eye that the hand (or certain gestures made by it) is all-important. Of these the most common is the *mano cornuta*, in which the index and little fingers are extended to imitate horns, the others being bent over and clasped by the thumb. The hand is usually pointed towards the person who is feared. This gesture is both ancient and wide-spread in its use. It is represented in early Christian art as a gesture of the hand symbolizing the Deity.⁵ This figure thus combines the power of the hand with the magical virtues attributed to horns (*q.v.*). The hand clenched, with the thumb pointing downwards between the first and second fingers, the *mano in fico*, is another common gesture against the evil eye, as also of contempt or insult. It is not improbably a phallic gesture, the phallus being a powerful amulet against the evil eye. (See EVIL EYE.)

(b) A hand, usually with fingers extended, is often found on houses, temples, and buildings of all kinds, especially on or above the door, to avert the evil eye or other witchcraft, or to prevent the entrance of malicious beings. It is painted, or the impression of a hand dipped in blood is made on the surface. The range of this custom is very wide; it is found in ancient Babylon, Phœnicia,

Carthage, Egypt, Japan, and India, and is practised in the East by Jews and Muslims, while it is also found in Italy (see DOOR, vol. iv. p. 850* and *reff. there*).¹ The ancient Hebrews set up memorials apparently bearing the name 'hand' (1 S 15¹², Is 56⁶ RVm). Probably they bore the impress of a hand, as did Phœnician votive stelæ, dedicated to Taanith and Baal-Hammon, and the purpose of the hand may have been apotropaic. The hand also occurs on some article of dress. Thus it is figured on the robe of a Mandan chief,² and a red hand was also borne by dancers at the sacred dances among the Dakotas, Winnebagoes, etc.³

For the same reason hand-shaped amulets, representing a variety of gestures, or holding some other protective, or covered with symbols, are in wide use against the power of the evil eye. They were probably worn in pre-historic times, and they are known to have been used by the Phœnicians, Greeks, Etruscans, and Romans, and in ancient Crete, as they are now in India, Austria, Italy, Spain, Portugal, etc.⁴

(c) The hands of the dead have also great importance in magic. There was a well-known custom of cutting off the hands, or right hand, or fingers of slain enemies and bringing them home as witnesses of the numbers slain or as trophies.⁵ This was done by the Egyptians⁶, the Hebrews (2 S 4¹², 2 Mac 15²⁰), and the Teutons,⁷ and was extremely common among the American Indians.⁸ The right hands of living prisoners⁹ or their thumbs (Jg 16⁴) were also cut off, the object being to spoil their prowess for ever. In the case of maiming the dead there may have been a similar idea of maiming their ghosts, since, where mutilation is a punishment, it is sometimes dreaded for its effects in the Other-world. At the same time, as a result of the well-known belief that the part influences the whole, or that any part of the human body gives the possessor of it power over the spirit, the mutilation may also have served this purpose, as in the case of cutting off the head (see HEAD). This would account for the fact that the American Indians held a dance round the trophies, and it is suggested by the fact that the Khonds hung up hands of enemies on trees in the villages.¹⁰ But it is also seen more explicitly in the custom of wearing the hands or fingers as medicine among the American Indians.¹¹ The same practice might be used in the case of any dead person, especially a relative or friend, for some specific purpose, the power of the dead still acting through the relic. Thus in West Africa a common component of the fetish-bag is a human hand; or finger nails or clippings are carefully preserved in memory of dead relatives, and are thought to be very efficacious.¹² The preservation of fingers and nails as relics is found in New Caledonia and other parts of Melanesia.¹³ In Mexico a common amulet favoured by warriors was the middle finger of the left hand of a woman dying in child-birth. (Such women had the same

future abode as warriors.¹) The dead hand as a healing charm is also referred to by Pliny.²

Muhammadan women in Egypt wore the dried finger of a Jew or Christian as a cure for ague.³ In European folk-custom similar usages are found. In Italy three joints of the ring-finger of an assassin are reduced to powder, mixed with a liquid, and sprinkled on the road between a lover's house and his sweetheart's, in order to bring back her affections.⁴ In Ireland the hand of a dead man stolen from a churchyard gives the thief power to abstract butter from his neighbours as long as he keeps it in his house.⁵ The hand of an unbaptized infant disinterred in the name of the devil is also a powerful charm.⁶ The left hand of a dead man dipped in the milk-pail causes the production of very rich cream. Both in Ireland and in Cornwall there was a belief that the touch of a dead hand healed certain maladies.⁷ In Germany the possession of the hand or thumb of a thief was believed to give its owner great magic power. A hanged man's finger hung in the beer-cask caused the beer to sell fast.⁸ Witches were also commonly believed to make their magic salve or powder from the fingers of disinterred children.⁹ These modern survivals are probably based on the earlier animistic beliefs regarding the relics of the dead referred to above. An interesting aspect of them is found in the so-called 'Hand of Glory,' or *Diebskerze*. In the Middle Ages the dried finger or thumb of a newly-born child, anointed with grease and ignited, was believed to make a thief invisible, and to cause a profound sleep to fall upon all in the house which he entered. The mere laying of such a finger on a table caused them to continue in sleep while the thief went on with his nefarious work. In the 17th cent. thieves sometimes murdered pregnant women in order to obtain the unborn child's finger. The hand or finger of a dead unbaptized child had a like efficacy.¹⁰ A similar superstition regarding the use of the left hand and arm of a woman who had died in her first childbed obtained in Mexico.¹¹ The dried and pickled hand of a dead man, especially of a criminal, anointed with unguent and ignited, or a dead hand in which a candle made of human fat was placed, had similar magical powers; but, if any one remained awake in the house, the thumb could not be ignited.¹² On this superstition a number of folk-tales have been founded.¹³ It should be observed, however, that other objects have the same properties and are so used among other peoples.¹⁴

Where the dead are eaten for magical purposes, their hands are supposed to strengthen those of the eater (Dayaks¹⁵; Australians¹⁶); and in New Caledonia they were bit-bits reserved for the priests.¹⁷ Among the Mangeromas, an Amazon tribe, the palms of the hands are a special delicacy.¹⁸

(d) Magical omens are often drawn from the hands, especially from their itching. In the West Highlands, if the right hand itches, money will be re-

ceived; if the left, money will be given away. An itching right palm means blessing from a stranger, while an itching in the left hand signifies that one will receive a gift of money.¹ In Germany and Norway it was thought that, if the right hand itched, you would part with money; if the left, you would receive it.² In Cairo it is thought that, if the right hand itches, luck will follow; but, if the left hand, ill-luck.³ Similarly the negroes of Jamaica believe that, if the right hand itches, you will get money; if the left, you will spend it.⁴ Other omens may be illustrated by the following examples:

It is a Jewish belief that any one who, on the night of Hoshana Rabbah, in trying to read his fortune from his shadow, does not see his right hand, will lose a son during the year. If he does not see his left hand, he will lose a daughter; if his finger a friend.⁵ In China, if a child has fat hands, it is a sign of future wealth.⁶ In Norway, if a flea jumps on the hand, the person will be sought by a good friend.⁷ Omens are also universally drawn from the appearance of various animals on the right hand or on the left—the former being usually lucky, the latter unlucky.⁸

(e) One form of 'skrying,' or crystal-gazing, is to gaze into ink poured into the open palm⁹ (see art. CRYSTAL-GAZING, in vol. iv. p. 352¹⁰). The so-called science of cheironomy or palmistry, the reading of the past or future from the lines of the hands, has always found many credulous believers both in ancient and in modern times.

6. Gestures.—(a) As a means of communication or of emphasizing speech, gestures of the hand as well as the use of fingers or hands in betokening numbers have been universally employed; but perhaps nowhere has 'sign language' been more cultivated than among the American Indian tribes. Cheironomy was extensively used by both Greeks and Romans, and it is much practised in modern Italy.¹¹ Many gestures, whether actually used or represented in art, are universally understood—hand or finger to mouth=silence; wringing the hands=grief; the clenched fist=anger; the hand to the cheek or leaning the face on the hand=sadness or grief.¹² Hence it is natural that, where speech is directed to magical or religious purposes, in spell or prayer, it is usually accompanied by gestures, some of which tend to become conventional. Pointing with the finger is often held to be of magical efficacy, the power streaming, as it were, from operator to victim. This gesture is found among savages, mediæval witches, and in later Tantrism.¹³ Hence it is indecorous to point with the finger towards, e.g., the heavenly bodies or other worshipful objects, or at friends or superiors.¹⁴ Other magical uses of the hand have already been referred to.

(b) In prayer or adoration no gesture is more common than the lifting up of the hands, which are usually open. It is the gesture of appeal, a kind of acted prayer. In Tonga, people cut off a finger-joint to propitiate the gods, and, holding up their hands, confess that they have done wrong.¹⁵ The people of the Congo, in speaking to a superior, stretch out their hands towards him, the attitude being precisely that of prayer.¹⁶ This was also the usual attitude of prayer in Egypt, represented so often on the monuments, and referred to in a text which says: 'The hands of men and gods are lifted on high seeking for thee, even as those of a child [are stretched out] after his mother.' Osiris is also

referred to as 'god of the lifted hand.'¹ A similar attitude was used in Babylonia and Assyria, and one collection of prayers bears the name of 'Prayers for the lifting up of the hand.'² Both Greeks and Romans used this gesture in prayer (*submittere manus, manus ad caelum tollit*), the latter also first raising the hand to the mouth (kissing the hand) and making a complete turn to the right. The hands were turned down or touched or beat the earth in praying to gods of the under world.³ The most usual Hebrew attitude in prayer, repeatedly referred to in the OT, was that of lifting up or spreading forth the hands towards the holy place or towards heaven (e.g. Ps 28¹ 134¹, Is 1¹, 1 K 8²²). This attitude also became usual among Christians from the earliest times—arms raised and hands extended (cf. 1 Ti 2⁸ 'lifting up holy hands'; 'stretch forth your hands to God'⁴). The arms were sometimes stretched in the form of a cross, to represent the Passion.⁵ Origen says that the lifting up of the hands symbolized the lifting up of the heart to God.⁶ The attitude is frequently represented in early Christian art (cf. the figures of the Oranti in the Catacombs).⁷ Holding out the hands horizontally is also a Buddhist attitude in prayer.⁸ Muhammadans, while using several positions and gestures of the hands in prayer, begin by raising the open hands on each side of the face, the tips of the thumbs touching the lobes of the ears; later gestures are to place the right or the left hand in front of the body, to hold the hands open before the body and to look at the palms, then to draw them over the face, and, at the conclusion of the prayer, to extend the hands in supplication.⁹

Many other gestures are used in prayer. In Mexico the worshipper stood touching the ground with the right hand, which was then carried to the mouth; in Peru he opened his hand and threw kisses to the sun.¹⁰ In Egypt the hand was sometimes put to the breast, or over the mouth, or both hands were brought to the level of the knees as the worshipper bowed.¹¹ Beating the breast was and is a sign of great contrition (Lk 18¹³ 23⁴⁶), and the OT also refers to bowing to the earth and placing the head between the knees (1 K 18⁴²). Kneeling and bowing with hands spread out on the ground or on the knees is also a Muhammadan gesture,¹² and the custom of folding the hands is common among Christians, and is also used as a devotional attitude among Buddhists.¹³

(c) In individual *benedictions* the gesture is that of the laying on of hands (Gn 48^{13, 14}, Mt 19¹³), but in more general benedictions it is that of the raised and open hand or hands, as if to project the blessing forward upon the person or object blessed. Already in the OT this gesture is found (Lv 9²²), and we find our Lord raising His hands (Lk 24³⁰). The later Jewish method was to join the extended fore and middle fingers and the fourth and little fingers, the thumb remaining apart. The hands were then held up with tips of the thumbs and forefingers touching. The 'lattice' of Cn 2⁹ was interpreted of this position and division of the fingers.¹⁴

¹⁴ *OL. VI.*—32

Both lifting and laying on of hands were and still are used in the Christian Church for individual and general benedictions, but in the latter the position of the fingers has been regarded as of some importance, and a symbolic interpretation has been given to it, while the blessing is always bestowed with the right hand. From comparatively early times in the Eastern Church the gesture has been that of the extended hand with the thumb joined or crossing the third finger, the other fingers open, or the second and fourth slightly bent. Among the mystic interpretations given, one is that the first and second fingers form the initial and final letters of Ἰησοῦς, and the thumb crossed on the third finger and the bent fourth finger form the initial and final letters of Χριστός.¹ The Western form of benediction is, for a deacon or a priest, the extended hand; for bishops, the thumb and first and second fingers raised, the others resting on the palm. This was at an earlier period the form used by priests also. The three upraised fingers signify the Trinity, the two closed fingers the two natures of Christ. These positions of the hand are met with in early Christian art, and occasionally others are depicted—thumb and first finger or first and second fingers or four fingers raised. The sign of the cross is made in all such benedictions. The Western gesture is the form taken by some pre-Christian amulets against the evil eye, and it is also one of commanding attention.² In Buddhism the hand upraised, open, with fingers pointing upwards, signifies blessing.³

The position of the fingers in signing oneself or any object with the sign of the cross is important and is mystically interpreted—five fingers outstretched signify the five wounds, three the Trinity, etc. At the Ancharist the cross is symbolized by the elevation of the celebrant's hands.⁴

(d) In *taking an oath* the position of the hand is of importance. It is placed upon some sacred object, the idea probably being that the power of the object will do harm to the person if he breaks the oath. This custom is found in Samoa (hand on sacred cup or stone),⁵ among the Hebrews (hand on generative organs, though here the oath partakes of a covenant [Gn 24², cf. 47²⁹]), among modern Jews (hand on roll of Torah or on page with the Decalogue), and among Muhammadans (hand on Qur'ān).⁶ Again, the hand is raised, as if calling the gods or God to witness the oath—a custom found among the Greeks,⁷ Teutons,⁸ Hebrews (Gn 14²², Dn 12⁷; cf. Rev 10⁵ 6⁶; hence 'to lift the hand' signifies 'to take an oath' [Ex 6⁸, Ps 106²⁶, etc.]), modern Jews, and generally in Christian usage, as in judicial oath-taking in Scotland. Shaking hands is sometimes used to confirm an oath or covenant, or as witness of a pledge (cf. 2 K 10¹⁵, Ezk 17¹⁸, Pr 6¹). To avoid the necessity of keeping an oath and to escape the consequences, certain gestures of the left hand or of the oath-taking right hand are used in folk-custom.⁹

(e) The gestures or position of the hands in *representations of divinities* are often of importance, and reflect those already referred to. Or they hold various sacred objects, symbols, and the like. This is especially noticeable in early and later Christian representative or symbolic art, where our Lord or another Person of the Trinity holds His hand in the attitude and gesture of benediction. In Northern Buddhist art there are many recognized positions of the hands given to representations of Buddha and Buddhist saints, each with its appropriate name, e.g. the 'meditative posture'—one hand resting on the other, palms upwards; the

'best perfection'—the index finger and thumb of each hand joined and held towards the breast; 'turning the wheel of the law'—the right index finger turning down the fingers of the left hand; that of the necromantic pointing finger, etc.¹

7. **Hand-shaking.**—This is a general mode of salutation even among such low savages as the Australians,² now more, now less, ceremonious,³ and an obvious expression of sympathy by means of contact. But it has also been a very common method of clinching a bargain, expressing a covenant,⁴ and the like, each of the two persons thus giving himself over into the possession of the other by contact, and so having a hold over him. This custom was prevalent among the Romans, Greeks, Hebrews, and most other peoples of antiquity, as it is with most modern races. The hand is struck into that of the other person, hence the phrase 'striking a bargain'; and in some popular usages, if this hand-shaking does not take place after a bargain, the bargain is null. The hand-shaking is even more effective when each spits into his hand before 'striking,' or when, as among the Iberians, Goths, and in the Highlands, the ball of the thumb is moistened and the parties press thumbs.⁵ Hence, also, clasping the hands is one of the most important parts of the ritual of marriage, not only among Christian races, as set forth in the Church rituals, but also among many savage and barbaric folk, and is already found in the Rîgveda (x. 85. 36). The ceremony is at once a pledge and a symbol of the union which will later be consummated.⁶ In various religious or magical ceremonies, in which several persons are engaged, they sometimes join hands, probably by way of giving expression to the solidarity of the rite.⁷

8. **Washing of hands.**—(a) The obvious effect of water in removing dirt from the body, as well as the universal ideas regarding the sacredness of water or its being the seat of a spirit or divinity, suggested that other kinds of uncleanness—that of a tabu state, of guilt, and the like—might also be removed by washing. And, as the hands were the main parts of the body by which uncleanness through contact arose, or were a possible entry to the body for demons (as in the Hindu belief regarding *bhûta*), their ceremonial washing has everywhere had great importance. Indeed, with many peoples all washing of hands is more or less ceremonial.

Contact of the hands with any thing or person unclean or dangerous produces a tabu state, and no food must be touched with the hands while it lasts, because the uncleanness or contagion would pass over to the food, and so into the body. This is common in the lower culture, e.g. in Polynesia; and it is illustrated by a Yoruba story of a son who went to Hades to see his dead mother and would have touched her had she not forbidden him, saying that, if he did, the road to the upper world would be closed to him.⁸

Among the Greeks the danger of unwashed hands is illustrated by the story of Asterius, who, having approached the altar of Zeus with unclean hands, was struck dead; while no one could go beyond the *περὶπαρρηφίον* until he had washed his hands.⁹ The Romans had a similar belief, and no one with hands stained with crime would touch sacred things. They must be washed first in a living stream.¹⁰ The Jewish belief that to touch eye, nose, ear, etc.,

with unwashed hands was highly dangerous (these being the openings by which a demon might enter) also illustrates this.

In Babylonian, washing the hands, besides the rest of the body in pure spring water is specially mentioned as a symbolic ceremony for ridding one of the power of evil spirits.¹¹

(b) Ceremonial washing of hands takes place before religious or magical acts. It is frequently used before *prayer*, and this is best illustrated from Muhammadan usage. The Muslim must wash his hands before prayer or before touching the Qur'ân: 'When ye prepare yourselves for prayer, wash your faces and hands up to the elbows' (v. 8, lvi. 78). This washing is done three times—first the right, then the left hand and arm. When washing the right hand, he says these words: 'O my God, on the day of judgment, place the book of my actions in my right hand, and examine my account with favour'; and, while washing the left: 'Place not at the resurrection the book of my actions in my left hand.'¹² The Jews are also careful to wash their hands before prayer, the custom being deduced by the Rabbis from various passages in the OT, where there is no direct reference to the custom. The Hindu usage at the *Brahmā-Yajña* service may be referred to, though here there is rather an offering of water to the *Pitris*, that they may be refreshed and their hands washed. Water is taken in the right hand and poured over the straightened fingers, and at a later stage it is offered so as to pour over the side of the palm between the root of the thumb and forefinger, the 'father's space' (*Pitṛtīrtha*), and again so as to pour over the opposite side of the palm.¹³

(c) Washing of the hands before *sacrifice* is also a very wide-spread practice. In Egypt the ritual washing of the priests before offering sacrifice included the whole body, though stress was laid upon the hands. Hence the name of the priests—*ūbū*, 'the washed,' or *ūbū totūi*, 'the clean of both hands.' In heaven the gods washed their hands in the laver before the door in heaven; and this act was performed on their images.¹⁴ Similar customs prevailed in Babylonian, where the *barā* must wash and be ritually pure before approaching the gods. Here also this was reflected back upon the gods, who, as well as worshippers, must cleanse their hands before taking part in the sacrificial banquet.¹⁵

In Greek and Roman sacrificial ritual the purity of the hands by washing in lustral water was insisted on, and a vase of water for this purpose stood at the entrance of the temples.¹⁶ Among the Hebrews the ritual law is quite explicit regarding the custom of washing hands before sacrificing (cf. Ex 30¹⁹ 40³²). The ecclesiastical usage of ablution of hands in the Christian Church before or during the celebration of the Eucharist may also be referred to in this connexion. It is ordered in the early liturgies and has remained a constant custom since.¹⁷

(d) Before many rites of a *magical* kind the washing of hands is also customary. In Greece at the *ἀμφιδόμια* the midwives had to wash their hands before running round the fire with the infant.¹⁸ Before touching seeds at planting, women of the Lower Congo region must wash their hands lest the crop be destroyed.¹⁹ Among the Romans, at the

¹⁹ Potter, ii. 322.

Lemuria, the paterfamilias had to wash his hands thrice in spring water as part of the ritual against the ghosts.¹ Among the Assyrians and Babylonians unwashed hands in magic rites were unlucky.² In modern folk-custom the practice has survived.³ A curious custom is that of washing the hands in the water of a river before crossing a ford. This is found among various savage tribes, and is already referred to by Hesiod.⁴ It may be regarded as a species of inoculation against the dangers of the river or the spirits dwelling in it.

(e) Washing the hands is also a recognized method of *carrying away evil* of all kinds. Thus in Assyria a spell runs: 'May evil be carried off with the washings of his hands!'⁵ Among the Hebrews and modern Jews the same idea is also found, and the hands must be washed after all 'unclean' bodily functions or after touching any one who is unclean, or to remove the contagion of death or murder (see, e.g., Lv 15¹¹, Dt 21⁶).⁶ Washing has also the effect of averting misfortune.⁷

Not only impure but sacred objects, i.e. objects which must be approached carefully, cause uncleanness. Thus a Jewish belief is that the hands must be washed after touching the Scriptures—the sacredness or danger cleaving to the hands being thus removed.⁸ See art. *BIBL*, vol. II, p. 571a.

(f) Washing the hands, or clean hands, thus became a *sign of innocence*, meaning that one had thus washed off all possibility of guilt; and the custom gave rise to the metaphor of 'clean hands' as signifying innocence (cf. Ps 18²⁰ 24, Mt 27²⁴). In Cornwall, washing the hands was used as a token of innocence with regard to any crime.⁹ Cf. the common phrase used with regard to responsibility towards another person, 'I wash my hands of you'; or the metaphor about a person's hands not being clean, as meaning his dishonesty, etc.

A curious superstition in Scotland, England, and Ireland was that a child's right arm and hand should be kept unchristened, so that it might strike a more deadly blow; or unwashed immediately after birth, so that its luck might not be washed away.¹⁰

9. *Veiling the hands*.—Probably because of possible danger from unclean hands they are sometimes veiled in the performance of ritual or as a token of respect. During the Roman sacrifices to Fides in the Capitol the flamens' hands were wrapped, up to the fingers, in white.¹¹ A fillet was also worn on the right hand by the Eleusinian *mystæ*.¹² As a mark of respect, hands were veiled before a superior. Traces of this are found in early Christian art. St. Peter receives his mission, or the keys, with his hands covered with the skirt of his cloak; and martyrs hold their crowns of glory on veiled hands. In the Roman Catholic Church, when Cardinals approach the Pope to do homage or receive the hat, their hands are veiled with part of their cape.¹³ Among Muhammadans it is usual to cover the hands in presence of a person of higher rank or when making a visit.¹⁴

10. *Clapping the hands* is a method of calling a servant in the East.¹⁵ Hence it also passes into a method of inviting a god or a spirit.¹⁶ It is also a method of salutation, especially among African tribes, or of expressing joy; or it may be used as a rhythmic accompaniment of song or music.¹⁷

Grimm also mentions it as a powerful charm in enchantments,¹ while it is often used as a means of scaring off demons by noise,² as it was to frighten away serpents in the sacred cavern at the *Thesmophoria*.

LITERATURE.—There is no special work on the whole subject. See the works referred to throughout the article.

J. A. MACCULLOCH.

HANDICRAFT.—I. *Definition*.—The term 'handicraft' may be defined as the constructive adaptation by man to his needs of the material presented by the environment. It will thus include, on the one hand, the provision of implements, weapons, utensils, clothing, shelter, the preparation of food, and the like, but will exclude, on the other hand, activities such as those by which food and raw material are provided—gathering of fruits and roots, the processes of agriculture, hunting, fishing, etc.—as well as self-defence and war, and other activities in which, although manual dexterity and co-ordination of bodily powers are requisite, the result is either not material or, if it is, is not produced by a structural or formal modification. A simple adaptation, such as the use of stones as missiles by apes or by man, will not come within this definition, while it is doubtful whether the psychological processes which underlie the operation of nest-building, even in the higher apes, would justify the application of the term to this form of activity. The case of the orang which applied a piece of iron or other material as a lever and utilized strands of wire-netting, which it untwisted, as a saw to break out of captivity (*Times*, 4th Nov. 1912) may possibly be described as on the psychological threshold of handicraft.

2. *Implements of stone, bone, and shell*.—The earliest undoubted examples of the products of man's technical skill are the stone implements of the Pleistocene period. Whether the implements known as *ooliths* are actual specimens of man's early attempts to produce a tool to meet his requirements or are the results of natural forces is immaterial. It may be assumed that the earliest process of manufacture consisted of a rough chipping to increase the utility of a stone naturally suited in form to some particular purpose.

Implements as simple in form and showing in themselves as little signs of human workmanship as *ooliths* have been recorded among primitive races in modern times. The Seri Indians use stones which have undergone no process of preparation as hammers or as weapons in hand-to-hand fighting (W. J. McGee, 'The Seri Indians,' *17 RBW*, pt. I, [1898] p. 9 ff.), while the Andaman Islanders use whetstones, chips, and flakes which have been split by simple pressure after heating in the fire (E. H. Man, 'On the Aboriginal Inhabitants of the Andaman Islands,' *JAT* xii. [1883] 380).

The implements of the river-drift gravels of Europe belong to a stage when man had already acquired considerable technical skill, while a marked increase in dexterity is shown in the smaller but more carefully formed, as well as more highly specialized, implements of the cave-dwellers. The favourable conditions of archaeological study in France and the employment of a detailed method of analysis and classification have made it possible to follow closely, in a series of known relations in time, this advance in skill, as well as in the process of specialization. The civilization of the Stone Ages in Europe thus offers material of the greatest value in tracing the gradual development of man's technical ability.

The Palaeolithic Age has been divided into three stages—Lower, Middle, and Upper. In these stages the Mesvinian, Strepyan, Chellean, and Acheulean implements, so called from characteristic sites in France, belong to the Lower Palaeolithic; Mousterian implements to the Middle; and Aurignacian, Solutrian, and Magdalenian to the Upper. Each group is still further subdivided by

¹ P. 1026 and note 1.

² Crooke, *PR* I, 168.

French archaeologists. Through all the stages, from the simple flake of the Mesvinian gravels to the highly elaborate examples of the flint worker's art in the leaf-shaped implements of Solutré, there is a steady progression in specialization and adaptation to a particular purpose. In the Strepian stage the forms include coarsely flaked scrapers, knives, and the *boucher*, a pointed implement which has been described as 'not unlike in size and form two hands opposed palm to palm.' This implement—a natural form, a nodule of flint which has been worked, but not essentially modified—is still more characteristic of the Chellean stage, which also includes scrapers and a dagger form. In these implements the flaking was apparently produced by oblique blows with a pebble. The Chellean industry is of world-wide distribution, occurring in the river-gravels of France, England, and Belgium, in Italy, Spain, and Portugal, and throughout Africa, Arabia, Palestine, in the valleys of the Tigris and Euphrates, in India, and in some parts of Canada and the United States. In the Acheulean stage—a direct development of the Chellean—the chipping of the flint becomes finer, and the implements, especially the *boucher*, show a better edge. In the Mousterian age there is an increase in the variety of implements employed, as well as a marked improvement in the methods of workmanship. The *boucher* disappears, but its place is taken by the Levallois flake, a large implement with a rounded point, dressed on one side and then struck from the nodule with a single blow. Side-scrapers, end-scrapers, notched scrapers, and awls are characteristic of this period, in which man began to make use of caves for dwelling-places. In the Aurignacian stage of the Upper Palaeolithic period, the improvement in the working of flint continued. New types of implements were made, including curved pointed flakes with secondary chippings, carinated scrapers and gravers' tools to meet the requirements of artistic development, which now found expression in ivory and bone carvings and engravings. The distinguishing feature of implements of this period is the secondary flaking known as the Aurignacian retouch. At this time a new material was introduced; awls of bone and ivory, and other implements, such as spear-heads and rods of ivory, appear. The working of flint reached the highest stage of development in the Solutrian age. Primitive arrow-heads of the earliest phase were succeeded by the implements known as willow-leaf and laurel-leaf points—flat and very thin implements with remarkably delicate secondary flakings of great regularity, probably produced, not by blows as in the earlier types, but by pressure.

The Australian aborigines produced extremely delicately flaked spear-heads, latterly made of bottle glass, by means of pressure, the implement used being a gouge-shaped tool made of a bone from the hind leg of a sheep (H. Balfour, 'On the Method employed by the Natives of N.W. Australia in the Manufacture of Glass Spear-heads,' *Man*, iii. [1903] 65). The Fijians and the Eskimos also produced fine flaking by pressure with a bone. The Apaches, after breaking a boulder by means of a pebble set in a withy handle, wrought the implement into shape with a sperm-whale tooth; Torquemada describes the making of obsidian knives by pressure with wood, the flakes being split off a block held between the feet (see J. Evans, *Ancient Stone Implements of Great Britain*, p. 23).

The Magdalenian period witnesses a decline in skill in flint-working. The implements become less elaborate, and are often lacking in finish. This is due largely to the employment of bone and horn, which, being easier to work, allow greater diversity of form and consequently a wider application in use. The simple spear-point develops into the harpoon with one barb, and later with two or more; arrow-heads and spear-heads show great variety in basal form, to permit of different methods of attachment to the shaft. Spear-throwers of bone or ivory are used, as well as the

bâton de commandement, an implement conjectured, on Eskimo analogy, to be an arrow-straightener. Bone pins, needles, and bodkins found in large numbers suggest an increased elaboration in dress. The culture of this period is frequently compared with that of the Eskimos, especially in view of the use of bone implements by the latter for both hunting and domestic purposes.

In the Neolithic Age in Europe, the great variety in the forms of implements and the purposes for which they were employed bear witness to a profound change in the mode of life by which this period of human development is broadly distinguished from that which preceded it. Although the rude stone implements of the kitchen middens of Denmark and elsewhere argue a civilization and a technical skill certainly below that of the cave-dweller in the later Palaeolithic period, a knowledge of agriculture, the domestication of animals, weaving, and the use of clay vessels, for which evidence appears at a comparatively early stage in Neolithic civilization, demonstrate that a rapid multiplication of human needs was accompanied by a parallel increase in effective means to satisfy them. The characteristic industry of the period—the making of implements and weapons of stone—in essentials remains unaltered; progress is marked mainly by a greater variety in form and by specialization. An important development in technique, however,—the process of grinding and polishing—permitted the use of stones other than flint and chert.

In the earlier stages of the Palaeolithic period, it is not possible always to classify any given implement as a weapon or tool. The same uncertainty exists in the case of the neoliths. Some of the rough axe-like tools may be either unfinished weapons or implements possibly for agricultural purposes. Nor does the lack of finish argue an early origin. The mauls and hammer-stones which were used to shape the great blocks of stone at Stonehenge were of the roughest description, although this monument was erected at the beginning of the Bronze Age. Arrow-heads and spear-heads admit of no doubt as to their purpose. In the case of the former, the method of attachment can be followed, as it develops, from the form with a square butt, through the barbed form fitting into a notch, to the fully developed tang which was fastened to the shaft. The stone celt or axe, perhaps the most characteristic of all stone implements of the period, can also be followed through a sequence of forms, from the coarsely chipped and roughly shaped implement to the well-balanced weapon, carefully ground all over and brought to an edge, which exhibits the highest point of development in this branch of Neolithic technique.

The usual method of hafting the celt was not by fastening it to a handle with sennit sinew or other form of string, as is done by most modern primitive races among whom stone implements are, or recently have been, in use, but by fixing the celt in a transverse hole in the handle. The tendency to split the handle was ingeniously overcome by the peoples of the Swiss Lake Villages, who fitted into the handle a socket of horn which took the force of the blow. At a later stage, perforated axe-heads appear, into the hole of which the handle was fitted. In Great Britain this implement may be referred to the Bronze Age. The hole was bored by a cylindrical drill, or in some cases by a hollow tube, possibly of elder wood.

The greater skill in technique and the multiplication in form and uses of stone implements which took place in the Neolithic Age are only one phase of a general advance in culture. But in the case of these implements the limits of development were fixed by the nature of the material; and neither among modern primitive races nor in prehistoric times was the technique of the Scandinavian daggers or the translucent blades of the Egyptian knives surpassed.

The Australians, like many other primitive races, when first encountered by Europeans, were in the Stone Age. The uses to which they put their implements and weapons and the methods of manufacture they employed, serve to throw light on the general character of the culture of pre-historic Europe, as well as on special points where the purpose of a particular implement is not clearly deducible from its form and character.

One of their most useful implements, principally as a tool, rarely as a weapon, was the axe, which was the product of a long process of chipping with a lump of quartz and pecking with a rounded pebble, and then of grinding upon the nardoo mills, the stones used for grinding seeds. It was mounted in a twisted withy, either as an axe or as an adze, and fixed in position with porcupine-grass resin. As an axe it was used for notching trees for climbing, cutting open trees, catching the opossum or taking honey, taking off sheets of bark from trees, shaping wood for shields, and the like. As an adze it hollowed out wooden vessels. A knife set in a haft was used as a pick; fragments of stone set in a handle of gum made a saw, stone hammers were made of unflaked pebbles set in a handle; pounders were employed for breaking hard seeds; stone drills were sometimes, though rarely, employed; and all kinds of flakes were used as scrapers. The last-named implements were sometimes made of teeth, which also furnished knives and drills. The Australian native made a considerable use of shells. They were employed in cutting hair or bark, for making adzes, in incision, in working the opossum skin, and as drills; a kind of spoke-shave of shell was used for slicing nuts or any other fruit which had to be cut thin. Shells were also used to make fish hooks.

Their implements of bone included awls made from the leg-bone of the kangaroo, a stiletto or needle used by the women to pierce skins or the edges of the bark which they sewed into canoes, and for piercing the septum of the nose for the reception of ornaments (N. W. Thomas, *Natives of Australia*, London, 1906, p. 48 ff.).

Adzes of both shell and stone were used in Melanesia, the area of distribution being well-defined in each case. Stone was used in the Solomon Islands (except Rennell and Bellona) and the New Hebrides. Shell was used by the Santa Cruz people, Torres Islanders, and Banks Islanders. For cutting threads, shaving, and fine carving, obsidian, chert, and shark's teeth were used (Codrington, *The Melanesians*, Oxford, 1891, p. 313 ff.).

3. Metal-working.—The introduction of a new material on the discovery of metals (probably in Asia Minor, or in Egypt, whence their use spread to the Mediterranean and the rest of Europe) was necessary to render possible further development in this department of human activities. It has been assumed that the use of metals was first discovered by the accidental inclusion of copper ore among the stones used to build up the primitive hearth. While this theory, on the ground of its strong probability, holds the field, it is generally conceded that, in localities where circumstances were favourable, the Bronze Age was preceded by a Chalcolithic Age in which native copper was employed very much in the same way as stone, and adapted to use by being hammered into the shape required. The Indians of Lake Superior, where native copper abounded, and possibly the early inhabitants of the Mediterranean area, passed through such a stage of development. That a Copper Age generally preceded the Bronze Age proper is a matter upon which it is more difficult to obtain conclusive evidence. Not only would copper implements be melted down for use in making bronze, but, in most regions where copper is found, it is not sufficiently pure to produce anything but a bronze without a special process. In Ireland, and again in the Mediterranean area, implements occur which are sufficiently pure to warrant their being called copper.

Apart from the link afforded by the Chalcolithic period where it occurs, the connexion between the civilization of the Neolithic and early Bronze Ages is sufficiently apparent in the form of the implements themselves, especially of the celt. The early metal celt, notwithstanding the greater refinement and economy made possible by the

qualities of the material, is practically identical in form with the stone celts. The development from the flat celt, based upon the stone form, can be followed in all its stages—through the flanged and stopped forms, in which the flanges were made to fit over the curved handle, to the socketed form into which the handle fitted, and to which it was fastened by a string passed through the ring of the celt. The same essential identity in form can be traced in knives, spear-heads, daggers, and other implements in which stone was superseded by bronze. By the end of the Bronze Age, the art of working metal had attained a comparatively high degree of excellence; gold and, more rarely, silver were employed for ornament, and the adaptability of bronze for purposes other than those of implements and weapons had been discovered. It is probable that iron was first worked in the region south-east of the Euxine. In Europe it was possibly in the first instance disseminated from the Balkan peninsula, as a costly, almost a precious, metal to be used sparingly, later as the staple material for a wide variety of articles. When its use became general, the art of metal-working in Europe, especially as shown in the bronze mirrors, articles and ornaments for personal use, horse trappings, etc., frequently enriched with beautiful combinations of coloured enamel, began to pass from the stage when it could be classed as a primitive industry and to take its place as an element in a higher plane of culture. In Africa the Iron Age probably began at a very early date, owing to the abundance of the raw material, but the metal is still produced among the natives by smelting in a primitive form of low blast furnace, such as must have been in use in pre-historic Europe, of which the product is practically a wrought iron. This primitive form of furnace, consisting of a shaft or trough of clay with holes for the introduction of the blast, is still found in India, Borneo, Japan, and, in Europe, in Catalonia and Finland.

Over the larger part of Africa the production of iron is of great importance. It is worked in the Upper Nile valley among the Nilotic tribes (the Ja-Luo being noted smiths), among the Bantu tribes of East Africa, and the negro tribes of West Africa, where the swords and knives, which show great diversity of form, are especially remarkable as examples of native workmanship. The Mashona and other Makalanga tribes have been noted from time immemorial as workers of iron; the Zulus, however, do not appear to have practiced the art to any great degree. In the Shire Highlands at one time every village had its smelting-house, and smiths who made axes, spears, needles, arrow-heads, bracelets, anklets, hoes, two-edged and one-edged knives, and the like (A. Werner, *Natives of British Central Africa*, London, 1906, p. 201 ff.).

Before leaving the subject of metallurgy, reference should be made to the famous bronze castings of Benin. Casts, though of an inferior quality, are still made in this district, the *cire perdue* process being employed. Wax is modelled on a clay core and covered with a clay mould; when the mould is hard, the wax is melted and drained through a hole, and molten metal poured in (H. Balfour, 'Modern Brass-casting in West Africa,' *JRAI* xl. [1910] 525-528). The Malays use this method in making hollow vessels of copper and white metal (W. Rosenbain, 'Notes on Malay Metal-work,' *JAI* xxxi. [1901] 166 f.).

4. Basketry.—Basketry and the making of pottery are, psychologically considered, the two most important arts in early primitive handicraft, as they both involve a distinct creative act, not merely an adaptation, as in the case of the early stages of making a stone implement. Basket-work, including in the term plait-work and matting, fulfils many functions in primitive culture; it furnishes, next to the skins of animals, one of the most primitive forms of clothing, as, for instance, the plaited mats worn in the Caroline Islands; it provides the sails of the Polynesian and Melanesian canoes; it is used to form a shelter against wind and rain, as in the interlaced boughs of the temporary hut of the Australian hunter, and the wattle and daub huts used in the lake-villages of Glastonbury, and it provides vessels for the collection, storage, and cooking of food, as well as mats,

cushions, and other furniture of the house. In Somaliland and Abyssinia, where the pottery is of poor quality, baskets are used as milk-vessels. Basket-work, whether as a receptacle or as a wrapping, was largely used for mortuary purposes by the Indians of N. America and the ancient Peruvians. Bodies wrapped in matting of alfalfa grass stems have been found in excavations in Nubia (D. E. Derry, 'The Red Coloration on Ancient Bones from Nubia,' *Rep. Brit. Assoc., Dundee*, London, 1912, p. 618). A simple variety of basket of the plaited type is that common in the Pacific, which consists simply of a palm-leaf split down the middle, the midrib being coiled round to make the rim. The pinnules are then plaited together to make the body of the basket. The inhabitants of the Swiss lake-dwellings in the Neolithic and Bronze Ages were expert in the making of baskets—checked, twined, and coiled. Specimens of coiled basketry have been found on the pre-historic site of el-Amrah, south of Abydos—so far the oldest to be discovered. Baskets of the same type are still found up the Nile.

In America basketry was of especial importance (cf. ART [American], vol. i. p. 827 f.).

While the vegetable kingdom supplied the Indians with the greater part of the material for making their baskets, they also drew upon the animal kingdom; sinew, skins of the smaller mammals, feathers, and split porcupine quills were employed. The texture of the basket-bottles and boiling-baskets, in which water was heated by throwing in hot stones, was almost sufficiently close in many instances to enable them to hold water, but gum or clay was used to give a waterproof lining. Among the Havasupai Indians of the Shoshonean stock baskets were rendered fireproof for cooking purposes by a lining of clay. One form of basket-work, made of narrow slats of wood, rods of hardwood, and twine, was used as armour on the Pacific coast of America, from the Tlingit coast as far south as the Hupa Indians of California. Captain Smith speaks of the Massawonekes of Chesapeake Bay as using similar armour. Wicker shields are used in many parts of Africa.

5. Pottery.—The art of the potter follows close upon that of the basket-maker in the development of culture. That precedence must be given to the latter in order of time, in most regions of the world, must be conceded from the fact that the earliest pottery forms follow closely those of basket-work, and in some regions the use of clay vessels for purposes of storing liquids or for cooking utensils would appear to have grown out of the devices employed for rendering basket-work more suitable for these purposes. A simple form of cooking-vessel in use among the Havasupai is a flat tray of basket-work, on which seeds, crickets, or pieces of meat were roasted by hot coals. The charring of the basket-work led to the employment of a clay lining. This was turned by the heat into a flat plate, which was, in its turn, used as a brazier. The origin of the parching pot of the Zuni is indicated by the native name, which means a roasting tray of twigs. By the obvious process of raising the edges of the tray, whether of basket-work or clay, it becomes a bowl. It has been held that pottery generally was moulded in basketry in the eastern United States. It has also been suggested that the method of building up a pot by means of a clay coil is based upon the technique of coiled basket-work. It is possible, however, that in some cases the moulded forms of basket-work on early fragments of pottery both in America and elsewhere may be due to the use of this material to produce ornament by impression, or it may be derived in some cases from the common practice, which occurs, for instance, in the Andaman Islands, of covering the pottery with basket-work. The style of ornament of the pre-historic pottery of Europe, and especially the banded form, suggests a derivation from, or at least the strong influence of, a basket-work prototype, the appearance of regularity in the structure of which has been preserved by the con-

servative primitive mind by a corresponding regularity in ornament. Before the introduction of the potter's wheel, for which the earliest evidence has been found in de Morgan's excavations in Susa, and which appears in the Mediterranean in the Middle Minoan period of Crete, symmetry in form is usually obtained by moulding the pot on a base or in a shallow tray, which is frequently made of basket-work, as among the American Indians, in pre-dynastic Egypt, and in the Mediterranean in the Neolithic and early Bronze Ages. The Nicobarese women, who are noted for their skill in making pottery, employ a board on which is a ring of coco-nut leaves sewn together. In some cases the base of another pot was used, as in New Caledonia. In Papua, for the early stage of pot-manufacture, a gourd was used as a mould. The base was slowly turned as the pot was built up. The Kabyle woman uses her foot for this purpose, while squatting on the ground. The use of a slip in primitive pottery is not uncommon before the introduction of glazework. The Pueblos used a slip, usually white, made of carefully prepared clay, and it occurs in certain classes of pottery in the Mediterranean area. Ornament is usually effected by impression, for which the fingers, pieces of wood or basket-work, or stamps may be used, or by incision (the method commonly employed in the geometric designs of the European pottery of the late Neolithic and Bronze Ages in northern Europe and in the Mediterranean; where a slip is employed, the incision sometimes goes down to the fabric). Pigments may also be used. In Tunisia, in the hand-made fabrics the pigment is smeared on with the fingers. Most elaborate and artistic examples of painted ware are to be found in the Mediterranean Kamares pottery, while, in a more primitive type, the Pueblo painted pottery shows some highly effective designs, the ornament being derived and adapted from the motives of textile prototypes.

Pottery might be hardened simply by placing it in the sun to dry, but various methods of firing were more commonly employed. The Choctaw of the Mississippi in the middle of the 16th cent. are said to have fired their pots by simply placing them in the middle of a fire and covering them with charcoal. The defects of this method, which produced a discoloration of the pottery, were utilized in the South-Western States to produce a black ware, the embers being raked off and fresh fuel added to the fire. A method more nearly approaching the use of a primitive kiln is found in the Nicobars, where the pots are placed mouth down over ashes, firewood, coco-nut shells, etc., and firewood is piled against a wheel-like object which rests on the upturned pot. See, further, ART (American), vol. i. p. 828 f.

6. Weaving.—Weaving is technically closely allied to basketry, especially the woven variety, the essential operation in each case being the intertwining of two sets of strands of material. Weaving is, however, differentiated from its technical relative by the employment of machinery—the loom—and still further by the character of the product, which is essentially flat. The primitive loom consists of a cross-bar fixed on poles, which are usually, but not always, upright; or laid across convenient boughs of a tree. The warp, long strands of the material to be woven, is fixed upon the cross-bar, upon which the cloth is wound as the work progresses. The women of Bahah in Palestine use a loom of the rudest type, consisting merely of a stout stick at either end of the warp, which is stretched on the ground. The threads are passed through with the hand and pressed back with a wooden comb. The Ibans, who alone of the pagan tribes of Borneo attain any great

degree of proficiency in weaving, as the majority of those tribes use bark-cloth, employ a simple form of horizontal loom, on which the ends of the warp are fastened to a light cane. They are kept taut by a string which is fastened to the cane and passed round the body of the weaver as she sits on the ground (Hose-McDougall, *Pagan Tribes of Borneo*, London, 1912, i. 223). More usually the warp is kept in position by stone or clay weights.

The large number of stone weights and of spindle whorls found in Britain and other parts of Europe with remains of Neolithic or Bronze Age date shows the importance of the industry and the extent to which it was practised in pre-historic times. The place of the weights may be taken by a lower cross-beam. When this is used, the weaving usually proceeds from the bottom, and the cloth as it is made is rolled on the lower beam. The weft is passed between the threads of the warp by means of a shuttle. In a still more highly developed form of loom, a bar fastened below the upper cross-beam to the threads of the warp is used to raise or depress alternate threads, the shuttle being thrown or passed through the aperture thus made. A stick is used to push up the weft and secure the proper consistency of the fabric.

In the simple form of weaving, the weft is passed over and under the threads of the warp alternately, but variety in the pattern may be introduced by varying the number of threads over or under which the weft is passed. Further variation may be introduced by the use of different coloured threads. In the manufacture of the silk sarong at Sitiawan in Perak the pattern is produced by binding a number of threads, which are then dyed. After dyeing, the binding, which has preserved the original colour of the material, is removed (L. Wray, 'Notes on Dyeing and Weaving as practised at Sitiawan in Perak,' *JAI* xxiii, [1902] 153-155). The same method is followed by the Iban in Borneo (Hose-McDougall, i. 221 f.).

Considerable skill in weaving was attained by the ancient tribes of both Mexico and Peru, while among the modern tribes of America, Pueblos and others, weaving formed one of the important industries (see ART [American], vol. i. p. 827).

The Navahos, who with the Apaches were an intrusion into the Pueblo country, apparently had not practised weaving before the conquest, and their earliest attempts at the industry are said to have been made with threads unravelled from Spanish cloth. No specialized form of spindle was used, the weft being fastened to any conveniently shaped piece of wood. The loom is not found in Polynesia or Melanesia except at Santa Cruz. A primitive form of loom was used by the Maoris to spin flax.

7. String, thread, etc.—Forms of thread were made from the fibres of the bark of such trees as the cotton-wood, the willow, the linden, and the cedar. Hemp was used in the United States and Canada, being treated by maceration to remove the rough fibres. Further south, in Central and South America, cotton was picked from the seed. Among other materials employed was the fur of animals, such as goats and rabbits; the latter was used with cotton in Mexico, where cotton was also used in conjunction with feathers. Maguay fibre was another material frequently employed.

Various devices were employed for the twisting process. A primitive method is to roll the material on the thigh with the flat of the hand. The Eskimos and the Zulus employed two pieces of wood, bone, or ivory, one revolving on the other, the fibre being attached to the revolving part. Raw-hide rope and stout twine among the Eskimos are made with a fly-wheel arrangement. In Palestine at Bakah a primitive form of spinning is recorded, in which goat's hair was spun by fastening the strands to a stone which was turned until they were sufficiently twisted, when the yarn was wound on the stone and the process repeated. In Polynesia sennit was braided from coco-nut fibre. In the most primitive form of thread- or string-making the material was usually held in the left hand without a distaff, while the operator spun with the right hand; before the introduction of the spindle, the material was either twisted by hand, usually on the thigh, as in New Britain and Samoa, or with the assistance of the whorl. In

Australia hair twine was spun with a spindle, but vegetable twine was twisted on the thigh (Thomas, p. 56 f.). The use of the primitive spindle of the Navahos, without a hook at the top, has already been described (§ 6). There is considerable variation in the manner in which the distaff is used among primitive peoples. The Hopis twirl the distaff on the leg with the flat of the hand; the Peruvians and ancient Egyptians threw it in the air.

8. Cloth other than textile, and preparation of skins.—Weaving, owing to climatic and material conditions, was the method of cloth-making practised by the peoples from whose culture modern civilization has developed. There are, however, two other industries whereby man has provided himself with clothing, which in primitive culture are of almost equal importance. These are the preparation of bark-cloth and of skins.

The use of bark-cloth, which is obtained by beating out the bark of certain trees, for clothing is of wide distribution. It is found in Mexico, in Central America, in S. America as far as the tropic of Capricorn, throughout equatorial Africa, and throughout the Southern Seas, where, speaking generally, the loom is not in use. In the Australasian area it is stamped with patterns, while the Andean tribes decorate the costumes which they make from this cloth with shells, seeds, and feathers. The bark-cloth of Hawaii was extremely thin and delicate—an almost lace-like fabric. *Tapa*-cloth is manufactured by beating the bark on the smooth top of a hard log with a variety of hand clubs or hammers having criss-cross faces, with the assistance of water or some mucilaginous fluid. Practically the process is one of felting. Polynesia produced better *tapa*-cloth than any other region in the world.

The use of skins for clothing is naturally of greater importance in high latitudes; but, owing to the many uses to which dressed hide may be put, skill in its preparation is by no means confined to the cold regions of the world. The skin of an animal—usually a goat, with its natural shape preserved—is a primitive, and in warmer climates at the present day still a common, receptacle for carrying water or other liquid. The Australians used the skin of the opossum for this purpose. Among other uses to which skin or leather was put was the making of skin boats by the Eskimos, of shields, bags, and *parfleches*, or meal-bags, by the North American Indians, while the skin of the buffalo or bison furnished the material for the wigwam or tipi as well as the well-known buffalo robe. In Patagonia the tents were made of the skin of the guanaco. Hides are used for the walls of huts among the pastoral tribes of the Upper Nile.

The skins of the thinner-skinned animals and of birds were used chiefly for ornament, but the Eskimo women made close-fitting under-coats of bird-skins, sewn together with sinew, with the feathers next the person; the skins were prepared by chewing. The skins of the smaller mammals—squirrels, foxes, and the like—were simply dried before use. A slightly more elaborate process was used for the hides of larger mammals, such as the moose, seal, elk, ox, or bear, which were to be worn with the fur adhering to the skin. The inside skin or dermis was removed with special tools, a piece of walrus ivory or an antler being used to remove the fat, and a stone being used to plane down the skin to an equal thickness. The shape of certain classes of Palaeolithic flint implements justifies the assumption that they were scrapers used for the same purpose. The American Indian women used three tools—a stone knife to cut away the flesh, a hoe-shaped scraper to cut away the skin, and a hoe- or chisel-like tool with serrated edge to roughen up the inner side of the skin and render it flexible. The skins were dried on frames, and sometimes treated with a solution made from the brains of the animal.

A third process employed by the Indians, but not found among the Eskimos, is the preparation of a material analogous to buckskin or chamois

leather, which involves the removal of the hair after gradual putrefaction by heating, the dressing of the skin with a preparation of brains, and a careful manipulation and softening of the skin while drying. The Athapascan Indians were especially adept in the employment of this process.

In utilizing the skins in the making of garments, both Eskimos and Indians displayed great skill. The difficulty experienced by the furrier in cutting the skin without damaging the hair was cleverly overcome, the implement used being the woman's knife, a chert- or flint-blade, crescent-shaped on the outer edge. Among the garments made by the Eskimos may be mentioned the shoes with soles of raw hide and uppers of dressed skin, the hooded upper and the under coat, breeches, deer-skin stockings, and outer boots reaching above the knee, for the men, and for the women two frocks, two pairs of deerskin boots, of which the upper is worn with the hair outside and is shod with soles of sealskin. Much care is shown in cutting, to secure that pretty fur and fringes of hair should show as an ornament at the wrists, shoulders, and borders, sometimes varied with inserted material. Tacitus (*Germ.* 17) records that the German women ornamented their skin dress in much the same manner. The buckskin garments of the North American Indians, and especially the Algonquins, were ornamented with fringes, wampum beads, and paint. Among the Mandans the deerskin tunic was strung with scalp-locks, beads, and ermine, and the deerskin leggings were ornamented with porcupine quills and fringed with scalps.

9. *Wood-working.*—Our knowledge of the stage of culture attained by the peoples of the Stone Age in Europe—even of the Neolithic period—outside certain well-defined limits, is largely based upon analogies afforded by modern primitive peoples who are, or were at the time they were first described, themselves in the Stone Age. It is only in a few instances, where circumstances were peculiarly favourable, that any relic has survived which was composed of any material less durable than stone, ivory, bone, or pottery. No evidence has survived of the skill in the use of wood possessed by Paleolithic man; but the now extinct Tasmanians attained a considerable degree of dexterity in working this material with stone implements identical in character with some of the earlier forms of paleoliths.

The Tasmanians, who habitually went naked, except in winter, when kangaroo skins were sometimes worn, had as their only shelter a rude screen made by fixing strips of bark to wooden stakes; their weapons both for the chase and for war were made of wood; the spear was a product of much skill and care, the shaft, if not perfectly straight, being heated by fire, and then straightened by the aid of the teeth; it was then scraped to a point, and, after the bark had been removed with a stone scraper, it was hardened in the fire. The notched stone scrapers of Paleolithic and Neolithic times argue the use of similar weapons.

The Australians, whose culture has been compared with that of the Paleolithic Mousterian period, show a decided advance on the Tasmanians; their spear is frequently provided with barbs, and the head is a separate piece of hard wood or stone; they do not possess the bow, but use a throwing stick for hurling the spear; their best-known weapon is the boomerang, returning and non-returning, the former being a striking example of mechanical and technical skill. Their stone axes, adzes, and knives were provided with wooden handles. They used two kinds of wooden shields, one to ward off spears and one to ward off the blows of clubs. Bone was used for awls and gouges. The Bushmen also possessed a Stone Age culture of a primitive type comparable with the Paleolithic culture of Europe. They used the bow; their arrows were made of reeds unfeathered, bound with sinew, and tipped with a splinter of an ostrich or giraffe leg-bone which had been shaped with a stone spoke-shave. This bone was sharpened to form the head, or a separate flake of quartz or other hard stone was used.

Where the pottery is poor, as in Abyssinia and amongst the pastoral tribes of E. Africa, or non-existent, as in Melanesia and Polynesia, wood or horn is usually employed for vessels for carrying liquids. In S.E. Asia the internodes of the bamboos are used as water-vessels; in Melanesia and Polynesia gourds or bamboo or wooden vessels are used as a substitute for pottery.

10. *House-building.*—The most primitive form of artificial shelter is the screen of boughs resting against stakes, such as is used by the Tasmanians and the screen of interlaced boughs used by the Australian hunter as a temporary shelter for the night, already mentioned. The Neolithic pit-dwellings of Britain were holes in the ground, with a central pole to which a roof of boughs stretched from the edge of the pit. Californian tribes lived in dwellings made on the same plan. The Bushmen's hut consisted of a few boughs brought together and covered with mats of reed sewn together at the edges. In the Egyptian Sudan, Abyssinia, and Somaliland, the hut is circular and made of hide or mats; among the more settled peoples, of branches or clay. The hut of the Bantus is a durable structure, usually circular, and conical or beehive-shaped. In Uganda, substantial huts are made by fastening screens of reeds, carefully sewn together, to a circle of posts, the whole being thatched with reeds. In the case of the king's house the walls are built by peasants, but the roof is built by professional thatchers. Among the forest peoples of Africa, the house is a rectangular structure built of poles with a thatched roof with a pitch. The rectangular house with mud walls, a composite structure, is found among the Wa-Nyamwezi and a few other related tribes of E. Africa. The habitations of the Indians of America exhibit all stages of development—from the simplest form of windbreak used by the Hopis for temporary purposes, through the tipi of hide and the adobe building, to the massive stone architecture of ancient Mexico and Peru. Where manufactured wood was used, considerable skill and ingenuity in its preparation were displayed. The Iroquois used posts covered with bark for the three kinds of houses they inhabited, including the long-house, which was sometimes as much as a hundred feet long, and was divided internally into compartments. On the N.W. coast of America, cedar slabs were employed in house-building. These were split out of the centre of wide trees and fastened upright in a frame about ten feet high, on which rested split bark or boards laid on rafters, supported in the middle by long beams running the length of the house, and themselves supported on four posts with totemic emblems. The Iroquois long-house finds a parallel in the communal house of New Guinea and the club-house of Melanesia (which are not, however, divided into compartments, though each family group or, in the latter case, individual, has a separate hearth), and the houses of the Kenyahs, Kayans, and Ibans of Borneo. The Kayan and Kenyah houses are divided into compartments—one for each family. Considerable architectural skill is required in their construction; some of them are four hundred yards long; they are raised on piles, and a verandah runs down the whole of one side. Probably the best-known examples of pile-dwellings are those of the Swiss Lakes, of the Neolithic and Bronze Ages, and the pile-dwellings of New Guinea, erected on platforms built out into the water. Pile-dwellings also occur in Africa—in the Nile Valley among the Nuer, on Lake Nyassa, among the Ba Kuena, and on the West coast—and in various parts of North and South America.

The construction of the house in Samoa is a matter of considerable skill. It is sometimes thirty feet in diameter, and is supported in the middle by three or four posts. The sides are composed of a number of small posts four or five feet apart; the rafters are adzed from bread-fruit or other trees, the space between being filled with small ribs, ingeniously joined until the requisite length is attained. The rafters at the end of the house are circular, the adzing and joining of these being considered the supreme test of a workman's ability. The thatch is made from the leaves of the sugar-cane turned over small reeds.

Before leaving the subject of building, the Pueblo stone dwellings of the S.E. United States may be mentioned. They

consist of a number of rooms built adjoining or on top of one another. One or two single-room houses are first built, and then additions are made from time to time horizontally and vertically step-fashion, the lower series projecting before the upper, till the pile grows to a height of three or four stories. The entrance of the lowest story is not from the ground, but from the roof, through a hatchway, while the upper houses or rooms are entered from the roofs of the lower. The walls are of stone laid in adobe mortar, beams of small tree-trunks forming the basis of the roof.

11. Rafts, canoes, boats.—Among the most primitive means of conveyance by water is the raft made of a hurdle of reeds or papyrus (used on the Nile), or made of the leaf-stalks of the ambatch-tree (Lake Nyanza). Similar rafts are used in parts of Melanesia. The Tasmanians were not acquainted with either boats or canoes, but used as a substitute a kind of half-float, half-boat, made of the bark of various kinds of trees, but usually some species of eucalyptus made up into three cigar-like rolls. It was about nine feet in length and three feet broad in the middle, tapering to each end (H. Ling Roth, *Aborigines of Tasmania*², London, 1899, p. 154 ff.) The *balsa* of the Seri Indians (California) closely resembled the Tasmanian raft, but was of greater dimensions, sometimes as much as thirty feet in length, and was made of reeds (W J McGee, *17 REBEW*, pt. i. p. 215* ff.). In Australia, where navigation was but little known, the means of conveyance were of the frailest description. The simplest form of raft used was a single log paddled by the legs of a man sitting astride; a stage only slightly more advanced was the raft of several logs. A raft-like canoe of bark, resembling the Tasmanian raft, is recorded from Adelaide River. The commonest form of canoe was a sheet of bark, carefully removed from the tree and shaped over the fire, with the ends sewn together and caulked with mud. The usual length was ten or twelve feet. The canoe of seven bark was also in use—two, three, seven, or even more pieces of bark being used. The gunwale was strengthened by a mangrove pole, and the body kept distended by cross pieces and ribs. The dug-out canoe, which in most parts of the world is a characteristic form of the primitive boat, was also found in North Queensland, and at Port Essington an outrigger was employed. At Cape York the double canoe was used, in length some fifty feet, and propelled with both paddles and sails. While the outrigger canoe is clearly an introduction from New Guinea, it has also been suggested that the sewn bark-canoe may be of Melanesian origin (Thomas, 83 ff.). The commonest form of canoe in the Melanesian area is the dug-out with the single outrigger. In Fiji, New Caledonia, and New Guinea, large double canoes propelled by sails were also found. In parts of the Solomon Isles finely made plank-built canoes occur. What seems to be a stage in the development of the plank-built canoe occurs in Borneo, where the freeboard of a Kayan dug-out is increased by planks along the gunwale (Hose-McDougall, i. 201). The Polynesians, who were born navigators, carried the art of canoe-making to a high degree of excellence, especially in Hawaii and in New Zealand. In Tahiti, where there were regular war-fleets, the canoes were both single and double, with an elevated prow and stern, the stern-post being sometimes as much as eighteen feet high, and ornamented with the carved figures of the gods. The elaborately carved prow- and stern-posts are characteristic throughout this region.

The Tahitian war-canoes were capable of carrying fifty fighting men. The Tahitian coasting canoe was a dug-out with a gunwale sewn on with sennit. The large double canoes were built up from the keel, the planks being carefully adzed and then polished with coral and sewn together. Religious ceremonies were performed when the keel was laid down and when the canoe was launched. In Hawaii a special deity presided over the builders of canoes. In New Zealand, canoes sixty or eighty feet long were built of huge planks cut from

the solid tree and lashed together. The figure-heads and stern-posts were painted as well as elaborately carved. Sails of rushes were used, but not outriggers.

In the Melanesian canoes various *tindalo* charms were hung up at the stern to secure calm seas and prosperous voyages. The important canoes had names, and rejoicings followed their completion. A human life was required for their inauguration. In the Eastern Solomon Islands, if no life was taken on the first voyage, arrangements were made with a neighbouring chief that a victim should be forthcoming. Further west, captives were kept with a view to taking their heads when the canoes were finished (Codrington, 290 ff.).

12. Specialization.—An important factor in the development of an industry is the tendency towards specialization. This tendency appears at an early stage in human culture, mainly in three forms: specialization of locality, specialization of sex, and specialization of workers as a class.

The localization of an industry may arise from a variety of causes, but usually is to be attributed to a plentiful or peculiarly well-adapted supply of material in a given locality. In the Palaeolithic period in Europe flint implements were imported to the Channel Islands, for instance, probably from the adjacent French mainland, owing to local scarcity of suitable material. The large number of Neolithic implements of marked characteristics found at Pressigny in France, where the flint is specially suitable for making flakes of large size, suggests a localized industry, while both at Cissbury and Grime's Graves in England, where flint was mined, it is evident that there was a factory, from which partially manufactured implements were probably exported to localities which possessed either no local flint supplies or supplies of an inferior quality. Spiennes near Mons, and Caddington and Stoke Newington in England, may be mentioned among a number of sites where the character of the finds has suggested that they are the workshops of the craftsmen of the Stone Age.

In the Bronze Age, the distribution of material had a much less marked effect in promoting local efficiency in manufacture. In the earlier stages, it is true, favourable circumstances, e.g. an easily accessible supply of native copper, such as occurred in Egypt, Cyprus, and Western Asia, would determine the relative date of its utilization, and give these localities an advantage in experience. But the rapid advance in the civilization of southern Europe and the improvement in transport led to the exploitation of copper- and tin-producing localities, such as Cornwall and Spain, and the transport of the ores from these districts to the place of manufacture. The same course of development occurred in the Iron Age, where favourable circumstances for a time produced an early localized iron culture, of which evidence is found at Hallstatt.

Modern primitive races also afford examples of localized industries. The Nicobar Islands, for instance, are noted for their manufacture of clay pots. In Melanesia, canoe building was often the special work of certain towns because suitable timber was found near; other towns were celebrated for their fish-traps; the Samoans were famous for their mats (Brown, *Melanesians and Polynesians*, London, 1910, pp. 300 f., 304).

Owing to various causes—natural, economic, and religious—an early form of specialization in industry has been determined on sexual lines: i.e. certain spheres of activity have been customarily assigned to each sex. To man has fallen the provision of animal food, the care of cattle, the fashioning of weapons and most implements from stone and metal. Women, on the other hand, have been responsible for most of the useful arts in their early stages. The making of baskets, pottery, spinning, weaving, the preparation of skins, the making of clothes from cloth and skin, and the preparation of food, including the grind-

ing of corn, are among woman's duties, while agriculture was and still is among primitive races largely or exclusively woman's work, especially in Africa. On that continent, however, spinning, weaving, sewing, and the making of clothes not infrequently are the duty of the man (see E. Torday, 'The Bushongo of the Congo Free State,' *Rep. Brit. Assoc., Sheffield*, London, 1910, p. 735; and A. Werner, 195). Among the Indians of N. America, the provision of shelter, whether in the form of the skin tipi or the adobe buildings of the South-West, falls to the woman. In Borneo, among the pagan tribes, while the men build the house, the women assist in providing and bringing up the material.

In the case of most of the useful arts, it may be said that in the early stages they fall within the province of woman, and pass to man only when the machinery, even in such rudimentary form as the potter's wheel, is introduced. In Tunisia, in the country, the pottery, which is hand-made, is manufactured by women; in the towns, where wheel-made pottery is in use, it is made by men (Bertholon-Myres, 'Note on the Modern Pot Fabrics of Tunisia,' *Man*, iii. [1903] 86).

In the third form of specialization—that of manufacture by a family, class, or caste—religious and social influences predominate. Although no system of industrial organization so highly developed throughout as that of India is found among primitive races, something of an analogous character on a smaller scale is not uncommon. It is found in Polynesia, where the making of canoes was confined to a particular family. In Tikopia and Tonga, canoe-making was hereditary in certain families. In Tahiti the building of double canoes was confined to a privileged class attached to the household of the king; in Hawaii, to members of the royal family. In N. America, in many tribes only a particular class was allowed to make stone implements (Schoolcraft, *Indian Tribes*, Philad. 1853-57, iii. 81). In Tibet, occupations are hereditary. Among the Masai, to whom, as a tribe living by raiding, weapons were of supreme importance, but who held manual labour to be degrading, the smith's work was done by a servile tribe, the Elgunono.

A curious result followed from the practice of specialization in making canoes. In the Torres Islands the canoe-makers died out, with the consequence that the people were reduced to using catamarans of bamboo (Codrington, 293). It has been suggested that the present absence of pottery in Polynesia and in Melanesia, except in New Caledonia and Espiritu Santo, and to the north of these islands in Shortlands, Bougainville, and Buka, and again after an interval in New Guinea, and to the west in Fiji, is due to the dying-out of the people or caste who made the pottery of which remains have been found in Malakolo and Pentecost, Lepers Island, and Ambrym (W. H. R. Rivers, 'The Disappearance of Useful Arts,' in *Festschrift tillägnad Edvard Westermarck*, Helsingfors, 1912, pp. 109-130). The art of making stone adzes disappeared in Woodlark Island in like manner, through the dying out of skilled craftsmen (Seligmann-Strong, 'Anthropological Investigations in British New Guinea,' *Geog. Journ.*, 1906, p. 347).

An interesting example of primitive industrial organization existed in Samoa, where the trades of boat- and house-building, tattooing, etc., though not strictly hereditary, were carried on for generations by certain families, who thus acquired prestige. The trade was, however, open to any man who cared to attach himself to any craftsman until he had acquired sufficient skill to begin work on his own account. Each particular trade had its presiding god, and was governed by well-known regulations. The times of payment at different stages of the work were prescribed. In the case of building a house, a mat was presented to the master-builder, and its acceptance signified agreement to do the work. The members of the family for whom the house was being built did the unskilled labour, such as

falling trees, carting them from the bush, and the like. They also had to supply the carpenters' food, and these absented themselves from work if it was insufficient or of inferior quality. As the house progressed, payment was made for certain definite portions of the work, the principal payment being made when the two sides and one of the rounded ends were finished. It was considered a great honour to be lavish in payment. If the builders were dissatisfied with the payment, they left the work unfinished, and no other builder would complete it. If any one did, he was visited with severe punishment at the hands of other members of the craft. The regulations in trades other than building were practically the same (G. Brown, p. 305 ff.).

HANGING.—See CRIMES AND PUNISHMENTS.

HANĪFA.—See LAW (Muhammadan).

HAOMA.—1. Derivation of the word.—The word *haoma* (Skr. *soma*, Pahl. and Pers. *hom*) comes from an old Aryan root *hu* = Skr. *su*, 'to pound,' 'to squeeze.' *Hāvana*, the utensil in which the twigs of the *haoma* plant are pounded, *hāvan*, the *gāh*, or the part of the day when this plant is pounded, and *hāvanāna*, the priest who pounds it, come from the same root.

2. *Haoma* in the Avesta.—In the Avesta we meet with four *Haomas*:—(1) *Haoma*, whom for convenience' sake we may call *Haoma* the prophet. Chs. 9, 10, and 11 of the *Yasna* speak of him as well as of the plant *haoma* discovered by him. Further allusions are found in *Ys.* lvii. (19 and 20) and *Yashts* x. 88-90 and *Ashi* xvii. 5.—(2) *Haoma*, the plant; see esp. chs. 9, 10, and 11 of the *Yasna*. (3) *Haoma*, who may be called *Haoma* the hero (*Ys.* xi. 7; *Yt.* ix. 17, xvii. 37, 38).—(4) *Haoma Khvarenangha* (*Yt.* xiii. 116). In the *Fravardin Yasht* we have a long list of the departed worthies of ancient Irān who had rendered some service to the community. The group in which *Haoma Khvarenangha* is mentioned seems to be a list of the names of some of the immediate successors of Zoroaster. It appears, therefore, that this *Haoma Khvarenangha*, whose *fravashi* is invoked, was a great man of Irān, who had done some good deeds that commemorated his name.

These four different *Haomas* have one or more special names in the Avesta. *Haoma* the prophet is called *Haoma Dūraosha*. The plant *haoma* is spoken of as *haoma zairi* (e.g. *Ys.* ix. 17, 30, 32). *Haoma* the hero is known as *Haoma Frāshmi* (so repeatedly in the *Yashts*). The fourth *Haoma*, as we have said above, is named *Haoma Khvarenangha*.

Haoma the prophet is called *Frāshmi* as well as *Dūraosha*. The *Haoma Frāshmi* of the *Gōsh* and *Ash* *Yashts* is quite different from the *Haoma Frāshmi* of the *Yasna* and of *Yashts* x. and xi. The reason why these two *Haomas*, who lived at different times—one in the time of the Peshdādian dynasty, and the other in that of the Kāianian—are called *Frāshmi* seems to be that they both belonged to the same family stock.

Just as *Haoma* the prophet had, besides his special designation of *Dūraosha*, that of *Frāshmi*, so *haoma* the plant had, besides the special appellation of *zairi*, also that of *dūraosha* and *frāshmi* (*Ys.* x. 21, xiii. 5). It was called *zairi*, on account of its yellow or gold-like colour. The other appellations were due to the fact of its being discovered by *Haoma Dūraosha*, who was also known as *Haoma Frāshmi*.

3. *Haoma* the prophet.—It appears from the Avesta that there lived in ancient Irān a pious man named *Haoma*. He belonged to the early

times of the Peshdadian dynasty, before the time of Vivangiant (*Vivasat* of the Vedas), the father of Yima (*Yama* of the Vedas). He was a very learned man (*vaēdhyā-paiti*),¹ versed in the old religious literature. He had passed a good deal of his time in divine meditation on the Hukairya peak of the lonely mountains of the Elburz.² Before Zoroaster, he was the first man or prophet to proclaim to the world the Mazdayasnian religion.³ As Zoroaster had his own religious compositions, so had Haoma.⁴ He had his Gāthas⁵ (*imāosē tē haoma gāthāo*), and had as an opponent one Keresāni.⁶

It was this Haoma who gave his name to the plant, which he seems to have discovered, and to the Haoma ceremony, which he is said to have introduced. According to *Yasht* x.,⁷ he was the first man who produced the juice in a mortar (*hāvana*) on the Elburz mountain. It appears that, while absorbed in deep divine meditation in his retreat in the mountains, he discovered this plant growing on the heights, and found it to be nutritious, health-giving, and invigorating. He introduced it to the world as such; but, in order to make it doubly efficacious, he instituted a form of ritual, designed to absorb the mind of the people in holy and religious thoughts. A plant, in itself health-giving and vigorous, when partaken of under a partial inspiration of divine thoughts, was likely to be beneficial to the mind as well as to the body.

4. The Haoma plant.—*Haoma* is a medicinal plant which grows in Persia and in Afghanistan. It is a species of *Ephedra* (Nat. Ord. *Gnetaceae*).

(1) *The Avestan description of the plant.*—Mountains and mountain valleys are mentioned as places where the plant grows luxuriantly. In some passages, Mount Elburz (called in the Avesta *Ilara Berezaiti*) is specially mentioned as its habitat. But it must be borne in mind that the name Elburz not only denoted the present Mount Elburz, a peak of the Caucasus, but was applied to the whole range of mountains extending from the Hindu Kush in the East to the Caucasus in the West. The *haoma* is described as a plant with branches and sprigs,⁸ as possessing medicinal properties, and as 'golden-coloured.'⁹

(2) *The properties of haoma.*—The religious or spiritual properties attributed to the *haoma* plant are described in a rich poetical style, and in a tone overflowing with heartfelt admiration and praise. *Haoma*, prepared and drunk in a state of pious, spiritual inspiration, is believed to give wisdom, courage, success, health, increase, and greatness.¹⁰ In such a state the devotee becomes as powerful as an independent monarch, and is able to withstand many dangers coming from ill-disposed persons.¹¹ Heaven, health, long life, power to contend against evils, victory against enemies, and fore-warnings against coming dangers from thieves, murderers, and plunderers are the six gifts bestowed by *haoma* when adequately praised and prepared.¹² *Haoma* is specially sought for by young maidens in search of good husbands, by married women desirous of being mothers, and by students striving after knowledge.¹³ It affords special protection against the jealous, the evil-minded, and the spiteful.¹⁴ It is a check upon the influence of women of loose char-

acter, who change their affections as frequently as the wind changes the direction of the clouds.¹ For all these reasons, *haoma* is called *nmāna-paiti*, *vis-paiti*, *zantu-paiti*, *danghu-paiti*, i.e. 'Lord of the house, the village, the district, and the country.'²

(3) *Qualifications required of the man who would drink haoma with advantage.*—These are: good thoughts, good words, good deeds, obedience to God, and righteousness.³ On the other hand, *Haoma* curses those who are sinful and evil-disposed. 'I, *Haoma*, who am holy and keeper away of death, am not a protector of the sinful.'⁴ 'May thou be childless, and may evil be spoken of thee.'⁵

5. Antiquity of the Haoma ceremony.—It appears from the Avesta that the Haoma ceremony was in existence as early as the time of the Peshdadian dynasty. It is as old as the time when the ancestors of the Parsis and the Hindus, and even of the ancient Romans, dwelt together. It seems to have been always accompanied by the Barsom (*q.v.*) ceremony, as it is even at the present day. Now, it appears that the ancient *flamines*, who were the Roman fire-priests, and many of whose practices resembled those of the *āthrauvans*, or Iranian fire-priests, used twigs of a particular tree, whenever they went before the sacred fire. This practice resembles that of the Parsi priests, who also use twigs of a particular tree when performing the Yasna ceremony before the fire. The twigs are now replaced to a certain extent by metallic wires.

6. The plant used after purification.—We said above that the twigs of the plant are brought from Persia. They are not used directly in the ceremony. On being taken to a temple, or *dar-i-meher*, they are washed and purified, and then laid aside for a period of at least thirteen months. A qualified priest takes a quantity of these twigs, and washes and purifies them with water, reciting the formula of *Khshnothra Ahurahe Mazdao, Ashem Vohu*, etc., which means: 'Pleased be Ahura Mazda. Piety is the best good and happiness. Happiness to him who is pious for the best piety.' After being thus purified with water, the twigs are kept in a metallic box, similarly washed and purified, for at least thirteen months and thirteen days before being used in the ceremony. When so prepared and purified, they can be used several years afterwards. This ceremony has no direct connexion with the Yasna ceremony.

The *Vendidad* (vi. 42, 43) enjoins the purification of those *haoma* twigs which have come into actual contact with filth and impurities; but present custom, which is designed to make assurance doubly sure, demands the purification of all *haoma* twigs intended for use in religious ceremonies. Again, the *Vendidad* requires the twigs to be laid aside for one year; but present custom prescribes a period of thirteen months and thirteen days.

7. Description of the Haoma ceremony.—This falls under four heads: (1) the preliminary preparations; (2) the ceremony of purifying or consecrating the *haoma* twigs; (3) the ceremony of preparing and straining the *haoma* juice; (4) the ceremony of drinking the *haoma* juice.

(1) *Preliminary preparations.*—Two priests take part at this stage, as in the whole of the Yasna ceremony. One of them with the *khub* (i.e. ritual for qualification), either small or great, duly observed, first prepares the *aiwyaōnghana* (strips of date-palm), the *urvarām* (twigs of a pomegranate tree), and the *jivām* (fresh goat's milk). All the *ālāt* (the necessary sacred utensils) are emptied, washed, and put into the *kundi* (the large water vessel on the stone slab supplied for it). The fire is kindled in the vase, and the *āesam* (fragrant wood) and *bui* (frankincense) are placed on the adjoining stone. Two water-pots—one small and the other

³ *Ys.* ix. 28. ⁴ *Yt.* xviii. 5. ⁵ *Ys.* x. 13.

⁶ *Ys.* ix. 24. ⁷ *Yt.* x. 90.

⁸ The Avesta word for this is *frašperega*, in which *fra* is a prefix, and *sperega* is the same as English 'sprig.'

⁹ The Avesta word is *zairi-gaona*, which some Orientalists take to mean 'green-coloured.' But, as green is the usual colour of vegetation, there was no apparent necessity to say so. The writer seems to mean 'yellow' or 'gold-coloured,' in which sense the word is also used elsewhere.

large—are placed on the *khvān*, or stone slab for the *ālāt*. The cup containing the *aiwyaōnghana* and the *urvarām* is placed on a small stone by the side of the stone slab on which the priest sits. The *haoma* twigs are also ready by his side in a cup. The officiating priest (*zaota*) now takes his seat on his stone slab, which is covered with a carpet. He makes *pāv* (ceremonially pure) the smaller of the two water-pots, and with the water of that pot makes the *kundi* containing all the utensils *pāv*. He then prepares the *zaothra* water and ties the *barsom* wires. Having done all this, he next proceeds to make the *haoma* twigs *pāv*.

(2) *The ritual of purifying the haoma twigs.*—The priest takes a few pieces or twigs of the *haoma* plant out of a cup, and, holding them between the fingers of his right hand, washes them thrice with the *pāv* water. While doing so, he recites the *Khshnaōthra* formula three times. He then commences the *bāj* and the *khshnuman* of *Haoma asha-vazangha*, wherein he says that he does this for the homage, glory, pleasure, and praise of *Haoma*, the giver of the strength of purity. Then, reciting the *Ashem* four times, he dips both his hands, together with the twigs, in the *kundi* on his right hand. He dips them four times into the water—thrice in the direction pointing from his position to the opposite side (i.e. from north to south), and once in the opposite direction. Having thus made the twigs *pāv*, he finishes the *bāj*, and dips the purified twigs in the *zaothra* water. Then, drawing the *hāvana* before him, he inverts it and places on it three pieces of the consecrated *haoma* twig; the rest are placed over the foot of the *māh-rui* ('moon-faced'; two crescent-like stands). He next places a piece of the *urvarām* beside the *haoma* twigs.

(3) *The ceremony of preparing and straining the haoma juice.*—The priest begins by saying: 'I invoke all the belongings (i.e. the requisites for the performance of the ceremony) of the *Haoma*, for the sake of *Ahura Mazda*.' Then he enumerates some of the important requisites which lie before him on the stone slab. While reciting their names, he looks at them. The requisites which he enumerates are: *haoma*, *myzda* (i.e. the *darun*, or sacred bread, which is spoken of as *kharethem myzdem*, 'appropriate or sacred food'), the consecrated water (*zaothra*), the twigs (*barema*), some product of the cow such as fresh milk (*goshulō* or *gēush hūdāō*), a twig of the pomegranate tree (*urvarām hadhānuipātām*), pure good water (*aiwyo vanguhibyo*), mortar for pounding the *haoma* (*hāvana*), fragrant wood (*āesam*) and frankincense (*baoidhi* or *bui*), and fire (*āthra*). The prayer, in which he invokes or enumerates the requisites, and, while reciting their names, looks at each of them as they lie before him on the stone slab, forms a part of the 24th chapter of the *Yasna*. He recites that chapter from section 1 to section 12, omitting therefrom, in sections 1 and 6, the words, *imāmcha jivām ashaya uzdtām* ('this *jivām*, or fresh milk, held up with righteousness'), because, at the time when he recites this prayer, the *jivām* is not yet placed on the stone slab. Sections 9 to 12 of this 24th chapter are the same as sections 4 to 7 of the fourth chapter.

The *Haoma* ceremony may be performed either in the *hāvan-gāh* or in the *kushain-gāh*, i.e. during the morning or the midnight hours. So, after reciting the first 12 sections of the 24th chapter, the priest recites the 13th section if he prepares the *haoma* juice in the *hāvan-gāh*, or the 17th section, if he prepares it in the *kushain-gāh*. Having thus recited the *khshnuman* of the particular *gāh* during which the ceremony is performed, he recites the *khshnuman* formula of the particular day of the month and the particular month of the year on which he performs the ceremony. Then he proceeds

to recite the prayers contained in the 4th chapter of the *Yasna* from section 17 to 25 up to the word *vahishtad*, omitting the portions which refer to *rathwō berezato* and *sraoshahē ashychē* (in sections 22 and 23). Next he recites the prayers contained in the 25th chapter of the *Yasna*, from section 1 to 3, omitting the reference to *gām jivām* (fresh milk) in section 1. On reciting the words *Ameshā spentā* (ch. xxv. sect. 1 of Spiegel), the priest holds between the thumb and the forefinger of his left hand the twigs of the *haoma* and pomegranate plants which were on the foot of the inverted *hāvana* and, lifting the latter with his right hand, knocks it thrice in its inverted position on the stone slab, and places it in its proper position. Then, reciting the words *imām Haomem*, etc. (ib. sect. 2, Spiegel), and taking the *haoma* twigs into his right hand from his left hand, he places them in the *hāvana*, or mortar. Next, reciting the words *imāmcha urvarām*, etc. (ib. sect. 4), he similarly places the *urvarām*, or pomegranate twigs, in the mortar. Reciting the words *aiwyo vanguhibyo*, etc. (ib. sects. 5 to 11, Spiegel), he pours into the mortar, with his right hand, a few drops of the *zaothra* water which lies before him. He now invokes the *Fravashi*, or Guardian Spirit, of *Zoroaster* by reciting *Yasna* xxvi. 11 (Spiegel). Then, reciting the words *iristanām urvānō* (ib. 35) and the *yēnghe hitām* prayers, he takes out of the *kundi* the *surākhār tashā* (i.e. the plate with holes which serves as a strainer) and places it on the *haoma* cup at the foot of the *māh-rui*. Reciting *athā rutush ashātehit hachā*, etc., he removes the *lālā*, or pestle, from the *kundi*, passing it round in a circle within the vessel, touching its rim from within. The circle begins from the north and passes in the direction of west, south, and east. Then, reciting the words *aitat dim*, etc. (Ys. xxvii. 1, Spiegel), he lets the lower end of the pestle, and, while reciting the words *ratūmcha yim*, etc. (ib. sect. 1), the upper end of the pestle, touch the stone slab. As he recites the words *snathāi*, etc. (ib. sect. 2, Spiegel), which signify that the *Daēvas*, or evil influences, may be beaten or struck, he strikes the metallic mortar with the pestle, making sonorous sounds. At first he strikes it from without, i.e. strikes the pestle on the outer rim of the mortar. The sonorous blows are given in the order of east, south, west, north. When striking on the north side, he gives three more strokes. Then both the priests say, *Shekuste Ganā-minō*, etc., in *bāj*, i.e. 'May the Evil Spirit be broken! May 100,000 curses be on *Ahriman*!' The priest then recites *Fradathāi Ahurahē Muzilāo* (Ys. xxvii. 3-7, Spiegel). Next he recites four *Yathā ahū vairyōs*. While reciting the first three, he pounds the *haoma* and the *urvarām* twigs in the mortar; and, while reciting the fourth, he strikes the *hāvana* on the outside with the pestle. In like manner he recites *Mazdā at mōi* (ib. 8, Spiegel; or Ys. xxxiv. 15) four times, to the accompaniment of a similar pounding during the first three recitals and a striking of the *hāvanim* during the fourth. This is followed by a recital of *A Airyamā ihyo* (ib. 9, Spiegel; or liv. 1) with like pounding and striking. Next comes the recital of three *Ashem vohus*, during which the priest pours a little of the *zaothra* water into the mortar three times. Then, while reciting the words *Haoma pairi-hareshyante* (Ys. xxvii. 10, Spiegel), he gives a little push to the pestle which is within the mortar, and causes it to turn a circle in the direction of north, west, south, east.¹ While reciting the words *athā, simē, humayō, tara*, which

¹ This part of the ritual is a relic of the old practice, when, after being pounded, the *haoma* twigs were regularly rubbed in the mortar with the pestle to extract the juice further—a process now known as *gūntrū*.

form the last part of this passage, he takes up the twigs of the *haoma* and the *urvarām* from the mortar between his thumb and fingers; and, holding the pestle also, he touches or brings these in contact with the *barsom*, the plate of *jivām*, the *haoma* cup at the foot of the *māh-rui*, and the stone slab. At the last word *anghen* he places the twigs and the pestle in the mortar again. He then recites four *Yathā ahū vairiōs*, during the recital of the first three of which he pounds the twigs. He strikes the *havan* during the recital of the fourth. During each of the first three recitals and poundings, he pours a little of the *zaothra* water into the mortar with his left hand at the recital of the words *athā*, *ashāt*, and *hachā*. At the end of each *Yathā ahū vairiō*, he pours the *haoma* juice so pounded over the pestle, which is held with the left hand over the strainer. From the strainer the juice passes into the *haoma* cup below. The recital of the fourth *Yathā ahū vairiō* is accompanied by the striking of the mortar. At the end of this, the whole of the *haoma* juice is passed into the cup, as described above. If any particles of the twigs still remain unpounded, they are removed from the mortar and placed in the strainer, where they are rubbed with the hand to make all the extract pass into the cup below. During this process of rubbing, the priest recites thrice *yē sevishō*, etc. (xxvii. 11, Spiegel, or xxxiii. 11). The strainer is then washed and placed over the mortar. The particles of the twigs still left unpounded or undissolved are removed and placed in an adjoining clean corner. The pestle is washed and placed in the *kundi*.

The next ceremonial process is that of straining the *haoma* juice again with the help of the *varas ni viti*, i.e. the ring entwined with the hair of the sacred bull. The *varas* is put over the strainer (*surākhdūr tashā*, 'perforated plate'). The priest holds the cup containing the *zaothra* water in his left hand, and places his right hand over the knotty part of the *varas* in the strainer. He recites *us mōi uzāreshvā*, etc. (Ys. xxxiii. 12-14), at the same time pouring the *zaothra* water over the *varas*, and rubbing the knots of the *varas*. He recites two *Ashem vohū*s, the second of which is in *bāj*. He then holds the strainer with the *varas* in his right hand, and the cup containing the *haoma* juice in his left hand; and, repeating *Hunata, hūkhata, hvarshata* thrice, pours the *haoma* juice into the strainer, which is held in different positions over the *khvān*, or stone slab, as the different words of the triad are repeated. While reciting the word *Hunata* each time, he holds the strainer over the right hand of the stone slab, so that the *haoma* juice falls over it through the strainer. On each recital of the word *Hūkhata*, the *haoma* juice is similarly dropped into the cup of the *zaothra* water, which has just been emptied into the mortar through the strainer, and the *varas* with it. At each recital of the word *Hvarshata*, the *haoma* water is allowed to drop into the mortar. The *haoma* juice-cup is now put back in its proper place on the stone slab, and the strainer with the *varas* is placed over it. Then all the juice in the mortar—a mixture of the *zaothra* water and the *haoma* juice, or, more properly speaking, the juice of the *haoma* and the *urvarām* twigs—is poured into the strainer, through which it passes into the *haoma* cup below. After its contents have been thus emptied, the mortar is once more put in its proper place. The milk-plate (*jivām no tashō*) is placed at the foot of the *māh-rui*. The priest also sets the other cups and plates in their proper places. He deposits in their proper place some of the spare twigs of the *haoma* and the *urvarām* which are at the foot of the *māh-rui*. He places some of these in a spare cup and lets fall over them

a few drops of the *haoma* juice prepared and collected in the cup, as described above.

It is at this stage that the other priest who is to join him in the recital of the *Yasna*, and who is now to act as the *zaota*, enters the *yazashna-gāh*. Reciting an *Ashem vohū* and a certain number of *Yathā ahū vairiōs*, the number of which depends on the particular kind of *Yasna* to be performed, he goes before the *khvān* of fire and purifies or consecrates the fire. The priest who has performed the ceremony of straining the *haoma* now takes the *zaothra* wire of the *barsom* in his left hand, and the *varas* ring in his right hand, and finishes the *bāj* of the *varas* which he had commenced some time before. To do this he recites two *Yathā ahū vairiōs* and the *Yasnemcha* with the *khshnuman* of the *Fravashi* of Zoroaster. He next dips the *varas* ring in the *zaothra* water cup and places it in its own cup. He then rises from his seat, and, taking the *haoma* cup which contains the juice prepared and strained, as above, places it in an adjoining niche of the wall. He brings the *jivām* and pours it into its plate (*jivām no tashō*). In a plate on the stone slab he now places the *darun*, or sacred bread, which was up till now in another vessel in the *yazashna-gāh*. He then recites an *Ashem vohū* and *Ahmāi raēshchā*, etc., finishes the *bāj*, and performs the *kushti*.

This closes the ceremony of preparing the *haoma* juice, more properly spoken of as the ceremony of straining the *haoma* (*Hom gālō*). With its completion terminates the *paragnā*, i.e. the first or the preliminary preparatory ceremony of the *Yasna*. The second priest, who has now entered the *yazashna-gāh* and who is to recite the whole of the *Yasna*, mounts the stone slab or platform which serves as a seat. As he does so, he recites two *Yathā ahū vairiōs*. While uttering the word *shyaothmanām* of one *yathā* he places his right foot over it, and, while reciting the same word of the second, his left foot.

The *Dādistan-i Dinik* (xlviii. 80-38) tries to explain part of the symbolism of the ceremony for preparing and straining the *haoma* juice. For example, the *haoma* twigs are pounded during the recital of four *Ashvans*. These four poundings symbolize the coming of Zoroaster and his three future apostles. 'The pure Hom, which is squeezed out by four applications of holy water (*zōrīh*) with religious formulas, is noted even as a similitude of the understanding and birth of the four apostles bringing the good religion, who are he who was the blessed Zarātūst and they who are to be Hūshēdar, Hūshēdar-māh, and Sōshāns.¹ The striking of the metallic *āvana* while pounding and straining the *haoma* reminds one of the triad of thought, word, and deed on which the ethics of Zoroastrianism rests. The *Dādistan* says on this point: 'The metal mortar (*hūvan*) which is struck during the squeezing of the Hōm, and its sound is evoked along with the words of the Avesta, which becomes a reminder of the thoughts, words, and deeds on the coming of those true apostles into the world.'²

The three ceremonial processes of pouring the *zaothra* water into the *haoma* mortar for the preparation of the juice are symbolical of the three processes of the formation of rain in Nature, viz. (1) evaporation, (2) formation of clouds, and (3) condensation as rain.³

The juice, prepared as above, by pounding the *haoma* twigs together with the *urvarām* in the *zaothra* water, is called *para-haoma*.

(4) *The ceremony of drinking the haoma.*—The last ceremony in connexion with *haoma* is that of drinking it. We saw above that its preparation and straining formed a part of *paragnā*, i.e. the ceremony preparatory to the performance of the *Yasna*. The ceremony of drinking it forms a part of the *Yasna* itself. It begins with the recital of the 9th chapter, and finishes with the recital of the 11th. In these three chapters the priest sings the praises of *haoma*. The *zaota* describes in a highly poetical strain the good qualities of the *haoma* juice which lies before him. On his finishing the description and the praises of *haoma*, at the 8th section of the 11th chapter, his colleague, the *rāspi*

¹ SEE xviii. 170.

² *Id.*

³ *Id.* 170f.

or *ātravakhshi*, makes his hand *pāu*, and, coming to the *zaota*, lifts the cup containing the *haoma* juice from the stone slab, carries it round the sacred fire in the vase on the slab opposite, at the same time taking the *nēsam bui* (sandalwood and frankincense) from their stone slabs, and placing them on the fire. He then comes back to the *zaota*, and, holding the cup over the *barsom-dān*, says to the *zaota*: 'May the *haoma* juice be of twofold, threefold . . . ninefold efficacy to you.' Next he hands the juice-cup to the *zaota*, who, holding it in his hand, looks into it, again addresses a few words of praise, and prays that the drinking of it may bring spiritual happiness to him. Finally, he holds up his *padān*, or cloth veil, to his mouth and drinks the *haoma*. He does not drink the whole quantity at once, but in three draughts. In the interval between each of the three draughts the *rāthvi* recites an *Ashem vohū*.

During the recital of the *Yasna*, the *haoma* juice is prepared and strained twice. As described above, at first it is prepared and strained by one priest in the preparatory *payagnā* ceremony. It is drunk by another priest during the recital of the 11th chapter of the *Yasna*. Then the priest who drank it prepares it a second time during the recital of the three chapters of the *Yasna* from the 25th to the 27th. The process of pounding the *haoma* twigs and striking the mortar continues during the recital of the 32nd, 33rd, and 34th chapters, with which the second preparation terminates. Though the ceremony proper commences for the second time during the recital of the 25th chapter, it may be said to begin with the 22nd chapter, because all the requisites of the ceremony are enumerated and invoked at its commencement. These two preparations and poundings are spoken of in the *Avesta* (*Ys. x. 2*) as *frātarem hāvanem* and *uparem hāvanem*, i.e. the first and the second squeezing of the *haoma*.

LITERATURE.—For an analysis of the three chapters of the *Yasna* on *Haoma*, etc., see *Journal of the Bombay Anthropological Society*, vol. vii. no. 3 (1904), p. 203.

JIVANJI JAMSHEDJI MODI.

HAPPINESS.—This term belongs to the ethical rather than to the psychological sphere, though referring to a condition of mental life. In ethics its use has been almost universal, yet in such varying senses that the substitution for it of its more definite equivalents is much to be desired. A formal and a material meaning may be distinguished, the latter subject to a threefold division.

1. **Formal meaning.**—The practical human good, the ultimate end of action. In this sense 'happiness' is a mere abstract term for the desirable in life, implying nothing as to its concrete constituents.

Thus Zeller: 'This conception is in itself a purely formal one, admitting of any desired material interpretation' (*Vorträge*, 1865-84, iii. 209). Also Sorley: 'To say that the ethical end is happiness, is, to use Locke's terminology, "a trifling proposition"; for, in so doing we merely give it a name' (*Ethics of Naturalism*, 1885, p. 7).

Aristotle (*Nic. Ethics*, i.) assumes that all men agree in calling the good 'happiness,' but differ widely as to what constitutes it. This was true for the ancient world, and for some modern thinkers of the Greek type, but is no longer universally the case. Happiness has come to include various specific concrete meanings which are particular and debatable interpretations of the good, and not merely equivalent names for it, though the latter is sometimes claimed by Hedonists for their own interpretation (J. S. Mill, *Utilitarianism*, ch. iv.). Kant and his successors, especially, deny the possibility of happiness being either the only or the supreme good, though it is an element in the complete good. This formal use of the term

should therefore be abandoned in favour of the more abstract term 'good' or 'ultimate end of action.'

2. **Material meaning.**—(a) *Pleasure, or the absence of pain.*—This is the meaning which has been given to the term by Utilitarians since Gay, and which has been advocated by Sidgwick (*Methods of Ethics*⁶, p. 120) as the only legitimate and unambiguous interpretation. Pleasure is to be taken in this definition in its psychological sense, as pleasurable feeling, not as pleasant object. J. S. Mill, by his assertion of qualitative differences in pleasure, and hence in happiness, forms an exception to the Utilitarian tradition, using the term 'happiness' in its second (material) meaning as the pleasure of an objectively higher order of activity (*Utilitarianism*, ch. ii.). Kant's usage agrees with that of the orthodox Utilitarians, although he puts an opposite ethical value upon the idea (*Werke*, ed. Rosenkranz, 1838-40).

'The notion of happiness . . . is only a general name for the subjective determining principles' (viii. 137). 'A rational being's consciousness of the pleasantness of life uninterruptedly accompanying his whole existence is happiness' (*ib.* 129).

This happiness, as merely the feeling accompanying the satisfaction of desires, is qualitatively alike, irrespective of the nature of the objects causing the satisfaction. As such, it furnishes no objective and necessary law for conduct, but is only a name for the satisfaction of any and every desire.

(b) *The feeling accompanying the systematic activity of the whole self, the feeling of self-activity or self-realization.*—In this sense, 'happiness' is distinguished from 'pleasure,' which is limited to the feeling accompanying partial or limited activities.

'It is the form of feeling which accompanies the harmonious adjustment of the various elements in our lives within an ideal unity' (J. S. Mackenzie, *Man. of Ethics* 4, 1900, bk. ii. ch. v. § 14). 'Happiness is not the sum or aggregate of pleasures; it is their harmony or system—or rather, the feeling of this harmony' (J. Seth, *Ethical Principles*¹⁰, p. 203). 'Pleasure is transitory and relative, enduring only while some special activity endures, and having reference only to that activity. Happiness is permanent and universal. . . . Happiness is the feeling of the whole self, as opposed to the feeling of some one aspect of self' (J. Dewey, *Psychology*, 1887, p. 293). Mill's conception of happiness as consisting in the pleasures of the exercise of the peculiarly human or higher faculties belongs to the same category.

This distinction between happiness and pleasure has been criticized by Kant (viii. 130) and others, on the ground that it is based upon the nature of the objects causing the feeling rather than upon the nature of the feeling itself, and, therefore, that happiness does not differ qualitatively from pleasure, inasmuch as it allows no end of action other than that of pleasure. As Ladd puts it (*Philosophy of Conduct*, p. 479):

'Ethics can divide pleasures into higher and lower, noble and ignoble, or difference [*sic*] pleasure from happiness or even from blessedness, only by introducing into the psychological conception of pleasure-pains something from the outside. That something is a standard of moral values.'

While this criticism is valid psychologically against the attempt to distinguish qualities in pleasure, and is also valid ethically against the attempt to make happiness, as a distinct kind of feeling, the moral end, it does not necessarily invalidate this use of the term in the authors criticized. Although the pleasure of partial and that of systematic activity may be alike in kind, it may still be convenient to use the term 'happiness' to denote the latter, even though its moral significance be derived wholly from the character of the activities which condition it. Happiness would thus denote the affective side of the virtuous life. So Spinoza: 'Happiness is not the reward of virtue, but virtue itself' (*Ethics*, bk. v. prop. 42). This use of the term, however, while justifiable, is too susceptible of misinterpretation to be retained.

(c) *Welfare, the right condition of activity, the harmonious life itself.*—'The good of man [or happiness] is an activity of the soul in accordance with excellence, or, if there are more excellences than one, in accordance with the best and most perfect excellence' (Aristotle, *Nic. Ethics*, i. ch. vi.). The emphasis here is upon the complete life rather than upon any one aspect of it, such as pleasure. The doing perfectly what one is fitted to do constitutes happiness, which will be accompanied by pleasure though not constituted by it. This use of the term is becoming infrequent, save as the translation of Aristotle's *eudaimonia*, and even here the term 'welfare' (*q.v.*) is being recognized as more appropriate.

3. The moral significance ascribed to happiness furnishes a principle for the classification of ethical systems. Kant's division is the basis for most modern classifications: (a) *autonomous* (end as self-given); (b) *heteronomous* (end as given from without), subdivided into (1) *empirical*, including all systems which make happiness the end, and (2) *rational*, including all which make perfection the end. Happiness and perfection thus constitute the two material ends as opposed to a formal conception which places the good in the bare form of will rather than in any end to be attained by it. The idea of happiness as an end carries with it all the ambiguities of its definition, and systems which propose this end receive different names accordingly.

(i.) 'Hedonism' (*q.v.*) is the term applied to systems which propose happiness in the first sense as the end. It may be *universalistic* or *egoistic*. (ii.) 'Hedonism' should also be the term applied to systems in which the second meaning of happiness is taken as the end, since a kind of pleasure is still pleasure. Such systems, however, are few. J. S. Mill is representative in that professedly, at least, he takes a special kind of feeling as the end. Those who use the term 'happiness' in this sense are usually careful not to assert it as the ultimate end, but to make it only an aspect or concomitant of the end (Mackenzie, Seth). (iii.) 'Eudæmonism' (*q.v.*) is a name adopted by some who posit happiness in the sense of welfare as the end. 'Complete Eudæmonism is the doctrine that the Good is found in the complete rationalisation of desire' (J. Seth, *op. cit.* 233). 'Self-realization' states the same position from a more Hegelian point of view. 'Energiem' is Paulsen's title for his revived Greek position. In this third use of the term it includes, rather than excludes, perfection as an end. It is equivalent to the complete enjoyment of perfection as well as perfection itself. It is the bloom of perfection. It is only in its first two meanings that happiness excludes perfection as an end. Zeller (*op. cit.* 210) defines the term as the equivalent of 'Hedonism'; so also Wundt (*Ethics*, 1897-1901, ii. ch. iv.).

NORMAN WILDE.

HAPPINESS (Buddhist).—The word *sukha* in Buddhism covers, in extension, both the relatively static state which we name happiness or felicity, and the conscious moments of such a state, to which our psychology refers as pleasurable or pleasant feeling. There are other terms of happy import, but none so broadly comprehensive. *Sukha*

is applied alike to physical health, material well-being, and spiritual beatitude. Etymologically the word has no connexion with hap, happening, or luck. Grammarians assume that the second syllable, *-khi*, is a substantival affix to *su*, 'well' (= Greek *eu*). The word would then be equivalent to the original meaning of our 'weal-th.'

In Buddhist psychological analysis, feeling, or emotional sentence (*vedanā*), is resolved into three phases: *sukha*, *dukkha* (pain), and *adukkhamasukha* (neutral feeling). The last of these, to which modern psychology in the main ascribes a mere zero point between positive degrees of the first and second phases, is in Buddhism ranked as an equally distinguishable constituent of consciousness (*Majjhima*, i. 302; *Samyutta*, iv. 223 f.). We do, indeed, meet with a layman who pronounces a twofold division of feeling more orthodox (*Maj.* i. 59; *Sam.*, loc. cit.). But the Buddha, when appealed to, explained that he divided feeling variously, according to the aspect under which he was treating of it in his teaching (cf. his method in another connexion, *Maj.* iii. 62). When, e.g., he distinguished feeling under two heads, he was treating of sensuous feeling and spiritual emotion, to both of which the term *sukha* was applicable.

We may pause, before considering the teaching attributed to the Buddha on *sukha*, to note the way in which, in one of the canonical dialogues, the psychological analysis of feeling is applied to ethical training. The teacher is the noted woman apostle Dhammaddinnā. (She finally refers her interlocutor—her husband—to the Buddha, who endorses all she has said.) She first gives the orthodox division (as stated above), and then adds a dictionary definition of each kind. She is then asked: 'In happy feeling, what is happy, what is unhappy? In unhappy feeling, what is unhappy, what is happy? In neutral feeling, what is happy, what is unhappy?' She replies: 'In happy feeling, the static (element) is happy, change is unhappy; the inverse for unhappy feeling. In neutral feeling, knowledge is happy, want of knowledge is unhappy feeling'—an answer that reveals the weakness of the threefold division as an analysis of bare feeling. She is then asked: 'What is our latent bias (*anuvaya*) when experiencing each of these three modes?' The answer is: passion (or lust, *rāga*), aversion (or resentment, *paṭigha*), and ignorance (*avijjā*) respectively. But, she adds, when questioned further, not all feeling, of any of the three kinds, is thus tainted. Ethically, she goes on, it is these three forms of bias that we have severally to eliminate from the three modes of feeling. This may be accomplished by the practice of *jhāna* (see *DIYĀNA*). In the first stage, sensuous desires and immoral or wrong ideas are banished, the intellect being engaged with happy zest about a certain selected object. In the second and third stages, through the strong yearning to attain the blissful serenity of the saints (*ārya*), all resentment and opposed feeling melt away. And in the fourth stage, wherein all positive feeling fades into indifference and perfect clarity of mind is attained, ignorance is banished. She is finally asked: 'What is comparable to happy feeling, to painful, to neutral feeling?' She replies: '(1) Happy and painful feeling are mutually comparable; (2) neutral feeling is comparable with ignorance; (3) ignorance again is comparable with knowledge; (4) knowledge with spiritual emancipation, and this again with Nibbāna. Nibbāna alone is incomparable, as being *suvisuddha*.' Hereon Buddhaghosa comments that the comparison (*paṭibhāga*, cf. *Mittāda*, ii. 186) in (1) and (3) is of opposites, but in (2), because of the vagueness of neutral feeling, and again in (4), the comparison is of similars.¹

Bearing this archaic but authoritative analysis in mind, we may proceed to consider the explanation which the Buddha is said to have given concerning his treatment of feeling under a twofold aspect of pleasure or happy emotion. The dissenting layman, mentioned above, had alleged that 'neutral feeling' was identical with happiness, namely, with happiness of a loftier kind. Warning his two interlocutors that discords might arise, if the mere framework of his various discourses on feeling—two heads, three, five, six, eighteen—was taken as essential, Gotama briefly stated the sources and kinds of sensuous pleasure and desire. 'The pleasure and happiness arising from these five senses we call happiness of worldly desire' (*kāmasukha*; see *DESIRE* [Buddhist]). He then proceeded to soothe and elevate his two disputants by affirmations of the loftier joys arising in con-

¹ Neumann, in his tr. of the Sutta, has mistaken the meaning of *paṭibhāga*.

nexion with the practice of *jhāna*. The brief discourse has been set down by the compilers with the rhythmic progress and iteration of the Suttanta refrains, suitable for oral teaching. He commences with this refrain:

'With him who should say: "This is the supreme happiness and pleasure (or joy, *somanassa* = mental happiness) that beings experience," I do not agree. And why? Than such happiness there is another happiness sweeter and more excellent. And what is that?'

In successive replies it is pointed out that the stages of *jhāna*, four of *rūpajhāna*, five of *arūpajhāna*, are each of them a sweeter and loftier happiness than *kāmasukha* and each preceding mode of *sukha*. The last stage of *arūpajhāna* was the attainment of catalepsy or trance, described in the usual formula, elsewhere amplified, as 'the cessation of perception and sensation.' Nevertheless, of this also 'happiness sweeter and more excellent' is predicated. Then, to defend the position and to withdraw the original bone of dissent, Gotama concluded:

'Other teachers may say: "The Samana Gotama predicates happiness of the trance-stage: what and how is that?" Thus are they to be answered: "Friend, the Exalted One does not predicate happiness only where there is happy (pleasurable) feeling; he also predicates happiness wherever and whereinsoever happiness is found to exist."

These observations, referring his hearers, as always, to the spirit rather than to the letter, were the Buddha's method of teaching that the word *sukha* could represent concrete states of being, activities, ideas, memories associated with happy consciousness and genuine 'well-being,' no less than the pleasurable feeling discerned by analysis. He might have extended his final remark to most of the preceding stages of *jhāna*; for whereas, in the first three stages, the happy feeling, accompanied in the first two by that zest of pursuit known as *pīti*, is the prevailing factor, the fourth *jhāna* is explicitly defined as a state wherein all positive feeling, joyous or melancholy, is merged in neutral feeling, so that the consciousness is one of complete equanimity and clarity of mind.

A unique compound may here be adduced—*upekkhāsukha*—occurring in *Anguttara*, iv. 412, as the conscious state which was to cease when the fourth *jhāna* was attained, and which can, therefore, only be taken to mean the happy feeling of, or belonging to, or accompanying equanimity.

Sukha was, moreover, the predominating nature of celestial existence, so far at least as the six realms of *devas* in the *Kāmaloka* extended. To re-birth in these heavens the moral average layman aspired, believing that he would there enjoy pleasures of a sensuous sort, but intenser, more numerous, and less fleeting than those of earth (cf. Rhys Davids, *Dialogues of the Buddha*, ii. 353 ff., 242 ff., 265). Nor would he, as *deva* or *devaputta* (son of the gods), be incapable of loftier emotions and satisfactions to which the term *sukha* might equally apply; witness the behaviour, in many Buddhist legends told in *Nikāya* and *Jātaka*, of the sentiments of Sakka, god of a *Kāma*-realm, and of those of the many *devas* who flocked to earth to hear the Buddha and his saints preach, or to commune with and admonish here and there a saint *in spe*.

Sukha, then, we repeat, is of very wide import, covering all three: pleasure, pleasurable feeling, and happiness; and it is equally applicable to the lowest and loftiest kinds of experience so designated. We have also seen that the neutral feeling accompanying vague intellection merges into positively happy feeling when the vagueness passes; and, again, that absorbed reverie and abstract contemplation, if rightly induced and persisted in, lead to emotionless quasi-ecstatic states which can also be described as *sukha*, because they are a means whereby the saintly life is nourished and advanced.

In the next place, the natural desire of mankind

to attain happiness and avoid pain and sorrow is fully recognized, believed in, justified, and exploited by Buddhism. As a system of ethical philosophy, it may be classed as frankly eudæmonistic or hedonist, i.e. neither egoistically nor altruistically so, but of the kind termed by H. Sidgwick 'Universalistic Hedonism.' It recognizes in happiness an ultimate to which every human aspiration is in the last resort reducible. Accepting the current proverbs of the day, it sees in happiness the crowning result of mundane wisdom (*Theragāthā*, 293). Happy re-birth, as a *deva* or as a fortunate human being, is the legitimate quest urged on the laity and the simpler-minded, less saintly *bhikkhu* (*Digha*, iii. 181, 185, 191 f.; *Ang.* i. 58, ii. 192, iii. 76 ff.). Meritorious acts are justified as happiness-bringing (*sukkhāpahāni*) for self and others, and the latter is the ultimate test of the worth of a practical doctrine (*Ang.* i. 190 f.; tr. in *Buddhist Review*, April 1911). Again, it is only the quest of the highest good that gives adequate opportunity for ending sorrow (*Maj.* iii. 245; *Ang.* i. 249). The mission of a Buddha is frequently declared to have as its object not only, in negative terms, the revealing of how ill (*dukkha*) may be overcome, but also, in positive terms, the attainment of the good, or weal, and the happiness (*hitāya sukhāya*) of all beings. In the wrestling and toil of mind for the enlightenment (*bodhi*) whereby he could qualify for that high mission, Gotama admits that the quest of *sukha* was the ground wave that bore him along (*Maj.* i. 246 f.), and in the midst of his self-devoted career he claims that this quest is won for good and all:

'Ay, young sir, I verily am of those who fare happily, even though you see me exposed in this hut to the chilly nights of winter. Your well-housed citizen, happy after his kind, nay, the king himself with all his pleasures, is not so happily at ease as I. They may be smitten with torments through greedy desire, enmity, or blunders. But one who has cut off at the root all those sources of suffering dwells at ease, for he has won peace' (*Ang.* i. 130-8; *Maj.* i. 93 f.).

A fortiori, happiness is commended not only for the babes in religion, but also for earnest disciples as a reasonable and sufficient aim of the religious life (e.g. *Maj.* i. 140 f.). And, adopting as a name for their *summum bonum* a word which would seem to have been applied to the easeful cool organic consciousness of physical well-being (*ib.* 75th Sutta), the Buddhists qualified Nibbāna as supreme happiness (*paramasukha*):

'These things to know e'en as they really are:

This is Nibbāna, crown of happiness' (*Dhammapada*, 208).

The happiness thus commended and extolled for and by saints and those qualifying for sainthood was, of course, neither the *kāmasukha* referred to under *vedanā*, or feeling on occasion of sense, nor the *sukha* associated with ideas of the same. The attitude enjoined with regard to such feeling was very uncompromising:

'Pleasant (*sukha*) feeling, *bhikkhus*, is to be considered as (equivalent to) pain (or ill); painful feeling is to be considered as a javelin; neutral feeling is to be considered as the impervious. A brother by whom these are thus considered is an Ariyan of supreme vision; he hath cut through craving; he hath rolled back his bonds; through supreme grasp of vain conceits he hath put an end to sorrow' (*Iti-vuttaka*, § 53; *Sam.* iv. 207).

Coming next to ideal emotion, or the three modes of feeling when associated with ideas (*somanassa*, *domanassa*, *upekkhā*), we find the admission that, for spiritual health, these three modes of feeling are not at all condemned as such, but are preferable when unaccompanied by such thought as is engaged upon sense-experience (*vitakka-vichāra*). (Such is the implication of the phrase translated 'pre-occupation and travail of mind' in Rhys Davids, *Dialogues*, ii. 312f., the terms *vitakka*, *vichāra* being essentially terms of sense-cognition, and used only in the first stage of *jhāna*, when the mind is not yet abstracted from such cognition.)

Finally, the most general affirmations as to that happiness which the candidate for sainthood and the saint or *arahant* might legitimately aspire to and feel may best be sought in the body of testimony ascribed to such men and women. For them, as for all the earnestly religious, holiness meant a radical alteration of values. The forms of *kāmasukha*, which had once excited and pleased, were become nauseous and pestilential, terrible, or merely devoid of all attractive power. The Christian saint's 'I do count them but dung' (Ph 3^d) has many a prototype in the poems of the Buddhist *theras* and *theris* (cf. *Sutta-Nipāta*, 59-61, 762). The zest (*pīti*) of pursuit and advance, the relaxation, ease, exultation, and peace of vantage-points and mastery won (*sukha*, *somanassa*), are now transferred to and associated with the religio-philosophical ideal of *arahant*-ship and *Nibbāna*, the spiritual supramundane *summum bonum* (*sadatttha*) of oneself and all beings. Into this new objective of happiness, the prospect of celestial joys did not enter.

'The very heavens delight them not; how then
Should aught that's merely earthly please?'

(*Therag.* 397; *Dhamm.* 187).

'... I want no heaven of gods—
Heart's pain, heart's pining have I trained away'

(*Therig.* 82).

But the happiness actually attained is claimed as very positive and not as 'neutral feeling':

'Not music's fivefold wedded sounds can yield
Such charm (*rati*) as comes o'er him who with a heart
Intent and calm rightly beholds the Norm'

(*Therag.* 398; cf. *Dhamm.* 35, 86).

'This never-ageing, never-dying Path—
No sorrow cometh here, no enemies,
Nor is there any crowd; none faint or fall,
No fear cometh, nor aught that doth torment. . . 512.

(*Therig.* 512).

'Now have they prospered all my highest aims. . .
The holy love and liberty, my quest. . .
I what 'twas well to do have done, and what
Is verily delectable, therein
Was my delight; and thus through happiness
Has happiness been sought after and won (*sukhen* *anvā-*
gatam sukham)

(*Therag.* 60, 63; cf. 211 f., 386, 518 ff.).

That the 'seeking' or pursuit of the goal was itself happy as contrasted with the ascetic practices of many Indian religionists was claimed by Buddhists from the first (*Maj.* i. 93 f.). 'This happiness by happy ways is won,' exclaims another saint, once a *śāgiri* (*Therag.* 220). This was naturally the experience of those who were unhampered by a sensual or sluggish temperament, e.g. the younger brother of the chief disciple Śāriputta:

'The will to learn bringeth of learning growth;
Learning makes insight grow, and by insight
We know the Good; known Good brings bliss along'

(*Therag.* 141).

With many others the training and the transference involved great toil and travail of spirit. The poems quoted from above often reveal this, and the later *Milinda*, while it calls *Nibbāna* 'entirely happy' (*ekanta-sukham*), speaks of the quest as 'alloyed with pain' (ii. 181 f.).

In connexion with the use attributed to the Buddha of the term 'entire (or absolute) happiness,' two remarks may be added in conclusion. Consulted by Mahāli the Licchavi about the anti-causationist doctrine of a rival teacher, Gotama affirmed causation. There was a cause, and a sufficient cause, for the wickedness, as for the regeneration, of the world. Were sense-experience, he went on, productive of absolute happiness, no one would ever be converted from it to purer ideals. Were it absolutely painful, no one would be engrossed by it, as are the majority. It was the mixture of pleasure and pain in human life that constituted at once the hindrance to, and the guarantee of, spiritual progress (*Saṃ.* iii. 68 ff.; cf. ii. 172 ff.).

But, when pressed by Udāyin the Jain to de-

scribe what he considered to be the sphere of absolute happiness and the way thereto, the Buddha first repeats the current belief that practice in the fourfold *jhāna* may bring about re-birth among *devas* in entirely pleasurable conditions. He then repudiates such aspirations for his Rule, and enumerates the attainments in self-mastery and intuitive vision won by the *arahant* as far loftier and more excellent than such a hedonistic ideal (*Maj.* ii. 79). The moral of this, confirmed by the general context of the *Nikāyas*, seems to be that he also held the ethical view that happiness may best be secured when not it, but its cause, is aimed at.

LITERATURE.—This is quoted in the article; references are to the PTS editions; the *SBE* (*Milinda*, *Dhammapada*, *Sutta Nipāta*); the *Sacred Books of the Buddhists* (*Dialogues*). See also the present writer's *Buddhism* (Home Univ. Library), London, 1912, chs. vi.-viii., *Psalm of the Early Buddhists*, do. 1909, 1913. Modern psychology on 'neutral feeling' is concisely represented in H. Höfding's *Psychology*, Eng. tr., London, 1891, p. 287. On Utilitarian Hedonism and happiness as end, cf. H. Sidgwick's *Methods of Ethics*, London, 1901.

C. A. F. KHYS DAVIDS.

HAPPINESS (Greek and Roman).—I. GENERAL.—1. Greek teleology: happiness attends fulfilment of function.—*eudaimonia*, when critically appraised, could not mean to the Greeks 'a happy temperament,' to which a genius was propitious. This might be very well, but it was not of *knowledge* (as Socrates and Plato would say) or of *faith* (as St. Paul). The term was applied to well-being judged from outside by a certain agreed standard of perfection. The Greeks, however serious their practical doubts, never showed any hesitation, save in the Atomic School, in accepting teleology: everything was made for some end and found its satisfaction in fulfilling its function, in realizing its idea or its notion; only in so far as it did this was it real, good, and therefore happy. Man was contrasted, as a single type, with the rest of creatures; never (oddly enough) with other and different members of his own species; his *differentia* lay in reason, implying self-consciousness and self-criticism, above all, recognition of a law—and that a universal one, beyond the private and the particular. Thus, the only state deserving the title 'happy' in the truest sense was that of the philosopher, who alone used *formative* or *speculative* reason aright, and so fulfilled the end for which he was made. It is clear that, like Kant's categorical imperative, this vague axiom can give no special guidance for individual cases, no help to men of different character, aim, and station. In the end, then, Greek ethics set up in the various schools an ideal of life singularly alike, a purely typical excellence which was bound to end in a negation rather than in any positive content. Except the early Cynic model, which soon passed out of favour, there is little to choose, in essential detail, between the 'sage' of Plato and Aristotle and that of the Stoic and Epicurean schools; indeed, the Cyrenaic model, significantly enough, tended later to approach this common standard. Happiness, then, in every Greek system of religion or philosophy, is singleness of aim, uprightness of heart, and the undisturbed peace of one who rests in ultimate truth, and has hold of reality. It is always set in contrast with the aims of the worldly-wise, cumbered with much serving or the pursuit of many ends. Not within the limits of our period do the modern features appear, which direct human activity towards the conquest and enjoyment of the world, and complexity of life; or towards social service, 'the love of mankind,' 'the greatest happiness of the greatest number,' multi-form legislation to secure better conditions for the poor.

2. Enemies of happiness: impulse and convention.—Happiness, then, as above described, lay in

reason (as private judgment, which mirrored an external order and laid hold of objective truth), not in impulse or custom. The body and conventional society were the two great enemies of wisdom and, therefore, of happiness. The ascetic and anti-civic tendency of Hellenic morals is now well-established, in spite of some feeble protests. The dualism between the soul's true welfare and all earthly concerns begins in Pythagoras and Heraclitus, and only increases in intensity down to Aristotle and the later Stoics. The conventional order, *vóμος*, the State, was never really the true home of the sage who desired to be perfect and therefore happy. Happiness lay 'in understanding and accepting the world-order,' not in average honesty or public life in a small city. It was, then, directly dependent upon knowledge, as wide as that postulated by Plato in his 'Idea of Good.' Upon this Epicurus, the anti-teleologist, insists as strongly as the rest: his last advice was 'to remember the *dogmata*,' which explained the physical world by science. The Atomic theory, which put accident above providence, had existed from early times as a heresy defying the orthodox belief in a rational world-order. But, if the axioms of Democritus and Epicurus sound startlingly unlike the rest, there is substantive agreement in actual life and in their portrait of the wise and happy man; he, too, 'understood and accepted' the world-order, by taking his proper place in it; and, it need scarcely be said, even this accidental system assumed a half-personal look. Nature was even deified in Lucretius (*q.v.*), to the loss of all logic and consistency, and to the gain of that moral unction and earnestness without which ethical theory is dry bones.

3. Happiness in knowledge of Nature or the world-order (*κατὰ φύσιν* = *κατὰ λόγον*).—Happiness therefore lay merely in living according to Nature, in finding the wider law which was higher and more imperious than the customs of a city, or the edict of a tyrant. Except some sophist, perhaps, in empty theory, or Aristippus for a short time, none believed that the individual could stand alone, or be safe in following impulse and running counter to convention. There has never been much disagreement in the whole of history on the virtues, on what makes a 'gentleman,' and the like; the indecency of the Cynic was reprobated by all, and Epicurus soon turned aside from pleasures to find a unique satisfaction in the simple life, in a temper permanently cheerful. But the sanction demanded was from the Universe itself, not from any local or partial authority; the happy wise man was the cosmopolitan. And here we meet two questions: Does Nature, after all, recognize the goodness and respect the happiness of the 'sage'? And, if not, is the consciousness of duty done and right defended at the cost of life sufficient for happiness? It is clear that these doubts were at the root of the movement which gave a welcome to Christianity, turned the self-poised independence of the Stoic into pious resignation to the Heavenly will, and brought back in countless forms the cult of various tutelary beings.

4. Virtue to be self-sufficing or found in union with God.—When the Porch became a practical guide instead of an academic paradox, men like Posidonius and Panætius had to come to terms with average men; like Aristotle and the Peripatetics, they postulated for happiness not bare virtue but a moderate equipment of external goods. Where Zeus had shut the door on everything but the 'good will,' they let in the (uncertain) elements (Diog. Laert. vii. 65) of health, competence, and strength. So Adam Smith admits as constituents of happiness health, a good conscience,

and freedom from debt; Lucian makes equally merry over those who demand a good deal from the world and fortune and those who pretend to despise any such alliance and to deem virtue self-sufficing. With the collapse of the city-State system, the correspondence between merit and receipt was disputed and explicitly denied. The Stoics, professing to 'rationalize' the world-order (see Bussell, *The School of Plato*, 1896, *Marcus Aurelius*, 1909), ended in pronouncing it unknowable and incommensurable with man's specific ideals of right and wrong. They still adhered to the axiom that the *Δόγος* spoke in everything; the cruelty of lion and tyrant was quite in place, like death or disease; but there was no real interrelation between these several units, each displaying its nature. The sage could help feeling dissatisfied only by steeling his heart with a few maxims to be kept ready against doubt. Nature, whether as the actual system around us or as its ideal perfection conceived by the thinker, made no allowance for the virtues of the good: the world lay in the 'Evil One,' as St. John said (1 Jn 5¹⁹), or, as Seneca preferred to say, under Fortune. *Flight from the world*, instead of the Platonic attempt to embody the ideas in the actual, became the text. The self-sufficingness of virtue was an article of faith, because it was the last and only certain possession of the wise man (*ἴδιον καὶ ἀναφαίρητον*), and he could not stoop to make terms with an alien and immoral power. Hence pious resignation and religious prayerfulness and ecstasy, or self-loss, became the distinguishing marks of the School which ended all free development of the classical mind. It was a quite legitimate evolution: it is needless to suppose a conscious borrowing from Eastern sources; and there is nothing explicit in the final form which was not implicit in the earliest utterances of Greek wisdom. Every school prepossessed with the belief that the soul is prior to and alien from the body rejected any sort of external aid. The modern aim, to improve by better environment and early physical and mental training, would have been abhorrent. The old self-reliance was gone, and only in surrender to a divine order or to a tutelary god, as with Apuleius, were safety and happiness to be found.

II. DETAILS.—1. All Greek philosophy sought the permanent in the fleeting and changeable; and, in human life emerging into self-consciousness and purposive intent, called the end *εὐδαιμονία*, from which pure subjective feeling and impulse was ruled out as self-defeating. All schools were agreed (as soon as the question was once posed) that (a) well-being is the aim of all effort and all inquiry; and (b) wisdom, or knowledge of the good, can alone give security and guidance; that (c) 'none can sin against the light' or his own good if he knows it; that (d) ethical conduct, already personal and un-social, is a pure matter of insight; and that (e) to know good is to follow it, and to attain it is the highest happiness or satisfaction known to man.

2. It is noteworthy that no Greek school placed the ideal of perfection (and, therefore, of happiness) in active social service; the end was always self-realization, and everything was regarded from the individual's standpoint, though the subject was conceived objectively; the very frequency of classical protest that 'man is a social being' bears witness to their profound doubts on the subject.

3. Side by side with a purely rational, non-transcendental belief in virtue as self-poised independence and consistency, went from the first a vein of mysticism which issued, as we saw, in the pietism and resignation of the Roman age. Man, to be truly himself, must 'live the life of the gods,' however conceived—from the crude demonology of Empedocles and perhaps of Heraclitus to the Aris

totetian text ἐφ' ὅσον ἐνδέχεται ἀθανατίζειν and the curious paradox νοῦς ἕκαστος, while νοῦς is at the same time God Himself.

4. Roman 'virtue' was very early conscious that reflexion was dangerous to the ethics of custom, the traditions of a proud ruling class, inured to hardship and State-service, with no keen desire to distinguish private from public life. The Senate expelled the philosophers, as they expelled the Bacchanals—both symptoms of unruly or sceptical subjectivity. They had all Hegel's distrust of the man who sets up his ideal of perfection (*Moralität*) against the slow-growing fabric of social convention (*Sittlichkeit*). Both in religion and in ethics they were content to follow their fathers. How subversive reflexion might prove is seen in Cicero. Where he is perhaps most original and sincere, he is still, of course, under heavy debt to his Greek master; but he speaks with conviction in the *Somnium Scipionis*, when he makes politics and State-service not an end in itself but a means to future blessedness—a hard but divinely appointed condition and discipline, work in the vineyard in the burden and heat of the day. When Rome was overrun by rich men and cosmopolitans, when tribal and ancestral sanctions broke down, no guide for conduct was left except private sectarian religion, and, in practical matters, obedience to law issued by an autocrat.

III. SUMMARY.—We may sum up the doctrine and practice of the ancient Greeks thus: happiness or well-being as the avowed object of our human activity is *twofold*—higher and lower, positive and negative. Man is the 'instrument of a Divine reason'; but, owing to the complex and accidental character of his body, he is hindered in the pursuit of goodness and truth. The first stage is, therefore, to order the passions. Plato saw happiness to consist in a harmony between the three parts of the soul (reason, spirit, and appetite); Aristotle was equally clear that moral virtue (or human excellence) involves a control of those desires, of that which all thinkers and teachers have called 'our lower nature.' Above this negative victory over the disorderly elements in our self, which gave a certain domestic peace, was a far higher realm of truest happiness. Every one is familiar with Plato's portraits of the soul, freed from earth and sense and communing in heaven with eternal forms. Aristotle only gave definite shape and object to this ideal yearning. However far he diverged from Platonic supernaturalism, he never swerved from the doctrine of highest happiness in contemplation alone. He passed from the doctetic and mystical stage of his Eudemus (quoting Silenus' maxims, 'Best of all not to be born,' and calling death 'going home'), from the devout theological attitude of the *Eudemian Ethics*, to a cooler tone in his praise of *θεωπία*, and of a god who is the last term in science rather than in religion; to a far more sympathetic attitude to the actual world of men and things. But, though he changed the highest ideal from devotion to inquiry, he always placed happiness in intellect, saw in social life a δεινέρος πλοῦς. In his admiration for virtue, as excellence won by endeavour, he was quite as sincere as Kant in his reverence for Duty: witness his poem, Ἀπερὰ πολὺ μᾶλλον γένοιτο βροτεῖν | θήραμα κἀλλιστον βίω; but, as with an absolutist like Bradley, this dualism and striving denoted an imperfect sphere, and had to be transcended by that which alone gave freedom—science. He believed the best to be within the grasp of a few only whom Fortune had equipped with competence, health, and leisure. In his Platonizing *Protreptic*, he calls worldly goods (strength, beauty, and honours) mere semblances or shadow-pictures (*σκιαγραφία*); and compares the soul in the body to a living prisoner yoked with a corpse. How far

he transcended the ascetic dualism of principles is known to every reader of the *de Anima*. Quite clear is the negative (or cathartic) character of moral as distinct from intellectual 'virtue'; it prepares the way for the chief good, but is not to be identified with it. Aristotle reverences Eudemus, ὅς μόνος ἢ πρῶτος θνητῶν κατέδειξεν ἐναργῶς | οἰκῆν τε βίω καὶ μεθόδοισι λόγων | ὡς ἀγαθὸς τε καὶ εὐδαίμων ἅμα γίνεται ἄνθρωπος. In his earlier and more devout phase, this happiness was a divine gift or recompense; later, the sage became independent and worked out his own salvation; only afterwards did the precarious tenure and uncertain title come to light, throwing a man back on his own inner resources and reviving the old Platonic asceticism. Peripateticism was throughout a compromise with the worldly and social spirit. Aristotle was quite sincere, for instance, in holding that human good is specific and attainable in this life by an activity of the soul, not needing a comprehensive knowledge of the universal good which is in Plato supernatural. But how imperfect and provisional is his portrait of the natural man, and with what unction he speaks of the highest life of God and of man! For the average man in the world neither Aristotle nor his school gave any real guidance in the management of conduct or the pursuit of happiness. When Theophrastus stoutly defended the value of external good (leisure, security, and affluence), he was speaking on behalf of a privileged aristocracy, the elect of wisdom.

The weakness, then, of ethical appeal in the Greek world was due to (1) the small number who could reach the ideal; (2) the ascetic and transcendental character of the happiness promised to them; (3) the increasing sense of the instability of fortune, the submerged props on which rested that joy which should be man's surest and most unchanging possession; (4) the confusion of moral and intellectual good (to the detriment of the former), and the permanent entanglement of right action with 'knowledge of the good.' Impulse and custom still regulated the life of ordinary men. Philosophers taught no striking novelties in ethics, and merely laid stress on a negative goodness, aloof and remote, which could have no public influence. The lower happiness was allowed by Plato in the *Republic* to those who implicitly obeyed authority; it was clear that they were outside the pale of truly reasonable beings, of those who thought for themselves. This (socialist) belief, that happiness for the mass can come by regimentation from above, prevented the spread of private judgment or any sense of responsibility. The Hellenic conception of happiness gave way, therefore, before the new religious personal faith of which Christianity was the chief, but by no means the only, symptom; and it was the belief in 'regimentation' that helped to arm the Roman Emperor with such ample powers.

HARDWAR.—An ancient historical town, and one of the most famous places of pilgrimage in N. India; situated on the right bank of the Ganges, close to the point at which the river debouches into the plains through a gorge of the Siwalik or sub-Himalayan range; lat. 29° 58' N.; long. 78° 10' E. It is claimed as a sacred site by the

followers of the two great Hindu sects, the followers of Śiva giving the name as *Haradvāra* ('gate of Hara,' or Śiva, the destroyer), those of Viṣṇu calling it *Haridvāra*, after Hari, 'the tawny one,' a title of Viṣṇu Kṛṣṇa. The place was also at one time known as *Kapila*, after the saint Kapila Muni, the scene of whose devotions and austerities at the Śaiva shrine of Kapileśvara, 'Lord of Kapila,' is shown at Kapilasthāna in the hills adjoining Hardwār (Atkinson, *Himalayan Gazetteer*, Allahabad, 1884, ii. 806). Hiuen Tsiang, the greatest of the Chinese Buddhist pilgrims (A.D. 629-645), visited a place called Mo-yu-lo, or Mayūra, which Cunningham identifies with the neighbouring village of Māyāpur, which now forms part of the sacred town. But the distances from fixed points do not agree, and this identification, like others made by the same archaeologist, which necessitate a revision of the Chinese text, must be accepted with caution (S. Julien, *Hiouen Tsiang*, Paris, 1851, ii. 330; Beal, *Si-yu-ki*, London, 1906, i. 197 f.; Cunningham, *Arch. Rep.* ii. [1871] 231). Hiuen Tsiang calls the Ganges at this point *mahā-bhadra*, 'very propitious'; and even in his time vast numbers of pilgrims used to bathe in the sacred stream. It seems also to have been the scene of a cult of Buddha, because, among the broken sculptures at the Nārāyaṇaśila or Nārāyaṇabali temple, Cunningham identifies one small figure of Buddha the ascetic, surrounded by smaller images of ascetic attendants. Doubtless this is only one survival above ground of many images of the Master. Hiuen Tsiang speaks also of a neighbouring site, known as Gaṅgadvāra, 'gate of the Ganges'; and here undoubtedly a cult of the river-goddess prevailed from a very early period.

'There is mention,' says Cunningham (*loc. cit.*), 'of Haridvāra, which, indeed, would seem to have risen on the decay of Māyāpur. Both Abū Rihān and Rashid-ud-din mention only Gaṅgadvāra (Elliot, *Hist. of India*, London, 1867-77, i. 52). Kālidās also in his *Meghadūta* says nothing of Haridvāra, although he mentions Kankhal; but, as his contemporary, Amarasiṃha, gives Viṣṇupadī as one of the synonyms of the Ganges, it is certain that the legend of its rise from Viṣṇu's foot is as old as the 5th century. I infer, however, that no temple of the Viṣṇupadī has been traced down to the time of Abū Rihān. The first allusion to it of which I am aware is by Sharf-ud-din, the historian of Timūr, who says that the Ganges issues from the hills by the pass of Coupele, which I take to be the same as Koh-pairi, or "the hill of the feet" of Viṣṇu.'

At any rate, the place was well known in the time of Akbar, because Abū 'l-Fazl speaks of 'Māyā, known as Haridvāra' on the Ganges. It is held sacred for 18 *kos* in length (about 27 miles). Large numbers of pilgrims assemble on the 10th of Chaitra (March-April) (*Ain-i-Akbari*, tr. Blochmann and Jarrett, Calcutta, 1873-94, iii. 306).

Both Śaiva and Vaiṣṇava sectaries are thus agreed upon the sanctity of this place. In fact, as is generally the case in India, the most famous sacred places are those whose sanctity dates from a period antecedent to the rise of the present religions. Hardwār, as the place where the great river issues from the hills, was naturally regarded as sacred from the very earliest times, and thus became a fitting abode of the deities who in succession acquired the devotion of the people. The first was the river-goddess; then Buddha; then the Hindu gods of the later period. Besides this, in the *Mahābhārata* we have a hint that a serpent-cult prevailed. Arjuna, one of the Pāṇḍava princes, is said to have come here to bathe, and met Ulūpi, daughter of the Nāgā king, who besought him to marry her (*Mahābh.* i. 214). Both Śaivas and Vaiṣṇavas rest their belief in the holiness of the place on rival legends describing the birth of the river. The former allege that the river springs from Kailāsa, the paradise of Śiva; the latter, that it falls from the toe of Viṣṇu—in support of

which they point to the impression of the foot-prints of the god, the *Hari kā charan*, or *Hari kī pairi*, which they display to pilgrims. The *Viṣṇu Purāṇa* tells of the holiness of the place as follows:

'The offences of any man who bathes in this river are immediately expiated, and unprecedented virtue is engendered. Its waters, offered by sons to their ancestors, in faith, for three years, yield to the latter rarely attainable gratification. Men of the twice-born orders who offer sacrifice in this river to the lord of sacrifice, Puruṣottama [Viṣṇu-Kṛṣṇa] obtain whatever they desire, either here or in heaven. Saints who are purified from all soil by bathing in its waters, and whose minds are intent on Keśava ["the long-haired one," Viṣṇu-Kṛṣṇa], acquire thereby final liberation. This sacred stream, heard of, desired, seen, touched, bathed in, or hymned, day by day, sanctifies all beings; and those who, even at a distance of a hundred leagues, exclaim, "Gaṅgā! Gaṅgā!" atone for the sins committed during three previous lives. The place whence this river proceeds, for the purification of the three worlds, is the third division of the celestial region, the seat of Viṣṇu' (tr. Wilson, London, 1864-77, ii. 272 f.).

A remarkable legend, told in connexion with Kankhal, a town close to Hardwār, has been interpreted to represent a conflict between the rival cults of Viṣṇu and Śiva, in which first the former, but finally the latter, acquired the ascendancy. The story as told in the *Purāṇas* (Wilson, *Viṣṇu Purāṇa*, i. 120 ff.; Dowson, *Classical Dict. of Hindu Mythology*, London, 1879, p. 76 ff.) relates that Dakṣa made a great sacrifice here, and invited all the gods except Śiva. But his consort, Sati or Umā, jealous for the honour of her lord, induced him to create a monster, Virabhadra, who was ordered to mar the sacrifice. Accompanied by the terrible goddess Rudrakālī and her train, Virabhadra attacked the assembled gods, with the result that Yama, god of death, had his staff broken, and Sarasvatī, goddess of learning, and the Mātṛi, or mother-goddesses, had their noses cut off. Yajña, lord of sacrifice, was decapitated, and he now forms the constellation Mrigāśiras, the antelope's head. A variant of the tale makes Sati in her wrath destroy herself on the scene of sacrifice by leaping into the sacrificial fire. An ancient temple, dedicated to Śiva as *Dakṣeśvara*, 'Lord of Dakṣa,' marks the scene of the tragedy.

Hardwār, from its vicinity to Delhi, naturally attracted the attention of the Muḥammadans; and Timūr, in his *Memoirs* (Elliot, *Hist. of India*, iii. 458 ff.), describes a terrible massacre of Hindus in the neighbourhood. In the course of this and later raids the ancient temples were probably destroyed. The present town and the ruins of Māyāpur, to the sanctity of which it seems to have succeeded, lie on the right bank of the river, which is here divided into several channels. One of those, which now possesses the greatest sanctity, flows past the town, and from it the Ganges Canal is supplied. The Brāhmins at the time of its construction declared that the waters of the holy river would never enter the canal or serve the utilitarian purposes of irrigation. The prediction was not fulfilled, and the benefits resulting from the project have induced the Brāhmins to accept the inevitable.

Cunningham supposes that he has identified the remains of the older sacred town, *Māyāpur*, 'city of illusion'; and this site contains three old temples. That of Māyā Devī he believes to date from the 10th or 11th cent. A.D. The principal image is a three-headed and four-handed deity, which is probably Durgā. Close by is a nude male image which probably belongs to the Jain sect. In Hardwār itself all the temples are modern, and none of them displays any architectural beauty. The chief shrine is the Gaṅgadvāra, or 'gate of the Ganges,' near the present sacred bathing-place. This temple is small, and the idol, dressed in tawdry robes, is surrounded by a number of attendant images of other gods. The

original stone marked with the footprints of Viṣṇu is said to have disappeared under water some time ago; but a substitute has been provided.

The bathing steps have been the scene of more than one tragedy. In 1819, in the early days of British rule, before the method of regulating these enormous gatherings of pilgrims had been discovered, the rush of bathers was so great that no fewer than 430 lives were lost. These dangers have now been removed by widening the steps and regulating the numbers which enter the sacred pool. The chief risk at these crowded fairs is an outbreak of infectious disease. In 1892 a sudden epidemic of cholera made it necessary to disperse the pilgrims before the end of the fair. This led to much local agitation, and an inquiry was held, the result of which was that the charges made against the officials were found to be without foundation. The pilgrim priests (*paṇḍa*) are an ignorant, extortionate class. It was only a selfish regard for their own interests that led to this agitation, and at a later period they were active opponents of the plague regulations enforced by the Government. The chief fair occurs when the sun enters Aries. Every twelfth year, when Jupiter is in the sign Aquarius, the Kumbh Melā (Skr. *kumbha*, Aquarius), a specially large fair, takes place. Hardwicke estimated the attendance in 1796 at 2½ millions; Raper in 1808 at 2 millions. In more recent years the attendance has diminished, chiefly because railway facilities allow of pilgrimage throughout the year, and local devotees are able to visit other and more distant holy places. The fair has sometimes been the scene of conflicts between rival bodies of ascetics. In 1760 a fierce battle occurred between the Bairāgi or Vaiṣṇava ascetics and the Gosāin, or followers of Śiva, in which the former were defeated, with a loss, it is said, of some 1800 lives. After the close of the Hardwār fair some pilgrims make their way by the difficult route to the Himalayan shrines of Kedarnāth and Badarināth (*qq.v.*).

LITERATURE.—The above account is largely based on personal observation. The report by Cunningham (*Arch. Rep.* ii. [1871] 231 ff.) is valuable, and has been to some extent summarized by A. Führer in his *Monumental Antiquities and Inscriptions*, Allahabad, 1891, p. 16 f. Early accounts are those of T. Bacon, *First Impressions . . . in Hindostan*, London, 1836, li. 162 ff.; T. Skinner, *Excursions in India*², do. 1833, i. 128 ff., 180 ff. Some of the temples and images are illustrated in W. Crooke, *PR*², London, 1896.

W. CROOKE.

HAREM, HARIM.—See WOMAN (Muslim).

HARISCHANDIS.—The Hariśchandis are a sect of Indian Vaiṣṇava ascetics. Their name is derived from that of an ancient king entitled Hariśchandra, who is said to have lived in the *Tretā Yuga*, or Silver Age. Many legends are recorded concerning him. In the *Aitareya Brāhmaṇa* (vii. 13–18) it is told how he purchased Sunahsepha to be offered in vicarious sacrifice instead of his own son.¹ This is the oldest reference to him. In later literature he is best known for his piety and his sufferings. He was a sort of Indian Job, who passed through inconceivable and undeserved woe, and had to sell even his wife and child in order to pay the dues of the rapacious saint Viśvāmitra. He finally sank to be the servant of a Dom, his duties being to collect the clothes that covered the corpses at the Benares place of cremation, and to deliver them to his master. At the climax of his sufferings in this degrading occupation, he had to steal the clothes from the corpse of his own son, which was brought thither for cremation by his mother, Hariśchandra's long-parted wife. The parents resolved to end their sorrows by dying on the son's funeral pyre. The

gods then intervened. His Dom master, who was really the god Dharma, or Virtue, taking human form on purpose to test Hariśchandra's sense of duty, expressed himself satisfied. Hariśchandra and his wife were translated to heaven, and his son was reascented and restored to his kingdom, where he reigned in his father's stead. The whole story is told with much pathos in the seventh and following chapters of the *Mārkaṇḍeya Purāṇa*,¹ and is a favourite subject of modern vernacular literature.

The Hariśchandis are nearly all of very low caste, mostly Doms. They claim to practise the *śaśtras* handed down to them from Hariśchandra's Dom master, who was taught piety by his servant in the intervals of his employment. They worship Viṣṇu as the Creator of the universe; and, if they have any other definite doctrines, they are those of the *Bhakti-mārga* (see *ERE* ii. 539 ff.).

LITERATURE.—H. H. Wilson, *Religious Sects of the Hindus*, London, 1861, i. 181; M. A. Sherring, *Hindu Tribes and Castes*, Calcutta, 1872–81, i. 287; W. Crooke, *TC*, do. 1896, li. 491 f.

HARMONY SOCIETY.—See COMMUNISTIC SOCIETIES, vol. iii. p. 780 f.

HARPIES.—Rarely does a mythological figure express so unmistakably its nature by its name. The Harpies are Ἀρπυιαί, 'Snatchers,' creatures of rapine, and rapidity. On a black-figured vase in the Berlin Museum (Cat. 1682, *Arch. Zeitung*, 1882, pl. 9) two Harpies are figured, and against them their name in the dual, Ἀρπυιαί, 'the two Snatchers' (see fig. 1). From this vase we are certain that in the 6th cent. B.C. the Greeks conceived of the Harpy as a winged *daimon* of human female form. The vase is of special interest because, though the two winged figures are inscribed as 'Harpies,' the scene of which they form part is the slaying of Medusa. This shows that Harpies were apt to be confused with another type of monster, the Gorgon. The Gorgon is always differentiated from the Harpy by the mask-like face with tusks and protruding tongue (see GORGON), but the Gorgon is sometimes figured in Greek art as performing the functions of a Harpy, i.e. snatching away human beings.

The function of the Harpies as Snatchers comes out clearly in Homer (*Od.* xx. 77 f.):

τόφρα δὲ τὰς κοῦρας Ἀρπυιαί ἀνδραΐσαντο,
καὶ ῥ' ἴδονας στεινερῆσιν Ἑρινυσὶν ἀμφοτελείην.

Penelope is telling the old Lycian story of how the daughters of Pandareus waited in their father's hall while Aphrodite planned for them in Olympus a goodly marriage; but they never came to marriageable age, for

¹ Meantime the Snatchers snatched away the maids, and gave them o'er

To the hateful ones, the Erinyes, to serve them evermore.

The Harpies here are little more than ministers of untimely death; they are only half-way towards impersonation; and to give them a capital letter is really to crystallize their personality prematurely. It must always be remembered that to the Greek, even when the Harpies became fully personalized, their name carried its adjectival sense of 'snatchers' in a way lost to us.

To Homer, in the passage cited, they are death-demons near akin to the Erinyes, the angry ghosts. But here, as so often, Homer has moved somewhat away from primitive conceptions, of which, however, in this very passage he betrays a haunting remembrance. The Snatchers were originally not death-demons but simply winds. Penelope, just before the passage cited, prays in her desolation that the 'storm' (θόελλα) may 'snatch her away'

¹ F. Pargiter's tr., p. 32 ff. The story also occurs in the *Padma Purāṇa*.

¹ Cf. Max Müller, *Hist. of Anc. Shr. Literature*, London, 1856 p. 408 ff.

(ἀναρπάσσα), just as the 'storm-winds' (θύελλαι) snatched away the daughters of Pandareos:

ὡς δ' ὅτε Πανδάρειον κόρας ἀνέλοντο θύελλαι (Od. xx. 66).

Clearly the Harpies are equated with the storm-winds. It is only incidentally as Snatchers that they perform the functions of death-demons.

cylinx (fig. 2) in the Würzburg Museum (Inv. 354). Phineus, to the right, reclines at his banquet, attended by the women of his family, one of whom holds a large flower in token of plenty and fertility. The Harpies, the sirocco-snatchers, have been at their work fouling the feast, but for the last time

FIG. 1. Painting on Berlin vase.

As winds the Harpies have a double function: they not only snatch away to destruction; they give life. Homer (*Il.* xvi. 150) tells us that a Harpy, Podarge ('Swift-foot'), was the mother of the horses of Achilles by Zephyros the West Wind. Both parents are winds; but, as was natural in a mare-breeding country, the Harpy was conceived of not as a woman, but as the creature who was swiftness embodied—a fleet horse. The notion that winds could impregnate was wide-spread in antiquity. Vergil (*Georg.* iii. 274 f.) says of mares: '... saepe sine ullis conjugijs vento gravidæ, mirabile dictu.' The winds are breaths and souls (πνεύματα); and, when breezes are spoken of as 'life-begetting' (ζωογόνοι) and 'soul-rearing' (ψυχοτρόφοι), this was not to the ancients a mere metaphor. Winds, says the author of the *Geoponica* (ix. 3), 'give life not only to plants but to all things.'

It depends, however, on what quarter of the world one lives in which wind will be beneficent

they are chased away seawards by the two sons of Boreas the clean North Wind, Zetes ('Life Blower') and Kalais ('Fair Prosperity'). North Winds (beneficent) and South Winds (maleficent) have alike four great curved wings. The sea towards which the North Winds are blowing—the topography is Thracian—is clearly indicated by dolphins. No one who has felt the blight of a sirocco will fail to understand the pestilential wind-demons.

Unquestionably in the nature and function of the Harpy the maleficent element prevailed. For this reason 'Harpy-tomb' is probably a misnomer for the famous monument in the British Museum. The bird-demons figured on it are too gentle in nature. At the same time it must be remembered that the monument comes from Lycia, the home of the myth of the daughters of Pandareos and the 'Snatchers.'

LITERATURE.—Roscher, s.v. 'Harpyia'; Cecil Smith, 'Harpies in Greek Art,' in *JHS* xiii. [1892-93] 103 (esp. for the vexed

FIG. 2. Würzburg cylinx.

and which maleficent. The principal myth in which the Harpies are concerned was a Thracian one—that of the feast of Phineus; and here the Harpies clearly stand for pestilential winds which come from the South—in a word, for the sirocco, which blights man, beast, and vegetation. The feast of Phineus is clearly depicted on the famous

question of the 'Harpy-tomb' and for the interpretation of the Cyrene cup with supposed figures of Harpies); J. E. Harrison, *Prolegomena to the Study of Greek Religion*, Cambridge, 1903, pp. 176-225 (on the almost inextricable confusion between Keres, Gorgons, Harpies, and Sirens, and for the various art-monuments). Among the modern Greeks some functions of the Harpies, but not their name, are exercised by the Nereids (q.v.); but, as the Nereids perform all the functions of Nymphs in general, to discuss them here would only cause confusion.

For Nereids as active in whirlwinds, see J. C. Lawson, *Modern Greek Folklore and Ancient Greek Religion*, Cambridge, 1910, p. 142.
J. E. HARRISON.

HARRANIANS.—The Harranians were a Syrian religious community named after their headquarters, Harrān (the Haran of the OT, and Carrhae of the classical geographers). The first mention of them as a sect seems to be in the Chronicle of Dionysius of Tell-Mahré (ed. Chabot, Paris, 1895, p. 69), composed about A.D. 840; he confuses them with the Manichaeans, and records an occurrence of the year 764 in which they were concerned. Owing to the fame acquired by various professional men and writers belonging to this community, they attracted the attention of Muslim authors, who composed numerous monographs about them and their tenets. Some of these are preserved, at any rate in part, in the *Fihrist*, or Bibliography, of Ibn al-Nadim, composed A.H. 377 (A.D. 987); and accounts of them are given in the *Murūj al-Dhahab* of Mas'ūdī, composed A.H. 332 (A.D. 943), and in his later work, the *Tanbih*, composed A.H. 345 (A.D. 956). Much is also heard about them in the 6th cent. of Islām, especially in the treatise on Sects by Shahrastānī († A.H. 548 [A.D. 1153]) and the 'Guide of the Perplexed' of Moses Maimonides († A.H. 601 [A.D. 1204]). The community seems to have disappeared during the devastation of Mesopotamia by the Mongols in the 7th cent. of Islām.

Islāmic writers usually call them Sabians (*Ṣābi'ah*)—a name which occurs in the Qur'ān, where those who hear it are treated with some respect; and, according to some of the Muslim authorities, the Harranians adopted it in A.H. 218 (A.D. 833), in order to obtain recognition as a tolerated cult. The name itself, it is thought, really belonged to quite a different community, viz. the Mandaeans. This account of the appellation, which was first enucleated by Chwolsohn in his monumental treatise on the *Sabier* (St. Petersburg, 1856), has ordinarily been accepted; but it is not free from difficulty, for Ṭabarī († A.H. 310 [A.D. 922]), in his Commentary on the Qur'ān (i. 243, Cairo, 1321), after Yūnus b. 'Abd al-'Ala († 264 [877]) after Abdallāh b. Wahb († 197 [812]) after Ūsāmah b. Zaid († 153 [770]), locates the Ṣābi'ah in the Jazīrah of Maṣūf, which, though somewhat vague, is a correct location of Harrān, but would not suit the Mandaeans. If these authorities are correctly given, the connexion between Harrān and the Ṣābi'ah must have been three-quarters of a century earlier than the date given in the *Fihrist*; and the earliest geographer Iṣṭakhri (c. A.H. 300 [A.D. 912]) mentions Harrān as the city of the Ṣābi'in (p. 76, ed. de Goeje, 1870), without any suspicion that the connexion was less than a century old. 'There,' he says, 'are their seventeen sacerists (*sudanah*).' Neither of these authorities was accessible to Chwolsohn. Further, it would appear from good traditions that the followers of Muḥammad were known by their enemies, and even to some extent among themselves, as *Ṣābi'ah*, and this seems to bear some relation to the title which Muḥammad connects with Abraham, *Ḥanīf*, and which he gave his own community. For Christian writers frequently speak of the Harranians as pagans, *hannē*, and Abraham is connected with the city of Harrān in Ac 7⁴ rather more decidedly than in the narrative of Genesis. The controversial but decidedly learned writer, Ibn Hazm († 456 [1063]), in his *Fisal wa-Milat* (Cairo, 1317, i. 35), has no hesitation in identifying the Harranians with the *Ṣābi'ans* of the Qur'ān, and supposes that Abraham was sent to convert them, and that during his time they took the name *Ḥanīf*. According to him, they believe,

like the Mazdeans, in two eternal elements; they honour the seven planets and the twelve constellations, and paint them in their temples; they offer sacrifice and incense; but they have five prayers similar to the Muslim ceremony, they fast in Ramaḍān, turn to the Ka'ba in prayer, and regard the same meats as unlawful as are so regarded by the Muslims; their religion was then identical with that afterwards restored by Muḥammad, except that they had introduced the worship of the stars and of idols, which Abraham endeavoured ineffectively to abolish.

Although this account has many inaccuracies of detail, it is confirmed in some important matters by the others; and it seems to solve one of the puzzles of Islāmic history, viz. the adoption by Muḥammad of the name *ḥanīf*, while he himself was called *ṣābi'* by his contemporaries. But this would imply that the latter name was used either by or for this community in his time, whence we should suppose that the story adopted by Chwolsohn was a fiction invented by its enemies—a supposition which is by no means unlikely. The origin of the appellation *Ṣābi'ah* is obscure. Ṭabarī in his history (i. 178) derives it from one Ṣābi', a son of Methuselah, but in his Commentary (i. 243), like the lexicographers, he supposes it to come from a verb *ṣaba'a*, 'he changed his religion,' which appears to be an inference from the application of the name to Muḥammad and his followers. A rather better etymology seems to be that put into the mouth of a Ṣābi'an by Shahrastānī (p. 203), from *ṣabā*, 'to desire,' since that verb is also found in Syriac, and would have an exact analogue in the name *murīdūn*, 'aspirants after the knowledge of God,' which is taken by Sūfi novices, and has even been used as the title of a sect.

The accounts of the Harranian system preserved by the Muslims purport to come either from members of the sect with whom the authors came in contact, or from Arabic translations of their sacred books. One of the latter was made by order of a *qādī* of Harrān, and, according to the author of the *Fihrist*, was widely read; of another, called the 'Book of the Five Mysteries,' he had come across a mutilated copy. A Harranian calendar was composed by Abū Sa'īd Wahb b. Ibrāhīm, the Christian contemporary of Ibn al-Nadim, who gives it *in extenso*; and another is embodied by al-Bīrūnī in his *Chronology of ancient Nations* (A.H. 390 [A.D. 999], tr. Sachau, London, 1879, pp. 314–320). The *Fihrist* also embodies a list of Harranian gods, and some other matter of an analogous kind. A magical treatise called *Ghāyat al-Ḥakīm*, of about A.H. 440 (A.D. 1048), also contains what is ostensibly a lengthy extract from a Ṣābi'an book. Finally, Shahrastānī reproduces a lengthy dialogue between the Ṣābi'ans and the Ḥanīfs.

From a comparison of these documents, Chwolsohn inferred that the Harranians were, as the Christians called them, pagans, i.e. a community who had retained a mixture of Babylonian and Hellenic religion, over which there had been superimposed a coating of Neo-Platonic philosophy (chiefly among the educated), while certain features had also been adopted from one of the monotheistic cults, possibly through the influence of the surrounding Muslims. This view perhaps harmonizes the evidence before us as well as it is possible to harmonize it; yet the Muslim authors seem to call attention with justice to certain features which Ṣābi'ism shares with Islām, especially three daily prayers measured by inclinations and prostrations, which imply that they were a real sect, i.e. followers of a system founded by some person or persons, rather than that their worship was a survival modified by unconscious syncretism. The 'prophet'

whom they professed to follow were Hermes and Agathodæmon, whom they identified in Shahrastānī's time with Seth and Idris (Enoch); these names appear to belong to the Hermetic period of Hellenic religion (G. Murray, *Four Stages in Greek Religion*, 1912, p. 95).

Of the documents mentioned above, the most authentic appears to be the list of gods, which, however, is so seriously corrupted or mistranslated that little can be made of it; in another account the Harranians are said to sacrifice to the gods of the seven week-days, whose names are partly Babylonian, partly Greek. To these the sacrificial calendar adds 'demons, *jinn*, spirits, the god of the *jinn*, the lord of the hour, the god who makes arrows fly; the god Tawūz [or Tammūz], who was slain by his master, who then ground his bones in a mill, and scattered them to the winds; Haman the prince, father of the gods, the prince of the *jinn*, the greatest god, the god North, the lord of fortune,' etc. The account of their sacrifices contains much that is incredible; the sacrificial animals were, according to it, in many cases burned alive; and on one day they would sacrifice a child, whose flesh was thoroughly boiled and made into cakes, which were then eaten by a certain class of the worshippers. On a particular day they prayed for the destruction of the Mosque of Harrān, the Christian Church, and the Women's Market; to be followed by the restoration of their kingdom. It seems clear that the calendar is the work of an enemy of the sect. The story, however, of the human sacrifice appears to have been brought up as frequently as the modern accusation of the same kind against the Jews. Dionysius (*loc. cit.*) asserts that they annually entrapped a victim, whom, after keeping for a year, they decapitated with a view to divining by his head; and this story is separately told in the *Fihrist*, where, in lieu of decapitation, they are said to have boiled the body so long that the head came off. The victim, according to this account, was a person who displayed 'mercurial' qualities, which are explained in the *Ghāyat al-Ḥakim*. In the story of Dionysius, one of their victims succeeded in escaping and invoking the Muslim authorities, who severely fined the delinquents; we may, however, be sure that the practices described in this calendar would never have been tolerated by the Muslim rulers. Al-Bīrūnī's calendar agrees in some respects with that of the *Fihrist*, but contains many more names. The chief accounts agree in making the Harranians pray towards the north, and fast for thirty days, distributed between December, February, and March. They had a law of purity resembling in several respects that of the Jews, and they had a table of unlawful meats, wrongly identified by Ibn Ḥazm with that of the Qur'ān, since they tabooed the camel.

Most of the accounts make star-worship a chief characteristic of the Šābi'an system, and in the magical treatise published by Dozy they are credited with an elaborate astrological theology. As, however, the author gives reasons why no Šābi'an can ever divulge the mysteries of his faith, the authenticity of this document is self-condemned. The 'Book of the Five Mysteries,' from which extracts are reproduced by the author of the *Fihrist*, appears to be a service-book, in which there are verses and responses repeated by the *kāhin* (priest) and a congregation of youths, apparently identified with the *bughdārī* (an uncertain word, which may be Persian). The matter of this service-book is so poor that the author of the *Fihrist* suggests that the translator was either a bad scholar or translated too literally.

Mas'ūdī and Shahrastānī treat the Šābi'ans as philosophers rather than as pagans; besides temples

to the planets, which, according to Mas'ūdī, were in a variety of geometrical figures, they had temples of the First Cause and the Reason, of the Chain, Matter, and the Soul. In Mas'ūdī's time only one temple remained—that of *mydān šed*, 'the great goddess,' which, however, the Muslims supposed to be dedicated to Abraham's father, called in the Qur'ān Azar. The knocker of the door bore an inscription in Syriac characters which Mas'ūdī was told meant 'Whoso knows himself is religious,' supposed to come from Plato. He also tells of a ceremony of initiation undergone by the Šābi'an youths in the vaults of this temple, similar to one described in the magical treatise. Shahrastānī's 'Debate' makes the Šābi'ans defend by metaphysical arguments their practice of approaching the First Cause indirectly by sacrifices and prayers to the intermediaries, who are the powers attached to the celestial spheres.

Many works by Šābi'an authors are still extant, but they appear to throw no light upon their tenets. Their most famous man of science was Thābit b. Qurrah (A.H. 211-288 [A.D. 826-900]), who translated various Greek scientific works into Syriac and Arabic. Equally distinguished as a secretary of state was Ibrāhīm b. Hilāl (313-384 [925-994]), many of whose letters and poems are preserved. We learn from his biography (Yāqūt, *Dict. of Learned Men*, ed. Margoliouth, 1910, i. 324-358) that the family profession was medicine, as was the case with other Šābi'ans of note. Ibrāhīm was famous for his accurate acquaintance with the Qur'ān—a qualification indispensable in his vocation. The private letters of this personage do not appear to differ in their religious expressions from those of professed monotheists.

Until some discovery is made of genuine works belonging to the sect, their origin and tenets must remain obscure. A certain amount of veracity is attested for the Muslim accounts by the number of Syriac words which they contain; and it is noticeable that some Muslims call them 'Chaldæans' and others 'Chasdeans' (so Fakhr al-dīn Rāzi, † 606 [1209]), which perhaps was a title that they assumed. The polemic put in the Qur'ān (vi. 74-83) into the mouth of Abraham, who endeavours to convert his father from the worship of idols, and himself repudiates the worship of the heavenly bodies, bears a curious likeness to that which Shahrastānī ascribes to the 'Hanifs' in their reply to the Harranian Šābi'ans.

LITERATURE.—Besides Chwolsohn's work mentioned above, there is text and tr. of the extract from *Ghāyat al-Ḥakim* by Dozy and de Goeje, in the *Actes du sixième Congrès des Orientalistes*, Leyden, 1888, ii. 285 ff.

HARTMANN.—See PESSIMISM AND OPTIMISM.

HARVEST.—The ceremonies and observances of primitive races before, during, or after harvest belong to a group of customs which have gathered round the critical seasons of the year. The exact date at which such celebrations or ritualistic observances are carried out varies according to the character of the community. Among tribes whose chief occupation is hunting, the opening of the hunting season will, as a rule, be found to be marked by a ceremony which has for its object to secure a plentiful supply of game and the success of the hunters. In agriculture, the most critical season to the primitive mind is the time of sowing. This period of the year is marked by magical rites and practices intended to ensure the growth and fertility of the crop. As the year goes on, various means are employed to influence the course of natural phenomena or avert the evil consequences of untoward conditions, such as an inadequate

rainfall. Harvest observances, though in their most obvious aspect in a civilized community they celebrate only the turn of the year and the fruition of the labours of the preceding months, depend, to the primitive mind, upon the same principles as the rites of the earlier stages; and consequently the harvest is not simply an occasion for rejoicing, but a time at which natural forces have still to be propitiated.

Taking harvest rites as a whole, the essential elements resolve themselves into three: (1) propitiatory rites; (2) observances to secure fertility; (3) communion, and the offering of firstfruits, usually accompanied or followed closely by a feast, a period of licence or rejoicing, which in the course of development tends to become simply a celebration of the end of the labours of the year. These elements do not necessarily all appear in all harvest practices, nor are they always clearly distinguishable. A rite may exhibit features which would justify its classification under more than one head.

1. **Propitiatory and cognate rites antecedent to the harvest.**—At a stage of belief which attributes a soul or spirit to objects both animate and inanimate, the act of destruction involved in plucking fruit or killing an animal for human consumption is one of peculiar danger. In both cases the spirits of the animal or vegetable world must be propitiated to avert the evil which would otherwise inevitably follow assimilation. In the case of corn, which impresses the mind merely by the regularity of its growth and the effect of space it gives, the feeling of danger is intensified by the fact of human interference with the course of Nature in cultural operations, as well as by the organized and prolonged effort required to secure the crop. This deduction from the general character of religious beliefs among primitive people is fully borne out by their practices at the opening of the harvest.

Among the ancient Egyptians, the reaper, after cutting the first few blades of corn, atoned for the impiety of his act by beating his breast and uttering the lament which the Greeks called *Μαρώνας* (Herod. ii. 79); in Greece, just as the death of vegetation was bewailed in the Linus song, a song was sung over the corn-stack (*ἱουαῖ*), and in Babylonia the death of Tammuz (obviously, from the legend, a personification of the corn) was bewailed by the women. The feast of Demeter Chloë, which was held at Athens on the sixth of Thargelion, at about the time when the corn was ripe, was a solemn feast of purification and of mortification, and probably was originally the feast of atonement and propitiation before the gathering of the harvest (L. R. Farnell, *CGS*, Oxford, 1898-1909, iii. 34). The Nandi woman, when she goes with her daughters to pluck the first ears of elusine grain in her plantation, is actuated by the same motive: the plucking is a solemn function with a regular ritual, and the crop as a whole can be gathered only when the corn has been accepted by the spirits (A. C. Hollis, *The Nandi*, Oxford, 1909, p. 46).

Among the Thangkuls of Manipur, no work other than that of attending the crop is done from the time of the first *genna*, or tabu period, which follows the sowing. Among the Mao group of the same district, a *genna* lasting for four days is observed at the beginning of the harvest (T. O. Hodson, *The Naga Tribes of Manipur*, London, 1911, p. 167 ff.). Any action which might prove prejudicial to the crops is thus prevented. A ritual must be observed at the time of plucking the first fruit or seed, before the real harvest begins, to secure a plentiful crop and to avoid offence to the spirits (see art. *Firstfruits*).

Another indication of the sacrosanct character of the crop is that the first sheaf is sometimes cut by some one specially designated. In Ceylon, among the Burghers, the first sheaf is cut by a Kurumba, a man belonging to a tribe whose members are looked upon as magicians. Among the Kurgs of Southern India, the man who has to cut the first blades of corn is chosen by an astrologer, and in the ceremony which follows he is not allowed to mix with other members of the tribe until the loaf made from the grain of the blades he has cut has been eaten. In one part of Yorkshire, the first corn was cut by the vicar, and from this corn the bread for the communion was made.

(1) **The 'corn-spirit.'**—Customs connected with the gathering of the harvest and the threshing of the corn which are practised, or were practised until recently, among the European peasantry point to the survival of a belief in a spirit immanent in the corn, or closely connected with its fertility. The existence of this belief is affirmed by the epithets 'corn-mother,' 'pea-mother,' and 'rye-

mother,' according to the nature of the crops. In Lithuania it was believed that an old woman sat among the corn; both in Germany and in Poland, children were warned against entering the cornfields or treading down the corn because of the 'corn-mother.' The 'corn-mother' is sometimes identified with Death, and the children are warned against entering the cornfield because 'Death sits among the corn'; the last sheaf is sometimes known as 'the Dead One,' and in a children's game played in Transylvania Death is represented by a child dressed in maize leaves. At Dinkelsbühl in Bavaria, the corn-mother was said to punish the farmer for his sins by giving him a bad harvest.

The precise character of the beliefs is still more clearly indicated by customs followed at various stages of the work. The spirit is supposed to reside in the last sheaf of corn, the object of the reapers or threshers being to drive it away or catch it. In Hanover, the reapers beat the last corn with sticks until all the grain has fallen from the stalks, when the corn-spirit is said to have gone. A more common practice is to make the last blades of corn into a doll—the 'corn-mother.' At Dantzic, the doll is brought home in the last waggon. Frequently the doll is dressed in women's clothes, as in Holstein. When the 'corn-spirit' is conceived as an old woman, the doll is made by one of the elder women, but when the corn-spirit is thought to be young, a 'maiden,' the task usually falls to the lot of a young girl. This presents an analogy to the Mexican belief that the corn-spirit aged as the crops grew and approached maturity: victims of appropriate age were offered at different seasons, varying from young children at the first growth to old men sacrificed at harvest time.

At Bruck in Styria, the ideas of youth and age were combined. The doll was appropriately bound, usually by the oldest married woman under fifty-five in the village, but the finest ears of this sheaf were plucked out to make a wreath for the prettiest girl, who carried it to the farmer. The 'corn-mother' was either placed in the barn at once or carried on a pole behind the girl who took the wreath to the farmer, and then placed on a pile of wood to form the centre of the harvest supper and dance; it was afterwards hung up in the barn until the threshing was over. Sometimes the man who cut the last blades of corn from which the doll was made was wrapped up in the corn-mother and carried round the village by the other reapers. The wreath was dedicated in church on the following Sunday, and at Easter the grain was rubbed out by a seven year old girl and scattered among the young corn, while the straw was given to the cattle at Christmas to make them thrive.

The customs described present, on analysis, several elements which are closely akin to the animistic beliefs of more primitive races. Briefly, these elements may be stated to be: (a) the immanence of a spirit in the crop and especially in the last corn cut, to which material expression is frequently given by an emblem or figure, usually human; (b) the conception of maturity in the corn-spirit, accompanied, however, by a parallel conception of youth; (c) the idea of sympathetic connexion in the performers of certain rites, shown, for instance, by the age of the binder of the doll and the wearer of the wreath; (d) the sacrosanct character of the act of cutting the last blades of corn, the reaper being sometimes identified with the corn, sometimes treated as though guilty of a crime; (e) the vitality of the corn spirit, as signified by the preservation of its material representation, which ensures fertility in the future when given in part to the cattle and in part mixed with the crop of the following year.

The ritual of Osiris and Isis in ancient Egypt and the myth on which it was based, as well as the epithets *Μάκαιρα*, *Τελεσφόρος*, *Καρποφόρος*, applied in Greece to Gaia, and *Καρποφόρος*, *Μεγδαλτρος* ('goddess of the great loaf'), and *Σλόη* ('the verdure'), to Demeter, whose name, it is suggested, means 'barley- or spelt-mother' ($\Delta\eta = \Gamma\eta$ or *Zeid*), and the legends and ritual of worship of Gaia, Demeter, and Kore, seem to point to an earlier belief, in which these deities were identified with the corn in the same manner as the 'corn-spirit' of more primitive races—a phase in a general belief in a vegetation-spirit out of which grew the worship of Adonis, Attis, and Dionysus, as well as of the deities more specifically connected with the corn (see *GB* ii.; and *CGS* iii. chs. i.-ii.).

(2) *Various forms in which the corn-spirit is conceived.*—

Among the Slavs, the last sheaf is known as the 'Wheat-mother,' the 'Rye-mother,' the 'Oats-mother,' the 'Barley-mother,' etc. At Westerhüsen in Saxony, the last corn cut is made into the shape of a woman and decked in ribbons and cloth. In the district of Tarrów in Galicia, while known by the same name, it is made into the form of a wreath. In Auxerre in France, the last sheaf is known as the 'Mother of the Wheat,' etc., and is left standing in the field until the last wagon is about to go home. It is then made into a doll and dressed in clothes belonging to the farmer, a branch is stuck in its breast, and it is set in the middle of the floor at the dance in the evening. At Osnabrück, the last sheaf is known as the 'Harvest Mother.' In Erfurt, a very heavy sheaf, but not necessarily the last, is known as the 'Great Mother.' In East Prussia, the sheaf is known as the 'Grandmother.' Near Belfast, the last sheaf is known as the 'Granny,' its special character being shown, as is not infrequently the case, not merely by a name being given to it, but also by a special manner of cutting: the reapers stand a little distance away, and cut the corn by throwing their hooks at it. In Penbroke-shire, the same method of cutting is followed. At Altishheim in Swabia, all the reapers stand before the last strip of corn and all cut together.

In some parts of England, the last sheaf was known as the 'Kern baby.' The name given to it in the North Riding of Yorkshire was the 'Mell sheaf,' while in Kent it was known as the 'Ivy Girl.' In many places in Scotland it was known as the 'Maiden,' and was usually decked with ribbons; it was also known as the 'Carlin' or 'Carline,' i.e. the 'old woman,' especially where it was cut after Halloween. If cut before sunset, it was more usually known as the 'maiden'; while, if cut after, it was called the 'witch.' Another name commonly used both in Scotland and in Germany is the 'Oats-bride' or 'Wheat-bride.' In Germany, an 'Oats-bridgroom' and 'Oats-bride' are sometimes fashioned with garments of straw; these garments are then plucked from them straw by straw 'till they stand as bare as a stubble field' (Frazer, *GB* ii. 186). In Silesia, the male and female puppets were conducted to the farm house with all the ceremony of a wedding procession.

This method of personification of the crop was not confined to the European peasantry. It is recorded of the ancient Peruvians that they took a portion of the most fruitful of the maize and put it in their granaries. This was dressed up in new garments and known as the 'mother of the maize' (Acosta, *Nat. and Moral Hist. of the Indies* (Hakluyt Soc., 1880), ii. 374). In the Panjáb, a specially fine cotton plant is selected, which is known as the 'mother-cotton,' and anointed with buttermilk and rice-water. The Malaya, the Dayaks, and the Karens of Burma, at harvest time, perform rites to secure the 'soul of the rice,' and thus ensure the fertility of the crops. Among the Dayaks, the chief priest goes through a performance with a bundle of charms in his hand; while gazing in the air, he makes a rush at some invisible object; and then, when he shakes his charms over a cloth, a few grains of rice fall into it which are carefully folded up and placed on an altar specially prepared. Among the Minangkabau of Sumatra, Saning Sari, the goddess of the rice, is represented by stalks known as the 'mother of the rice,' grown from special grain, which has been planted and harvested with special ceremonies, and cut only after the first fruits have been eaten in a festal meal. The rice-mother is fetched home in a neatly worked bag and under an umbrella by persons in gay attire, and placed in the barn. In the Malay Peninsula, the 'rice-mother' and her 'child' are represented by sheaves or bundles of ears in the harvest field (W. W. Skeat, *Malay Magic*, London, 1900, p. 225 f.). The 'bride' and 'bridgroom' of Silesia find their parallel in Java, where the priest picks out a number of ears, ties them together, smears them with ointment, and adorns them with flowers. When the harvest is being carried in, they are provided with a bridal chamber in the barn.

In these customs the last sheaf has appeared as a human being. It is not infrequently described as an animal.

In Germany, when the wind makes the corn wave, it is said to be a 'wolf in the corn.' The children are told that the 'rye-wolf' will eat them up. The wolf is also said to be in the last

sheaf. Near Cologne, the last sheaf was made up in the form of a wolf, and was kept in the barn until the whole crop had been threshed. At Wanzleben, the wolf was driven out of the corn with the last strokes of the flail. Both in Austria and in Germany a cock was sometimes hidden under the last sheaf, and the man who caught it could keep it. In Hungary and Poland, a live cock was sometimes buried in the ground, and its head struck off with the scythe. In Galloway, 'the hare' was cut by the reapers throwing their hooks. In Prussia, Sweden, Holland, and France, the reaper who cut the last sheaf was said to kill the hare, while near Kiel the animal was the cat, or, near Grunberg, the tom cat. At Straubing, horns were stuck in the sheaf to represent a 'horned goat,' while sometimes a live goat was brought on the field, chased by the reapers, and killed by the farmer, as at Grenoble. In the district of Bunzlau, the last sheaf was made up in the form of an ox or cow, stuffed with tow, and wrapped in corn ears. In Bohemia, a sheaf in human form was called the 'buffalo bull.' So also the name 'cow' is given to the last sheaf in Swabia and in Switzerland. An ox is killed on the field in parts of France, and on the threshing-floor the last stroke of the flail 'kills the bull.' Among other animal forms taken by the last sheaf, or connected with harvest beliefs, may be mentioned the horse or mare, which appears at Stuttgart and in Shropshire; the quail, in Normandy; the fox, in Poitou; and the pig and sow, in Swabia, Upper Bavaria, and other parts of Germany.

(3) *Connexum between the last sheaf and the reaper.*—Reference has already been made to the custom whereby the last sheaf is bound or made into the form of a puppet by a woman of an age appropriate to the conception that it represents an old or young woman. By an extension of the custom, the person who performs the office is frequently known by the same name as the doll, or is specially identified with it.

In East Prussia, the reaper who cuts the last blades is said to 'get the grandmother.' In Swabia at Altishheim the man who makes the last stroke when the last strip of corn is cut by all together is said to 'have the old woman.' The same assimilation of the sheaf and the reaper takes place where the sheaf is known by the name of an animal, and in numerous instances the reaper is said to 'have the dog,' the 'pig,' etc. At Neusaas (West Prussia), both the last sheaf and the reaper who cuts it are called the 'old woman.' At Hornkampe (West Prussia), on the other hand, the last sheaf is known by the name of any one who lagged behind in his or her work. At Coburg it is believed that to cut the last sheaf entails marrying an old woman or old man within the year. Where the last sheaf is thought to embody youth, it is sometimes believed that the woman who cuts it will have a child within the year. Brand records (*Pop. Ant.*, ed. W. C. Hazlitt, London, 1906, s.v. 'Harvest') that in the north of England both the girl who cuts the last sheaf and the sheaf itself, which is decked out with ribbons and carried home with great rejoicing on the last wagon, are called the 'Harvest Queen.' The 'wheat bride' of Muzlitz in Moravia cuts the last sheaf and wears the ears; it is said that she will be married within the year. In the ceremonies of the Mandans and Hidatsa of North America, at the maize harvest, the 'old woman' who looks after the crops is represented by old women who dance with ears of maize in their hands.

The identification is made still more complete when a man or woman, usually the reaper or binder of the last sheaf, is not only made the subject of derision, but is wrapped up in the last sheaf. The explanation of this may be found in the belief that, when the spirit is beaten out of the last standing blades of corn, it enters into one of the bystanders. The rough horse-play of the harvest field thus embodies one of the most primitive forms of belief, viz. that anything coming into contact with what is filled with a mysterious 'power' and is therefore tabu will itself be filled with that 'power' and likewise become tabu.

At Neusaas, the 'old woman,' which is dressed up with hat, ribbons, and jacket, and the woman who gets it, i.e. the binder of the last sheaf, are carried home together; so also at Hermsdorf in Silesia. In Poland, the woman who bound the last sheaf was wrapped up in it and carried home; she sat in the sheaf throughout the supper and dance, and, as was common in many districts, was known by the name given to the sheaf—in this case *baba*—throughout the following year.

Similar customs appear in the practices attendant on threshing the corn.

In Bavaria, the last sheaf threshed was known as the 'old woman,' and some person was dressed up in the last straw carted, and carried through the village. The practice of *La Vendée* shows the almost complete identification of a person and the corn. There, the farmer's wife was tied up in a sheet with the last sheaf and carried to the threshing machine, under which she was pushed with the corn. She was then pulled out and tossed in the sheet—an obvious simulation of winnowing. Sometimes, in Lithuania, corn is threshed on the back of a man who lies down under the last sheaf. At Wanzleben, after the

wolf has been driven out by the last stroke of the flail, a man is led through the village with a chain round his neck, as though he were the wolf caught in escaping. In Poland, a man in a wolf's skin is led about in a similar manner at Christmas.

The practice of carrying a live cock, pig, or ox on the harvest field is another phase of the transference of the spirit of the corn to a material object.

2. Fertility charms.—The importance of an adequate rainfall for the proper growth and nourishment of the crops being so great, it is not surprising to find that many of the customs connected with the harvest should appear to have as their object the securing of such a rainfall by means of sympathetic magic. The custom of drenching the corn-mother with water as it was carried home is an instance of such a rain charm.

In Neusaans, both the sheaf and the reaper who cut it, when brought home together, were drenched with water. In Poland, the woman known as the *baba* was drenched as she was carried home. Sometimes men were stationed behind the farm-gates with pails of water ready for the home-coming. In Rutlandshire, where children were carried on the last cartload of the bean harvest, a regular pitched battle with water and apples was fought between the maidservants and the men, from the gates of the farm until the waggon came to rest in the bean-yard (Brand, *loc. cit.*). In Bulgaria, the corn effigy was thrown into the river after it had been carried round the village. In Carinthia, the man who has been wrapped in straw to personate the corn-mother on the threshing-floor is rolled in a brook. The 'gardens of Adonis,' the small bowls of sprouting grain which the Athenian women planted and tended with special care for eight days at the time of the springing of the corn—a practice intended to secure the fertility of the crop by sympathetic magic—were thrown into the river to ensure rain.

Frazer (*GB*² ii. 225) suggests that the throwing of the corn-mother into the river may be a survival of the practice of throwing the body of a human victim into a river, just as the custom of burning the 'Ceres' at Auxerre after the harvest dance and of burning the corn-mother in Bulgaria and scattering the ashes recalls the practice in Egypt of burning a human victim and scattering his ashes on the fields to secure the fertility of the crops.

Many customs are intended to secure a plentiful crop in the following year.

In Westphalia, the 'harvest-mother' sheaf is made heavy with stones, in the hope that all the sheaves in the next year will be equally heavy. At Alt-Pillau, eight or nine sheaves are bound together to make one huge sheaf. In Scotland, in the Isle of Lewis, the 'old wife' is dressed up, her dress including an apron tucked up to make a pocket, which is stuffed with bread and cheese and a sickle.

Frequently it is believed that the same object will be attained by preserving the material embodiment of the corn-spirit—the 'hag,' 'old woman,' or 'corn-baby'—throughout the year.

In Pembrokeshire, the 'hag' is carried home by one of the reapers; the other reapers handle him roughly, throwing water at him. If he is successful in carrying the 'hag' to the farm dry, the farmer pays a small fine, and the 'hag' is kept in the farm until the next year. The 'Kern-baby' in England is kept in the farm-parlour for the rest of the year. At Balquhider, in Scotland, the 'maiden' is kept in the house until the next 'maiden' is brought in. Near Cologne, where the last sheaf is known as the 'wolf,' the wolf is supposed to be at the farm throughout the year.

The corn-spirit is supposed to live throughout the year; and the practice of mixing part of the grain from the 'corn-maiden' with the seed ensures the presence of the spirit in the crop of the following year.

On the Styrian farm, the wreath which formed part of the last sheaf and has been kept through the winter is scattered among the springing crops in the following year; its influence on the wellbeing of all forms of life is shown by the straw being placed in the manger of the cattle at Christmas. In Tarnow, in Galicia, the wreath is mixed with the seed corn. In the north of Scotland, the 'maiden' was given to the cattle on Christmas morning, at Balquhider to a mare in foal, or the oldest cow. On Islay, the 'old wife' is kept throughout the winter. When the men first go out to plough in the spring, they carry the grain taken from her in their pockets, and give it to their horses to eat, in order to secure a good harvest. The marriage procession in Silesia is obviously intended to bear on future fertility. The Zapotecs, after keeping the maize sheaf through the winter, buried it in the fields from seed time to harvest to quicken growth. The old Prussians suspended a goat skin in the field from sowing time to harvest to superintend the

growing of the corn; in Upper Bavaria the last sheaf is called the 'goat.' In the course of the maize harvest dance of the Akikuyu, in which all the performers were dressed in maize leaves, a small image of dried clay was unwrapped from banana leaves and held at the level of the face by an old man for adoration. It was then put away in its usual resting-place—a store of flour (W. S. and K. Routledge, *With a Prehistoric People*, London, 1910, p. 188). At the close of the Nandi harvest ceremony, after the old men have eaten a pregnant goat, the women take two pebbles from the nearest water, one of which is kept throughout the year in the water jars and the other in the granaries. In the Malay Peninsula, where the 'rice-child' and the 'rice-mother' appear together, the 'child' is kept to be mixed with the seed in the following year. The Chams of Binh-Thuan, Indo-China, keep three ears of corn to form three furrows in the 'field of secret tillage' in the following year. A custom which bears some analogy to the 'child' or 'rice-mother' of the Malays appears in Normandy, where a small sheaf is wrapped up inside the big one. In West Prussia, a simulated birth takes place on the field. With this may be compared the legend in Greek mythology of the intercourse of Peneter and Iasion in a corn-field, which resulted in the birth of Phrontos. At Dijon, where 'Death' cuts the last ears of corn and slaughters an ox, part of the ox is eaten at the harvest supper, and part is pickled to be eaten on the first day of spring. In Berry, the corn-spirit is born on the field as a cow-calf.

On the other hand, the 'hag' is sometimes passed to other farms. In some parts of Pembrokeshire, after the 'hag' had been cut by the reapers throwing their sickles at it, it was taken, usually by the ploughman, to the field of a neighbour, where the work was still in progress, and thrown at the foreman from behind a hedge. The ploughman immediately ran away, pursued by the reapers working in the field. In parts of Scotland both an 'old wife' and a 'maiden' were cut. According to one account, this was the result of a competition between two sets of reapers, those who finished first getting the 'maiden,' while the others got the 'callicach' or 'hag.' According to another account, the competition was between neighbouring crofters, the 'callicach' being passed on from farm to farm and retained by the farmer whose harvest was completed last. In North Uist the 'callicach' was put overnight among the standing corn of lazy crofters. The same custom was followed in threshing; e.g., in Thuringia, when the corn had been threshed, the last sheaf was taken to a farm where the threshing was still unfinished.

Sacrifice and fertility.—It appears that cutting or binding the last sheaf entails certain penalties, while the farmer who finishes his harvest later than his neighbours is in some districts penalized with the custody of the 'hag.' The obvious explanation is that the consequences are decreed by rustic wit for lack of dexterity. On the other hand, the close identification of the last sheaf and the reaper, when viewed in the light of other practices, suggests a less obvious reason. In the Romsdal and in other parts of Norway, when all the hay has been cut, the 'old hay-man' is said to have been killed. In Bavaria, the reaper who cuts the last sheaf is said to have killed the 'old man.' In Lithuania, 'Boba's head is cut off.' Sometimes a straw pygmy is put under the last sheaf, and the 'old woman is struck dead.' A stranger who crosses the field is pursued and tied with straw-bands, and must pay a ransom before he is released, or the farmer himself may be bound when he enters the field. In Mecklenburg, the reapers advance in a body towards the farmer, shouting and sharpening their scythes as if preparing for a sacrifice; and so also on the threshing-floor. At Wiedingharde, in Schleswig, any stranger on the threshing-floor is nearly throttled with the flail, which is put round his neck as if he were a sheaf of corn.

The custom of human sacrifice to secure the fertility of the crops appears to have been widespread. In the earlier stages of the practice the victim appears to have been regarded as the embodiment of the corn-spirit. This must be held to be the reason for scattering his ashes on the field, or throwing his body in the river; while the solemn feasts at which the victim's body was eaten by the ancient Mexicans lend support to the view that they also believed that by partaking of the body of the corn-spirit they ensured a good harvest. It has been conjectured that the head-hunting practices of the Nagas of Manipur, and their custom of setting up a straw figure at which they

shoot with arrows at certain times, may be connected with agriculture. When the figure is hit, the one who hits it in the head, it is said, will take a head, but the one who hits it in the stomach will have good crops (T. C. Hodson, 119). The connexion between human sacrifice and fertility is also shown in the custom of the Indians of Guayaquil of scattering human blood on the fields at the time of sowing, while at the Mexican harvest a criminal was crushed between two falling stones when the firstfruits were offered. The Mexicans, as already stated, offered a series of sacrifices to make the maize thrive, culminating in the sacrifice of an old man at harvest time. Among the Pawnees and Sioux, human sacrifice was offered in the spring; and, in one case described among the latter, after the heart of the victim had been eaten, the flesh was cut in small pieces and scattered on the fields.

Instances of human sacrifice to secure good crops are recorded in West Africa, at Benin, and among the Bechuanas and other races, usually in connexion with the sowing of the crops, or at the time of their early growth, to promote fertility. Among the Khondas, part of the victim was buried as an offering to the earth-goddess; if the victim wept copiously, it was a sign of a plentiful fall of rain (S. O. Macpherson, *Memorials of Services in India*, London, 1885, p. 113). Among an agricultural tribe in Uganda, the sacrifices took place at about the time of the harvest. The Tshi offered a human victim at the yam harvest, pouring his blood into a hole in the ground (A. B. Ellis, *The Tshi-speaking Peoples*, London, 1887, p. 230).

Greek ritual and belief preserve traces of human sacrifice in connexion with fertility. The legend of Aglauros casting herself down the precipice of the Acropolis, it has been suggested, may have arisen out of a misrepresentation of a primitive custom of casting an effigy of the vegetation spirit down a steep place. In a rite of Aglauros, later consecrated to Dionede, a human victim was sacrificed at the altar by the *ephebi*. A legend at Hallartos of the type of the story of Jephthah's daughter (Jg 11³⁴⁻⁴⁰) speaks of water springing up wherever the blood of the victim dripped (CGS iii. 19, 21). The ceremonial of the Bouthonia suggests the substitution of an ox for a human victim at a 'firstfruits' ceremony.

Frazer (*GB* ii. 222 ff.) suggests that, when the European customs are considered in the light of the practices followed by primitive races, we are justified in concluding that it was the practice at one time in Europe to offer a human sacrifice on the harvest field, the victim being identified with the corn-spirit. The penalty paid by the last reaper was death, as, he being nearest at the time the spirit was driven from the corn, it would be natural to conclude that it had entered into his body.

3. Communion, harvest supper, firstfruits, and the seasonal festival.—It remains to consider the question of the harvest supper and the offering of firstfruits, which are closely connected, although by no means identical. Attention has already been called to the custom that the 'harvest maiden,' in which a man or woman is sometimes wrapped, should be present at the dance or supper which usually follows the taking of the harvest.

In La Vendée, the 'Ceres,' before being torn to pieces and burnt, was the centre of the dance. In the North Riding of Yorkshire, the 'mell doll' was present at the mell supper. In Lewis, the farmers and reapers drink to 'the one that helped us with the harvest.' At Dantzig, the 'old man' was carried to the supper, and a portion of everything was given to him; but this was eaten by the woman who bound the sheaf, had it as her partner at the supper and dance, and was known by the same name for the remainder of the year.

The presence of the harvest figure at the supper, and the importance attached to it, suggest something more than a mere feast of rejoicing at the successful completion of the year's work. Instances have already been quoted of the killing of an animal, such as a cock, a pig, or a bull, on the harvest field as an embodiment of the corn-spirit. The bodies of these animals were sometimes given to the reaper who killed or caught them; sometimes, especially in the case of a larger animal, its flesh was eaten at the harvest supper, as in the case of the goat killed at Grenoble.

At Dijon, the ox killed on the harvest field was partly eaten at the supper, and partly pickled and kept until the spring. In Bavaria, the man who made the last stroke in threshing had to

carry the pig to a neighbouring barn where the threshing was still going on. He ran the risk of being beaten, but at the harvest supper he received a number of dumplings in the form of pigs.

From the numerous instances of eating the body of the slaughtered animal, bearing in mind their special relation to the harvest and the significance of other customs, it would not be unreasonable to conclude that the harvest supper is a survival of a form of solemn feast, of which the great festivals in Greece connected with the worship of Demeter and Kore, the Halos (the threshing-floor festival), and the Eleusinia were probably a development. Hippolytus (*Philosoph.* v. 3) says that in the Mysteries the Epoptæ were shown the mystery of perfect revelation—a cut corn-stalk.

The animistic beliefs which give rise to the conception of a corn-spirit are evident when the corn of the last sheaf provides the material for a cake in human form to be distributed among the members of the household or the harvesters, or when, as among the Aztecs, a human victim was identified with the god. When, however, special ceremony attaches to the eating of the new corn, either in fact or in symbol, the ritual, in the course of development, tends rather to be concerned mainly with averting the danger of breaking the tabu involved in cutting or eating the corn for the first time, or in propitiating or offering thanks to the spirits which might affect the crops adversely (see art. FIRSTFRUITS).

The ritual and beliefs serve to bring out several points of interest in connexion with the harvest supper. (1) It is a survival or descendant of a solemn meal, (a) at which the spirit of the crops was present, or (b) for which the material representation of the corn-spirit furnished the food, or (c) with which human sacrifice was connected. (2) It is not merely a feast of rejoicing after the harvest, but it is either a necessary antecedent to the harvest, or, when it follows or accompanies the harvest, it must precede the general use of the crops for ordinary consumption. (3) By a logical extension of idea the sacramental feast grows into an offering of firstfruits to the powers that preside over the crops. (4) The solemn ritual of the harvest meal is frequently accompanied or followed by a period of licence, in which the ordinary rules of conduct and respect for superiors are disregarded, or in which an inferior may even take the place and usurp the authority of his superiors. On this point it may be recalled that these changes of personality and irregular conduct are frequently adopted for purposes of disguise, and that, even when such saturnalia are not the concomitants of ceremonies held at harvest time to drive away the spirits of the dead—as, for instance, is the case after the harvest among the Hos of Assam, and in the 'devil driving' of the Hindu Kush tribes, when the evil spirits are expelled from the granaries—the harvest is a critical period of the year when malign influences may be expected to be especially powerful.

The harvest supper observances as a whole, taken in conjunction with the beliefs which underlie other harvest customs, point to an origin in a belief that the crop is tabu, and that to cut it or eat it is a dangerous act, of which the risk can be averted only by the process—familiar in the practices of magic—of a solemn covenant based upon a communion in which that which is feared is brought into the closest relation with the one who is afraid. In this case, by eating the material manifestation of the dangerous element after special precautions, the primitive mind of the savage believes that he becomes one with it and immune from its influence.

HASAN 'ABDĀL.—A village and ruins in the Attock District of the Panjāb; lat. 33° 48' N.; long. 72° 44' E.; forming part of the great city known to Greek and Roman authors as Taxila (Τάξιλα), a close transcription of the Pāli or Prakrit name *Takhasilā*, Skr. *Takṣaśilā*, 'hewn rock or stone' (McCrindle, *India as described by Ptolemy*, London, 1885, p. 118 ff.). It takes its present name from that of a Muhammadan saint, Bābā Ḥasan 'Abdāl, who lived under Mirzā Shāhrukh, son of Timūr (Elliot, *Hist. of India*, London, 1867-77, i. 239; *Ain-i-Akbarī*, tr. Blochmann and Jarrett, Calcutta, 1873-94, i. 515). The sanctity of the place—still a resort of considerable numbers of pilgrims—dates from early times. Hiuen Tsiang, the Buddhist pilgrim of the 7th cent. A.D., describes the tank of the Nāga Rājā, or snake-king, Elāpatra, to which, when the people wanted rain or fine weather, they used to go in company with some Buddhist ascetics (*samāna*), and, snapping their fingers, invoked the aid of the Nāga, and at once obtained their wishes (Beal, *Si-yu-ki*, London, 1906, i. 137). The place seems originally to have owed its sanctity to a holy spring which gushes into the fountain of the modern saint. Round this, as is common in India, a serpent-cult grew up, the Nāga, or dragon, being supposed in particular to have control of the weather (Crooke, *PR*², 1896, ii. 128 ff.). The Buddhist legend was succeeded by a Brāhmanical version; and that again by a Muhammadan story, of which the saint Bābāwālī is the hero; finally, the Sikhs connected the site with a miracle of their *guru*, Nānak, who, coming to the place fatigued and thirsty, invoked Bābāwālī for a cup of water. The saint, indignant at the presumption of an unbeliever, flung at him a stone several tons in weight, which the *guru* caught in the air, leaving the impression of his fingers on it, which are visible to this day. The whole series of legends is an interesting example of the manner in which a place, owing its sanctity to some natural feature, is adopted in turn by the followers of rival faiths. The importance of the place in Buddhist times is shown by a *stūpa* and the remains of a temple discovered by Cunningham.

HASAN AL-BASRĪ.—Ḥasan al-Basrī (Abū Sa'īd) was born at Wādī 'l-Qurā near Medina in A.H. 21 (A.D. 641-642), two years before the end of Omar's khalifate, and died at Baḡra in the month of Rajab, A.H. 110 (October-November, A.D. 728). Ibn al-Athīr says that his age was then eighty-seven, in which case the date of his birth would be A.H. 23. Both his parents were originally slaves. His father, Yaṣār, was a native of Māisān in the neighbourhood of Baḡra, was taken prisoner in A.H. 12, during the conquest of 'Irāq by Khālīd ibn Walīd, and became a freedman of one of the inhabitants of Medina—of Zaid ibn Thābit, the Prophet's amanuensis, according to some authorities. Ṭabarī (i. 2029, 1) states that the name of Hasan's father was Ḥabīb, and that he was a Christian, while al-Sha'rānī (*Ṭabaqāt al-kubrā*, i. 51, 13) declares that he was of Nubian extraction. These statements are significant, in view of the great influence which Ḥasan and his pupils exerted on the early development of Muslim theology; and it may be recalled that the famous Egyptian mystic, Dhū 'l-Nūn, who died in A.H. 245 (A.D. 859-860), is said to have been the son of a Nubian slave. Ḥasan's high reputation for orthodoxy was possibly gained, as Dozy has suggested,

at the expense of his pupils, who gave currency to his speculations. At any rate, he was in touch with all the religious movements of the period, and must have taken a leading part in the theological controversies which were then agitating the Muhammadan world. We are expressly told that he disputed on the subject of free will (*qadar*), but afterwards returned to the more orthodox doctrine (Ibn Qutaila, *Kitāb al-ma'ārif*, ed. Wüstenfeld, 1850, p. 225, 12). A commentary on the Qur'an is ascribed to him (Brockelmann, *Gesch. der arab. Litteratur*, Leipzig, 1901, i. 67), and he is said to have expained the meaning of Apostolic Traditions, whereas the older generation were content with reciting them (*Qūt al-qulūb*, Cairo, A.H. 1310, i. 147, line 6 from foot).

Whatever may be thought of the well-known story which attributes the origin of the Mu'tazilite school to a difference of opinion between the master and one of his pupils—Wāṣil ibn 'Atā or 'Amr ibn 'Ubaid—there can be little doubt that in Ḥasan's circle the dogmas of Islām were freely discussed and expounded; it was this freedom that caused his activity as a teacher to have such fruitful results. But if, in fostering the spirit of inquiry, he overstepped the limits of traditional authority, the sayings and anecdotes recorded by his biographers show that his religion was intensely real. His ordinary demeanour was that of a man under sentence of death, and he looked as though hell had been created for him alone. Like many of his fellow-Muslims, both men and women, he found in asceticism the only means of escape from the wrath to come. No man, in his opinion, deserved the name of theologian (*faqīh*) unless he had renounced the present world and fixed all his desires upon the future life. Muslim asceticism soon developed mystical tendencies, and Ḥasan seems to have gone some distance in this direction. It is asserted that he was the first pioneer of mystical science in Islām, and that he made it a subject of discussion, and explained its ideas in terms that were not used by any of his contemporaries (*Qūt al-qulūb*, i. 150, 2). He was the founder of the Basrite school of mystics, who maintained that the knowledge which, according to a maxim of the Prophet, it behoves every Muslim to seek consists in knowledge of the heart, and in a scrupulous examination of the thoughts that enter it, so as to discern whether they are spiritual or sensual, intuitive or intellectual (*ib.* i. 129, 16). Prayer-meetings (*majālis al-dhikr*) were held in his house at Baḡra (*ib.* i. 148, 18). Those who attended them were persons inclined to quietism, interested in communicating to one another their spiritual experiences, in studying the Qur'an together, and in conversing about religious questions. While it is easy to believe that Ḥasan, as Qushairī and other Sūfī writers mention, attached more value to inward piety and humility than to outward acts of devotion, like fasting and prayer, there is no evidence that he was a Sūfī in the full sense of the word. He was driven to righteousness by the goad of fear, not drawn, as the true mystic always is, by a spontaneous and irresistible rapture of Divine love. His character appears in a legend told by 'Aṭṭār in the *Tadhkirat al-Auliya'* (ed. Nicholson, 1905-07, i. 57, 17). 'Utba al-Ghulam, one of his disciples, had crossed a river on foot, while Ḥasan himself remained on dry land, amazed and powerless to follow. Ḥasan asked him how he was able to work such miracles. 'For thirty years,' 'Utba replied, 'thou hast done what God commands, but I have done what He desires.'

REYNOLD A. NICHOLSON.

HASIDÆANS, HASIDISM.—The Hasidæans (*Ḥasidaim* or *Ḥasidai*, from Heb. חָסִיד, *ḥasid*, plur. of חָסִיד, *ḥasid*, 'pious') were the precursors of the Pharisees. The names of the two religious parties have practically the same meaning: *ḥasid* = 'pietist,' and 'Pharisee' (פָּרִישׁ, *pārūsh*, 'separated') means 'separatist.' During the period of the Seleucidæ in Palestine the Hasidæans were the enemies of Hellenism, and opposed the introduction of Greek ideas and manners into Israel. As shown by the name they bear, they were an exclusively religious party; they were rigid zealots; they formed an association, a company of rigorists. In reality they were the descendants of Ezra and Nehemiah, who expelled the foreign wives; they continued the tradition of the Scribes.

As far as the meagre information we possess concerning them enables us to judge, the Hasidæans did not differ essentially from the Scribes. They were men completely devoted to the Law (*πᾶς δ' ἐκουσία* [ὁμῶνος τῷ νόμῳ]), even so far as to take up arms in its defence when it was threatened by sinners and lawless men (1 Mac 2³²⁻⁴⁴); but, as soon as peace was restored, they threw aside their weapons, as their hands were better suited to handle the sacred scrolls than to fight with the sword.

According to 1 Mac., the Hasidæans played only a very minor part in the Maccabean wars. The events which took place in Palestine at the beginning of the national revolt against the Seleucidæ show this very plainly. The high priest Menelaus, who had been put to death in 163 B.C. by command of Antiochus v. Eupator, was succeeded by Alcimus (Ἀλκιμος, *l'alcimos*, *ἄλκιμος*, *Alcimos*, *Yāgīm*), who was of priestly stock, but did not belong to the ruling branch of the Onias family. Josephus (*Ant.* xx. x.) tells us that Antiochus Eupator nominated Alcimus chief priest in 162. According to 1 Mac., when Demetrius Soter de-throned Antiochus Eupator, Alcimus came to him offering his services against the patriotic Jews who were trying to shake off the Syrian yoke. The king, we are told, entrusted him, along with his general Bacchides, with the pacification of Judæa, and at the same time raised him to the high priesthood (1 Mac 7⁶⁻⁹). It is at the time of this mission that the part taken by the Hasidæans appears clearly. The comparative study of parallel fragments from the first and second Books of Maccabees sheds clear light on their attitude in the national revolt.

If we had only the account in 2 Mac., we should be left in no doubt that the Hasidæans took part in the national war, in spite of the obvious errors contained in the narrative. It is there stated that 'being called by Demetrius [Soter] into a meeting of his council and asked how the Jews stood affected and what they purposed, he [Alcimus] answered therunto: "Those of the Jews that be called Hasidæans, whose leader is Judas Maccabæus, keep up war, and are seditious, not suffering the kingdom to find tranquillity"' (2 Mac 14^{6f}).

Thus, according to this account, the Hasidæans were under the command of Judas Maccabæus, and are represented as the promoters of the war.

In 1 Mac., on the other hand, the Hasidæans are the peace party; it was to obtain peace that they sought Bacchides and Alcimus, the deputies of King Demetrius. This is how the author describes that mission:

'And there were gathered together unto Alcimus and Bacchides a company of scribes to seek for justice (*ἐκζητῆσαι δίκαιαν*). And the Hasidæans were the first among the children of Israel that sought peace of them; for they said, "One that is a priest of the seed of Aaron is come with the forces, and he will do us no wrong"' (1 Mac 7¹²⁻¹⁴).

The Hasidæans, then, were not the instigators of the war. In reply to their request for peace, the

royal envoys, thinking they would make an example, had sixty of them put to death. Thus, according to 1 Mac., the Hasidæans, grouped round the Scribes (from whom the Pharisees also spring), form an independent party, acting in opposition to Judas Maccabæus and his followers, as they acknowledge Alcimus not only as high priest but as the lawful representative of Syrian authority.

From the seemingly contradictory texts which we have just quoted it is easy to understand the rôle of the Hasidæans. At the outset the Maccabean war was essentially and exclusively religious: the Jews were fighting with the Syrians to defend the Law endangered by the persecutions of Antiochus IV. Epiphanes. Hence the participation of the Hasidæans, a very rigid and exclusively religious party, in the national revolt. The religious aim pursued by the patriots was attained on 25th Chislew 165, when Judas Maccabæus purified the temple defiled by Antiochus Epiphanes, and restored the Jewish religion. The treaty of Lysias (162), which ensured the religious liberty of the Jews, thus gave full satisfaction to the Hasidæans, who are not again mentioned among the belligerents. Henceforth the Maccabæans alone and their soldiers continued the struggle against the Syrians for the political liberty of the country. We hear nothing more of the Hasidæans, and we have every reason to believe that those forerunners of the Pharisees became blended with them.

In any case an incident which happened during the reign of John Hyrcanus I. (135-105 B.C.), and which exhibits Pharisaism and Sadduceism at that time fully developed and in direct opposition, proves that the Pharisees of that period, engrossed solely with religion and its immediate interests, were indeed the heirs of the Hasidæans. John Hyrcanus was entertaining the Pharisees at a feast, when one of the guests named Eleazar demanded that the royal high priest should lay down the priesthood and rest content with the civil and military power (Jos. *Ant.* xiii. x. 5). That is precisely the position which the Hasidæans took up at the beginning of the national revolt—the absolute separation of the religious from the political domain.

HASTINĀPUR (Skr. *Hastināpura*, 'elephant city'; or, according to other authorities, named after a mythical Rājā Hastin).—An ancient city in the Meerut District of the United Provinces of India, situated on the Bārh Gangā, or 'old Ganges,' an old course of the river; lat. 29° 9' N.; long. 78° E. The legendary account of Hastin will be found in the *Vignu Purāna* (tr. Wilson, London, 1864-77, iv. 139 f.), which states that the old city was washed away by the Ganges. This, the capital of the Kaurava tribe, figures largely in the epic of the *Mahābhārata*. The buildings, which were probably built of clay and wood, have now disappeared; and nothing remains to mark this famous site but some shapeless mounds.

LITERATURE.—A. Führer, *Monumental Antiquities and Inscriptions of the N.W. Provinces*, Allahabad, 1891, p. 10.

W. CROOKE.

HATRED.—1. Psychological analysis.—The term 'hatred' designates a mental state of revulsion from something that offends us—a dislike or feeling of ill-will, intensified by the desire to harm or injure or make a speedy end of the object hated. This applies in chief to hatred of persons by persons, at the root of which lies the desire to

destroy. 'Hates any man the thing he would not kill?' asks Shylock (*Merch. of Ven.* iv. i. 67); 'whosoever hateth his brother,' says St. John (1 Jn 3¹²), 'is a murderer.' But it applies also to hatred of things (including in that term not only inanimate objects, but opinions, beliefs, and the like). Even when a schoolboy says that he 'hates lessons,' he means to express, not merely his feeling of aversion to them, but also his wish to make a summary end of lessons, if only he could; and, likely enough, he gives embodiment to his wish by tossing his books to the other end of the room.

The intensity and duration of hatred in general bear no definite or fixed proportion to the amount of injury received. Much depends upon the nature and temperament of the individual hating; and, especially, upon his private estimate of himself, and his sensitiveness to any affront to his dignity.

The outward corporeal expressions of hatred are clearly marked and well known: biologist, psychologist, and poet alike have duly recognized them; and how they show themselves in the lower animals, as well as in man, has been strikingly brought out by Darwin in his book on *The Expression of the Emotions in Man and Animals*. The menacing attitude of the body, the lowering countenance, the suspicious and unsympathetic look, the leer, and the coldness of behaviour are some of the modes of its objective embodiment; and these objective signs (it is important to observe) have much psychological significance, inasmuch as they react on the emotion proper, intensify it, and tend to keep it alive.

Hatred is not designative of a mere passing mood (like some forms of anger), but of a settled attitude or disposition, which cherishes ill-will and can bide its time and plan means for the injury or discomfiture of its object. It must be distinguished from *antipathy*, which is a merely sentimental or constitutional dislike (for the most part irrational) of an object, leading to shrinking from or avoidance of the object but not to its destruction—as we see, for example, in the antipathy to inoffensive crawling creatures which affects many people.

Hatred attaches itself to the malevolent side of human nature, and is to be classed along with such reprehensible emotions and settled dispositions as envy (*q.v.*), jealousy, revenge. It is essentially anti-social and self-centred.

The great antithetic emotion is love (*q.v.*), and the characteristics of the one are best seen in contrast with those of the other. If, then, (1) we view the two *in themselves*, we find that love is a conserving and attractive force, while hatred is destructive and repellent. Again, (2) regarded *from the side of the subject*, love is a feeling of pleasure or satisfaction with the person loved, together with the desire to do him good or to promote his welfare; hatred is a feeling of dissatisfaction with the object of it, mixed with pain but frequently intensely pleasurable, together with the desire to harm or to secure his ill-fare. Hence, love clothes its object with all amiable qualities and is apt to be blind to faults and defects; hatred clothes its object with all detestable qualities, and refuses to see any good in it. Further, love to a person is prone to make him who entertains it well disposed towards all with whom (or with which) that person associates—even towards his status in society, or the nationality to which he belongs; while hatred produces the exactly opposite effect. Next, (3) *taken in connexion with the object*, love is one great means of turning an enemy into a friend (hence the supreme wisdom of the injunction, 'Love your enemies, bless them that curse you, do good to them that hate you' [Mt 5⁴⁴]);

hatred is prone to turn a friend into an enemy. Love begets love, but hatred breeds hate. Once more, (4) *viewed as successive states*, the two show psychological peculiarities of a very interesting kind. (a) If, from whatever cause, we come to hate a person whom we have greatly loved, our hatred will be intensified by the fact of our previous love, and greater than it would have been if we had not loved before. This, no doubt, arises in part from the fact that we have lost a source of pleasure and are pained; but it involves also the fact that we feel ourselves injured by unrequited affection, and the further fact that we are chagrined at having expended our affection on an unworthy object. On the other hand, when we come to love a person whom we previously hated, our love will be proportionate to our previous hate, and all the greater that hatred has preceded it. (One reason for this is that, in the circumstances supposed, we are conscious of having got rid of a source of pain; but two other things have to be taken into account, viz. the newly-aroused feeling that by formerly hating the person we have done him an injury or an injustice, and the consequent desire to make amends for this injustice. Again, (b) our love for a person is apt to be diminished, and even, perhaps, turned to dislike of him, if he does not love, much more if he actually hates, the things and persons that delight us; while community of likings or of interests goes some way towards making us well disposed towards one whom we hate.

All these are psychological facts, revealed in our actual experience of life, which must be taken into account by the ethicist in determining the value of hatred, and by the legislator, who cannot with impunity ignore the working of any human emotion as it shows itself either in the individual or in the community.

2. Ethical and religious aspects.—As a source of pleasure, hatred has undoubted potency. But this does not necessarily mean that it is to be ethically commended and the development and growth of it encouraged. On the contrary, character is one thing, pleasure is another; and it is the function both of ethics and of religion to emphasize the fact that 'the life is more than meat,' and that the higher aspirations of man and his spiritual ideals count for most. Hence, the psychological fact that the intensity of love may be increased by the circumstance that we have been previously hating does not justify the conclusion that *therefore* we ought to hate. For, if hatred is in itself deleterious to character, it must both restrict the power of loving and lower the kind of love. The increase of love that is dependent on hate is an increase on the level of a being to whom hate seems in itself desirable; but, if perfect love ruled as between man and man, such a conception would be impossible. Love would then be greatest of all, because it implied the abolition of hate and, therefore, substituted the higher pleasure for the lower, or the highest pleasure of all, from which the lower, having degradation in it, is excluded. It is a matter of quality, then, not of quantity or degree. Psychological experience is not an infallible guide to ethical and religious estimate.

(1) From the ethical standpoint, it is *easy to see* why hatred, in so far as it is expended by persons on persons (or even on the lower animals) is condemned. Its pleasure may be intense, but it is too dearly bought. The consequences it entails are far-reaching and disastrous. It lets loose many of the most malignant of the human passions, such as retaliation and revenge—hence, we apply to hatred such epithets as 'cruel,' 'deadly,' 'fierce,' 'vindictive'; it aims at injuring or even destroying the object hated; and it cramps and distorts the

nature of the person harbouring it, blunting his sympathy and perverting his judgment. Above all, it is the mark of deep-seated alienation of one man from another, ignoring the fact of the universal brotherhood of mankind, and transgressing the fundamental law of love, or mutual affection and mutual helpfulness, on which the existence of society depends. As its object is destruction, it repels instead of binding together, it dissolves instead of cementing.

That there is such a thing in man as a natural and legitimate resentment of injury received, ethics fully allows; and this, when rationalized, becomes the powerful thing we know as 'moral indignation'—which is the spontaneous protest of the conscience against wrong inflicted. But it demands more than a conscientious protest: it requires hatred—hatred, however, not of one man by another, but of everything that would interfere with the proper and higher development of a man's nature or of human nature in general; hatred, therefore, of vice or wickedness or wrong. But even then, while it enjoins hatred of vice, it will not allow hatred of the man who practises vice: it is the transgression, not the transgressor, that is to be abhorred. Hence the condemnation by ethics of misanthropy. 'Hatred of mankind' is selfish and abnormal, and destructive of the very idea of 'mankind,' which presupposes *society* and, therefore, unity among the members; otherwise, it would be meaningless. In like manner, ethics condemns war, taken in itself: war is man's hatred of man, with the lust of blood. Carried out to its full extent, it would become a state of universal hostility, which would speedily mean the extinction of the race. Once more, vindictive punishment is condemned by ethics because it is founded on hate, and is meant only to gratify the malignant nature of him who inflicts it. Men—private individuals or legislators—who punish because they hate stand self-condemned.

(2) All this, which is enforced by ethics, is accentuated and strengthened by religion; for, to the ethical reprobation of vice as destructive of the higher moral qualities in man, and the insistence on our loving the evil-doer while condemning his deeds, religion adds the ennobling and vivifying conception of man—of *every* man—as made in the image of God, and thereby sets him forth as an object of reverence, not of hatred, even in his degradation. Thus viewed, he is to be loved for the *possibilities* that are in him, and encouraged to have his potentialities actualized. This at once raises the notion of personality to a higher level than ethics attains. The idea of the individual as a spiritual being, akin to the Divine, invests him with a greater dignity and worth than that of the individual simply regarded as a moral person. And, while the religious consideration thus raises the estimate of the value of the individual, it also intensifies the hatred of everything that would lower the estimate; and so it goes beyond the mere ethical concept of 'vice' or 'evil' as the thing to be hated, and substitutes for it that of 'sin' or 'guilt,' thus bringing out man's essential relationship to God as the supreme fact. In this way the consequences of transgression are presented on their most serious and impressive side. Evil-doing is to be hated, strenuously opposed, and, if possible, exterminated, because it blurs the Divine image in man, and because it severs man from God, the rational creature from his Creator, the son from his heavenly Father. The full meaning of this is to be seen only in the light of the work and death of Christ—which is at once the revelation of the Father's love and the manifestation of the 'exceeding sinfulness of sin.' This is the Scripture view of hatred; and it goes even farther, and clinches

the injunction about brotherly love by excluding the hater from communion with the Divine altogether; for, 'If a man say, I love God, and hateth his brother, he is a liar: for he that loveth not his brother whom he hath seen, cannot love God whom he hath not seen' (1 Jn 4th).

3. *Diverse views.*—On all sides, then—psychological, ethical, and religious—hatred of persons is seen to be irrational. But there are somewhat different views among philosophers as to whether it should be recognized to any extent and, if so, how far. Some have refused to give it any legitimate foothold at all. Spinoza, for instance, roundly declares: 'Hatred can never be good' (*Ethica*, iv. 45); and he goes farther and maintains that 'everything which we desire because we are affected by hatred is base and unjust in the State.' This is how it appears in the light of pure reason. Others, like Butler, have allowed sudden and instinctive resentment of an injury to be natural and, therefore, not reprehensible, but have refused to accord the same privilege to deliberate or calculated resentment. In this Butler is followed by the Scottish School of philosophy generally. Others, again, have maintained that what we find in actual fact to be a source of pleasure to men must be taken account of and allowed its place in estimating human happiness, according to the utilitarian standard. Bentham led the way here. While condemning vindictive punishment, on the principle that the pain outweighs the pleasure, and urging that the legislator should not punish from revenge (on the same principle), he yet urged the necessity of allowing something, in the apportioning of punishment to a criminal, to the personal pleasure or gratification that such punishment gives to the individual injured. This is vindictive satisfaction, or the pleasure of vengeance, of which he says:

'This pleasure is a gain: it recalls the riddle of Samson; it is the sweet which comes out of the strong; it is the honey gathered from the carcase of the lion. Produced without expense, net result of an operation necessary on other accounts, it is an enjoyment to be cultivated as well as any other; for the pleasure of vengeance, considered abstractedly, is, like every other pleasure, only good in itself. It is innocent so long as it is confined within the limits of the laws; it becomes criminal at the moment it breaks them' (*Principle of Penal Law*, pt. I. ch. xvi.).

In like manner, A. Bain strongly maintained the existence of malevolent affections as native to human nature, and the need of reckoning with them in ethics. His doctrine was best brought out in his famous controversy with F. H. Bradley in *Mind* (reproduced in his *Dissertations on Leading Philosophical Topics*)—a sufficient account of which has already been given in art. ANGER. In that article also will be seen the bearings of evolution on malevolence.

There is still a position to be noted, midway between the extremes. As its representative may be taken Thomas Brown.

'We are formed to be malevolent in certain circumstances,' he says (*Philosophy of the Human Mind*, Lect. ix.), 'as in other circumstances we are formed to be benevolent; but we are not formed to have equal enjoyment in both. . . . The moral affections which lead to the infliction of evil are occasionally as necessary as the benevolent affections. If vice exist, it must be loathed by us, or we may learn to imitate it. If an individual has injured another individual, there must be indignation to feel the wrong which has been done, and a zeal to avenge it. The malevolent affections, then, are evidently a part of virtue as long as vice exists; but they are necessary only for the occasional purposes of nature, not for her general and permanent interest in our welfare. . . . We are made capable of a malevolence that may be said to be virtuous when it operates for the terror of injustice, that otherwise would walk, not in darkness, through the world, but in open light, perpetrating its iniquities without shame or remorse, and perpetrating them with impunity. But, that even this virtuous malevolence may not outlast the necessity for it, it is made painful for us to be malevolent even in this best sense.'

What must determine as between these different views are clearly (1) consideration of what actually

obtains in our experience of human nature; (2) how this stands related to the ideal, which must test its value; and (3) determination of consequences, based on the fact of the solidarity of mankind.

LITERATURE.—All the books specified under 'Literature' in the art. ANGEA. In addition: Descartes, *The Passions of the Soul* (tr. E. S. Haldane and G. R. T. Ross, vol. 1, pt. 2, Cambridge, 1911); Spinoza, *Ethica*, esp. pt. iii., which is really a striking treatise on the Emotions (tr. W. H. White and A. H. Stirling, 3rd ed., London, 1899); Jeremy Bentham, *Works*, ed. J. Bowring, Edinburgh, 1859, i. 83, 382, and x. 69; James McCosh, *Psychology: the Motive Powers, Emotions, Conscience, Will*, London, 1887; James Martineau, *Types of Ethical Theory*, Oxford, 1885, ii. 160, etc.; Th. Ribot, *The Psychology of the Emotions*, London, 1897, p. 268, etc.; William L. Davidson, *Christian Ethics*, London and Edinburgh, 1907, pp. 53, 79-85; W. McDougall, *Introduct. to Social Psychology*, London, 1908, p. 164.

WILLIAM L. DAVIDSON.

HAWAII.—The Hawaiian group of islands lies in the Pacific Ocean between lat. 18° 54' and 22° 15' N., and long. 154° 50' and 160° 30' W., and is of purely volcanic origin. On the Island of Hawaii the twin volcanoes Mauna Loa and Kilauae are in constant activity, while the extinct crater of Haleakala, on the Island of Maui, is one of the largest in the world. The natives are of pure Polynesian type, and constitute the extreme north-western outpost of this family, the Islands having been colonized in three great migrations from the Samoan group. The language has undergone little change, a native of Hawaii being able to converse with a Tahitian, New Zealander, or Samoan with little difficulty.

On this, A. H. Keane writes as follows (*Man, Past and Present*, Cambridge, 1899, p. 563 f.; cf. also Waitz-Gerland, *Anthropol. der Naturvölker*, v. 202 ff.): 'Migrating at an unknown date eastwards from Malaysia [for further details, see art. ETHNOLOGY, vol. v. p. 531], the Indonesians appear to have first formed permanent settlements in Samoa, and more particularly in the island of Savaii, originally *Savaiki*, which name, under divers forms and still more divers meanings, accompanied all their subsequent migrations over the Pacific waters. Thus we have, in Tahiti, *Navaii*, the "universe," and the old capital of Raiatea, in Barotonga, *Avaii*, "the land under the wind"; in New Zealand, *Hawaiki*, "the land whence came the Maori"; in the Marquesas, *Havaiiki*, "the lower regions of the dead," as in *to fenua Havaiiki*, "return to the land of thy forefathers," the words with which the victims in human sacrifices were speeded to the other world; lastly, in *Hawaii*, the name of the chief island of the Sandwich group.'

In conformity with this, the native belief obtains that the soul of a Hawaiian leaves the Island of Kauai from the promontory looking towards Samoa, and in Samoa a similar story turns the soul towards New Zealand. In Hawaii, oral tradition itself clearly gives the details of the first landing of the Samoans on the shores of Kauai; and, while no accurate dates can possibly be given, this migration is supposed to have taken place as early as the 2nd cent. A.D. A Samoan chieftain, having been defeated in battle, refused to submit to his victorious rival, and, embarking his followers in his remaining war-canoes, set his matting sails for the unknown ocean. The Polynesian knowledge of astronomy is remarkable, and it enabled them to steer a straight course; but it has been surmised that a chain of islands existed which have since been submerged by volcanic disturbances, and that the fugitives were thus able to obtain fresh water and supplies; otherwise, the journey seems well-nigh a miracle.

The Hawaiians counted time by the generations of their principal chieftains, beginning with Wakea, who was the semi-mythical progenitor of all the royal families (cf., further, CALENDAR [Polynesian]). Events were counted thus: 'So it was in the time of . . . , giving the name of the *alii nui*, or high chief. The length of a generation was roughly approximated at thirty years. Fifteen generations from Wakea is the time of Nuaulu, and fifteen generations more brings the chief Maweke (A.D. 1030).

The native Hawaiian is tall, well formed, very

strong, and possessed of great endurance. He is an expert cliff-climber, swimmer, and sailor. His national sports are sledging and surf-riding, while the dance is considered the necessary accomplishment of both sexes. In colour he is a dark reddish-brown. The nose is clear-cut and wide of nostril, the lips large, but well chiselled, the hair straight, abundant, and black, and there is a marked tendency toward brachycephaly. Tattooing was general, and survives at present in ring-marks on the finger. All inheritance came through the female line, ancestry being traced through the mother only.

In the families of very high chiefs (*alii nui*), the practice of incestuous marriage was common, and was regarded as sacred, the offspring of brother and sister being treated with more than royal honours. The sun was never allowed to shine upon them; and, if the shadow of a low-born vassal fell across their threshold, the offence was punishable by death. The tabu stick—a staff surmounted by a ball wrapped in white tapa cloth—was placed by the hut, and warned the passer-by that the ground was the possession of kings or priests, and must not be profaned upon pain of death. The tabu was strictly enforced by the chiefs, and is one of the most widely-known institutions of the Islands. The royal colour was yellow; the next in rank was red. The king's badge of office was a feather cloak, made from yellow feathers found under the wings of the *oo*, and woven with infinite skill and care into a web of coco-nut fibre. The *lei*, or wreath, was also of the precious yellow feathers. The red feathers of the *iwiti* made wreaths and decorations for the nobility of the second order, though kings by no means disdained them. A few scarlet feather helmets are still preserved, which have almost the shape of the Greek helmet, but are larger and without the nose-guard. The *kahili*, or royal staff, was of wood, or wood and bone, topped by a tuft of bright-coloured feathers. It was carried as a standard, or like the mace of European royalty. At a royal funeral, the *kahili* bearers never left the corpse until it was finally given in charge of the friend designated to give the final rites and concealment.

The greatest importance was attached to aristocratic birth, Kauai, the island where the first migration landed, claiming the greatest purity of blood. Upon coming of age, the children of a chief, boys and girls alike, were required to appear before the elders assembled in solemn conclave, there to recite their genealogy and the deeds of their ancestors. In this oral fashion, the history of each great family and the history of the race were preserved with surprising accuracy and wealth of detail. The neophyte's recitation often took two whole days to repeat; and, if he failed to be letter-perfect, he was remanded, to appear the following year before the historians to the tribe. Such a disgrace seldom occurred, for the child began his lesson in earliest infancy, and pride of race induced ardent study. At the close of the ceremony a feast was held; and the youth, now supposed to have reached maturity, received gifts, was permitted to enter the councils of the elders and to give advice, and was released from many of the irksome services devolving upon children. At this time the novice selected his own *hamakua*, or household god, or was permitted to wear sacred relics.

The natives were never cannibals, as has been erroneously believed. Tradition tells of the coming of a tribe of exiles, probably negritos, in war-canoes, who took possession of a promontory in Ohau; when the inhabitants discovered their custom of eating human flesh, they fell upon the little colony and exterminated it.

There being no metals in the Islands, wood was

used for weapons—clubs, spears, shields, etc.—and for such simple implements as were used in cultivating the 'taro' (a lily root), their chief food staple.

Tradition tells of the wrecking of a junk upon one of the islands, probably in the 18th cent., and the rescue of a man and woman, evidently Japanese. The one possession the captain saved from the ship was a sword, which won him great renown in the metalless land. The mere touching of the blade was supposed to ensure victory, and the sword became the hereditary treasure of the tribe into which the castaway was adopted. It was traceable in legend for several generations, when it disappeared, having been buried with the chief who possessed it at the time.

When, upon Captain Cook's first voyage, the natives learned the possibilities and powers of metal, it became the one object of desire; and it was owing to the theft of nails from the long-boat, upon Cook's return journey, that a sailor killed a native, bringing about the fight in which the explorer lost his life.

The moral code of the community was remarkable, owing to the importance of the woman. Marriage was dissolvable by mutual consent. In the families of chiefs, if the wife insisted upon a separation, the husband was bound to return her in all honour to her nearest of kin, together with the marriage portion she had brought, or its equivalent. Except for its aristocratic value, marriage apparently had no sacred aspect; but a wedding was, of course, an excuse for prolonged revels. The *kava*, the only fermented drink of the primitive people, was but slightly intoxicating; but of this they drank large quantities, further excitement being supplied by *hulas* and the music of wooden drums and gourd rattles. Funerals were always attended by feasts and prolonged ceremonies. The natives differ as to the promiscuity attending these feasts—some admitting that the utmost licence formerly existed, others denying the tradition. It is, therefore, probable that the customs varied in the different tribes. The body of a chief must on no account fall into the hands of his enemies, the possession even of a bone or a lock of hair ensuring power over the soul; hence extraordinary precautions were taken. The flesh was cut from the skeleton and destroyed. The remains were then wrapped in matting, a few of the choicest treasures of the deceased were added, and the whole, packed in a wooden calabash, or hidden in a canoe bow, was carefully concealed by the closest surviving friend. Tradition tells of one devoted follower entrusted with his chief's body, who ground the bones to powder, which he mixed with the *poi* served at the funeral feast to the assembled warriors, thus ensuring his master's future safety. To make fish-hooks of the bones of a rival chieftain was the greatest insult one tribe could offer another; hence, between enemies every effort was made to learn the whereabouts of a grave, and put its contents to base use. Among the people it was, and still is, the custom to place the dead man, wrapped in tapa and matting, in the bow of his canoe, which is cut in half, and carried to one of the numerous cliff-caves. At present the custom is falling into disuse, owing to the desecration of graves by foreigners, who seem unable to feel respect for the dead, unless they are interred after their own fashion.

With the exception of the *heiau*, lava-built temples, the Hawaiians erected no permanent structures. Their houses were of palm or grass bound to poles, with finely woven matting for floors and curtains, the Island of Ni'ihau being famous for its weavers. The door must face no other opening, the belief being that, if such be the case, 'what goes in must immediately depart,' meaning that no rest or permanent residence is possible in a dwelling thus constructed. A raised platform, covered by a mat, served as the bed.

Very little privacy was maintained. The house was preferably built over or near a beneficent *hamakua*, or household divinity, which might be personified by a stone, a tree, a bush, or any natural object. Any one might thus be under the protection of a spirit. Chiefs owned their own *hamakua*, sometimes curiously painted logs, in which some resemblance to an animal or man could be traced; though sometimes these *hamakua* were bits of stone or wooden tokens. These the chief took with him always, and they were part of his family insignia.

The favour of the sea being most necessary to the community, it was invoked through Ukupanipo, the shark-god, who, with his followers, could drive the fish to or from the shores, giving or withholding the daily food of the native. The red fish were the perquisite of royalty; but, if they ran within the reefs in great numbers, it was considered an omen of death in the family of the chief. The last recorded run preceded the death of Kalakaua, which occurred in San Francisco, 20th Jan. 1891, and which had been predicted by the natives upon the appearance of the fish several weeks before the event. Ukupanipo is credited with occasionally adopting a human child, to whom he gives the favour of the sea, and who has the ability to change into a shark at will. These sea-children possess the ravenous mien and dangerous temper of the god. The mark which Ukupanipo places upon them is a mouth-like orifice below the shoulder-blades, garnished with teeth. The phenomenon is said to have appeared recently. Algaloa, the sky-god, received little attention except among the cloud-diviners.

In ancient times the sick and aged were made away with. This fact has often been denied; but statements continually occurring in the native folk-lore make it more than probable, though the Hawaiian is kindly, gentle, hospitable, and given to generosity and self-sacrifice. Great importance is attached to friendship. A chief gave his closest friend the privilege of wearing his *malo*, or matting loin-cloth, woven as beautifully as linen. Gifts of hair were highly considered, and were plaited fine and worn with the whale-tooth charm, shaped like an inverted question-mark, called *puloa*. There is implicit belief that articles closely associated with a person retain something of the spirit of their owner.

The soul after death was supposed to journey to Kauai, and to leap from a cliff into the sea, descending until it fell into the under world, whose sky is the bottom of the ocean, there to lead an aimless and shadowy existence under the supervision of Milu—god of the under world. But spirits, particularly those of chiefs and *kahunas*, or witch doctors, continued to haunt the earth, and the Hawaiians lived in terror of these visitations. Victims slain in human sacrifice reappeared and haunted the site of any temple fallen into ruins. These apparitions were always heralded by the rolling of *pahus*, or temple drums. The ghosts set upon and immolated any man who chanced to cross their path. Evil spirits play a far greater part in the religion of the people than beneficent influences, good fortune and happiness being the direct gift of some particular local or household deity. The chief gods (*akua*) actually take a secondary rank to the *hamakua*, or household gods, with the exception of *Pele*, the goddess of volcanoes, who completely overmasters all others with her fiery presence.

The legends concerning her are very numerous. She shows herself now as a girl, beautiful and young, who, suddenly appearing at a feast, dances so divinely that her identity is guessed; now as a hag, demanding impossible services of the wayfarer. The most famous story is of her defeat in sledging, when, furious at being beaten in her favourite sport, she turned

Puuanui, the literally pig-headed demi-god with whom she was contending, into a lava pillar, together with all the onlookers. Strangely shaped lava-heaps in the district of Puna are pointed out by the natives as the ill-fated members of that coasting party. The sport resembles *skating*, the skate boards being long, narrow, up-turned, and highly polished; the smooth incline of a steep hill is all the surface required.

Pélé always resented the penetration of any of her numerous disguises, and dealt out volcanic vengeance with savage impartiality. Fine spun lava, shredded from the molten throat of Kilauea, is known as Pélé's hair, and three small, extinct craters, leading from the ocean to the lake of fire, are known as Pélé's footsteps. When she rose, like Aphrodite, from the sea, she sought a permanent resting-place, but her first three steps sank deep into the earth, and the sea entered, forming a pool. At last, when the fourth foot-step formed Kilauea, fire sprang about her feet, and the goddess had found her home.

Pélé was supposed to be partial to the house of Kamehameha I. (born A.D. 1738), the first chieftain to bring all the Islands under one rule. When, in 1881, the town of Hilo was threatened by a vast lava-flow from Mauna Loa, the Princess Ruth, great-granddaughter of Kamehameha the Great, made a pilgrimage to the devastated district, cast gifts into the fiery river, and implored Pélé, in the name of the ancient friendship of her race, to withhold her vengeance; within an hour the lava ceased to flow, the city was saved, and multitudes of natives who had embraced Christianity returned to the ancient beliefs.

The temples, or *heiaus*, were seldom dedicated to any one particular deity (they were temples where any one of the gods might publicly be invoked), two groves, sacred to the Poison-goddess, and a *heiau* to Ukupanipo, being the exceptions. The *heiau* was an enclosure, usually oblong, formed by walls of lava rock. At the side, facing the entrance, was the altar. The house of the priests occupied one corner. Between the two, but situated in the centre of the square, was the *anu*, or place of oracles, from which the prophecies were issued. Only the *alii*, or high-born, might converse thus directly with the gods after suitable gifts had been made to the temple. The people had to fall back upon the intermediation of the *kahuna*, who exercised a power only second to the chief. They claimed the power, known as *anana*, of praying to death any one who offended them. They could blight crops, cause storms, bring down pestilence, and interpret the will of the gods. They could cure all forms of sickness, hold communication with the dead, invoke the favour of the sea, and interpret the omens. The earliest traditions show that these omens were taken chiefly from the clouds, the flight of birds, and the actions of fish. In later times, after the introduction of foreign animals, a black pig became indispensable to the diviner, both the condition of the vital organs when killed and his instinctive selection of some symbolic food being indications from which the future was predicted. Much also was to be learned of impending events by dissecting a fowl.

Bits of coloured cloth, or *tapa*, were supposed to concentrate influences. A *kahuna* employed to torment an enemy first sought to gain entrance to his hut, and there to hide some malefic charm. The next move was to obtain some portion of the victim—a nail-paring, a lock of hair, spittle, or anything intimately connected with his physical being. In praying to death, the *kahuna* retired to some isolated place, and there remained in continuous prayer and incantation, until the victim languished and died. In this case the doomed person suffered no pain. If it was desired to inflict agony, a piece of cloth, containing earth from the doorstep and various charms, was beaten, stabbed, burned, etc. *Kahunas* effected their cures by reversing the method, though occasionally they administered some nostrums. Their influence continues to be strong among the natives,

though every effort has been made to stamp out the *kahuna* and his practices.

The Poison-goddess inhabited the two groves set aside for her; and her images, carved from the sacred trees, are supposed to have cost the life of their sculptors. Naturally all sacred groves and temples were protected by tabu.

The first attempt to collect and translate the more popular legends was made by King Kalakaua himself (*Legends and Myths of Hawaii*, New York, 1888), with the aid of one of the American missionaries. It has been claimed that in order to poetize the stories, he departed from the traditional texts; but they are sufficiently close to the originals, in spite of their strange resemblance to the Greek hero-stories, to be seriously considered. The epic of the Hawaiian Helen is undoubtedly authentic, notwithstanding its analogy to the Trojan myth, carried out even to the taking of the city on the cliff by the rescuing party, according to the oracle that told them to besiege with moving walls. This was accomplished by the advance of the besiegers bearing wooden shields that touched each other, enabling them to approach under protection, and cleated within to enable their bearers to scale the ramparts by their aid.

The first Europeans to visit the Islands were shipwrecked Spaniards in 1527. In 1555 the group was officially discovered by Juan de Gaytan, on a voyage from the Moluccas to New Spain, and received the name of Los Majos. In 1736, Kamehameha the Great was born on the Island of Hawaii. During this period continual intestinal wars distressed the people of the various Islands, until Kamehameha brought them under one government.

In 1778, Captain James Cook, commander of H.B.M. ships *Resolution* and *Discovery*, landed at Waimea, Kauni, whence he proceeded to Niihau, departing thence for the north. Upon his return in November, Cook sighted Maui, and, off Kona, entertained the chief on board the *Discovery*. On 11th Feb. 1779, Captain Cook was killed by the natives, in reprisal, the Hawaiian tradition tells, for an attempt to take an idol from a neighbouring *heiau*. On 26th May 1786 the English ships *King George* and *Queen Charlotte* touched Kona, and, in May of the same year, a French exploring expedition, under La Perouse, reached Maui. In 1787, Kaiana-a-Ahuniha accompanied an English captain on the ship *Nootka* to China. The relations with foreigners remained friendly until the wilful massacre of the natives at Olowalu, Maui, by the American, Captain Metcalf, of the *Eleanore*, resulted in a reprisal by the chieftain, Kamuiamoku, in the capture of the tender of the *Eleanore* and the killing of all the crew, except an Englishman, Isaac Davis, and John Young, boatswain of the *Eleanore*. Davis became councillor, and received great consideration. In 1791, Kamehameha was proclaimed king of all the Islands. In 1792, Captain Vancouver, with the *Discovery* and the *Chatham*, cast anchor at Kealakekua Bay, on his way north. On his return he presented the first live stock ever landed in Hawaii. He was well received by the natives upon his third visit in 1794; but in Jan. 1795, Captain Brown, of the *Jackal*, and Captain Gardner, of the *Prince Leboo*, with some of their men, were killed in Honolulu harbour.

Several revolts against the power of Kamehameha were suppressed. In 1815 the Russians arrived, entrenching themselves in the forts at Hanalei and Waimea, and in 1816 they erected a stronghold at Honolulu. The *Rurick*, commanded by Captain Kotzebue, the first battleship to enter that harbour, brought reinforcements to them

there. In the same year the national flag, designed by an Englishman, was adopted. In May 1819, Kamehameha I. died and was succeeded by his son Kamehameha II., who broke away from traditions, and, in Oct. of that year, openly proclaimed the abolition of the tabu. This departure, angering many of the lesser chiefs, resulted in a revolt, which, though at first successful, was suppressed by Liholiho. Several chieftains having received baptism, a reaction set in against the old religion, and, in 1820, a general destruction of idols and temples took place at the instigation of the American missionaries, who arrived on the brig *Shaddens*, in company with four Hawaiians, who had been sent to Cornwall Institute—Honolu, Hopu, Kanui, and George Humehume, son of the Kaulaian chieftain.

Though the Hawaiians are now avowedly Christianized, the old beliefs persist. It is difficult, however, to obtain access to any of the secret ceremonies, though traces of the *kahuna* are to be found in every walk of life. Their gods they take lightly, but the priests are a serious matter. Evil ghosts take the place of devils, and are under the control of the witch-doctor, who may direct their destructive influence upon whom he will. Health, happiness, and even life itself can be given or taken at the will of the *kahuna*.

LITERATURE.—Many of the older explorers and missionaries in Polynesia refer to Hawaii, notably J. Cook *Voyages*, London, 1773-84, and W. Ellis, *Polynesian Researches*, do. 1853; the most important of this material is collected in T. Waitz and G. Gerland, *Anthropol. der Naturvölker*, Leipzig, 1880-77, v., vi. See, further, J. J. Jarves, *Hist. of the Hawaiian Islands*, London, 1843; S. S. Hill, *Travels in the Sandwich and Society Islands*, do. 1856; J. Remy, *Ka Moolelo Hawaii: Histoire de l'archipel hawaïen*, Paris, 1882 (text and tr. of a native history); M. A. Donne, *Sandwich Islands and People*, London, 1870; A. HAZM.—See IBN HAZM.

HEAD.—1. Importance of the head.—Innumerable rites performed on or in connexion with the head show the importance which is universally attached to it. As the uppermost member of the body, that which contains the organs of sight, hearing, taste, and smell, it is naturally much honoured; while, as containing such a vital organ as the brain, which, however, is connected with the process of thought mainly at comparatively late stages of civilization, it is regarded as a seat of life or of the soul. The head, with its many apertures—nose, mouth, ears, sutures of skull—is a chief spirit-entry, either for a divine spirit or a god (as in the process of inspiration)¹ or for evil spirits. In either case it must be carefully guarded. Hence among many savages and also in the higher culture the head is regarded as peculiarly sacred, and is the subject of many tabus. When a Maori touched his head, he at once put his fingers to his nose and sniffed up the sanctity adhering to them from the touch.² In Tahiti, Burma, Melanesia, etc., this sacredness of the head makes it tabu to

the touch of woman, or it must never be below any place where a woman is.³ Hence also the head must be covered, veiled, or protected,⁴ lest evil should fall on it (see § 7 (d)). For the same reason heads are treasured relics, or sometimes, in the case of an enemy, are treated with contempt (see § 5 (a); and cf. Egyptian representations of enemies' heads as a footstool).⁵ In many cases the head is thought to be a seat of the soul or life, or, where a plurality of souls is believed in, of one of the souls, as, e.g., in Indonesia, where the soul material of man resides partly in the head, and, when it has left the body, it may be restored to it by a sorcerer through an invisible aperture in the skull.⁶

This belief is also found among the Caribs, Nukkas, Malays, Bataks, people of Celebes, Papuans, the Ga of W. Africa, the Maoris, etc.⁷ The soul can therefore be drawn out of the head, e.g. through the sutures of the skull, or it departs thence at death; hence the cracking of the skull at cremation in India (see *ERE* iv. 480*). So, too, the soul returns after absence through the head, or is introduced into it by the medicine-man.

More usually, such a particular part of the head as the eye is the seat of the soul, because of the tiny reflexion seen in it by any one looking at it.⁸ The presence of the soul in the head is illustrated by the statement in *Satapatha Brāhmaṇa*, vi. i. 1, 2-6, that the life-sap or excellence (*śrī*) of the seven males (*purusa*) out of whom Prajapati was created became his head, *śiras*.⁹ In modern Hindu beliefs different gods reside in different parts of the body, and the top of the head is the seat of the Supreme Being.¹⁰ The Persians dedicated the head to Haoma, that at death he might receive the immortal part.¹¹ Similar ideas are seen among the Hebrews. Achish says to David, 'I will make thee keeper of mine head for ever' (1 S 28²); cf. Ps 140⁷ 'Thou hast covered my head in the day of battle,' and the custom of swearing by the head (Mt 5³⁶). Such beliefs as these explain the value placed upon the head, whether of friend or enemy. The head, as a very important part of the body, may also come to represent it, as, e.g., where heads of gods or mortals appear on monuments; or, as in Christian baptism, the earlier rite of more or less complete immersion was later limited to affusion on the head. The importance of the head has also given rise to metaphors signifying supremacy, beginning, and the like.

Before discussing wider groups of customs connected with the head, some references to sporadic ceremonies performed on it and showing its importance may be cited. In many healing rites the head of the patient is touched with various objects, generally of a sacred kind,¹² or charms and the like are bound upon the head,¹³ or the hand of the healer is laid on it.¹⁴ Among the Peruvians, at the ceremony for the expulsion of evils, a paste mixed with blood from the forehead of a child was rubbed on the head of each member of the family.¹⁵ Sneering the head with earth and water is a firstfruit rite among the Hosi;¹⁶ and among the Nandi new grain is rubbed on the forehead.¹⁷ The ashes of a dead person mixed with gum are smeared

on the head to absorb his virtues, by the Digger Indians;¹ and rubbing the head with the brains of a dead man who was wise gives success in business, according to the Matabele.² Smearing the head with the blood of a sacrifice, probably to identify oneself with it, is found, e.g., in Palestine,³ among the Arabs of Muhammad's time,⁴ the Romans at the Lupercalia,⁵ and the Lendu.⁶ The same application of sacrificial blood is also used as a cure for disease in Palestine and among the Jews of Algiers.⁷ The so-called 'Eucharist' of Lamaism is poured out into the hands of the worshippers by the Lama, and each person anoints his head with it, after which the Lama places the 'Vase of Life' on the bowed head of each, repeating a spell. The head is then touched with other sacred objects.⁸ Where blood is shed on the grave as a mourning custom, it is sometimes drawn from cuts on the head (see *ERK* iv. 431*). Similarly, in Sumoa, if a man found a dead owl, or if he committed transgression, he beat his forehead till it bled; and at ritual combats where the heads were beaten with clubs, the blood was an offering to the deity.⁹

2. **Heads of deities, etc., with nimbus.**—Here, again, as illustrating the importance of the head as the chief member of a god as of a man, it is often represented with rays shooting out in all directions, or with a circular disk behind or surrounding it. These were undoubtedly suggested by the sun and its rays, and were intended to typify the Divine power shining and radiating from the head. Hindu divinities have often such a nimbus, of a more or less elaborately shaped form. In Greek and Roman art it is also given to divinities, especially those representing sun and moon, and Teutonic and Slavic deities have often rays or stars around their heads. Mithra has a circular nimbus with pointed rays. It was also given to emperors and kings, to Oriental heroes or saints, etc. Buddhist art in India and Tibet shows Gautama as well as the saints with a nimbus.¹⁰ But it is in Christian art that the nimbus is most wide-spread. It is of different forms, usually circular, but occasionally triangular, bi-triangular, or square, and in some cases a series of rays emanates from the head. The field of the nimbus is ornamental or plain; and it surrounds the heads of the three Persons of the Trinity, the Virgin, angels, saints, prophets, living persons, allegorical figures, etc. In the case of the Divine Persons, the nimbus is usually cruciform, this being properly distinctive of them.¹¹

3. **Many-headed gods, etc.**—The custom of representing gods with several heads, like that of representing them with several hands, is probably the result of the current conception of the importance of these members. It was natural that in a god they should be multiplied. Nowhere is this more common in art and myth than in India. Siva is said to have a thousand heads, or sometimes three, and is thus represented.¹² Brahmā has four heads. Among the Egyptians and Semites this is not found, but a male Phœnician deity is occasionally two-headed.¹³ In Greek and Roman art and myth it is again merely sporadic. Hecate is three-headed, possibly representing Artemis, Selene, and Hecate; Hermes at cross-roads (*q.v.*) had two, three, or four heads, like the Roman Janus. The Celtic god of the under world is sometimes represented as a triple head, and some Slavic deities have four or five heads.¹⁴

Tibetan Buddhist divinities are occasionally many-headed, like Padmapāni with eleven heads—probably a borrowing from Indian art.¹ Such monstrous forms do not occur among Teutonic deities, though they are sometimes given to heroes.² Monsters, giants, dwarfs, and dragons in myth and *Märchen* often possess many heads, which cause considerable trouble to the heroes who fight them. The Greek Geryon had three heads, Hydra nine, Briareus fifty, and the giants of Norse mythology have three, six, or even nine hundred heads.³ In *Märchen* the usual numbers are three and seven.

In Christian representations of the Trinity the Godhead is often depicted as a being with three blended heads, or three faces appearing on one head with four, three, or two eyes.⁴ Satan is also occasionally depicted with three faces—the trinity of evil—and with heads on chest, stomach, and knees.⁵

4. **Men and deities with animals' heads.**—In various acts of ritual men often wear the heads of animals, usually those of sacrificial victims. Among savages these are often worn at sacred dances, e.g. before hunting. Thus, at the Mandan buffalo dance, each dancer wears the skin of a buffalo's head with the horns attached, and imitates the movements of the animal, in order to procure good hunting.⁶ Similar customs were followed among the Celts and Teutons. At the New Year festival, riotous processions of men dressed in the heads and skins of animals took place, and these continued in Christian times, though forbidden by the Church.⁷ Figures of horse-headed men appear on old Gaulish coins, and these, as well as numerous Irish legends of cat-, dog-, or goat-headed men, doubtless reflect actual custom.⁸ In modern European folk-festivals, dances are sometimes performed by men wearing antlers or skulls of deer, etc., and these may be traced to older rites resembling those of the Mandars.⁹ In all such customs there had originally been some idea of assimilating the wearer of the head to the animal, and in some instances this was connected with totemism. The same purpose was served where a mask representing an animal's head was worn, as among many savage tribes.

Where earlier worshipful animals tended to become anthropomorphic, or where a divinity was blended with a worshipful animal, there was often a fusion of the two in myth or artistic representation. The god had some part of him in animal form, and very often possessed an animal's head. Probably in all religions this has existed to a greater or less extent. Some, however, were able to shake themselves entirely free of such monstrous forms, though they may still be found associated with demoniac beings; in others they continued to play an important part, as, e.g., in the Egyptian religion.

In India, Gaiyēśa has an elephant's head, and in China a god called the 'Divine Husbandman' has a human body with a bull's head. In Greece, where such compound forms generally came to be disliked, traces of them were still to be found. The Phigælian Demeter had a horse's head, and in Arcadia excavations have revealed representations of female figures with heads of sheep or cows.¹⁰ Figures of Pan with a goat's head, of Apollo(?) with a ram's head, and others are also known. But it is in Egypt that this method of representing the gods was most conserved from pre-historic times onwards. Some of them invariably have animals' heads, others only occasionally (see *EGYPTIAN RELIGION*, vol. v. p. 245b).¹¹

In some instances a divinity is represented wearing an animal head-dress, and sometimes also the skin of the animal—a custom perhaps connected with the practice of placing the head and skin of a sacrificial victim on the image of a god,

as well as with the assimilation of a god and a worshipful animal.

Conversely, human-headed divinities or genii with animal bodies occur sporadically—e.g., in Babylon the fish-god Oannes (Ea), winged bulls with human heads, etc.; in Egypt the Sphinx; while there also the soul was represented as a hawk with a human head.

5. The head as trophy or cult-object.—(a) *Trophy*.—As the head is the most prominent part of the body, the seat of several of the senses and, in the belief of some peoples, of the soul, life, wisdom, etc., and as it is severed from the trunk with comparative ease, it has almost universally been taken as a trophy in war. The victor thus triumphs over his enemy; at the same time he is able to bring back a proof of his prowess, and, as a result, the greater number of heads he can show, the more is he honoured as a valiant man, and the higher respect and status does he obtain. The practice is thus analogous to the cutting off of an enemy's hands (see HAND, §5(c)).

The Babylonians and Assyrians not only left dead enemies unburied, but, as a further method of insult and hurt to their ghosts, cut off their heads; and this practice is frequently referred to in the inscriptions or is portrayed on monuments; e.g., vultures fly off with heads of the slain. The god Ningirsu is shown clubbing such heads collected in a net.¹ In Egypt a similar custom prevailed, and kings are represented holding a bunch of heads, or headless corpses are shown lying before a god. So also in the other world one of the punishments of the enemies of Itā and Oeiris was beheading by Shesmu.² Among the Hebrews the practice was also followed. The heads of Oreb and Zeeb were brought to Gideon (Jg 7:25); David cut off Goliath's head and brought it before Saul; the Philistines cut off Saul's head, and the sons of Himmun that of Ish-bosheth, bringing it to David (1 S 17:94-97, 31:8, 2 S 4:7; cf. 20:21). The heads of Abiah's 70 sons were struck off and piled in two heaps (2 K 10:9). In later times the head of Nicanor was brought by Judas Maccabaeus to Jerusalem as a trophy (2 Mac 15:30). The Scythians presented their king with heads of slain enemies, those having none to show receiving none of the booty. The scalp was hung on the bridle.³ Among the Karmianians no one might marry until he had brought a head to the king, which was hung up in his house.⁴ Among the Celts, heads were cut off and carried at the saddle-bow or on spears, or strung on a withy and brought home. After a battle a pile of heads was made, and the number of the slain counted.⁵ Among American Indians, heads were sometimes placed on poles and carried as trophies through the village, or, as among the Abipones, were tied to the saddle.⁶ The taking of the scalp, which was brought home in triumph, the number of scalps possessed being proof of a warrior's prowess, was universal among the tribes. Among the Polynesians, heads of enemies were also struck off and used as trophies. The heads were piled before the chiefs, those of slain chiefs being placed on the top.⁷ The Tahiti preserved the heads of hostile chiefs slain in battle.⁸ Head-hunting among the Dayaks and in Formosa has also for one of its purposes the taking of heads as trophies, to show bravery and manliness and to please the women of the tribe.⁹ Among modern Oriental nations—Persians, Turks—slain enemies were often decapitated and sent to the king to make a show.¹⁰ Timur erected a pyramid of 90,000 heads on the ruins of Baghdad.¹¹ This was a common Oriental custom. Salmanassar made pyramids of the heads of the slain,¹² and the practice has probably given rise to the Märchen incident of a tower built of men's skulls.¹³ The triumphant placing of aristocratic victims' heads on pikes was common during the French Revolution.

(b) Various parts of the head sometimes take its

place as trophies, e.g. the ears; thus after the battle of Liegnitz nine sacks were filled with the right ears of the slain.¹ Jaw-bones or even mouths were also used as trophies, and generally the more a man possessed the more valorous was he deemed, as among the Papuans of Boigu,² the Tahitians,³ the Tahis and Ashantis,⁴ and the Chinese.⁵ The Tupis wore the mouth of the slain as a bracelet.⁶ Noses served the same purpose, and were worn with ears as necklets among the Arabs.⁷ Montenegrin soldiers presented noses to their chiefs as a sign of bravery as late as 1876;⁸ and of a Christian emperor, Constantine V., Gibbon relates (v. 220) that 'a plate of noses was accepted as a grateful offering.' Again, teeth were pulled out and triumphantly worn as necklets, bracelets, or anklets. This was common among many S. American tribes,⁹ the people of the New Hebrides, Ashantis, and other African tribes.¹⁰

In most of these cases the heads or parts of the head are sent to the chief or king or displayed before him as a sign of prowess, or as a symbol of victory. But they are occasionally dedicated to a divinity. This is suggested by the Bab. and Egypt. instances cited above, and it is also found among the Celts, who in cutting off a head saluted the gods and offered it to them or to ancestral spirits.¹¹ Skulls have also been found under an altar devoted to a Celtic Mars; and in Ireland heads were called 'the mast of Macha,' a war-goddess embodied in the scald-crow haunting the battlefield, just as in the Bab. stele birds fly off with heads.¹²

(c) *Preservation of trophies*.—These trophies serve a more permanent purpose than that of immediate tokens of victory, as some care is taken to preserve them, and they are usually placed on the walls of houses, on stakes, or on trees, or kept in some more or less sacred place. Thus they are a standing witness to the prowess of individual or tribe.

Herodotus (iv. 103) relates of the Tauri that they impaled the heads of shipwrecked persons and fixed those of enemies on a long pole above the roofs of their houses. Among the Celts, townships and palaces were filled with these ghastly trophies, over doors, on walls, or on stakes, to such an extent that Posidonius tells how he grew sick at the sight. A room in the palace was kept as a store for heads, and those of slain chiefs were preserved in cedar-wood oil or in coffers, and proudly shown as a record of conquest, large sums of money being refused for them.¹³ Up to a comparatively late time heads of private foes were placed on stakes in front of doorways,¹⁴ and Malcolm II. built into the walls of the church of St. Mortlach, at Keith, heads of Danes after their defeat. Among modern savages such customs are also found. In the Congo district heads are cleaned and placed on poles at the entrance to a town or on a hill.¹⁵ Among the Niam-Niam they are kept on posts round the houses.¹⁶ In Dahomey they were placed on roofs or gates of the king's palace, or paved the floor of his sleeping-place; and, when war was ordered, it was said that the king's house wanted thatch.¹⁷ The Maoris kept skulls in houses as trophies, or fixed them on poles; and in Tahiti walls were made up of human skulls.¹⁸ In the Solomon Islands there were set up two skulls of enemies on a post at the launching of a canoe, the canoe-houses being also decked with them, while the scalp and

hair were put on a coco-nut and hung in the common hall.¹ In N. Guinea among the Wagawaga the *potuma* was decorated with skulls taken by the men to whom it belonged. In Babaka they were hung on platforms outside the villages.² In S. America the same customs were followed, e.g. among the Mundrucus, who placed skulls on their rude huts, and among the Ahipones.³ Among the Nagas the chief's house is hung round with skulls;⁴ and, among the Bontoc of Luzon, heads obtained at the period of planting and sowing are exposed on trees in the villages, and kept as relics once the flesh has decayed.⁵ The Wa of Upper Burma take heads for the benefit of the crops, place them in the 'spirit house,' and, after they are bleached, set them on posts in an avenue of trees. Thousands of skulls may thus be seen.⁶ In Formosa, Celebes, and Sumatra, and in other classic regions of the head-hunter, heads are dried and hung up in the huts or on chiefs' houses, and often ornamented with carved designs. Among the Land Dayaks, special houses are built for them, which form the bachelors' quarters and council chambers.⁷

In some instances, heads or skulls are treasured in a sacred building; e.g., in Mexico the head of the captive sacrificed to Tezcatlipoca was cut off and preserved along with heads of earlier victims in the sacred place.⁸ Again, heads are offered to dead ancestors (see below). Many of the instances cited above are connected with cannibalism, the body or brains being devoured; and the taking of a head is always the occasion for feasting, the head itself being fed and propitiated.⁹

(d) *Purpose of the preservation.*—Among actual head-hunting tribes and with some other peoples also who preserve heads of enemies, the reasons alleged for the practice show that they are something more than mere trophies, and that they are preserved primarily for animistic reasons, and in order to obtain the helpful presence and power of the spirit-owner of the head, whose soul-substance was stronger in the head than in any other part of the body. The Dayaks feast at each head-taking, lavish terms of endearment upon the head, and thrust food into its mouth. Its spirit-owner is told that he is now adopted into the captor's tribe, and must hate his old friends. By this means the ghost, which might otherwise have been dangerous, is supposed to be rendered not only harmless, but helpful. By the spirit's power, acting through the head, rice will grow abundantly, the forests will teem with game which will be easily taken, women will be fruitful, and health and happiness will abound.¹⁰ This influence of the head, or, rather, of the spirit acting through the head, is also seen in the case of the Bontoc, who obtain a head for every farm at planting and sowing; the Wa of Burma, who hunt for heads to promote the welfare of the crop; and the Lhota Naga of N.E. India, who place head and feet in the fields for the same purpose.¹¹ Similarly, in New Caledonia, heads of old women are set up on poles as charms for a good crop,¹² and a like idea is seen in the Teutonic folk-belief that a skull buried in the stable makes the horses thrive.¹³ The spirit whose good wishes are invited is expected to become the guardian, friend, and benefactor of the tribe or family, and to be always with them.¹⁴ This is precisely the reason given by the Tauri for placing heads over their roofs.¹⁵ Other reasons are

alleged, but these also show the animistic basis of the custom.

The Dayaks believe that those whose heads are taken will be the slaves of their captors in the next world—an idea which is shared by the Lhoosai of India, who cut heads off after a battle.¹ Again, heads are taken by the Dayaks after a death, because it is supposed that a man of consequence cannot be buried or that a dead relative will not rest until this is done in his name; or by the Formosans, because the spirits of ancestors are pleased to see the huts adorned with heads.² The Kukis also take heads at the death of a chief, and in Celebes a chief's tomb is supplied with two heads of enemies or of slaves.³ This custom also obtained among the Celts, since skulls have been found buried with the dead.⁴ Sometimes in Borneo the spirit of the head is expected to persuade its former friends to come and be slain, and a prayer to this effect is addressed to it nightly,⁵ while in the Congo district the spirit of the head cut off in war is believed to haunt members of its family.⁶

(e) There can be no doubt that, whether in conjunction with preserving the skull or not, where the custom of eating the brain is found (e.g. among the Dayaks, in Luzon, in New Guinea, in New Ireland, in the Torres Straits Islands⁷), or of eating a mass of food in which a head has been cooked (as among the Batonga and the Garos⁸), this has also an animistic basis. It is usually expressly stated that it is done to acquire the courage or wisdom of the dead man. In some cases it is enough to eat some part of the head—the eye (Sandwich Islands, N. Zealand, Marquesas Islands) or the tongue (Torres Straits, ancient Karmanians)⁹—to acquire these qualities. The same purpose underlies the practice of using the skull of an enemy as an occasional or usual drinking-vessel. The liquid is the medium through which the powers of the owner of the skull or his spirit are transferred.

This was done by the Gauls,¹⁰ Irish (milk drunk from a skull restores to warriors their pristine strength),¹¹ Scythians,¹² the ancient Arabs,¹³ Fijians, peoples of the Congo,¹⁴ Uganda (priest drinks beer from skull of king to be possessed by his spirit),¹⁵ Mushkogeos (because good faculties of mind come from the brain),¹⁶ A similar custom occurs sporadically in folk-medicine and magic. In Germany other people's pigeons will come to your cot if you give your pigeons drink from a human skull.¹⁷ In the W. Highlands to drink from the skull of a suicide is a potent cure for certain ailments.¹⁸

(f) A distinction must be made between the practices already referred to, where an enemy's skull is concerned, and those connected with the heads of relatives or ancestors. Here also, however, the animistic basis is obvious, and it appears quite clearly from the Calabar custom of cutting off the head of a great chief at burial and keeping it secretly lest it and therefore the spirit of the chief should be stolen from the town,¹⁹ and from

the Polynesian idea that the spirit acts from the skull and is a guardian of the family.¹ Whatever the method of burial, the preservation of the head or skull of dead relatives out of affection, or in order to obtain communion with them, or to gain their good offices because of their pleasure at the respect shown to them, or for actual cult purposes, was probably an early custom, and is found in many parts of the world. It is met with mainly among the Melanesians and Polynesians, but it exists also in Africa and sporadically in America, chiefly in the southern part of the continent.

Bodies buried without heads were found at Cranbourne Chase, dating from Neolithic times, and these suggest separate preservation of the head. Elsewhere skulls have been found buried alone.² Herodotus reports that the Issedones made bare and cleansed the head, and, having gilded it, treated it as sacred and sacrificed to it (iv. 26). In Egypt the myth of Osiris told how, after the dismemberment of his body, his head was buried at Abydos or at Memphis. The sanctuary at Abydos was therefore holiest of all, and the symbol of the city was the coffer containing the head. This may point to some separate treatment of the head in early Egypt, especially if Egyptian civilization and religion were indigenous in Africa, where the head is often venerated. Before the rise of the custom of extracting the brain through the nose in mummification, the head was cut off for this purpose and filled with spices, and a formula was used to prevent the head of one man being confused with that of another.³ Among some African tribes a chief is buried with his head above ground. After the flesh has decayed, the skull is either buried or kept for magical purposes.⁴ Such skulls are usually preserved out of sight. Heads of distinguished men among the Mpongwe are hung up, and the decomposed matter is allowed to drip on a piece of chalk. The brain is the seat of wisdom, and this is absorbed by the chalk, which is then applied to the heads of the living that they may obtain wisdom.⁵ Among the Baganda a part of the head, the jaw-bone, especially of the kings, was carefully preserved because the ghost clung to it, and hence could be worshipped or its help obtained through the jaw-bone as long as that was honoured. Those of kings were preserved in the temples of the kings, and some jaw-bones were a thousand years old.⁶ Among the Taveta, E. Africa, the preservation of a skull preserves the spirit of the dead, and the accumulated skulls of a family or tribe thus guarantee future reunion.⁷

The custom of the widow carrying the husband's skull or jaw as a memento or amulet is found among some Australian tribes, Andaman Islanders, and in New Guinea.⁸ In New Caledonia the head was twisted off ten days after death, and the skull preserved, offerings of food being made to it during sickness.⁹ In various parts of Melanesia it is believed that the dead man's *mana* can be obtained, through his skull, for the benefit of the survivors. These skulls are carefully kept, and food-offerings are made to them.¹⁰ In the Solomon Islands the skull is preserved in a sanctuary, and is usually enclosed in a piece of wood fashioned in the form of a fish, or in a miniature hut. Here also the skull is full of *mana*, and through it the help of the spirit can be obtained, mainly by means of offerings.¹¹ In Tahiti the skull was preserved separately from the body, and was usually hung from the roof of the house.¹² In Nanumanga it was believed that the soul, when called on, came back to the place where the skull was kept to drive away disease, etc. Here the head was exhumed after burial. In Netherland

Island and in Onoatua the skulls of relatives were hung up in houses.¹

Among the Celts a custom of preserving and offering some cult to heads of ancestors and a belief in their powers may have existed. This is suggested by various tales, based on earlier myths which must have originated out of some actual practice.

Thus in the *Mabinogi* of Branwen, Bran, a Brythonic god, directs his friends to cut off his head after his death and bury it in the White Hill at London, facing France. This is done, and in the long delay on their journey thither the head affords them entertainment. Finally, the head—the *Urdras Ben*, or 'Noble Head'—is interred and protects the land from invasion until Arthur disinters it. This appears to reflect actual belief and custom. There are also tales of heads which, when cut off, went on speaking.² This recalls the myth of Orpheus, whose head sang; and its burial-place became a sacred precinct.³ In Scandinavian mythology the Vanir cut off Mimir's head; but Odin spoke spells over it so that it could not decay, and still uttered speech.⁴ Lane⁵ refers to popular Muhammadan beliefs of the heads of saints talking after decapitation. The possibility of the consciousness of the brain after beheading, and even of the head speaking, was much discussed during and after the French Revolution; and there are stories of Charlotte Corday's head speaking, and, at an earlier time, that of Sir Everard Digby.⁶

In the Christian Church, among the relics of saints or martyrs the head or skull has frequently been singled out for adoration or as possessing great miraculous power. Thus 'the head of St. Marnan, preserved at Aberchirder, was ceremonially washed every Sunday, and the water carried to the sick and diseased, who derived benefit and recovered health from its sanative properties.'⁷ Among Muhammadans a similar reverence is paid; e.g., the burial-place of the head of al-Husain in Cairo is much visited by worshippers.⁸

(g) Many of the instances cited above imply a *cult of the head*, or of the spirit of whom the head is the medium or habitation. Through the head or skull the living obtain *mana* or help of various kinds, and the head is a powerful protective. But the mere representation of a head would be thought to give similar if not equal results. This may be the reason why human heads are a frequent *motif* in savage art. Such sculptured heads were also common in Celtic art, and among the Celts, as has been seen, there was a cult of human heads. Further, as the skull or head of an ancestor was the means by which *rapport* with himself was gained wherever there was a cult of heads, so it may later have been thought enough to represent the head of a divinity as a means of gaining communion with him. This may explain the existence of images of Divine heads among the Celts, often represented in triple form (see CELTS, § XIII. 2).⁹ Celtic myth has also much to tell of the power of Divine or heroic heads. It is not impossible that the Roman representations of the head of Janus may be due to similar ideas.

(h) *The representation of a monstrous and hideous face and head*, probably connected with grotesque masks used by savage peoples, has everywhere been regarded as an effective amulet against demoniac powers or, more particularly, the evil eye (*q.v.*). In antiquity, hideous masks were sometimes worn for this purpose, and monstrous heads were much in vogue in Greece. To these is doubtless due the myth of the Gorgon's head cut off by Perseus, which still retained its evil powers after decapitation.¹⁰ Cf. art. GORGON.

(i) One source of the formation of images is to be traced in the custom, found in W. Africa, Indonesia, and Melanesia, of surmounting the rough wooden figure representing the body of an ancestor with his skull. The image is thus animated by his spirit. This custom has an analogy in the Melanesian method of representing ancestors by a human performer wearing a mask in which part of a skull is inserted. With these also may be compared the Sumatran magic staves, in the head of the uppermost figure of which is enclosed the brain of a boy. A similar custom is followed in the case of the war idol made at the opening of hostilities by the Bataks of Sumatra, with a boy's brain inserted in a hole within the navel. In this way the image obtains a soul.¹

(j) A pre-historic method of burial was that of cutting off the head and placing it between the knees of the corpse. To judge by later analogies, this was probably done to prevent the deceased or his ghost from returning, but possibly only in the case of dangerous persons or enemies. In Egypt a sculptured plaque of the 11th dynasty shows ten corpses of enemies decapitated with their heads between their legs. The custom existed in Albania in the 4th and 5th centuries of our era,² and was not uncommon in other parts of Europe in mediaeval times. It has also occurred sporadically in modern folk-custom. In West Prussia, to prevent a dead member of the family from inflicting disease on the living, his coffin was opened and his head cut off.³ In England, in the case of the doer of some atrocious deed, his head was severed from the body and placed between the legs or under the arm.⁴ For a similar Lithuanian practice to prevent annoyance from the deceased, see *ERE* iv. 433*. The practice probably had a very wide range, if we may connect with it the many stories of headless ghosts, found not only in Europe but in India.⁵

In Gloucester a headless ghost was believed to haunt a field, and here an actual interment with head beside thigh was found.⁶ Such ghosts appear with the head tucked under the arm; and it is a German superstition that the unquiet spirit or the ghost of a malefactor whose crime was not divulged before his death must wander in this way. The headless ghost is often on horseback.

(k) In human sacrifice, etc., the head is often ritually cut off and receives separate treatment. This appears in the myth of Lityerses, where a stranger was taken to a corn-field to reap, and then wrapped in a sheaf, his head cut off with a sickle and his body cast into the river—a myth illustrating actual custom.⁷ The Mexican custom of preserving the heads of victims sacrificed as representing Tezcatlipoca has already been referred to (§ 5 (c)), and a similar custom of cutting off the heads of dough images prevailed.⁸ In Ashanti, at the yam 'custom,' the head of a sacrificed slave was placed in the hole whence the new yams were taken.⁹ In Bab. ritual the sacrificer speaks of giving the head of the child for his own head.¹⁰ On Raratonga the reeking human head was offered to Tangaroa, and the body consumed by the worshippers.¹¹

In some *Märchen* the vitality of the head is shown by the fact that a human head reduced to ashes, and swallowed by a

woman, or an animal's head eaten by an animal, causes conception. In an Eskimo tale a girl is changed into a seal and cut in pieces by the hunter, but the head slips into the womb of his wife and the girl is re-born.¹² An occasional remedy for sterility is for a woman to tread on a human skull.¹³ Reference may also be made to the power which the decapitated heads of monsters have of growing on again. Birth from the head is sporadically found, e.g., in the Greek myth of Athene born from the head of Zeus, and in Hindu stories.¹⁴

In Polynesian myths the coco-nut tree is supposed to have originated from a human head or from that of an eel.¹⁵ In numerous *Märchen* the incident of a tree springing from a buried human head occurs. In a Samoan myth, pigs originate from human heads flung into a cave by a cannibal chief.¹⁶ Various creation myths tell how part of the universe was made from this or that part of the head of a vast being or giant;¹⁷ while in a Chaldean cosmogony preserved by Berossus the head of Bêlos is cut off, the blood is mixed with earth, and from this men and animals are made.¹⁸

6. Heads of animals.—These also have a distinctive place in custom and ritual, and frequently special attention is paid to the head of a sacrificial animal. Among the Veddas, when game is obtained, the head and a portion of the flesh of each deer taken is cooked as an offering to Kande Yaka, and afterwards eaten by the community.¹⁹ The Wanzamwezi of W. Africa place the head of the killed beast before the huts of the *mizimu* along with a little flesh.²⁰ When the Dayaks offer fowls to the water-goddess, they cut off the heads and throw them into the stream.²¹ Herodotus reports of sacrifices in Egypt that imprecations (averting evils) were pronounced upon the head after it was cut off and then it was either sold to strangers or thrown into the river. No Egyptian would eat the head of any animal.²² But this is not confirmed by monumental evidence, and the head appears as an offering quite as often as any other part of the animal.²³ Probably some particular sacrifice only is referred to by Herodotus. Among the Hebrew sacrifices occasional directions are given for the treatment of the head. That of the Passover lamb was to be eaten along with the flesh (*Ex* 12*). In the case of the burnt-offering the head is mentioned as one of the parts which must be laid on the altar and burnt (*Lv* 1st 12, 16). In the case of the sin-offering of ignorance, the head is one of the parts which are not sacrificed but taken outside the camp and burnt (*Lv* 4th; cf. 8th). Among the Teutons and Scandinavians, heads of sacrificed animals were sometimes the important part of the offering assigned to the gods; but, again, they were sometimes suspended on trees in the sacred grove and thus 'consecrated by way of eminence to the god.'²⁴ Similar customs obtained among the Celts, and are referred to in Acts of Saints, who tried to combat the popular pagan cults of Gaul.²⁵

Among those peoples with whom the bear is an object of reverence—Ainus (*q.v.*), tribes of northern Asia, some American Indian tribes—when one is killed in the hunt, its head has particular care bestowed upon it.

Thus among the Gilyaks (*q.v.*) the head and skin are borne solemnly through a smoke opening into the *yurta*. Women receive it with solemn music, and the head is set on a platform

adorned with pine branches. Offerings are set before it, and on the next day, called 'the foddering of the head,' it is fed from every dish served at the feast.¹

The Ainu set skulls of slain bears in the place of honour in their huts, or fix them on poles and sacrifice to them, believing that the spirits of animals dwell in the skulls.² The Ostiaks hang the head on a tree and worship it.³ Among those American Indian tribes who venerate the bear, the head is tied to a tree as a mark of respect, or hung on a post after being painted. Homage is paid to it, and it is expected to bring good luck to the hunters.⁴ Analogous customs are found elsewhere.

In Timorlaut, skulls of turtles are hung under the house, and prayer and sacrifice are offered them in expectation of their assistance during turtle-fishing.⁵ The Koryaks of Siberia place heads of whales or seals on their roofs and then on the hearth where offerings are made to them, and their souls go forth to sea to induce other animals to be caught.⁶ Among the Kurnai of S.E. Australia the native bear, when slain, is duly divided, and the head, as the most honourable part, goes to the camp of the young men.⁷ In various parts of British New Guinea, skulls of animals are preserved in the *potuma* or presented to the chief and fixed on his house.⁸ In Tibet the house is guarded against demons by a ram's skull and other objects fixed above the door.⁹ Among the Greeks and Romans it was customary to nail the head of sacrificial victims, especially of the ox, above the door of the house in order to ward off evils. Such heads were called *βουκράνιον*, *bucranium*.¹⁰ The head of the October horse was cut off and decked, and, after a fight for its possession, it was fixed on the wall of the Regia or on the *turris Mamilia*.¹¹ Among the Scandinavians, Teutons, and Slavs the heads of sacrificial animals, especially those of horses, were set upon poles or on houses in order to keep off evil influences, while the significance of this custom is found in many practices recently surviving. To these actual heads fixed on houses must be traced the carved horses' or other animals' heads on gables of mediaeval houses in Germany, Russia, England, etc., regarding which occasional legends are told. Where an actual skull was fixed on the building, it may have been that of an animal killed as a foundation sacrifice.¹²

It is thus obvious that the animal's head serves an analogous purpose to that of the human head, and that the similar customs with respect to both have their origin in similar ideas respecting the spirit acting through or from the head. This is apparent in the Baganda belief that ghosts of slain buffaloes are dangerous. Hence the head is never brought into a garden of plantains, but eaten in the open country, and the skull placed in a specially built hut, where offerings are made to it, to induce the ghost to do no harm.¹³

In many cases magical rites are performed with animals' heads for different purposes, e.g. to cause a large supply of the animal in question to fall to the hunter,¹⁴ to prevent disease spreading by burying the head in the grave of the deceased,¹⁵ or charms are made from animals' brains,¹⁶ or they are worn dried as amulets.¹⁷

7. Rites connected with the head.—The importance of the head is further seen in the number of rites connected with it or performed upon it. In the article HAND (§ 3) it has been seen how the laying on of hands takes place upon the head, while it is also upon the head that anointing and the affusion of sacred liquids usually take place (see ANOINTING).

(a) The head is often shaved at different occasions in life; and, whatever secondary purposes this or

hair-cutting (see HAIR AND NAILS) may serve, the primary purpose seems to be the removal of evil influences and impurity from the head. The hair being removed, such evils cannot cling to the head. Some of the following examples will make this clear.

The ceremonies of the Kaffirs, after lightning had struck any thing or person, included shaving the head.¹ Soon after birth the head of the child is shaved in China, though here the belief now is that evil spirits which might attack the child will be deluded into thinking he is a despised Buddhist priest.² The early Arabs shaved the child's head and then daubed it with sacrificial blood—a purification.³ Shaving the child's head is also a Hindu rite,⁴ and it is used in modern Egypt.⁵ Similarly, before *circumcision*, *name-giving rites*, *latwini*, and the like, shaving of the head takes place.⁶ In some regions it is also a customary rite before marriage in the case of the bride.⁷ In the case of the priesthood, shaving the head is a rite of initiation, or the head must be kept shaved as one of a series of rites to avoid impurity. This was the case with the priests of Melkart.⁸ In Egypt the priests shaved their heads every third day,⁹ and in the case of initiation to the Isis mysteries shaving the head was a necessary preliminary.¹⁰ It is also a Brāhminic rite of initiation,¹¹ and the Buddhist rite of 'ordination' includes complete shaving of the head.¹² In order to mark off the Hebrew from pagan priesthoods, shaving the head of the priest was forbidden (Lv 21⁵, Ezk 44²⁰).

The tonsure in the Christian Church is doubtless connected with these ideas of purity and removal of evil influences. In connexion with *pilgrimages*, shaving the head is also a necessary rite either before or during the journey.¹³ The idea of removing impurity and danger is clearly seen in the Hebrew injunction to shave the head of the female captive before taking her to wife (Dt 21¹²), and of the leper as part of the ritual of his purification (Lv 14⁹); in the Arab custom of the offender appearing at the door of the injured person with shaven head as part of the ritual of reconciliation,¹⁴ and in the Chinese custom of shaving the head of the child who has fallen into a sewer, in order to let out the evil influence.¹⁵

Shaving the head as a mourning rite has also been a very general custom; and, although this, like cutting the hair, may have come to be regarded as an offering of the hair to the dead, which thus established a bond of union between them and the living, it originated in a desire to rid oneself of the evil contagion of death which might be clinging to the hair.

This rite was common in antiquity, but was not practised by the Egyptians, whose hair was habitually shaved,¹⁶ although in the mourning for Osiris the worshippers appeared with shorn heads, i.e. probably without their wigs, which were generally worn.¹⁷ In the mourning for Adonis at Byblos the people shaved their heads, mourning for the dead god, thus following the custom of mourning for dead relatives.¹⁸ The custom was also followed by the Hebrews, but was forbidden by the legal codes (Lv 19²⁷ 21⁵, Ezk 7¹⁸, Jer 16⁶, Dt 14¹; cf. Am 8¹⁰). It is also found among many savage tribes.¹⁹

(b) The ritual washing of the head is a usual accompaniment of purificatory ceremonies in many regions, and already in the Bab. Epic of Gilgamesh it is referred to as part of the outward procedure by which inward grief may be put away: 'Thy head be washed, bathe in water!' But probably with most peoples this is a very occasional proceeding on account of the sanctity of the head and the danger of detaching any of the hair from it in the process.²⁰

(c) *The placing of ashes, dust, or earth on the head* has been frequently recognized as a sign of abasement or of grief and mourning. Many African tribes adopt it as the proper method of an inferior in approaching a superior.¹ It is similarly used among Oriental peoples,² and among the Hebrews it was commonly adopted either as a method of approaching God or a conqueror in humiliation, or as a token of excessive grief, and of mourning for the dead (Jos 7⁶, 1 S 4¹², 2 S 1² 13¹⁹; cf. Is 61³).³ The Egyptians also used it as a sign of mourning.⁴

While this action shows humility, it thus helps to propitiate either deity or superior; and, though in mourning it is a natural act on the part of those who believe that indifference to cleanliness, neatness, etc., is a concomitant of grief, there may be some idea also of thereby propitiating the ghost. The suggestion that the dust was taken from the grave or ashes from the funeral fire in the case of mourning is ingenious but uncertain.⁵

(d) *The covering of the head* by certain persons at certain times, or habitually, is a matter of obligation, to omit which would be to incur ill-luck and danger. As things sacred are dangerous, and as the head is regarded as sacred, there are occasions when it might be harmful to the ritual act which is being performed or disrespectful to the divinity, to uncover it. And, conversely, dangerous influences might fall on the sacred head at that particular moment. Shamans and priests frequently cover the head when performing magical or religious rites.

Among the Veddas the cloth which is held over a shaman's head, when his hair is being cut, also covers his head in the sacred dances.⁶ In Borneo, while engaged in the magic ritual of healing, the shaman has his head veiled.⁷ The priests of the Goths, according to Jordanes,⁸ were called *pileati*, because they covered the head with a hat while sacrificing.⁹ The Roman priests while performing sacrifice covered the neck and back of the head with the toga (*velato capite*).¹⁰ The custom was traced to the advice given by Helenus to Aeneas,¹¹ but Plutarch suggests other reasons—humility, the avoidance of hearing ill-omened words, or a symbol of the soul hidden by the body.¹² The Greeks, on the other hand, sacrificed with the head uncovered (*aperto capite*), and this was followed when the sacrifice at Rome was performed according to the Greek rite. There were also exceptions, as when the priest sacrificed with head uncovered during the rites of the *ara maxima* and the *aedes Herculis*.¹³ Muhammadans regard it as abominable to pray with the head uncovered.¹⁴ Jews also cover the head at prayer out of reverence (cf. Ex 3⁶ 'Moses hid his face, for he was afraid to look upon God'), and the mantle, or *talith*, is placed over the head at the name of God. Among Christians the head is uncovered at prayer and in church, but women have the head covered, following St. Paul's injunction (1 Co 11⁴⁻⁵), and at certain parts of the service the priest wears a biretta, and the bishop a mitre.

(e) *The veiling of the bride*, which takes place among so many peoples, savage and civilized, may be traced to the idea of danger to the head, which would be regarded as greater at the time of marriage.¹⁵ The ecclesiastical rite of the veiling of virgins who dedicated themselves to the religious life ('taking the veil') was connected with the idea of a mystical marriage with Christ.¹⁶ Many in the early Church held that all unmarried women or virgins should wear a veil.¹⁷ Muhammadan women must always be veiled, as it would be immodest to let any one see the head or face, especially the former.¹⁸ Among Jews, though not now in Western countries, it was considered indecorous for a woman to be bare-headed. The custom of covering the face or head with a veil or with

the mantle on occasion existed among the early Hebrews, with the same idea of indecorum (Gn 24⁶⁵). The same rule has been followed in the Christian Church with regard to women since the earliest times, but it is dishonouring to his head for a man to pray covered, according to St. Paul (1 Co 11⁴⁻⁵). On the other hand, uncovering the head is often regarded as a token of respect, whether to divinities or superiors, just as it is an act of etiquette in the modern world.¹ It is not easy to reconcile this with the former practice, unless the idea was that of exposing a part regarded as sacred before those who were sacred or superior.

Van Gennep (p. 240) regards covering the head as an act of separation from what is profane. This is undoubtedly one aspect of the custom, emphasized, e.g., in the Church ritual of marriage, where, at the benediction of the pair, a veil is held over their heads.² Covering the head is also an occasional token of grief, or mourning.³ In some instances wreaths, chaplets, and crowns are worn as protectives of the head from evil influences. See art. CROWN, vol. iv. p. 338^a.

(f) *Distinctive marks* are often made on the forehead by branding or painting, or they are symbolically signed with the hand. In India such marks are painted on the forehead; and, according to their form, they denote the sect to which a man belongs—Saivites have a horizontal and Vaishnavites a vertical sign.⁴ Among the Buddhists of Eastern Tibet, Lamas pass through an ordeal of initiation in which six marks are seared in their crown with an iron lamp.⁵ A similar custom must have existed among the Semites, for in Ezk 9⁴ there is reference to a sacred sign, the *Tau*, placed on the foreheads of those who had not given themselves over to pagan cults, and who would thus be saved from slaughter in the day of destruction. Similarly in the Apocalypse the worshippers of the beast have his mark on their foreheads (or their hands), and they are doomed to drink of the wrath of the wine of God (Rev 13¹⁶ 14⁹⁻¹⁰; cf. 20⁴). On the other hand, the servants of God are 'sealed in their foreheads' with the names of the Lamb and His Father (7³ 14¹). In the *Psalms of Solomon* 'the mark of the Lord is on the righteous to their salvation'—probably on their foreheads, since 'the mark of destruction' is placed thereon (15¹⁰).⁶ Hebrew prophets apparently bore some distinctive mark on the face or hand (see 1 K 20⁴¹). In Christian baptism, from comparatively early times, the candidates were signed with the Cross on their foreheads at various stages of the service, e.g. in connexion with exorcism, and at confirmation the same sign was made with the thumb dipped in the consecrated oil.⁷ The whole conception of baptism as supplying a 'seal' or mark by which the faithful were known to God—baptism conferring a spiritual character—is connected with these ideas of an actual mark made on the forehead, as is obvious from the language used regarding it in early writings (see *ERE* ii. 385^b, 393^a). In signing oneself with the protective sign of the Cross, sometimes called 'sealing,' it was usually traced on the forehead.⁸ Many passages in the Apocryphal Acts show that by this invisible 'seal' demons were repelled. But a later method was to make the sign by touching first the forehead, then the region of the heart, the left, and afterwards the right shoulder. In Christian usage the symbolic marking took the place of actual marking or branding. Such marks were, however, still made by some Gnostic sects—e.g. the Carpocratians (branding or marking on the lobe of

the right ear)¹—and they were also used in Mithraism (branding the initiate on the forehead).² These marks secured the recognition of the initiate by the divinity.

8. Postures of the head.—Almost universally, at worship, before a sacred object, or in presence of a superior, the head is reverently bowed, or the person bends down or prostrates himself to the ground, touching it with the forehead. These postures are found among many savages and in all of the higher religions. But sometimes also the head is uplifted, the petitioner looking upwards to heaven—a posture which usually accompanies the lifting of the hands in prayer. In many semi-religious or magical rites the head is directed to be averted, as it is considered dangerous to see supernatural personages, sacred objects, and all that belongs to a supernatural plane (Gn 19^{17, 26}; ERE iv. 654).³ Various gestures of the head have definite significations among most peoples. The head is hung in shame, or raised in pride, or moved up and down or from side to side in token of assent or negation, or wagged in token of contempt (La 2¹⁸, Mt 27³⁰), etc. As a sign of their complete subjection a conqueror placed his foot on the head of his enemies (Ps 110¹, 1 Co 15²⁵).⁴ Hence among savages it is often a sign of respectful submission to place a superior's foot on one's neck or head.⁵

9. Of all parts of the body the skull tends to exhibit the largest proportion of clearly defined variations. As related to the brain as well as to the organs of mastication, and because of its differences in dimensions and in form, it affords an excellent index of racial affinities. Hence the science of craniology, the measurements and characteristics of the skull, has thrown great light not only upon the races of pre-historic times as revealed by their remains, and their relation to existing races, but also upon the affinities of present-day peoples⁶ (see ANTHROPOLOGY).

10. Deformation of the head in various ways, of which four principal types are distinguished, is practised by many peoples. The infant's head is submitted to the continued application of boards, bandages, stiff caps, and the like, until the deformation is finally attained. This practice is common among American Indian tribes, in the South Sea Islands, in Asia Minor, and sporadically in Europe, e.g. the 'Toulousaine' head of different parts of France.⁷

HEALTH AND GODS OF HEALING

(Greek).—I. THE RELATIONS BETWEEN SACRED AND PROFANE MEDICINE IN ANTIQUITY.—As long as religion maintains an inherent connexion with the entire intellectual development of the age, so long does medicine continue to bear the impress of the religious factor. In the absence of the occult element from the surgical practice of the *Iliad*, we shall therefore hardly venture, with Gomperz (*Gr.*

Denker, i. 224 [Leipzig, 1896]), to describe a 'morning-blush of the Illumination.' For one thing, the significance of that absence is discounted by the fact that in the *Odyssey*, a product of the same stage of culture as the *Iliad*, the magic word is employed in the treatment of wounds (*Od.* xix. 457); and for another, the surgical art, just because the injuries it deals with are patent to the eye, and may be healed by the skilled hand, occupied a distinct position within the sphere of medicine. This is seen even in the legal enactments of ancient Babylonia, in which the healer of wounds is put alongside of the veterinary surgeon, the architect, and other artisans, while internal medicine is not mentioned at all (see below). The absence of exorcism from the surgical practice of the *Iliad* could be regarded as a symptom of the Ionic 'spirit of light' only if that epic, in its references to disease, made no mention of magic remedies at all. In point of fact, however, the warriors who deal so rationally with wounds are completely at a loss when confronted with the pestilence sent by Apollo, and have recourse to supernatural means of healing—the consultation of priests, seers, and dream-readers (*Il.* i. 63), purifications, prayers, and sacrifices (442 ff.). In the *Odyssey* likewise the illness of individuals is regarded as sent by the gods (v. 396, ix. 411), and from the gods alone is the remedy to be procured (v. 397). The prevalence of theurgic medicine in the Homeric age must thus be recognized as a fact beyond question.

Then the ever-recurring employment of religious expedients against the onset of epidemics in later times, and the vogue enjoyed for centuries by temples of healing, show us how long the power of magic held its ground in the sphere of therapeutics. It is also a significant fact that Pindar, when enumerating the subjects which Asklepios learned from Cheiron (see below, II. A. 6), does not shrink from co-ordinating exorcism with external and internal medicine. Even Sophocles, whose view of *ἐμψυχή*, as expressed by Ajax (*Aj.* 582), is read by J. Hirschberg as a condemnation of them (*Gesch. d. Augenheilkunde*, Leipzig, 1905, p. 55; he might also have adduced *Trachin.* 1001), was actually the priest of the healing hero Amynos (II. B. 11), and, as such, successfully strove to secure the naturalization of Asklepios, the bestower of dream-oracles, in Athens.

A very different problem is raised when we ask whether the predominance of the supranaturalistic element did not act as an obstacle to practical progress in religious medicine, or whether genuine medical knowledge might not develop even under such conditions. In order to answer this question, we must turn to the two civilized peoples who practised the healing art prior to the Greeks.

(a) To the *Babylonians* a science of medicine free from the occult was always a thing unknown. At the first glance, indeed, it might seem as if at a remote period popular beliefs were assailed as mere superstition by certain outstanding rulers, but on a closer inspection this view proves to be fallacious. The ancient Sumerian *patesi* (city-king) of Lagash, Gudea, whose reign is now dated c. 2450 (A. Ungnad) or 2350 B.C. (E. Meyer), certainly says, in his report about the building of the temple of Ningirsu, that he has 'expelled the dreadful sorcerers, the [what follows is unintelligible] . . . from the city' (Statue B 3, 15 ff., as in Thureau-Dangin, *Die sumer. u. akkad. Königsinschr.*, Leipzig, 1907, p. 69; cf. Cylinder A, 13 f., p. 103). But to speak of him as on that account the earliest champion of civilization in history (J. Jeremias, *Moses u. Hammurabi*, Leipzig, 1903, p. 40, n. 3) is a misapprehension. Gudea was, in fact, anything but a rationalist. The inscriptions of his statues and cylinders record little else than his exertions in

⁷ See P. Topinard, *Éléments d'anthropologie*, Paris, 1885, p. 744; A. Hrdlicka, in Hodge, *H.A.I.*, Washington, 1907 [30 Bull. B.E.], pt. i., s.v. 'Artificial Head Deformation'; *NR* i. and ii. passim; Turner, *Samoa*, 90.

connexion with the temples of the gods, and reveal him as a true priest-king. For the building of the aforesaid temple of Ningirsu, he asks that goddess for a special revelation (cf. his dream, on Cyl. A, 27 ff., Thureau-Dangin, p. 91 ff.), while for his administrative proceedings he resorts to omens of various kinds, as also, according to Jastrow (*Die Religion der Bab. u. Assyrl.*, Giessen, 1902-05, ii. 273), to hepatoscopy. When a ruler of this type makes war upon sorcerers, it will hardly be in the interests of enlightenment.

The same holds good of Hammurabi of Babylon, who reigned some centuries later. By § 2 of his code of laws, a charge of having practised sorcery is to be submitted to a divine ordeal which involves the death of either the accuser or the accused (cf. Ungnad's tr. in Gressmann, *Altorient. Texte*, Tübingen, 1909, p. 143). Here again Jeremias recognizes the measures of an enlightened monarch against the superstitions of his day. But, while religion has indeed no place in the legislation itself, it is certainly prominent enough in the epilogue, where the king calls upon the gods to chastise the transgressors with various calamities, such as serious illness, evil Ashakku (the demon of consumption or fever), painful injury, the nature of which is unknown to the doctor, and which he cannot relieve with bandages. In §§ 215-221 the code applies the strictest provisions of the *ius talionis* to the doctor; but here the doctor is in reality the surgeon, and is not concerned with internal diseases, which, according to Hammurabi's ideas, are induced by demons, and can be combated only by religious means. Contemporary inscriptions show that by the time of Hammurabi the divining priests (*bārū*) had been formed into an organized gild; and this was presumably the case also with the exorcizing priests (*ashipu*), whose function it was to dislodge the demons of disease (cf. Weber, 'Dämonenbeschörung bei d. Bab. u. Assyrl.', in *Der alte Orient*, vii. [1905] 4, pp. 5 and 7).¹

Thus, as sorcery and exorcism were recognized elements in the official religion of Mesopotamia, the repressive measures of Gudea and Hammurabi could apply only to those illegal practices by which persons endowed with occult powers—sorcerers and witches—caused injury to others, and against which the priesthood in its official capacity fought with magic devices of its own (as found in the 'Maklu' inscriptions). What the priests thus did by magic, the two monarchs sought to do by law, and, accordingly, the object of their attack is not superstition as such, but what was known in the Middle Ages as 'black magic.' Hence, as the belief that disease was caused by demons was an essential feature of Babylonian religion, Babylonian therapeutics must also have borne a supernaturalistic character.

(b) The Egyptians, even by the period of the *Odyssey* (iv. 227 ff.), had carried the fame of their medical proficiency beyond the confines of their own country; and this fame is justified by the relevant portions of their extant literature. It would seem, however, as if an error had recently crept into the critical investigation of this literature. Thus, from the fact that two documents of the Middle Empire—fragments respectively of a gynaecological and a veterinary papyrus, and both from Kahun—deal only with symptoms, diagnosis, and therapeutics (F. v. Oefele, in Neuburger-Pagel, *Gesch. d. Medicin*, i. [Jena, 1901] 75), while

the Ebers Papyrus, compiled from older writings during the XVIIIth dynasty, and its nearly contemporary counterpart, the Hearst Medical Papyrus (ed. Reisner, 1905), frequently supplement the medical recipes by magic formulae, von Oefele (*Der alte Orient*, iv. [1902] 2, p. 25) and H. Schneider (*Kultur u. Denken d. alten Aegypten*, Leipzig, 1907, p. 317 ff.) infer that Egyptian medicine was at first purely empirical, and resorted to magic only in the period of the New Empire and under Babylonian influence. But is this not too bold a conclusion to draw from such scanty data? The gynaecological text in question consists of only three columns, while the Ebers Papyrus comprises one hundred and ten pages; in the latter, moreover, the incantations are met with sporadically, and large portions of the text have none at all. Thus the absence of incantations from the Kahun fragment may be merely fortuitous. In a world, that a people with so intense a belief in the supernatural as the Egyptians—a people whose cult of the dead was completely permeated by magic even in the Ancient Empire—cultivated a purely rational medicine the present writer finds it impossible to believe.

We turn now to the question how far those two civilized peoples of antiquity, with their marked leaning towards the occult, succeeded in making progress in the science and art of healing. Modern writers on medicine have shown that the Egyptian doctrine of the vessels (*metu*) was a real contribution to science, and that the Egyptian pharmacy furnishes materials of considerable value. But the Babylonian medicine likewise, debased by the ritual of exorcism and dependent upon oracles though it was, recognizes, as has been shown by F. Kuchler in his valuable *Beiträge zur Kenntnis d. assyrl.-bab. Medicin* (Leipzig, 1904), the use of rational remedies, employs the injection (Kuchler, p. 39, l. 44) and the cataplasm (*ib.* 39, 36, etc.), and gives directions as to diet (*ib.* 7, 30, 69); and, according to Oefele (in Kuchler, p. 65), the squatting position it prescribes for colic (*ib.* 3, 11, 13) does in reality afford great relief.

Alike in the Nile valley and in Mesopotamia, therefore, the healing art was a combination of the occult and the rational, and this peculiar system of medicine exercised an influence upon the Greeks at a very early period. The Egyptian doctrine of *metu* survives in the Greek theory of 'humours' (Schneider, *op. cit.* 325), the Egyptian pharmacy in that of Greece; and a striking illustration of such survival is found in the fact that, as demonstrated by Le Page Renouf (*ZA* xi. [1873] 123), the diagnosis of pregnancy in the 'Hippocratic' treatise *περί ἀφῶρων*—probably written by a Cnidian—is identical with that found in the Brugsch Papyrus. How this Egyptian diagnosis made its way to the Cnicians may be explained by the fact that, according to Diogenes Laertius (viii. 87), the Cnidian mathematician and physician Endoxos spent fifteen months with the medical priests of Heliopolis in the reign of Nektanebos (382-364 B.C.); and Endoxos would certainly not be the first of the Greeks to avail himself of such an experience. The avenues by which Babylonian medicine reached the Greeks have not yet been definitely ascertained; but the present writer is convinced that the practice of *incubation*, i.e. sleeping in a temple as a means of healing, which is of great importance in the religious medicine of the Greeks, was an importation from Babylonia. H. Magnus (*Abh. zur Gesch. d. Medicin*, i. [Breslau, 1902] 6 ff.) maintains, it is true, that incubation was common in Egypt from the earliest times; but the present writer has never succeeded in finding any mention of it in ancient Egyptian sources. In all probability, the practice was introduced into Egypt through the medium of the Sarapis worship

¹ A parallel to Gudea and Hammurabi in this respect may be found in Saul, king of Israel, who, in conformity with Ex 22:18 and Lv 19:27, expelled wizards and diviners from the country, but in his own hour of need sought counsel of the forbidden oracles (the witch of Endor, 1 S 28:7; cf. v. 2). Divination, however, was forbidden among the Israelites, not as a harmful superstition, but as a Canaanite practice (cf. E. Meyer, *Gesch. d. Altertums*, Stuttgart, 1884-1901, i. § 313).

founded by Ptolemy I., and was shortly thereafter transferred to the cult of Isis. Sarapis—the subject of much discussion—is, however, as C. F. Lehmann-Haupt has shown (II. A. 18), simply the god Ea of Eridu under his customary by-name of *anrapsi* ('king of the watery deep'), the supreme healing god of the Babylonians (Jastrow, *op. cit.* i. 294 ff.). In the sanctuary of Ea at Babylon—the edifice which Greek sources call *Σαραπειον*—the rite of incubation was performed on behalf of the dying Alexander by several of his generals. The theory that Mesopotamia was the cradle of incubation is warranted also by the fact that in that region dream-oracles were sought after for all emergencies, and especially for disease (Jastrow, i. 367 ff.), from the earliest times. Unfortunately, we have as yet no work dealing with the ritual prescribed; and this is all the more to be regretted in view of the important rôle played by *dream-reading*. Jastrow's work has so far only reached the discussion of the oil-oracle; the still unpublished matter relating to dream-oracles for healing purposes is noted in Bezold's Catalogue of the Kouyunjik Collection, v. (1899) nos. 2140 ('omens, including medical prescriptions') and 2143 ('omens derived from events which seem to occur in dreams'). That incubation among the Babylonians and Assyrians was an institution with well-defined rites is shown by an incidental reference in the annals of Assurbanipal (ed. Jensen, *KIB* ii. [1890] 187), where a dreamer is said to have lain down towards the end of the night, in order to obtain an oracle on the king's behalf (cf. *ib.* 201). The Greek practice of incubation, however, also exhibits the two features here indicated, viz. *incubation on behalf of another* (cf. II. A. 15 and 17, below), and the *preference for a time towards morning*—'as the soul is then free from the effects of material sustenance' (Philost. *Vita Apollon.* ii. 36; cf. Artemidor. i. 7). Plutarch (*Septem sap. conv.* 15) tells us that incubation was an ancient Greek practice, and the reference of the *Iliad* (xvi. 235) to the Dodonian Selloi, the *ὑποφῆται χαμαίνεσθαι* of Zeus, may be regarded as the earliest witness to it (so Welcker, *Kleine Schriften*, iii. [1850] 90, and Dümmler, *Philol.* lvi. [1897] 6). The naturalization of a Bab. practice in Greece at so early a period is not inconceivable, as another passage of the *Iliad* (xiv. 201, 246), in its striking representation of Okeanos and Tethys as primitive forces (cf. the early Orphic theogony, in Plat. *Cratyl.* 402 B), shows dependence on Bab. cosmogony (P. Jensen, *Kosmologie der Babylonier*, Strassburg, 1890, p. 244). Incubation would seem to have reached the Greeks by way of Lydia; thus, in Assurbanipal's annals (*KIB* ii. 173), a dream vouchsafed by the god Assur to Gyges is mentioned (cf. Jensen, in Thirmer, *Pergamos*, Leipzig, 1888, p. 413), while in the valley of the Mæander there were several incubation-shrines of the subterranean gods, one of them being the Plutonion, near Nysa, the ceremonies of which were a reflexion of the Bab. practice (II. A. 17, below). Mention should also be made of the curious affinity between the Bab. haruspicy (Jastrow, ii. 213 ff.) and the Etruscan—a correspondence dealt with most recently by G. Körte (*Röm. Mitt.* xx. [1905] 348 ff.) in connexion with the bronze liver of Piacenza (see ETRUSCAN RELIGION, vol. v. pp. 533, 537). Here, again, we learn that we are but beginning to realize the remarkable religious influences which streamed from Mesopotamia to the West.

If the religious medicine of the older civilized peoples thus made its influence felt among the Greeks, the question arises whether its further development, after its settlement upon Greek soil, was essentially upon the same lines as before, i.e. whether the fusion of religion and medical em-

piricism can be traced also in the therapeutic practice of the Greek sanctuaries. While this, notwithstanding the ridicule poured upon incubation-shrines by Aristophanes in the *Ploutos*, and obviously also in the *Amphitraxos*, might have been confidently taken for granted until lately, the discovery of the Epidaurian stela recording the miraculous cures (*ἰάματα*) of Asklepios (as redacted about the end of the 4th cent. B.C.) has brought about a defection from this view, and the majority of modern investigators stigmatize these sanctuaries as hives of priestly chicanery and senile superstition. The latest discussion of the question (S. Herrlich, 'Antike Wunderkuren,' in *Progr. des Humboldt-Gymnas. zu Berlin*, 1911) comes eventually to the same negative result. The present writer, however, after renewed consideration of the subject, cannot but adhere, in essentials, to the earlier standpoint, as set forth in Pauly-Wissowa, ii. 1686 ff.

Arguing from the difference between the contents of the Epidaurian *ἰάματα*-stela and the condition of medical practice in the Imperial period, P. Kavvadias (in his *Fouilles d'Épidaure*, Athens, 1893, p. 115, in the *Ἱερὸν τοῦ Ἀσκληπιοῦ*, 1900, p. 267 ff., in the *Mélanges Perrot*, 1902, p. 42, and, finally, at the Archaeological Congress in Athens, *Comptes Rendus*, 1905, p. 278 ff.) has come to the conclusion that in the Greek period the curative procedure of the Asklepieia consisted entirely of miraculous acts of the god, after the style of the *ἰάματα*, while in the Roman period, in consequence of the institution of dream-shrines, and the therapeutic methods based thereon, it received an infusion of rationality. But the inference is by no means beyond dispute. To begin with, it would be strange indeed that the Asklepieia of the most flourishing period of the Greek world should successfully resist the intrusion of rational procedure, while, in a period of growing superstition and craving for the miraculous, they should open their doors to natural remedies.¹ Kavvadias bases his theory on the Epidaurian *ἰάματα*, but exaggerates their importance. In Pauly-Wissowa (*loc. cit.*) the present writer had pointed out that the *ἰάματα*—according to which, e.g., persons with a vacant eye-socket incubate, and leave the shrine with a seeing eye—are not historical documents, but merely a compilation for the gratification of credulous minds, and that none of the individuals said to have been cured by the god can be historically traced. Wilhelm (*Jahrb. d. österr. archäol. Instit.* iii. [1900] 40) has certainly sought to identify Arybbas, an Epirot named in stela ii. no. 31, with a Molossian chief of the period in which the *ἰάματα* were redacted, but in that case this particular *ἰάμα* would be severed from the group as a whole. The Greeks had, in point of fact, a great store of legends about the cures and resuscitations of Asklepios in the mythical age (cf. Pauly-Wissowa, ii. 1653 f.), and one of these miracles—the raising of Hippolytus to life—was extolled upon a stela bearing an epigram in the Epidaurian *hieron* (Paus. ii. 27. 4). Our redaction of the *ἰάματα*, then, really preserves the substance of these tales of the marvellous in a pseudo-historical form, its object being to convince the credulous that the immediate miraculous action of the god had not ceased with the mythical age. A frequently recurring feature of the *ἰάματα* is the statement that, when the sleeper awoke, his dream was found to have been already fulfilled; and here again the record follows a mythical pattern, as seen in Bellerophon's dream (Pindar, *Olymp.* xiii. 56). If, accordingly, the

¹ This argument is advanced in opposition to Kavvadias also by S. Herrlich (*loc. cit.* 33), though only by way of supporting the contention that the occult element maintained its ascendancy also in the Roman period; otherwise Welcker, *Kleine Schr.* iii. 75.

Epidaurian *iamata* belong to the class of miraculous stories designed for edification, such as are met with in all religions, we cannot regard them as documents drawn up from the actual practice of the Asklepieia.¹

The hypothesis of Kavvadias ignores the *man-
tic* aspect of incubation; and so O. Rubensohn (*Festschr. für Vahlen*, Berlin, 1900, p. 13) takes the further step of asserting that in the Greek period the cult of Asklepios was not concerned with dream-oracles, but that these were introduced at first by the Sarapis-Isis cult. In point of fact, however, *ἐγκοιμησις* was known to the Greeks long before the worship of Sarapis reached them, and was based precisely on the prophetic significance of dreams (see below, II. A. II, 14, 15, 17-20; and above, the reference to the Dodonian Selloi; cf. II. B. I and 8). A distinction was made between *δνειροι θεῖοι* (or *θεόπνευτοι*), 'divine oracles given in dreams,' and *δνειροι φναικοί*, 'oracles of the soul itself in dreaming.' The author of the *περί διατρῆς* in the *Corpus Hippocr.*, probably a Cnidian physician, believes in both kinds, but does not treat of the former class (ch. 87 [vi. 540, Litttré]), as these had already been dealt with by experts,² confining himself to the 'natural' class, in which the soul reveals what will benefit the body. Both kinds of dreams are recognized by the post-Hippocratic physician Hierophilos, the anatomist (Plut. *de Placit. Philos.* v. 2). Even Democritus believed in demons who reveal themselves to the dreamer in forms (*εἰδωλα*) emanating from themselves (Plut. *ib.*; Sext. *Empir.*, *adv. Math.* 394), and Aristotle acknowledged the *mantic* efficacy of 'natural' dreams (*περί τῆς καθ' ὕπνον μαντικῆς*, p. 462 ff.), while the Stoics, again, regarded dreams of healing as manifestations of divine providence. In view of such favourable recognition on the part of physicians and philosophers, it was, of course, incumbent upon the official directors of the practice of incubation to do all they could to ascertain the divine will as indicated in the dreams. Everything turned, therefore, on the correct interpretation. The special literature of the subject formulates two classes of revelations (Artemid. i. 2): (1) *δνειροι θεωρηματικοί*, 'dreams to be followed literally'—even there, however, interpretation had to be resorted to whenever the literal application of the prescription threatened the patient's life³—and (2) *δνειροι ἀλλήγορικοί*, 'dreams which indicate the remedy indirectly.' As regards the latter, Artemidorus (iv. 22) deprecates all perversity of interpretation, and asserts that the *συνταγὰς* of the gods, when given in enigmatic form, are nevertheless quite clear; thus the dream of a lamb sucking the breast of an invalid signifies an application of *ἀνυδρύλασσον*. Preposterous interpretations were a characteristic feature of the Imperial period—e.g. a vision of the Athene Parthenos of Phidias was fantastically interpreted as signifying the application of an injection of Attic honey (Aristid. ii. 403 [Keil]).

Again, *interpretation of dreams* and a therapeutical practice founded thereon are met with—to leave Asklepios out of account meanwhile—in the Plutonian near Nysa (II. A. 17, below), in the Dionysian dream-shrine at Amphikleia (15), in the cult of the Dioscouroi at Byzantium (14), and in the Amphiareion at Oropos (19). Now, it is quite impossible to understand why incubation, the characteristic feature of which, from its

earliest infancy in Babylonia, was always the dream-oracle, should retain its character among the Greeks generally, and yet in particular should degenerate in the Asklepieia into a mere ornamental adjunct. Those who, in view of the Epidaurian *iamata*, accept the theory of Kavvadias overlook the fact that we have positive testimony to the dream-oracles of Asklepios during the Greek period, viz. in the *περί θεῶν* of Apollodorus, who in that work speaks of the god as 'praeses divinationum et auguriorum' (Macrob. *Sat.* i. 20). Apollodorus must therefore have known of the *συνταγὰς* given by Asklepios in dreams, and thus also of remedies applied in accordance with them. Nor are traces of this combination wanting elsewhere. In Aelian, frag. 100 (Suid. s.v. *Ἰλαίσων*) the god, *ἐκιστάς* (the technical term for appearing in a dream; cf. Deubner, *de Incubatione*, Leipzig, 1900, p. 11), is said to have prescribed a salve of swine's fat and vinegar for diseased eyes, and the *anapaestic* measure of the words shows, as Fritzsche (on *Thesmoph.* 949) has noted, that they are taken from a comedy. The three-months' course of healing undergone by Aeschines the rhetor, in Epidaurus (*Anthol. Gr.* iv. 330), might be appositely cited as additional evidence, if we were certain that the patient was Aeschines the Eleusinian (cf. Pauly-Wissowa, ii. 1688); the fact that the epigram speaks of him as an Athenian forbids us, at all events, to identify him with Aeschines the Milesian, a contemporary of Pompey. Finally, an indirect testimony to the curative operations of the Asklepieia is furnished by a current tradition which is rejected solely on account of the foolish assertion with which it concludes, but which contains the quite defensible statement that the profane medicine of the Greeks was derived from their religious medicine, and, above all, from that of Asklepios. Artemidorus (iv. 22) states that many persons in Pergamos (Asklepieion), Alexandria (Serapeion), and elsewhere were treated according to prescriptions given in dreams: *εἰσι δὲ οἱ καὶ τὴν ἱατρικὴν ἐκ τοιοῦτων συνταγῶν λέγουσι εὐρῆσθαι*. Similarly, Iamblichus (*de Myst.* iii. 3) says that the healing art had its origin in the *θεῖοι δνειροι* of Asklepios. What is here affirmed of profane medicine in general is referred to by Strabo (xiv., of which Apollodorus is the principal source) as a current tradition regarding Hippokrates in particular: *φασι δὲ Ἰπποκράτην μάλιστα ἐκ τῶν ἐνταῦθα* [in the Coan Asklepieion] *ἀνακειμένον θεραπευῶν γυμνάσασθαι τὰ περὶ τὰς διατὰς* (p. 657. 19). But, if the medical praxis of the Coan temple embraced such miraculous proceedings as are found in the Epidaurian *iamata*, no sober-minded man could have regarded them as providing instruction for scientific medicine. We must accordingly assume that records of the medical procedure of temples were preserved in the Asklepieion of Cos, and that these provided a footing for the current opinion regarding Hippokrates. That opinion was first brought into discredit by the allegation—not found in Strabo's source—that the great Coan physician was an incendiary.

It is singular that Hippokrates, the supreme genius of ancient medicine, has left so few positive traces of his personality. For his descent from the Coan Asklepiadae, and for his rapid advance to renown, we have the explicit testimony of his younger contemporary, Plato (*Prot.* 311 B, *Phaedr.* 270 C), but, as Friedrich (*Hippokratische Untersuchungen*, Berlin, 1899, p. 1) says, 'he was for Aristotle already an almost mythical personality.' The *Corpus Hippocr.* contains over seventy treatises, but none of them can be with absolute confidence ascribed to the master, while many are not even products of his school. The *Vita* compiled from Soranos and other sources (A.

¹ A very significant circumstance is that the supposed original votive inscription belonging to stele I. no. 15 (Hermodikos) proves to be a fabrication in a pseudo-archaic script.

² The sources used by Artemidorus are of much later date than the special literature indicated here, which, unfortunately, has not survived.

³ As, e.g., the prescribed bleeding to the amount of 120 pounds (Aristides, ii. 406 [Keil]).

Westermann, *Biographi Gr.*, Brunswick, 1845, p. 450) is a blend of fact and fancy. His birthday is attested by a reliable source—a Coan archive; while we may probably rely also upon the statement that, on the completion of his early studies, he was induced by the death of his parents to migrate to Thessaly, that he lived at Larissa, and eventually died and was buried there (cf. *Anth. Gr.* vii. 55). The name of his eldest son, Thessalos, likewise points to that country, as it is not met with in any previous generation of the Asklepiadæ. There is nothing to show that he ever returned to his native place, and Herzog's untiring researches in Cos have not yielded a single fact regarding him. It would thus seem certain that he left the island for ever at an early age. The ancients of a later day were manifestly at a loss to account for this. The *Vita* gives three distinct reasons, viz. (1) an injunction intimated in a dream (Soranos); (2) his desire to widen the horizon of his medical knowledge; and (3) his being accused of burning the Cnidian library (so Andreas, perhaps physician in ordinary to Ptolemy IV., whom Galen [xi. 795, Kühn] stigmatizes as a wind-bag). The charge implied in the last-mentioned explanation is attributed by S. Reinach (art. 'Medicus,' in Daremberg-Saglio, 1870) to the jealousy of the priests of Asklepios, but erroneously, as the relations between these and the Asklepiadæ (on which cf. Lefort, *Mus. belge de philol.* ix. [1905] 197 ff.) were always of a friendly character. The accusation could have arisen only from the antagonism between the Cnidian and the Coan schools of medicine, as it was in reality meant to brand the head of the latter as a plagiarist who availed himself of the professional literature of the former—a point which Tzetzes obliterates by transferring the burning to the Coan library, though he too makes it a question of non-religious medical literature (ἐν Κῷ βιβλιοφύλαξ δειχθεὶς τὰ παλαιὰ τῶν ἱατρῶν ἐνέπρησε βιβλία καὶ τὸ βιβλιοφύλακτον). The statement of Andreas makes no mention whatever of the votive tablets of an Asklepieion; the earliest suggestion of these occurs in Varro, according to whom (*ap. Plin.* xxix. 4) Hippokrates first copied the records of cures deposited in the Coan sanctuary by those restored to health, and then burned the temple. This is obviously nothing but an abortive attempt to interweave the anti-Coan version of Andreas with the view of the origin of scientific medicine just noted. That the latter hypothesis, however, was not put forward wholly at a venture, but might find some support in a genuine practice of healing in the Asklepieia, is shown by the testimony of Apollodoros to the mantic functions of Asklepios, and the recipe prescribed by the god in the fragment of a comedy in Aelian, fr. 100 (above, p. 543^b). The present writer would add a reference to an Athenian votive relief of the 4th cent. B.C. published by Ziehen (*Ath. Mitt.* xvii. [1892] 232, fig. 3), representing a patient stretched upon a κλίνη, and a surgeon engaged in treating him, while Asklepios, figured on a much larger scale than either, stands passively by (in the statuary type in Roscher, i. 634, schema i.). Here, then, we have monumental evidence of the fact that the personnel of the temple engaged in therapeutic practice under the sanction of the god.

It is thus impossible to deny that genuine medical treatment—directed, it is true, by oracles of healing—was practised in the Asklepieia of the Greek age. As regards the therapeutic value of such treatment, we are not able meanwhile to judge, for investigation of the Greek period has so far yielded no original votive tablets dedicated by restored patients and containing records of the prescribed remedies, such as are supplied for the Roman period in the pathological narratives of P. Granius (Lebena) and Jul. Apellas (Epidauros), but it is at

least an allowable hypothesis that the curative methods of the earlier age, in keeping with the higher state of its medical knowledge and the less debased character of its religion, were superior to those of the later. The prestige of dream-shrines would then be at its height, while practical medicine still maintained a close connexion with the occult, as in the Cnidian medical school (cf. Gomperz, *Gr. Denker*, i. 250), and probably even more in that of Rhodes—the first to become extinct (Galen, x. 5 [Kühn]). The (Cnidian) author of the *περὶ διατρῆς* (iv. [περὶ ἐνυπνίων] ch. 87) lays down the following principle: 'Prayer is certainly very good, but one who calls upon the gods must himself also do his part' (δεῖ δὲ καὶ αὐτὸν ξυλλαμβάνοντα τοὺς θεοὺς ἐπικαλεῖσθαι). Some of his interpretations of dreams are such as we might ascribe to an Asklepiian priest, as, e.g., ch. 88 (abbreviated): 'If in a dream one fights in opposition to the doings of the day, it signifies some bodily disaster, and this is to be counteracted by emetics, dieting, bodily movements, exerting the voice, and [last, though not least] by prayer.' We seldom meet with the case where the priestly function is discharged by a physician. Three instances are given in Pauly-Wissowa, ii. 1685; a fourth is probably to be found in Kalliphon, the father of Demokedes; he was a priest of Asklepios in Cnidus (Suid. s.v. Δημόκλῆδης), and, as the healing art was then hereditary in families, probably also, like his son, a physician. But we cannot say whether the priestly office as such embraced the vocation of interpreting dreams. In the Plutonium near Nysa dream-reading was the function of the ἐμπειροὶ τῶν λεπτῶν (below, II. A. 17), and we may doubtless assume that persons specially versed in this art were to be found in all dream-shrines. It was only natural that these adepts should have tried to discover a practical meaning in the dreams vouchsafed by their god. And in finding these meanings they were in no way guilty of a 'pious fraud' (Herrlich, *op. cit.* 13), but were rather the victims of self-delusion, as, in a related sphere, were also the Delphic priests in their task of moulding the incoherent utterances of the Pythia into intelligible sentences (cf. the critical estimate of this function in Schömann, *Griech. Alterth.*⁴, Berlin, 1897, ii. 318).

The facts thus adduced seem to the present writer to justify the view that among the Greeks, as among the Babylonians and Egyptians of an earlier age, religious medicine did not dispense with rational remedies. That practical modes of treatment were associated with miracle, 'faith's favourite child,' is shown not only by the craving for marvels which ran riot in the Epidaurian *iāmata*, but also by the legend narrating the founding of the Asklepieia of Naupaktos (Paus. x. 38. 13) and the Insula Tiberina (Ovid, *Metam.* xv. 660 ff., etc.). We may also suppose that, alike in the waking state and during incubation, cures were not infrequently wrought quite apart from the oracular adjunct and solely by means of *suggestion*, and then extolled as the miraculous works of the deity. We shall not pursue the subject further here, as we are meanwhile concerned only to follow the traces of rational therapeutics within the sphere of religious medicine. From the former alone is there any real passage to the altogether rational conception of *Hygieia* in the Asklepiian cult, with regard to whom the reader is referred to the section dealing with 'Asklepios' in II. A. 20, ii. (2) below. Her radiant figure appears as something out of keeping with the mystical and, in essence, non-Hellenic dusk that surrounds the practice of incubation.

II. HEALING GODS AND HEROES.¹—A. GODS.—

¹ The following list touches only incidentally on the deities of childbirth.

The belief in gods implies also belief in their sway over health and disease; and, accordingly, in all manner of troubles, but especially in the case of loss of health, appeal is made for divine help. Originally, however, there existed no belief in special deities of healing. In *Od.* v. 397 the reference is quite general: 'the gods loosed him graciously from his trouble.' Every deity could properly exercise this power, so far at least as he was thought of as a deliverer, or as a protector against evil; though epithets like *σωτήρ*, *ἀλεξικακός*, etc., are not to be interpreted off-hand in a medical sense, for, as will appear from the following synopsis, they have usually quite a different meaning and reference. It may, in general, be taken for granted that at the outset the sufferer appealed simply to his family or tribal deity. It might seem to have been the most natural course to regard Apollo, the ancient god of pestilence, as a healing deity in the specific sense, but, in consequence of his extensive range of action, this did not take place—a circumstance due in part to the early incorporation of Asklepios in the Apolline group. The gods associated with incubation have a special affinity for the medical sphere (see 14, 15, 17–20 below), doubtless because of the mantic significance generally ascribed to dreams. Here also, however, other and for us mostly untraceable factors have operated towards specialization. Thus, e.g., Trophonios was never more than an oracle-deity in a general sense, while Amphiaraos, for reasons which we cannot discover, became, more specifically, a giver of healing oracles. In the case of Asklepios, the Gr. god of healing *κατ' ἐξοχήν*, we may probably find an explanation of his special function in his having become a son of Apollo, the god of oracles. But the contraction of his sphere of action was gradually arrested in the conflict of heathenism with the Nazarenes, and he becomes eventually the *σωτήρ τῶν δυν* (Aristides, Julian), and the centre of the universe (*CIL* vi. 1). Nevertheless, his principal emblem, the snake-coiled rod, remains to this day the specific symbol of medicine.

1. Zeus.—Zeus, the sovereign of the Greek pantheon, though early regarded as the sender of sickness (*Od.* ix. 411), seldom appears as a healing god. His common epithet, *Σωτήρ* (Preller-Robert, *Gr. Mythol.*⁴, Berlin, 1887–94, i. 151. 3, and O. Gruppe, in I. Müller, *Handbuch*, v. [Munich, 1897] 1108. 3), signifies the 'deliverer,' and has no traceable reference to disease—as, e.g., on the statue in the agora at Athens, dedicated to him as the 'deliverer' in the Persian troubles, and on the images with emblems of battle and victory, erected to him and Athena Soteira in the Piræus, to celebrate the restoration of Athens under Conon (H. Brunn, *Gesch. d. gr. Künstler*², Stuttgart, 1888 f., i. 270), just as the Zeus Soter and Artemis Soteira of Megalopolis signalize the achievement of Epaminondas (Paus. viii. 30. 10). The like holds good of the titles 'Ἀλεξικακός, Ἀπορροαῖος, Ἀρῆμιος, Περδῆσιος (cf. O. Weinreich, *Antike Heilungswunder*, Giessen, 1909, p. 41), and Ἐπῆκοος (*Ath. Mitt.* xxvii. [1912] 23). Whether the title Παῦς (in Rhodes [Hesych.]) bears a particular reference to Zeus as the queller of plague is a moot point (see below, 7). The stone on which Orestes was delivered from his madness was called *Zeús kapnōras*, i.e. *καρναίωτης* (Paus. iii. 22. 1); and we light at length upon the physician-deity in Ζεὺς Ἐξαεσθήρ (Solon, *ap.* Pollux, viii. 142)¹ and in the Ζεὺς Ὑψίστος to whom were dedicated the models of limbs in the Πνυξ (*CIA* iii. 150–156), and those in Melos (?) (Panofka, 'Heilgötter d. Griechen, in *ABAW*, 1843, p. 258), though we cannot definitely

identify the *θεὸς ὕψιστος* to whom similar dedications were made in Cyprus (*BCH* xx. [1896] 361). The fact that Zeus was assigned a 'lot' in the altar at Oropos (19 below) brings him within the scope of such healing activities. Evidence of the existence of incubation in the primitive cult of Zeus may possibly be recognized in the Dodonian *Σελλὰς* of Homer (*Il.* xvi. 235; see above, p. 542ⁿ).

2. Athena.—Athena, 'the best beloved and most congenial child of the heavenly father,' shares with him his somewhat vague relation to the healing function. Such of her epithets as some seek to interpret in a medical sense are in but few cases to the point. Thus the Zeus Soter and the Athena Soteira above referred to have to do with political matters, and the same is probably true of the oblation to these two deities and the children of Leto mentioned in Delian inscriptions (*BCH* vi. [1882] 22), as the Delians offered *soteria* also in Athens (*BCH* iv. [1880] 327). A *ναὸς κοινός* of Athena Soteira and Poseidon near Asea (Paus. viii. 44. 4) was associated with the auspicious home-coming of Odysseus. The application of the epithet in Mytilene (*IG* ii. 111) has not been explained, nor the Ἀθηνᾶ Ἀπορροαῖα (with Zeus Ἀπορροαῖος) in Erythrae (G. Dittenberger, *Sylloge*, Leipzig, 1883, no. 370. 70); but the Attic Ἀθηνᾶ Ἰλασμία in the inner (Paus. i. 2. 4) and outer (Plut. *Decem orat.* vii. 7) Kerameikos, and at the Oropian altar as a guest (19 below), bring her within the medical sphere. The Athena Hygieia worshipped on the Akropolis even before the Persian wars is also distinctively Attic (votive inscriptions of Euphronios and Callis, *CIA* i. suppl. 362, and *Ath. Mitt.* xvi. [1891] 154). Her altar and statue by Pyrrhos stood beside the Propylaea, and were ascribed by tradition to Pericles, to whom the goddess had in a dream revealed the remedy (the wall-herb *περίκλιον*) for a workman injured by a fall (Plut. *Pericl.* 13; Plin. xxii. 43). The votive inscription on the base, however, says that the work was dedicated, not by Pericles, but by the Athenians; and, as both the base of the statue and the altar are in some way related to the Propylaea, Wolters (*Ath. Mitt.* xvi. [1891] 153 ff.) believes that the occasion of their erection was the cessation of the great pestilence. All attempts to find the Hygieia of Pyrrhos among the extant statuary types of Athena, as, e.g., in the snake-entwined Athena on the base of the Barberini candelabrum (*Mus. P. Clement.* iv. pl. 16), have failed (Wolters, *op. cit.* 163). The 'Athena Hygieia' erected in the Epidaurian *hierion* by an Athenian of the Imperial period ('Εφην. ἀρχαιολ., 1886, pl. 12), representing her—strangely enough—as rushing to battle, is no blunder of some ignorant donor (Staës, 'Εφην. ἀρχαιολ., 1886, p. 253), but is really a derivative of the form assigned to Athena Hygieia, i.e. that which depicts her as the ancient Athena Polias brandishing her weapon. This form, as seen on prize vases for the Panathenaia (Springer, *Handb. der Kunstgesch.* i.⁸, ed. Michaelis, 1907, fig. 320b), has been manifestly used by Callis for his votive offering to Athena Hygieia (cf. *Ath. Mitt.* xvi. 154), and it seems to have been as far as possible adhered to in the statue of Pyrrhos. The Attic Athena Hygieia, accordingly, had no distinct type of its own, but simply reproduces the Athena Polias, who, on the occasion of an earlier pestilence, probably that of 500 B.C. (*CIA* i. 475), had hurried to the help of her city. If the Arcadian Athena Alea is connected philologically, not with 'heat' (O. Müller), but with 'protection' (Rückert), it would serve admirably as evidence for the right of sanctuary in her temple at Tegea, but would afford no proof of her being regarded as a goddess of healing. The ancient idol of Endoios is certainly flanked by statues of Asklepios and Hygieia executed by Skopas (Paus. viii. 47. 1), but this

¹ The Ζεὺς Ἀνακτορ at Lepreum (Paus. v. 5. 6), which Gruppe, *op. cit.* 1269, 3, connects with λένχη, 'leprosy', is ruled out by the obvious emendation Δύκατος (Curtius, *Peloponnes*. II. [1882] 117).

joint cult need not be earlier than the time of Skopas himself (Dümmel, in Pauly-Wissowa, ii. 1976). Nor, finally, does the statue of the Eileithyia—in the position of a parturient woman—in the temple of Eileithyia at Tegea, and popularly known as *Αἰγὴ ἐν γένεσιν* (Welcker, *op. cit.* iii. 185), afford any evidence for the Tegean cult of Athena. The title 'Τρεπόδεια under which Athena (together with Zeus' Τρεπόδειος) was worshipped, according to Steph. Byz., s.v. 'Τρεπόδειον, in Lesbos may be understood quite generally as referring to the divine hand held protectively over one. A like uncertainty attaches to the σῶτρεψα ἐπηκοός in a Cappadocian inscription (BCH xxxiii. [1909] 131; cf. Weinreich, in *Ath. Mitt.* xxxvii. [1912] 11). The title Optiletis met with in Sparta and said to refer to a cult founded as ἀκέως χαριστήριον by Lycurgus (Plut. *Lyc.* xi.; Paus. iii. 18. 2) has undoubtedly a medical connotation. Gruppe (*op. cit.* 1204) quite unwarrantably infers the existence of incubation in the cult of Athena from Pind. *Ol.* xiii. 56 (Bellerophon) and Paus. ix. 34. 1 (Iodama).

3. Helios.—The links which connect Helios with health and medicine are fewer than the affinity between the ideas of light and life might lead us to expect. As he punishes by inflicting blindness (Soph. *Oed. Col.* 868), so he restores sight to Orion (Hesiod, *ap. pseudo-Eratosth. Kataster.* 32), and is therefore invoked by Polymestor (Eur. *Hekub.* 1067). His cult yields no evidence here; the invocation 'Ιερᾶν in Timoth. fr. 13 (Bergk) comes from a battle-song, while his title Soter in Megalopolis belongs to the age of syncretism (Paus. viii. 31. 4). It is worthy of note that Hermippos (schol. Aristoph. *Plout.* 701) speaks of the Heliad Lampetia as the wife of Asklepios—a detail which, as the present writer thinks (Roscher, iii. 1489), goes back to a Rhodian (in reality a Sicyonian) source. Circe, the daughter of Helios, and Agameme and Medea, his grand-daughters, are sorceresses skilled in herbs; and the Heliad Pasiphaë likewise was proficient in magic (Apollod. iii. 15. 1). For the herb-lore of the wise women, cf. Welcker, *op. cit.* iii. 20 ff.

4. Poseidon.—Poseidon's only link with healing is his having been worshipped as 'Ιατρός among the Tenians (Clem. Alex. *Protrept.* 26). It is very curious that in the 'Ιαίου πρόδρομος the warrior-physicians Machaon and Podaleirios, who are everywhere else regarded as Asklepiads, are spoken of as sons of Poseidon. The verse in question is in a corrupt state—αὐτὸς γὰρ σφιν ἔδωκε πατρὸς ἐνοσίγαιος ῥεσσιῦ—and Welcker (*Ep. Cycl.* ii. [Bonn, 1849] 525) proposes the emendation . . . πατρὸς νοσητῆρα πασιόν. Wilamowitz (*Isyllos*, Berlin, 1886, p. 47), however, in view of the local cult of Poseidon at Tenos, maintains the view of their descent from that deity, and the present writer expressed agreement therewith in Pauly-Wissowa, ii. 1658. But the question has meanwhile been discussed afresh by Lefort (*Musée belge de Phil.* ix. [1905] 215 ff.), who decides against Wilamowitz and in favour of Welcker; and rightly so, as the scholia to *Il.* xi. 515 cite the *Porthesis*, not with reference to the genealogy of the two warriors, but in order to establish the medical proficiency of each. Moreover, a corruptly transmitted verse does not warrant us in rejecting the constant tradition of their descent from Asklepios. To Lefort's arguments might be added the testimony of Aristides (l. 78 D): 'Their connexion with Asklepios is affirmed throughout the whole world.'

5. Aristaios.—Aristaios was an ancient Thesalian deity akin in character to Zeus and Apollo (Pind. *Pyth.* ix. 84), and was worshipped in Ceos as Zeus Aristaios and Apollo Nomios (schol. Apoll. Rhod. ii. 498). Having been reduced to the rank of hero by the poetry (*ἔξω*), he becomes the son of Apollo and Cyrene the Lapith nymph, and the

pupil of Cheiron (Apoll. Rhod. ii. 510). Various benefits in the sphere of husbandry, and also—as a gift of the Muses—the arts of medicine and divination, were ascribed to him (*ib.* 512). He was said to have taught the Ceians how to ward off the baneful influence of Sirius by expiatory sacrifices and the clashing of weapons (Theophr. *de Vent.* 14). Pherecydes calls him the son of Paion (schol. Apoll. Rhod. iii. 467), but this name is to be understood here as a designation of Apollo, and not as the eponym of the Pæones (Gruppe).

6. Cheiron.—A signal contrast to Aristaios, the representative of magic healing, is found in the local deity of the herbiferous Mt. Pelion, viz. the Cronid Cheiron, the representative of pharmacognosis, which forms a transition from the sphere of the occult to rational therapeutics. His name has been traced to *χελρ*, either as the 'hand' skilled in art (Welcker, *Kl. Schr.* iii. 1; H. Usener, *Götternamen*, Bonn, 1896, p. 157; Escher, in Pauly-Wissowa, iii. 2302), or as the 'hand' applied to the sick with magic effect (Weinrich, *op. cit.* 16). Tradition speaks more distinctly of his pharmaceutical than of his surgical achievements; in *Il.* iv. 219 and xi. 832, Asklepios and Achilles respectively receive from him *ἥρια φάρμακα* efficacious for relieving pain or staunching blood, and, on the whole, the art of the warrior-surgeons in the *Iliad*, as being free from the accessories of magic, is an inheritance from Cheiron. In a tribe dwelling near Mt. Pelion, and claiming descent from Cheiron, herb-lore was handed down from father to son as a mystery (Dicæarch. fr. 60. 12), and the Magnesians sacrificed to him, as the divine physician, the first-fruits of herbs and plants (Plut. *Quæst. conviv.* iii. 1. 3). In the Pelethronion, a district near Mt. Pelion, grew the far-famed *χελρῶρεον* (Theophr. *Hist. Plant.* ix. 7), or *κεντραίρεον* (schol. Nicand. *Ther.* 565), the miraculous virtues of which, when applied by a deity, are indicated by its having been called *ῥάναξ*. Such panaceas were ascribed also to Asklepios and Herakles, and were even adopted by non-religious medicine, though in the form of actual plants with curative properties. The Egyptian physicians likewise were acquainted with panaceas (*Pap. Ebers*, p. 173, ed. Joachim), but, in keeping with their liking for mixtures, compounded them of various ingredients. Cheiron's medical functions, as handed down by tradition (collected in Pauly-Wissowa, i. iii. 2304), are summarized in the curriculum of his pupil Asklepios given by Pindar (*Pyth.* iii. 45), as surgery, internal medicine, and incantations (*ῥαοῖδα*). The last-named were not, of course, used by themselves alone, but were simply a magical adjunct (cf. *Od.* xix. 457), as in Bab. and Egypt. medicine.

7. Paieon.—Paieon, the Homeric physician of the gods, heals the wounds of Hades and Ares by *φάρμακα δδνρήματα* in *Il.* v. 401 and 900 respectively, but in *Od.* iv. 232 he comes into touch with the human race as the ancestor of the Egyptian physicians. He is not to be confused with Apollo.¹ The two deities are explicitly distinguished by Hesiod (fr. 194 [Rzach]) and Solon (fr. 13. 45). Usener (*op. cit.* 153) is thus certainly justified in recognizing Paieon as an ancient and independent god of healing, but he has not succeeded in finding any trace of this deity in Greek religion, as the 'signum Pæanian' in the Asklepieion at Syracuse (Cic. *in Verr.* ii. iv. 128) is a figure of Apollo (Eisele, in Roscher, iii. 1246). The votive inscription Παῖωνες ἐν ἄλσσι found by Herzog in Cos (*Archæol. Anz.*, 1903, p. 198) refers either to Asklepios or to Apollo, who likewise was worshipped there.

¹ Hereafter referred to as RE.

² This identification was wrongly read into *Od.* iv. 232 by Orates and Zenodotus, whose view was impugned by Aristarchus; cf. Lehrs, *Aristarchus*, Leipzig, 1866, p. 179; Ladwich, *Aristarchus homer. Textkritik*, do. 1894-95, l. 541.

8. Apollo.—Apollo is a very intricate figure, and the various explanations of his name have not as yet furnished the key to his original character. This is true even of the most recent attempt—that of Usener (*op. cit.* 309), who recognizes the 'depulsor malorum' in an assumed primary form *Ἀππελλος*. In Homer, Apollo has as yet no connexion with medicine, though he is certainly the sender and stayer of pestilence (*Il.* i. 43 ff.), and the chant of entreaty addressed to him is called a *παῖων* (*i.* 473), which is simply the name of the physician of the gods just dealt with. This may be formally accounted for by the fact that the refrain of the chant was *ῥη παῖων*, but the uncertain meaning of the word renders it difficult to discover the material ground of the usage. If the word signifies 'cleanser' (Skr. *paujanan*; Pictet, in Kuhn's *Zeitschr.* v. [1856] 40), its employment as an invocation to the queller of pestilence would be satisfactorily explained. As an epithet of Apollo it occurs also in the *Hymn to Apollo Pythian*. 94 (*Ἰηπαῖον*); subsequently the form used was simply (*Παιῶν*) *Παιών*, or *Παιῶν*. At first, and for centuries, the expedients used to counteract pestilence were purely theurgical—consultation of a *μάντις*, *ιερεὺς*, or *δνειροπόλος* (*Il.* i. 62), sacrifice, and *psan* (*i.* 447 ff.); instances for a later period are given by Welcker (*Kl. Schr.* iii. 33 ff., 'Seuchen von Apoll'). The device of Empedokles in directing the river Hypanis into a half-dried lake is notable as an early example of a rational remedy (Diog. Laert. viii. 2, § 70, and coins of Selinus in B. V. Head, *Historia Numorum*², Oxford, 1911, p. 168). The conception of Apollo as the god of pestilence probably rests on the solar aspect of his character. He was worshipped at Lindos specifically as *Δολιμος* (Macr. *Sat.* i. 17. 15). In this relation he is the one who punishes—the death-god; and here his sister Artemis is associated with him (Niobids, Coronis). On the other hand, his benignity as the stayer of plagues finds expression in such epithets as *Οὔλιος* (also at Lindos [Ross, *Inscr. gr. ined.*, iii., Berlin, 1845, no. 272], in Delos, and at Miletos [Strabo, 635]), which G. Curtius connects with *salvus*; *Ἐπικούριος* (in Bassae [Paus. viii. 30. 4]); *Ἀλεξίκακος* (in Athens [statue by Calamis, Paus. i. 3. 4], where, instead of the great plague, we should think of some earlier epidemic); *Ἀκτίσιος* (in Elis, Paus. vi. 24. 6), and *Ἰπποειαντήρ* (in a Clarian oracle [Weinreich, *op. cit.* p. 150]). But the Paian was also a chant of battle and victory (*Il.* xxii. 391; *Hymn to Ap. Pyth.* 339; Thucyd. vi. 32, etc.), and thus Apollo acquires a sphere of action far transcending the domain of pestilence—that, namely, of the averter of evil in general, as implied in the titles *Ἀποτροπαῖος* (Aristoph. *Vesp.* 161; *CIG* 464) and *Σωτήρ* (refs. in *RE* ii. 69). The epithet *Ἰήσιος* (Soph. *Œd. Tyr.* 1095) is not, as the Stoics thought, a derivative of *ἰάσθαι*, but is taken from the refrain of the Paian in its longer form, *Ἰήσιος Παιῶν* (*ib.* 154), and has therefore as wide a connotation as the latter. Now, though the more extensive sphere of 'deliverer' might very readily have been contracted to the narrower one of 'physician,' our available evidence of the process is but scanty. The Delphic god, it is true, delivers oracles for arresting pestilence, but, as regards his being consulted in any particular case of disease, the present writer can recall only the instance of Alyattes (Herod. i. 19), and the curious prescription (an amulet of worms from a she-goat's head) given by the Pythia for epilepsy (Alex. of Tralles, 569 [Puschmann]). The reason why Apollo did not become the physician is to be found in the fact that Asklepios was conjoined with him at a relatively early period (cf. 20 below), and the healing function could accordingly be delegated to the latter. Thus, in the heading of the Epidaurian *iamata*, Apollo, as the sovereign authority, is named

first—though he does not intervene in the actual cures; while Asklepios—as a departmental chief, so to speak—occupies the second place; so also in the 'Hippocratic' oath: *ὁμνυμι Ἀπόλλωνα ἱγέρων και Ἀσκληπιόν, κτλ.*

A cult confined to *Ἀπόλλων Ἰατρός* is found only in the Milesian colonies of the Scythian region (*RE* ii. 54; Farnell, *CGS* iv. 325 and 409), and here the worship of Asklepios sank completely into the background, the only Asklepieion known to the present writer being that of Pantikapaion (Strabo, 74). Apollo is sometimes called *Ἰατρός* in the poets (Aristoph. *Aves*, 584; *Plout.* 11). His title *ιατρώμαντις* in Aesch. *Eum.* 62 relates to the case of Orestes, and thus denotes, not the physician, but the *καθάρσιος*. Late writers speak of Apollo as the founder of medicine, but as having handed it over to Asklepios for its further development (Diod. Sic. v. 74; Philostr. *Vit. Ap.* iii. 44). Isolated indications of his medical activity are found in the cults of the *Κόρυδος* (Paus. iv. 34. 7; cf. *RE* ii. 57), *Ἱππερελεύτης* (Laconia; cf. *Ἐφημ. ἀρχαιολ.*, 1884, p. 81 ff.; *BCH* ix. [1885] 243), and *Ἰτακός* (Cyprus; *Comment. in hon. Mommseni*, Berlin, 1877, p. 682). As a guest at the Oropian altar (19 below), *Ἀπόλλων Παιών* was likewise regarded as a god of healing.

8a. Maleatas.—The name 'Maleatas' is, as regards its form, a geographical or ethnological adjective, and needs to be supplemented by a *nomen proprium*. Farnell (*op. cit.* iv. 236 f.) would accordingly supply the name 'Apollo' in all cases where 'Maleatas' is used by itself to designate the deity invoked, as, e.g., in two archaic votive inscriptions from Laconia (*IGA* 57, 89). This view, however, is in conflict with the fact that Maleatas and Apollo are mentioned side by side in the sacrificial rubric found in the Piræus (*CIA* ii. 1651), of which Farnell gives a somewhat forced explanation. It will therefore be more in accordance with the data to recognize, as Wilamowitz (*Isgyll.* 98 ff.) does, in Maleatas a deity originally distinct from Apollo. The identification of the two is attested as regards Sparta (Paus. iii. 12. 8: *Ἀπόλλων Μαιεύτης*), the Epidaurian *hierion* (*ib.* ii. 27. 7, and several inscriptions, *IG* iv. 932, etc.), and the Asklepieion of Trikke (*IG* iv. 950. 29). If this identification was a later development, it was probably effected in Epidaurus, where Asklepios would form the connecting link. Gruppe (*op. cit.* 189. 3) is hardly successful in explaining (on the ground of Hesych.: *μάλιον . . . ἥσυχον, πραΐον*) Apollo Maleatas as the 'gentle Apollo,' or in locating his place of origin, as also that of Asklepios, at Gortyna in Crete.

9. Artemis.—For the function of Artemis as a death-goddess associated with Apollo, cf. the preceding; in this capacity her special victims are females (*Il.* xxi. 483, vi. 205, 428; etc.). Gruppe (*op. cit.* 1269, 1273. 4) regards her as having been the source of psychical and nervous disorders. The other aspect of this activity is her having been the restorer of those so afflicted, as, e.g., Orestes (Pherec. fr. 97), and the Proetids (Bacchyl. x. 98). In gratitude for the cure of the latter, their father erected in her honour, as *Ἡμέρα* and as *Κορία*, temples in Lusi (Callim. *hymn. Art.* 234)—a point so far borne out by the ordinary myth of the Proetids (Pausanias), which relates that the maidens were cured by Melampous (B. 5, below) in the Artemision of Lusi. Lusi is the only healing-shrine assigned by tradition to the goddess (cf. the Report of excavations in *Oesterr. Jahreshften*, iv. [1901] 1 ff., which includes several dedications to *Ἡμέρα*, p. 83 f.). Her connexion with healing fountains, however, is attested by the epithet *Θερμιαία* (Mitylene [*CIG* 2172, etc.], Cyricos [Aristid. i. 603D], and Rhodos [*IGIns* i. 24. 4]). The panelling of the ancient Artemision of Ephesus

contained votive models of limbs in gold, silver, and ivory (Hogarth, *Excav. at Ephesus*, London, 1908, pp. 232, 238). Cf. also her title 'Επτήκοος (*Ath. Mitt.* lxxvii. [1912] 7 ff.). Her obstetric function is indicated by the titles Λογέλα (Gambreion, *CIG* 3562), Σωδία (Cheronea, *IGS* i. 3407), and ΕΙΔελθία (especially in Boeotia); cf. Wernicke, in *RE* ii. 1347. 10, who, however, wrongly regards ΕΙΔελθία as the hypostasis of Artemis, while it was really an epithet of Hera, and, as personified (Preller-Robert, i. 511 ff.), still remains closely connected with her. Similarly, Μυλίστρα (Bab. *Muallidtu*, 'she who brings about childbirth') is an epithet of Ištar (cf. Schrader, *KAT*³, p. 423. 7). The Heb. *yôledeth* (Oefeel, in Neuburger-Pagel, i. 70) is merely an artificial form designed to explain ΕΙΔελθία.

10. **Healing Nymphs.**—(a) As presiding over medicinal springs: (1) the Ἰωνίδες (Paus. vi. 22. 7), Ἰωνίδες (Nicand. *ap. Athenæus*, 683), or Ἰωνίδες (Strabo, 356)—connected with ἰάσθαι—nymphs of a healing fountain in Elis, and forming a tetrad, viz. Πεγαία, Καλλιφραία, Συναλλaxis (probably a personification of the change towards recovery), and Ιασις (cf. Hesych. *s.v. ιαροί*); (2) the Anigridian nymphs, so named from the warm sulphur-springs on the lower Anigrus in Triphylia (Strabo, 346; Paus. v. 5. 10; Curtius, *Peloponn.* ii. 80), and having to do especially with skin-troubles—here we should note the combination of theurgy (prayer and vow) with rational remedies (bathing in a mineral spring); and (3) the nymphs of the alkali springs of Ischia (*IG Sic. et Ital.* 892 f., the votive offering of a physician).

(b) We have more numerous instances of the case where the refreshing properties of ordinary natural springs gave rise to the cult of local nymphs, generally in connexion with the worship of Acheloo as the father of all fresh-water springs. In their hygienic capacity these nymphs appear, together with Acheloo, as guests at the altar of Oropos (19 below).

11. **Pan.**—Pan, the Arcadian mountain and forest spirit, like his Italic counterpart Faunus, possessed nantic powers. He had an oracle in the Lykaion (schol. Theocr. i. 121), and another in the Akakesion, with the nymph Erato as his *προφῆτις* (Paus. viii. 37. 12). He received the title *Λυρήριος* in Troezen, because he stayed a pestilence by means of dream-oracles (*ib.* ii. 32. 6), but he healed men also in the waking state (Kaibel, *Epigr. gr.*, Berlin, 1878, p. 802). In the Asklepion at Sicyon, the porch was flanked by figures of Pan and Artemis (Paus. ii. 10. 2). With reference to the healing powers of Pan Ephialtes (in the mid-day sleep), see Roscher, iii. 1400. The epithet Πανάρ is applied to him only in *Orph. hymn.* xi. 1. In conjunction with nymphs, Acheloo, and Kephisos, he represents the hygiene of Nature at the altar of Oropos (19 below).

12. **Hermes.**—In the case of Hermes definite traces of the healing function are scanty. The titles Soter (Amorgos; *Ath. Mitt.* i. [1876] 332) and Alexikakos (Aristoph. *Paz.* 422) are applied to him in quite a general sense. The meaning of Ἀκκῆτρα (*IL* xvi. 185, *Od.* xxiv. 10, Hes. fr. 23 [Rzach]) is disputed (cf. *Etym. Magn.*, *s.v.*); if derived from ἀκείσθαι (schol. L to *IL* xvi. 185 explains it by *θεραπευτικός*), it would be a specifically medical epithet, but this is scarcely conceivable with so ancient a designation; perhaps the word means 'the averter of evil' (ἀ-κῆκ-τρα). Hermes Kriophoros was worshipped in Tanagra as the queller of pestilence, and in commemoration of his good services a youth carried a ram round the walls at his festival there (Paus. ix. 22. 1). The propitiatory action of Hermes survives in this custom, and accordingly the beautiful conception of the 'good

shepherd' derives its origin from a cathartic rite. Hermes is the Ἥρῳπρ δνελωρ in Hœm. *Hymn to Hermes*, 14, and the god of sleep in general (Preller-Robert, i. 404), though it cannot be proved that incubation had a place in his cult. As the god of the palaestra and the gymnasium, he was the guardian of health; and it was perhaps on this account that Hygieia was in some source represented as his wife—a detail which Cornut. 16 too artificially explains by reference to his eloquence.

13. **Herakles.**—'Born to avert the curse from gods and men' (Hes. *Scut.* 27), Herakles is pre-eminently the Alexikakos. In schol. Arist. *Ran.* 501 the image of Alexikakos, by Ageladas, in the demos of Melite is associated with the great plague, instead of with the pestilence of 500 B.C. (Robert, *Arch. Märchen*, Berlin, 1856, p. 39) or the Persian invasion (Studniczka, *Röm. Mitt.* ii. [1887] 91. 21). The shorter form Ἀλεξίς was current in Cos (Aristid. i. 60); in Delos and Amorgos he was worshipped as Ἀπαλλὰξικακός (*BCH* vi. [1882] 342, xvi. [1891] 671). Herakles Soter is found in tetradrachmæ in Thasos (Head, *Hist. Num.*³, p. 266, fig. 164). Herakles acts specifically as a healing deity in Hyettos (Paus. ix. 24. 3), Erythræ (*ib.* vii. 5. 5), and Messana (Aristid. i. 59 D); he is the guardian-spirit of warm springs (as, e.g., at Thermopylæ, Herod. vii. 176), and has a share in the Oropian altar (19 below). The *πράναιες* Ἡράκλειος was named after him (Theophr. *Hist. Plant.* ix. 7; schol. Nic. *Theor.* 626; *Diosc.* iii. 48).

14. **The Dioscourai.**—The widely diffused cult of the Dioscourai as Soteres is sometimes connected with navigation (*Hœm. hymn.* 33, Theocr. xxii. 6), sometimes with succour in war (as, e.g., to the Locri on the Sagra [Justin, xx. 2 f.]), and even with the restoration of freedom (the device Σωτήρες on coins of Tyndaris is so explained by Head, *op. cit.* p. 189). They saved their protégé Simonides when the palace at Crannon collapsed (Callim. *ap. Suid.* *s.v. Σιμωνίδης*). The healing of Phormio the Crotonian at Sparta by one of the Dioscourai (Theopompus *ap. Suid.* *s.v. Φορμιών*) is a replica of the cure of Telephus by Achilles. The Dioscourai engaged in a regular practice of healing in their temple at Byzantium (*PHG* iv. 149, 156). The means adopted seems to be incubation combined with interpretation of dreams. Deubner (*de Incub.* 76 ff.) concludes from schol. Pers. ii. 56 that this was the case both in their sanctuary at Rome and in that at Byzantium, and, further, that in both localities their function was inherited by Kosmas and Damian, physicians and martyrs. Cf., however, below, p. 555*, note 4.

15. **Dionysos.**—Apart from the epithets of general signification (Σωτήρ or Σώων, Paus. ii. 31. 6, 37. 2; *IG* iv. 1277; and Πανάρ, Eur. *Lik.* fr. 480, Dindorf; 'Pæan of Philodamus,' *BCH* xix. [1895] 391, xxii. [1898] 513) applied to Dionysos, he was worshipped specially as Ἰατρός and Ὑγιάτης by command of the Pythia (Athenæus, 22 and 36; Plut. *Quæst. conv.* iii. 2). As Βοηθὸς νόσων he presided over the dream-oracle at Amphikleia, where his priest, as *πρόμαντις*, *χρᾶ ἐκ θεοῦ κάτοχος*, i.e. just as the Pythia did (Paus. x. 33. 11). It is thus clear that in this sanctuary the priests were concerned with incubation and dream-reading, as in the Plutonium near Nysa (cf. 17 below). As regards the healing power of Dionysos conveyed by touching (Διόνυσος Ἐπάφιος in *Orph. hymn.* 50. 7), see Weinreich, *op. cit.* p. 27.

16. **Demeter.**—Demeter, worshipped as *κουροτρόφος*, was proficient in the magic of the nursery (*Hœm. hymn.* iv. 227 ff.; *οὐδοῦμοιο*, v. 229, a brilliant emendation by Th. Bergk, *Gr. Literaturgesch.* Berlin, 1872–84, i. 801. 35), and in the fire-baptism which imparted eternal youth (v. 235 ff.), but the indications of her healing function are few.

In Patrae she had a *hydromanteion*, in which, however, she did not prescribe remedies, but simply revealed whether the sick would die or recover (Paus. vii. 21. 12). To cite Artemid. ii. 39 as a proof of her iatric activity (Preller-Robert, i. 764. 2) is unwarranted, as this passage deals only with rules for dream-reading, while in *Orph. hymn.* 40, she is in a quite general sense the original donor of peace, law, riches, and health. To connect the device 'Tylos' found beside the beautiful head on Metapontine coins (reproduced in Roscher, i. 2780, from the *Cat. of the Brit. Mus.*) with Demeter (Sallet), again, is precluded by the youthfulness of the head. In the medical domain, accordingly, all that we can concede to her is the function of Ophthalmitis; the three references to this are dealt with by Rubensohn, *Ath. Mitt.* xx. [1895] 360 ff., and on p. 365 her connexion with Asklepios in Epidauros, Athens, and Eleusis is correctly adjudicated. For the female breasts upon marble blocks from her temple in Cnidus, see C. T. Newton and R. P. Pullan, *Discoveries at Halicarnassus*, London, 1862-63, i. pl. 58.

17. Hades-Pluto.—The dream-oracle in the Plutonium near Nysa on the upper Mæander (Strabo, 649; Eustath. *ad Dionys. Periegetem*, 1153) is of great importance in the history of Gr. religious medicine. Here of *Ἐμπνεῦσι τῶν λεγόντων* incubated on behalf of the sick in a cave filled with earthy vapour—the *Χαρώμενοι*—and regulated their curative treatment by the dreams received in the ecstatic trance. In many cases they let the patients themselves sleep in the cave for a few days without food, but, even if an invalid was favoured with a dream, the priests still acted as *συμβουλοὶ* and *μυσταγωγοί*. In the Plutonium, therefore, the task of interpreting dreams devolved exclusively, and that of incubation generally, upon the priests. Such, however, was exactly the characteristic feature of the Bab. dream-shrine, which, as we saw above (p. 542*), was the prototype of the Gr. institution. Higher up the Mæander valley, near Hierapolis, was another Plutonium, having a cave pervaded by even more potent exhalations, which only the Galloi could safely approach (Strabo, 630). Whether incubation was resorted to here as well Strabo does not definitely say, but Pausanias (x. 32. 13) states that dream-shrines of the subterranean deities were to be found in several cities of the Mæander valley. From an inscription of the Imperial period (in Heuzey, *Miss. archéol. de Macédo.* ii. [1876], Inscr. 120) we may assume that incubation was practised in a Plutonium at Eana in Macedonia. A miraculous cure wrought by water from the altar of Dis and Proserpina is related by Valerius Maximus (ii. 4. 5).

18. Sarapis and Isis.—Sarapis was a syncretistic creation of Ptolemy I.—a fusion of Hades-Pluto with Osiris and a Bab. deity whom Arrian and Plutarch designate *Σάραπις*, and in whom Lehmann-Haupt (most recently, 1910, in Roscher, iv. 340) recognizes Ea, 'king of the ocean-depths' (*sar apsi*), the early Bab. god of oracles and healing. The Bab. name was adopted by the Egyptians in the form *Serapis*, in which they discerned their own *wesjr hapi* (Osiris-Apis), i.e. the dead Apis who had been zealously worshipped from the time of Psammetichus. The distinctive feature of the Ea-cult—the healing oracle obtained by incubation—was retained by the new Alexandrian deity, who thus became a powerful rival of the similarly endowed Asklepios. This rivalry he shared with Isis, who became closely allied with him, and who in the Egyptian period had been a healing goddess, though without incubation—an institution unknown among the Egyptians (see above, p. 541 f.). Sarapis and Isis then spread their conquests over the entire Hellenistic and Roman

world, carrying with them the assiduous cultivation of the dream-oracle. The sources used by Artemidorus (ii. 44) preferred before all other oracles the dreams vouchsafed by these two deities. Here the essential thing was the interpretation of the prescriptions so given (*συνταγὰι*), though, as we might expect, miracles of direct healing (*θεραπείαι*) were not wanting; the Greek words are the technical terms used in the aretalogical literature. For the healing functions of Sarapis and Isis, see Weinreich, *op. cit.* 117 ff., with *Ἐκκῆρσι* iii. on Artemid. iv. 22. Of the much-frequented Serapeion in Canopus, Strabo (801) writes that persons incubated there not only on their own behalf, but also on behalf of others, and that records were kept both of the *θεραπείαι* and of the *ἀρεταὶ τῶν ἐνταῦθα λογίων* (i.e. *συνταγῶν*); the redactors of the Epidaurian *ἱεράτα*, as we saw, had eyes only for the former. Models of restored limbs offered to Sarapis and Isis (cf. Tibull. i. 327) are of frequent occurrence (cf. Drexler, in Roscher, ii. 526 ff.). A relief from Thebes (Rangabé, *Ant. Hellén.* ii. [1855] 778, no. 1213) with the inscription *Εὐδοία Εἰσὶν εὐχῇ* depicts a youth on a *κλίνη*, three nymphs dancing beside it, and, in the background, a bearded head on a larger scale (Acheloois)—probably a thank-offering for a water-cure prescribed by Isis (cf. 10).

The three chthonic gods, Amphiaraos, Trophonios, and Asklepios—the incubation-deities *par excellence*—are all closely related to Hades. Of these, however, Trophonios may be passed over here, as he shows no special development on the medical side. Amphiaraos and Asklepios, on the other hand, became healing gods in a specific sense—both, it is true, being reduced in epic poetry to the level of heroes, but maintaining their divine dignity in the cultus. Amphiaraos, as a result of his being confined to a locality, never gained any extensive sphere of influence, while the beneficent hand of Asklepios reached as far as did the influence of Greek and Roman culture.

19. Amphiaraos.—The Greek epic makes Amphiaraos a hero of Theban-Argive legend, and a descendant of the seer Melampous (below, B. 5), but even as such his originally divine (chthonic) nature finds expression in the circumstance that he was at death translated to the under world (Pind. *Nem.* ix. 24). He presided over the sanctuary of Oropos. The high regard accorded to this dream-shrine is shown by its having been consulted by Cræsus and Mardonius (Herod. i. 46, 52, viii. 134). The curative procedure of this Amphiareion, which, it is true, was as bitterly satirized by Aristophanes in his *Amphiaraos* (presented 414 B.C.) as was that of the Asklepieion in his *Ploutos* (408 and 388 B.C.), formed the central feature in the activities of the sanctuary. The code of regulations (*IG* vii. 235) fixes the client's fee at one and a half drachmæ, and makes mention of a *koineterion* with two separate apartments beside the altar. An incubation-hall of later date, situated at the theatre (P in Dürrbach's map, reproduced in *RE* i. 1895) was similar in design to the *ἄβατος* of Epidauros. The visitor, after a period of fasting—in order to receive the oracle with a clear soul' (Philostr. *Vit. Apoll.* ii. 37)—and the sacrifice of a ram, prepared himself for the intimation of the god by sleeping on the hide of the animal sacrificed (Paus. i. 34. 4, 5). We thus see that Amphiaraos performed his cures, not by direct miracles during incubation (as in the redaction of the Epidaurian *ἱεράτα*), but by means of dream-oracles, which were, of course, submitted to the judgment of the dream-reader. An important factor in the treatment was the *λειτουργία*, with separate compartments for men and women (*IG* vii. 4255)—which is often referred to from the days of Aristophanes and Xenophon (*λειτουργία* 'Δμφ.). The fountain of Amphiaraos, to the south of the altar

(F in map), was investigated by the physicians Erasistratos and Euenos (Athenaeus, 46)—a fact which indicates that it was used for therapeutic purposes, and not, as Pausanias says, only as a receptacle for thank-offerings of gold and silver coins. Models of restored limbs are mentioned in *IG* vii. 303, 87 ff., and 3498.

The great altar (D), according to Pausanias, contained five *μοῖραι*, by which almost everything connected with healing in Attic religion was brought into relation with Amphiaraos. The third *μοῖρα*—the principal division—belonged to the god himself, to his son Amphilochos, together with Hermes (as *ἡγήτωρ δειπνῶν* [?]) and Hestia (probably as the domestic goddess of Amphiaraos). The *σύμβουμοι* were associated as guests with the other parts as follows: Herakles, Zeus, and Apollo Paion (cf. the Delphic oracle in Demosth. *Mid.* 53) with the first; heroes and heroines with the second; Aphrodite (*CIA* iii. 136; *εὐάντης λατρίῃ*), Panakeia-Iaso-Hygieia (representing the Athenian Asklepieion), and Athena Paionia (Kerameikos), with the fourth; and nymphs, Pan, Acheloo, and Kephisos (cf. 10 (b) above) with the fifth. It is quite certain that Iaso was here regarded as a guest (cf. the present writer's observations [Roscher, iii. 1486] in opposition to Usener). Aristophanes, in the *Amphiaraos*, speaks of her as a daughter of the Oropian deity, but in the *Ploutos* as the daughter of Asklepios; and as such she appears also upon a relief from the Asklepieion (*Ath. Mitt.* xvii. [1892] 243). Hygieia is first found in connexion with Amphiaraos in inscriptions of the 1st cent. B.C. (*IG* vii. 372. 412), and was therefore at that period no longer a mere guest, but a joint-possessor of the sanctuary. The healing god of Oropos had a subsidiary institution at Rhamnous (Mela, ii. 3. 6; and excavations [Δελτίον, 1891, p. 116], which have yielded a relief representing Amphiaraos attending upon the sick).

Alexida, the daughter of Amphiaraos, is associated with the medical function by her very name. In Argos, her descendants, the *Ἐλάσιοι* ('expellers'), were regarded as healers of epilepsy (Plut. *Quest. Gr.* 23).

20. Asklepios.—Considerations of space render it impossible here to treat of Asklepios in such detail as is due to the chief god of healing among the Greeks. The writer must, therefore, be content to emphasize some of the more salient points, and for the rest to refer to his more exhaustive artt. in Roscher, 'Asklepios' (1884), 'Hygieia' (1889), and 'Panakeia' (1902), and also the art. 'Asklepios', in *RE* ii. [1896] 1642 ff., and 'Epione', *ib.* vi. [1906] 186 ff. The 181 localities connected with the cult of Asklepios (*ib.* ii. 1662 ff.) are only a selection from among the 410 which the writer had at his disposal, and which form a still more effective testimony to the enormous expansion of the cult.

i. *The origin and earliest spread of the cult, and the intrusion of Apollo.*—The earliest history of the cult has been distorted under Delphic influence, but may be reconstructed from the extant fragments. The name 'Asklepios' was traced by the Epidaurian writer Isyllos (3rd cent. B.C.) to *Ἀγλή* ('*Ἀσγλή*') (*IG* iv. 950, line 51). Von Wilamowitz (*Isyll.* 93), combining this word with the Apollo *Ἀσγλάδρας* of Anaphe, proposes the primitive form *Ἀσγλαπίδης*. Gruppe (*op. cit.* 1442 ff.) agrees with this, but believes that we have in Asklepios a confluence of two distinct personages—the one a light-god, *Asgl-apios* ('mild radiance'), connected with Apollo, and belonging originally to Gortyn, in Crete, the other an earth-god in the form of a snake (this is Welcker's explanation of the name, from *δοκίλαβος*), who became fused with the light-god in Boeotia and Phokias. The present

writer cannot accept these theories, and, refraining from etymological experiments, would only emphasize the originally chthonic character of Asklepios. This is indicated, indeed, by the facts that the leading symbol of Asklepios was the snake, that incubation was a characteristic feature of his worship, that a residue of the chthonic ritual (*δόλκαρα*) survived at Titane, an ancient centre of his cult, and, finally, that he had a double in Trophonios, the cave- and oracle-deity of Lebadeia, who was once identical with Asklepios, but was detached from him at an early date, when the physician deity had not yet been individualized. According to the thoroughgoing investigations of O. Müller (*Orchomenos*², Breslau, 1844, p. 183 ff.), the original home of Asklepios was Thessaly, the devotees of his cult being the Minyæ. The tradition handed down by the separating theologians (Cic. *de Nat. Deor.* iii. 22 [57]; Job. Lydus, *de Mens.* 4, 90), according to which his parents were Ischys, the son of Elatos, and Koronis, the daughter of Phlegyas, is of great importance, as it points to a period when Asklepios had no connexion with Apollo. His surrender of a divine for a heroic rank was effected by epic poetry. Thus in Homer he is merely the 'blameless physician' (*Il.* iv. 194), the disciple of Cheiron (219), and the father of the warrior-surgeon Machaon, *Τρίκκης ἐξ ἰπποβορίου* (202), with whom passages of later origin associate a brother named Podaleirios (ii. 732, xi. 833). On Homer's authority the Asklepieion of Trikkha was regarded as the most ancient of all (Apollod. *ap.* Strabo, 437), and the river Lethaios as the birthplace of Asklepios (oracle in Euseb. *Præp. Evang.* iii. 14. 6). But Phthiotis and Magnesia were also counted among his primitive habitations, as his education under Cheiron was associated with that region, while his place of birth was located by an *Eos* in the Dotian champaign near Mt. Pelion. His earliest migration from Thessaly was southwards to the Minyean Northern Boeotia, and here Trophonios was worshipped in Lebadeia, and Asklepios in Orchomenos, Hyettos, Thespiæ, and Thisbe (*RE* ii. 1663). He was still a stranger to Southern and Western Boeotia, as also to Attica, to which his cult came from Epidaurus only in 420 B.C. On the other hand, he had at an early date gained a permanent footing in Phokias, which honoured him universally as its archagete (Paus. x. 32. 12). It was in Phokias, indeed, that the worshippers of Asklepios came into collision with the Apollinian circle at a period when, in consequence of the Dorian migration, the cult of Apollo had forcibly established itself in Delphi. The traditional implacable hostility of the Phlegyans towards the Delphic sanctuary indicates the violence of the conflict, which, however, ended in the triumph of Apollo.

A sweeping transformation of Minyean beliefs now ensued in favour of the intruder. Apollo becomes the father of Asklepios, Koronis the god's faithless mistress, Ischys the violator of his rights, but the offspring is taken into favour, so that he may henceforth act as the benignant physician of mankind under the patronage of the Delphic god; then, as he made bold to infringe the cosmic order by restoring the dead to life, he fell a victim to the bolt of Zeus. Such is the substance of an *Eos* (Hes. fr. 122-125 [Rzach]) which dominated the mind of Pindar (*Ol.* iii.) and the succeeding age (cf. *RE* ii. 1646) until the rising prestige of the Epidaurian *hieron* led to a revision of the Asklepiian myth which had the sanction of Delphi. In this new form of the saga the connexion of Asklepios with Thessaly, and the guilt and punishment of his mother—a feature obnoxious to his worshippers—were dropped, while Apollo is no longer the Delphic god, but the Epidaurian Maleatas

(8 (a) above). In the *hieron* the latter begets Asklepios by Aigle, daughter of an 'Epidaurian' Phlegyas, and surnamed Koronis, from her beauty, and makes him joint-possessor of the sanctuary. Such is the version given in the poems of Iseyllos in the first half of the 3rd cent. B.C. (Wilamowitz, *Iseyll.* 18 ff.; Kavvadias, *Fouill.* no. 7; *IG* iv. 950). A somewhat closer correspondence with the *Eae* is shown by the Epidaurian form of the myth in Pausanias (ii. 26. 7); here Koronis, being with child by Apollo, comes with Phlegyas from Thessaly to Epidauros, and upon the 'myrtle-mountain' brings forth in secret the son who fills the world with his fame as soon as he reaches maturity (cf. *RE* ii. 667, s.v. 'Aresthanas'). This version likewise won the sanction of Delphi.

Asklepios, however, notwithstanding his having been thus forcibly grafted upon the Apollinian circle, maintained his independence in his own cult. This appears most distinctly from the type assigned to him in art, which, in contrast to the representation of the son of Leto, exhibits him as the fatherly friend of men, the *πατήρ Πάσιων* (Herondas); hence the flippant jest of the sacrilegious Dionysius in *Oec. de Nat. Deor.* iii. 83 (on which cf. *RE* ii. 1679. 31 ff.). The cult of Koronis in Titane (Paus. ii. 11. 7)—a worship in conflict with the standpoint of the *Eae*—should also be noted.

ii. *The family of Asklepios.*—This comprises two groups, which must be kept distinct. (1) *His iatric retinue.*—Here we have his consort *Epione*, a personification of the 'mildness' which popular etymology found in his name (*Ἀσκλη-ἡπιος*). According to schol. *Il.* iv. 195 (*ἡ Μεισώρις*), she was of Conn origin, but, on grounds of mythical chronology, we should probably read *ἡ Μεσσηνία* here. *Epione* is fully dealt with in *RE* vi. 186–190.¹ The first of his descendants are the two 'excellent surgeons' affiliated to him by epic poetry, viz. *Machaon* and *Podaleirios*, leaders of the men of Triikka, Ithome, and Echalai (*Il.* iv. 202, ii. 729 ff.; for their worship in Triikka, see *RE* ii. 1662). Machaon had a separate cult only in Gerenia (Messenia), but in conjunction with his father was worshipped in several Greek Asklepieia, as, e.g., in Cos, at Pergamos, and doubtless also at Mitylene (cf. *RE* ii. 1660). Podaleirios is almost unknown in European Greece, but in Caria he is the ancestor of a famous family of Asklepiads, and, according to v. Wilamowitz (*Iseyll.* 51), was originally a Carian hero. In the West his cult reached Apulia (dream and healing oracles among the Daunians). The assertion that the two brothers were the sons of Poseidon (frag. of the *Porthesis*) was negatived above (4); the fragment in question is nevertheless of interest as the earliest Greek record of the separation of surgery (Machaon) and internal medicine (Podaleirios). A legend of Syrna (Steph. Byz. s.v. *Σύρνα*) relates that, when the king's daughter had fallen headlong, Podaleirios restored her by bleeding.

The outstanding iatric figure of the group is *Panakeia*, a personification of the popular notion of the miraculous all-healing herbs already mentioned in connexion with Cheiron and Herakles. As the daughter of Asklepios, she represents his omnipotence in the sphere of healing (on the centres of her cult, and her presumably Rhodian origin, cf. Roscher, iii. 1484 ff.). In the ancient oath of the physicians she alone—as a healer—is contrasted with Hygieia; subsequently she was associated with a sister named *Iaso* (Hermipp., Aristoph. *Plout.* 701), and, at length, with the addition of *Akeo*, we find a triad of female healers (Athenian relief, reproduced in Roscher, iii. 1490;

inscr. from Piræus, *CIA* ii. 1651; the *Pœans* of Ptolemais and Athens). The medical retinue of Asklepios is completed by the dæmons *Ianiskos* (schol. *Plut.* 701), *Akesis* (Epidauros; Paus. ii. 11. 7), and *Telesphoros* (Pergamos): the last-named is viewed in very different lights (Welcker, *Götterlehre*, ii. [1860] 740; Wroth, *JHS* iii. [1882] 283 ff.)—most recently as an incubation spirit by Ziehen (*Ath. Mitt.* xvii. [1892] 241). The hymn in *CIA* iii. 171 identifies him with Akesis; Pausanias (ii. 11. 7) does likewise, but at the same time identifies him also with Enamerion (see below, under (2)). Incubation is represented by *Hypnos* in Sicyon (Paus. ii. 10. 2), Athens (*Ath. Mitt.* ii. [1877] 242. 4), and Epidauros (Blinkenberg, *ib.* xiv. [1889] 390).

(2) *The personifications of health and ἐβελία.*—The leader of this group is the maiden *Hygieia*, who by many recent writers is wrongly regarded as a healing goddess. The name has a history in part independent of the Asklepiian cult. It is found c. 500 B.C. as an epithet of the goddess of the Athenian citadel (cf. above, 2). The hymn of Licymnios (*Frag. Lyr. Gr.* iii. 599) makes reference to a maternal Hygieia, extolling her as 'the Queen of the august thrones of Apollo,' but does not connect her with Asklepios. It is clear also, from Cornut. 16, that in some places a Hygieia was associated with Hermes (cf. 12, above). Finally, a maidenly figure designated Hygieia is found among the personifications of Euxia (Endaimonie, Harmonia, Tyche) on vase-paintings (Jahn, *Archæol. Beiträge*, 215; *AZ*, 1879, p. 95), and beside a youth named Klytios on the vase of Meidias (Inghirami, *Mon. Etrusc.*, Fiesole, 1824–27, v. 2, pl. xii.). But, while the representation of an abstract conception might be employed in many ways, the creation of a figure in the cultus is a different matter. Usener (*Götternamen*, 169) supposes, however, that an independent goddess designated Hygieia was known in Athens long before the settlement of Asklepios there (420 B.C.)—a theory which the present writer refutes in Roscher, iii. 1486. If the point in question be the medium in which the worship of the goddess of health first emerged, there are good reasons for believing that this was the Asklepiian cult. That Hygieia reached Athens in company with Asklepios in 420 B.C. is an assured fact (cf. the final revision of the relative inscription, *Ἐφημ. ἀρχαιολ.*, 1901, p. 98). If she did not come from Epidauros (where her connexion with the *hieron* in the 4th cent. B.C. is now attested by *IG* iv. 1329), she must have been brought from some other Asklepieion in the Peloponnesus—Titane perhaps; her ancient worship there is discussed in Roscher, i. 2776. As the guardian of health, she forms a real contrast to the medical retinue of Asklepios, and accordingly she does not appear in the healing scene of the *Ploutos*; while, again, in the well-known *Paian*, a recension of which (4th cent. B.C.) was recently discovered in Erythrae, she is, for the sake of emphasis, put last of all. The sick might approach her with petitions, the restored with thanksgiving; her name in itself signifies the stewardship of the supreme blessing of life. But this blessing was not merely a thing to be regained by healing, but rather—what was of more importance for national life—a thing to be safeguarded and strengthened by rational conduct. Now, such an idea had a natural attraction for the race that instituted the athletic contest and the gymnasium. That it was familiar also to the followers of Asklepios is shown by a saying which Plato puts into the mouth of the physician Eryximachos, viz. that Asklepios, taking account of the two tendencies of the animal body—*ἐπὶ τῷ βίοντι* and *ἐπὶ τῷ νοσῶντι*—presides over the whole art of medicine on the one hand and over gymnastics and agriculture

¹ Lampetia, who is named as the wife of Asklepios by Hermippus, would fall rather into the second group. See below, p. 552a.

on the other (*Symp.* 186 B, and cf. Jüthner, in his ed. of Philostr. *περὶ γυναικείης*, p. 37 ff.). This agrees with the fact that at Olympia on the table of Kolotes, upon which the wreaths of the victors were laid, Asklepios and Hygieia are seen confronting Agon and Ares, i.e. are honoured as patrons of athletic and martial contests. What artistic type, then, would be chosen to represent the patroness of the Olympic games? That, surely, of a maidenly figure, at once lithe and tense. Moreover, in all other cases where we can with certainty identify her figure, she appears as a maiden. Modern archaeology has given rise to a certain vacillation between the matronly and the maidenly form, but to the Greeks themselves 'the world under her escort bloomed in the vernal radiance of the Charites' (Hymn of Arifron, *Poet. Lyr. Gr.* iii. 597). In the Athenian Asklepieion, the inscriptions of which speak of Hygieia as the only other partner in the sanctuary, she is sometimes (*Ath. Mitt.* ii. [1877] plates 16 and 17; Roscher, i. 2782) depicted beside her father—who is seated—as leaning against a tree and without a symbol; in other cases she is usually represented as waiting upon the sacred snake, to which she offers food, or more frequently a bowl. The statement that a bowl (of gold) was bequeathed by Olympias to the image of Hygieia worshipped in Athens (Hyperid. *pro Euxen.* § 19) prompts the conjecture that that figure exhibited her in the act of giving the serpent drink. In Epidauros, again, Blinkenberg has discovered the figure of a snake drinking from a bowl as an accessory symbol upon an offering (altar or base) dedicated to Hygieia (*IG* iv. 1329). Hygieia is the only member of the Asklepiian circle who shares his exaltation as the *Σωτήρ* of the world (Roscher, i. 2784).

The fact that *Aigle* becomes a daughter of Asklepios seems to be due to the affinity between the ideas of health and light (cf. the Laconian epithets of Asklepios: *Ἀγλαόπης*, *Ἀγλαήρ*), and it is worthy of note that in this capacity she makes her first appearance in the curious genealogy of Hermippos, in which also her mother is not Epione, but the Heliad *Lampetia*. The children of Asklepios, according to Hermippos, are the two physicians of the *Iliad*, Iaso, Panakaia, and Aigle: Hygieia is not named, *Aigle* probably taking her place. In the recently discovered *Painn* of Erythræ (v. Wilamowitz, 'Nord-ionische Steine,' *ABAW*, 1909, p. 37), Aigle has been substituted, not very happily, for the Attic Akeos in the triad of female healing goddesses. In a painting by Nikophanes of Sicyon (Plin. xxxv. 137) Hygieia and Aigle, Panakaia and Iaso, were grouped about Asklepios.

A male counterpart to the goddess of health is found in *Eumemerion*, the Titanian spirit 'of good days' (Paus. ii. 11. 7), and, if Telesphoros be identical with him, as Pausanias says, he too would, of course, be assigned to the second Asklepiian group (cf. ii. (1), at the end).

iii. *The therapeutics of the Asklepieia*.—The connexion between the therapeutics of the Asklepieia and secular medicine, as also the practice of incubation, and the alleged difference between the procedure of the Greek and that of the Roman period, were dealt with in our first section. Suffice it now to refer briefly to the three records of healing which still survive, wholly or partly, in redacted forms. (1) The Epidaurian *iamata*, consisting entirely of miraculous stories, are vitiated by the cardinal defect of making incubation a mere external accessory. In this respect, however, they find a precedent in the *Ploutos* of Aristophanes. (2) The Maffieian inscriptions of the Insula Tiberina retain the mantic nature of incubation, recording the bestowal and practical application of dream-oracles. Here, however, the remedies prescribed

are wholly of a magical kind, and medicine in the proper sense is entirely absent (cf. Denbner, *de Incub.* p. 44 ff.). (3) A fragment of a redaction of pathological narratives from Lebena has been discussed to good purpose by Zingerle (*Ath. Mitt.* xxi. [1896] 67 ff.), who errs, however, in classing this redaction with the Epidaurian *iamata*, for the extant fragment records prescriptions given by the god in dreams, and the cures due to their application. This work, therefore, like the surviving originals of Granios and Apellas, would fall within the category of genuine therapeutics.

B. *HEROES*.—The heroes of Greek mythology fall into two groups, according as they derive their origin from the cult of the dead or from the worship of gods. In the former case they tend to acquire a malicious character, and need to be propitiated by acts of worship; such are, e.g., the heroes who, according to Hippokrates, *περὶ λεψῆς νόσου*, I (vi. 362, Littré), were supposed to cause epilepsy. The second class, embracing deities whom the poets reduced to the status of heroes, are, on the other hand, disposed to be helpful to man, especially in the healing of disease; and hence, in pseudo-Hippokr. *περὶ διατρῆς*, 89 (vi. 652, Littré), they are invoked together with the apotropaic gods and Ge. Those of this group who retained their place in the cultus as deities were dealt with in the preceding section (A. 13, 15, 19, 20); but Achilles, though originally a water-demon (Usener, *Göttern.* p. 14), was there omitted, because he was worshipped exclusively as the hero of the Trojan legend.

i. *Achilles*.—The attempt to interpret his name in a medical sense (Gruppe, *op. cit.* 71. 618) has proved futile. His sanctuary in Brasæ is mentioned by Pausanias (iii. 24. 5), not as having any real connexion with the Asklepieion situated there, but merely as being in its vicinity. His dream-shrine in the island of Leuce, opposite the delta of the Istros (Arrian, *Peripl.* 23), was specially concerned with the coasting traffic. He appears as a healing hero only in Tertull. *de Anima*, 46, where he heals Leonymus the boxer. In the Trojan legend he is a pupil of Cheiron (*Il.* xi. 832), cures Telephos with the rust of his spear (*ὁ ῥῥῶας ἰάσεται*), and bandages Patroklos upon the Sosias bowl (Müller-Wieseler, *Ant. Denkmäler*, Göttingen, 1854, i. pl. 45, no. 210).

2. *Protesilaos*, a healing hero in the Thracian Chersonese (Philostr. *Heroic.* ii. 15).

3. *Hektor*, according to a Delphic utterance (Lykophron, 1205, and schol. 1194), was an *ἀργυρὸς λοικμῶν τοξευμάτων* in Thebes.

4. *Antikyreus*, the eponym founder of Antikyra in Phokis, and the discoverer of the *ἐλλέβορος μέλας*, with which he cured Herakles of madness (Ptol. Chenn. 2, p. 14 [Roulez]; Steph. Byz. s.v. Ἀντικυρεύς). The hellebore decoction was said to have been discovered by the Phokians, and was used for both cathartic and therapeutic purposes (schol. Nic. *Alexiph.* 483; Strabo, 418).

5. *Melampous*.—The Æolid Melampous was the founder of a famous family of seers, upon which Amphiaraus (A. 19)—as his grandson—was grafted (*Od.* xv. 225 ff.). In Pherekyd. fr. 75 he is the hero of an interesting popular legend, which tells how, in consequence of having his ears cleansed by snakes, he became proficient in prophecy and the language of animals, and by a magic remedy (*ὁ ῥῥῶας ἰάσεται*) enabled Iphiklos to regain his lost virility. He delivers the Prætidæ from their madness—either supernaturally, *θεοῖας ἀποβήσας καὶ καθαρμῶς*, in the Artemision at Lusi (Paus. viii. 18. 7), or by rational means, viz. a bath in the fountain of the Anigradian nymphs (A. 10 (α) (2), the waters of which acted powerfully against skin-eruptions and herpes. On the latter alternative, the Prætidæ most really have suffered from an affection of the skin, as is actually said, indeed,

in the version given in the Hesiodic *Catalogue*, fr. 28. 29 (Rzach). According to Theophr. *Hist. Plant.* ix. 10. 4, Melampus treated their case with the *ἐλέβορος μέλας*, which was in consequence also called *melampodion*. Rohde (*Psyche*, Freiburg, 1894, p. 339. 3) holds that this remedy was purely cathartic; but it may quite well be regarded as therapeutic, and, therefore, as a counterpart to the *panakes* of Cheiron and others. There was a cult of Melampus at Aegosthena, but there was no practice of divination connected with it (Paus. i. 44. 5). According to Imhoof, Blumer, and Gardner ('Numismatic Commentary on Paus.', *JHS* vi. [1885] 58), the circular building upon a coin of that locality may be a representation of his shrine (*ἱερόν*).

6. *Apis*.—According to Aesch. *Suppl.* 261 ff., Apis, the eponym founder of Apia (Argolis), and the *λαρβαννίς* *καὶς* Ἀπόλλωνος, came from Naupaktos, and freed the land from monsters *ἀκροὶ τοιαῖοις* (cathartic *pharmaka*). He was subsequently (Porphyr. *de Abstin.* iii. 15) identified with the Egyptian Apis (cf. Wernicke, *RE* i. 2810).

7. The descendants of the Asklepiad Machaon (A. 20, ii. (1)).—This group is composed partly of originally local spirits or heroes, as, e.g., his sons Nikomachos and Gorgasos, who in the time of Pausanias (iv. 30. 3) were still active as healing heroes—especially for paralysis—at Pharae in Messenia (cf. Roscher, i. 625; *RE* ii. 1668), and partly of those whose sole function it was to found Asklepieia, such as Sphyros in Argos, Polemokrates in the Thyreatis, and Alexenor in Titane (Paus.), though in the last-named locality the founder, according to schol. Arist. *Plout.* 701, was Alexenor, the son of Asklepios. On the family of Asklepiads which traced its descent from Nicomachos—and to which Aristotle belonged—and on the Asklepiads of Rhodes, Cnidus, and Cos who sprang from Podaleirios, see *RE* ii. 1684.

8. Molpadia Hemitheia, daughter of Staphylus, and, after her death, heroine of a dream-oracle at Kastabos (Thracian Chersonese) much frequented by invalids; she had also an obstetric function (Diod. Sic. v. 62, 63).

9. Darron, ὃ ὑπὲρ τῶν νοσοῦντων εἰσέρχεται among the Macedonians (Hesych. s.v. Δάρρων). G. Curtius (*Greek Etym.*, 1897, no. 315) connects the name with *θαρρεῖν*. Usener (*op. cit.* 171) refers it to the Thracian tribe of the Δερραῖοι. To the latter pertains also the interesting Macedonian large silver coin with the legend Δερραϊκός(ν), which denotes, not a king (Head, *op. cit.* 180¹), but a nationality (Gäbler, *Zeitschr. für Numismat.* xx. [1897] 289).

10. Eurostos: Τέμενος ἥρωος Εὐρώστου on the Bosphorus (reference in Usener, *op. cit.* 171. 64, to Dionys. *Periopl.* 111).

Copious examples are furnished by Attica:

11. *Amynos*.—The 'healing hero Alkon,' whose existence had been assumed solely upon the ground of a textual emendation in *Vit. Sophocl.* 11, proposed by Meineke, may now, in view of the findings of A. Körte in *Ath. Mitt.* xxi. (1896) 311 ff., be set aside, and his place given to Amynos, a hero who had a sanctuary on the western declivity of the Akropolis even before the cult of Asklepios came to Athens, and in whose service Sophokles acted as priest. In this capacity the poet gave the Epidaurian deity a hospitable reception, and was in consequence surnamed Δεξιων, and honoured with a hero-cult. On the objects discovered in the sanctuary of Amynos, cf. Körte's earlier art. 'Bezirk eines Heilgottes,' in *Ath. Mitt.* xviii. (1893) 231 ff., with pl. xi. (a large leg with prominently marked varicose vein, and held in the arms of a bearded man on a smaller scale—probably the person healed).

12. The ἥρωας *λαρβός* in the vicinity of the Theseion

¹ But cf. the remarks of Head in his 2nd ed., p. 201.

(Demosth. *Or.* xix. 249, xviii. 129; *CIA* ii. 1, nos. 403, 404 (ὁ ἐν δόρσι)).

13. *Toxaris*, as a ἥρωας *ἔνθος*, specially concerned with fever (Lucian, *Scyth.* 1). He is not a fabrication of Lucian (Sybel), but the object of an actual hero-cult (Deneken, in Roscher, i. 2483 f.).

14. *Aristomachos*, ἥρωας *λαρβός*, in the Dionysion at Marathon (Bekker, *Anecd. Græc.*, Berlin, 1814, i. 262).

15. A ἥρωας *λαρβός* *ὄνομα* Ὀρεσίβιος (Oresibios?) ἐν Ἐλευσίῃ (Bekker, *op. cit.* i. 263).

Reference may be made, by way of appendix, to healing statues and figures representing persons who in their lifetime had nothing to do with medicine, and yet were invested by popular belief with miraculous powers, as, e.g., the statue of the Olympic victor Theagenes in Thasos (Paus. vi. 11. 3; Lucian, *Deor. Conc.* 12), that of the pancratiast Pulydamas at Olympia (Paus. vi. 5; Lucian, *loc. cit.*), that of a ἥρωας *Νευαλλίως* in the Troad (Athenag. 26), those of Alexander (Paris) and Peregrinos Proteus in Parium (Athenag. 26), and that of the Corinthian general Pelichus in the private possession of Eukrates (Lucian, *Philopseud.* 18 ff.). On these, see Weinreich, *op. cit.* 137 ff.

LITERATURE.—This is indicated in the article.

E. THÄRMER.

HEALTH AND GODS OF HEALING

(Roman).—I. *IN THE INDIGENOUS RELIGION*.—In the sphere of medicine the vitally religious element in the Roman character manifested itself in a partiality for supernatural, and a disparagement of rational, modes of healing. The fact that, in spite of the Roman tendency to deify special and unique occurrences and conditions, we find no distinctive gods of disease among the deities of the *Indigitamenta* (see the alphabetical list by R. Peter, in Roscher, ii. 188 ff.) is in reality an indication of the favourable conditions of health prevailing in the ancient agricultural State. Moreover, there were originally no special deities of healing among the *Di indigetes*, the gods of the State religion; and the Romans, like the Greeks of primitive times, were content to rely upon the evil-averting powers of the indigenous deities generally. Thus *Mars*, the god of war, is entreated in the *Carmen Arvale* (*CIL* i. 28) to avert pestilence: 'Let no plague come upon the people; be content, O fierce Mars!', and in the ancient prayer in Cato, *de Agri Cult.* 141 (the diction of which, however, according to R. Reitzenstein, in *Strassburger Festschrift*, 1901, p. 152, has been modified by the redactor), the same deity is implored not only to prevent bad weather, failure of crops, etc., but, in particular, 'uti tu morbos visos invisosque defendas averrunquesque; uti tu . . . pastores pecuque salva servassis duique bonam salutem valetudinemque mihi domo familiarumque nostrae.' With these prayers should be compared the shorter supplication in *de Agri Cult.* 134 (to Janus and Juppiter) and 139 (addressed quite generally to all the gods: 'si deus, si deas'). The ancient Italian *Salus*, again, is not a goddess of health or healing, but the personification of the general welfare (cf. G. Wissowa, *Religion u. Kultus d. Römer*², Munich, 1912, p. 132 ff.). She was, no doubt, confounded with the Greek *Hygieia* in later linguistic usage, but this can hardly have been the case in the official religion. In the frequently mentioned 'augurium salutis' (the leading reference is Dio Cass. xxxvii. 24, where *salutis* is improperly rendered as *ὑγιείας*, instead of *συνρίας*), the word is not a proper name at all, but simply an appellative. The attempt of Böttiger ('Medizinische Schlangengaukelei,' in *Kleine Schriften*, i. [1837] 127 ff.) to connect the 'augurium salutis' with the snake-feeding *Hygieia* is altogether fallacious. The ancient Latin goddess *Strenia* is regarded by Preller (*Röm. Myth.*³,

Berlin, 1883, i. 234) as a deity of healing, but only on the ground of an untenable etymology in Augustine, *de Civ. Dei*, iv. 11. 6: 'strenuum facere'; the *strence* ('twigs of trees') given as New Year's presents, however, were made use of, quite generally, as symbols of prosperity (cf. Plaut. *Stich.* iii. 2. 8).

On the other hand, the ancient *Carna*, shown by Wissowa (*op. cit.* 236) to have been a goddess of the under world, has a distinct connexion with matters of health. According to Macrobius, *Sat.* i. 12. 31, she presides over *vitalibus humanis*, and she is entreated 'ut tecinora et corda quaeque sunt intrinsecus viscera salva conservet.' From the free poetic treatment of *Carna* by Ovid (*Fasti*, vi. 101-196) it would appear at least that she practised the beneficent magic arts of which the presumptive *ἑρπιδίς* prides herself in the *Hymn to Demeter* (see above, p. 548 f.). The *Striges* who thirst for children's blood she exorcizes by touching the doorposts three times with a twig of arbutus, sprinkling the threshold with water, holding the entrails of a pig two months old (*Fasti*, vi. 161: 'cor pro corde, pro fibris fibras'—a representative spell; cf. Riess, 'Aberglaube,' in Pauly-Wissowa, i. 33 (c)), and, finally, placing a hawthorn-branch in the window as a prophylactic. The particular deities of woman's life—Juno as *Lucina*, *Diana Opifera* in Nemi, and the host of special goddesses (Mene, Alemna, etc.) named in the *Indigitamenta*—can only be alluded to here.

A specific goddess of disease is found in *Febris*, whose personification bears forcible witness to the antiquity of the fever-plague in the plains of the Tiber. Belief in disease-demons was, no doubt, quite common among the Babylonians (see above, p. 541*), and the Egyptians seem to have had a 'special god of fever' (*Pap. Ebers*, ed. Joachim, pp. 87, 93—unless the reference be rather to a god of 'inflammations'); these, however, were hostile beings, whom the people sought to exorcize by spells. The Roman *Febris*, on the other hand, was well disposed towards man, and prospered the remedies used for the disease. That these remedies were magical in their nature is shown by the 'remedia quae corporibus aegrorum adnexa fuerant' (Valerius Maximus, ii. 5. 6), obviously amulets for reducing fever, which after use were dedicated to *Febris*. There was an ancient sanctuary of *Febris* on the Palatine Hill, and two of later origin on the Quirinal and the Esquiline respectively. In later times she assumed the specialized forms of *Febris Tertiana* and *Febris Quartana* (*CIL* vii. 999, xii. 3129). Magic remedies for both kinds of fever are given in Plin. *HN* xxviii. 46.

Among the *Dii Novenses* of Italian origin there were two who are clearly associated with healing. (1) One of these was *Fortuna*, an ancient Latin goddess whose cult is said to have been established in Rome by Servius Tullius. The chief seats of her worship were Antium and Praeneste, in the latter of which she had, as *Primigenia*, an ancient oracle for sortilege. The cult of *Primigenia* did not reach Rome till 199 B.C. She was not, like the Greek *Tyche*, the goddess of fate who rules over all things, but was personified in innumerable special forms, as, e.g., 'Fortuna huiusce diei,' 'Fortuna equestris,' 'Fortuna publica' and 'privata,' 'Fortuna Collegii Fabrum,' 'Fortuna balneorum,' and the like (Wissowa, *op. cit.* 262), including 'Fortuna salutaris' (*CIL* vi. 184, 201, 202), which may have quite a general reference, but as found in the votive inscription of Godesberg (*CIL* xiii. 2, no. 7994) is certainly connected with healing: 'Fortunis salutaribus [note the pl.] Aesculapio Hygiae.'—(2) The Etruscan, originally Falerian, *Minerva* (Wissowa, *op. cit.* 247 ff.) had a temple on the Capitoline Hill even prior to the institution of the Capitoline triad (Festus,

p. 257, s.v. 'Quinquatrus'). As the goddess of the handicrafts and the arts she was, in particular, the patroness of physicians (L. Preller, *Regionen der Stadt Rom*, Jena, 1846, p. 133), with which fact, it is true, the remark of Cicero in *de Div.* ii. 123 ('sine medico medicinam dabit Minerva') is strangely at variance. There was a temple of *Minerva Medica* upon the Esquiline (Wissowa, 255, n. 1). A sanctuary of *Minerva Memor et Medica Cabardiensis* (near Placentia) is often referred to in inscriptions (*CIL* xi. 1292-1310); here she prescribed medicines, healed diseases of the ear, and even condescended to restore the growth of the hair.

So much for the indigenous gods and those taken from the neighbouring peoples—deities who were worshipped in old-fashioned Roman or, it might be, in Italian forms, and, above all, in forms borrowed from the Etruscan religion.

II. GREEK INFLUENCES.—These in the end effected the Hellenization of the Roman religion. Of the gods thus borrowed from the Greeks, however, only a few are connected with our subject.

1. *Apollo*.—The *Sibylline Books*, which cannot be dissociated from the worship of *Apollo*, began, so far as we know, to make their influence felt in Rome in 496 B.C. It is certain that these books, as also the Roman worship of *Apollo*, came from Cumæ, as is confirmed by the fact that on special occasions the Senate caused sacrifices to be offered to *Apollo* in his temple there (cf. Wissowa, *op. cit.* 293 f.). The first Roman temple of the god was erected, 'pro valetudine Populi Romani,' at the Porta Carmentalis in 431 B.C., on the occasion of a plague (Livy, iv. 25). Here, accordingly, the Greek god of pestilence (see above, p. 547*) found a footing in Rome; the Romans worshipped him as *Apollo Medicus*, and in the prayer of the Vestal Virgins (Macrobius, *Sat.* i. 17. 16) he is actually invoked as *Apollo Pæan*. His worship in Rome, as among the Greeks, consisted of expiations and ceremonies—supplication and procession (Livy, xxvii. 37), *lectisternium* and the appointment (by Etruscan rites) of a 'dictator clavi ligendi causa' (Livy, vii. 2, viii. 18). A Roman dedication to *Apollo Salutaris et Medicinalis* occurs in *CIL* vi. 39. According to Pliny, *HN* xxvi. 93, a remedy for abscess, compounded of seven ingredients, was given to the naked patient by a naked virgin—each of them spitting the while—with the words: 'negat Apollo pestem posse crescere cui nuda virgo restinguat.' Nakedness was believed to be a magic preventive (cf. Riess, *loc. cit.* i. 35). It is probable that the vogue of *Apollo* as a healing god began to decline when the cult of *Aesculapius* was adopted in Rome (291 B.C.), but in conjunction with the latter and *Salus* (*Hygieia*) he received votive gifts as far down as the pestilence of 180 B.C. (Livy, xl. 37).

2. *Aesculapius* and *Hygia*.—The reception of *Asklepios*,¹ the Greek god of the healing art, into the Roman pantheon is worthy of note as the first instance of the Romans having adopted a cult from the Greek mother-country. The occasion was the pestilence of 293 B.C., the *Sibylline Books* having recommended that *Asklepios* should be brought from Epidaurus to arrest it. The Romans did not at first go beyond a three-days' supplicatio (Livy, x. 47), but in 291 they sent an embassy, headed by G. Ogulnius (Valer. Vict. *Vir. Ill.* 22), to Epidaurus, whence it brought back 'anguem in quo

¹ The Latin form *Aesculapius* (*Aisculapius*, *CIL* vi. 2, from the *Insula Tiberina*) goes back to *Aesculapius* (*CIL* iii. 1766, from *Narona*) or *Aisculapius* (ib. xl. 6708), which corresponds exactly with the older Epidaurian form *Ἀἰσκαπῖος*. The intrusive vowel between *c* and *i* in the common Lat. form has a Gr. counterpart in the Thessalian *Ἀεσκαπῖός*, which is to be inferred from certain proper names (Pauly-Wissowa, ii. 1642).

ipsum numen esse constabat.¹ A temple was erected to the god on the Insula Tiberina at the place where the serpent, quitting the ship, reached land (Livy, *Epit.* xi.). So ran the primitive, artless legend, of which we are still reminded to this day by its monumental counterpart in the boat-shaped outline of the island (cf. the ancient engraving in B. Gamucci, *Antichità di Roma*, Venice, 1580, p. 173; M. Besnier [*L'île Tiberine dans l'antiquité*, Paris, 1902, p. 42 = *Bibl. des écoles françaises*, lxxxvii.] dates the artificial shape of the island from the end of the Republic). In the diffuse account given by Ovid (*Metam.* xv. 622 ff.), and also in Val. Max. i. 8. 2, the founding of the temple is extolled as an event of great importance, but in point of fact the cult seems to have played a very modest part in the Republican period.²

As regards the internal activities of the Roman branch of the Epidaurian cult, our information is scanty. That they corresponded very closely with those of the parent institution appears from the reference of Festus (p. 110) to the sacred snakes and dogs kept in the island;³ and, in view of the fact that the Epidaurian *iamata* (see above, p. 542^b) were compiled shortly before the adoption of the cult in Rome, we may perhaps infer that here too the craving for the miraculous had asserted itself with considerable force. But there is nothing to show that incubation, which was certainly taken over with the cult itself,⁴ had lost its mantic character (as in the *iamata*). In the *Curculio* of Plautus, the scene of which is laid in Epidaurus, but which is full of allusions to Roman conditions, the procurer to whom the god has paid no attention in his dream is supplied with an improvised interpretation of it (246 ff.). This goes to prove that there were professional 'conjectores' in the Roman Asclepium in the time of Plautus, but direct evidence of incubation is not found until the Flavian epoch (*CIL* vi. 8: 'Flavius Antyllus ex viso Asclepio aram consecravit'; cf. *ib.* 14, 'Sancto Aesculapio ex jussu numinis dei'). A dedication (discovered in front of the *Porta Appia*) by a

certain M. Ulpus Honoratus to Aesculapius and Hygia, 'pro salute sua suorumque et L. Juli Helicis medici, qui curam mei diligenter egit secundum deos,' is of special interest as showing the co-operation of physician and deity. A Greek parallel to this is found in a dedication to Asklepios in Kibyra: here the person healed gives thanks to the god, to the Tyche of the city, and to Dionysios, the doctor who had treated him (*Wiener Akademik, Anzeiger*, xxx. [1893] 104). The 'Mafesian inscriptions' of the Insula Tiberina date from the age of the Antonines, and are a redaction of four narratives of healing (*CIG* 5980); an interpretation will be found in L. Deubner, *de Incub.* Leipzig, 1900, p. 44 ff. We read in these that oracles were bestowed in dreams, and practically applied, but the directions given are of a purely theurgic character. A revival of interest in the cult of the god of healing in the reign of Antoninus Pius is indicated by the latter's memorial coin bearing a representation of the legendary foundation of his temple (H. Cohen, *Méd. impér.* Paris, 1880-85, ii. 271, fig. 17; cf. also the reliefs in *Röm. Mitt.* i. [1886], plates 6 and 7).

Of the diversified figures in the retinue of the Epidaurian god (see above, p. 551), 'Hygia' alone appears in Rome. She was there also called 'Valetudo,' and is first mentioned in connexion with the year 180 B.C. (Livy, xl. 37, where the 'Salus' conjoined with Aesculapius must, of course, be meant for Hygia); while she is referred to as Salus also in Ter. *Hecyra*, 338. Conversely, the temple of the early Roman Salus is erroneously called *vaō rōr* *Tryelas* by Plutarch (*Cato Major*, 19). The confusion is explained by the affinity of the terms *salus* and *valetudo*. From the Roman Salus, however, the daughter of Aesculapius is explicitly distinguished in *CIL* vii. 164 (Chester) as 'Salus ejus'; other inscriptions usually call the latter 'Hygia' (*CIL* vi. 17-19, and 20234—the last dating from the reign of Antoninus Pius). It is true that in the temple erected by Marcus Aurelius and L. Verus in honour of the divine father and daughter in Lambaesa (Numidia) we again find the dedication 'Aesculapio et Saluti' (*CIL* vii. 2579a). But the proper Latin designation of the daughter of Aesculapius, as regards both her name and her character, is *Valetudo* (*CIL* iii. 7279), and the goddess is so designated on a denarius of Acilius (see preced. col., note 2), as the name 'Valetudo' which is there attached to a female figure attending to a serpent can refer only to Hygia. Compare also *CIL* v. 6415 (Pavia): 'Aesculapium Bonam Valetudinem Martem'; and viii. 9610 (Mauretania): 'Bonae Valetudini sacrum.'¹ A pre-Hellenic goddess 'Valetudo' occurs (*CIL* ix. 3812 [Marsi]).

The diffusion of the Aesculapian cult through the vast Roman Empire cannot be traced here, but reference may be made to a remarkable representation of the god in a military type. He appears thus on several reliefs from Syria (Jalabert, in *Mélanges de la faculté orientale*, Beirut, i. [1906], pl. i. 1 and 2, pl. ii. 3-5: 'Aesculap on officier romain'). This is to be explained by reference to the worship of the emperors. The Cameo St. Albans (C. W. King, *Antique Gems and Rings*², London, 1872, ii. 9) depicts an emperor (probably Constantine) in warlike attire, and bearing the eagle of Jupiter

¹ This was the specific mode of founding branches of the Epidaurian cult; cf. Paus. ii. 10. 8 (Sicyon), iii. 23. 6 (a consecration of sacred snakes intended for Cos, but retained in Epidaurus Limera).

² It certainly comes but little into notice: see dedications to Apollo, Aesculapius, and Salus (i.e. Hygia), in 180 B.C. (Livy, xl. 37); head of Aesculapius on denarii of Acilius the mint-master (E. Habelon, *Momines de la République rom.*, Paris, 1885, i. 107, no. 11); figure of 'Valetudo' (i.e. Hygia) feeding the snake (*ib.* 108, no. 8); mural paintings in 'Aesculapii aede vetere' (Varro, *de Ling. Lat.* vii. 57; 'vetere' here in contradistinction to the later sanctuaries in the iv. and v. *regiones* of the city); the Naples marble statue of Aesculapius (illustration in Roscher, i. 634) is said to have been found in the Insula Tiberina; probably, too, the group of Asklepios and Hygieia executed by Nikeratos (who flourished in the period of the Attalids), and afterwards transported to Rome (Plin. *HN* xxxiv. 80), had found its place in the temple of the island (the charming group in the Vatican (illustr. in Roscher, i. 2779) is in all likelihood a copy of this); the architectural work of two ediles 'de stipe Aesculapii' (*CIL* vi. 7). The statue of Antonius Musa, physician to Augustus, was set up 'juxta signum Aesculapii' (Suet. *Aug.* lix.), perhaps on the Insula Tiberina.

³ The statement of Festus that the sacred dogs were kept 'quod is [Aesculapius] uberibus canis sit nutritus' is a distortion of the Epidaurian legend, and is probably due to Tarquinius (cf. *Lact. Div. Inst.* i. 10. 1).

⁴ From the dream-oracles of Faunus, as described in Verg. *Aen.* vii. 71 ff., and, in imitation of them, in Ovid, *Fasti*, iv. 644 ff., Preller (*Röm. Myth.* i. 382) argues that incubation was practised in Rome long before the cult of Asklepios was established there, but in n. 2 Jordan refers to the Hellenizing spirit of Roman poetry, while R. Heinze (*Vergil's epische Technik*, Leipzig, 1908, p. 172, n. 2), on the ground that the alleged Faunus oracles would be an isolated phenomenon in early Italian religion, denies that the descriptions in question had any foundation in fact. The present writer is of the same opinion. The earlier oracular system of the Romans depended upon Etruscan influences, and incubation was unknown in Etruria. What is said of dream-oracles in Hellenized Rome outside the Aesculapian cult—the oracular statues of the Danaids in the temple of the Palatine Apollo (founded 28 B.C.), and the healing oracles of the Roman Dioscuri (schol. on Pers. *Sat.* ii. 56)—is open to doubt (Wisowsa, *op. cit.* 270, n. 2).

¹ Hygia had a rival in *Bona Dea*, a Greek goddess worshipped in Argolis, Sparta, and Tarentum, under the name of Damia, and in Rome identified with Fauna—*Bona Dea* (Wisowsa, *op. cit.* 216). *Bona Dea*, in her temple on the Aventine, which was restored by Livia, seems to have exercised the function of a healing goddess, inasmuch as her devotees stored in this temple 'omne genus herbarum ex quibus antistites dant plerumque medicinas' (Macrob. *Sat.* i. 12. 26). Wisowsa (218, n. 1) associates with her the inscriptions *CIL* vi. 72: 'Bonae Deae Hygiae,' and viii. 20747: 'Deae [Bona] Valetudo'; but, on the other hand, the *Bona Dea* there referred to may be an epithet of the daughter of Aesculapius.

and the snake-entwined *hasta*. King wrongly interprets the latter symbol in a Christian sense ('the old serpent' overcome by Constantine). But in reality we find here a transference of the regular symbol of Asklepios to the deified emperor as the incarnation of the *Σωτήρ*. This is the type used in the Syrian reliefs, and these accordingly portray the face in all cases as beardless.

Concluding note on Cato the Censor.—Did the Romans, who, as we know, assumed at first a suspicious and adverse attitude towards Greek rational medicine, frame a popular medicine of their own for ordinary needs, in addition to their general supplications to the gods? And was Cato, the opponent of Greek culture, and especially of the Greek physicians (Plin. *HN* xxix. 14; Plut. *Cato Major*, 23), a champion of such indigenous medicine? That he was versed in medical matters is shown by his having inserted rules of health in his *Præcepta ad M. filium* (Plin. vii. 171, xxviii. 260; Plut. *loc. cit.* 23; Priscian, vi. 84), and by the portions of his extant work *de Agri Cult.* which deal with medical dietetics. It is a common opinion that he derived his knowledge of such things from the medical practice of the Italian peasantry (W. S. Teuffel, *Gesch. der röm. Literatur*⁴, Leipzig, 1882, § 55; Jordan, in Preller, i. 243, n. 3; F. Münzer, *Beiträge zur Quellenkritik der Naturgesch. des Plinius*, Berlin, 1897, p. 68: 'Die primitive Heilkunst des sabinischen Bauern'), and the curious spells recommended for dislocations (*de Agri Cult.* 160) possibly come from a similar source. But the 'apsinthium Ponticum' prescribed as an amulet against footsoreness (159) is an exotic feature. To what source, again, shall we trace the long excursus (156-7) dealing with the dietetic and therapeutic merits of the various kinds of cabbage? The *Brassica Pythagorea* (157. 1) cannot well have belonged to the pharmacopœia of the Sabine peasantry, and the Greek name *Silphion* is used only in this section (157. 7), while in ch. 116 Cato employs the Lat. term *lasericum*. Finally, his remark that the assimilation of food tends to prevent perspiration of the veins has a distinctly professional ring. Now, we know that the Cnidian physician Chrysippus (M. Wellmann, in Pauly-Wissowa, iii. 2510, no. 15), who accompanied Eudoxos (see above, p. 541^b) on his Egyptian journey of research wrote a monograph on the various kinds of cabbage, and showed in that work the great importance of the species for therapeutics and dietetics (Plin. *HN* xx. 78). And that this Cnidian work was, directly or indirectly, Cato's source for chs. 156-8¹ appears not only from Cato's partiality for the cabbage tribe, but also from the curious prescription (157. 14) recommending *Brassica 'erratica'* with water for fistula, and with honey for sores—precisely the same directions having been given by Chrysippus (in Plin. *HN* xx. 93). It is quite possible, too, that the *Commentarius* (Plin. *loc. cit.*), or the *γρηγομενον ἱερουργία* (Plut. *Cato Major*, 23), according to which Cato was wont to treat himself and his family in sickness, may have been simply that work of Chrysippus. The Cnidian school of physicians fostered the relations between medicine and *τὸ θείον* (see above, p. 544^b), and was on that account more acceptable to the religious sentiment of the Roman people than were the Hippocratics with their purely scientific methods. But it is certainly a curious circumstance that the chief opponent of Hellenism in Rome should thus turn out to have been the adherent of a mere *Græculus*.

LITERATURE.—This is given in the article. Cf. also the authorities cited in the 'Greek' article. E. THÄRMER.

¹ The purgative prescribed in 158—a mixture which with its numerous ingredients reminds us of Egyptian pharmacy—belongs also to the excursus, as it includes *Brassica*.

HEART.—1. Heart, soul, and life.—In primitive thought the liver was probably regarded as a primary seat of life, but the heart generally came to be looked upon in this way, as its physiological functions were better understood. The beating of the heart, as well as the cessation of that beating at death, may well have prompted man to associate life itself with it or to regard it as the seat of the soul, or, where several souls are assigned to man—a not uncommon belief—as the seat of one, usually the chief of them. The result has generally been that 'heart' signifies not only the physical organ, but also soul, life, intellect, emotion, will, and the like; and it is not always easy to say whether or not a metaphorical use of the word is intended. This is illustrated in the common phrase 'died of a broken heart,' which goes back to a time when grief of itself was supposed to act injuriously upon the physical heart.

The Ahts believe that the soul, a sort of mannikin, lives in the heart and head.¹ The Caribs, who believed in several souls, assigned one to the heart, or regarded it as the chief soul.² The Tongans thought that the soul extended through the body, but was mainly manifested in the heart, the pulsations of which were the power of the soul. The right auricle of the heart was the seat of life.³ Among the natives of Nias a belief in three souls exists, and the third and most important of these is *mosododo*, 'the soul of the heart.' The heart is the source of all feeling, understanding, and emotion.⁴ The Batak sometimes assign souls to each place in the body where pulsation is observed, one of these being the heart.⁵ In Celebes the Gorontaloes believe in four souls, two of which are in the heart.⁶ Examples may also be cited from Africa, where generally the heart is looked upon as a vital centre, and the seat of emotion, passion, etc., of the intellect, or of the soul. 'Soul' and 'heart' are expressed by one name among the Ba-huana.⁷ Where several souls are believed in, the heart is the seat of the life-soul, and it may be drawn thence by sorcery, whereupon the body dies. The Baluba of S. Congo think that death is caused by a messenger of Kabezza-Mpungu compressing the heart until it stops beating.⁸

Among peoples of a higher culture, similar beliefs prevailed. The Egyptian word *ab*, in its narrower sense of 'heart,' signified longing, desire, will, wisdom, courage, etc.; and the heart was regarded as the seat of life, and of all its activities. There was also a soul connected with the heart, the *hâti*, or 'heart soul,' or 'the state, or quality, or mental condition of the heart.' Both of these, the *ab* and the *hâti*, could be stolen, with the result of death, and the deceased is represented adoring the *hâti*, which may also have been that which was weighed in the judgment. Five chapters of the Book of the Dead concern the preservation of the heart, without which the deceased was helpless, but with which his soul would not be 'fettered at the gates of Tuat.' But it was liable to be stolen by various 'stealers of hearts'; hence the greatest precautions were taken to prevent this; e.g., a scarab amulet was often placed over the region of the heart.⁹

With the early Babylonians the liver had been regarded as the seat of the soul or life, and it was only at a later period that a knowledge of the part played by the heart was arrived at. Many traces of the earlier idea survived, 'liver' being used instead of, or along with, 'heart' to signify the seat of life; and hepatoscopy was constantly practised. A frequent refrain in the hymns is, 'May thy heart be at rest, thy liver be appeased.'¹⁰

Among the Hebrews, traces of the same idea of the liver being the seat of life and emotion are to be found (Pr 7², La 2⁴, Ps 16⁹ [read 'liver' for 'glory']). But an advance had been made, and generally in the OT the heart is at once the source and the symbol of life in its various aspects. This is well seen in Pr 4²³, 'keep thy heart with all diligence, for out of it are the sources of life.' The heart is the seat of both intellectual (to the exclusion of the head) and emotional life, including thought, memory, perception, will, imagination, joy, sorrow, anger, etc. (1s 33¹¹, Gn 8²¹, Dt 29⁴ 4⁹, Ex 14⁵, Ps 104¹⁴, Dt 19⁶, 1 K 8³⁸, Is 30²⁹ 66¹⁴). Hence such phrases as 'men of heart' (=men of understanding, Job 34¹⁰ 34³⁴, Three³⁸; cf. Pr 10¹³, 'void of heart'), 'out of heart' (=forgotten, Ps 31¹³). The heart is also the seat of religious feeling (2 Ch 17⁹, Ps 37³¹, Jer 24⁷ 32⁴⁰, Dt 11¹³, 1 K 8⁶¹, etc.); hence change of heart, a clean heart, or a heart of flesh instead of a heart of stone (Ezk 18³¹ 11¹³, Ps 51¹⁰) signifies newness of life and character, and purity of conscience. Most of these usages are found in the NT (cf. Mt 5⁸ 12³⁴ 15¹⁹, Lk 24⁴³, Jn 14¹, Ac 5³³ 8²¹); but St. Paul has particularly developed some of them, and with him the heart is the organ of belief as well as of disobedience and impenitence (Ro 2⁵ 10¹⁰), and the immediate receptacle in human life of God's light and knowledge and love (2 Co 4⁶, Ro 5⁶; cf. Eph 1¹⁸, 'the eyes of your heart being opened'). There also is the indwelling Christ (Eph 3¹⁷). These various usages, whether literal or metaphorical, have passed into religious speech, while in the majority of languages the word 'heart' has most of the meanings ascribed to it in Hebrew.

For the Arab meaning of 'heart' as = 'life,' see ARABS, vol. i. p. 671^b.

Among the Greeks and Romans the heart took the place of the liver as the seat of life, soul, intellect, and emotion. Even Aristotle regards the heart as the centre to which all sensory impressions were transmitted, though Plato assigns the mortal soul which governs the intellect and emotions to the heart, making the brain the seat of the immortal soul, and the liver the seat of the lowest soul and source of sensual desires.¹

Similarly, with the ancient Mexicans the word for 'soul' denoted primarily 'heart.' The heart survived death—not the actual heart, but something within, which caused life and quitted the body at death by the mouth.² The complex psychology of the Chinese assigns many *shen*, or souls, to the various parts of the body; that of the heart is supposed to be in the shape of a red bird.³

The importance of the heart as the seat of life is well illustrated by numerous *Märchen*, like the Norse tale of 'The giant who had no heart in his body,' in which a giant or some other personage secretes his heart, or, in other tales, his life or soul, in some exterior object, and until it is found and destroyed he is deathless.⁴ But it is also illustrated by other tales in which the heart, restored to a dead body, resuscitates it. The oldest of these is the Egyptian story of 'The Two Brothers,' in which Bata hides his heart in a tree. His wife causes the tree to be cut down, and he dies; but his brother, having discovered the heart, makes him swallow it in water, and he revives.⁵ Similar tales are found among the Basutos, Hottentots, Australians, Samoyeds, Hindus, and others; but in the Hottentot instance the heart of the dead

girl increases in size and takes her form.¹ In other folk-tales the heart of a dead person or animal, if eaten or even smelt by a woman, causes conception.

Thus in a S. Slavic tale a youth burns himself. A maiden discovers his heart, smells it, and bears a son.² In a Lithuanian story a hunter finds the heart of a hermit who has burned himself alive, and gives it to his daughter to cook for supper. She eats it herself, and has a son in two hours.³ In another instance it is the heart of a sea-dragon which causes conception.⁴ These stories recall the myth of Zeus, who, having swallowed the heart of Dionysos, begot him again by Semele. In another version the heart was pounded up and drunk by Semele in a potion, whereupon she conceived.⁵

Such a view of the heart as makes it the seat of religious experience, emotion, enlightenment, or Divine indwelling is common to most of the higher religions; while they also regard it as capable, in wicked persons, of being the seat of quite opposite desires and resultant effects. Here, of course, what is a metaphorical use of the word is based on earlier views regarding the physical heart itself. The mingling of the two conceptions is perhaps seen best in Egyptian religion, where the weighing of the heart before the judgment-seat of Osiris decided the fate of the deceased. While it was the heart of the deceased that was weighed, it represented his conduct or his conscience, or his whole ethical outlook and the result of his life. The words of the appeal to the heart not to witness against its owner show clearly the physical basis of the conception (see *ERE* iii. 432^a, v. 478). This twofold view is also seen in the Brāhmanic discussions on the heart as the seat of Brahman. The city of Brahman is the body; in it is the palace, the small lotus of the heart, and in that palace is the 'small ether.' What exists within that ether is to be sought for, meditated, and understood. This 'ether' is sometimes held to be the soul or the individual self, but the general conclusion is that it is Brahman, present there for the benefit of his devotees. This view is not unlike the Christian conception of the indwelling Christ.⁶

Here also some reference must be made to the Roman Catholic cult of the Sacred Heart of Jesus. This cult, which has stimulated some of the highest devotion of Roman Catholicism, is directed not merely to the physical Heart of Jesus, but to that Heart as representing His whole Person, and symbolizing His infinite love for mankind. The Heart suggests the Love; the Love is centred in the Heart. This form of devotion was at first occasional and sporadic, and passages in the works of St. Bernard and St. Bonaventura point to it as one which they favoured. St. Gertrude († 1302) had a vision in which she seemed to rest her head on the Saviour's wounded side and heard the beating of His heart. This occurred on St. John's day, and she inquired of the saint whether he had experienced this. His reply was that he had, but that the revelation had been held over for later ages.⁷ In the 17th cent. Margaret Mary Alacoque had a similar vision by which Jesus revealed to her the wonders of His love and bade her make them known. Other visions followed, and, being published in the journal of Father de la Colombière in 1684, these experiences became widely known. Meanwhile the devotion had become popular, and in 1693 certain indulgences were granted by the Holy See to Confraternities of the Sacred Heart. In 1765, Clement XIII. permitted the Church in

France to have a Feast with a special Mass and Offices. But it was not till 1856 that this was permitted to the Church as a whole. In 1889 this Feast was made a 'double of the first class.' It is held on the Friday after the octave of Corpus Christi. Many confraternities and even States are devoted to the Sacred Heart, and innumerable churches have been specially dedicated under this title.

The devotion to the Sacred Heart of Mary is of an analogous kind, though in her case the love which is symbolized by the heart is her love to God and to her Son, which this devotion seeks to make the faithful imitate. The cult may also be traced back to the 12th cent., but Papal recognition in a partial form did not occur until 1799. In 1855 an office and mass were appointed by the Congregation of Rites, but these were not imposed on the whole Church, nor has any universal Feast yet been granted.¹

2. Eating the heart.—Since the heart is regarded as the seat of life, soul, and wisdom, as well as of courage and of similar virtues desired by the savage, the heart of a slain man, usually an enemy, is often eaten in order that his life, soul, courage, etc., may pass over into the eater and benefit him. This custom, which is a form of cannibalism (*q.v.*), exists not only where the actual eating of bodies takes place, but also where this wider form of cannibalism does not exist. It is conjoined sometimes with the eating of other parts which are also supposed to contain similar virtues, *e.g.* the liver.

In order to obtain courage the Kamilaroi ate the heart and liver of a brave man.² Among the tribes of N.W. Australia the fat of the heart of great hunters or warriors was eaten in order to acquire their cunning or courage.³ Young men among the Eskimos of Bering Strait, when they kill an enemy for the first time, eat a portion of his heart.⁴ In Africa the custom is universal among the tribes, and always with the same intention, *viz.* to acquire courage or whatever other qualities may be ascribed to the heart. It is unnecessary to give references, since every work on native customs mentions this practice, but a few particular instances of it may be cited (see also *ERE* iii. 193b). Ashanti medicine-men cut out the hearts of several of the enemy; and these, being mixed with blood and consecrated herbs, were eaten by all who had never killed an enemy before. If they did not eat them, their vigour would be sapped by the ghosts of the slain.⁵ Here, besides the purpose of acquiring courage, referred to by other writers, it is obvious that the eating of the heart, like the possession of an enemy's head (see *HEAD*), gave the eater power over the ghost. A similar reason underlies certain Eskimo customs of eating the heart (see *CANNIBALISM*, vol. iii. p. 200*). Among the Yoruba the priest of the war-god Ogun took out the hearts of sacrificial victims, dried them, reduced them to powder, and mixed them with rum, and sold them to those who desired courage.⁶ The custom was also wide-spread among the American Indians, and was sometimes associated with sacrifice of a human victim. When the Pawnees made the periodic sacrifice of a Sioux girl, the chief tore out her heart and devoured it.⁷ Here there was doubtless the intention of assimilating whatever peculiar properties the victim was supposed to possess.

Traces of these customs occur in folk-lore. In the *Mabinogion*, Gwyn forced Kyledi to eat his own father's heart; this resulted in the latter's madness.⁸ The Wends believe that the heart of a maiden or infant brewed in herbs will cure disease or inspire love. Hence graves are often violated to obtain the heart of a corpse.⁹ Possibly the old German belief that 'a dying man's heart could pass into a living man, who would then show

twice as much pluck,' is derived from this savage custom.¹ The belief that witches removed and ate the hearts of men while still living, thereby causing their death soon after, may also be traced to the same custom.²

The hearts of certain animals are often eaten in order to acquire their strength, courage, cunning, wisdom, etc. Among these the lion, the bear, the leopard, the wolf, and certain birds are the most usual. On the other hand, the hearts of such animals as are timid or slow are carefully avoided, though they may be given unawares to some one whom it is desired to injure. In Africa the heart of the lion is eaten by hunters or given to children so that they may acquire its courage.³ Among the Ainu and other tribes of Northern Asia who sacrifice the bear, its heart is eaten, but the Gilyaks will not allow a woman to taste it.⁴ In ancient times the hearts of such animals or birds as were believed to possess prophetic powers—mole, hawk, crow—were eaten by those who wished to obtain such powers or to have their power of divination increased.⁵ Traces of these customs are also found in Norse saga. Ingjald, until then timid, became very fierce through eating a wolf's heart. Siegfried, having eaten the heart of the dragon Fafnir, understood the language of birds. Wise-women are said to have eaten, as their special food, the hearts of all animals slain.⁶ In Syria and Asia Minor, eating the heart of a live pigeon is a remedy for heart-disease.⁷

3. The heart in sacrificial rites.—The heart, as a vital centre, is often the object of special care in sacrifice, whether of animal or human victims. It is either offered separately, or, having been removed from the body, is offered with it or with selected parts of it. The Ainu, at the sacrifice of the sacred bear, sometimes placed its heart before it to assure it that it was still alive.⁸ Among some of the Veddas, when an animal is killed, its heart is removed, roasted, and offered on a stick to Vedi Yaka, the spirit who is supposed to help them in killing game.⁹ In the island of Sumba the hearts and livers of victims are offered with rice to the ghosts of the dead, and then eaten by the offerers.¹⁰ The ancient Mexicans, when a human victim was offered, usually cut open the breast and tore out the palpitating heart, which was offered either separately or with the body, on the altar of the gods. Among the Egyptians, when the animal victim was slain and cut up, its heart was offered on the altar with the other parts, and the heart as an offering is often depicted on the monuments.¹¹ At the rite of 'Opening the Mouth' in connexion with the ritual of death, a bull was sacrificed, its heart was torn out and offered to the deceased, and then the relatives ate it raw.¹² A curious custom is referred to in a Bab. atonement rite for a sick man. The body of a sucking pig was placed at the patient's head, its heart removed and placed above his heart, apparently as a substitute for it as containing the life—'Give the pig in his stead. . . . Let the heart be as

his heart.'¹ With regard to sacrificial offerings among the Teutons, Grimm is of opinion that among the nobler parts assigned to the gods the heart was one.² This was also the case among the Romans, with whom the *exta*, the parts burned in fire as an offering to the gods, included the heart.³

Analogous to the separate treatment of the heart in sacrifice is the custom of giving it separate treatment in death and burial rites. The myths of the relics of Osiris—one of these being his heart—buried at different places, the heart at Athribis, may point to some earlier custom of separate heart-burial in Egypt. But the usual custom was to remove the heart and embalm it, placing it in a Causopic vase under the charge of Tiamutet, or binding it on the leg. In order to renew the heart in the future life and provide the *ka* with it, the four chapters of the Book of the Dead were recited and written on amulets, some in the shape of a heart. The 30th chapter was written on a scarab, which was placed over the place of the heart, its words being recited by the deceased at the weighing of the heart. There were also formulae for recalling the heart or preventing its being stolen.

In Christian custom the separate burial of the heart, sometimes in sacred ground, has now and then occurred. Bruce's heart was intended to be buried in Jerusalem; that of Livingstone was interred under a tree near where he died.

4. The heart in magic.—Like other important parts of the human body, the heart, as a seat of life, gave its form to heart-shaped amulets, which were worn to repel evil influences. This custom already existed among the Etruscans and Romans, many of the *bullae* having the form of a heart,⁴ and heart amulets are often found in Egyptian graves. Such amulets are still worn in Southern Europe—in Spain, Italy, and Portugal—usually as a charm against the evil eye; and they were also known in Scotland as 'witch-brooches.' Here also the custom of 'casting the heart' was known. On the head of a sick person was placed a sieve with a comb and a pair of scissors set in the form of a cross. On this rested a wooden cup of water, into which molten lead was poured. Search was then made for a heart-shaped fragment, and this, sewn in a piece of cloth, was worn by the patient.⁵ An animal's heart was sometimes carried as an amulet for luck or to ward off evil influences. In Germany it was thought that an owl's heart gave luck in play, while to have a wolf's heart about the person would prevent one's being eaten by a wolf.⁶ In Mossul it was thought that 'the heart of a black cat dried and steeped in honey, and worn either at the beginning of the month or with the waning moon,' would cause the wearer to become invisible.⁷ The famous instance of Tobit (8²¹.) shows that the smoke of the heart and liver of a fish with the ashes of perfumes drives away the evil spirit. In W. Africa, fetishes often contain the heart of an ancestor.⁸

The heart of an animal was also useful to counteract disease or repel the evil influences of witches. In the Highlands, during cattle disease, the heart and part of the liver and lungs of one of the stricken animals were cut out and hung over the fireplace or boiled.⁹ Sometimes, as in Sussex and Germany, the heart of an animal overlooked by a witch was stuck full of pins and roasted. The witch was then visited with misfortune, or, being tortured in the heart, came and confessed.¹⁰ In Dorset a bullock's heart hung in the chimney was supposed to keep off fairies,¹¹ and in Lincoln an

animal's heart full of pins concealed within the fabric or walls had great protective virtue.¹ In these and similar instances elsewhere, when the heart is stuck full of pins, there is probably also an intention of hurting witches.²

In cases where the image of a victim is made by an evilly-disposed person with a view to causing his hurt or death, the region of the heart is often pierced with a pin, and the victim then feels intense pain at the heart, of which he often dies.³

LITERATURE.—This is cited in the footnotes.

J. A. MACCULLOCH.

HEARTH, HEARTH-GODS.—1. EVOLUTION of the hearth.—A hearth is, technically, 'a piece of floor prepared to receive a fire.'⁴ The Eng. word 'hearth' and its synonyms in other languages are reminiscent of an early stage of culture, of one-roomed houses, in which one fire served for cooking and for warmth. Central in the primitive round-hut, as in the neolithic huts of Italy, it was merely a part of the beaten-earth floor, a depression, or small, shallow pit. In this form the fire-place is an oven, such as is made in camping-grounds to-day by wild peoples. The use of pottery tended to replace this depressed hearth by a level or raised area. Meanwhile the original oven was lined with stone, brick, or tiles. In another development a movable receptacle or firepan was placed in the pit. From this came the brazier or chafing-dish, the portable grate employed for heating purposes, and the stationary grate itself. In early times the sieve-form is often modified for either use. Sieve and grate are ventilated fire-pans, and as such differ from the closed oven. A third development, also denoted by the term 'hearth,' is the plate of tiles or of iron, originally the level area round the fire.⁵ The evolution of heating- and of cooking-apparatus and methods follows these three lines. The closed receptacle has such forms as the porcelain heating-stoves of northern Europe. This method is also that of the plate, and the modern radiator is an extension of the same principle to hot water. Similar was the Roman system of hot air circulating in the hollow brick wall. Cooking follows the two chief methods of the oven and the grill. One of the first developments of domestic architecture involved the removal of the fire to the side-wall or a corner of the room. Later, the multiplication of rooms split up the hearth; the original combined cooking and heating centre remained as the kitchen-fire and oven, a mere 'office,' the social sentiment of the 'fireside' being transferred to the chief of the living-rooms, and later vaguely distributed over the house as a whole.

At that stage of early culture which was marked by the organization of religion, the methods and sentiments of the domestic system were applied to the houses of the gods. The altar of burnt-offering is a magnified kitchen-hearth, the fire-altar a magnified heating brazier, luxury being shown in the scented fumes rather than in the comfort of its warmth.

Among primitive peoples who have not developed the permanent hut, and in their camping-grounds, continually changed, employ a mere shelter or *wurley* (Australian) of brushwood, the pit-oven

⁵ 'The hearth includes properly the entire floor from the back lining of the fireplace to the outermost edge of the incombustible material. . . . In builder's language the hearth is a slab of stone . . . which is outside the fireplace proper.' On this rest the supports of the mantel (which is derivable from the lower [see below], the fender, and the fire-irons. This latter meaning is the popular modern connotation of 'hearth,' as distinguished from fireplace (Sturgis, s.v.).

and the camp-fire are distinct. The camp-fire here has the associations of the 'fireside'; the natives sleep close to it, and spend hours talking together in the warm sphere of its influence. The embers are carefully guarded from extinction during the day. But, as the civilized hearth was for ages a combination of cooking-stove and heating-apparatus, and its form is evolved from the primitive oven, it is necessary to describe the latter.

To make his cooking-oven, the Australian native digs a hole in the ground, and makes in it a fire of wood. When this is burning well, stones are placed on it. The moment these are red-hot, the food to be cooked is placed on them; green leaves are used to prevent scorching. Grass is spread over the food, and water sprinkled. The mass is then tightly covered with earth.¹ Throughout the South Seas this method is universal; in many cases the oven is permanent, and generally is of a more elaborate character than the Australian. The pit is about 2 feet in diameter, and varies from 6 inches to a foot in depth. Its walls and floor are beaten hard; in clay soil the texture soon becomes that of burnt brick. Charcoal as well as wood is used for the fire. Stones of the size of the fist are placed in a layer above the fire. When they are red-hot, the woman-cook removes them and clears the embers out of the oven, in which the stones are now placed. A layer of green leaves on the stones is sprinkled with water; green leaves are also placed round the sides of the oven. The food being put in, mats are laid upon it; earth covers these, and is well pressed and beaten to prevent any escape of steam.² The principle is a sort of dry boiling.

The stage at which a fire-receptacle is placed in the hearth-pit may be illustrated by the modern Bedawin. The oven is a vessel sunk in the ground, above which is an iron plate, the *tajen*, 'hearth.' This is specially employed for baking bread. The hot-stone method also is used for cooking various food-stuffs. Both methods are common throughout the East.³

The ancient Hebrews used the hearth-pit both for cooking and for warmth. Like the fire-place still used by many of the poor in Eastern Asia, it was in the centre of the one-roomed house, and its smoke escaped through an opening in the roof. This method may be regarded as practically universal at a certain stage of culture. Early Greece and early Italy possessed it. The *atrium* of the Italians was originally dining-room and kitchen in one; it was developed from the neolithic round-hut. The early Greek *μέγαρον*, or one-roomed house, which later was the hall, had the *ἑστία* or *τοῦρα* in the centre of the floor. When the *παράδος* took the place of the *μέγαρον*, the *ἑστία* was possibly retained there, or may have been transferred to the dining-room, *ἀνδράων*, since food-offerings were placed in it before meals.⁴ In the same way the Italian *atrium* lost both of its functions: the kitchen, *culina*, received the cooking-fire; the living-rooms were warmed by braziers, *foculi*,⁵ until the hypocaust system was introduced. The sacred associations of the *focus* were preserved in the lamp which always burned before the Lares, whose original place was on the hearth. A niche

was often retained for them by the side of the kitchen hearth. Both Greek and Latin houses of the well-to-do in the most highly developed periods possessed private chapels. Possibly this was, in some Greek instances, a room of the *θόλος* type. This was not the case with the Roman *lararium*. The developed kitchen fire-place was a structure of masonry or brick, a foot above the floor. But it still retained the primitive 'fire-pit' character, since a rim of masonry converted it into a receptacle. An arched opening at one side served as a 'chimney' for fuel.⁶

In Teutonic lands the central hearth of the one-roomed house lasted among the poor into the later Middle Ages. Its previous universal employment cannot be understood unless we take into account the large size of the central hall in the houses of the well-to-do. The differentiation of the one house-fire into hall-fire and kitchen-fire was here of early date. The introduction of the chimney involved the change of position to the side-wall of the room. Till the 16th cent. the fire-place was built without a recess; a hood, or louver, above the hearth and containing the entrance of the flue, solved the problem of smoke.⁷ The large recess admitted of a semi-circular gathering round the fire (the primitive gathering round the central hearth was circular), and such pieces of furniture as the 'settle' assisted the 'fireside' sentiment, as they ministered to the comfort of the hearth.

The evolution of the fire-place among the Hebrews was similar to that among the Greeks and Latins. The fire proper was relegated to the kitchen. In the houses of the rich the brazier or chafing dish was used for warmth.⁸

The Hindus have preserved longest the combination of kitchen and dining-room—a fact, it may be said, not unconnected with the climatic conditions of India. The portable clay fire-pan is the eastern brazier. The kitchen is divided into two unequal parts, the smaller serving for the culinary operations.⁹

2. The hearth in religion.—The conception of the hearth as the centre of the house and home lends itself to metaphor. A remarkable case is the employment in the modern science of optics of the Latin word for a 'hearth,' *focus*, to denote the central point at which rays of light converge. The use of the term as a verbal 'focus' for sentiments of domesticity and family solidarity is notable in the Latin phrase *pro aris et focis*. In English 'hearth and home' is representative of what is perhaps the strongest example of the association. 'Hearth' was also a synonym for 'home.'

Hearth-cults emphasize in some cases the combination of fire-place and fire, in others the fire, in others again the figures of divine beings brought into connexion with the hearth. Among the latter, the sacredness of both components is derived from ideas of family life. They thus appropriately meet at its material centre.

The original connotation of the Greek term *ἑστία* seems to have been the hearth with its fire. (See the 'Greek' article below.)

The worship of Vesta by the Romans was purely public. It has the look of a revival from a Græco-Italic cult, if the goddess was not actually borrowed from Greece. (See the 'Roman' article below.)

The Scythians honoured Hestia, whom they called *Taširt*, as chief of all deities (Herod. iv. 59).

In Indo-Iranian cultus the sacred fire assumes greater importance than the hearth or altar, so far as personalization is concerned. But the receptacle is sacred. Sacredness also attaches to the house-fire and cooking-apparatus of the modern Hindu

⁹ *Id.* 44.

(see FOOD), whose kitchen is usually his dining-room. Orthodox Brāhmins still maintain a special room for fire-sacrifices, the *homa-sālā*, on the ground-floor. Ancient custom distinguished two degrees of piety, the one being represented by the *homa-sālā*. In ordinary circumstances the 'householder' was satisfied with a single hearth of burnt clay for his sacrifices. This was the *grīhṣāgni*, 'household fire.' Its close connexion with family sentiment is shown by the important part it played in marriage-ceremonial. The details show its connexion with the preparation of food, and, generally, with the well-being of the future family. The sacred fire was kindled for the marriage-ceremony by friction of the sacred *aranyā* wood. West of it were placed the millstones for corn-grinding, and a set of the indispensable condiments. At its north-east was a water-jar. The groom led the bride round the fire and the water, saying, 'I am male, thou art female; come, let us marry.' At each circuit she stepped upon the stones. *Gṛh* was offered in the fire. Various ceremonial 'steps' for various forms of well-being were taken by the bride, in auspicious directions. The fire was taken by the young couple to their new home, and installed in a special room. No one might breathe upon it; nothing impure was thrown into it; and it was never used for warming the feet. This fire and room were sufficient for ordinary domestic ceremonies during life. The Vedic ceremonies, *brauta-karman*, called for the *homa-sālā*. Three differently shaped hearths or fire-pans, *ukhā*, were here required. The erection of any fire-altar was *Agni-karman*. The three hearths were the *gārhapatya*, the *āhavanīya*, and the *dakṣiṇa*, the fire in each having a different name. The primitive pit appears here; in it the *ukhā* was placed. The *gārhapatya* is a term applied to the ordinary householder's single hearth. It was built of bricks, laid according to the way of the sun, the *deasil* of Celtic custom. Eight bricks were laid in a cruciform formation within a circle. The *Satapatha-Brāhmaṇa* gives elaborate details. The clay was bound together with resin and goat's hair. A lotus leaf was a frequent ornament of the centre of the *ukhā*. The symbolism was equally recondite, and curiously echoes that of the fire-sticks. The receptacle is female, the fire male. The *ukhā* is a womb. *Prajāpati* was poured into it, as seed. The *gārhapatya* corresponds to the world; it is the hearth of the ordinary man. The *āhavanīya* corresponds to the sky, the *dakṣiṇa* to the air. The sacred fire was a symbol of present divinity, of 'God with us, the brilliant guest' in the heart of the family. Morning and evening the household worshipped round it, feeding it with consecrated chips of *amudh*, sacred wood, from the *palāsa* tree, and sharing a ceremonial meal of rice and *gṛh* with it. This is the *homa*-sacrifice. The fire had to be kept burning always. The theory was that the flames which witnessed the union of man and wife should also light the pyre for the burning of their bodies after death.¹

The Zoroastrian religion consecrated both the public fire-altar and the domestic hearth. Still, wherever Persia is found, an everlasting fire, the *Bahrām* fire, is maintained 'by a more than Vestal care.' It is fed with perfumes and perfumed wood. To extinguish it is a mortal sin. The spreading of its flames slays thousands of demons, as *Bahrām* slays them in Heaven. If it should be put to profane uses, it must be taken for rehabilitation to 'the Right Place of the Fire,' *dāityō-gātu*.²

If in Zoroastrianism fire overshadowed in de-

velopment the hearth, in Teutonic belief and custom religion has been overshadowed by domestic sentiment. In early times the roof-tree had almost the sacred characteristics of Vesta's laural at Rome. Grimm compares with the *lar* and *penas* the *hāring* or *stefigot*, a spirit that dwells beneath the hearth, and is seen issuing thence by the peasants' imagination.³ The repeatedly recurring notion that the spirits of the dead dwell beneath the hearth may be attributed to its central position in the primitive dwelling, and to its being sunk in the ground. In Homeric religion, communication is made with the under world by digging pits, as with the upper world by raising altars. Thus the two forms of hearth, the fire-pit and the raised fire-place, not only serve as centres of family worship and of public cultus, but bring together the gods above and the gods below, after differentiating them.

Among the Damaras (Ovaherero) of South Africa there was a remarkable cult of the hearth.

'The chief's daughter,' says Anderson, 'is to the Damaras what the Vestal was amongst the ancient Romans, for, besides attending to the sacrifices, it is her duty to keep up "the holy fire." Outside the chief's hut, where he is accustomed to sit in the daytime, a fire is always kept burning, in case of rain or bad weather, it is transferred to the hut of the priestess [sic]; this is the chief's hut, who, should it be inadvisable to change the site of the village, precedes the migration, a portion of this consecrated fire, every possible care being taken to prevent it being extinguished. A portion of such fire is also given to the headman of a group when about to remove from that of the chief. The duties of a Vestal then devolve on the daughter of the emigrant.'⁴

The girl is probably the daughter of the chief's favourite wife. Later accounts supplement this, while correcting it. The residence of the chief is the *otyzero*, the 'holy house,' corresponding to the fetish-houses of West Africa. In front of this is kept perpetually burning the *akuruo*, 'holy fire.' A nasal phrase, corresponding to the Greek *tertia*, is 'the place of the holy fire.' The fire is made by means of two sticks (see art. FIRE, FIRE-GODS), the one of which is the *ondume*, and the other the *otyzia*. The *ondume* represents the *omkuru*, 'ancestor deity'; the *otyzia* his wife. The symbolism of male and female is as marked here as in the Aryan *aranyā* sticks. When a death has occurred, the soul of the dead is vaguely identified with 'the ancestor deity.' We might put it that his personality is merged in the *omkuru*; thus a series of ancestors may be regarded as one individual. The 'embodiment' of the dead man's soul in the fire-stick is equally vague, but really believed, just as is the embodiment in snakes which belongs to the creed of the Kaffirs. The *otyzero* is technically the principal house of the chief. The chief's eldest unmarried daughter, *omuatye ondangere*, has charge of the sacred fire, which must never be allowed to go out. She officiates in certain social ceremonies like a priestess. The chief himself is similarly a priest for his people. Her popular name is 'the big girl'; another title is 'Favourite.' With the ashes of the sacred fire she or her mother, 'the big woman,' paints the faces of the warriors before they set out on expeditions. Near the sacred fire is a stone seat for the use of the chief and the medicine-man. Often there is more than one holy fire in a village. Every head of a household also possesses one, at which he performs the ceremony of naming his children. This may also be performed at the *otyzero*. The child is perhaps 'introduced' to the *omkuru*. The father takes it in his arms and announces the name. For the ceremony of circumcision, performed between the ages of 4 and 7, the meat (which is holy, *sacra*) is cooked at 'the place of the holy fire.' A portion of it is kept in the holy house for some weeks. Ap-

⁴ *SBZ* iv. [1898] p. lxvii.

parently this is an offering to the *omkuru*; at the end it is eaten by the chief ceremonially. All the meat at the circumcision ceremony is presented to the *osondume*, the fire-sticks representing the ancestor and his wife, that they may 'consecrate it without tasting'—the ceremony of *tova*. The ceremony of mutilation of the teeth, which is performed when a boy is 8 or 10, takes place in front of the holy hearth. The ceremony of anointing and dressing the bride for the bridal feast is also performed here, and the meat to be eaten is consecrated, as before, at the place of the holy fire. When the husband has brought his bride to his own village, he and she go through ceremonies at his native *okuruo*. Sick persons are carried to the *okuruo*. A prayer is chanted to the *omkuru*: 'See, Father, we have come here, with this sick man to you, that he may soon recover.' Meanwhile meat cooked on the holy fire is carried round and round the patient. When death occurs in a *werft*, the inmates desert it for a time, after burying the dead within it. When they return in due time to build on the old site, the ceremony of 'approach to the ancestor deities' is performed, as is also the case with the place of the holy fire belonging to the chief, in times of drought, or war, or pestilence. The holy fire of the *werft* which they have now deserted is extinguished. No brand of it is taken; the fire in the new *werft* on the old site must be made 'from the *omkuru*', i.e. with the *ondume* and the *otysia*. On arriving they make the lamentation for the dead, and exclaim: 'See, Father, we are here!' The dead man is now the *omkuru*. New fire is then made on the holy place, and a sheep is slaughtered near it. This is termed 'the sheep of the holy fire,' and persons of all ages and of both sexes are allowed to eat of it. Meat is consecrated and placed on the grave. The medicine-men take the opportunity of knocking on the floor to elicit information as to the future from the *omkuru*. The ceremony is termed *ondyamberero* or *okuyambara*, 'approach to the deities.'

The connexion of the hearth with ancestor-worship is natural and inevitable. It is found in China.¹ According to the Taoist books, there is a Spirit of the Hearth, who periodically reports to Heaven all ill deeds of the household. Here, too, is found the tabu against stepping over sacred objects. To stride over food or the hearth is a sin.² The figure of an ancestor is carved on the pillar of the Maori fire-place.³ It is suggested that the Latin male divinity of the hearth may have been an ancestor.⁴ In Borneo the hearth of the Bahau chief is 'sacred to spirits.' From it each householder takes a morsel of earth to build his own hearth, and lights from its flames the first fire in his new home.⁵ In Russian folklore the hearth has its connexion with the family ancestors.⁶ The Southern Slavs believe that the extinction of the fire on the hearth means the extinction of the family.⁷ This people, like the Hindus, make the family-hearth play a conspicuous part in such family ceremonies as marriage.⁸ The Lithuanians possessed a 'domestic god,' *Dinstipan*, who directed the smoke up the chimney.⁹

The common family-rite of flinging portions of the family-meal into the hearth-fire is probably an act of ancestor-worship. This 'worship' may

exist without ever being formulated into a cult; it is a testimony, in all its stages, to the central importance of the family in human life and society. The connexion of the hearth with both sentiment and cult is to be regarded as an irreducible psychological association. To name a few cases of the offering to the hearth—it is found among the ancient Greeks, Latins, and Slavs, the Mexicans, and the Hindus.¹ The principle followed by the last-mentioned people is

'that before a man begins eating he ought to consecrate and purify his food by making offerings of small portions of cooked rice and other food to all the deities through whose favour he is himself fed, and more especially to Fire, who is the bearer of the offering to heaven . . . the whole ceremony resolves itself into a form of homage offered to the gods who give the food, and to the god of fire without whose aid this food could not be prepared for cooking.'
